LUZAC & CO.

## AUTHORS OF ARTICLES IN THIS VOLUME

Names in square brackets in this list are those of authors of articles reprinted or revised from the first edition of this Encyclopaedia or from the *Shorter Encyclopaedia of Islam*.

An asterisk after the name of the author denotes those articles reprinted from the first edition which have been brought up to date by the Editorial Committee; where an article has been revised by a second author his name appears within square brackets at the end of the article after the name of the original author.

- M. ABDUL HAL, University of Dacca.

A. ABEL, University of Brussels.  
A. ADAM, Institut des Hautes-Études Marocaines, Rabat.  
*the late* A. ADYAN ADIVAR, Istanbul.  
F. R. ALCHIN, University of Cambridge.  
R. ANHEUGER, Istanbul.  
W. 'ARAFAT, University of London.  
R. K. ARAT, University of Istanbul.  
A. J. ARDREY, University of Cambridge.  
[C. VAN ARENDONK, Leiden].  
E. ASHUR, Hebrew University, Jerusalem.  
J. AUBIN, Institut Français, Teheran.  
G. AWAD, Baghdad.  
D. AYALON, Hebrew University, Jerusalem.  
FR. BABINGER, University of Munich.  
F. BAJRACKAREVIĆ, University of Belgrade.  
J. M. S. BALJON JR., Blankenham, Netherlands.  
[W. BARTHOLD, Leningrad].  
[H. BASSET, Rabat].  
[R. BASSET, Algiers].  
A. BAUSANI, Istituto Universitario Orientale, Naples.  
M. CAVID BAYSAN, University of Istanbul.  
L. BAZIN, École des Langues orientales, Paris.  
A. S. BAZME ANSARI, Karachi.  
S. DE BEAURECUEIL, Cairo.  
[C. H. BECKER, Berlin].  
C. F. BECKINGHAM, University of Manchester.  
A. F. L. BEESTON, University of Oxford.  
[A. BEL, Tlemcen].  
N. BELDICEANU, Paris.  
[M. BEN CHENED, Algiers].  
A. BENIGSEN, Paris.  
C. C. BERG, University of Leiden.  
S. VAN DEN BERG, London.  
J. BERQUE, Collège de France, Paris.  
W. BJÖRCKMAN, Uppsala.  
K. BLANCHÉ, University of Paris.  
[J. F. BLUMHARDT, London].  
[T. J. DE BOER, Amsterdam].  
D. J. BOLOT, Cairo.  
S. A. BOMERAKER, University of Leiden.  
C. E. BOWORTH, University of St. Andrews.  
G.-H. BOUSQUET, University of Algiers.  
*the late* H. BOWEN, University of London.  
J. A. BOYLE, University of Manchester.  
H. W. BRANDS, Földa.  
W. BRAUSE, Free University of Berlin.  
[C. BROCKELMANN, Halle].  
R. BRUNSCHWIG, University of Paris.  
[F. BUCH, Copenhagen].  
J. BURTON-PAGE, University of London.  
A. CAPEHOĞLU, University of Istanbul.  
C. CARIEN, University of Paris.  
M. CASARD, University of Algiers.  
R. CAROT-REY, University of Algiers.  
[B. CARRE DE Vaux, Paris].  
M<sup>me</sup> H. CARREZ D'ENCAUSSE, Paris.  
W. CASSELL, University of Cologne.  
E. CERULLI, Rome.  
M. CHADLEY, Hamako.  
CHAFIK CHIBRATA, University of Cairo.  
G. L. M. CLAUSSON, London.  
G. S. COLIN, École des Langues Orientales, Paris.  
M. COLOMBE, École des Langues Orientales, Paris.

R. ETTINGHAUSEN, Freer Gallery of Art, Washington.  
H. G. FARMER, Glasgow.  
J. FAULBÉ, École des Langues orientales, Paris.  
L. FEKETE, University of Budapest.  
H. FLEISCH, Université St-Joseph, Beirut.  
R. N. FRYE, Harvard University.  
J. W. FOCK, University of Halle.  
A. A. A. FYZER, University of Jammu and Kashmir.  
F. GABRIELI, University of Rome.  
L. GALAND, École des Langues orientales, Paris.  
M<sup>me</sup> P. GALAND-PERRET, Paris.  
E. GARCÍA GÓMEZ, University of Madrid.  
L. GARDET, Paris.  
C. L. GEDES, American University, Cairo.  
R. GHIRSHMAN, Institut Français, Teheran.  
M. A. GHUL, University of St. Andrews.  
H. A. R. GIER, Harvard University.  
[F. GIESE, Breslau].  
S. GLAZER, Washington.  
H. W. GLIDDEN, Washington.  
N. GLECK, Cincinnati.  
S. D. GOTTEN, University of Pennsylvania.  
M. TAYIB GONKILGIL, University of Istanbul.  
[I. GOLDZIEHER, Budapest].  
H. L. GOTTSCHALK, University of Vienna.  
E. GRÄF, University of Cologne.  
A. GROHMANN, University of Cairo.

- A. GUILLAUME, University of London.  
 MOHAMMAD HABIB, Muslim University, Aligarh.  
 G. LAKESTER HARDING, Arabian.  
 [A. HAFNER, Vienna].  
 P. HARDY, University of London.  
 J. B. HARRISON, School of Oriental and African Studies, London.  
 [R. HARTMANN, Deutsche Akademie, Berlin].  
 W. HARTNER, University of Frankfurt.  
 L. P. HARVEY, Oxford.  
 R. L. HEADLEY, Dhabran.  
 [J. HELL, Erlangen].  
 [B. HELLER, Budapest].  
 [K. HERZFELD, Chicago].  
 U. HESD, Hebrew University, Jerusalem.  
 R. L. HILL, University of Durham.  
 S. HILLESLOM, London.  
 HILMY AHMAD, University of Cairo.  
 M. G. S. HODGSON, University of Chicago.  
 W. HORSERBACH, University of California, Los Angeles.  
 P. M. HOLT, University of London.  
 [E. HODGKINS, Brussels].  
 [J. HÖRIG, Strasbourg].  
 [J. HOROVITZ, Frankfurt].  
 F. HOURS, Beirut.  
 [M. TH. HOUTSMAN, Utrecht].  
 I. HREBEK, Oriental Institute, Prague.  
 [C. L. HUBBY, Paris].  
 A. HUGO MIRANDA, Valencia.  
 A. J. W. HUISMAN, Leiden.  
 G. W. H. HUYSTON, University of London.  
 H. R. IDRIS, University of Algiers.  
 HALIL ISALCIK, University of Ankara.  
 SH. ISAYATULLAH, University of the Panjab, Lahore.  
 [W. JAVRY].  
 FAHRIZ, University of Istanbul.  
 the late A. JEFFERY, Columbia University, New York.  
 J. JOMIER, Cairo.  
 J. M. B. JONES, School of Oriental and African Studies, London.  
 [TH. W. JOYKROLL, Utrecht].  
 E. Z. KARAI, University of Ankara.  
 IRFAN KAYAR, University of California, Los Angeles.  
 the late R. A. KERS, University of Leiden.  
 M. KHALAFALLAH, University of Alexandria.  
 W. A. S. KHALID, American University, Beirut.  
 H. KINDERMANN, University of Cologne.  
 J. J. KISSLING, University of Munich.  
 M. J. KISFER, Haifa.  
 L. KOPF, Jerusalem.  
 M. PEAD KOWRICK, Ankara.  
 [T. KOWALSKI, Cracow].  
 J. KRAEMER, University of Erlangen.  
 R. F. KREUTER, Vienna.  
 KANIM KUREKI, Ankara.  
 E. KURDEL, Free University of Berlin.  
 E. KURBAN, Istanbul.  
 F. KOSMAUL, Stuttgart.  
 Miss A. K. S. LAHRYN, University of London.  
 C. J. LAMM, Örebro, Sweden.  
 [H. LAMUREN, Beirut].  
 J. M. LANDAU, Hebrew University, Jerusalem.  
 D. M. LANE, University of London.  
 H. LAROUT, Collège de France, Paris.  
 J. D. LATHAM, University of Manchester.  
 J. LEBER, École des Langues orientales, Paris.  
 M<sup>me</sup> CH. LE COEC, Paris.  
 R. LE TOURNEAU, University of Aix-Marseille.  
 the late E. LÉVY-PROVENÇAL, University of Paris.  
 R. LEVY, University of Cambridge.  
 T. LEWICKI, University of Cracow.

- B. LEWIN, University of Gothenburg.  
 B. LEWIS, University of London.  
 G. L. LEWIS, University of Oxford.  
 I. M. LEWIS, Hargeisa, Somaliland.  
 the late E. LITTMANN, University of Tübingen.

## LIST OF transliterations

## SYSTEM OF transliteration OF ARABIC CHARACTERS:

Consonants			Long Vowels	Diphthongs
ا	lexcept when initial	آ	ā	aw
ب	b	ك	k	ay
ت	t	ل	l	
ث	ṭh	م	m	īyy (final form ī)
ج	ǧ	ن	n	ūww (final form ū)
ح	ḥ	ه	h	
خ	kh	و	w	u
د	d	ي	y	i
ذ	ḏh			
ر	r			

ا; at (construct state)

ا (article), al- and - (even before the antero-palatals)

## PERSIAN, TURKISH AND URDU ADDITIONS TO THE ARABIC ALPHABET:

پ	p	ځ	ǧh	ڤ	f	ڙ	z
ڄ	ǧ	څ	ǧh	ڄ	ǧ		

## Additional vowels:

- a) Turkish: e, i, o, ö, ü. Diacritical signs proper to Arabic are, in principle, not used in words of Turkish etymology.  
 b) Urdu: ē, ô.

For modern Turkish, the official orthography adopted by the Turkish Republic in 1928 is used. The following letters may be noted:

c = ڇ	ğ = ځ	j = ڄ	k = k and ځ	t = t and ڤ
ç = ڇ	h = h, ځ and ځh	ş = ځh	s = s, ځ and ځh	z = z, ځ and ځh

## SYSTEM OF transliteration OF CYRILLIC CHARACTERS:

а	a	е	e	к	k	п	p	ф	f	ш	sh	ю	yu
б	b	ж	zh	л	l	р	r	х	kh	ы	y	я	ya
в	v	з	z	м	m	с	s	ц	ts	ь	ʹ	ѣ	ě
г	g	н	n	т	t	ч	ch	ѡ	o	ѣ	ě		
д	d	ѣ	y	о	o	у	u	ш	sh	ѡ	o		

## ADDENDA AND CORRIGENDA

- P. 1<sup>a</sup>, 'ADARDA, l. 6 read limit.  
 P. 2<sup>a</sup>, read ABAGA.  
 P. 3, ABARQURAD, Bibliography, add: G. C. Miles, *Abarquddis, A new Umayyad Mind*, in *American Numismatist*, Nov. 1952, 115-120.  
 P. 7<sup>a</sup>, l. 4 from below, for *al-shih-seven* read *shih-seven*.  
 P. 8<sup>a</sup>, 'ADARDA, l. add to the bibliography: Naser Allah Falsafi, *Zindagani-yi Shih 'Abbas-i Awwal*, Tehran 1953-; Miguel Asín Palacios, *Comentario de Don García de Silva y Figueroa de la embajada que de parte del Rey de España don Felipe III hizo al Rey Xa Abbas de Persia*, Madrid 1928; N. D. Mikhuch-Maclay, *K sepsou n nalogovoy politike v Iran pri Shakhie Abbasa I ...*, in *Sovetskoe Vostokovedenie*, vi (1949), 348-53; E. Kühnel, *Hân 'Abbas und die Diplomaten: Ber. v. Gahâgîr und Schah 'Abbas I*, ZDMG xvi (1942), 171-86.  
 P. 13<sup>a</sup>, l. 18, for 'Abbas Bilim I read 'Abbas I.  
 P. 21<sup>a</sup>, l. 36, read A. H. 407 al-Mukaddil.  
 P. 41<sup>a</sup>, l. 29, for 68/686-8 read 68/687-8.  
 P. 45<sup>a</sup>, l. 26, for by al-Zubayr read by 'Abd Allah b. al-Zubayr.  
 P. 47, 'ADD ALLAH B. AL-HUSAYN, Bibliography, add: M. Khadduri, *Fertile Crescent Unity*, in R. N. Frye, ed., *The Near East and the Great Powers*, Cambridge (Mass.) 1951, 137-177.  
 P. 57<sup>a</sup>, l. 66, for Abu Harith read Abu Harith.  
 P. 57<sup>a</sup>, add: 'ADD AL-AZIZ B. 'ADD AL-RAHMAN Ibn Abi 'AMIR [see 'AMIRIDS].  
 P. 58<sup>a</sup>, 'ADD AL-AZIZ B. MARWAN, Bibliography, add: U. Rizzitano, 'Abd al-'Aziz b. Marwan, *governatore umayyade d'Egitto*, in *Rend. Lin.*, series iii, vol. ii, fasc. 5-6, 1947, 341-347.  
 P. 58<sup>a</sup>, l. 59, for 30 March read 30 May.  
 P. 59<sup>a</sup>, l. 50, 'ADD AL-AZIZ AL-DIHLAWI, read *Shih*.  
 P. 60, add 'ADD AL-DIHLAWI, Abu 'L-MARWAN [see AL-DIHLAWI].  
 P. 60, add 'ADD AL-DIHLAWI B. 'ADD AL-KARIM [see AL-KARIM].  
 P. 60, add 'ADD AL-DIHLAWI AL-AKHBAR [see AL-AKHBAR].  
 P. 60, add 'ADD AL-HAKK B. SAYF AL-DIN, Bibliography, add: Kh. A. Nizami, *Hayat Shaykh 'Abd al-Hakk Muhaddith Dihlawi*, Dhili 1953.  
 P. 61<sup>a</sup>, l. 46, after born Febr. 1852 add at Istanbul.  
 P. 61<sup>a</sup>, l. 30, for in 1937 read on 12 April 1937 at Istanbul.  
 P. 61<sup>a</sup>, l. 42, for Vâdigar-i Harp read Vâdigar-i Harb.  
 P. 61<sup>a</sup>, l. 2, for Wasil read Wasil.  
 P. 63<sup>a</sup>, 'ADD AL-HAMID II, l. 2, for 5th of 30 read 8th of 40.  
 P. 63<sup>a</sup>, l. 10 from below, for former read later.  
 P. 64<sup>a</sup>, l. 42, for *immedil* read *immedil*.  
 P. 64<sup>a</sup>, l. 42, for 1894 read 1899.  
 P. 65, Bibliography, last line, for 1343 read 1943.  
 P. 71, add 'ADD AL-KARIM B. 'ADJARRAD [see Ibn 'ADJARRAD].  
 P. 72<sup>a</sup>, l. 30, for *lâ'nâ* read *Fayyûda*.  
 P. 73<sup>a</sup>, l. 15, after son of 'Abd al-'Aziz [q.v.] add *born 30 May 1868*.  
 P. 76, add 'ADD AL-MALIK B. HUSAYN [see Ibn HUSAYN].  
 P. 78, add 'ADD AL-MALIK B. ZUHR [see Ibn ZUHR].  
 P. 80, add 'ADD AL-RAHIM B. 'ALI [see AL-RAHIM AL-FARUK].  
 P. 80, add 'ADD AL-RAHIM B. MUHAMMAD [see Ibn KURATA].  
 P. 91, add 'ADD AL-SALAM B. AHMAD [see Ibn AHMAD].  
 P. 91<sup>a</sup>, in Bibliography, for Kunushahjani read Gümüşhâhânî.  
 P. 97<sup>a</sup>, 'ADD EPRIND, l. 4, for 1704 read 1774.  
 P. 102<sup>a</sup>, l. 24, art. ABRADA, for 640-650 A.D. read 340-350 A.D..  
 P. 103<sup>a</sup>, l. 20, after item, le *Maison*, 1953, 339-42, add item, *La persécution des chrétiens himyarites au sixième siècle*, Istanbul 1956.  
 P. 105<sup>a</sup>, l. 42, for al-hâjar al-Miri read al-hâjar al-Miri.  
 P. 106, 'ABU 'L-'AYNA', Bibliography, add Qubûg, *Hayawana*, index; 'Akalânî, *Lisân al-misîn*, v, 344-46; Safadi, *Hayawana*, 265; Ch. Pellat, in *RSO*, 1952, 66.  
 P. 109<sup>a</sup>, l. 8, from below, for 1330/1273 read 1330/1274.  
 P. 109<sup>a</sup>, l. 4, from below, for 1333/1279 read 1004/1299.  
 P. 109<sup>a</sup>, l. 3, from below, for 'Uthman III read 'Uthman II.  
 P. 111<sup>a</sup>, l. 66, for Nahîr<sup>am</sup> read Nahîr<sup>am</sup>.  
 P. 117<sup>a</sup>, l. 27, for al-Kahânî read al-Kahânî.  
 P. 117<sup>a</sup>, l. 15, read Akbar nama, iii.  
 P. 118<sup>a</sup>, l. 30, after Najjâl 1353, add and Cairo 1368/1949.  
 P. 118<sup>a</sup>, l. 63, for Hamâh read Hamâh.  
 P. 119<sup>a</sup>, l. 40, for Takwîn read Takwîn.  
 P. 123, ABU HANIFA, F. Rosenthal points out that the name of the grandfather (Zuf' or Zuph) corresponds to the Aramaic word for "small"; Abû Hanifa was therefore probably of local, Aramaean descent.  
 P. 125, ABU HATIM YUSUF B. MUHAMMAD, [see RUSTUMIDS].  
 P. 126<sup>a</sup>, l. 36, for al-Mahdist read al-Mukaddast.

# A

AARON [see HĀRŌN]

ĀB [see TA'KĪSH]

'ABĀ' [see KĪSĀ']

'ABĀBDA (sg. 'Awwāḍ), an Arabic-speaking tribe of Bedja (q.v.) origin in Upper Egypt with branches in the northern Sudan. The northern limits of their territory in Egypt is the desert road leading from Kena to Kusayr, and their nomad sections roam the desert to the east of Luxor and Aswān. The original 'Abābda stock is most truly represented by the nomads but there are also sedentary sections who have intermarried with the *fallāḥin* and adopted much of their way of life. On the Red Sea coast there is a small clan of fisher-folk, the Kīrayḍiyyā, who by some are not recognized as true 'Abābda.

Like the rest of the Bedja the 'Abābda claim Arab descent, and the genealogical table of 'Abbād, their eponymous ancestor, begins with Zubayr b. al-'Awwān, a famous companion of the Prophet. Some of the tribesmen living in the Sudan believe that they are descended from Salmān, an Arab of the Banū Hīlāl. Though doubtless fictitious in respect of the tribe as a whole this claim to Arab descent yet embodies a genuine memory of the process by which *Ḍuhayna* and Rabi'a Arabs acquired an ascendancy in the Sudan through marriages with the daughters of Bedja chiefs, amongst whom descent was originally reckoned in the female line. This process which according to Ibn Khaldūn led to the passing of the Nubian kingdom into the hands of the *Ḍuhayna* must also have taken place in the case of the Bedja.

The Abābda have been affected by Arab influence more strongly than those Bedja who still retain their Hamitic tongue, so much so that in the Sudan they are not easily distinguished from the Sudan Arabs of the *Ḍja'īyyin* group. They may in fact be held to occupy an intermediate position between the Bedja proper and the fully arabicized elements who have become integrated in the Sudan Arabs. In their physical characteristics, nevertheless, the 'Abābda together with the Tigre-speaking Banī 'Amīr bear a closer resemblance to the proto-Egyptian inhabitants of the Nile valley than the other Bedja. The Arabic spoken by the 'Abābda is quite distinct from that of the *fallāḥin*, and the word lists collected by H. A. Winckler contain an appreciable number of Bedja words.

In their material culture and their customs the 'Abābda agree more closely with the Bedja proper than with the Arabs. Certain wide-spread customs which they share with the Sudan Arabs, such as the infibulation of girls and the ceremonial respect of in-law-relations, are of Hamitic origin. The

'Abābda use the typically Bedja style of hairdressing (*dirsa*) which has given rise to the nickname Fuzzy-wuzzy, though this custom now tends to die out. Their tents of palm-matting are quite unlike the Arab 'houses of hair'. Their marriages, like those of the Bedja proper, are matrilineal but their women do not enjoy the freedom which is allowed to their sisters of the Bighāriyyin. The 'Abābda moreover share with the Bedja, but not the Arabs, certain taboos connected with milk: only men may do the milking, for which only gourds and wicker vessels may be used, and no man may drink of the milk he has drawn until someone else has drunk.

The influence of Islam, which nominally is the religion of all the 'Abābda, has made a marked impression only on the more sophisticated elements; in the life of the majority religion, as distinct from traditional beliefs and superstitions, plays no important part. They venerate *shaykh* Abū 'I-Ḥasan al-Shādhūl as their patron saint, and his tomb in the Atbal desert is a place of pilgrimage at which sacrifices are offered. It is also common to dedicate the milk of a beast to al-Shādhūl, and the milk of such animals is always milked into separate wicker vessels. When slaying an animal a piece of the victim's right ear is reserved for al-Shādhūl or some other well-known saint and hung on the tent-pole. The celebration of the 'Id al-kabīr at the tomb of al-Shādhūl is the most important religious event of the year. Sacrifices are also offered at the tomb of the eponymous ancestor 'Abbād near Edfū, and there is a cult of a female saint (*faṣṣa*) who lived some fifty years ago and was famous for gifts of divination. The 'Abābda like the Bighāriyyin believe that an animal sacrificed at the tomb of a saint turns into a gazelle or ibex, and that such animals are protected by the saint. They also observe certain taboos about birds and will not eat the flesh of the sandgrouse or the desert-partridge, and both 'Abābda and Bighāriyyin are particularly afraid of killing the bearded vulture (*Gypaetus barbatus*).

The most important section of the Egyptian 'Abābda, of whom there are some 14,000, are the 'Ashshūbāb, who are divided into a number of clans. Their paramount *shaykh* are descended from one *Ḍjabrān* who flourished towards the end of the 18th century, and beyond whom there is no reliable historical tradition. The largest and best known sections in the Sudan are the Fakarā and the Mīlaykīb who, according to tradition, were brought to their present habitat by the Funj kings of Sennār in order to protect the caravan routes between Egypt and the Sudan. A small contingent of 'Abābda, characterized by Cailliaud as the worst

soldiers in the army, were employed as irregulars by Ismā'īl Paṣṣa during the invasion of the Sudan. During the 19th century the 'Abāda are often mentioned by travellers as guides and camel men between Korosko and Abū Hamad, and their chiefs of the Khālita family held posts of distinction under the Egyptian government. Huwayy Khālifa was *sauḍ* of Berber at the time of the Mahdist rebellion, and 'Abāda irregulars shared in the fighting against the Darwishes. Apart from traditions about wars with neighbouring tribes there are no data for their early history.

**ABAD** originally means time in an absolute sense and is synonymous with *dahr* (q.v.; see also *Zamān*).

When under the influence of Greek philosophy the problem of the eternity of time (see *KIDĀM*) was discussed in Islam, *abad* (or *abadīyya*) became a technical term corresponding to the Greek term *ἀφθαρτος*, incorruptible, eternal *a parte post*, in opposition to *azal* (or *azaliyya*) corresponding to the Greek term *ἐντελής*, ungenerated, eternal *a parte ante*. (Ibn Rushd—cf. ed. Bouyges, index—uses *azaliyya* for "incorruptible".) (For *azal* see *KIDĀM*.) As to the problem concerned, viz. if the world is incorruptible, the philosophers of Islam subscribed to the Aristotelian maxim that *azal* and *abad* imply each other, that what has a beginning must have an end and what has no beginning cannot have an end. According to this theory time, movement and the world in general are eternal in both senses. Among the theologians who all believe in the temporal creation of the world, only Abū 'Ishāq, one of the earlier Mu'tazilites, admitted the Aristotelian maxim mentioned. He applied the theory "that what has a first term must have a last one" even to God's knowledge and power, saying that God having arrived at the final term of His power, would not be able any more to create even an atom, to move a leaf or to resuscitate a dead mosquito. See al-Khayyārī, *al-Tuhfah*, ed. Nyberg, 8 ff.; Ibn Hanzlī, *al-Faṣṣah*, 102 ff. who also opposed the Aristotelian dictum by the argument that if the world were without a beginning, at the present moment an infinite past would have been traversed, which is impossible (cf. *KIDĀM*); in the future, however, there is no such impossibility, since in the future no infinite will ever be traversed. Besides, the series of past events is not infinite but no final one, and a man may have eternal remorse, although his remorse must have a beginning (al-Mahdī, *al-Bad' wa-l-Ta'wīḥ*, ed. Huart, 1, 125, cf. 1, 133). They concluded therefore that there is no rational proof either for the incorruptibility of the world or its opposite. According to the Qur'ān, xxxix, 67, on the Day of Judgment "the whole earth shall be His handful and the heavens will be rolled up in His right hand". It became the orthodox view that the annihilation of the whole world (including the destruction of heaven and hell, which, however, will not happen, as is known by revelation) is possible, *qadā*, considered as something in God's power (al-Baghdādī, *Faṣṣah*, 150). This world (*al-dunyā*) will be destroyed, but not heaven and hell.

**Bibliography:** The problem is treated in extensive by al-Ghazālī in ch. ii of his *Tahfāt al-Falāsifa*, ed. Bouyges, 80 ff.; cf. Ibn Rushd, *Ta-*

*hḥūt al-Tahfāt*, ed. Bouyges, 118 ff., tr. by S. van den Bergh, 69 ff. (with notes); cf. also S. Pines, *Beiträge zur islamischen Atomlehre*, 15, note 1. (S. VAN DEN BERGH)

**ABĀDAH**, a small town in Persia, on the eastern (winter) road from Shīrāz to Isfāhān. By the present-day highway Abādāh lies at 280 km. from Shīrāz, at 204 km. from Isfāhān, and by a road branching off eastwards (via Abarkūh) at 100 km. from Yazd. In the present-day administration (1952) Abādāh is the northernmost district (*shahristān*) of the province (faṣṭ) of Fārs. The population is chiefly engaged in agriculture and trade (opium, castor-oil, sesame-oil). It had possibly "the key" to Fārs?) is another small town belonging to Abādāh. The whole district counts 223 villages with 82,000 inhabitants. In history it is chiefly mentioned in the 14th century. The town must be distinguished from several homonymous villages in Fārs (Abāda-yi Taḡh in the Nūr district, etc.). **Bibliography:** Le Strange, 297; Ma'adī, *Qiyāfāt-yi-yi muḥāsasāt*, 1311, II, 223; *Farhang-i diwānī-yi-yi Irān*, vii, 1330/1951, p. 2. (V. MINORSKY)

**ABĀDĀN** (see *ABDĀN*)

**ABĀDĀSH** (see *ABDĀSH*)

**ABĀKA** (see *ABĀKĀH*)

**ABĀN** (see *TA'ĀKĀH*)

**ABĀN a. 'ABD al-HAMĪD al-LĀHĪK** (i.e. son of Lāhik b. 'Ufayr), also known as al-Rakāhī, because his family (originally from Fārs) were clients of the Banū Rakāhī, Arabic poet, died about 805/85-6. He was a court poet of the Sāsānid king and wrote panegyrics in their praise and the praise of Hārūn al-Rashīd. He also defended in some verses the 'Abbasids against the pretensions of the 'Alids. In the usual manner of the epoch he engaged in vigorous exchanges of lampoons with his fellow poets (among them Abū Nuwās). His enemies accused him, without justification, it seems, of Manicheism (see G. Vajda, in *RSO*, 1937, 207 f.). His most important achievement was the versification in couplets (*muzdawij*, q.v.) of the popular stories of Indian and Persian origin: *Kallīa wa-Dinnā* (q.v.; samples in al-Sūfī, *Diwan* *wa-Yūḍaf* (q.v.), *Sinbad* (q.v.), *Maṣṣad* (q.v.) and the renowned stories of *Arzakh* and *al-Nusrawān*. He wrote also original poems in *muzdawij*, such as a poem on cosmology and logic (*Ḍihā al-Hudā*) and one on fasting (sample in al-Sūfī). Many members of his family, his son Hamdān for instance, were also known as poets.

**Bibliography:** Sūfī, *al-Aṣṣab*, ed. Heyworth Dunn, Section on Poets, 1-73 (pp. 1-12 being a collection of poems about Abū 'Abd al-Hamīd); *al-Aghānī*, ix, 73-8; *Ḍihāb al-Wuṣṣā*, 259; al-Rhāzī, *Ta'wīḥ* *Baghdād*, vii, 44; *Fihrist*, 119, 163; I. Goldziher, *Moslem Studies*, i, 198; cf. 101; A. Krinsky, *Aban al-Lahik* (in Russian), Moscow 1933; Brockelmann, S i, 238-9; K. A. Faris, in *JRAS*, 1952, 46-59. (S. M. STEEN)

**ABĀN a. 'UTHMĀN a. 'ABĀN**, son of the son of the third caliph. His mother was called Umm 'Amr bint Dūndab b. 'Amr al-Dawṣayy. Abān accompanied 'Alī at the battle of the Camel in Dūndabā 1 36/Nov. 656; on the battle terminating otherwise than was expected, he was one of the first to run away. On the whole, he does not seem to have been of any great importance. The caliph 'Abd al-Malik b. Marwān appointed him as governor of Madīna. He occupied this position for seven years; he was then dismissed and his place was taken by Hishām b. Ismā'īl. Abān owes his celebrity not so

much to his activity as an official in the service of the Umayyads as to his wonderful knowledge of Islamic traditions. The *Kuṭb al-Maghāzī*, sometimes ascribed to him, is, however, according to Yāqūt (*Iḥṣān*, i, 36) and al-Tūṭī (*Fihrist*, 7) of Abān b. 'Uthmān b. Yāyā (see J. Horowitz, in *OLE*, 1914, 183).

Abān was struck with apoplexy and died a year later at Madīna in 105/723-4 according to report, at any rate during the reign of Yazīd b. 'Abd al-Malik.

**Bibliography:** Ibn Sa'd, v, 112 ff.; Nawawī, 125 ff. (K. V. ZETTERSTERN)

**ABANŪS** (variants: *ĀBINŪS*, *ĀBUNŪS*, *ABNŪS* and *ĀBUNŪS*), eponym. The word is derived from the Greek *ebanos*, which passed to the Aramaean (*abnās*) and then to Arabic, Persian, Turkish etc. Although ebony had been already known in the old days in the East, where it was imported from India and Ethiopia, it was very little used at the early times of Islam, on account of its rarity and the scanty demand for artistic goods. Absolute faith must not be given to the story according to which, when the Mosque of the Rock was being built at Jerusalem under the Umayyad caliph 'Abd al-Malik, the venerable rock was enclosed with a palisade of ebony. It is certain that this wood had been already used under the caliphs together with ivory in the manufacture of chess-men (see *SHATRANJ*) and dice, in mosaics of the sort very often used later with great skill on furniture, doors, lattice work and wainscots (see *KIDĀM*).

As a medicine, ebony was known to the Muslims as early as the ninth century from the translations of Dioscorides and Galen. It was considered to be a useful astringent for phlyctenous inflammation and chronic catarrh of the eyes; it was also taken internally in the form of a powder for the bowels and stomach, and was dusted over burns. According to Dioscorides, Abyssinian ebony was generally considered to be more efficacious than Indian. To the former were ascribed the properties which at the present time are only found in the wood of the *Diospyros* and the *Maba* kinds of the East Indies, of Indonesia, of Madagascar, and of Mauritius. It is an intense black colour and a fineness of grain that makes it possible to distinguish the *fibra*. The African species of ebony which the Arabs prefer, are nowadays rightly held in little estimation. In particular the ebony tree of Abyssinia (*ghudjar haban*), is according to A. E. Brehm (*Reise*, aus *Nordafrika*), more of a brush than a tree. Its wood, though not of an excellent quality, can be used, but it is not suited for tables and seats.

**Bibliography:** Abū Manṣūr Muwaffak, *al-Awṣay* (Seligmann), 31; Ibn al-Bayṭar, *Bilāḥ* 1291, 8; transl. Leclerc, *Notices d'Extrats*, xxiii/1, 16; Kāzawī (Wüstenfeld), i, 247. (J. HEIL)

**ABARKUBĀDH**, one of the sub-districts (*shahristān*) of Herāt, according to the Sāsānid division adopted by the Arabs, belonging to the district of *al-azad*, A. Ḥarā Khwāh Shāhī, Bahānī (the district of the Tigris) and comprising a tract of land along the western frontier of Khuzistān, between Wāṣit and Baṣra. The name is derived from the Sāsānid king Kawādīh (Kubādīh) I. The first part of the name is probably *Abar* (P. *abar* or *ab* "elbow" is often seen at the beginning of place-names) and not *Abaz* or *Abāz* as the Arab geographers have it. Some Arab authors give *Abarkubādīh* as the name of the district in which Arrāḍān is situated, but that seems to spring from a mistake.

**Bibliography:** Ibn Khurādādhbih, 7; Kuṭāma, *al-Kharādī* (de Goeje), 233; Yāqūt, i, 90; Balādhūri, *Futūḥ*, 344; Ibn Sa'd, vi/13; Tabarī, i, 2386, II, 1123; Th. Nöldeke, *Gesch. d. Perser u. Arab. z. Zeit d. Sassaniden*, 146, n. 2; M. Streck, *Babylonien n.d. Arab. Geogr.*, i, 15, 19.

(M. STRECK)

**ABARKŪH**, a small town belonging to Yazd and lying on the road from Shīrāz to Yazd (at 39 farsakhs from the former and at 28 fars. from the latter) and also connected by a road with Abādāh (q.v.). It lies in a plain, and according to Mustawfī, *Nuḥḥa*, 121, its name ("on a mountain") refers to its earlier site. In 443/1051 Taghribeg gave Yazd and Abarkūh to the Kākāyīd Fāzīmāz (Ibn al-Athīr, ix, 384) as a compensation for the loss of Isfāhān. His successors continued to rule these towns as *atābeks*. In the 8th/14th century Abarkūh is frequently mentioned in the history of the Muẓaffarids. The oldest of the numerous ruins of Abarkūh is the mausoleum built in 448/1056 by Fīrūzān, a descendant of the well-known condottiere of the 14th century, Fīrūzān of Ajlkawar (in Gilān). The so-called mausoleum of Tā'ib al-Haramayn was built (or rebuilt) in 728/1318 by a descendant (in the fifth generation) of a Majdī al-Dunyā wa-l-Dīn Tājī al-Ma'ālī Abū Bakr Muḥammad (a Muẓaffarid).

**Bibliography:** Le Strange, 284, 294, 297; P. Schwarz, *Iran*, i, 17; A. Godard, in *Abdār Irān*, 1936, 47-71; Mahmūd Kātib, *History of the Muẓaffarids*, in *GMS*, xiv, see Index in xiv/2; Kāsim Ḥanī, *Ta'wīḥ-i 'Aṣṣā* *Ḥāṣṣ*, i, 1321/1942, Index. (V. MINORSKY)

**ABARSHAHR**, the more ancient name of Nīshāpūr (q.v.), was the capital of one of the four quarters of the province of Khurāsān. Its name in Persian, according to the Muslim geographers, is said to mean "Cloud-city", but Marquart's etymology (*Erānshahr*, 74), the "district of the 'Arzāpūr" (comparing Armenian *Apar* *āyart*) is more reliable. It was sometimes given the honorific title of Irān-Shahr "City of Irān". Its mint-signature on Sassanian coins is *Apr*, *Apr* or *Apris*, forms which continue to appear on the dirhams of Arab-Sassanian type struck by the Muslim conquerors (from 54/673-4 to 69/688-9). Under the Umayyads its Arabic name appears on the Post-Reform dirhams from 92/709-10 to 97/715-6. The names of the Umayyad governors Ziyād b. Abī Sufyān and his sons 'Ubayd Allāh and Sulm as well as 'Abd Allāh b. Khāṣim all figure on the coins of Abarkūh. The later mint activities of the place continued under the name of Nīshābūr.

**Bibliography:** Le Strange, 383; J. Marquart, *Erānshahr*, Berlin 1901 (Abū G. W. Göt, N.S., III/ii, 66, 68, 74; J. Markwart, *A Catalogue of the Provincial Capitals of Erānshahr*, Rome 1911 (*Asiatica Orientalia*, III), 52-3; J. Walker, *A Catalogue of the Arab-Sassanian Coins*, London 1941, p. ci-cci, cvi, 36, 72, 74, 87-8; E. Herfeld, in *Transactions of the Intern. Congress of Numismatists*, 1936, 423, 426. (J. WALKER)

**ABASKŪN** (or *ABASKŪN*), a harbour in the south-eastern corner of the Caspian. It is described as a dependency of Dūndjān/Gurgān (Yāqūt, i, 25: "3 days' distance from Dūndjān; i, 91: 24 farsakhs). It might be located near the estuary of the Gurgān river (at Khodja-Nefes?). Al-Ishtakrī, 214 (Ibn Hawkal, 273) calls Abaskūn the greatest of the (Caspian) harbours. The Caspian itself was sometimes called *Bahr Abaskūn*.

Abaskūn possibly corresponds to Ptolemy's *Σαοκράειν* in Hyrcania (Gurgān). Several times Abas-

kün was raided by Rūs pirates (some time between 250-70/84-84, and in 297/909, see Ibn al-Fāridī, *Ta'wīh* i. *Tahsin*, ed. A. Eghbal, 266 [E. G. Browne's transl., 199], cf. also Ma'sādī, ii, 18; circa 300/912). In 617/1220 the Kh'āzīm-shāh 'Alī al-Dīn, tracked by the Mongols, sought refuge on "one of the islands of Abaskin", (see al-Dīnawaynī, ii, 115), and died there. According to Ibn al-Aḥḍīr, sili, 242, he possessed in Abaskin, too, a castle surrounded by water. The islands of Abaskin apparently correspond to the Aghar-ada group of islands and spits of land, divided from the Gurgin estuary by a strait.

**ABĀZA**, Turkish name for the Abazes (see ABĀZ), given as a surname to many persons in Ottoman history who descended from those people.

1) **ABĀZA PAŞA**, taken prisoner at the defeat of the rebel Djanbulad, whose treasurer he was, was brought before Murād Paşa and had his life spared only through the intercession of Khallīl, aga of the Janissaries, who, having become *kāpıdān-paşa*, gave him the command of a galley, and conferred upon him the government of Mar'ash when he was promoted to the dignity of grand vizier. Later he became governor of Erzurüm and planned to destroy the Janissaries; those in his province lodged a complaint against him; he was deposed, but refused to obey the orders of the Porte (1032/1623); he levied taxes and raised troops on the pretext of avenging the death of the sultan 'Uthmān II, marched upon Anıra and Siwa, and took Erzurüm, but did not succeed in seizing the citadel. In 1033/1624, the grand vizier Hıfzı Paşa defeated him in a battle near Kayseriya, at the bridge across the Kara-sü, owing to the defection of Tıyār Paşa and the Turkomen. Abāza took refuge at Erzurüm, of which he succeeded in having himself made governor on condition that he should assist a guard of Janissaries into the fortress. In 1036/1627, suspecting that the expedition against Abāza was in reality directed against himself, he massacred a great number of the Janissaries belonging to the army. His old master Khallīl besieged Erzurüm in vain and was obliged to retreat because of the snow (1037/1627). In the following year, the Bosnian Khurrew Paşa, having been made grand vizier, again besieged him and forced him to capitulate after a fortnight's siege; the rebel was granted his pardon and the government of Bosnia. There he again persecuted his enemies, the Janissaries, was deposed and went to Belgrade, where on a hill to the south of the town he erected Abāza K'öşki. Then he was sent to Widin and commanded the troops who invaded Poland (1633). Being honored with the confidence of Murād IV, he accompanied him to Adrianople when preparations were made for a new campaign against Poland; but his success excited envy; reports against him cleverly disseminated, estranged the sultan, who had him executed (29 Safar 1044/24 August 1634).

2) **ABĀZA HAN** had been given the command of the Turkomen of Asia Minor as a recompense for his capture of the rebel Baydar-oghlu. Having been dismissed for no reason, he revolted

In his turn, held the country between Gerende and Boln, defeated the old bandit Katirji-oghlu who had been sent to fight against him, and submitted on condition that he should have the title of *voivode* of the Turkomen; later as the result of complaints lodged against him, he was imprisoned in the Seven Towers and was only released after the deposition of Beylayı the position of Şahzāde al-Islām (1062/1652); his friend conferred on him the sandjak of Oljiri. When İspah Paşa, who was also one of the Abaza nation, was made grand vizier by Muhammad IV, he sent for him. At his execution he remained faithful to him, returned to Asia Minor with the remainder of his troops and regained the office of *voivode* of the Turkomen (1063/1653). He settled at Aleppo and committed such ravages in Syria that the Dīwān wanted to have him banished from the empire; the grand vizier, Sulaymān Paşa, however, confirmed him in his position of governor and entrusted the defenses of the Dardanelles to him. In 1066/1656 he was sent to Diyar Bakr as governor. Two years later he rebelled, put himself at the head of a considerable army under the pretext of demanding the dismissal of Muhammad Köprülü, at that time grand vizier, and threatened Iran. In the neighborhood of Iğhın he completely defeated Murtağ Paşa, who had been sent against him (15 Rab' I 1066/11 Dec. 1656); but he fell into a trap which had been set for him, left Syria for Aleppo to make terms for his submission and was treacherously assassinated there.

**Bibliography:** Hammer-Purgstall, v, 481, 560 ff., 563, 575, 634; vi, 35 ff., 55 ff.

3) **ABĀZA MUHAMMAD PAŞA** was the *besleyher* of Mar'ash when, during the campaign against the Russians (1813/1769), he was ordered to act in concert with the khān of the Crimea. He commanded the fortress of Bender and received the third fifth in recompense for the part he had taken in raising the siege of Choczin. Having been entrusted with the defense of this place and seeing himself abandoned by the Ottoman troops, he fled and was commissioned to defend Moldavia, which he failed to accomplish. At the battle of Kagul (1 Aug. 1770), he commanded the right wing; after the defeat of the Turks he fled to Izmā'li. Having been made governor of Silistria, he was dismissed after he had squandered the money given to him for the purpose of raising troops, and was exiled to Kustendil. At the time of the conquest of the Crimea, and the flight of Selim, he refused to lead the few troops he was bringing up and returned to Sinope; he was decapitated (1185/1771).

**'ABBĀD** b. **MUHAMMAD** [see 'ABBĀDIDS]

**'ABBĀD** b. **SULAYMĀN** al-SAYRAH (or al-DAYMAR), one of the Mu'tazila of Basra, died c. 250/864. He was a pupil of Hishām b. 'Amr al-Fuwa'i (fl. c. 210/825), like his father criticizing the main tendency of the school of Basra (that of Abu 'l-Hudhayl), and being in his turn criticized by Abu 'l-Hudhayl's successors, al-Djubbālī and Abū Hāshim. Our knowledge of his distinctive views comes mainly from al-Aḥḍīr's *Mabāḍī*.

He emphasized the difference between God and man, admitting that God might be called a "thing" in the sense that He was "other" (fl. c. 250). In particular he insisted that God is eternal, and that what

He eternally is must be independent of transient mundane things. Thus God is not eternally "bearing" and "seeing", since that involves objects heard and seen (ib. 173, 493); He is not "before all things" (ib. 196, 519); no accident (such as an apparently supernatural event) can afford a proof of God, in view of its transient character (ib. 215). In this way he came to distinguish between God's "active attributes" (*ṣifāt al-f'āl*) and His eternal attributes (ib. 179, 186, 495-500), being perhaps the first to work out this distinction which was later adopted by orthodox theologians.

He went to extremes in insisting that God does nothing that is evil in any respect, even denying that God made unbelieved vile (kabbī; ib. 227-8, 517-9), and maintaining that His punishment of the wicked in Hell is not evil. His political views (ib. 454, 458-9, 467) seem to aim at a reconciliation of various contemporary political groups, but the point has not been adequately studied.

**'ABBĀD** b. **ZIYĀD** b. Abī SUFYĀN, AḤ HARR, Umayyad general. Mu'āwīya appointed him governor of Sijistān, where he stayed seven years, in the course of his expeditions to the East, he conquered Kandahār. In 61/680-1 he was dismissed by Yazīd b. Mu'āwīya who appointed in his place his brother Salm b. Ziyād to be governor of Sijistān and Khurāsān. In 64/684, he joined in the battle of Marjī Rihit [p. 2], at the head of a contingent formed by his own *gens*. Afterwards he wished to return to Dīmat al-Djandal, but he was obliged to combat a lieutenant of al-Mukhtār b. Abī 'Ubayd [p. 2]. The date of his death is unknown.

**Bibliography:** Balādhuri, *Futūḡ*, 365, 397, 434; id., *Anṣāb*, v, 136, 267-8; Tabarī, ii, 191 ff.; Ibn Kutayba, *al-Ma'drif*, 177; *al-Aḡḡāni* i, xvii, 123 ff. (Cf. K. V. ZETTERSTEN).

**'ABBĀDĀN** (Ābbāsīs) stands on the south-west side of the island of the same name, on the left bank of the Shatt al-'Arab. It is believed to have been founded by a holy man named 'Abbād in the 8th or 9th century A.D. (the people of Basra used to add the termination "ān" to a proper name in order to change it into a place name). In those days 'Abbādān was on the sea coast, but with the gradual extension of the delta of the Shatt al-'Arab it is now over 30 miles from the head of the Persian Gulf. In the early 'Abbāsīd period 'Abbādān was a center of ascetics living in *riḡf* (L. Massignon, *Essai*, 135; Abu 'l-Atāhiya, *Diwān*, 218).

'Abbādān is described in the *Hudūd al-'Alam*, 179 (cf. also 192) as "a flourishing and prosperous borough on the sea coast. All the 'Abbādānī mats ... come from there, and therefrom comes the salt for Basra and Wasīt." Three and a half centuries later, when Ibn Battūta visited 'Abbādān, it was no more than a large village; it stood on a salty, uncultivated plain. In later times the inhabitants eliminated the salt from the soil bordering the river and planted the palm-groves which are now such a feature of both banks of the Shatt al-'Arab and of those of the Bahmaghir river on the north-east side of 'Abbādān island. 'Abbādān, however, remained a village until it was chosen, in 1909, as the site of the refinery of the Anglo-Persian Oil Co.

Since that time, it has increased enormously in size; in 1951 its population was nearly 200,000 and the refinery had become the largest in the world.

About 1935 Ridā Shāh, in pursuance of his policy of Persianizing Arabic names, changed 'Abbādān into Abādān.

**AL-'ABBĀDĪ**, Abū 'ĀSIM MUḤ. b. AHMAD b. MUḤ. b. 'ABD ALLĀH b. 'ABBĀD, often called al-Kaḍī al-Harawī, a well-known Shāfi'ite jurist. He was born in 375/985 in Harāt, studied there and in Nisābūr, and undertook extensive journeys on which he met numerous scholars. He finally became *hāfi* of Harāt and died there in 458/1066. He was notorious for his dark and difficult style of expression. Of his works, which al-Sukki enumerates, there have survived the *Tahkāt al-Shāfi'iyyin* (used by al-Ansārī) in several manuscripts, and the *Adab al-Kaḍī* in the commentary which his disciple Abī Sa'īd (or Sa'īd) b. Abī Ahmad b. Abī Yūsuf al-Harawī (d. about 500) wrote under the title *al-Iḡrīf 'alā Ghawmīd al-Hukamāt* (Sukki, iv, 37). His son Abū al-Hasan is the author of a *K. al-Rām*.

**Bibliography:** Sukki, *Tahkāt*, ii, 42 (with extracts from his works and a discussion of his style); Ibn Khallikān, no. 588; F. Wüstenfeld, *Schäfer*, no. 408; Brockelmann, I, 484; S. 669. (J. SCHACHT)

**'ABBĀDIDS** (Bābū 'Abbād), dynasty of Arab race which reigned for most of the 5th/11th century over the S.-W. of al-Andalus, with its capital at Seville (cf. *ṣaḥāḥ*).

It was at the moment of the disintegration of the Caliphate of Cordova and of the political dismemberment of the country by the petty kings known as the *taifas* (*mulūk al-ta'wā'if*) that the *hāfi* of Seville, Abū 'l-Kāsim Muḥammad b. 'Abbād, succeeded in being proclaimed ruler in 414/1013. The son of a celebrated Spanish-Muslim jurist of Laḡhmid origin, Isma'īl b. 'Abbād, he began, on first seizing power, by recognizing the suzerainty of the Hammūlid king Yahyā b. 'Alī, but soon threw off this wholly nominal mark of subordination. There is relatively little information on the details of his reign, which was mostly occupied in settling by force of arms his disputes with the *Djāwarids* [p. 2] of Cordova and the lesser baronies in southern Andalusia. He died in 433/1042.

His son, Abū 'Amr 'Abbād b. Muḥammad succeeded, in a reign of nearly thirty years (433-460/1042-69), in enlarging the territory of the principality of Seville to a considerable size by posing as the champion of the Andalusian Arabs against the Spanish Berbers, whose numbers, already large in the Iberian peninsula in the 10th century, had greatly increased since the period of the 'Amirid dictators.

On succeeding his father, the new king of Seville, then 20 years of age, took the princely title of *hāfi*, following the custom of the time, but a little later adopted the honorific *lubb* of al-Mu'tasid b. 'Alī, by which he is generally known. Gifted with real political qualities, it was not long before he showed his true character, that of an authoritarian ruler, as ambitious as he was cruel, and with few scruples in the choice of means to achieve his ends. Immediately after his accession he conti-

nued the struggle opened by his father against the minor Berber dynasty of Carmona (cf. *KARḤŪNA*), Muh. b. 'Abd Allāh al-Birzālī and the latter's son and successor Ishāk. At the same time al-Mu'tamid was preoccupied in extending his kingdom to the west, between Seville and the Atlantic Ocean. With this end in view he attacked and defeated successively Ibn Tayfur, lord (*ṣāḥib*) of Merota, and Muh. b. Yahyā al-Yahūḍī, lord of Niebla (cf. *NABLA*), who, notwithstanding his Arab descent, had unblushingly allied himself with Berber chiefs. In face of the success of the king of Seville, the other *malik al-awṣā'*, distrustful of him, formed against him a kind of league, which was joined by the princes of Badajoz (cf. *BATĀLYAWṢ*), Algeiras (cf. *AL-ḠADIRĀ* al-*SHADRĀ'*), Granada (cf. *ḠARNATĀ'*) and Malaga (cf. *MĀLAGĀ*). War broke out soon afterwards between the 'Abbādid of Seville and the Aftasid [g.e.] al-Muza'far of Badajoz; it was prolonged over many years, in spite of the efforts at mediation of the Eshwardi prince of Cordova, which bore fruit only in 431/1037. In the interval, while continuing to harass the frontiers of the kingdom of Badajoz, al-Mu'tamid did not remain inactive; he defeated, one after the other, Muh. b. Ayyūb al-Bakrī, lord of Huelva (cf. *WALBA*) and of Sales (cf. *ṢALĀTIN*) (whose son was the celebrated geographer), the Banū Muṣayn, lords of Silves (cf. *SILĀ*), and Muh. b. Sa'īd b. Hārūn, lord of Santa Maria de Algarve (cf. *SHANTAMARIYAT* al-*ḠĀRĪ*) and annexed their principalities. In order to justify these annexations al-Mu'tamid employed a somewhat clumsy stratagem: he claimed to have found the caliph Hishām II, who had died in obscurity some years earlier, and to be devoting himself tirelessly to restoring to him his former empire, entirely submissive and pacified. In order to protect themselves against the assaults of the king of Seville, the majority of the minor Berber chiefs in the mountains in the south of Andalusia acquiesced in this theatrical pretence, and paid homage both to the 'Abbādid and to the Commander of the Faithful, miraculously restored to light to serve the interests of al-Mu'tamid but at the same time carefully kept in seclusion by him. But their efforts were in vain. One day the 'Abbādid invited all these minor Berber princes and their attendants together to his palace at Seville and suffocated them to death in a bath-house whose openings he has walled up; by this means he appropriated Arcos (cf. *ARḤŪṢ*), seat of the principality of the Banū Khāzīm, Moron (cf. *MARḤŪṢ*), ruled by the Banū Dīnār, and Ronda (cf. *RUNDĀ*), capital of the Banū Ifrān (431/1038).

This action was enough to unloose the fury of the most powerful Berber prince in Spain, Bādīs b. Habbās the Zīrid [g.e.] at Granada, who alone seemed capable of standing up to al-Mu'tamid. When the war began, however, the latter found fortune still smiling on him, and soon afterwards seized Algeiras from the Hammūdīd prince al-Kāsim b. Hammūd. He then tried to capture Cordova, and for this purpose despatched an expedition under the command of his son Ismā'īl; but Ismā'īl sought to profit from the occasion to rebel and to create a kingdom of his own, with Algeiras as his capital. This venturesome project cost him his life. It also opened the political and agitated comings and goings, which ended in the payment to the count of Barcelona of a sum thrice as large, Ibn 'Ammār resumed his project of conquering Murcia, and soon realised it, thanks to the assistance of the lord of the castle of Bīḡ (now Vilches), Ibn Raḡhik. It was not long,

Bādīs routed the army of Seville, and the prince, in sad plight, threw himself into Ronda, whence he solicited and obtained his father's pardon. Al-Mu'tamid had long since discarded the fable of the pseudo-Hishām, which he no longer needed; he was by far the most redoubtable and most feared of the Spanish sovereigns; he had had no enemies but the Berbers, Muslims like himself, but far further removed from his Spanish-Arab social ideals than his Christian neighbours of the north. In other places, he might have been given the title of *Ẓarḥūmān*. When the powerful sovereign of Seville died in 461/1069, his son, Muḥammad b. 'Abbād, better known by his honorific lakab of al-Mu'tamid [g.e.], took possession of his greatly enlarged kingdom, which now embraced most of the S.W. part of the Iberian peninsula.

Already in the second year of his reign, al-Mu'tamid was able, despite the ambitions of the king of Toledo, al-Ma'mūn [g.e.], to annex to his kingdom the principality of Cordova, formerly ruled by the Dīhawīdī princes. The young prince 'Abbād was appointed governor of the former capital of the Umayyads. But on the instigation of the king of Toledo, an adventurer, named Ibn 'Ukkāsha, succeeded in seizing Cordova by surprise in 468/1075, and put the young 'Abbādid prince and his general Muh. b. Martín to death. Al-Ma'mūn took possession of the city, where he died six months later. Al-Mu'tamid, wounded both in his paternal affections and his royal pride, endeavoured for three years in vain to reconquer Cordova. He gained his object only in 471/1078; Ibn 'Ukkāsha was put to death, and all that part of the kingdom of Toledo lying between the Guadalquivir and the Guadiana were conquered by the armies of Seville. Yet at the same time it needed all the skill of the victor Ibn 'Ammār [g.e.] to bring an expedition of Alfonso VI of Castile against Seville to a peaceful conclusion, in return for the payment of a double tribute.

This was, in fact, the moment when, thanks to the tenacious vigour of the Christian princes in seeking to profit from the sanguinary conflicts waged against one another by the Muslim *malik al-awṣā'*, the reconquista—which had been arrested for a time and had even receded under the last Umayyads and the first 'Amīrid dictators—resumed its advance towards the south of the peninsula. Notwithstanding their successes, blazoned by the Muslim chroniclers, it must not be forgotten that from the middle of the eleventh century many Spanish Muslim dynasties were reduced to trying to gain, by means of heavy tributes, the temporary neutrality of their Christian neighbours. Shortly before the resounding capture of Toledo by Alfonso VI, in 478/1085, al-Mu'tamid began to find himself enmeshed in serious difficulties. On the imprudent advice of Ibn 'Ammār, he attempted, after the annexation of Cordova, to annex further the principality of Murcia (cf. *MURṢĀ'*), then governed by a ruler of Arab origin, Muh. b. Abīnād Ibn Tāhir. In 471/1078, Ibn 'Ammār paid a visit to the count of Barcelona, Ramon Berenguer II, and asked for his assistance in conquering Murcia in return for the sum of 20,000 dinars, as surety for the payment of which a son of al-Mu'tamid, al-Raḡhīd, would serve as hostage. After a series of agitated comings and goings, which ended in the payment to the count of Barcelona of a sum thrice as large, Ibn 'Ammār resumed his project of conquering Murcia, and soon realised it, thanks to the assistance of the lord of the castle of Bīḡ (now Vilches), Ibn Raḡhik. It was not long,

however, before Ibn 'Ammār in Murcia made himself intolerable to his sovereign. Betrayed by Ibn Raḡhīk, he was forced to flee from Murcia, and sought refuge successively at Leon, Saragosa and Lerida. On returning to Saragosa he endeavoured to assist its prince, al-Mu'tamīn b. Hūd (cf. *ḤUD*), in his expedition against Segura (cf. *ṢĠARĀḤ*), but was captured and handed over to al-Mu'tamid, who, notwithstanding the ties of friendship which had for so long bound them together, killed him with his own hand.

In the meantime Alfonso VI began to disclose openly his designs on Toledo, which he had begun to invest since 473/1080. Two years later, having sent a deputation to collect the annual tribute which al-Mu'tamid was paying to him, he learned that its members had been molested and that the Jewish treasurer Ibn Shālī, who had accompanied it, had been put to death because of his refusal to accept money of low standard. Thereupon he made an incursion into the kingdom of Seville, raided the flourishing townships of the Aljarafe (cf. *AL-ḤARAF*), struck across the district of Sidona (cf. *ṢIDŪNA*) as far as Tarifa (cf. *TARIFA*, *ṬARĪṬAT*), where he pronounced a celebrated phrase in which he boasted of having trodden the furthest bounds of Spain.

The capture of Toledo by Alfonso VI was a heavy blow to Islam in Spain. The king of Castile at once demanded of al-Mu'tamid the return of his possessions which had formerly been part of the present provinces of Ciudad Real and Cuencā. Throughout Muslim Spain his ever-increasing demands caused a particularly difficult situation. In spite of their unwillingness, the princes of Spain, with al-Mu'tamid at their head, were compelled to improve the aid of the Almoravid sultan, Yūsuf b. Tāshufīn (see *AL-MURĀBITŪN*), who had recently seized the whole of Morocco in an irresistible advance. It was decided to send him an embassy composed of the vizier Abī Bakr b. Zaydīn and of the kādīs of Badajoz, Cordova and Granada. The negotiations were successfully concluded, though not without difficulty; Yūsuf b. Tāshufīn finally crossed the Straits of Gibraltar, and inflicted on the Christian troops, on 22 Raḡab 479/23 October 1086, the bloody defeat of al-Zallākā [g.e.], not far from Badajoz. It need here only be briefly recalled that Yūsuf b. Tāshufīn, compelled to return to Africa, was unable to gain from his victory all the advantages for which the Spanish Muslim princes had hoped, while they, owing to the decisive influence exerted by the Spanish-Muslim princes on the Almoravids, rapidly lost all prestige in his eyes. After his withdrawal the Christian troops began again to harass the Muslim possessions, to such effect that al-Mu'tamid had this time to present himself in person before Yūsuf b. Tāshufīn in Morocco, to ask him to recross the Straits with his troops. Yūsuf agreed to his request and disembarked at Algeiras in the following spring (480/1088). He set out to besiege the fortress of Alsedo (Ar. *al-Ṣid*), without success, but under the stimulus of popular sentiment and the counsels of the *fakīhs* concluded that it would be of greater advantage to him to pursue the *ḡhāḥ* in Spain on his own account. From that time, he set himself to dethrone and dispossess the princes who had solicited his intervention, and it was not long before he was carrying his arms into the kingdom of Seville in order to take possession of it. An army commanded by the general Sir b. Abī Bakr by the end of 1090 seized Tarifa, then Cordova (where a son of al-

Mu'tamid, Fath al-Ma'mūn, was killed), Carmona, and finally Seville, which was taken in spite of a heroic sortie by al-Mu'tamid. The vanquished prince, made prisoner by the Almoravids, was at first sent with his wives and children to Taúnger, then to Meknes, and after several months to Agmān, not far from Marrākush. He passed a miserable existence there for some years, and died there in 487/1093, aged fifty-five years. With him, in these lamentable circumstances, ended the dynasty of the 'Abbādid, which may be regarded, notwithstanding the excesses and cruelty of its princes, as the most brilliant of the dynasties of the *taifa* and undoubtedly that under which the arts and letters shone most brightly in Muslim Spain of the eleventh century.

(E. LÉVI-PROVENÇAL)

'ABBĀS I, styled the Great, king of Persia of the Safawī dynasty, second son and successor of Muḥammad Khudābanda, was born on 1 Rama-dān 978/27 January 1571, and died in Māsāndarān on 24 Jumādā I 1038/29 January 1629, after a reign of 42 solar (43 lunar) years. In 980/1572-3 he remained at Harāt when his father moved to Shīrāz. In 984/1576-7 Ismā'īl II put to death the *lala* (tutor) of 'Abbās, and appointed 'Alī Kull Khān Shāmlū governor of Harāt with orders to execute 'Abbās himself. 'Alī Kull procrastinated, and when the death of Ismā'īl II (985/1577-8) rendered the order null and void, was made himself *lala* to 'Abbās by Muḥammad Khudābanda. Three years later 'Alī Kull read the *khutba* at Harāt in the name of 'Abbās, but, when threatened by the royal army, he re-affirmed his allegiance to Muḥammad Khudābanda at Ghūrīyān. Shortly afterwards his protégé 'Abbās fell into the hands of his rival Mursīd Kull Khān (Ṣā'idīlū, governor of Turbat, and in 993/1579 the latter marched on Kāzwin. Muḥammad Khudābanda was deposed, and 'Abbās became Shāh at the age of 16, with Mursīd Kull as his *waḥīd-i dīwān-i 'ālī*.

'Abbās, faced with the twofold task of enforcing his authority over the Kizilbāgh amirs, and of checking the encroachment on Persian territory of the Ottomans in the West and the Uzbeks in the East, at once created from the ranks of Georgian prisoners converted from Christianity a cavalry corps of *ghulāmīn-i ḥabshā-yi shāhī*, paid direct from the royal treasury. With their aid, and by a successful appeal to the loyalty of the *shāhī-sazān* [g.e.], he crushed a revolt of amirs, and followed this by ridding himself of the now too-powerful Mursīd Kull. The importance of the *ghulāmīn* gradually increased.

The appointment of Allāhwardī Khān to be governor of Fārs elevated a *ghulām* to equality of status with the Kīlābīsh amīrs, and eventually *ghulāms* filled some 20% of the local administrative posts. ‘Abbās systematically pacified the provinces of ‘Irāk-‘i-‘Adjam, Fārs, Kirmān, and Luristān. The local rulers of Gilān and Māzandarān were subjugated. In order to avoid fighting on two fronts, ‘Abbās signed in Constantinople in 998/1589 a peace treaty most unfavourable to Persia. The regions of Ādharbāydzān, Karabāgh, Gandīja, Karadāgh, with Georgia and parts of Luristān and Kuzestān were to remain in Ottoman hands, and a *lindert* was placed on the Shī‘ite obsequy of the early Caliphs.

‘Abbās entrusted to Allāhwardī Khān the reorganisation of the army on the lines suggested by Robert Sherley, an English adventurer then at the Persian Court. A new corps of 12,000 musketeers (*bulandī*), for the most part mounted, was recruited locally from the peasantry; the strength of the *ghulāms* was raised to 10,000 by further recruitment from the Georgian converts; 3,000 more were selected as *mudārim* or personal bodyguard to the Shāh; and a corps of artillery, comprising 12,000 men and 500 guns, was also recruited from the *ghulāms*, cannon being cast under the supervision of Sherley. ‘Abbās thus had a standing army of some 37,000 men.

After the death of the Shāykhānī ‘Abd Allāh b. Iskandar (q.v.) and ‘Abd al-Mu‘min, dynastic rivalries distracted the Uzbeks, and ‘Abbās was able to inflict on them a severe defeat at Harāt (1007/1598-9), and to recover Māghad and Harāt after ten years of Uzbek occupation. In a attempt to stabilise the North-East frontier, ‘Abbās installed at Balh, Marv and Astarābād Uzbek chiefs subservient to himself. But Bākī Muhammad, the new khān of Transoxania, re-occupied Balh (1009/1600-1), and though ‘Abbās led a force of 50,000 men against him, he was outmanoeuvred and forced to retreat (1011/1602-3), losing large numbers of men through sickness, and abandoning most of his new artillery. At this point hostilities in the East were suspended, but in the West ‘Abbās invaded Ādharbāydzān in 1012/1603-4, and occupied Nakhīwān and Erivan. The Ottomans under Cüghānāzāde suffered a signal defeat at Sis near Tābriz (1014/1605-6), with the loss of 20,000 men. Gandīja and Tiflis were taken by the Safawids. Internal disorders in Turkey confronted the hapless conduct of the war against Persia. Successive Turkish invasions of Ādharbāydzān were hampered by the Persian policy of devastating the regions of Cūghār Sa‘d and Nakhīwān and evacuating the inhabitants. Peace was eventually concluded at Sarāb in 1027/1617-8, but was broken by ‘Abbās in 1033/1623-4 when he took Baghdād and Dīyar Bakr from the Ottomans.

In other directions too ‘Abbās expanded Safawid territory. Bahrayn was annexed in 1010/1601-2, Shīrwān was reconquered in 1017/1607-8. With British aid, the island of Hurmuz was taken from the Portuguese in 1030/1620-1, but a long series of bitter wars in Georgia failed to result in permanent annexation, and ‘Abbās was finally forced to recognize the Georgian prince Taymurāz. Military necessity was often the pretext for the transference of large bodies of people to other regions. Some 20,000 Armenians from the Erzerum region were enrolled in the *ghulāms*; a further 300 families were moved from Iḡlūfa to Isfahān; the Karamān tribe of

Karabāgh was moved to Fārs in 1023/1614-5; and the influx of Georgians from Kakhētīa—150,000 prisoners were taken in the expedition of 1023/1616-7 alone—was a major factor in achieving that admixture of races and creeds by which ‘Abbās planned to offset the power of the Kīlābīsh.

Diplomatic contacts with European countries and with India were numerous during ‘Abbās’s reign, but all his efforts to create a European alliance against the Ottomans failed. Though careful to keep good terms with the Mughal Emperors Akbar and Dīshānqīr, he always regarded Kandahār, seized by Akbar in 999/1590-1, as Persian territory, and in 1021/1612-2 he re-occupied the city. ‘Abbās maintained friendly relations with the princes of Muscovy and the Tatar khāns of the Crimea. Foreign monastic orders, like the Carmelites, the Augustinians and the Capuchin Friars, were accorded permission to operate without hindrance. In 1007/1598-9 Sir Anthony Sherley, brother of Robert, was dispatched to Europe accompanied by a Persian envoy, Husayn ‘Alī Beg Bayāz, and visited Prague, Venice, Rome, Valladolid and Lisbon. Return embassies were sent by the Spaniards, the Portuguese and the English. The latter’s envoy, Sir Dodmore Cotton, was the first accredited English ambassador to the Persian Court.

‘Abbās improved communications by the construction of roads (notably the coast road through Māzandarān), bridges and caravanserais. He enriched Isfahān, which became his new capital in 1006/1597-8, with mosques, palaces and gardens; but he also built palaces at Kazwīn, and at Aghrāt and Farābād on the Caspian, where he spent an increasing amount of time in his later years. He explored the possibility of diverting some of the head-waters of the Kārn into the basin of the Zāyandā-Rūd.

Although endowed with great qualities, ‘Abbās could be ruthless, and his family fell victims to his desire for security. His father, Muhammad Khudābanda, and two brothers, Abū Tālib and Tahmīsp, were blinded and incarcerated at Alamūt; a son, Muhammad Bākī Mirzā, was executed on a charge of treason in 1022/1613, and another, Imām Kullī, was made *beir*-apparent in 1030/1620 during an illness of ‘Abbās, but was blinded on the latter’s recovery. Throughout his reign, ‘Abbās attached great importance to maintaining the *pir u-murād* relationship with his subjects: hence he made frequent visits to the Shī‘ite shrines of Isfahān, Māghad, where he repaired the damage caused by the Uzbeks, and, after their capture from the Ottomans, to those at Karbala‘ and Najaf.

(R. M. SAVORY)  
‘ABBĀS II and III (see SAFAWIDS)  
AL-‘ABBĀS B. ‘ABD AL-MUTTALIB, with the kunya Abū ‘l-Faḍl, half-brother of Muhammad’s father, his mother being Nutayya bint

Dīnāb of al-Namir. The ‘Abbāsī dynasty took its name from him, being descended from his son ‘Abd Allāh. Consequently there was a tendency for historians under the ‘Abbāsids to glorify him, and in his case it is particularly difficult to distinguish fact from fiction. He was a merchant and financier, more prosperous than his half-brother Abū Tālib, who, in return for the extinction of a debt, surrendered to him the office of providing pilgrims to Mecca with water (*shāyā*) and perhaps also in al-ḥudūd (*ḥūdūd*). Though he owned a garden in al-Ḥāḍir, he was not so wealthy as the leading men of the clan of ‘Abd Shams and Maḥmūd. There is no clear evidence of any *rapprochement* between him and Muhammad until 762/9 when he gave in marriage to Muhammad Maymūna, the uterine sister of his wife, Umm al-Faḍl Lubāba. Stories purporting to show that prior to this he supported Muhammad are suspect. Thus he is said to have acted as protector of Muhammad at the Assembly of ‘Akaba, and, while it is conceivable that he protected him during his last year or two in Mecca, there is no evidence that the clan of Hāshim revoked Abū Labāb’s refusal to give protection. Al-‘Abbās fought against the Muslims at Badr, was taken prisoner and then released, though whether he was or without a ransom is disputed. He joined Muhammad as he was marching on Mecca in 8/60, but his conversion was less influential than that of Abū Sufyān. Muhammad welcomed him, and after the submission of Mecca confirmed in his family the inherited office of the *shāyā*. He is said to have acted bravely at Hunayn, and by his stentorian shout to have turned the tide of battle. He settled around of Medina. Though one of those who contributed to the finances of the expedition to Tabūk, he possibly did not campaign in Syria, as is sometimes said. He was not on good terms with ‘Umar, but made a gift of his house for ‘Umar’s extension of the mosque in Medina. Muhammad is said to have given him an annuity from the produce of Khaybar, and ‘Umar, in revising the Persian roll, made him the equal of the men of Badr; but he was never given any administrative post. He died about 32/653 aged about 88.

(W. MONTGOMERY WATT)  
‘ABBĀS B. ABI ‘L-FUTŪḤ YAHYA B. TAMIM B. MU‘TIZ B. BĀḤ AL-SINĀHĪ, AL-APŪL RUKN AL-DIN ABU ‘L-Faḍl, Fāṭimid vizier, a descendant of the Zīrids (q.v.) of North Africa. He seems to have been born shortly before 505/1115, for in that year he was still a nursing. His father was then in prison and was banished in 509 to Alexandria, whither his wife Bullāra and the little ‘Abbās accompanied him. After Abu ‘l-Futūḥ’s death his widow married Ibn Salāh, a Fāṭimid vizier, one of the most powerful generals of the Fāṭimid empire. When, in 544/1149-50, the caliph al-Zāfir appointed Ibn Maḥdī to the position of vizier, which had for some time been vacant, Ibn Salāh revolted, marched on Cairo at the head of his troops and forced the caliph to invest him with the vizierate. It was during these troubles that ‘Abbās appeared for the first time on the political scene. He took the side of his

step-father and was entrusted by him with the pursuit of Ibn Maḥdī who had taken to flight. Ibn Maḥdī fell, and on 23 Dhu ‘l-Ḥiḍa 544/24 March 1150, Ibn Salāh made his entry into Cairo. During the following years ‘Abbās lived at the court of Cairo and his son, Nāṣir al-Dīn Naṣr, became a favourite of the caliph. In the beginning of 548/spring 1153, ‘Abbās was made commander of the garrison of Asḥkān, the last place the Fāṭimids still possessed in Syria. Before reaching Syria, however, at Bilhays, he decided—rumour had it, at the instigation of Usāma b. Munkidh (the various historians who mention Usāma’s role evidently follow one common source, of Cabot, *ib.*, note 2)—to assassinate his step-father and seize the vizierate. Naṣr, ‘Abbās’s son, returned secretly to Cairo, obtained the consent of the caliph, who idolized him, and assassinated Ibn Salāh, 6 Muharram 548/s April 1153. ‘Abbās returned as fast as he could and took possession of the vizierate, whilst Asḥkān fell into the hands of the Franks, 27 Dhuḥḍa I 548/20 August 1153. ‘Abbās did not enjoy the position he had won for long. According to Usāma (who was an intimate companion of Naṣr and took part in the events which he relates) ‘Abbās and his son Naṣr were deeply suspicious of each other, ‘Abbās thinking that the caliph was urging Naṣr to assassinate him. Usāma claims that Naṣr, who resolved together to kill the caliph, Naṣr lured the caliph to his house and assassinated him on the last day of Muharram 549/16 April 1154. Thereupon ‘Abbās charged the nearest male relations of the caliph with the crime. They were put to death and the minor son of al-Zāfir was placed upon the throne under the name of al-Faṭī b. Naṣr Allāh. These proceedings stirred up the court and the population; a message was sent to Tālī‘ b. Ruzzīk (q.v.), governor of Uṣṣūt, ‘Abbās, together with Naṣr, fled before him to Syria, but the Franks, warned by the enemies of ‘Abbās, surprised them near al-Muwayyib and ‘Abbās was killed, 23 Rabi‘ I 549/7 June 1154. Naṣr was captured and delivered into the hands of the Fāṭimid government and executed, Rabi‘ II 550/June-July 1155. The text of the *siyāḥ* announcing his arrival in Cairo is preserved in MS Brit. Mus., *Suppl.* 1140, fol. 67v.

(C. H. BEVERIDGE—S. M. STARR)  
AL-‘ABBĀS B. AL-AUNAF, ABU ‘L-Faḍl, an *ahī* poet of ‘Irāk, died, it seems, after 153/808. His family belonged to the Arab clan of Hanīfa, from the district of Basra, but had emigrated to Khuzestān. It seems, however, that the father of al-‘Abbās returned to Basra, where he is said to have died in 150/767 (al-Khāṭir al-Baghdādī, 153). Al-

b. 'Anbasa, an Arab general in the service of al-Mu'tasim utilized this discontent for the purpose of organizing a conspiracy, the object of which was to assassinate the caliph and to put al-'Abbās on the throne. The latter allowed himself to be persuaded; but the plot was discovered, and the conspirators paid for their attempt with their lives. Al-'Abbās died in prison at Manbij in 223/838.

AL-'ABBÁS B. MIRDĀS B. ABĪ 'AMR B. HĀRITHA B. 'ABD KAYR, of Sulaym, Arabian poet of the *mukhaḥḥarīn*. A sayyid in his tribe by noble descent on both sides, he was renowned as a warrior as well as a poet; although he did not come up to the fame of his stepmother, the celebrated al-Balāḥ, his poetical achievements surpassed those of his brothers and his sister all of whom displayed literary gifts and two of whom lived to compose elegies on his death. Impelled, so the story goes, by two dream experiences or epiphanies in which his family idiom, Dimār (not Dimād, cf. *TA*, iii, 353) announced its own downfall and the rise of the true prophet, al-'Abbās went to Medina to embrace Islam. Muhammad, who was at the time preparing for the conquest of Mecca, arranged for al-'Abbās to meet him with his tribesmen at al-Kudayd. Al-'Abbās returned to the Banī Sulaym and burned his idol while his wife, Haliba, returned to her people in indignation over her husband's conversion. Al-'Abbās kept his word and joined in the *fatḥ* *Makka* (630) with some 200 fully armed warriors. He was among the *mu'allafā* *ḥulāḥum*, those influential men whose loyalty Muhammad endeavored to secure by lavish gifts, but demurred when on the distribution of the booty taken from the Hawāzin at the battle of Hunayn (630) his present turned out substantially smaller than that of other leaders. As a result of a *ḥarida* of protest Muhammad satisfied al-'Abbās by increasing his share. After the *fatḥ* he withdrew to the territory of the Sulaym. He lived into the reign of 'Umar before whom he is reported to have appeared in a quarrel with another poet. Ibn Sa'd reports that he settled near Basra, often coming into town where the Basrians would take traditions from him. His son Dūbūma, too, appears as a talented poet of Hadra, the Prophet's. His offspring settled in and near Basra.

Al-'Abbās's poetical fame would seem to be due as much to his colourful personality as to the actual merits of his verse. His *mukāḥḥat* with his fellow-tribesman Qūḥfī b. Nadba, his poem upon his burning Dimār and accepting Islam, his protest against the Prophet's inadequate donation, and finally a *ḥarida* (*Amā'iyūn*, XXXVIII; cf. introduction, 12) originating in connection with a successful raid into the Yaman are perhaps the best-known of his poems, which it seems were never collected into a *diwān*. The available material gives evidence of a certain forcefulness but does not betray unusual talents. Some of his lines are interesting because of dialectal peculiarities, others because of the manner in which they reflect his experience of Islam.

(G. F. VON GRÜNBACH)

AL-'ABBÁS B. MUHAMMAD B. 'ALĪ B. 'ABD ALLĪH, brother of the caliph Abū l-'Abbās al-Saffāh and Abū Dja'far al-Manṣūr. 'Abbās helped to retake Malaya in 130/756, and three years later was appointed by al-Manṣūr as governor of al-Djazīra and the neighbouring frontier district. He was dismissed in 135/772, but his name continues to figure frequently in the history of the following years, however little important his political part may have been. He especially often distinguished himself in the wars against the Byzantines. In 139/775-6 he was put at the head of the troops which the caliph al-Mahdī mustered for an expedition against Asī Mīmār, and it was with great success that he acquired himself of the charge committed to him. He died in 126/802.

'ABBÁS B. NĀSĪH al-THAKAFI, Andalusī poet of the 3rd/9th century. He stayed for a long time in Egypt, Hǧāz and Yrāk, acquiring a broad culture. A confidant of the amir al-Hakam I, who appointed him as kadi of his native Algeria, he soon made a name for himself both as a philologist and a jurist. The *Muḥabba* of Ibn Hayyān has preserved numerous specimens of his poetry. He died at the end of the reign of 'Abd al-Rahmān II, circa 238/852.

**Bibliography:** Ibn Hayyān, *al-Muḥabba*, i (in press), fol. 129 f.; Ibn al-Faradī, *Ta'wīḥ*, no. 879; Makkarī, *Nafā*, index.

(E. LEVI-PROVENÇAL)

AL-'ABBÁS B. AL-WALID, Umayyad general, son of the caliph al-Walid I. Al-'Abbās owes his celebrity principally to the energetic part he took in the continual struggles of the Umayyads with the Byzantines. Concerning the details, the Arabic and Byzantine sources do not always agree. In the early part of the reign of al-Walid I, he and his uncle Maslama b. 'Abd al-Malik, took Tūwana, the most important fortress of Cappadocia. The Muslims had begun to be discouraged and 'Abbās had to display the greatest energy to succeed in stopping the fugitives and renewing the battle. The Greeks were forced to retire into the town, which was immediately invested and had to surrender after a long siege. Arab historians give Dūmāda II 88/May 707 as the date of the fall of the fortress, but the Byzantines put it two years later. For the following period, the Arabic chronicles mention many military expeditions undertaken by the two Umayyad generals, sometimes jointly, sometimes by one of them independently of the other. The most remarkable events were the taking of Sebastopol in Cilicia by 'Abbās, and of Amasia in Pontus by Maslama, in 93/712. In the following year, 'Abbās seized Antioch in Pisidia. He continued to support Maslama faithfully in subsequent battles. When, after the death of 'Umar II in 107/720, Yazid b. al-Muḥallab, the governor of Yrāk, fomented a dangerous insurrection, 'Abbās sent against him, first alone, then he and Maslama together. Yazid was killed in a battle against the caliph's troops in 102/720, and peace was soon restored. In the reign of Walid II, he first was intelligent and loyal enough to oppose the plot of his brother Yazid, whom he

warned, together with the other Marwānids, not to let loose by his revolts the *fitna*, which would prove fatal to the dynasty. But at the end he had to give in to violence and join the coup d'état of 126/744. Later he was thrown into prison by the last Umayyad caliph, Marwān II. He died in prison in Harrān, in an epidemic, in 132/750.

(K. V. ZETTERSTEN—F. GABRIELI)

'ABBÁS EFENDI (see BAHA'IS)

'ABBÁS HILMI I, victor of Egypt, born in 1813, son of Ahmad Tūm (1793-1816) and grandson of Muhammad 'Alī (g.n.). He succeeded to his uncle Ibrahim, who died in Nov. 1848. From his accession he showed great hostility to foreigners. The reforms undertaken during the preceding period he chose to consider as dangerous and blameworthy innovations that were best abandoned. Most of the schools opened by Muhammad 'Alī were closed, as well as the factories, workshops and sanitary institutions; he even gave orders to destroy the works of the Delta dam. Many forms, especially French, officials were dismissed. The result was, from the beginning of his reign, the decline of French influence; on the other hand, he drew nearer to Great Britain. Great Britain offered him its support in the conflict with the Ottoman government about the application in Egypt of the *taszīmāt* (g.n.). In exchange for this support, Great Britain obtained on 18 July 1851 the authorisation to construct the railway between Alexandria and Cairo. The opening of this line, which was planned to be extended to Suez, was meant to counteract the French project to cut the isthmus of Suez.

Distrustful, brutal, hard, and sometimes cruel, by nature, 'Abbās quickly became unpopular. It must be noted, however, that at least in the first years of his reign, his aversion to the reforms inspired by the West, helped, by a considerable decrease of the expenses, to relieve the poorest classes of the population. They were granted some remission of taxes and had less to suffer from corvée and conscription. Moreover, certain western and Egyptian historians have tried to explain the reactionary and xenophobic policy of 'Abbās by an ardent patriotism, which, allegedly, induced him to limit by all means the foreign influence of the consequences of which he was afraid; Sammarco, however, has refuted this assertion.

'Abbās, impelled by his mistrustful character to live in isolation, retired to his palace in Benha. He was strangled there by two of his servants, on 13 July 1854, in circumstances which were never wholly cleared up. He was succeeded by his uncle Muh. Sa'īd (g.n.).

**Bibliography:** *Précis de l'histoire de l'Égypte par divers historiens et archéologues*, vol. iv: *Les règnes de 'Abbas, de Saïd et d'Ismaïl* (1848-1879), by A. Sammarco, Cairo 1919, 1-17; G. Hanotaux, *Histoire de la nation égyptienne*, vol. vi, Paris 1935; J. Heyworth-Dunne, *Introduction to the History of Education in Modern Egypt*, London (1939), 285-312 and index. (M. COLOMBE)

'ABBÁS HILMI II, khedive of Egypt, born at Alexandria, 14 July 1874, died in Geneva 20

Dec. 1944. He studied in the Theresianum in Vienna together with his brother Muh. 'Alī (b. 9 Nov. 1875) and succeeded to his father, Muh. Tawfīq (g.n.), on 8 Jan. 1892. He soon came into conflict with the diplomatic agents and consuls general of England in Cairo, first Sir Evelyn Baring (Lord Cromer), and then Lord Kitchener (see *MSA*).

When in August 1914 the world war broke out, 'Abbās Hilmi was in Istanbul, where he had arrived in the summer. Having been wounded on 25 July in an attempt on his life, he remained in the Ottoman capital for treatment. From there he addressed to the Egyptians and Sudanese, on Turkey entering the war on the side of the Central Powers, an appeal to fight against the occupiers of his country. On the same day the state of siege was declared in Cairo. A month later, on 18 Dec., the British Government decided to put Egypt under their protectorate; on 19 Dec., the khedive was deposed and replaced by prince Husayn Kāmil, the eldest of the princes of the family of Muh. 'Alī.

During the war, 'Abbās Hilmi, kept in the background by the Young Turks, lived first in Istanbul and then in Vienna, whence he made several journeys to Switzerland. He spent in that country the last part of his life. In 1922, when Egypt became a sovereign and independent state (British declaration of 28 Feb. 1922), and the sultan Fu'ād (g.n.), successor of Husayn Kāmil, who died in 1917, took the title of king (15 March 1922), the ex-khedive was declared to have lost all his rights to the throne (this measure was not applied to "his direct and legitimate masculine descendants"; royal rescript of 13.4.1922, *Official Journal of Egypt* of 15.4. no. 38, extraordinary). His property was liquidated and he was forbidden to enter Egypt. Nevertheless, 'Abbās Hilmi had for some time many partisans in Egypt and it was only in May 1931 that he renounced "all pretension to the throne".

The ex-khedive had two sons, Muh. 'Abd al-Mun'im and Muh. 'Abd al-Kādir. The first (b. 20 Febr. 1899) was appointed, on the abdication of king Fārūk (26 July 1932) as a member of the regency council, and became, on Oct. 1932, sole regent of the kingdom until the proclamation of the Republic in June 1933.

'ABBÁS MIRZĀ, son of Fath 'Alī Shāh, born in Dhu l-Hijja 1203/Sept. 1780, in the small town of Nawā, died on 20 Dūmāda II 1249/25 Oct. 1835. Although not the eldest son, he was made heir to the throne because his mother also belonged to the Kādjār family. Europeans who knew him were unanimous in their praise of his bravery, generosity and other excellent qualities. R. G. Watson (*History of Persia*, 128-9) describes him as "the noblest of the Kājar race". He was passionately devoted to the military art, and, with the aid of, successively, Russian, French, and British officers and men, he introduced European tactics and discipline amongst his troops in Adharbāydjān, of which province he was Governor-General for many years. Despite his military reforms, he failed in his campaigns against the Russians, but he was successful in the war against Turkey in 1821-3.

He died at Mashhad during his father's lifetime; on Fāth 'Alī Shāh's death in the following year (1834), 'Abbās Mirzā's son Muḥammad succeeded to the throne.

**'ABBĀSA**, daughter of the caliph al-Mahdi, sister of the caliph Ḥārūn al-Raḡhīd and al-Hādī; it is to her that the locality Suwaykat al-'Abbāsa owes its name. She had three husbands in succession, who all predeceased her; this inspired Abū Nuwās to write some satirical verses, in which he recommended the caliph should he want to have a traitor killed, to marry him to 'Abbāsa. Her name is connected with the fall of the Barmakids through the amorous intrigue with Dī'fār b. Yahyā al-Barmakī, with which she is credited. According to al-Ṭabarī, Ḥārūn could not deprive himself of the society of either his sister or Dī'fār, so that, in order to have them both with him at the same time, he made them contract a purely formal marriage. They, however, were not contented with the form alone; and when Ḥārūn learned that they had children, and was convinced that the reports in circulation about them were true, he caused Dī'fār to be executed.—Some earlier historians than al-Ṭabarī do not mention this fact, especially it must be noticed that the commentators Abū Nuwās and al-Muḥallab give the names of 'Abbāsa's husbands without mentioning that of Dī'fār. Further, al-Ṭabarī, like the other chroniclers who repeat this story, only mentions it as one of the events which were reported to have caused Dī'fār's execution. Later chroniclers amplify the love-story of Dī'fār and 'Abbāsa more and more, until Ibn Khaldūn calls it truth in question, even if on grounds which are very conclusive for us. If one detail, found in the Persian Ṭabarī, must be believed, 'Abbāsa was already forty years old when her relations with Dī'fār began. It is quite certain that her second husband died eleven years before Dī'fār, and these figures put all ideas of a youthful romance out of the question. We must then resort to another, up to this anecdote as the product of popular imagination, to give a poetic aura to the fall of this favorite minister. This is the more likely in that pagan Arab stories contain a remarkably similar episode of the marriage of the minister of a king with the latter's sister (see JAQHIMA AL-ARRASSI); it was very easy to transfer to Dī'fār the motif of this story. What the greater number of authors report on the subject of 'Abbāsa is reported by some about two other fictitious sisters of Ḥārūn, Maymūna and Fāḡhita! The older authorities say nothing about what happened to 'Abbāsa after the death of Dī'fār; it is only the later writers who have woven mysterious horrors about her end. The love of 'Abbāsa and Dī'fār has frequently appealed to the imagination of European as well as Arabian authors; in 1753 a French romance appeared, and again more recently, in 1904 (Almūd Giron and Albert Tozza, *Les nuits de Bagdad*).

**'ABBĀSA**, town in Egypt, the name of which derives from that of 'Abbāsa, daughter of Ahmad b. Ṭūlūn. The princess had pitched her camp on its place and it was there that she said good-bye to Katr al-Nadī, daughter of Khumrawayh, who was going to marry the caliph al-Mu'tadid. Around this casual encounter buildings were raised and Ksar 'Abbāsa, the 'palace of 'Abbāsa', became the township of 'Abbāsa. It was at that time the last town on the road to Syria, situated as it was at the entrance of the Wādī Tūnūllāt, that narrow strip of vegetation that reaches to the East as far as the Ritter Sea, and was called in the Middle Ages Wādī al-Sadr and even Wādī 'Abbāsa.

The town, therefore, destined to play a military role and, in effect, it was a rallying point for troops during the last period of the Ṭūlūnids and again under the Mamlūks. A customs-house was established to collect duty on goods imported from Syria; it is mentioned in connection with certain adjustments of rates ordered by the sultan Barḳūk.

The Ṭūlūnids did not leave their capital, but nevertheless, according to al-Muḥallab, 'Abbāsa had smarter houses than Fustāt, with protruding balconies. It was embellished especially by the Ayyūbid al-Malik al-Kāmil, who paid the town long visits. He had gardens laid out and pavilions built. The ruler came to hunt and to fish, and couriers on dromedaries brought him from Cairo the political and administrative news.

'Abbāsa kept until the end of the Mamlūk period its role as a meeting-place for hunts, and even Khāṭibay used to visit it from time to time. The town had long since lost its strategic importance owing to the foundation of Sāḫiyya about 35 miles to the North-East, and later that of Zāhiriyya, in the immediate neighbourhood of 'Abbāsa.

The district was inhabited by Beduin Arabs, who nomadized in the Wādī Tūnūllāt, and whose chief, according to some authorities, resided in 'Abbāsa. Nevertheless, 'Abbāsa is no longer mentioned in the Ottoman period and its name does not appear in al-Djābartī's chronicle. It was from Sāḫiyya that the troops of Bonaparte watched the desert road. 'Abbāsa is today an unimportant township, between Abū Ḥamūz and Tūlūn al-Kabir.

**'ABBĀSĀBĀD**, name of numerous places in Persia. The best-known is a fortified borough lying by the Kashme-yi-gaz on the Khurāsān road, between Sabrawār (circa 75 miles) and Shāhrūd

(circa 68 miles), where Shāh 'Abbās I [q.v.] settled a colony of some hundred families of Georgians. In 1934 there remained only one old woman who remembered Georgian. Another 'Abbāsābād was built by Prince 'Abbās Mirzā [q.v.] on the left bank of the Araxes (near Nakhūwān). Together with its *shahrestān* on the right bank, it was ceded to Russia by the treaty of 1828. (V. MISORSKY)

**'ABBĀSĪ** [see SIKKA]

**'ABBĀSĪD** (BASU 'L'ABBAS), the dynasty of the Ṭūlūnids from 132/750 to 656/1258. The dynasty takes its name from its ancestor, al-'Abbās b. 'Abd al-Muṭṭalib b. Ḥāshim, the uncle of the Prophet.

The story of the origins and nature of the movement that overthrew the Umayyad Caliphate and established the 'Abbāsīd dynasty in its place was for long known only in the much-revised version put about when the dynasty had already attained power, and, with it, respectability. A more critical version was proposed by G. van Vloten (*De opkomst der Abbassiden in Chorasān*, Leiden 1890, and *Recherches sur la domination arabe, le chiisme et les croyances messianiques sous le califat des Omeyyades*, Amsterdam 1894), and developed by J. Wellhausen (in the final chapter of his *Das Arabische Reich und sein Sturz*, Berlin 1902; English transl., Calcutta 1927). His findings, with some modifications, have been confirmed by subsequent research, and more especially by the new information that has come to light in recent years on the early history of the Shī'a sects, notably in the *Firak al-Shī'a* of al-Nawbakhtī (ed. H. Ritter, Istanbul 1911). They were to a remarkable degree anticipated by Ibn Khaldūn in his history.

The 'Abbāsīd party that won power from the Umayyads was known as Hāshimīyya. According to the later chronicles, this name referred to Ḥāshim, the common ancestor of al-'Abbās, 'Alī and the Prophet, and it has been taken as asserting a claim to the succession based on kinship with the Prophet. In fact the name was of a quite different significance, and reveals very clearly the true origins of the 'Abbāsīd party. During the Umayyad period the large number of Shī'ite or pro-Shī'ite sects and parties that flourished in different parts of the Empire, but especially in Southern 'Irāk, may be broadly divided into two main groups. One of them followed the pretenders of the line of Fāṭima, and was, generally speaking, moderate, differing from the dominant faith chiefly by its support, on legitimist grounds, for the political claims of the house of 'Alī. The other first appeared in the revolt of al-Mughīth, who rose in 66/685 in the name of Muḥammad, a son of 'Alī by a Hanafī woman. For the next sixty or seventy years the claims of Muḥammad b. al-Hanafīyya and his successors were advanced by a series of sects of a more extreme character, deriving their main support from the resentful and imperfectly Islamized and embodying in their teachings many ideas brought by these converts from their previous religions. After the death of Muḥammad b. al-Hanafīyya in 81/700-1, his followers split into three main groups, one of which followed his son Abū Ḥāshim 'Abd Allāh [q.v.], and was known after him as Hāshimīyya. On the death of Abū Ḥāshim without issue in 98/716, his followers again split into several groups, one of which maintained that Abū Ḥāshim had bequeathed the Imamate to Muḥammad b. 'Alī b. 'Abd Allāh b. al-'Abbās, just before he died in the house of Muḥammad b. 'Alī's father in Palestine. This group continued to be known as Hāshimīyya, and also as Rā-

wānīyya (cf. S. Moscati, *Il testamento di Abū Ḥalīm*, RSO 1935, 28 ff.). It may be noted in passing that the doctrine that the Imamate can be bequeathed or transferred by the Imam to another person is by no means infrequent in early Shī'ism (see B. Lewis, *The origins of Ismā'īlism*, Cambridge 1940, 25 ff. and 44 ff.).

Whether or not the story of the bequest of Abū Ḥāshim is, as has been suggested, fictitious, the main fact remains clear: that Muḥammad b. 'Alī took over the claims of Abū Ḥāshim, and, with them, the sect and propaganda organisation of the Hāshimīyya, which he then proceeded to transform into the instrument of the 'Abbāsīd party. He seems to have lost little time in using it. The accounts given by the historians of the first 'Abbāsīd missions are incomplete and in part contradictory. Broadly, they indicate that intensive propaganda began from about 100/718. From headquarters in Kūfa, the Hāshimīyya sent emissaries to Khurāsān, one of whom, Khaldīsh, won considerable success, but was executed in 118/736 after prematurely showing his hand. The moderate Shī'a, whose support Muḥammad b. 'Alī was still seeking, were alienated by the extreme doctrines taught by Khaldīsh, and after his death Muḥammad deemed it advisable to disavow him and place his own organisation in Khurāsān under the control of the Shī'ite chief missionary, Sulaymān b. Kaṭhīr [q.v.]. A period of inactivity followed, during which Muḥammad died in 125/743.

His son Ibrahim [q.v.] succeeded to his claims and was accepted by the followers in Khurāsān, including Sulaymān b. Kaṭhīr. With Ibrahim a new phase of activity began. In 128/745-6 Ibrahim sent his *muḥallab* Abū Muslim [q.v.] as his personal representative to Khurāsān. The sources differ on the origin of Abū Muslim, but agree that he was a Persian, and a freedman of Ibrahim. The use of the *kunya* was at that time a privilege rarely enjoyed by non-Arabs, and its employment by Persian emissaries of the 'Abbāsīds like Abū Muslim, his lieutenant Abū Dīyah, and his rival Abū Salama al-Khalīl is not without significance. Considered in the light of the statements in some sources that Abū Muslim claimed or was granted membership of the 'Abbāsīd house, it may well be an example of the practice, common among the extreme Shī'a, of granting to favoured supporters adoptive membership of the house of the Prophet, and thus, incidentally as it were, of the Arab nation. A modified form of this method of adoption later became part of the dynastic policy of the 'Abbāsīd caliphs (see ARSĀ').

Abū Muslim's mission to Khurāsān achieved a rapid and resounding success. While his main appeal was to the Persian *muḥallab*, he also found important support among the Yemenite Arabs, and is said to have won over many of the Zoroastrian and Buddhist *dihkās*, some of whom were now converted to Islam for the first time. Opinions differ as to the nature of Abū Muslim's teachings. Two things are clear however—that he was a loyal agent of the Hāshimīyya, and that they were a part of the extremist wing of the Shī'a. It seems likely therefore that the doctrines he taught were of the kind current among the extreme Shī'a—probably including elements of Iranian origin, and thus more acceptable to those whom he addressed. The hoisting of the black flag, later accepted as the emblem of the house of 'Abbās, had at this stage a messianic significance. Black flags were among the signs and portents listed in the eschatological prophecies current at the time, and had been used

as emblems of religious revolt by earlier rebels against the Umayyads. Their use by Abū Muslim was thus an appeal to messianic expectations. His activities aroused some opposition among the more moderate Arab *Shi'a*, led by Sulaymān b. Kaḥrīr, but a tactical withdrawal of Abū Muslim from Khurāsān was sufficient to demonstrate that no effective movement was possible without him and his policies, and led to his return as undisputed leader of the mission. By Ramaḍān 122/May-June 747 he was ready to show his hand. The time and the place were auspicious. The moderate *Shi'a* and the *Khawārij*, the two most important opposition movements against the Umayyads, had both shot their bolt — the former in the risings of 122/746 and 126/744, the latter in the rebellion of 127/745. These served the double purpose of weakening the Umayyad regime and, by their failure, eliminating possible rivals to the Hāshimī succession. ‘Irāk, the main centre of previous anti-Umayyad movements, was exhausted, and was moreover subject to special Umayyad surveillance. In concentrating their attention on Khurāsān, the ‘Abbāsids were breaking new ground. Their choice was good. An active and warlike Persian population, imbued with the religious and military traditions of the frontier, was deeply resentful of the inequalities imposed by Umayyad rule. The Arab army and settlers, half Persianized by long residence, were sharply divided among themselves, and even during the triumphal progress of Abū Muslim diverted their own energies and those of the Umayyad governor, Naṣr b. Sayyār (q.v.), to Arab inter-tribal strife. Soon Abū Muslim was able to take Marw, and then, ably seconded by his general Kaḥtaba (q.v.), an Arab of the tribe of Tayy, seized all Khurāsān from the crumbling Umayyad power. From Khurāsān the ‘Abbāsids forces advanced to Ray and then, after defeating a relieving Umayyad army from Kūfa, captured Nihāwand. The way was now open to ‘Irāk. In 132/749 the ‘Abbāsīd army crossed the Euphrates some 30 or 40 miles north of Kūfa, and engaged and defeated another Umayyad army led by Ibn Hubayra (q.v.). Kaḥtaba fell on the field of battle, but his son, al-Ḥasan b. Kaḥtaba, took command, and following up the victory, took possession of Kūfa. The tribalism al-Imām had fallen into the hands of the Caliph Marwān in 130/748, and died shortly after. It was therefore his brother, Abū ‘Uṣaybā (q.v.) who was hailed as Caliph by the Hāshimī troops in Kūfa in 132/749, with the title al-Saffāḥ. The accession of the first ‘Abbāsīd Caliph was accompanied by the first breach with the revolutionaries, when the missionary Abū Salama (q.v.) was put to death in obscure circumstances, allegedly for attempting to bring about the replacement of the ‘Abbāsids by the ‘Alids. Abū Muslim undertook his removal, perhaps in return for ‘Abbāsīd acquiescence in the death of Sulaymān b. Kaḥrīr. Meanwhile another ‘Abbāsīd army, led by Abū ‘Awn, advanced from Nihāwand towards Mesopotamia. In 131/749, in the neighbourhood of Shaḥrazūr, east of the Lesser Zab river, he inflicted a crushing defeat on an Umayyad army led by ‘Abd Allāh, the son of the caliph Marwān. Marwān now himself took the field, and marched across the Tigris towards the Greater Zab river, to engage the army of Abū ‘Awn. The latter had meanwhile handed over his command to ‘Abd Allāh, the uncle of al-Saffāḥ, who had arrived from Kūfa with considerable reinforcements. The battle of the Greater Zab, in 132/750, sealed the fate of the Umayyad Caliphate. The defeated Mar-

wān fled to Syria, where he tried in vain to organize further resistance. The victorious ‘Abbāsīd troops advanced through Harrān, the residence of Marwān, into Syria, occupied Damascus, and then pursued Marwān into Egypt, where he was killed and his head sent to al-Saffāḥ in Kūfa. The authority of the new ‘Abbāsīd caliph was now established all over the Middle East.

Much has been written about the historical significance of the ‘Abbāsīd revolution, which historians have rightly seen to be something more than a mere change of dynasty. Many nineteenth century orientalists, unduly influenced by the racial theories of Gobineau and others, saw in the struggle a conflict between the Aryanians of Iran and the Semitism of Arabia, ending in a victory for the Persians over the Arabs, the destruction of what Wellhausen called the “Arab Kingdom” of the Umayyads, and the establishment of a new Iranian Empire under a cloak of Persianized Islam. There is at first sight much to support this view; the undoubted role of the Persians in the revolution itself, the prominent place of Persian ministers and courtiers in the new regime, the strong Persian elements in ‘Abbāsīd government and culture. It is not surprising to find some statements to the same effect in the Arabic sources (cf. al-Maṣūdī, *Murūj*, viii, 292; al-Djāhiz, *al-Bayan wa’l-Tabyin*, iii, 181 and 206; etc.). More recent writers have however made important modifications in the theories both of Persian victory and of Arab defeat. ‘Uṣaybī, for long regarded as an exponent of the “Iranian national consciousness”, was of Arab origin, and had its main centre among the mixed Arab, Aramaean and Persian population of southern ‘Irāk. It was taken to Persia by Arabs, and remained strongest in areas of Arab settlement like Kūmān. The revolt of Abū Muslim was directed against Umayyad and Syrian rather than Arab rule as such, and won the support of many Arabs, especially among the Yemenites. There were many Arabs even among its leaders, including the redoubtable general Kaḥtaba. Though racial antagonisms no doubt played their part in the movement, and though Persians were prominent among the victors, they nevertheless served an Arab dynasty, and, as the fate of Abū Muslim, al-Saffāḥ and the Barmakids shows, received short shrift if they fell foul of their masters. Many high offices under the state were at first reserved to Arabs, Arabic was still the sole official language, Arabian land remained fiscally privileged, and the doctrine of Arab superiority remained strong enough, on the one hand, to induce Persians to provide themselves with fabricated Arab pedigrees, on the other, to provoke the nationalist reaction of the *Shu‘bīyya* (q.v.). What the Arabs had lost was the exclusive right to the fruits of power. Persians as well as Arabs came to the ‘Abbāsīd court, and the favour of the ruler, often expressed in the form of “adoption” into the Royal household, rather than pure Arab descent, came to be the passport to power and prestige. If a term must be set to the Arab Kingdom, it must be sought in the gradual cessation of the allowances and pensions formerly paid as of right to the Arab warriors and their families, and in the rise to power of the Turkish guards from the time of al-Mu‘taṣim.

The real significance of the ‘Abbāsīd victory must be sought in the facts of the change that followed it, rather than in the obviously inaccurate hypotheses on the movement that produced it. The first and most obvious change was the transfer of the centre of gravity from Syria to ‘Irāk, the traditional centre

of the great cosmopolitan Empires of the ancient Middle East, and of the civilisation to which Tōynbee has given the name “Syriac”. The first ‘Abbāsīd caliph al-Saffāḥ set up his capital in the small town of Hāshimīyya, which he built on the east bank of the Euphrates near Kūfa. Later he transferred the capital to al-Anbār. It was his brother and nephew, al-Manṣūr, in many ways the real founder of the ‘Abbāsīd Caliphate, who established the permanent capital of the Empire in a new city on the west bank of the Tigris, near the ruins of Ctesiphon and at the intersection of several trade-routes. Its official name was Madīnat al-Salām, but it is usually known by the name of the small town that previously occupied the site, Baghdad.

From this city or its neighbourhood the ‘Abbāsīd dynasty first ruled, and later reigned, as heads of the greater part of the Islamic world for five centuries. The period of their sovereignty, covering the great epoch of classical Islamic civilisation, may be conveniently considered in two parts. The first, from 132/750 to 334/945, saw the gradual decline of the authority of the caliphs and the rise of military leaders ruling through their troops. During the second, from ca. 334/945 to 656/1258, the caliphs, with one exception, retained a purely nominal suzerainty, while real power, even in Baghdad itself, was exercised by dynasties of secular sovereigns.

The main events of these two periods will be treated under the names of the various caliphs, dynasties, places, etc. Here only the general course of events will be given, and an attempt made to describe the main characteristics of each period.

#### I. 132/750–334/945

The ‘Abbāsīd Caliphate in the days following its establishment must have seemed very insecure to contemporary eyes. Rebels rose against it on every side and for a long time every new caliph had to face risings in and around even the metropolitan province of ‘Irāk. In Syria, Arab supporters of the deposed Umayyads gave trouble, and found encouragement in the growing legend of the Sufyānī, a messianic figure of the house of Umayya who competed with the ‘Alids for pretensions for the support of the disaffected. The ‘Alids themselves, temporarily disorganised by the frustration of their hopes, and kept under close surveillance, were for a time in eclipse, but soon reappeared as the most dangerous and determined opponents of ‘Abbāsīd rule. Even the *Khawārij* remained an active, if minor, opposition force. Nor were the extant supporters of the dynasty wholly reliable. In the prevailing atmosphere of mistrust, only members of the ‘Abbāsīd family were appointed to the highest positions — but when Abū ‘Uṣaybā al-Saffāḥ died and his brother Abū Djāfar succeeded as Caliph with the title al-Manṣūr, their uncle, ‘Abd Allāh b. ‘Alī, commanding the troops and raiders on the Byzantine frontier, revolted and proclaimed himself caliph, and this serious threat was averted thanks in the main to Abū Muslim. There remained the problem of Abū Muslim himself and the Hāshimīyya. The ‘Abbāsīds, like others before and after them who had come to power on the crest of a revolutionary movement, soon found themselves faced with a conflict between the interests and objectives of the movement on the one hand and the needs of government and Empire on the other. The ‘Abbāsīds chose continuity and orthodoxy, and had to face the angry disappointment of some of their followers. Abū

Encyclopaedia of Islam

Salama had already been destroyed. Abū Muslim himself was put to death as soon as al-Manṣūr felt strong enough to dispense with his uncomfortable presence. These steps, and the suppression of the more consistent wing of the Rāwandīyya (q.v.), alienated the extremist following of the ‘Abbāsīds, some of whom found an outlet in a series of religio-political revolts in Iran, while others later joined the ranks of the *Jumālīn*, the extremist wing of the Fātimīd *Shi'a* that grew up in the course of the 2nd/8th and 3rd/9th centuries. At the same time, however, the changes reassured the orthodox, thus helping al-Manṣūr to meet the dangers of rebellion and foreign war, and during his long and brilliant reign, to lay the foundations of ‘Abbāsīd government. In this task, and especially in the elaboration of the centralised administrative structure, al-Manṣūr was ably seconded by a family that was to play a vital role during the first half century of ‘Abbāsīd rule. The Barmakids (q.v.) are usually described as Persians, but they were of a very different kind from the Khurāsānī rebels who followed Abū Muslim. Their religion before conversion to Islam was neither Zoroastrianism nor any of its heresies, but Buddhism, and they belonged to the aristocratic, landowning priesthood of the Central Asian city of Balh, an ancient capital whose imperial and commercial traditions provided a fund of experience to the ruling class of its citizens. It was after the foundation of Baghdad that Khālid al-Barmakī appeared as the right-hand man of al-Manṣūr, and thereafter he and his descendants developed and directed the administration of the Empire, until the dramatic and still unexplained fall of the Barmakids from power under Hārūn al-Raḥīd in 187/803. With the transfer of the centre of the Empire to the East, the destruction of the Arab aristocratic monopoly of high office, and the firm establishment in power of the Barmakids, Persian influences became stronger and stronger. Sasanid Persian models were followed in the court and the government, and Persians began to play an increasingly important part in both political and cultural life. This process of Persianisation continued during the reigns of al-Maḥdī and al-Hādī; the *muṣallīn* and the *muṣallīn* of the *muṣallīn* in high places gradually disappeared. To replace the weakening bond of Arab nationality the caliphs laid increased stress on Islamic orthodoxy and conformity, trying to weld their cosmopolitan Empire into a unity based on a common faith and a common way of life. Al-Manṣūr's reversion to the heterodox origins of the ‘Abbāsīd movement was followed under his successors by a deliberate policy of winning the orthodox theologians and makers of opinion, and laying a greater stress on the religious element in the nature of the authority exercised by the caliphs. This policy, when contrasted with the dissolute lives led by many of the caliphs and their courtiers, often led to charges of hypocrisy, but was in the main successful in making its object, Mecca and Medina were rebuilt, the pilgrimage from ‘Irāk organised on a regular basis, and orthodoxy reinforced by an inquisitorial persecution of the various heretical movements and of Manichaeism, which at this time became prominent, under the name of Zandakā, as a revolutionary movement of the poorer classes (see *muṣallīn*). For a time an attempt was made to impose the Mu‘tazilī doctrine, which H. S. Nyberg's attractive hypothesis is correct (see EI<sup>1</sup> AL-MU‘TAZILĪ), was an official ‘Abbāsīd attempt at a compromise with the *Shi'a*. From the

time of al-Mutawakkil this attempt was abandoned, and thereafter the ‘Abbāsids adhered, formally at least, to the most rigid orthodoxy.

The reign of Hārūn al-Raḡhīd is generally regarded as the apogee of ‘Abbāsīd power, but it is at this time that the first portents of decline are seen. In Persia, the series of religious revolts that had followed the martyrdom of Abū Muḥsin became ever more threatening, and challenged ‘Abbāsīd authority in the Caspian provinces as well as in Khurāsān. In the west, ‘Abbāsīd authority disappeared almost completely. Spain had rejected the ‘Abbāsids and become independent under an Umayyad prince as far back as 138/756. After the death of Yazīd b. Hātim, the last effective ‘Abbāsīd governor of North Africa, in 170/787, independent dynasties arose, first in Morocco and then in Tunisia, and the authority of Baghdad was never again asserted west of Egypt. The Aghlabids of Tunisia, exercising hereditary and independent rule under the nominal suzerainty of the caliph, set the pattern for a whole series of subsequent local hereditary governorships, whose encroachments eventually reduced the effective suzerainty of the Caliphate to central and southern ‘Irāk. Another danger-sign showed the weakness of the defences of the Empire. By ‘Abbāsīd times the frontiers of Islam were more or less stabilised. The only foreign wars of any importance were with the Byzantines, and even these seem to have been of more show than effect. The inconclusive campaigns of Hārūn were the last major offensives launched against Byzantium by the Caliphate. Thereafter Islam was on the defensive. Byzantine armies sought out weak points in Syria and Mesopotamia, while Khazar invaders entered Islamic territory in the Caucasus and Armenia. Perhaps the most serious factor of weakness was the obscure internal convulsion that culminated in the degradation of the Barmakids and the assumption by Hārūn of the reins of power in his own not too competent hands. This step seems to have shaken the alliance with the Persian aristocratic wing of the movement that had brought them to power, which the early ‘Abbāsids had maintained long after shedding the more extremist elements. After Hārūn's death, smouldering conflicts burst into civil war between his sons al-Amin and al-Ma'mūn. Al-Amin's strength lay mainly in the capital and in ‘Irāk, al-Ma'mūn's in Persia, and the civil war has been interpreted as a national conflict between Arabs and Persians, ending in a victory for the latter. The same objections can be raised to this explanation as to the corresponding theory concerning the ‘Abbāsīd revolution itself. The civil war was more probably a continuation of the social struggles of the immediately preceding period, complicated by a regional rather than national conflict between Persia and ‘Irāk. Al-Ma'mūn, relying on eastern support, for a while projected the transfer of the capital from Baghdad to Marw, but some time after his victory wisely decided to return to the Imperial city. Thereafter Persian aristocratic and regional aspirations found an outlet in local dynasties. In 205/820 Tāhir, the Persian general of al-Ma'mūn, made himself virtually independent in Khurāsān, and founded a dynasty. His example was followed by others, who, while for the most part still recognizing the suzerainty of the caliphs, deprived them of all effective authority in most of Persia.

While the power of the caliphs in the provinces was gradually being reduced to the granting of diplomas of investiture to the *de facto* rulers, their

authority even in ‘Irāk itself was dwindling. A spendthrift court and an inflated bureaucracy produced chronic financial disorder, aggravated by the loss of provincial revenues and, subsequently, by the exhaustion or loss to invaders of gold and silver mines. The caliphs found a remedy in the farming out of state revenues, eventually with the local governors as tax-farmers. These farmer-governors soon became the real rulers of the Empire, the more so when tax-farms and governorships were held by army commanders, who alone had the force to impose obedience. From the time of al-Mu'tasim and al-Wāḡhik, the caliphs became the puppets of their own generals, who were often able to appoint and depose them at will. Al-Mu'tasim is usually credited with the introduction of the practice of using Turks from Central Asia as soldiers and officers, and from his time the dominant military caste became mainly Turkish. In 222/836 he built a new residence at Sāmarrā, some 60 miles north of Baghdad. Sāmarrā remained the Imperial residence until 278/892, when al-Mu'tamid returned to Baghdad. Its foundation illustrated the growing gulf between the caliph and his praetorians on the one hand and the people of Baghdad on the other. Its art and architecture illustrate the emergence of a new ruling caste with different tastes and traditions. Under al-Wāḡhik the power of the Turks continued to grow. A serious attempt to reassert the supremacy of the Caliphate was made by his successor al-Mu'tawakkil, who asked to break the power of the Turkish guards and to rally support against them among the theologians and the civil population, whose orthodox Isma'īnism he sought to placate by renouncing and suppressing the Mu'tazilī doctrines of his predecessors and enforcing the regulations against the Christians and Jews. The attempt ended in failure. The murder of al-Mutawakkil in 227/867 was followed by a period of anarchy. During an interval of nine years four caliphs succeeded one another, but all were helpless in the hands of the Turkish guards, whose control of the court and the capital grew firmer, while the provinces relapsed into anarchy or, at best, autonomy. In Southern ‘Irāk a revolt broke out among the negro clans, known as Zandī [g.v.], who worked on the salt marshes near Basra. This rapidly developed into a major threat to the Empire. The Zandī leader, who displayed brilliant generalship, defeated several imperial armies, and was able to establish effective control over much of Southern ‘Irāk and South West Persia. The lines of communication linking Baghdad with Basra, and therefore with the Persian Gulf and the trade route to the East, were cut, and by 264/877 Zandī parties were raiding within 17 miles of Baghdad itself. But meanwhile a period of greater stability had begun in the capital. The caliph al-Mu'tamid, who succeeded in 256/870, was not a very effective ruler, but his brother al-Mu'waffak soon became the real master of the capital, and during the twenty years of his rule did much to restore the falling strength of the house of ‘Abbās. His first task was to restore order and stability in Baghdad itself, then to tackle the problems presented by the Zandī and by the encroachments of provincial leaders, especially the Saffarids in Persia and the Tulunids in Egypt and Syria. By 269/882 he had expelled the Zandī from all their conquests, and in 290/883 he expelled them. Though failing to destroy the Saffarids and Tulunids, he did succeed in checking their ambitions, and facilitated the task of his successors. On the

death of al-Mu'waffak in 278/891, he was succeeded as real ruler by his son al-Mu'tadīd, who became caliph on the death of al-Mu'tamid in the following year. Al-Mu'tadīd and his successor al-Mu'taḥḥī were both able and energetic rulers. In Persia and Egypt the authority of the Caliphate was for a time reasserted, leaving the government free to deal with the menace of Shī'ism, now active again in a militant and extreme form. After the rise of the ‘Abbāsids and the consequent disappearance of the Hanafī line of pretenders, it was the Fātimid line of Imāms who commanded the support of most of the Shī'īs. After the death of Dī'ār al-Šāḍik in 148/765, these split into two groups, one of which, known as Ismā'īlī, inherited many of the functions, doctrines and followers of the vanished Hanafīya. The transformation of the Caliphate in the 8th and 9th centuries from an agrarian, military state to a cosmopolitan Empire with an intensive commercial and industrial life, the growth of large cities and the concentration of capital and labour, subjected the loose social structure of the Empire to grave strain, and engendered widespread discontent. The rapid growth of the intellectual life of Islam, and the clash of cultures and ideas resulting from outside influence and internal development, again helped to prepare the way for the spread of heretical movements which, in a theocratic society, were the only possible expression of moral or material dissent from the existing order. The endemic disorders and upheavals of the late 9th and early 10th centuries brought these strains to breaking point, and the caliphs were called upon to deal with a series of challenges ranging in form from the revolutionary violence of the Karmatians [g.v.] in Bahrayn, Syria, Mesopotamia and Southern Arabia, to the more subtle and ultimately more effective criticism of peaceful moralists and mystics in Baghdad itself. Al-Mu'tadīd died after a defeat at the hand of the Karmatians, but his successor al-Mu'taḥḥī managed to crush the Karmatian revolt in Syria and Mesopotamia, and, at the time of his death in 295/908, was leading a successful counter-attack against the Byzantines, who had sought to exploit the anarchy of the Muslim Empire. The Shī'ite danger was, however far from ended. After a brief struggle for power, al-Mu'taḥḥī was succeeded by his brother al-Mu'tadīd, still a boy of 13. During his minority, and the long and ineffective reign that followed it, the destructive tendencies halted by the regent al-Mu'waffak and his two successors reappeared. The Karmatians resumed their activities, and from their bases in Bahrayn threatened the life-lines of the Caliphate, while in the west another wing of the Ismā'īlī movement established a Fātimid anti-Caliphate in Tunisia. In North Syria the beduin Hamdānī dynasty established itself, while in Persia another Shī'ite family, the Būyids, began to build a new dynasty that soon threatened even ‘Irāk. In the capital, growing disorder and confusion culminated in the death of the caliph, while fighting his general Muḥsin. Under his successors al-Kābir and al-Rāḍī, the decay of the authority of the Caliphate was completed. The event that is usually taken to symbolise this process was the grant to the governor of ‘Irāk, Ibn Rāḍī, of the title *amir al-umara'*—Commander of Commanders. This title, apparently intended to assert the primacy of the military commander of Baghdad over his colleagues elsewhere, served at the same time to give formal recognition to the existence of a supreme temporal authority, exercising effective political and mili-

tary power, and leaving the caliph only as formal head of the state and the faith and representative of the religious unity of Islam. In 344/945 came the ultimate degradation, when the Būyid Amīr Mu'izz al-Dawla entered Baghdad, and the title of *amir al-umara'*, and with it the effective control of the Empire, the caliphs, passed into the hands of a Shī'ite dynasty.

Almost two centuries had passed between the enthronement of al-Saffāh and the arrival of Mu'izz al-Dawla. Though most of the period still awaits adequate investigation, certain broad lines of development can be discerned. In government, the early ‘Abbāsīd caliphs continued along the lines of the late Umayyads, with far less break in continuity than was at one time believed. Certain changes, begun under the preceding dynasty, continued at an accelerated pace. From an Arab super-ghaykh governing by the intermittent consent of the Arab aristocracy, the caliph became an autocrat, claiming a divine origin for his authority, resting it on his armed forces, and exercising it through a vast and growing bureaucratic organisation. Stronger in this respect than the Umayyads, the ‘Abbāsīds were nevertheless weaker than the old oriental despots, in that they lacked the support of an established feudal caste and a priestly hierarchy, and were themselves theoretically subject to the Holy Law, of the authority of which their office was the supreme embodiment. With the transfer of the capital to the East and the entry of increasing numbers of Persians into the service of the caliphs, Persian influences grew in the court and the administration, which was organised in a series of *diwāns* [g.v.] or ministries, under the supreme control of the *wazir* [g.v.]. Provincial government was carried on jointly by the *amir* [g.v.] (Governor) and *šawī* [g.v.] (financial administrator), under the general surveillance of the capital, exercised through the agents of the *sāḥib al-barīd* (Director of Posts and Intelligence) (see *barīd*). In the army the Arab element gradually lost its importance, and the pensions formerly paid to Arabs were discontinued except for serving soldiers. The core of the early ‘Abbāsīd army consisted of the Khurāsānīs, a term that is to be understood in a regional rather than national sense, and covering both Arabs and Persians from Khurāsān. In time these gave way to the Turkish slave troops, who from the time of al-Mu'tasim onwards became the main element in the army and, in consequence, the main source of political authority for the various amirs and commanders whose power replaced that of the caliphs.

The ‘Abbāsīds came to power through a religious movement, and sought in religion the basis of unity and authority in the Empire they ruled. While broadly successful in this purpose, they had throughout to contend with a series of religious opposition movements, and with the mistrust or reserve of the more conscientious elements among the Sunni religious leaders.

The political breakdown of the 9th and 10th centuries, resulting in the fragmentation of power in the Empire as a whole and the decline and eventual collapse of authority in the capital, had no immediate ill-effects on the economic and cultural life of the Caliphate. The ‘Abbāsīd accession had been followed by a great economic revival, based on the exploitation of the resources of the Empire through industry and trade, and the development of a vast network of trade relations both within the Empire and with the world outside. These changes brought

important social consequences. The Arab warrior caste was deposed, and replaced by a ruling class of landowners and bureaucrats, professional soldiers and literati, merchants and men of learning. The Islamic town was transformed from a garrison city to a market and exchange, and in time to the centre of a flourishing and diversified urban culture. The literature, art, theology, philosophy and science of the period is examined elsewhere (in individual articles). Here it need only be remarked that this was the classic age of Islam, when a new, rich and original civilisation, born of the confluence of many races and traditions, came to maturity.

## 2. 334/945–656/1258

During the long period from the Būyid occupation of Baghdad to the conquest of the city by the Mongols, the Caliphate became a purely titular institution, representing the headship of Sunnī Islam, and acting as legitimating authority for the numerous secular rulers who exercised effective sovereignty, both in the provinces and in the capital. The caliphs themselves, except for a brief revival towards the end, were at the mercy of the secular rulers, who appointed and deposed them at will, and only one of them, al-Nāṣir, has left any mark on history. The appointment of Ibn Rāḥiq as *amir al-umara'* was the first of a long series, and marked the formal recognition of the office of secular sovereign. The main history of the period will be found in the articles on the various dynasties that held it.

In the second quarter of the 10th century a number of princes of the *Shi'ite* Persian house of Būya (or Buyah), originating in the highlands of Daylam, extended their rule over most of western Persia, and forced the caliphs to grant them legal recognition. In 334/945 the Būyid prince Mu'izz al-Dawla entered Baghdad, and wrung from the caliph al-Mustakfi the title of *amir al-umara'*. For over a century the caliphs were compelled to submit to the final humiliation of accepting these *Shi'ite* mayors of the palace as absolute masters. Despite their *Shi'ism*, the Būyids made no attempt to install an *'Alid* caliph—the twelfth Imam of the *Ithnā-ʿashari* *Shi'a* had disappeared some 70 years earlier—but gave outward homage to the 'Abbāsids, retaining them as an orthodox cover for their own power and an instrument of their policy in the Sunnī world. It was from the extremist *Shi'a* that the real threat to the 'Abbāsids came. In 350/969 the Idrisid *Fātimids* from Tunisia conquered Egypt, and were soon able to extend their power into Syria and Arabia. For the first time a powerful independent dynasty ruled in the Middle East that did not recognize even the titular authority of the 'Abbāsids, but on the contrary founded a Caliphate of their own, challenging the 'Abbāsids for the headship of the whole Islamic world. The political and military power of the *Fātimids* was supported by an elaborate religious organisation, commanding a multitude of agents, propagandists and sympathisers in the 'Abbāsīd dominions, and also by a skilful economic policy aimed at diverting the Eastern trade from the Persian Gulf to the Red Sea, and thus at the same time strengthening Egypt and weakening *ʿIrāq*. (See B. Lewis, *The Fatimids and the Roads to India*, *Istanbul Islamic Inst. Mem.*, 1950, 355–60). It is indeed arguable that the diversion of *Shi'ite* energies due to the predominance of the Būyids in the East was one of the factors that saved the 'Abbāsīd Caliphate from extinction at this time (see H. A. R.

Gibb, *The Caliphate and the Arab States, in History of the Crusades*, Univ. of Pennsylvania Press, vol. 1).

In time the Būyid Empire broke up into a number of smaller states, under Būyid and other rulers, while in Persia the power of a new dynasty, the Seljuks, was steadily growing. By the middle of the 11th century Būyid power was at an end, and a Turkish general called al-Buḥārī was able to occupy Baghdad and proclaim the *Abbasid* in the name of the *Fātimid* caliph. This brief episode was the high water mark of *Fātimid* power. In 447/1055 the Seljuks Tughril-beg entered Baghdad, and had himself proclaimed as *Sulṭān*. This title is often attributed by the chroniclers to earlier rulers who exercised a sovereignty not greatly different from that of the Seljuks. The Seljuks *sulṭāns* of Baghdad appear however to be the first to have used the title officially and inscribed it on their coins. In effect the Seljuks Great *Sultanate*, which lasted about a century, was the logical development of the office of *amir al-umara'*, and the title has remained in use ever since for the holder of supreme secular power. The Seljuks brought several important changes. Unlike their predecessors they were Turks and Sunnis, and with their advent the power of the Turks, that had been growing intermittently since the time of al-Mu'tasim, was finally established. By now the Turks in the Middle East were no longer all slave or freed soldiers, imported from Central Asia; whole clans of free, nomadic Turks began to migrate westwards, playing an increasingly important role and in time changing the ethnic configuration of the Middle East. The replacement of a *Shi'i* by a Sunnī ruler increased the prestige though not the power of the caliphs, as did also the extension of the role of the central government, and therefore of the nominal sovereignty of the caliphs, over many hitherto independent lands. The period of the Seljuks, and of the Seljuks and Atabeg dynasties that followed the break-up of the Great *Sultanate*, brought two major changes. One was the regularisation of the economic and social changes that had been taking place in the preceding period, and the elaboration of a new social and fiscal order of quasi-feudal character; the other was the campaign against the *Shi'ite* menace, both on the political and military level through the suppression of *Shi'ite* dynasties and movements, and on the intellectual level through the creation of a network of *madrasas* [g.s.] to serve as centres for the formulation and defence of Sunnī orthodoxy against the *Shi'ite* propagandists. Both changes encountered a vigorous reaction in the form of the Assassins (see *RIĀḌĪ*), an active and energetic revolutionary movement that rose from the ruins of the *Fātimid da'wa* and offered a bitter and sustained challenge to Seljuks rule and Sunnī orthodoxy. The Assassins ultimately failed, and thereafter *Shi'ism* was never again a major political factor until the rise of the Safavids.

After the break-up of the Great *Sultanate*, *ʿIrāq* fell under the domination of a local dynasty of Seljuks, princes, the last of whom was Tughril II (573–590/1177–1194). The collapse of his power and the absence of any alternative enabled the 'Abbāsīd caliph al-Nāṣir to make a final attempt to restore the lost authority of the Caliphate. This movement was favoured by the two major dynasties of the Middle East, the Ayyubids in Egypt and Syria were preoccupied with the struggle against the Crusaders, the *Khāzrim-shāh* in the East with his wars against other Turkish dynasties and then against the Mongols. In this power vacuum, al-Nāṣir attempted

to create a kind of State of the Church for the Caliphate in Baghdad and *ʿIrāq*, and to buttress his authority by seeking popular support through the *fulawana* [g.s.] organisations and making adroit use of pro-*'Alid* sentiment. It was however only the diversion of their energies to meet the Mongol threat in the East that saved him from destruction by the *Khāzrim-shāh*. Al-Nāṣir's successors were weak and incompetent, and when the Mongol general Hūllākū, having already conquered Persia, appeared before Baghdad in 656/1258, the last caliph al-Musta'ṣim was unable to offer any serious resistance.

The Mongol conquest of Baghdad and the destruction of the Caliphate are usually described as a major catastrophe in the history of Islam. Certainly they mark the end of an epoch—not only in the outward forms of government and sovereignty, but in Islamic civilisation itself, which after the transformation wrought by the great wave of Tatar invasion flows in new channels, different from those of the preceding centuries. But the immediate moral effects of the destruction of the Caliphate have been overrated. The Caliphate had long ceased to exist as an effective institution, and the Mongols did little more than lay the ghost of something that was already dead. To the real organs of temporal power the Mongol invasions made little difference, the only change being that the *Sultanate* now began to acquire *de jure* recognition, and *sulṭāns* began to arrogate to themselves titles and prerogatives formerly reserved to the caliphs.

## THE 'ABBĀSĪD CALIPHS OF EGYPT

The establishment by Baybars of an 'Abbāsīd shadow-Caliphate in Cairo in 659/1261 has been explained by R. Hartmann as follows: the disappearance of the Caliphate in Baghdad created a political vacuum, affecting not so much the theologians as the secular rulers, who still felt the need for a legitimating authority. Abū Numayy, the *Sharif* of Mecca, gave formal recognition to the Hafsid ruler of Tunisia Abū 'Abd Allāh, who had assumed the title of caliph, with the regnal name of al-Mustansir, in 659/1263. This assumption, made before the fall of Baghdad, was not in the Sunnī juristic sense of the word caliph, but in that of North Africa, con-

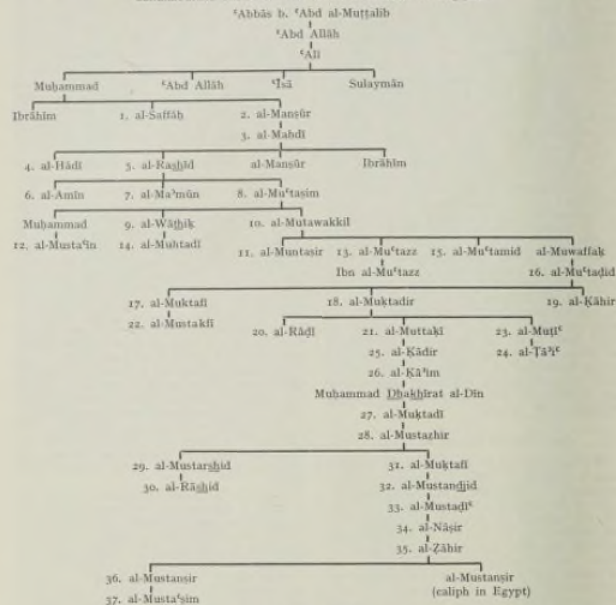

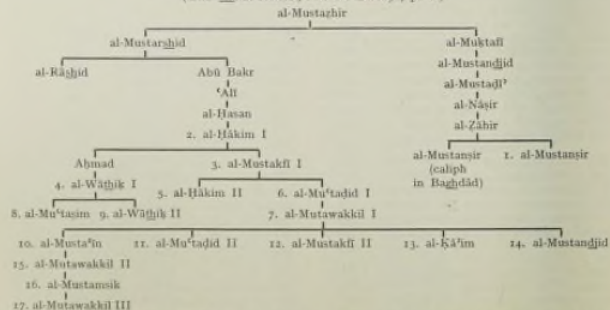

ditioned by Almohad claims and practices. It acquired a new value from Abū Numayy's recognition, confirmed by Mamūk action in sending a report on the victory of 'Ayn Jalūt to Abū 'Abd Allāh and addressing him as *amir al-mu'minīn*—Commander of the Faithful. Baybars, stronger than his predecessor, preferred not to give this recognition to a powerful and possibly dangerous neighbour, and instead solved the problems of legitimacy and continuity by installing an 'Abbāsīd refugee as caliph in Cairo, with the same regnal name of al-Mustansir.

For the next two and a half centuries a line of 'Abbāsīds succeeded one another as nominal caliphs under the rule of the Mamūk *Sultans* in Cairo. Except for a brief interval in 835/1432, when the caliph al-Musta'in became a stop-gap ruler for six months in the course of a feud between rival claimants to the *Sultanate*, the caliphs in Cairo were completely helpless and powerless, being in effect little more than minor court pensioners with purely ceremonial duties to perform on the accession of a new *sultan*. Attempts by the Mamūk *sultans* to use their 'Abbāsīd protégés as a means of gaining recognition in other Muslim countries met with some limited success, notably in India and in the Ottoman Empire where Bayezid I applied to the Cairo caliph in 1394 for a diploma granting him the title of *sulṭān*. But the Ottoman view of the Cairo Caliphate is perhaps best expressed by the 15th-century historian Yazdgerdī 'Alī, who in describing the role of the patriarch at the Byzantine court calls him 'the caliph of the Christians'—a comparison that is far nearer the truth than the more common one between the caliph and the Pope (cf. P. Wittek, in *BSOS*, 1952, 649 f.).

In 1517 the last caliph al-Mutawakkil was deposed by Selīm I, the Ottoman conqueror of Syria and Egypt, and the 'Abbāsīd shadow-Caliphate abolished. A story that al-Mutawakkil transferred his title to Selīm, and through him, to the Ottoman house, was first published by Mouraiege d'Obsson in 1788 (*Tableau général de l'Empire Ottoman*, i, 269–70), and thereafter won wide acceptance. Barthold however showed this story to be completely without foundation, and it is now generally rejected by scholars (see *RIĀḌĪ*).

## GENEALOGICAL TABLE OF THE ‘ABBĀSĪD CALIPHS OF BAĠHDĀD

GENEALOGICAL TABLE OF THE ‘ABBĀSĪD CALIPHS IN EGYPT  
(after Khallī Edhem, *Dawlat al-Islamiyya*, p. 21)

According to others, the second Caliph, al-Ḥākim I, was descended directly from al-Rāḡhib in the following manner: al-Ḥākim b. ‘All b. Abī Bakr b. al-Ḥusayn b. al-Rāḡhib.

## ‘ABBĀSĪD CALIPHS IN EGYPT

922-923	al-Mustasik billāh (second time; as representative of his son al-Mutawakkil)	1516-17

The sources for the history of the ‘Abbāsid Caliphate are too numerous for anything more than a general statement to be possible. A fuller discussion of the literature will be found in J. Sauvaget, *Introduction à l'histoire du monde musulman*, Paris 1941, 126 ff., and of the historians in D. S. Margoliouth, *Lectures on Arabic Historians*, Calcutta 1930 (cf. TA<sup>2</sup>101). The first group to be considered are the chroniclers. While a large proportion of these have been published, especially for the earlier period, surprisingly little use has been made of them and most of the ‘Abbāsid period still awaits its monographs. Still less attention has been paid to the *adab* literature, perhaps the best expression of the outlook and attitude of the secular literate classes who administered the Empire, and a fruitful source of historical information. Travel and geography, poetry, theology and law all have an important contribution to make to historical knowledge, and except for the first two, have been little used. To the vast Muslim literature may be added the smaller but still valuable literatures of the Christians and Jews, in Arabic, Syriac, Hebrew, and some other languages. Finally, there remains archaeology. A useful summary and bibliography of archeological work will be found in the above-mentioned book of Sauvaget.

No general history of the ‘Abbāsids has been produced for many years, and the reader must still have recourse to early and out-of-date works like G. Weil, *Geschichte der Chalifen* 5 vols., Mannheim-Stuttgart 1846-62; idem, *Geschichte der islamischen Völker*, Stuttgart 1866 (abridged English translation by S. Khuda Bukh, Calcutta 1912); A. Muir, *The Islam in Morocco and Alandalus*, 2 vols., Berlin 1885-7; W. Muir, *The Caliphate, its Rise Decline and Fall*, revised by T. H. Weir, Edinburgh 1915 and 1924. More recent but more summary treatments are given by P. K. Hitti, *History of the Arabs*, London 1937 and later editions; C. Brockelmann, *Geschichte der islamischen Völker und Staaten*, Munich 1939 (English and French translations); Gaudet, *Démonbynes et Piatonov, Le monde musulman et byzantin jusqu'aux Croisades*, Paris 1931; Ch. Diehl and G. Marçais, *Le monde oriental de 395 à 1081*, Paris 1936. Many interesting and provocative ideas on the nature of the ‘Abbāsid state and society

will be found in A. J. Toynbee, *A study of history*, London 1934 ff.

Only the accession and the first few reigns have been monographed in any detail. On the ‘Abbāsid revolution Van Vloten and Wellhausen are mentioned in the article. Th. Nöldeke's *Orientalische Skizzen* Berlin 1892 (English translation by J. S. Black, London 1892), includes studies on al-Manṣūr, the Zandj rising, and the Saffids. The most valuable work to date on the early ‘Abbāsid period will be found in the studies of F. Gabrieli (al-Amin, al-Ma’mūn) and S. Moscati (Abū Muslim, al-Mahdī, al-Hādī), which, with other monographs, will be found listed under the appropriate articles. For two studies by S. Moscati on particular problems connected with the ‘Abbāsid victory see *Il "Tradimento" di Wāṣit, Muson* 1951, 177-86, and *Le massacre des Umayyades, ArO* 1951, 88-115. Reference may also be made to Nabia Abbott, *Two queens of Baghdad*, Chicago 1937, dealing with the mother and wife of Ḥārūn al-Raḡhib and giving a description of some aspects of court life, and A. F. Rifa’i, *Asr al-Ma’mūn*, Cairo 1927. The period from 892 to 946 has been studied in great detail by H. Bowen, *The life and times of ‘Alī ibn ‘Isā*, Cambridge 1928. This must now be supplemented by an important additional source—the *Abḥār al-Riḍā wa l-Muḥṭāḥ* of al-Soll (ed. J. H. Dunne, Cairo 1935; annotated French translation by M. Canard, 2 vols. Algiers 1946-50). Two important works of a more general character deal with the middle period: A. Mez, *Die Renaissance des Islams*, Heidelberg 1922 (English translation by S. Khuda Bukh, Calcutta 1912); D. S. Margoliouth, London 1939), and ‘Abd al-‘Azīz al-Dīn, *Studies on the economic life of Mesopotamia in the 10th century*, (in Arabic), Baghdad 1948. Reference may also be made to general works in Arabic by Aḥmad Amin, ‘A. A. Dūrī, Ḥasan Ibrāhīm Ḥasan and others.

On the Cairo Caliphate see R. Hartmann, *Zur Vorgeschichte der ‘Abbāsidenischen Schen Caliphate von Cairo*, Abhandlungen der deutschen Akademie der Wissenschaften zu Berlin, Phil.-hist. Kl. 1947, nr. 9, Berlin 1950, and Annemarie Schimmel, *Kalif und Kadi im spätmittelalterlichen Ägypten*, WI, 1943, 3-27.

‘ABBĀSĪD ART [see SĀMARRA’]

(B. LEWIS)

AL-ABBĀSIYYA, old town of Irbīkīya (Tunisia), three miles to the S.E. of al-Kayrawān. It was also known by the name of Kasr al-Aghlabīa and al-Kasr al-Raḍmī. It was built by Ibrāhīm b. al-Aghlabī, the founder of the Aghlabid dynasty, in 184/800, the same year in which he was appointed amir of Irbīkīya, after the revolt of some leaders of the Arab *ghuṣa*. He gave his foundation the name al-'Abbāsīya in honour of the 'Abbāsids, his masters. The town contained baths, inns, *sāks* and a Friday-mosque with a minaret of cylindrical form, built of bricks and adorned by small columns arranged in seven storeys. After the example of the great mosque of Kayrawān, a *maḥḍara* of carved wood, adjoining the *miḥrāb*, was reserved to the amir and high dignitaries. The town had several gates, the following being the most important: Bāb al-Rahma (of Mercy), Bāb al-Hadīd (of Iron), Bāb Ḥalabūn (attributed to al-Aghlabī b. 'Abd Allāh b. al-Aghlabī, relative and minister of Zayd al-Aḥḥādī I) and Bāb al-Rīb (of Wind)—all these in the east; and Bāb al-Sa'dīya (of Happiness), to the west. In the middle of the town there was a large square called al-Maydān (Hippodrome), where the parades and reviews (*ṣarf*) of the troops took place. Not far away was the palace of al-Rusāfa, recalling by its name those of Damascus and Baghdad. It was in this palace that Ibrāhīm I received the ambassador of Charlemagne, who had come to ask for the relics of St. Cyprian and delivered the gifts destined for the caliph Hārūn al-Raḡhīb. It was also there that the truce (*ḥudna*) of ten years and the exchange of prisoners was arranged with the envoys of Constantinople, patrician of Sicily (189/805). Many other embassies also of the Franks, Byzantines and Andalusians, were received there by subsequent Aghlabid rulers. From its foundation, al-'Abbāsīya had a mint (*dar al-darb*) where gold *dīnars* and silver *dirhams*, bearing the town's name, were coined. An official factory of textiles (*ṭirāṭ*) produced the robes of honour (*ḥiḍā'a*) and the standards, and under the successors of Ibrāhīm I, al-'Abbāsīya was provided with monuments of public and private utility. Abū Ibrāhīm Ahmad b. al-Aghlabī, large reservoir (*sāḥibī* or *ḥaḥḥīya*) of which important remains have been preserved. The basin had an abundant supply of water, which was carried to Kayrawān in the summer, when the cisterns of the capital were exhausted.—The town of Rakkāda, founded in 264/877 by Ibrāhīm II, some miles further to the south, replaced al-'Abbāsīya as residence. al-'Abbāsīya sank to the level of a town inhabited by *mawālī* and tradesmen, but continued to exist in a modest way until the Hīlālan invasion (middle of the 5th/11th century) when it disappeared for good. A cursory excavation, in 1923, of the hill (*ṭell*) where al-'Abbāsīya was situated, brought to light many potsherds belonging to the Aghlabid period. This white pottery with large black, green and blue decoration was no doubt inspired by oriental models coming from Iraq (Sāmarrā, Raqqa) and Egypt (Fustāt). It is worth mentioning that al-'Abbāsīya was the birth-place of several scholars, notably of Abū 'Iṣṭaḥḥ (q.v.). Muh. b. Ahmad b. Tamīm, first historian of al-Kayrawān (d. 333/945).

Marçais, *Manuel de l'Art Musulman*, Paris 1926, I, 40.

(H. H. ABDUL-WAHAB)

AL-ABBĀSIYYA [see TURBA]

'ABD is the ordinary word for 'slave' in Arabic of all periods (the usual plural in this sense is *'abid*, although the Kur'ān has *'abd*, xxiv, 32), more particularly for 'male slave', 'female slave' being *ama* (pl. *amāt*). Both words are of old Semitic stock; Biblical Hebrew uses them in the same meaning. Classical Arabic also expresses the idea of 'slave', in the singular of both genders and in the collective, by the generic term *raḥīb*, which however is not found in the Kur'ān. On the other hand, the Kur'ān frequently uses the term *raḥīb*, literally 'neck, nape of the neck', and, still more frequently, the periphrasis *mā mālakat aynūnukum* (*-hum*), 'that which your (their) right hands possess'. The *'abid* *mamlūk* of xvi, 75 is to be regarded in the light of this formula: it should properly be rendered 'a slave, who is (himself) a piece of property'. Hence, no doubt, the development in the classical language of *mamlūk* as a noun meaning 'slave' (later also 'enslaved'). In the course of the history of Arabic, as of other languages, various vicissitudes have been undergone by euphemisms literally denoting 'boy, girl' or 'manservant, maidservant': *fatā* (fem. *fatāt*), which is Kur'anic, *ghulām* for 'male slave', *ḡiriyā* for 'female slave', both very common, *ṣaḥīf* particularly for men (the fem. *ṣaḥīfa* is also found), and *ḡulām* particularly for women (also used for 'cousin'). Both these last have in some countries finally come to mean 'negro, negress'. Another term sometimes used for 'slave' is *asīr*, properly 'captive'. The abstract 'slavery' is expressed by *raḥīb* or by a derivative of *'abd*, such as *'abdiyya*. The 'master' is *ṣayyid*; he may also be referred to as 'patron' (*mawālī*), or, in legal parlance, 'owner' (*malik*). The opposite of slave, 'free man or woman', is *ḥurr* (fem. *ḥurra*).

Turkish has, as equivalents for 'slave', *kul* or *hōle*, as well as loan-words from Persian: *bende*, and from Arabic: *asīr* (*asīr*), *ḡulām* (*ḡulām*) for the masculine, *carīye* (*ḡiriyā*) and *halayth* (*ḡulāth*), properly 'creatures' for the feminine. Besides *bende*, Persian has *ḡulām* for the masculine and *keniz* for the feminine.

#### 1. BEFORE ISLAM

Slavery was practised in pre-Islamic Arabia, as in the remainder of the ancient and early mediaeval world. But it must be admitted that the sparse and contradictory evidence available for the pre-Islamic period are insufficient to provide reliable answers to most of the problems presented by the institution. It may be allowed that, immediately before the Hijra, the great majority of slaves in western Arabia, a plentiful commodity at Mecca, by whose sale merchants grew rich (Abd Allāh b. Jūdān [q.v.]; cf. Lammens, *La Mecque* . . ., Beirut 1924, par. 12), consisted of Ethiopians and other origin (*ḥabasha*). Some of them must have formed the nucleus of the *Abd al-ḥabīb*, the Meccan *mawālī* (Lammens, *JA*, 1916 = *L'Arabie occidentale avant l'Igérie*, Beirut, 1928, pp. 237-239). Bilāl, the first muḥḥab of Islam, was one such slave. There were some white slaves of foreign race, far less numerous, who were no doubt brought by Arab caravanners (slave-dealers as far back as the Bible story of Joseph), or were the product of beduin captures (legend of the Persian Salmān Pāk). Finally, there are no objective grounds for denying the existence of Arab slaves, although the ransoming of captives among nomad tribes was a matter of common prac-

tice. We have the example of the Kalbite Zayd b. Ḥāritha, who became the adopted son of Muḥammad: a valuable example, even if it has been touched upon in the manner of Tradition (see the decision attributed to 'Umar *infra*, as plausible evidence pointing the same way). We have, however, nothing conclusive on the existence of enslavement for debt or the sale of children by their families: the late and rare accounts of such occurrences (*Aḡhānī*\*, iii, 97; xix, 4) show them to be abnormal.

It would moreover be unwise to stretch the scanty information we have on the condition of slaves in the Hijra to fit before Islam, to fit every locality and every social division. Nomads and sedentaries, in particular, may have shown evidence of quite a different attitude, even in those days: we shall come to the modern period later. The abiding scorn of slave ancestry, even if only on the mother's side, the satire aimed at the man who marries a captive girl (G. Jacob, *Allarab, Beduinenleben*, Berlin 1897, pp. 137-8, 213; Blich, *Faris, L'honneur chez les Arabes avant l'Islam*, Paris 1932, p. 71) are perhaps characteristic of beduin mentality, rather than indicative of the general outlook of town-dwellers. The biography in literary form of the renowned warrior-poet 'Antara, son of a beduin and an Ethiopian slave-girl, who has to perform dazzling feats of arms before his father the chief of the legend, is a somewhat different picture (Lammens, *Le baron de l'Islam*, Rome 1914, p. 299) against disinheriting the children of such unions, indeed against keeping them in slavery; proof that the question had some immediacy and demanded a liberal answer, at any rate in some quarters.

It is probable that the usual practice of the pre-Islamic Arabs was influenced by an ancient Semitic distinction between two classes of slaves, never perhaps reduced to a strict legal principle (I. Mendelsohn, *Slavery in the Ancient Near East*, New York, 1949, pp. 57-8) and never ratified by Muslim law, but which has left traces here and there in the code of behaviour of Islamized lands: in contrast with the purchased slave (*'abid* *mamlūk*), the slave born in his master's house (*'abid* *ḥabīb*), a term later applied to the slave over whom one has full and complete rights of ownership was, in the ordinary course of events, unlikely to be sold or otherwise disposed of by the master (*LA*, xvii, 227-8; Djurjānī, *Ta'rif al-ḥabīb*, *ibn*). We are on firmer ground—because the practice is expressly condemned in the Kur'ān, xiv, 33—in accepting it as fact that in pre-Islamic times female slaves were prostituted for the benefit of their masters, again in accordance with a Near Eastern custom of great antiquity (Mendelsohn, *op. cit.*, p. 54).

#### 2. THE KOR'AN. THE RELIGIOUS ETHIC

a.—Islam, like its two parent monotheisms, Judaism and Christianity, has never revealed the abolition of slavery as a doctrine, but it has followed their example (though in a very different fashion) in endeavouring to moderate the institution and mitigate its legal and moral aspects (for the part played in this by Christianity, see M. Bloch, in *Annales*, 1947, and Imbert, in *Mélanges F. de Vischer*, Brussels, 1949, vol. 3). Spiritually, the slave has the same value as the free man, and the same eternity is in store for his soul; in this earthly life, falling emancipation, there remains the fact of his inferior status, to which he must piously resign himself.

The Kur'ān regards this discrimination between human beings as in accordance with the divinely-

established order of things (xvi, 71, 75; xxx, 28). But over and over again, from beginning to end of the Preaching, it makes the emancipation of slaves a meritorious act: a work of charity (ii, 177; x, 13), to which the legal alms may be devoted (ix, 60), or a deed of expiation for certain felonies (unintentional homicide: iv, 92, where 'a *ḥalving* slave' is specified; perjury: v, 89; lviii, 3); consent must be readily given to contractual emancipation (xxiv, 33). The unemancipated slave is mentioned among those who should be treated 'kindly' (*ḥasbān*, iv, 36). Furthermore, his dignity as a human being is shown in certain ordinances relating to the sexual side of social relationships. We have already mentioned the ban on the prostitution of female slaves (xxiv, 33); nobody may lawfully enjoy them except their master (xxiii, 6; xxxii, 50; lxx, 30) or their husband, for legal marriage is open to slaves, male and female. Masters have the moral duty to marry off their 'virtuous' slave of both sexes (xxiv, 32); if need be it is even permissible for *Muslim* slaves to marry free Muslims (ii, 221; iv, 25). The slave-woman who, obtaining her master's consent, which is essential, marries a free man, is entitled to 'a reasonable dowry' from her husband. She is obliged to remain faithful to him; but if she commits adultery her slave status is not affected. In the same provision that she is liable to only one-half of the punishment reserved for the free married woman (iv, 25). Finally, the Kur'ān protects the slave's life, to some extent, by the law of retaliation, but the formula 'the free for the free, the slave for the slave' (ii, 178) shows clearly how in penal matters the principle of inequality is maintained.

b.—The more or less official Muslim ethic, expressed in the *ḥadīṭs*, follows the line of Kur'anic teaching; it even lays perceptible stress on the humanitarian tendencies of the latter in the question with which we are dealing. Al-ḡhazālī, in the *Ḥaḍīṭ*, ed. 1346 A.H., ii, 197-7 (*ḥabīb al-mamlūk*) (transl. G. H. Bouquet, AIEO 1952, 423-7) had only to string together a number of well-known *ḥadīṭs* to produce what amounts to a lecture on ethics for slave-owners, illustrated by examples.

Tradition delights in asserting that the slave's lot was among the latest preoccupations of the Prophet. It has quite a large store of sayings and anecdotes, attributed to the Prophet or to his Companions, enjoining real kindness towards this inferior social class. 'Do not forget that they are your brothers'; at any rate when they are Muslims, as some texts specify.—'God has given you the right of ownership over them; He could have given them the right of ownership over you'.—'God has more power over you than you have over them'. Thus the master is recommended not to show contempt for his slave; not to say 'my slave' but 'my boy, my servant' (v, *supra*), to share his food with him, to provide him with clothing similar to his own, to set him no more than moderate work, not to punish him excessively if he does wrong, to forgive him 'seventy times a day', and finally to sell him to another master if they cannot get on well together.

Manumission is commended as a happy solution in many cases and is suggested as a way for the master to make amends for excessive chastisement of his slave. It is recommended, in the same category

as slave-giving, at the time of an eclipse, and is included among the various possible ways of expiating a voluntary breaking of the fast of Ramaḍān (the Qur'ān prescribes no more than "the feeding of a poor man"; II, 184). A twofold reward in heaven is promised to the man who educates his slavegirl, frees her and marries her. A famous ḥadīth affirms: "The man who frees a Muslim (v.l. 'a believer') slave, God will free from hell, limb for limb".

It is the duty of the slave, for his part, to give loyal service. He is "the shepherd of his master's wealth" and will be asked for an account of it in the next world. His reward in paradise will be twofold if, in addition to performing the usual religious obligations, he has the especial merit of having given good advice to his master.

If the Qur'ān and Tradition show a certain favouritism towards such slaves as are Muslims, another direction is shown in ḥadīths forbidding the keeping of male Arabs in slavery; they invoke a decision to this effect said to have been given by the caliph 'Umar, in favour of disposing of instances of slavery against the payment of a ransom, where the result was the result of "pre-Islamic practices" (see especially Ibn Saʿīd, *K. al-Amwāl*, pp. 133-4).

### 3. FIKH

Under the heading of *fiqh* properly so-called, we shall have recourse to the main provisions agreed on by the great Sunnī schools. Thereafter we shall note very briefly some typical solutions adopted by Imānī Shī'ism.

a.—Apart from the occasionally operative distinction between Muslim and non-Muslim slaves, Muslim law recognizes only one category of slaves, regardless of their ethnic origin or the source of their condition. The institution is kept going by only two lawful means: birth in slavery or capture in war, and even of these the latter is not applicable to Muslims, since though they may remain enslaved they cannot be reduced to slavery. Legally speaking, the only Muslim slaves are those born into both categories or who were already slaves at the time of their conversion to Islam. Their number tends to diminish both through emancipation, particularly recommended in such cases, and through the following provision: whereas the usual principle of Muslim law is that the child assumes at birth his mother's status, free or slave, an exception, of all the more importance in view of its wide application, is made in favour of the child born of a free man and a female slave belonging to him; such a child is regarded as free-born (otherwise he would be his father's slave). What this amounts to is that slavery could scarcely continue to exist in Islam without the constantly renewed contribution of peripheral or external elements, either directly captured in war or imported commercially, under the direction of the Holy War, from foreign territory (*ḍir al-karb*).

It is pleasing to see that in the eyes of Muslim jurists slavery is an exceptional condition: "The basic principle is liberty" (*al-aḥl huwa'l-hurriyya*). Consequently, for the majority of them, the presumption is in favour of freedom; on the whole they have come down on the side of regarding as free the foundling (*ṣabī*) whose origin remains unknown. But it may fairly be stated that, despite the strictness professed by certain doctors of the law, the *fiqh* has never evolved an adequately clear system

of sanctions to suppress the kidnapping or sale of free persons, Muslim or non-Muslim. Still less do we see any positive denunciation of the practice of castrating young slaves, although it was condemned in principle.

b.—On the juridico-religious level, the slave has a kind of composite quality, partaking of the nature both of thing and of person. Considered as a thing, he is subject to the right of ownership—indeed it is in this that the strict definition of slavery lies—exercised by a man or woman, and he may be the object of all the legal operations proceeding from this position: sale, gift, hire, inheritance and so on. In this respect he is "a mere commodity" (*ṣaḥ' min al-siḥ'*). In the various classes of property distinguished by the *fiqh*, he generally ranks with the animals and his lot is like theirs: the newborn slave, for instance, is the "fruit" (*ḥaṣala*) of his mother, like the young of cattle, and belongs to her master; in the theoretical treatises on public law, the *mawla* is given the duty of ensuring that masters treat their slaves and their animals properly. The slave may (as among the Romans and in Christian Europe) belong to two or more owners at the same time: he is then said to be "held in common" (*mushṭarak*); such joint ownership gives rise to some extremely complex legal positions, which provide abundant material for the causticity of the doctors. Again, it should be noted that the law lays down the amount of the reward which may be claimed by the one who restores a runaway slave (*dhāb*) to his master.

Yet the slave, even from the point of view of the right of ownership, of which he is the object, is not always treated exactly like other property. Mālik law, for example, allows, in towns where it is the customary usage, an automatic guarantee of three days, at the expense of the seller of the slave, against any "faults" (*'ayab*) in the latter (one year in the case of madness or leprosy). The fact that a master may legally have sexual relations with his female slaves gives rise to a system of regulating these relations, which has repercussions elsewhere on his exercise of the right of ownership: thus a distinction is sometimes drawn between costly female slaves, intended for cohabitation, and ordinary female slaves (e.g. *Madaʿwana*, VI, 192 seq.), concerning a clause of non-guarantee in sale, between female slaves within and outside the prohibited degrees of relationship to the interested party (e.g. in the matter of the loan of consummation, *ḥard*, except among the Hanafis, who forbid it with all living things). Further, the regard for *ṣināʾ* has in even more striking effect. It is forbidden to separate a slave mother and her young child, up to about the age of seven, by their becoming the property of different masters (a ḥadīth runs: "Whoever separates a mother from her child, God will separate him from his dear ones on the Day of Resurrection"), under pain of nullity of the legal transaction; the Hanafis, more reluctant to impose legal sanctions, brand as "objectionable" the separating of a slave, not yet arrived at puberty, from any close blood-relative within the prohibited degrees. Religious affiliation is also taken into account, inasmuch as non-Muslims cannot

keep Muslim slaves; they must either free them or dispose of them to Muslim masters.

If the master fails to meet his moral obligation of providing for the physical maintenance (*naḥāla*) of his slave, the law requires in the last resort that the latter be sold, a solution also enjoined, except by the Hanafis, in the case of animals. The Mālikis hold that emancipation is compulsory (*cf. Esadus*, xxi, 26-7) when the master carries his ill-treatment of his slave to the point of mutilation or disfigurement. Later, when we come to deal with personal rights, we shall meet with other instances of curtailment of the absolute right of ownership, as of other features of penal law.

c.—On the personal rights of the slave, that is, on his juridico-religious competence, it is interesting to see whether the classical jurists have ever stated a general theory that would bring out the principles underlying the solutions scattered under the various headings of *fiqh*. One such attempt is to be found in the works of the Hanafī al-Pandawī (d. 482/1089), commented on and imitated in the later treatises on *uṣūl al-fiqh*; the basic ideas, Hanafī of course, are as follows (*Ṭīf*, ed. Istanbul 1307 A.H., pp. 1401-1426): slave status is incompatible with "matrimonial ownership" (*mālikiyyat al-māl*), whence it follows for example, that the slave cannot take a concubine, but is compatible with "non-patrimonial ownership" (*mālikiyyat ḡayr al-māl*), whence it follows, for example, that the slave may marry. His status does not deprive the slave from administering property and laying claim to the "restitution" (*ṣaf*) of it, but is incompatible with the full exercise of the higher legal faculties of the human being: his *dīmma* (abstract financial responsibility) and his *ḥill* (freedom of action in sexual matters) are reduced, and all *uṣūlāt* (public or private offices of authority) are forbidden to him. More recent works, of the type of the *Adab al-Nasīb* by the Shāfi'ite Suyūṭī and the Hanafite Ibn Nujaym, merely give dry and rather disjointed lists of the manifold rules about what slaves may and may not do.

d.—The Muslim slave has a religious status (*'ibādāt*) theoretically identical with that of his free coreligionists (the contrary opinion is exceptional; e.g. in one solitary Mālikī, *cf. Ibn Farḥin, Dhikr*, 2, 132-46); but some derogations were more or less inevitable on certain points. Most authorities hold that his dependence on a master absolves him from the strict necessity of performing such pious acts as involve freedom of movement: the Friday prayer, pilgrimage, the Holy War. Another consequence of this dependence is that the master is responsible for the annual payment of his "alms at the breaking of the fast" (*ṣabīl al-fitr*). The Muslim slave-woman is not under as strict an obligation to "hide her nakedness" (*ṣaḥr al-ṣawra*) at the ritual prayer as the free woman. The slave is not forbidden to act as leader (*imām*) of congregational prayer, although the Hanafis disapprove of the practice, and some other authorities do not permit him to become a salaried *imām*, or at any rate they prefer a free man to hold the office, if one is available of the required competence. The question of his acting as *imām* at the midday prayer on Fridays and the two canonical festivals is more debatable, especially if this office is regarded as an emanation from the public authority; even within the various schools there is disagreement about whether or not it is allowable. On the whole, however, the affirmative answer seems to have prevailed, except among the Hanbalis. The slave is no more qualified to

hold a position of religious magistrature (judgeship, *qāḍī*) than an official position of secular authority; he is nevertheless acceptable as a subordinate officer in the revenue department.

e.—In matters of law in the strict sense (*mu'āmalāt*), the slave's incompetence to act (*ḥaḍr*) is assumed in principle, but is not absolute. If he is a Muslim, the *fiqh* confirms and expressly states his competence to contract a marriage, as clearly laid down in the Qur'ān (*cf. supra*); but the master's consent is required both for male and female slaves (according to the Mālikis, the male slave of full age may marry of his own accord, but the master then has the right either to ratify the marriage or to terminate it by repudiation) and it is the master who acts as "guardian for matrimonial purposes" (*ṣaḥī*) of his female slaves. The master can even marry off by "compulsion" (*djabr*) a male slave, not yet of age, or a female slave (the father of a family has a similar right over his children); the schools of Abu Hanifa and Mālik concede him the same power over a male slave of full age. The Hanbalis alone, on the other hand, hold that the slave may insist on his master's marrying him off. Notwithstanding reservations and restrictions based on the words of the Qur'ān, and in spite of the customary requirement of "compatibility" (*ḥaḍā*) between the parties, the jurists admit and lay down rules for marriage between Muslims of whom one is a slave and the other free. We have convincing evidence that, in the course of the centuries, such unequal marriages occurred (to the advantage to the slave, male or female, concerned) more often than one might think. A slave wife, on being emancipated, has the right to opt for divorce if her husband is a slave and, according to the Hanafis, even if he is free.

A Muslim cannot be the husband or wife of his or her slave (nor even, some would add, of the slave belonging to his or her son); there is an absolute incompatibility for the same persons, between *consanguinity* and ownership. In contradistinction to the other rites, the Hanafis permit a Muslim, even a free Muslim, to marry a Jewish or Christian slave-girl. The slave is entitled to a maximum of two wives, except in the Mālikī view, which grants him four, just like a free man. The Mālikis are also alone in conceding that a slave-wife has the right to share in her husband's rights on equal terms with a free co-wife; the other jurists allow her only one night in three. The obligation, which is generally recognized as incumbent on a slave-husband, to maintain his wife, gives rise to various solutions if he is not legitimately possessed of adequate means.

Although the majority of authorities deny that the male slave of full age can contract a valid marriage of his own free will, yet all agree that he has the husband's usual right of repudiation (*ḥalāl*) as he thinks fit. But in accordance with the general tendency to reduce by one-half, in the case of the slave, all figures prescribed for free men, he may only take back his wife after one single formula of repudiation, instead of the two which the Koran (II, 229) lays down as a maximum. Consequently a twofold repudiation on his part has the same decisive result as a threefold repudiation by a free man; the Hanafis alone, who in the matter of repudiation have more consideration for the woman than for the man, apply this reduction if it is the wife who is a slave, whether or not her husband is a free man. The Hanafis also set themselves apart from the other schools in not permitting the married male slave to use the device of "cursing" (*ḥiṣān*), instituted by the

Kur'an (xxiv, 6-9) to the advantage of the husband who may accuse his wife of adultery with no legal proof.

The "legal period of withdrawal" (*'idda*) which must be observed by widows or repudiated woman (Kur'an, ii, 228, 234; xiv, 4) is also halved when the woman in question is a slave: 1) two months and five days for a widow, instead of four months and ten days; 2) two menstrual or intermenstrual periods (depending on the school) instead of three (one could hardly say one-and-a-half) for the repudiated woman who is usually regular, except that the *Zahiris* keep the figure at three; 3) one month and a half for the repudiated woman who is not regular, except according to the *Mālikis*, who oddly enough, as Averroes remarks (*Biḍāya*, ed. 1935, ii, 93; tr. Lalmeche, 433-4), here hold to the figure of three.

1.—Far more important in practice, on account of its wide application and great bearing on social life, is the system of legal concubinage. In *fiḥh* as in the Kur'an, extramarital cohabitation is permissible only between a man and his own female slave; he is forbidden to cohabit with a slave belonging to his wife, even with the latter's consent (contrary to the Biblical custom), but indulgence is shown if he has relations with a slave belonging to his son. Co-owners of a female slave may not cohabit with her, nor may a sole owner cohabit with a married female slave. When the concubine (*ṣawṣa*) has a child by her master, she enjoys the title of *umm walad* [q.v.] and an improved status in that she cannot be sold and becomes free on her master's death (compare the Code of Hammurabi, para. 170; but for the fluctuations in old Islamic practice see J. Schacht, in E.I.<sup>1</sup> s.v., and *The Origins of Muhammadan Jurisprudence*, Oxford, 1950, 264-6); that child and any others she may subsequently have are born free. There is no limit to the number of concubines as there is to the number of wives, but almost all the authorities teach that there are the same bars to cohabitation as to marriage: natural or acquired kinship, two sisters together, the woman's professing a heathen religion.

With the especial aim of avoiding confusion over parentage, in the absence of any initial ceremony or *'idda*, the jurists have prescribed a temporary ban on sexual relations, in the case of a slave-woman, for "verification of non-pregnancy" or *istihṣā*, when for any reason she becomes the property of a new master or changes her status (emancipation, marriage). If she is pregnant, this ban lasts till her confinement, as with the *'idda*; if not, its duration is one menstrual period. If she is not yet regular in her periods or has ceased to be regular, the authorities differ: one month or three months is the usual rule, *Mālikis* and *Ḥanbalis* make the seller of the slave-woman share in the responsibility of the *istihṣā*; the former entrust her (*muṣawḍa*) to the supervision of a third person. There is considerable difference of opinion on points of detail in the numerous cases where the *istihṣā* would appear to be no longer obligatory, as serving no purpose; to avoid it, recourse is had to certain devices of procedure, particularly by the *Ḥanafis* dependent of "circumventions of the law" (*ḥiyal*) (well-known anecdote of Ḥarūn al-Raṣīd and the *ḥafī* Abū Yūsuf, which has found its way into the Arabian Nights).

The children born of legal concubinage are legitimate and, in the matter of succession to their father's estate, are on the same footing as children born in wedlock. But it is harder to establish legally

the paternity of a master, with all its legal and social consequences, than that of a husband; besides, the old *ḥanafī* jurists were loth to declare it officially if there was no expression of willingness on the part of the master concerned. The *Ḥanbalis*, too, stand apart from the other schools in not fathering a child on the master unless the latter acknowledges it, and in permitting him to disown it if there is a legal presumption in favour of his paternity inasmuch as the concubine is already *umm walad*. In the other schools, the master of an unmarried female slave is legally regarded as the father of her child, not only if he acknowledges it as his own, but also if he makes an implicit admission of having had relations with her, as is obviously the case if she is already *umm walad*. It is open to him to deny paternity only if cohabitation was manifestly impossible within the—very wide—officially recognized limits of the term of pregnancy, or if he takes an oath that he put his concubine in *istihṣā* at least six months before the date of the birth, and that he has not cohabited with her since. The ascription of paternity becomes complicated in such abnormal situations as when two co-owners of a slave cohabit with her during the same intermenstrual period, or when two entitled parties in succession have had relations with her without *istihṣā*; recourse is then had to the ruling of the "physiognomists" (*ḥāṣi*/pl. *ḥāṣi*), an ancient Arabian expedient difficult of application at certain times. Failing this, the child is left to choose for himself at puberty. Here again the *Ḥanbalis* stand alone in refusing to ratify this archaic institution; they prefer, if the decision proves to be rationally impossible, to set up a case of two-fold paternity.

g.—Most authorities deny the slave-woman the right of custody (*ḥaḍra*) over her children to which the free woman is entitled, nor do they permit the male slave to be a "guardian for matrimonial purposes" (*ṣawfī*). The *Shāfi'is* and *Ḥanafis* schools (who have not ratified the partial tolerance of Abū Ḥanīfa) refuse to allow the slave to act as executor of a will (*waṣī*). The testimony (*shahāda*) of a slave is not admissible in court, except among the *Ḥanbalis*, and even they do not accept it in connection with the most serious punishable offences. His affirmation (*iḥṣā*) is generally accepted in matters affecting his person (apart from restrictions imposed by certain authorities) but not in matters of property.

h.—All the schools agree that the master can do as he likes with property in the possession of his slave and is at liberty to take it away from him. In the eyes of third parties, the ordinary slave has no patrimony of his own; his business activities, which are severely restricted, are on behalf of his master, who alone is financially competent to act. Nevertheless the *Mālikis* take up the remarkable position (for an interesting justification see 'Abd al-Wahhāb, *Iḥṣā*, i, 270) of recognizing the slave's "ownership" (*milki*) of his *ṭawāḥim*, whose source is mainly from gifts or bequests which it is permissible for him to accept on his own account, although the ownership here is precarious and may not be disposed of without consent. Two important consequences of this doctrine are that, according to the *Mālikis*, the slave may lawfully have concubines without giving rise to any theoretical difficulties, and that on gaining his freedom he may keep his *ṭawāḥim*, unless his master has formally announced his wish to retain it.

Finally, apropos of patrimony, there is quite a common practice, known from remote Semitic anti-

quity and from the Classical world, which provides the slave with a real, though not unrestricted, legal competency (it consists in the master's putting his slave in charge of a business or of certain specified business dealings, entrusting him with a capital sum where necessary. The slave is then said to be "authorized" (*ma'dhūn* or *ma'dhūn laḥ*). The effects of this "authorization" (*iḥṣā*), which may nevertheless be revoked, are conceived in more or less generous terms by different jurists. The recipient always in fact becomes relatively independent, so as to be able to deal quite freely with third parties. The authorities are well-nigh unanimous in not making the master responsible for the debts of his "authorized" slave; the *Ḥanafis*, followed with some hesitation by the *Ḥanbalis*, allow them to be recovered on the "physical person" (*rakaba*) of the slave debtor, if the capital at his disposal is inadequate; in other words he may be sold to pay them. On the other hand, the *Mālikis* and *Shāfi'is* recognize his "abstract responsibility" (*dhimma*); the "obligation to pay" (*dayn*) they leave standing to the account of those creditors whom the assets are insufficient to satisfy, while deferring the "exaction of payment" (*muḍāḥaba*, "Haltung") till such time as the slave is emancipated.

i.—It is in connection with punishments (*'uḥūd*) that the hybrid and indeterminate character of the legal nature of the slave, who is simultaneously a thing and a person of inferior status, breaks through the complicated web of solutions presented by the *fiḥh*. Here is a curious example, of an unusual kind but mentioned as clearly showing this ambivalence: the "legal compensation" (*diya*) for the foetus aborted by a free woman is a young slave of either sex, technically known as *gharra*, whereas the compensation for victims duly born is reckoned in camels or money.

To what extent is the law of retaliation (*biḥal*) applied to slaves, on the basis of Kur'an, ii, 178 (v. *supra*)? In a case of intentional homicide it works against the slave, whether the victim be bond or free (if he is free, it is no doubt not precisely the idea of retaliation which underlies the punishment); but the schools object to putting a free man to death for killing a slave, with the noteworthy exception of the *Ḥanafis* (and also of that illustrious, albeit somewhat dissident, *Ḥanbalī*, Ibn Taymiyya; cf. Laoust, *États*, 418, 438), and even they exempt the man who kills his own slave or one belonging to his son. The *Mālikis* are also alone in conferring on the victim's next-of-kin the ownership of the guilty slave (again with a great many reservations), to do with him as he pleases: he may put him to death, keep him in slavery or set him free. This may be a survival of an archaic solution, elsewhere replaced by the simple choice, as in the case of free men, between retaliation and compensation according to the tariff. In cases of deliberate wounding the *Shāfi'is* apply retaliation between the same persons as in cases of homicide; *Mālikis* and *Ḥanbalis* insist on equality of status, slave or free, between the guilty party and his victim; the *Ḥanafis* forego retaliation altogether.

What of the monetary compensation, according as the slave is guilty of or is the victim of bloodshed?

—1) Slave victim: The compensation goes to the master. The *diya* is the responsibility of the guilty person alone, except that the *Shāfi'is* are undecided whether or not to bring in the "group jointly responsible for the bloodwit" (*dhila*), which is the *Ḥanafī* rule in cases of homicide only. This *diya* is not fixed, as for the free man, but is calculated, in the

event of death, on the market value (*ḥima*) of the victim; the *Ḥanafis* alone set an upper limit to it, namely the *diya* of a free man less a token reduction of ten dirhams. If there is only wounding, of a type specified in the tariff laid down by the Law for a free man, the majority of authorities hold that the market value of the injured slave should be reduced by the amount of the difference between the figure shown in the legal scale for an identical wound and the maximum compensation for a free man. The *Mālikis* and some *Ḥanbalis* teach, though with certain reservations, that the sum paid should exactly equal the depreciation in the market value of the slave.

2) Slave guilty: The majority of authorities give the master the choice between surrendering the culprit (*daḥf*, *notāḥis deditio*) and paying the appropriate *diya*. But the *Shāfi'is*, followed by several *Ḥanbalis*, regard the *diya* as incumbent on the "physical person" (*rakaba*) of the slave in question, whom his master will therefore sell, and hand over the price received in exchange for him, up to the amount of the *diya*, unless he prefers to pay the sum due without selling him.

The slave guilty of theft and the Muslim slave guilty of apostasy are punished in the same way as free men: by cutting off the hand in the former case, by death in the latter, when the necessary conditions for these punishments are fulfilled.

Fornication (*zinā*) committed by a slave of either sex does not legally involve the death penalty, in consequence of the Kur'anic ordinance (v. *supra*) and because neither male nor female slaves are held capable of acquiring the particular legal condition of a *muḥṣan(a)* spouse, which the *fiḥh* restricts to free persons who have consummated marriage and which it regards as necessary before a death-sentence can be imposed for a sexual offence. As laid down in the Kur'an, the punishment is half of that decreed (xxiv, 2) for the free person who is not *muḥṣan(a)*; viz. fifty lashes instead of one hundred, to which some authorities would add the further penalty of banishment. It should be noted that *Ḥanafis* and *Ḥanbalis* refuse to regard as *muḥṣan* the spouse of anybody who is not *muḥṣan*: so, according to them, the husband or wife of a slave cannot be executed for adultery. As part of the general tendency to mitigate the punishment for sexual offences involving slaves, certain cases of unlawful cohabitation with a female slave (e.g. by a co-owner or the master's father) are not looked upon as *zinā*.

Finally, the slave who is guilty of a "false charge of fornication" (*baḍh*) against a free person is liable, here again, to half the penalty decreed by the Kur'an (xxiv, 4) against the slanderer who is free; viz. forty lashes instead of eighty. But the slave who is the victim of such a slander has no right at all to any such satisfaction, since the Law, which to a certain extent protects the person of the slave, does not go so far as to regard him or her as a man or woman of honour.

The vast field of the "arbitrary punishments" (*ta'dīr*), left to the judge's discretion, almost completely defies investigation through the study of written sources. We are conscious of our inability to make a sufficiently close study of how, in matters of punishment, the slave's position really compares, throughout history, with that of the free man, in the eyes of the judicial authorities of Islam.

j.—The emancipation (*'ah*, *ṭabaḥ*, *ṭah*) of the slave is a work of piety; it is a unilateral act on the part of the master, consisting in an explicit or implicit declaration; in the former case it is not necessary

to show intention. In principle, emancipation cannot be revoked, nor may the beneficiary refuse it. If, however, instead of being immediate, it is to take effect at some fixed future date or subject to certain conditions, all authorities but the Mālikīs permit the slave to be sold in the meantime. This destroys the effect of the emancipation (except, some say, if the slave is then re-acquired by his former owner). The children of a female slave, born or unborn, as a rule become free on her emancipation. The partial enfranchisement of a slave by his sole master is equivalent to his total enfranchisement (Abū Hanifa formulates a reservation, but is not followed by his disciples). The question is more involved when the slave is held in joint ownership and one of the owners enfranchises him *iusu* as his own share is concerned; if this owner is well-to-do, the enfranchisement is total and he will compensate his fellow-owners for the value of their shares. If the emancipator is not wealthy enough for this, the slave remains "partial" (*muḥab*), except according to the Hanafīs, who free him and allow the other owners to recover their share out of the income from his work (*ḥaḍ*). There is another point on which the Hanafīs reject the solution readily accepted by the other schools: they do not permit recourse to the drawing of lots (*ḥaḍ*) to determine which of several slaves is to be enfranchised when circumstances make it necessary to choose; their rejection of this procedure dictates certain of their rulings.

A grant of enfranchisement with effect from the master's death, a desirable practice for the Faithful and one for which they have often shown partiality, is known as *ṭaḥīr*, from the expression '*an duḥar minnī*, "after me" (this is the view of the Mālikīs, who insist on a formula containing a word from the root *ḥar*). The Shāfi'īs also apply the term to an enfranchisement to take effect from a date after the master's death, which for the other schools would count as no more than a revocable testamentary disposition. *Ṭaḥīr* itself is in principle irrevocable, in the eyes of all the authorities, but here too the Shāfi'īs and Hanbalīs allow it to be made void by the sale of the *ṭaḥīr* slave. The Hanafīs permit this only if the *ṭaḥīr* is limited (*muḥabb*) by a condition connected with the emancipator's death. It is permissible for a master to cohabit with his *ṭaḥīr* slave; and her children, except in the dominant Shāfi'ī view, follow the condition of their mother. On the master's death, the *ṭaḥīr* slave, being regarded as part of his estate, is subject to the rule of the disposable third and on this rule depends the manner of his effective liberation, which is different for each school. Except according to the Hanafīs, he remains in slavery if the debts of the deceased cannot be settled without selling him.

Contractual enfranchisement is of great doctrinal and practical importance. It is recommended by the Kū'ān (xviii, 31) the interpretation of the text as implying a strict obligation has not generally prevailed. It consists in the master's granting the slave his freedom in return for the payment of sums of money agreed between them. Some call this conditional enfranchisement, according to others it is ransom by the slave of his own person: a divergence which entails solutions differing in detail. The transaction is treated in the Kū'ān as *ḥab*, the verbal noun of the third form. In the classical language, no doubt to distinguish this from *ḥab* = "letter, book", it has been replaced by its morphological equivalent *muḥab* or by *ḥab*. Although the payments are usually spaced out

(*muḥab*) and the majority of jurists regard settlement by instalments as essential to the contract, the Hanafīs accept one single and immediate payment; the Mālikīs are satisfied with one instalment, while Shāfi'īs and Hanbalīs insist on a minimum of two. The sums to be paid are of course deducted from the *ḥab* of the slave, who is *ḥab* *f* *facto* "authorized" to engage in business; the granting of *ḥab* to a female slave who has no honest source of income is frowned upon. The *muḥab* is set free only when his payments are completed (on some archaic divergences, see Schacht, *Origins*, 279-80). But the master is forbidden to sell him in the meantime, except by the Hanbalīs, who nevertheless hold the purchaser to the terms of the contract of enfranchisement. The Mālikīs give the master a limited right to dispose in advance of the total of the sums which the *muḥab* undertakes to pay (they are known as *ḥab*, like the contracts itself). Concomitant with a "contractually emancipated female slave" is unlawful. A grant of *muḥab* may be superimposed on one of *ṭaḥīr*, to the same person's advantage. When the *muḥab* reaches the end of his payments, a "rebate" (*ḥab*) is usually accorded to him, in compliance with the Kū'ān text; fixed or discretionary, obligatory or merely recommended, according to the different authorities.

k.—Once he has gained his liberty, the freedman (*ṭaḥīr*, *muḥab*) immediately enjoys the same full legal capacity as the freeborn. But both he and his male descendants in perpetuity remain attached to the emancipator (*muḥab*), and to his or her family, by a bond of "clientship" or *ḥab*, a term equally denoting the converse side of the relationship "patronage". "Patron" and "client" are both referred to as *ḥab* (pl. *ḥab*) in relation to each other; if necessary they are differentiated by means of epithets: "higher" (*ṭaḥīr*) for the former and "lower" (*ḥab*) for the latter. The Hanafīs alone maintain, besides this *ḥab* which originates in slavery, a legal institution known as *ḥab* *al-muḥab* between free men, which is outside the scope of the present discussion.

A saying, applied with slight variations in the different schools, runs: "Patronage belongs to the emancipator" (*ḥab* *al-muḥab* *al-muḥab*); it cannot be made over to a third party by any negotiation or shift at the moment of emancipation. The *ḥab*, moreover, which insists on assimilating patronage to natural kinship (in *ḥab* *al-muḥab* *al-muḥab* *al-muḥab*), has succeeded in making it inalienable and untransferable, whereas cases of sale were not unknown before and even under Islam (cf. Ahmad Aḥmad, *Faḍl al-Islām*, i, 110; Schacht, *Origins*, 173). Nevertheless, on the strength of the peculiar concept of "attraction of patronage" (*ḥab* *al-muḥab*), this right may be transferred in certain cases; for example, from the immediate emancipator to the one who emancipated him, or from the emancipator of the mother to the subsequent emancipator of the father, subject to certain conditions. Mālikīs and Hanbalīs sanction, not without much wavering, and under very different final forms, an ancient type of enfranchisement without patronage, known as *ḥab* *al-muḥab* in reference to the pre-Islamic custom, condemned in turn in the Kū'ān (v, 103), which consisted in turning loose in complete freedom one particular she-camel of the herd, protected by taboos.

The patron and his "agnates" (*ḥab*), or those of the patroness, stand in the position of agnates, except according to the Zāhirīs, to the emancipated slave who has no natural agnates, particularly in

connection with tutelage for purposes of matrimony and with joint responsibility in penal matters. In return, the property of the emancipated slave or of his or her descendants in the male line who die leaving neither priority heirs nor agnates, reverts to the patron or patroness or to their agnate heirs, in accordance with a system of devolution (by successive generations among the kin, making *ḥab* *al-muḥab* *al-muḥab* more archaic than in usual cases of succession (see R. Brunschwig, in *Revue Historique de Droit*, 1950). A woman is absolutely excluded from this "inheritance of patronage" (*ḥab* *al-muḥab*); she can be patron only of her own freedmen or the freedmen of the latter; her sons inherit the patronage, while they are not counted among her agnates for purposes of joint responsibility in penal matters, a particularly conservative institution. One ancient isolated opinion notwithstanding, the jurists have not granted the freedman the right to inherit the property of the patron who dies without heirs.

Bibliography. Apart from references in the text, all the collections of hadith and treatises on *ḥab*, not forgetting the works on *ḥab*, Studies in European languages: Weckwerth, *Der Sklave im Islam*, Rekt, Berlin 1909, mentioned for the sake of completeness; Abd Elwahed, *Contributions à une théorie sociologique de l'esclavage*, Paris 1931, is more important, but biased. For the three main Sunni schools only, see first of all: D. Santillana, *Institution*, i, 11, 11-12; Juyneil, *Handbook*, 2, 232-40; Bergsträsser-Schacht, *Grundzüge*, 38-42; and, for penal law, L. Bercher, *Les délits et les peines de droit commun prévus par le Coran*, Tunis 1926, *passim*. On the Mālikī view of paternity in legal concubinage, Lapanne-Joinville, in *Revue Marocaine de Droit*, 1932.

l.—The strictly juridical status of slavery among the Imānī Shī'ites, for which one may refer to the classic work of al-Hillī, *Sharḥ al-Islām* (tr. Query, 2 vols., Paris 1871-2) is indicative of attitudes sometimes considerably removed from the great Sunni principles. Among the solutions it offers we shall confine ourselves to the following, as being particularly revealing of some interesting legal or social viewpoints.

The child born in wedlock does not follow the status of his mother, bond or free, but failing any stipulation to the contrary, is born free if either of his parents is free. If both are slaves but not of the same master, he belongs jointly to the masters of both parents. The master of a female slave may grant a third party the "right" of her, for purposes of work or sexual relations. There is a great deal of controversy about the permissibility of manumitting a non-Muslim slave; on the other hand it is recommended that the Muslim slave should be freed after seven years' service (compare with *Exodus*, xii, 2; *Deut.*, xv, 12). Manumission is of right, according to most authorities, when the slave is mutilated by the master, as the Mālikīs hold, or if he is smitten with blindness, leprosy or paralysis in the course of his slavery. The concubine who has borne a child is not automatically freed on her master's death unless her child is still alive; her value is then deducted from this child's share of the inheritance. Enfranchisement with effect from the death may be revoked, just like a legacy; it does not prevent sale of the slave, which is tantamount to a revocation. Contractual enfranchisement is of two kinds: "conditional", which leaves in total slavery the slave who defaults in his debts, as among the Sunnīs; "unconditional", which gives the slave

his freedom in proportion to the amount he pays. In penal law, there is no retaliation on the freeman for the murder of a slave. The *ḥab* of a freeman killed by a slave can, as in Mālikī law, claim the possession of the guilty slave. The *ḥab* of the slave may not exceed (whereas the Hanafīs say: amount to) that of a free person of the same sex.

Some of these provisions show an independent development of doctrine, while others clearly echo ancient solutions which the Sunnīs as a whole have not retained (see two examples in J. Schacht, *Origins*, 265, 279).

#### THE PRACTICE OF SLAVERY

##### A) In the Middle Ages

Throughout the whole of Islamic history, down to the 19th century, slavery has always been an institution tenacious of life and deeply rooted in custom. The Turks, who were to come to the relief of the Arabs in the victorious struggle against Christianity, seem to have practised it but little in their primitive nomadic state (Üçok, in *Revue Historique de Droit français*, 1932, 423): after providing for so long their unwilling quota, through kidnapping or purchase, to the slave class of the Muslim world, they became themselves supporters of the institution in an ever-increasing degree, as they adopted Islam and the sedentary way of life.

The wars of conquest, which, after the fulgurous expansion of Islam in the first century of the hijra, continued throughout the Middle Ages to further its spread in one direction or another despite setbacks elsewhere, provided the conquerors with an almost ceaseless stream of prisoners of both sexes, many of whom remained in slavery. Even in those places where the frontiers of the *dār al-Islām* were, for the time being, established, armed raids into enemy country, organized by the central power or individual groups, continued to put into practice the principle of the "Holy War", when no official truce or momentary alliance happened to be in force; and these raids brought back captives. Piracy in the Mediterranean, coupled with the privateering war from which it was often barely distinguishable, both augmented by grim razzias against the Christian seaboard, contributed to the supply of slaves to the adjacent Muslim lands, to an extent which varied at different periods but was always considerable.

Mediterranean Christendom, from Spain to Byzantium, paid this aggressive Islam in its own coin, by land and by sea. A curious chapter in the economic and social history of these Christian countries is afforded by the periodic influences to their territory of "Moors" or "Saracens", reduced to slavery, then closely watched, employed as labourers, sometimes escaping or being ransomed but usually blending, little by little, into the local population, after their slow conversion to Christianity (see Ch. Verlinden's detailed study, in *L'Esclavage dans le monde chrétien médiéval*, in *Annuaire Historique de l'Espagne*, 1934; *idem*, on Catalonia, in *Annales du Midi*, 1930, and his useful bibliography, for various countries, in *Studi*, . . . G. Lucatini, Milan, 1949, while awaiting his book on *L'Esclavage dans l'Europe Médiévale*, due to appear in 1954; interesting documentation on one particular society is to be found in A. González Palencia, *Los Mozárabes de Toledo en los siglos XII y XIII*, Madrid 1930, *pref.*, vol. 2, 242-6; on the quasi-ritual invitation of Muslim captives to the Emperor of Constantinople's banquet, in the 10th century, see M. Canard, in Vasiliev, *Byzance et les Arabes*, vol. ii, part 2, Brussels 1950, 387-8).

It sometimes happened, admittedly on a restricted scale, that Muslims made slaves of other Muslims. This was the case, for example, when members of fanatical sects regarded the rest of mankind as beyond the pale of Islam and consequently did not scruple to attack them and, if they spared their lives, to keep them in captivity. There was an exceptional instance in 1077, when thousands of women of a revolted Berber tribe were publicly sold in Cairo.

What happened more frequently, on the borders of Muslim states, was that official or private *razzias* against populations still largely pagan carried off indiscriminately human beings, particularly children, who might belong to Islam. With the spread of Islam in negro Africa and the intensification of Moslem pressure in this direction, beginning in the last centuries of the Middle Ages, the question of the legality of subsequent sales had to be put to some great jurists; they answered circumspectly, giving the dealers the benefit of the doubt as to the origin of individuals offered for sale (in 15th century, al-Wanḡharī, *Muṣṣar*, vol. ix, 477-8, tr. *Archives Marocaines*, xiii, 426-8; towards 1600, Ahmad Bābā of Tāmbuktu, quoted in P. Zey, *Esclavage et guerre sainte*, Paris 1902).

The import of slaves by peaceful means tended, from an early date, to compete with the forcible method. Slaves were included in the well-known *haki* (g.a.) (Latin *pactum*?) or annual Nubian tribute, unquestionably a continuation of an ancient tradition, which was likewise Egyptian, well-known earlier for many hundreds of years. But, in the ordinary course of events, it was trade that brought a plentiful flow of slaves from outside into the markets of the *dar al-Islām*. The slaves' caravans went into the heart of Africa or of Asia to acquire their human merchandise, bought or stolen; on the Dark Continent, the slaving propensities and internal struggles of the natives facilitated the business of the dealers. Not only Negroes and Ethiopians, Berbers and Turks were the objects of this international trade; there were in addition, chiefly in the early Middle Ages, various European elements, above all, the "Slaves", whose name has given rise to our term "slave" and has also been extended in Arabic (*Sakābi*) to cover other ethnic groups as well as slaves in Europe, their geographical neighbours. The traffic was carried on by sea as well as by land; the Red Sea has never ceased to provide a way from Africa to Arabia; the Mediterranean, with its appendage the Black Sea, offers a route, that has always been frequented, from Christian or pagan Europe to the Muslim world. Certain ports seem to have had a bigger share than others, at various times, in the reception of this merchandise: Almería in Muslim Spain, Fāranā and later Alexandria in Egypt. Darband (*Dāb al-Aḥwān*), on the shores of the Caspian, was from quite an early date a very busy frontier-market for slaves, as were Bukhārā and Samarkand in the interior.

From the middle of the 8th century, the Venetians, to the great indignation of the Papacy, began their career as purveyors of slaves—sometimes Christian—to the Islamic lands. In the 9th and 10th centuries, Jewish merchants played an important part in the traffic of "Slaves" across central and western Europe (including a celebrated *enclaustrum* "factory" at Verdun) and their distribution throughout Islam (the famous passage from Ibn Khurādādhbih on the Baghdadīyya is reproduced and translated by H. J. Sadok, in *Géographie arabe française*, vi, Algiers 1949, 20-3). At a later date, the Mamliks of Egypt with the consent

of the Byzantine emperor, imported new slaves, to serve or to replace them, from the Genoese or Venetian trading-posts of the Crimea or the Sea of Azov.

Even within the Muslim world, there were considerable movements of slaves, of every racial origin, in the Middle Ages; tribute sent to the caliphs by provincial governors and vassals, or commercial traffic. We do not know all the details of the organization of this traffic, but we are acquainted with certain aspects of it. Every big town had its public slavemarket, which in some countries was called the "place of display" (*maṣṣaf*). The one at Sāmārā, in the 9th century, is described as being a vast quadrilateral, with internal alleys and one-story houses, containing rooms and shops (al-Ya'qūbī, *Buldān*, 260 = tr. Wiet, *Cairo* 1917, 52). The slave-merchant, who was known as "importer" (*ḡalib*) or "cattle-dealer" (*nabḥāḥ*), inspired at the same time contempt for his occupation and envy for his wealth: he used in fact to draw huge profits, often through clever faking of his merchandise, if he did not actually hoodwink the unsophisticated customer in a quite outrageous fashion. Some remarkable details in this connection are to be found from the pen of the eastern Christian doctor Ibn Buṭlān, towards the middle of the 11th century (see Mez, *Renaissance*, 136-7) and in the writings of the conscientious Muslim al-Sakātī of Malaga, towards 1100 (*Manuel de Haba*, ed. Colin and Lévi-Provençal, Paris 1931, 47-58).

It is difficult to consider that it would serve any useful purpose here to quote selling-prices, particularly if the prices in question are exceptional. Such figures have no real meaning unless subjected to criticism and compared with the commercial value of other commodities—a study which has yet to be made and the materials for which, it seems, could be assembled with no great difficulty. But it is already clear and well-known that there were differences in the same market as between the various categories of slave, according to their place of origin, their sex, age, physical condition and abilities; these differences seem vast in the case of choice items, particularly females: young, handsome, talented. As a rule, whites were worth more than blacks; the selling order of value among them, in 11th-century Spain, was: Berbers, Catalans, Galicians. At Alexandria, in the 15th century, Tartars and Circassians were prized above Greeks, Serbs and Albanians. An elementary and traditional kind of comparative psycho-physiology decides the typical qualities and defects assigned, in popular lore, to representatives of the various races and, in consequence, the functions for which they are considered best suited. Berber women, for instance, are esteemed for housework, sexual relations and childbearing; negroes are thought to be docile ("one would say they born for slavery"), robust and excellent wet-nurses; Greek women may be trusted to look after precious things; Armenian and Indian women do not take kindly to slavery and are difficult to manage.

Almost all female slaves are destined for domestic occupations, in which may be added, when they are physically attractive, the gratification of the master's pleasures. Herein indeed lies the commonest motive—lawful in Muslim eyes—for their purchase. Those of them who show an aptitude for study may be given a thorough musical or even literary education, by the slave-dealer or a rich master, and beguile by their attainments the leisure hours of high society (the slave-girl musician is called *ḡayya*).

Some again are found here and there given over to prostitution, despite the Kor'anic prohibition.

Male slaves have a wider range of duties, from the beginning of their captivity. A great number form the personal bodyguards or the enormous slave-militias, black or white, frequently in rivalry, which speedily reinforce or replace the Arab, Berber or Iranian fighting-men. This military function was the chief reason for the Egyptian and North African recruitment of slaves in the land of the negroes and for the introduction into 'Irāk, by the caliphs of Bāghdād, of Turkish slaves, employed in the same way by the Sāmānids of Bukhārā (details on their formation and career in Nizām al-Mulk, *Siyasat-nāma*, ed. tr. Scheler, Paris 1892-3, 95/139 f.), but certainly the most remarkable details in this respect, remarkable both for the extent of the phenomenon and for the great ethnic variety of white warrior-slaves involved in it, must have been that of the Mamliks (g.a.).

Other male slaves have domestic duties—sometimes of a questionable nature—in the homes of people of moderate means, as well as in those of the great. Among them were the eunuchs who, chiefly on the model of Byzantium, filled the palaces of the caliphs, the amirs and all the nobles, at first as guardians of the *harem*. They are rarely referred to by their specific appellation of "castrate" (*ḡhayf*) or "eunuch" (*ḡasidh*); they are more usually designated by a neutral term: "servant" (*ḡalib*), or, as a mark of such honour, "teacher" (*shaykh*). In the 10th century, see Canard, *Histoire d'al-Rāḍī*, Algiers 1946, 210, which also indicates the function performed by some of them. In the early Middle Ages, the proportion of "Slaves" among the eunuchs imported and then re-exported by Muslim Spain was so high that *ḡalib* (var. *sābi*) was often used in the sense of "eunuch" (Dory, *Suppl.*, i, 663). In the 9th century, the illustrious writer al-Dīnāwī states that the majority of white eunuchs in 'Irāk were "Slaves", and in the course of the remarkable essay which he devotes to the effects of castration on men, he asserts that in these "Slaves", as opposed to the blacks, the operation encourages the development of all the natural aptitudes (al-Hayawān, Cairo 1938, i, 106 seq., tr. A. N. Palesy in *Iran*, 1939, 42-4). For the following century, interesting details are to be found in the work of the geographer Makdisi, on the categories of eunuchs and the processes of castration (re-ed. Pellat, Algiers 1950, 56-9; see also Ibn Hawkal, i, 110). Whereas the blacks were usually submitted to a complete and barbarous amputation, "level with the abdomen", as the later expression ran, the whites, who were operated on with a little more care, retained the ability to perform coitus (this distinction is also vouched for in modern times); some of them took concubines or even wives, as the Hanafī school allowed.

Outside the house, many slaves served as assistants in business, or carried on business themselves, in accordance with their legal position, with a considerable measure of independence. Others cultivated their masters' fields. Examples are found of monumental building-works carried out by slave-labour, especially by prisoners-of-war in government service. But it must be emphasized that mediaeval Islam seems scarcely to have known the masters of large-scale rural exploitation based on an immense and anonymous slave labour-force. One big attempt along these lines, carried out by the 'Abbasids in order to revivify the lands of 'Irāk, the centre of their empire, ended, during the second half of the 9th

century, in the prolonged and terrible revolt of the *Zandī* [g.a.] slaves, who had been imported from the eastern coast of Africa to bring the swamps of Lower Mesopotamia under cultivation.

The vast majority of slaves therefore escaped the system of collective forced labour, which condemns a man to one of the most distressful of all existences. This does not mean that they were one and all contented with their lot; the number of runaways, which seems very high at certain periods, would indicate the reverse. But setting aside the suffering caused by the slave traffic (all the more if castration was performed), and taking into account the general hardness of the times, the condition of the majority of slaves with their Muslim masters was tolerable and not too much at variance with the quite liberal regulations which the official morality and law had striven to establish. Despite the obvious points of inferiority, it was even known for them to attain happy and enviable positions, in material prosperity and influence, especially in rich and highly-placed families and, even more, in the immediate entourage of the sovereign. They had, in addition, the prospect of liberation, which it was not always overbold to hope for.

This liberation, in the case of prisoners-of-war or victims of *razzias* by land or sea, might result from negotiations between the powers concerned: an exchange of captives or restoration in return for a ransom. History is full of such negotiations, sometimes futile, sometimes crowned with success, between Christian and Muslim states. Many were the captives ransomed, in both directions, thanks to collections of an official nature, but also more and more by ordinary individuals. In the latter case, Jews often played a useful part as go-betweens; in Spain they were sometimes referred to as "al-faqueques" (Ar. *fakkā*, "liberator"). Further, great Catholic religious Orders, organized for the most part since the end of the 12th century and the beginning of the 13th, devoted themselves to succouring and ransoming their co-religionists who were captives in Muslim countries: in discharging this duty, Trinitarians and Mercedarians were to have a long and fruitful career, which their colleagues, ancient and modern, have justly regretted deemed it necessary to embellish still further by means of exaggerated figures.

Also worthy of consideration, for their number and for their effects on Muslim society, were the compulsory manumissions, under the conditions imposed by the Law, of concubines who had borne children, as well as the voluntary manumissions of slaves of both sexes, especially Muslims, by their Muslim masters. This apostasy was rendered attractive for Christians; though not, as a rule, imposed on them, it was insistently suggested. We have already said that enfranchisement is an act of piety, widely practised; it is frequently the result of a vow or oath (conditional oath, expiation for a violated oath). The beneficiary ranks unreservedly as a free man or woman; the bond of clientship which continues to exist, and whose existence is felt, prevents not so much a slight moral derogation as an inestimable advantage in the reality of a highly compact social structure. From 'Abbasid times onward, more than one freedman rose very high indeed in the military and political hierarchy, even to the most exalted ranks to which a free Muslim might attain. Their very names, which they continued to bear, betraying to the world their former servitude and even their irremediable condition as eunuchs (some of them commanded armies), were

no obstacle to such a rise. In the 4th/10th century, such men as Mu'nis in Bagdad and the negro Kāfir in Egypt afford a remarkable illustration of the system. A number of Muslim dynasties, in Spain as well as in Egypt and the heart of Asia, have an avowedly servile origin. A Turkish "slave" dynasty reigned at Dild in the 13th century (see DÖNİ SULTANATE). The "mamlik" sultans of Cairo actually made such an origin a condition of coming to power, through a recognized *curse honorum* (see G. Wiet, in Hanotaux, *Histoire de la Nation Egyptienne*, vol. iv, 1937, 393-5; D. Ayalon, *L'Esclavage du Mamlouk*, Jerusalem 1937, and *Wam'as*). As for maternal ancestry, reigning sovereigns almost everywhere, including the 'Abbasid caliphs, were commonly sons of slave concubines, of widely varying provenance.

It is therefore easy to imagine the importance of slavery in that mingling of populations to which Muslim institutions have been so favourable. The number of new slaves introduced into the great cities in certain years could be reckoned in thousands; the slave element formed a considerable part of the urban population and had a marked tendency to blend with it, not only through enfranchisement but also through sexual intermingling, which was commonplace. Crossbreeding with blacks may have had ethnological consequences, which it is not within our competence to analyse. The slave-trade was of prime importance in economic life; the taxes imposed on it were a source of profit to the authorities. Although slave-labour was for the most part employed in household duties and was not generally applied to productive work, yet the military function of large numbers of male slaves was one of the salient features of this civilization, and had repercussions on the foreign and domestic policies of the medieval states (see M. Canard, on a treaty between Byzantium and Egypt in the 13th century, in *Mélanges Gaudet-Demombynes*, Cairo 1935-43, 297 ff.).

#### B) In the Modern Period

The practice of slavery among the Muslims seems to have undergone no radical changes during the modern period, down to the 20th century. The sources and the mediaeval routes of the slave-trade were modified only to a limited extent by the disappearance of Islam from Spain and on the other hand its expansion or consolidation in the Balkans, India and Indonesia. Far more considerable must have been the effect of the position adopted by European Christendom; having almost entirely suppressed slavery on its own ground, it must have ceased to contribute to the commercial supply of white human merchandise long before it adopted the worldwide policy of abolitionism, whose effects are still perceptible in our own days. Christendom nevertheless busied itself with supplying its American colonies with African negroes, thrown into cruel

bondage. Among these unfortunate, Muslims seem to have been particularly numerous in Brazil, where from 1807 to 1833 they fomented the great slave revolts, rigorously quelled, which shook Bahia (on their cultural influence and their disappearance, see R. Risard and R. Basile, in *Revue de l'histoire* 1930 and 1932 respectively). In the Mediterranean, where the corsairs and "Barbary" pirates continued their ravages, perhaps to an even greater extent, after the establishment of Ottoman supremacy (see O. Eek, *See-räuber im Mittelmeer*, Munich-Berlin 1900), the bordering Christian powers retaliated almost down to the end of the 18th century, as they had done previously, by numerous captures; this work of the Knights of Malta took an active part: during the first half of the century, they sold to the French navy the men it needed as rowers on the galleys. More than ten thousand Muslim slaves attempted a revolt on the island in 1749; Bonaparte liberated the two thousand Barbary slaves whom he found there in 1798 (see Godeschot and Emerit, in *R.A.P.*, 1932, 105-13).

On the lot of Christian captives or slaves in the hands of the Barbary corsairs, there is abundant European documentation; perhaps even too abundant, in view of its not being always of good quality. If Cervantes' captivity at Algiers is a matter of certainty and had a felicitous result on his work, that of St. Vincent de Paul at Tunis is scarcely less visible. The information provided in what might be termed the classic accounts of the subject, such as those of Friar Haedo or Father Dan (17th century, the heyday of the corsairs), must be carefully checked against other data, preferably derived, where possible, from consular archives (for all aspects of slavery at Algiers, see the solid study by H. D. de Graumont, in *Revue Historique*, 1884-5, to be supplemented by Venturi de Paradis, ed. Fagnan, Algiers 1898, and Lespès, *Algier*, Paris 1930, II, chaps. 3-5; for Tunisia, we have a judicious statement of the facts by J. Pignon in *R.T.*, 1930; see also, as a more recent publication, García Navarro, *Redenciones de cautivos en Africa*, ed. Vaqueiro Pajaro, Madrid 1946). It is important to distinguish between the slaves held to ransom, who were rich and well-treated, and the slave workers, whose widely-varying destinies might hold in store for them a bitter life in the galleys, or wretched toil in the countryside, or an often much easier life in or just outside the city. Barbary at that time abounded in "mataneros" (Ar. *ma'mūn* "sold") or "baginos" (Fr. *bagin*: "bath") in which the slaves were penned. The Atlantic itself was scoured by the Moroccan corsairs, from their base at Rabat-Salé (see Penz, *Les capitaines français du Maroc au XVIIe siècle*, Rabat 1944). As in the Middle Ages, the liberationist religious Orders and the Jews took an active part in procuring slaves by ransom. Renegades attained high positions in the West or in the army, but at the beginning of the 19th century, after a slow decline that was hastened by increased pressure on the part of the European powers, the number of Christian captives was considerably diminished. At the time of the French conquest in 1830, Algiers had no more than 122, as against several thousands two centuries earlier. North Africa must have been one of the main sources of negroes, on the other hand, right down to the French occupation. In this traffic Morocco played a preponderant part, especially at that period in the second half of the 17th century, when the sultan Mūlay Ismā'īl raised a veritable army of negroes and half-breeds (*'abid al-Baghdādī*, in consequence

of the oath they took on this collection of "authentic" traditions; see H. Terrasse, *Histoire du Maroc*, II, Casablanca 1930, 256-7). Black slaves of both sexes continued to be imported into Morocco until well into the 20th century, with some pretence at secrecy since the open traffic from Timbuktu and public sale (the fair of Sidi Ahmad a-Missi on the southern borders; at Fez and Rabat the special market was called *birka*, as in Tunisia) had become impossible. It should be pointed out how much their presence colours the family and social life of the cities (see R. Le Tourneau, *Fis avant le Protectorat*, Casablanca 1949, 200-3, with references; and, under the Protectorate, J. and J. Tharaud, *Fis ou les bourgeois de l'Islam*, Paris 1930, 37-43).

Towards 1810, a competent observer, Dr Louis Frank, made a special study of the importation of slaves at Tunis (*L'Univers Pittoresque*, Tunis, 115 seqq.) as he had done in Egypt ten years previously under Bonaparte (his *Mémoire sur le commerce des esclaves au Kaire*, Paris 1802). The general organization of the traffic, the focus of which was public sales, recorded in writing, was much the same in both places, with the difference that whereas Cairo was supplied solely by big caravans (two annual, one from Sennār and one from Dār-fūr—see also J. S. Trimmingham, *Islam in the Sudan*, Oxford 1949, 182-3, and *passim*), the biennial, from Bornu or Fezzan, Tunis used to receive some isolated *sa'iq* (negroes), apart from one big caravan every year from Fezzan or beyond (see also J. Despois, *Géographie humaine du Fezzan*, Paris 1946, 35-7, with references): an annual total of some three thousand for Cairo and one thousand for Tunis. In the latter city the male black slaves came under the authority of the *agha* or chief eunuch of the harem, while the negroes had "a forewoman to rule and protect them." In Egypt, the mortality of these negroes was high; in Tunis, according to Dr. Frank, their infants survived only if they were of mixed blood (on the blacks in present-day Tunisia, see Zawadowski, in *En terre d'Islam*, 1944). In the time of Muhammad 'Alī, towards 1815, the Egyptian army used to make up its strength by yearly razzias from bases in Dār-fūr and Kordofān; it would enrol the sturdiest of the captives and hand the rest over to the inhabitants of those provinces and to the dealers, some of whom were themselves black converts to Islam (see T. F. Buxton, *De la traite des esclaves en Afrique*, French tr., Paris 1940, 70-5).

The moral and social condition of slaves in an urban environment, in the 19th century, seems to have been fairly uniform in such diverse cities as Tunis, Cairo and Mecca (a great centre for the traffic on the occasion of the annual pilgrimage). White slaves had become rare since the beginning of the century; they were expensive and in little demand except by exalted personages or rich Turks; white female slaves were preferably Caucasians, famed for their beauty. Arabia could muster a small number of Indonesians. The bulk of the slaves were black, but in the east a distinction was drawn between Ethiopians, who were paler and more highly prized, and negroes in the strict sense. Eunuchs were imported already castrated; in Mecca, the majority of them were in the service of the mosques. All the European writers lay stress on the good treatment these blacks customarily received at the hands of their town-dwelling masters, in contrast to the dreadful conditions of their capture and subsequent transportation under the lash of the Arab or Arabized slaves. They readily adopted Islam and be-

came deeply attached to it (some even thanked God for having led them to the true Faith through their captivity; Doughty, *Arabia Deserta*, I, 554-5), though their new faith did not prevent them from performing their traditional songs and dances, or even their African rites of exorcism (the *šār* [p. 8]; see Trimmingham, *op. cit.*, 174-7; similar facts in Barbary). They formed, one may say, part of the family and, especially as concubines, the slave-girls came to be of use blood with it. Enfranchisements were usual, but it was not unknown for a concubine who had borne a child to seek from her master a denial of paternity, since there were more advantages for her in remaining a slave than in marrying and running the risk of repudiation (see especially Lane, *Manners and Customs*, London 1895, 147, 168, 192-7; Burchardt, *Voyages en Arabie*, French tr., Paris 1835, I, 251-2; Snouck Hurgronje, *Mekka*, II (The Hague 1899), 11-24, 132-6). It is therefore not surprising that, round about 1860, the Swiss Henry Dunant, founder of the Red Cross, who knew Tunisian society, laid great stress on the customary mildness of urban servitude among the Muslims, as compared with the methods of American slave-holders.

At the end of the 18th century, Mouradgā 'Obson, to whom we owe so much of our information on the structure of the Ottoman empire, declared: "There is perhaps no nation where the captives, the slaves, the very toilers in the galleys are better provided for or treated with more kindness than among the Mohammedans" (*Tableau général de l'empire ottoman*, IV, 1, 381).

Under the sultans of Constantinople, slavery perpetuated the mediaeval traditions of the Islamic peoples: it furnished domestics, concubines, officials and soldiers. For the use of private persons, for example, the slave-dealers (*esirciler*), who were under the supervision of a *kāhya*, had at their disposal a public building in the capital, not far from which lived the expert matrons who acted as go-betweens if the purchasers so desired. Every slave, after passing the frontier, had a document of civic status bearing his name, which remained as a title-deed in the hands of his successive owners. People of quality, who bought on a reduced scale, had *kariyas* (quarters) of close on a hundred slave-women. The sultan's *harem* numbered several hundred, classified in a strict hierarchy of five ranks, only the two highest of which (those of *hadin*, "lady", and below them, of *gadhik*, "privileged"), were attached to the person of the sovereign. Some of the women of the highest rank were former slaves whom the sultan had freed and subsequently married informally. Although for many years none of the sultan's wives had been freeborn, these former slaves had no difficulty in wielding very great influence at court. Besides this female element, there lived at the seraglio numerous eunuchs, conventionally known as "aghas" (Turkish also uses in this sense the Arabic *khādīm* > *kādīm*). The black eunuchs, under the "agha of the girls" (*kislar agası*), vied with the white eunuchs, under the "agha of the gate" (*kapi agası*) for precedence and power; in the upshot it was the former who carried the day. Finally we must note the importance in all public services, civil and military, of slaves of various origin, the "black eunuchs of the gate" (*kaphkharlar*), who, often converted to Islam of their own accord and enfranchised, attained the most desirable posts. From the 17th century, when the number of white slaves brought in by war and purchase had dwindled, almost down to the middle of the 19th century, these functioned the system,

contrary to the Sacred Law, of *devarna* (see *NEW-SPRIME*), or forced enrolment of young Christians of the empire, mainly from the Balkans, as slaves of the government. These involuntary yet devoted servants of the Porte used to receive a training suited to their abilities; the most gifted would enter the palace or the higher administration; the rest were turned over to the navy or various military corps, including the Janissaries, whose brilliant reputation was due to them (see M. d'Oliven, *op. cit.*, vi and vii, and H. A. R. Gibb and H. Bowen's solid and well-documented *Islamic Society and the West*, i, Oxford 1950, 42-4, 56-60, 73-82, 229-31).

Further east, in modern Persia, it is essentially in the domestic form that slavery has been practised. There one meets with the general characteristics already noted: usually good treatment, integration in the family, ease of enfranchisement, with some modifications belonging to Indian *Shruti* law (q. *supra*). Seventeenth-century European travellers were struck by the high number of eunuchs and the power they had, both at the Safavid court and in the houses of the great; according to Chardin (*Voyages en Perse*, Amsterdam 1711, II, 283-5) there were some 3,000 of them in the service of the sovereign, while the nobles and even rich private citizens had staffs of eunuchs. They were given the courteous appellation of 'tutor, master' (*shaykh*), equivalent to *shaykh* which we have met above. Their purchase price was extremely high; the majority were white and came mostly from the Malabar coast of India. In the first half of the 19th century, under the Qajars, white slaves became few and soon disappeared altogether, except for the pretty Caucasian girls who continued to enter the harem; but, contrary to the most widespread Muslim practice, their children could not succeed to the throne, which was reserved for sons whose mothers were of royal blood. The number of the black slaves had increased; they were either Ethiopians who had crossed Arabia, or Zangis of east Africa, who came by way of Zanzibar, Mascot and Bushire (on this traffic, in Arab hands, see R. Coupland, *The Exploitation of East Africa*, London 1939, 136-46, with references), to draw custom to the market of Shiraz. The high mortality which overtook these coloured men in Persia prevented their forming an important element in the population (see Polak, *Persien*, Leipzig 1865, I, 248-61, 661; E. Aubin, *La Perse d'aujourd'hui*, Paris 1908, 148). The Persians, in the course of their ancient conflicts with the Soudan inhabitants of Turkestan, were sometimes reduced to slavery, as being heretics. In the middle of the 19th century, it was still possible for so many thousands of them, prisoners of war, to be sold at once in the market at Bukhara that prices slumped. Some of them in this same town, having won their masters' regard and being once franchised, rose to every official position of honour. Others, however, less well endowed, went from there to swell the number of the slaves on whose shoulders fell the greater portion of the agricultural work in the khanaats of Khorasan (see A. Vambéry, *Travels in Central Asia*, London 1864, 192-3, 331, 371).

Among the relatively rare examples of an essential agricultural task performed by a compact slave labour-force, we may cite that of the region of Zanzibar itself, where, in the 19th century, there was kept a body of blacks gathered from almost as far as the great lakes and destined in the mass for export. The harsh life of toil in the sugar- or clove-plantations, run by Arab or Indian planters, all along the coast, was quite devoid of the amenities

of urban servitude. The lot of thousands of slaves employed in pearl-fishing in the Persian Gulf also seems to have been a very harsh one over a long period.

Much less burdensome, certainly, but wildly discriminatory, is the slavery which still obtains today in the desert: in the Sahara on the one hand, in Arabia on the other, for the benefit of the nomad tribes. Tuareg society, divided into three rigid castes, used to keep on the lowest level, beneath the nobles and their vassals, the slave-groups (*akli*, pl. *aklani*), enfranchised or not, almost all of them black, who were utilized by the dominant class either as tillers of the soil or as servants to men and beasts. Among the beduin of the Arabian peninsula and its fringes (see especially A. Jaussen, *Costumes des Arabes au pays de Moab*, Paris 1908, 26, 60-1, 125-6; A. Musil, *The Manners and Customs of the Ruwala Bedouins*, New York 1928, 276-8), black slaves may be interned and acquire property, but however intimate they may be with the master and his family, however great the advantages custom permits them to enjoy, they are never regarded as equals, even after enfranchisement: they are 'abid, and 'abid they remain; and marriage with the sons or daughters of them is considered a come-down, by the lowest of whites. *Bihiyya* 212-2; in the references in the text may be added R. Levy, *An Introduction to the Sociology of Islam*, I, 117-27.

#### ABOLITION

Although Islam, in teaching and in actuality, has favoured the emancipation of slaves, it was only under an overwhelming foreign influence that it began, about a hundred years ago, an evolution in doctrine and in practice towards the total suppression of slavery, its abolition in law and custom. This evolution, which has continued, is in some regions still incomplete. Here we have one of the most typical examples of the transformation that the Muslim world has undergone, through European pressure or example, from the mid-15th century down to our own day.

The European powers concerned were themselves, to some extent, novices in this field: they had long favoured the traffic and maintained slavery in their colonies. One of them, Russia, had maintained serfdom on her own soil. The French 'philosophers' of the 18th century, being with Montesquieu, had condemned the very principle of slavery: its short-lived suppression under the first Republic was unfortunately a check. But, from 1806 onward, Britain took the lead in the movement for the suppression of the slave-trade and then of slavery itself. She may be accused of having more than once let her maritime and colonial interests dictate her interventionist zeal or, on other occasions, the mildness of her actions. Yet, when all is said, she stands out as a great pioneer of abolition over the whole surface of the earth, including the lands of Islam.

The diplomatic history of the 19th century, since 1814-15, is dotted with treaties and other international agreements aimed at banning the traffic in negroes, by sea and across the continent of Africa, in increasingly precise terms. The suppression of slavery as such is mentioned only towards the end of the century, and then timidly. But measures in this direction had already been adopted in several portions of the Muslim world, particularly those under the authority of European states. Britain, having emancipated the slaves in her colonies by

the famous Bill of 28 Aug. 1833, made in 1843 the first general decision to abolish slavery in India (completed by a series of other Acts down to 1862). France completely abolished slavery in all her overseas territories, including Algeria, by a decree of the Second Republic on 27 April 1848; the Netherlands did the same for their Indonesian possessions, by the laws of 1854-56, with effect from 1 Jan. 1860 (31 years before their colonies in the West Indies); and Russia for her Central Asian dependencies on 12 June (O.S.) 1873, before even having completed the conquest of Turkestan.

Parallel with this direct and radical action by the Powers, the Muslim states which, while remaining independent, were most subject to Western pressure and had most contacts with European civilization, were slowly and cautiously embarking on restrictive measures. As early as 1830, the Ottoman sultan had enfranchised *en bloc* those white slaves of Christian origin who remained true to their religion, while expressly keeping the Muslims in slavery (G. Young, *Corps de droit ottoman*, II, Oxford 1905, 121-2). To Tunisia belongs the honour of having been the first to promulgate a general edict of emancipation for black slaves (*shu'ba* factu, of Muslim slaves: there were practically no white slaves in the Regency). By a decree of 23 Jan. 1846, the same year in which he was to make his sensational journey to France, the bey Ahmad ordered that letters of enfranchisement should be granted to every slave who so wished, and that every instance of slavery of which the religious magistrates might be apprised should be referred to him. The preamble to this decision, which was approved by the two highest dignitaries of the Hanafi and Maliki rites in the country, is worth dwelling on. In it, slavery is declared to be lawful in principle but regrettable in its consequences. Of these considerations particularized, two are of a religious nature, the third political (*muṣṣala* *siyāsiyya*): the initial enslaving of the people concerned comes under suspicion of illegality by reason of the present-day expansion of Islam in their countries; masters no longer comply with the rules of good treatment which regulate their rights and shelter them from wrong-doing. It is therefore belittling to avoid the risk of seeing unhappy slaves seeking the protection of foreign authorities (M. Bompard, *Législation de la Tunisie*, 398; Arabic text in Sanad, *Madjma' al-Kawāin al-Tūniyya*, fasc. 1, p. 4).

Thirty years later, in the treaty concluded with England on 19 July 1875, the bey Mubammad al-Sādiq undertook not only to see that the decree of 1846 was given full effect, but also to do everything in his power to suppress slavery and punish any infraction. Under the French protectorate, various Tunisian ministerial circulars (1887-91) and the bey's decree of 28 May 1890 completed the formal prohibition of slavery in the Regency, and the organization of the freeing of black slaves on the judicial and administrative planes (M. Bompard, *op. cit.*, 472; P. Zey, *Code annulé de la Tunisie*, I, 384-6).

At Istanbul, the first imperial firmāns against the slave-trade date from the period of the *Tanzimat*, under 'Abd al-Majid, and especially from the years of close understanding with France and Great Britain: Oct. 1834 for the whites, Feb. 1847 for the blacks (a religiously-inspired reservation exempted the *Hajjās* from the reform). How little effect these documents had at first in preventing the import of blacks, is apparent from the multiplicity of decisions of the same sort, the circulars and instructions which continued to repeat one another,

in terms ever more insistent and explicit, till round about 1900. The agreement entered upon with Great Britain in 1830 but not applied till 1848, followed by Turkey's adhesion to the general Act of the Brussels Conference of 1850, constituted an important double step towards the suppression of the traffic, already much reduced by abolitionist action in Africa and the Red Sea: till then 'more or less clandestine', it was to assume thenceforth 'the nature of smuggling and was treated as such' (G. Young, *op. cit.*, 172-200). Moreover, foreign consuls secured from the Ottoman authorities the enfranchisement of slaves who sought refuge with them. The Constitution of 1876, guaranteeing the personal liberty of all subjects of the empire remained a dead letter until it was put in force by the Young Turks in 1908. At this time there were only a very few slaves, all of them domestic, in the capital and those provinces under the effective control of the central power (cf. Dr. Millant, *L'esclavage en Turquie*, Paris 1912).

Egypt was nominally included in the Ottoman territories within the scope of the oldest firmān forbidding the traffic in negroes. Indeed it needed to be, for this traffic had expanded just at the moment when the Egyptians installed themselves in the heart of the Sudan. Pasha subordinate to the Porte organized some anti-slavery expeditions in the south; the results were but mediocre (cf. J. Cooper, *Un continent perdu*, Fr. tr. Paris 1876, 25-8). Under the khedive Ismail, a mission of this type entrusted to Sir Samuel Baker (1869-73) was equally disappointing (S. Baker, *Ismailia*, London 1874, Fr. tr. Paris 1875), whereas after 1874 the fight against slavery was intensified, hand in hand with the Egyptian expansion, under Colonel Charles George Gordon and his European colleagues (cf. P. Crabbé, *Gordon, the Sudan and Slavery*, London 1933); H. Dehérain, in *Hauteville, Histoire de la nation égyptienne*, VI, 481-552). At this period, the khedive, under the terms of his agreement with England of 4 Aug. 1877, was formally banning all trade in negroes and then opening enfranchisement offices in the various provinces. But it was only towards the end of the century, under the English *de facto* protectorate, that the most energetic measures were taken: since 1895, any infringement of the freedom of the individual has been classed as a crime in Egypt, while since 1898 the slave-trade, with the defeat of the Mahdist movement which had revived it in the Sudan, has been no more than an infrequent and clandestine phenomenon.

It was again the British who attacked, with notable persistence, one of the most productive sources of Muslim slavery: that of east Africa. The traffic there, by land and sea, had assumed terrifying proportions since Sa'īd, the Imam of Mascot, had succeeded in gaining a foothold on the coast of Africa, at the beginning of the 19th century. The stages through which English diplomatic activity passed are symptomatic: in 1822, after ten years of parleying, Sa'īd consented merely to forbid his subjects to export slaves outside the maritime lane joining Africa to Oman; in 1845, he prohibited the export of slaves from Africa to Arabia and beyond, while at the same time insisting on the lawfulness of the import of slaves and of the slave-traffic within African territory. His son Barghash, sultan of Zanzibar, was to go further, in consequence of Sir Bartle Frere's famous mission to him: by the treaty of 3 June 1873 he prohibited the maritime traffic and the public slave-markets; then, in 1876, he declared the traffic by land illegal (see R. Coupland,

*East Africa and its Invasions*, Oxford 1938; *idem*, *The Exploitation of East Africa*, London 1939; if this did not stop it immediately, it was at any rate a considerable embarrassment for the trade. Next, under the British protectorate, a decree of the sultan in 1897 granted their freedom to any slaves who should ask for it, and forbade the courts to concede the claims of slave-owners. On 6 July 1909, a final decree abolished the status of slave in its entirety. The same thing had happened two years before in British East Africa (now Kenya), against an indemnity to be paid to the owners (the matter was settled in 1916).

It is safe to say that, towards the end of the 19th century and the beginning of the 20th, the export of negroes was at a very low ebb. We may add that Persia, one of the receiving countries, had also publicly renounced this trade in her 1882 treaty with England, and her newly-created National Assembly adopted in Oct. 1907 a "fundamental law" in favour of individual freedom (R. Aubin, *La Perse d'aujourd'hui*, Paris 1909, 210); if slavery was not suppressed by these measures, it did suffer a severe blow. In Africa itself, the greater part of the vast zone where-in the Muslim slave held sway, extending from the Atlantic to Wadai, east of Lake Chad, was conquered piecemeal and occupied by France; this has been followed by the almost complete disappearance of the slave-trade from this immense area and slavery has been abolished almost everywhere within it. Italy, the latest comer of the colonial powers, conducted an identical policy in the territories she administered in the east (Somaliland, Eritrea) and north (Tripolitania, Cyrenaica) of the continent. But the last independent state in Africa, Ethiopia, still governed by a Christian dynasty, rejected (despite the negro's edicts against the traffic) a notable stronghold of the slavers, facing the Sudan and Arabia and exporting whenever possible; in the provinces, Islamization and the intensification of the slave trade often went hand in hand (Trimingham, *Islam in Ethiopia*, Oxford 1952, 203-4 and *passim*). During the 1924-28 war, the relinquishment of Fezzân by the Italians, who had just taken it from the Turks and its occupation by the Saudis, allowed the traffic to resume much of its activity: a slavemarket was held every week at Murâh (Petragnani, in *L'Italia on Oriente*, Feb. 1923, tr. in *L'Afrique française*, April 1922).

At the end of the first world war, when the victors had visions of organizing the peace and of securing in accordance with their Convention of St. Germain of 10 Sept. 1919, "the complete suppression of slavery in all its forms", long experience gave them advance information on the problems that were bound to be raised by a task of this nature; for the successes that might be hoped for and the resistance that might be expected in Muslim lands. The suppression of the traffic, which had become for the most part clandestine, was a troublesome affair, demanding the use of powerful forces and involving, by sea, the risk of provoking local conflict between nations (France and Great Britain, 1905, in the Indian Ocean). Yet making an end of the trade does not mean putting a stop to slavery or to the transfer of slaves from one owner to another. For official abolition, it is not always easy to secure under a protectorate; nor is it always equivalent in practice to positive and immediate suppression.

The fact is that, if slavery is such a firmly-rooted institution in certain Islamic countries, it is due far more to social conservatism than to a collective

economic need. We established above that the part played by slave-labour in those lands is rarely essential for productive work. This explains why an abolitionist policy, so long as it is not applied too high-handedly, provokes no serious disturbance there, nor any violent reaction. The prevailing wish in the minds of slave-owners is to enjoy the comfort afforded by having a large domestic staff, kept under strict control; from which, moreover, lawful concubines may be recruited. They have on their side not only the tacit consent of the majority of their slaves but also an extensive public opinion and the religious tradition of Islam. The domestic slave is in his master's power through fear and respect, through self-interest, through affection. We must bear in mind that he is generally well-treated; we may reflect that he lives in a family atmosphere, without thought for the morrow. To the slave-woman, concubinage offers, besides various advantages for herself and her children, the chance of an ascent in the social scale, of which an untimely emancipation would rob her. Even when freed, the slave is often likely to remain close to his master. If he has procured his freedom against the latter's wishes, or if he has been snatched from the claws of the slaver, he is woefully without resources in a hostile environment, unless he benefits by the special measures which governments ought to take—and which they have occasionally taken—with a view to his social readjustment.

The fact, brought out in the Kur'an, that slavery is in principle lawful, satisfies religious scruples. Total abolition might even seem a reprehensible innovation, contrary to the letter of the holy Book and the exemplary practice of the first Muslims. Nevertheless, contact with the realities of the modern world and its ideology began to bring about a discernible evolution in the thought of many educated Muslims before the end of the 19th century. They may be fond of emphasizing that Islam has, on the whole, bestowed an exceptionally favourable lot on the victims of slavery. Yet they are ready to see that this institution, which is linked to one particular social order, has outlived its day. The reformer Sayyid Ahmad Khân in India, goes so far as to maintain, in a special work, *Thâbit al-Ghulam*, which appeared in 1895, translated into Arabic in 1895, that the Kur'an (xlii, 4) forbade the making of new slaves (Baljon, *The Reforms... of Sir Sayyid Ahmad Khân*, Leiden 1949, 28-29). Without going so far, his illustrious compatriot, All al-Sayid al-Sayid, London, 1st ed. 1933; ed. 1935, 262) includes slavery among the pre-Islamic practices which Islam only tolerated through temporary necessity, while virtually abolishing them: man-made laws were later to complete the abrogation of it, which could not have been done formerly by a sudden and total emancipation (cf. the Egyptian Arab and Châfî, in his *Le savant, le langage et le poète de son musulman*, Cairo 1891, 2nd ed. 1938). This thesis gradually found its way, to a varying extent, into the circle of the *Ulamâ* (for the school of Muhammad 'Abdûl, see *Tafsîr al-Mandîr*, xi, 288 ff.), already open to the older arguments of the Tunisian muftis, which were more restrained and more legalistic. But slowly, by the new gains of the *Wahhâbîs* of Arabia, those uncompromising restorers of the sunna of the Prophet; up to the present day they have vigorously maintained their downright antagonism towards abolition.

The League of Nations, from the very outset of its work, displayed an active interest in all problems

relating to slavery. This interest was notably expressed in the adoption of the international Geneva Convention of 25 Sept. 1926, in which the legal definition of slavery is formulated ("status or condition of a person over whom any or all of the powers attaching to the right of ownership are exercised"), which squares with the concepts of Muslim law and the signatories pledge themselves "to bring about, progressively and as soon as possible, the complete abolition of slavery". One by one, almost all the States concerned adhered to this Convention, but not Saudi Arabia or the Yaman. From then on, a consultative committee of experts worked indefatigably, gathering official returns (some of which, furnished mainly by the British and Italian governments, are highly instructive) and publishing copious reports. Legal measures multiplied, independently of this international organization as well as under its aegis. Abolition came as a matter of course in the new Turkish Republic, which repudiated every trace of Muslim law, as in the Levant territories severed from the old Ottoman empire and directly administered by France or Great Britain. In Egypt, the 1923 Constitution confirmed the guarantee of individual liberty. One after another, Afghanistan (1923, 1931), Iraq (1924), Kalât (1926), Persia (Iran) and Transjordan (1929) suppressed the legal status of slave. Bahrain followed suit in 1937.

In Africa, an order of 1922, coupled with penal sanctions in 1926, abolished slavery in Tanganyika (the former German East Africa) under British mandate; the Anglo-Egyptian Sudan took steps, as far-sighted as they were vigorous, to put an end by degrees to the vestiges of the traffic and to assist the freed slaves. In Northern Nigeria, under British administration, abolition, which began in 1907 and suffered a momentary check towards 1935 from a new offensive on the part of the trade, was accomplished by an order of 1936. In Morocco, a circular from the French Protectorate administration in 1922 suppressed public slave-dealing and granted their freedom to all who should ask for it. The pacification of the Sahara frontiers of Morocco by the French army, round about 1930, made it possible to put an end to what remained of the traffic in negroes. The Italians resumed Fezzân in 1929 and secured respect once more for abolition. Finally, Ethiopia showed evidence of good will: edicts of 1923, 1924, and 1931 forbade the capture of free persons or the disposal of slaves, while ordering many of them to be freed. A move was made to carry out these measures; enfranchisement officers were set up, from August 1932. The undertaking was immense and difficult. The Italians hurried things up by their armed intervention; they abolished slavery in Ethiopia by a decree of 12 April 1936.

The sole remaining resort of slavery was Arabia (outside the British colony of Aden). But it was there that, even in Arabia, European and particularly British persistence with the local authorities was not without effect. King Ibn Sa'ûd, master of the Hijâz and Najd, had abolished the customs-duty formerly levied on the import of slaves by the *shâir* Huwayn; in 1927 he officially confirmed to the British legation at Jidda a general right to manumit all slaves who claimed their freedom (those who refused 150 of them between 1930 and 1935). Great Britain renounced this right the day following the promulgation in Saudi Arabia of the regulation on slavery of 2 Oct. 1936, which forbade the import of slaves by sea (the reason being that the religious law prohibits the capture or purchase of subjects of coun-

tries to which one is bound by treaty; but this same regulation declares servile status to be lawful and organizes it according to the strict letter of Muslim law; see Nallino, *Scritti*, I, 43, 124-5 and *Appendice*). In Feb. 1934, the Imam of the Yaman entered upon an undertaking with Great Britain to prohibit the entry of slaves coming from Africa. From the sultans and *shaykhs* of the southern coast (Eastern Aden Protectorate) and the Persian Gulf, Britain obtained similar decisions, reinforcing any made previously. A further step forward was taken in March 1935, when the sultan of Lahij forbade all sale of slaves. In 1938, two sultans of the Hadramaut and the *shaykh* of Kuwait declared all traffic in slaves to be illegal, and authorized slaves to claim their liberty (v. H. Ingrams, *Arabia and the Isles*, London 1942, 349-50; and U. N. Economic and Social Council, *Official Records*, Sept. 1951, 644).

Under cover of the second World War (1939-45) there seems to have been some retrogression, with a small-scale resumption of the trade, particularly in certain Ethiopian provinces. At the time of writing, it is usually acknowledged that there is practically no transport of slaves any longer from Africa to Arabia. Nevertheless the legal status of slave persists in the peninsula. It is evidently the example of the neighbouring independent states of Saudi Arabia and the Yaman that prevents Britain from increasing her pressure on the states which her control with a view to total abolition. Other considerations, no doubt, keep France from having slavery abolished by law in Morocco, where there are in any case only mild survivals in the cities or the southern oases (see, for the bend of the Dra, Dj. Jacques Meunier, in *Hesperis* 1947, 410-2); resistance to a finalisation does not come from the class of *ulamâ* (for the present-day legal aspect, see *Gazette des Tribunaux du Maroc*, 1944, 5-7; and *Revue Marocaine de Droit*, 1952, 154-6; 183-5). In the Sahara, the French administration which as early as 1916 deprived the Tuareg of their agricultural slaves, took their house slaves away from them in 1946 (R. Capot-Rey, *Le Sahara français*, Paris 1953, 288-9). The United Nations Organization (U.N.O.), in its possession, in its constitution of Oct. 1951, laid down as a principle the personal liberty of its subjects.

The United Nations Organization (U.N.O.), the moral heir of the League of Nations, has resumed the study of slavery and has condemned it, in no uncertain terms, in its "Universal Declaration of Human Rights" adopted by the General Assembly on 10 Dec. 1948 (though not ratified by every State: "Art. 4. No one shall be held in slavery or servitude. Slavery and the slave trade are prohibited in all their forms". An *ad hoc* Committee on Slavery, under the Economic and Social Council, is proceeding with enquiries by means of questionnaires addressed to governments and recognized associations (Saudi Arabia and the Yaman, both members of U.N.O., have not replied) and is proposing concerted solutions. Its Report of 4 May 1951 (ref. E/1958) advocates making a start by abolishing the legal status of slave and demands that every State concerned should assist emancipated slaves to fashion a new life for themselves. As yet no resolution has been passed by the United Nations, who are divided on this point as on so many others and are far more preoccupied with the serious forms of servitude which continue to exist, or have come into existence in the world of today, than with the last vestiges of Muslim slavery, which are doubtless bound to disappear quietly in the reasonably near future.

'ABD ALLĀH B. AL-'ABBĀS (frequently Ibn 'Abbās, without the article), Abu 'Abbās, called al-Hibr 'the doctor' or al-Bahr 'the sea', because of his doctrine, is considered one of the greatest scholars, if not the greatest, of the first generation of Muslims. He was the father of Kuf'anic exegesis, at a time when it was necessary to bring the Qur'ān into accord with the new demands of a society which had undergone a profound transformation, he appears to have been extremely skilled in accomplishing this task.

He was born three years before the hijra, when the Hāshimī family was living shut up in 'the Ravine' (al-Zā'ib), and as his mother had become a Muslim before the hijra, he also was regarded as a Muslim.

From his youth he showed a strong inclination towards accurate scholarly research, in so far as such a conception was possible at that time. We know indeed that the idea soon occurred to him to gather information concerning the Prophet by questioning his Companions. While still young, he became a master, around whom thronged people desirous to learn. Proud of his knowledge, which was not based only on memory, but also on a large collection of written notes, he gave public lectures, or rather classes, keeping to a sort of programme, according to the days of the week, on different subjects: interpretation of the Qur'ān, judicial questions, Muhammad's expeditions, pre-Islamic history, ancient poetry. It is because of his habit of quoting lines in support of his explanations of phrases or words of the Qur'ān that ancient Arabic poetry acquired, for Muslim scholars, its acknowledged importance. His competence having been recognized, he was asked for *fatāwā* (especially famous is his authorization of male marriage, which he later had to vindicate). The Kuf'anic explanations of Ibn 'Abbās were soon brought together in special collections, of which the *ṣaḥīḥ* go back to one of his immediate pupils (Fihrist, 33); his *fatāwā* were also collected; today there exist numerous manuscripts and several editions of a *fatāwā* or *fatāwā* which are attributed to him (whether rightly or wrongly cannot be said, as no study of this material has yet been made (Goldfischer, *Richtungen*, 70; cf. also Bröckelmann, I, 499, S. 4, 331).

The importance of the role played by Ibn 'Abbās in the political and military events of his time should not be exaggerated, as his Muslim biographers have tended to do, influenced by the fact that he was the grandfather of the 'Abbāsids. He followed the Muslim armies in several campaigns: into Egypt (between 18 and 21 H.), into Ifrīkiya (27 H.), into Ġurġān and Tabaristān (30 H.), and, much later (49 H.), he accompanied 'Uyayyid on his expedition against Constantinople (with 'Abd Allāh b.

'Umar b. al-Qaṭṭāb). At the battles of the Camel (36 H.) and of Siffin (37 H.), he commanded a wing of 'Alī's troops. For want of resounding exploits and important offices to record, Ibn 'Abbās is presented to us later, by his biographers, as a counsellor whom the caliphs 'Umar and 'Uthmān valued highly, and as a counsellor too—unfortunately little heeded—of 'Alī and his son al-Ḥusayn. The truth is that Ibn 'Abbās did not enter political life until after 'Alī came to power, and took an active part in it for only three or four years at the most. A single official mission had been, in fact, entrusted to him by 'Uthmān, that of conducting the pilgrimage to Mecca the year the caliph was beset in his house at Medina. It was for this reason that Ibn 'Abbās was not in the capital at the time of the assassination of 'Uthmān. When he returned some days later, he paid homage to 'Alī. From that time he was charged with important missions and, after the occupation of Basra (36 H.), appointed governor of that town. He was one of the signatories of the convention of Siffin (37 H.), which handed over to two arbitrators the task of settling the quarrel between 'Alī and Mu'āwiyah, and in a discussion with the Ḥārūrīs (see ḤARŪRĀ) he pleaded in support of the legal validity of that arbitration. But the relations between Ibn 'Abbās and the caliph suddenly became strained, with the result that Ibn 'Abbās withdrew to Mecca, abandoning his post of government, and that 'Alī no longer regarded him as his representative at Basra. The sources assign different dates to this defection of Ibn 'Abbās: 38, 39, 40, but there is good reason to believe that it took place in 38 H. (it is possible to follow the movements of Ibn 'Abbās during that year, and in the succeeding years he no longer appears in the regular traditions which assert that Ibn 'Abbās was consistently faithful until the death of the caliph are not worthy of credence. What were the reasons for the defection? Some Arabic sources say that Ibn 'Abbās took offence because 'Alī reproached him for defalcations which he was alleged to have committed as governor; but the true motive of his relinquishment of office, which coincided with that of many other supporters of 'Alī, has to be related to other much more important events of the period: the massacre of the Khirjites at al-Nahrawān, which Ibn 'Abbās, according to certain men, had stigmatised, and the false position of 'Alī, who maintained his claim to be caliph when, according to the verdict of the arbitrators, he was no longer recognized as such by the majority of Muslims.

Later, Ibn 'Abbās took a step which one might be tempted to judge severely, were it not that the precise circumstances are completely unknown: he carried off the provincial funds of Basra, probably when he returned to the town some time after his defection. Was this seizure criminal? When one observes that this act did not diminish the esteem in which Ibn 'Abbās was held by the Muslim community, one may suppose that there were some fairly valid motives to justify it. Similarly, the events in which Ibn 'Abbās was involved immediately after the death of 'Alī are far from clear. Al-Ḥasan appointed him general of his troops, but Ibn 'Abbās established contact with Mu'āwiyah: whether on his own initiative or at the invitation of al-Ḥasan is obscure; perhaps it was he who successfully brought about the agreement between the two claimants to the Caliphate; he maintained that, as a reward for his good offices, Mu'āwiyah had recognized his right to appropriate the money which he had seized (part

of the treasury of Basra). All these machinations of Ibn 'Abbās seemed to certain *ṣaḥāb*'s incompatible with the dignity of such a personage; and so they transferred them, obviously wrongly, to his brother, 'Ubayy Allāh. During the long reign of Mu'āwiyah, Ibn 'Abbās lived in the Hijaz; he went fairly frequently to the Damascus court, mainly, it seems, to defend the interests of the Ḥāshimīs, which were also his own.

The troubled events of the years which followed the deaths of the first and second Umayyads brought Ibn 'Abbās once again, perhaps against his will, on to the political scene. Although the information which we possess is fragmentary, it can be deduced from it that 'Abd Allāh b. al-Zubayr, having raised the standard of revolt at Mecca, became violently incensed with Ibn 'Abbās, who, with the son of 'Alī Ibn al-Ḥanafiyyah, refused to recognise him as caliph. Both were banished from Mecca; in 64, the year of the siege of the town, they returned, but they persisted in their opposition to Ibn al-Zubayr, with unfortunate results: they were imprisoned. Al-Muḥallab informed of their dangerous situation, sent from Kūfa a large troop of horse, which delivered them by a surprise attack. It was thanks to Ibn 'Abbās that on that occasion bloodshed was avoided in the holy city. Under the protection of this troop, the liberated men went to Mīna, then to al-Madīna, where Ibn 'Abbās died some time later (68/69-8).

The verdicts which Caetani and Lammens have given on Ibn 'Abbās are in contrast to the respect which Muslims of all periods have shown him. But Caetani's arguments can easily be disproved by fair and careful criticism (it is especially important not to confuse accounts from Muslim biblical history with the *ḥadīṥ* concerning the Prophet), and grave doubts can be cast on the resemblance to the original of the portrait sketched by Lammens.

'ABD ALLĀH B. 'ABD AL-KĀDIR (Malay pronunciation: Abdullah bin Abdulkadir), surnamed Munsji, i.e. teacher of languages, was "the greatest innovator in Malay letters" (R. O. Winstedt, *A history of Malay literature*, JMBRAS, 1940, ch. XII). He was born in 1756 in Malacca, where his grandfather, the son of Ḥayyāh 'Abd al-Kādir, who came originally from Yaman, had settled. At an early age, 'Abd Allāh received lessons in Malay from his father, who is said to have been an expert Malay scholar, and endeavoured to make himself fully master of this language by reading Malay writings and by associating with educated Malays. As he learned foreign languages and continually came into contact with Europeans, as for instance, Farquhar, Raffles, and the missionaries Milne, Morrison and Thomson, his culture increased regularly.

Shortly after the founding of Singapore (1819), he established himself in that town and earned his living in many different ways. He acted as an interpreter, gave lessons in Malay, wrote letters, and assisted the American missionaries North, Keasberry and others in translating mission books and school books.

In 1818 he published at Singapore under the title *Baḥār al-Khaṣṣ Pō-lay-an Abdullah bin Abdulkadir, Munsji, dari Singapura ka-Kalantan*, a description of a journey to the Malay States on the east coast of the Peninsula of Malacca, giving most important information concerning them. This book inaugurated a new and free Malay prose style; its author may be considered a pioneer of the literary movement which, conditioned by authors of the 19th century, ultimately led to the development of Malay into the national language of Indonesia.

'Abd Allāh's principal work is the *Hikayat Abdullah*, his Memoirs, in which *inter alia* he mentions politically important personages such as Farquhar and Raffles (whose secretary he was), and emphasizes the advantages of a European administration over an Indian one, even though he at the same time sharply criticizes the administrative measures of the English and Dutch. The work was finished in 1843 and lithographed with a few additions in 1849. Some copies of this first edition have an English dedication to Governor Butterworth, in which the work is called a "laudable attempt to revive Malay literature". In his Memoirs 'Abd Allāh mentions several works written by him. Among these is a poem describing a fire in Singapore, in which the author lost all his possessions. It was entitled *Shair Singapura dimakan api* and printed in Malay as well as in Latin characters (1843). The MS. described in the catalogues under this title do not contain this

poem, but a similar one, entitled *Ska'ir Kampong Gilan terharu*, published after a fire in 1847.

The periodical *Cérmin Mala* contains some contributions by 'Abd Allāh. He died in 1854 during a pilgrimage to Mecca, shortly after his arrival in that city. The notes of his voyage as far as Jidda were published in *Cérmin Mala*.

Besides these original works 'Abd Allāh translated the Tamil redaction of *Pandulanta* (a collection of Indian fables) into Malay under the title *Hikayat Pandita Tandiran*, and edited the Malay Chronicles (*Silsilah Melayu*).

(History of Asia and Africa); *Hikayat Raja Melayu*, *Silsilah Dunsu*, Singapore 1856 (geography). (C. A. VAN OPHUYVEN—P. VOORHOEVE)

'ABD ALLĀH b. 'ABD AL-MALIK b. MARWĀN, son of the caliph 'Abd al-Malik b. Marwān (q.v.), was born about the year 60/680-1, perhaps some what earlier, as he is said to have been 27 years old in the year 85/704. He grew up in Damascus and accompanied his father in several campaigns. We first meet him as an independent general in the year 81/700-1, in one of the usual *razzas* against the Eastern Romans. Then in the year 82/701-2, he was sent with Muhammad b. Marwān to help

al-Hadīdī against al-Ash'ath and played a part in the negotiations of Dayr al-Djāmidj. Thereupon he again led expeditions against the Eastern Romans, and in the year 84/703-4 conquered al-Masyia, which he converted into a military camp. After the death of his uncle 'Abd al-Azīz b. Marwān, he was appointed governor of Egypt in the year 85/704. On 11 Djumādī II he made his entry into Fustāt. He was to wipe out all traces of 'Abd al-Azīz, and therefore changed all the officials. His administration left a bad record in the tradition, because he accepted bribes and embezzled public moneys. The only really important achievement of his rule was the introduction of the Arabic language into the *diwān* of the capital. His administration gave offence in Damascus; in the year 88/706-7 he made there a passing visit, and in 90/708-9 he was definitely recalled. He departed to Syria with many presents, but they were taken from him in the province of al-Urdun by order of the caliph. Thereupon he disappeared from the political arena. Only al-Ya'qūbi has the information that he was executed when the 'Abbāsids came to power. He is said to have been crucified by al-Saffāh in the year 132/749-50 in al-Ura.

'ABD ALLĀH b. 'ABD AL-MUTTALIB b. B. Hāshim of Quraysh, father of the prophet Muhammad. The earliest and most reliable sources give little information about him. His mother was Fatima bint 'Amr b. M. Muḥsin, al-Kalbi places his birth in the 24th year of the reign of Anḍirīyah (534), but he is usually said to have been twenty-five when he died (? 570). According to a well-known story, picturesque but probably with little factual basis, 'Abd al-Muttalib vowed that, if he had ten sons who reached maturity, he would sacrifice one; he attained this and selected 'Abd Allāh by lot, but the event took place 100 camels later. His marriage to Āmina bint Wabb has been much embellished in legend. It may have marked an alliance between 'Abd al-Muttalib and Āmina's clan, B. Zuhrā, as he himself married a woman of this clan at the same time. During a trading expedition 'Abd Allāh fell ill and died at Medina among the clan of his father's mother, B. 'Ad b. 'Adīdīr, being buried in Dīr al-Nihāda. His death took place either shortly before Muhammad's birth or a few months after; the word "orphan" in R. xcii, 6, doubtless refers to Muhammad's early loss of his parents.

'ABD ALLĀH b. 'ABD ISHĀK al-Mansūrī, grammarian and poet (d. 29-9). He is said to have extended the use of inductive reasoning (*hiyal*) and the detail is handed down that in case of doubt he opted for the accusative (*naḥb*). Nothing else is known about him beyond the facts that, being of

non-Arabic origin himself, he felt some hostility towards the Arabs, and that he was the object of a stinging riposte by al-Farazdaq, whose mistakes he had pointed out.

'ABD ALLĀH b. AHMAD [see 'ABDĪD].

'ABD ALLĀH b. AHMAD b. HANBAL [see AHMAD b. HANBAL].

'ABD ALLĀH b. 'ALLI, uncle of the caliph Abū l-'Abbās al-Saffāh and Abū l-Djāfar al-Mansūrī. 'Abd Allāh was one of the most active participants in the struggle of the 'Abbāsids against the last Umayyad caliph, Marwān II. He was commander-in-chief in the decisive battle at the Greater Zab, where Marwān lost his crown, and when the latter took to flight, 'Abd Allāh pursued him, quickly captured Damascus and marched on to Palestine, whence he had the fugitive caliph pursued to Egypt. He was even more implacable than his brother Dā'ūd b. 'Alli in waging war on the members of the Umayyad house, and shrank from no method to exterminate them root and branch. During his stay in Palestine, he had about eighty of them murdered at one time. Such cruelties naturally caused ill-will against the new ruler, and a dangerous rebellion in Syria broke out under the leadership of Abū Muhammad, a descendant of Mu'āwīya I, and Abū l-Ward b. al-Kawthar, the governor of Kinaasar. The rebels at first inflicted a defeat on the 'Abbāsī troops, but were beaten by 'Abd Allāh in 132/750 at Marj al-Aḥram. As governor of Syria, 'Abd Allāh later threatened the safety of the new dynasty. After the death of al-Saffāh he made claims to the Caliphate, which he could base on his important services in the war against the Umayyads, and on the promise he claimed to have received from al-Saffāh. Moreover he had at his disposal a considerable army, which in reality he was to lead against the Byzantines. When he learned that the powerful governor of Khurāsān, Abū Muslim, had declared for the caliph al-Mansūr and was marching against him, he is said to have killed 17,000 Khurāsānians in his army, because he feared they would never fight against Abū Muslim, and with his remaining troops proceeded against the latter. He was, however, in Djumādī II 137/Nov. 754 defeated at Nisibin and had to flee to his brother Saḥmān, the governor of Basra. After a couple of years, the latter was dismissed, and 'Abd Allāh was arrested by order of the caliph al-Mansūr. He remained some seven years in prison, then in the year 147/764 he was taken into a house that had been purposely undermined; it fell down on him and buried him under the ruins. At his death he is said to have been 52 years old.

'ABD ALLĀH b. 'AMIR, governor of Basra, was born in Mecca in 4/626. He belonged to the Qurayshite clan of 'Abd Shams and was a maternal cousin of the caliph 'Uḡlman. In 29/649-50 he was appointed by 'Uḡlman to the governorship of Basra, in succession to Abū Mīnā al-Ash'arī, and immediately took the field in Fars, completing the conquest of that province by the capture of Istāḡhīr, Darābīdī and Dījūr (Fīrūzābād). In 30-31/651 he advanced into Khurāsān, defeated the Ephthalites, and occupied the whole province up to Marw, Balkh and (in 32/653) Marḥ. After making the Pilgrimage, during which he distinguished himself by lavish munificence to the Meccans and Ansār, he returned to Basra, leaving the government of Khurāsān in the hands of deputies. In 35/656 he attempted in vain to support 'Uḡlman, and subsequently assisted 'Aḡhā, Tāhī and al-Zubayr in organizing the resistance to 'Alli at Basra. After their defeat in the Battle of the Camel he took refuge with a man of the Banū Hukaym and made his way to Damascus, where he joined Mu'āwīya. In 41/661 he was one of Mu'āwīya's delegates to treat with al-Hasan b. 'Alli, and at the end of the same year he was re-appointed to the governorship of Basra. In 42-43/662-3 his lieutenants reconquered Khurāsān and Sijidān, which had been lost to the Arabs during the civil war, and an expedition was sent into Sind. But his lenience towards the tribesmen appeared too dangerous to Mu'āwīya, who replaced him in 44/664 by a more energetic governor; thereafter Ibn 'Aḡhar appears to have lived in retirement until his death at Mecca in 49/668, or in 57 or 58.

'Abd Allāh b. 'Amir was celebrated not only for his military abilities, but also for his generosity and other personal qualities and especially for his numerous public works. Among these were the construction of two canals at Basra and the canal of Ubulla, plantations in al-Nihādī and Karyatayn, and improved water supplies for the pilgrims at 'Araḥa. **Bibliography:** Tabarī, *index*; Ibn Sa'd, 30-3; Ya'qūbi, II, 191-5, etc.; *id.*, *Buldan*, index; Balādhurī, *Futūḥ*, 51, 315 ff.; *id.*, *Anshāb*, v, index; Muḥ. b. 'ABD ALLĀH b. BULUGGĪN b. Bānīs b. Ḥaḥīs b. Zīd, third and last ruler of the kingdom of Granada, of the Sinhādī Berber family of the Banū Zīd (see *afrius* or *spān*). Born in 447/1056, he was appointed at the death of his father Buluggin Sayf al-Dawla, in 456/1065, as the presumptive heir of his grandfather Bānīs b. Ḥaḥīs. He succeeded him on the throne of Granada, while his brother Tamīm al-Mu'izz became independent ruler of Malaga. His reign consisted of a long series of troubles inside his kingdom, of armed conflicts with his Muslim neighbours, and of compromises with Alfonso XI, king of Castile. At the time of the Almoravid intervention in Spain he took part in the battles of al-Zallāka (q.v.) and Alédo, but his negotiation with the Christian king soon cost him his throne. He was besieged in his capital in 483/1090 by Yūsuf b. Tāghūfīn, who was deposed and sent into

forced residence in Aghmāt, in Southern Morocco, where he ended his days.

It was during his exile in Morocco that 'Abd Allāh composed his "Memories", the almost complete text of which was found by the author of the present article in successive fragments, at intervals of several years, in the library of the Dīwān al-Karawīyīn in Fez. This autobiography, called *al-Tibyān 'im al-hāditha al-hāditha bi-dawlat Banī Ziri fī Gharnāta*, is the most considerable and the least deficient document on the history of Spain in the second half of the 11th century. In spite of the long digressions in which the author tries to justify his political position in face of the dangers menacing his kingdom, these "Memories" give a very detailed chronicle of all the events that led in 478/1085 to the taking of Toledo by Alfonso VI, and, in the next year, to the arrival of the Almoravids in the Peninsula. At the same time it is a psychological document of the first order, that interests much better than the chronicles of the Andalusī *ṭawā'if*, the state of social and political decomposition to which Muslim Spain was found at the end of the 11th century, and the progress made by that time by the efforts of the *Reconquista*. The account of the events prior to the reign of the author is also new and important. The "Memories" of 'Abd Allāh must be considered as the guiding thread that allows us to find our bearings through the maze of the history of Muslim Spain at the moment it was about to fall into the power of the North African dynasties.

Several fragments of the *Tibyān* were published, with an annotated translation by the author of this article, in *And.*, 1925, 233-244; 1930, 29-143; 1941, 231-47. The whole of the Arabic text, as well as the first published soon. A Spanish translation, by E. Lévi-Provençal and E. García Gómez (*Las "Memorias" de 'Abd Allāh, último rey zirí de Granada*) is due to be published in 1953.

**Bibliography:** The biographical articles about 'Abd Allāh by Ibn 'Udūd and Ibn al-Khātib have been reproduced in *And.*, 1936, 124-7; see also Ibn al-Khātib, *Al-muṣallāh* (ed. Lévi-Provençal), 208-70; Nubāhī, *al-Marḥūm al-'Uyāy* (Lévi-Provençal), 93-4; R. Menéndez Pidal, *La España del Cid*, Madrid 1947, indices; idem, *Leyenda las "Memorias" del rey zirí 'Abd Allāh*, *And.*, 1944, 1-8; E. Lévi-Provençal, *Exp. Mus.*, iv, [E. LÉVI-PROVENÇAL].

'ABD ALLĀH b. DJAFAR b. Aḥmad, the father of the caliph 'Alī, 'Abd Allāh's father had gone over to Islam very early, and took part in the emigration of the first believers to Abyssinia, where, according to the common belief, 'Abd Allāh was born. On his mother's side he was a brother of Muḥammad b. Abī Bakr; the mother's name was Asmā' bint 'Umayy al-Khāṣṣa. After some years the father returned to Medina taking his son with him. 'Abd Allāh became known chiefly on account of his great generosity, and received the honorific surname of *Bahr al-Djūd*, "the Ocean of Generosity". He appears to have played no very important part in politics, although his name crops up from time to time in history during 'Alī's time and that following. When Mu'āwīya tried to throw suspicion on Kayṣ b. Sa'd, the valiant governor of Egypt, to damage him in 'Alī's eyes, 'Abd Allāh advised the removal of Kayṣ; 'Alī allowed himself to be persuaded and took the fateful step of replacing him by Muḥammad b. Abī Bakr, who in a very short time brought the whole of Egypt into the greatest confusion. This took place in the year 36/656-7. When in

the year 60/660, after Yazīd's accession, the Shī'ites of Kūfa summoned Husayn b. 'Alī to proceed to that city to have himself proclaimed caliph, 'Abd Allāh amongst others endeavoured to dissuade him from this dangerous enterprise, but without success. The date of 'Abd Allāh's death is generally given as 80 or 85, but 87 and 90 are also recorded.

(K. V. ZETTERSTÉEN)

'ABD ALLĀH b. DJAMSH, of Banī Asad b. Khurayma, a confederate (half) of Banī Umayyā of Quraysh. His mother was Umayma bint 'Abd al-Muttalib, Muḥammad's aunt. An early Muslim along with his brothers, 'Ubayd Allāh and Abī Ahmad, he took part with the former in the migration to Abyssinia. 'Ubayd Allāh became a Christian and died there, but 'Abd Allāh returned to Mecca and was the most prominent of a group of confederates, including his sister Zaynab (g.c.), who all migrated to Medina. He led the much-criticized raid to Najd, where Muslims first shed Meccan blood, and fought at Badr. At his death at Umd he was between 40 and 50.

(W. MONTGOMERY WATT)

'ABD ALLĀH b. DJUD'ĀN, KURAYSHITE notable of the clan of Taym b. Murra, at the end of the 6th c. A.D. He acquired such wealth from the slave trade that he possessed one of the largest fortunes in Mecca (Ibn 'Udūd, *Makhsūṣ* (van Vloten), 165; Ibn Rusta, 215; Mas'ūdī, *Murūdī*, vi, 153 ff.; Lammens, *La Mecque à la veille de l'Hégire*, index). He surrounded himself with unusual luxury (being nick-named *hāṣī 'l-dhahab*, because he used to drink from a golden cup), and was the owner of two singing-girls called "Locusts of Ad" (*Durayd*). 'Abd Allāh was married to Umayra b. Abī 'l-Salt. In giving magnificent banquets, he showed a generosity that became proverbial (*Aghānī*, i, vii, 4; *Tha'ālibī*, *Thumār*, 487, in connection with the expression: *djūdān Ibn Djūd'ān*). Thus he won the favour of the poets, but also drew on himself some invectives (al-Djāhiz, *Hayawān*, i, 364; ii, 93). His prestige enabled him to play a central rôle in politics (*Aghānī*, 218, 70), and he seems to have been the promoter of the Meccan confederacy known as *ḥilf al-fudal* (Ibn Hishām, 85; Ya'qūbī, ii, 16; Lammens, *op. cit.*, 54 ff.).

Already before the 3rd/7th c., his unusual wealth, and the wish of the Meccans to explain it otherwise than by the slave trade, gave rise to his identification with the hero of a Yamanite legend, the discoverer of the tomb of Shaddād b. 'Amr (g.c.) (Wahb b. Munabbih, *Tiḏhīn*, 63 ff.). Thus he is represented as a *suḥāb* banished by his clan, wandering in the desert and enriched by a treasure of precious stones and gold which he finds in an old tomb (al-Hamīdī, *Tiḏhīn*, vii, 181-99; al-Damīrī, s.v. *Thāhīb*; al-Djāhiz, *Hayawān*, ed. Sandhu, i, 31). According to an ancient apocryphal tradition, he is buried in a place in Yaman called Birk al-Ghumūd (Yāqūt, i, 589).

(CH. PELLAT)

'ABD ALLĀH b. HAMDĀN (see HAMDĀNĪS). 'ABD ALLĀH b. HAMMĀM al-Salṣālī, Arab poet of the 1st/7th century (he is said to have died after 96/715), who played a political rôle under the Umayyads. He was attacked from 66/680 to Yazīd b. Mu'āwīya, concluded with him upon the death of his father and consanguinity at his accession. He persuaded Yazīd to proclaim his son Mu'āwīya as heir presumptive and later he was the first to greet al-Walīd b. 'Abd al-Malik with the name of caliph (86/705). During the reign of 'Abd al-Malik (65-86/685-705), the only information we have about his activity shows him to have had relations with the Shī'ite agitator al-Mukhtār (g.c.) and his entourage, as well as with the anticaliph 'Abd Allāh b. al-Zubayr (g.c.). To the latter he addressed a poem criticising the conduct of Mu'āh (g.c.), who was in effect temporarily deposed soon afterwards by al-Zubayr (67/686-7).

(CH. PELLAT)

'ABD ALLĀH b. HAMZA (see AL-MANṢŪR b. HĀLAM).

'ABD ALLĀH b. HANZALA b. Aḥmad b. 'AMIR al-ANṢĀR, one of the leaders of the revolution that broke out in Medina against the caliph Yazīd I. Posthumous son of a Companion killed at Uhud and surnamed *ḥāṣil al-Malā'ika*, 'Abd Allāh is also known as Ibn al-Ḥāṣil. In 62/682 he took part in the deputa- tion sent to Damascus by the governor of Medina, 'Uthmān b. Muḥammad, to bring about a reconciliation between the Muslims of Medina and the Umayyads. Yazīd showed special consideration for the envoys, but they, nevertheless, spoke ill of the caliph and described him as unfit for the caliphate. Ibn al-Ḥāṣil made himself prominent by his attacks and when the Anṣār openly revolted soon afterwards, it was he who chose as their chief, while 'Abd Allāh b. Muḥ' (g.c.) was in the leadership of the city's Kurayshites. After the Umayyads of Medina had been driven out, the caliph was compelled to punish the rebels by force of arms. About the end of 63/683 he sent troops under the command of Muslim b. 'Ukba, who occupied favourable positions on the Harra, to the east of Medina, and after waiting three days, engaged the Medinese in a bloody battle which ended with the complete defeat of the rebels (Ibn 'Udūd, 63/683). 'Abd Allāh showed remarkable bravery in the battle, but finally fell under the blows of the Syrians. His head was cut off and brought to Muslim, and the two soldiers who killed him received, it is said, high rewards from the caliph.

(K. V. ZETTERSTÉEN; CH. PELLAT)

'ABD ALLĀH b. AL-HASAN b. AL-HASAN, chief of the 'Alids. 'Abd Allāh was treated with great favour by the caliphs of the Umayyad dynasty, and when he visited the first 'Abbāsid caliph Abu 'l-'Abbās al-Saffāh at Anḥar, the latter received him with great distinction. When he returned to Medina, where he soon fell under the suspicion of the successor of al-Saffāh, al-Manṣūr. Yet 'Abd Allāh owed his misfortune not so much to himself as to his two sons Muḥammad and Ibrāhīm. Al-Manṣūr began to suspect them in 136/754, when he led the pilgrimage to Mecca and they did not appear with the other Ḥāshimītes to salute him, but his suspicions fell more especially on Muḥammad. After his accession al-Manṣūr tried to sound the Ḥāshimītes as to Muḥammad's real opinions, but they spoke only good of him and endeavoured to excuse his absence. Only al-Hasan b. Zayd advised the caliph to beware of this dangerous 'Alid. In order to remove all doubts, al-Manṣūr ordered 'Ukba b. Salīm to get into 'Abd Allāh's confidence by means of presents and forged letters from Khurāsān, the recognised centre of 'Alid propaganda. At first 'Abd Allāh was very cautious but finally fell into the trap, and when 'Ukba asked him for an answer for his supposed companions in Khurāsān, he did indeed refuse to give one in writing, but asked him to inform them by word of mouth that he greeted them and that his two sons would rise with him in the near future. When 'Ukba had in this manner convinced himself of the rebellious intentions of the 'Alids, he at once informed the caliph, and when the latter in the year 140/758 again made a pilgrimage, he invited 'Abd Allāh to come to him, and asked him if he could really count on his fidelity.

'Abd Allāh assured him of his honorable sentiments, but when 'Ukba suddenly appeared, he understood that he had been betrayed and took refuge in entreaties. Al-Manṣūr, however, had him arrested. 'Abd Allāh's relatives shared his fate, but the caliph was not able to seize his two sons. When he again came to Medina in the year 144/762 after making another pilgrimage, he took the prisoners back with him to al-'Irāq, and soon afterwards 'Abd Allāh died there in prison at the age of 75. According to current report, he was murdered by al-Manṣūr's orders.

**Bibliography:** Tabarī, ii, 1338 ff.; iii, 143 ff.; Ibn al-Aḥlir, 172 ff.; Weil, *Gesch. d. Chalif.*, ii, 40 ff.

(K. V. ZETTERSTÉEN)

'ABD ALLĀH b. HILĀL al-HIMYARĪ al-Kūfī, a magician of Kūfa, contemporary of al-Ḥaḍḍīdī, with whom he was in relations by the building of the palace in Wasīl (Yāqūt, iv, 883; cf. also adventure with a concubine of the caliph, Ibn Ḥajar, *Lisān al-Mi'ān*, iii, 372-3). *Aghānī*, i, 167 quotes verses by 'Unar b. Abī Rabbā'a that bear witness to a connection between the poet and the magician. He obtained his powers from a magic ring given to him by Satan. In thank him for having defended him from children who were insulting him. He was also thought to receive his inspiration from Iblis, because he was descended from Iblis in the maternal line; hence his nicknames of *ṣāḥib Iblis*, *ṣāḥib Iblis*, *ḥāṣan Iblis* or *ṣāḥib Iblis* (al-Djāhiz, *al-Hayawān*, i, 190; al-Bayhaqī, *al-Makhsūṣ*, 109; al-Tha'ālibī, *Thumār*, 57); he is clearly described as *magiḥim* by al-Djāhiz, *al-Hayawān*, i, vi, 198 (cf.

WZKM, vii (1893), 235-6). The *Fihrist*, 310 (reproduced in al-Sihill, *Āḥām al-Mawḍiʿ*, 100-1) mentions him among those that follow al-*farḥa* al-*mawḍiʿ*; on the other hand he is considered as the master of al-Hallāqī, accused of practising diabolic magic (L. Massignon, *Hallāqī*, 792). Al-Djāwārī declares that he had read his books of magic (ZDMG, 35, (1866), 487; the passage is missing in the Cairo ed. of al-Maḥḥiḥ *fi Kaṣṣ al-Aḥdāḥ* and refers to Fāḥr al-Dīn al-Rāzī, al-*Ṣiḥḥ al-Mabḥūṭa* (Cf. F. F. F.).

'ABD ALLĀH R. al-HUSAYN, Amir of Transjordan (Shārk al-Urdun), afterwards king of Ḥāshimite Jordan (al-Mamlaka al-Urdunīyya al-Ḥāshimīyya), second son of the sharif al-Husayn b. 'Alī [q.v.] king of Ḥijāz. Born in Mecca, in 1882, he studied in Istanbul. After the revolution of 1908, he represented for some time the Ḥijāz in the Ottoman parliament. Just before the first world war he joined the Arab Union, an association founded in Cairo by the Syrian Muḥammad Raḥīd Riddā [q.v.]. In April 1914 he had interviews in Egypt with Lord Kitchener and Ronald Storrs and thus took part in the negotiations that led to the proclamation of "Arab Revolt" announced by his father in Mecca, 9 Sha'ban 1314/10 June 1915. During the Ḥijāz, he played only a minor role. On 8 March 1920 an "Iraqi Congress", which met in Damascus, proclaimed him "constitutional king of Iraq". But he never took possession of the throne, which was given by the English, in June 1921, to his brother Fayṣal, who had been expelled from Damascus by the French troops of General Gouraud (24-27 July 1920). In March 1921 'Abd Allāh met in Jerusalem W. Churchill, then colonial secretary. It was during that interview that it was orally agreed to create in Transjordan, separated from the rest of Palestine placed under British mandate, a "national Arab government" headed by 'Abd Allāh (28 March). On 28 August 1923 this government was recognized by the High Commissioner for Palestine. Its relations with Great Britain were fixed by a treaty signed in Jerusalem 20 February 1928 (modified by the agreements of 2 June 1934 and 9 July 1941).

In 1946 Great Britain recognized Transjordan "as a completely independent state" (treaty of 22 March 1946, modified by the treaty of 15 March 1948). 'Abd Allāh was crowned as king in 'Amān, 25 May 1946, and Transjordan constituted a kingdom, took the name of "Ḥāshimite Kingdom of Jordan". After the war in Palestine (15 May 1948-3 April 1949), 'Abd Allāh annexed the territories occupied by the Arab Legion to the west of the Jordan (April-May 1950). He was assassinated in Jerusalem on 20 July 1951.

In the last years of his life, he visited successively Turkey (Jan. 1947), Iran (July-August 1949) and Spain (Sept. 1949). His journeys were followed by the signature of treaties of friendship with these countries (Turkey, 11 Jan. 1947; Iran, 16 Nov. 1949; Spain, 7 Oct. 1950). On the other hand he tried to overcome the hostility of the Arab League to his projects of territorial expansion. He died, however, without accomplishing the great ideal of his reign: grouping round his throne the Arab lands of Syria (project of Greater Syria).

He was the author of memoirs, only the first part of which has been published.

'ABD ALLĀH R. IBĀD (see IBĀDĪYYA).

'ABD ALLĀH R. IBRAHĪM (see AGĀLĀHĀS).

'ABD ALLĀH R. ISKANDAR, a Shāhābīd [q.v.], the greatest prince of this dynasty, born in 940/1533-4 (the dragon year 1532-3 is given, probably more accurately, as the year of the cycle) at Al-Finkhat in Miyaḥkāt (an island between the two arms of the Zaratshān). The father (Iskandar Khān), grandfather (Djān Beg) and great-grandfather (Khāḍja Muḥammad, son of Abu 'l-Khayr [q.v.]) of this ruler of genius are all described as very ordinary, almost stupid men. Djān Beg (d. 935/1528-9) had at the distribution of 928/1512-3 received Karmina and Miyaḥkāt; Iskandar was at the time of his birth lord of Arānkāt; later, probably after the death of one of his brothers, he emigrated to Karmina. There 'Abd Allāh first proved his ability as a ruler in 938/1531; the country had been attacked by Nawrūs Ahmed Khān of Taghland and 'Abd al-Latīf Khān of Samarkand; Iskandar had fled across the Amu; 'Abd Allāh assumed his father's duties and successfully repulsed the attack. In the following years 'Abd Allāh tried to extend his possessions westward in the direction of Bukhārā and south-eastward in the direction of Karāḥī and Shahr-i Saba, at first without permanent success; in 963/1556 he was even obliged to evacuate the lands inherited by his father and flee to Maymana. In the same year (Dhu 'l-Ka'da/September/October 1556) there died his powerful enemy Nawrūs Ahmed Khān, khān of the Orzbeḡs and lord of Taghland since 959/1552. 'Abd Allāh immediately reasserted his supremacy in Karmina and Shahr-i Saba, and in Rajab 964/May 1557 conquered Bukhārā, from that time his capital. There he had his uncle Pir Muḥammad declared as deposed and his weak-minded father proclaimed as Shāh 968/1561. May 1561 khān of all the Orzbeḡs, in order to rule himself in the latter's name. Only in 992/1583, after the death of his father (1 Djuḥda/12 June), did he accept the vacant throne. After severe fighting against insubordinate supporters of the ruling house he subjugated Balḡh in 981/1573-4, Samarkand in Kabi' II 986/June 1578, Taghland and the remaining country north of the Syr in 991/1582-3, and Farḡhina in 991/1583. In addition to these conquests, 'Abd Allāh also made a raid in the first half of the year 990/spring 1582 into the steppes as far as Ulugh Tagh. In the year 996/1587-8 a stubborn insurrection was suppressed in Taghland, and the enemy again pursued far into the steppes. In the south-west Bukhārā and the Syr in 991/1582, and Farḡhina, Gilān and Khāḍīrīm, the last named first in 1002/1593-4 and then, after an insurrection, reconquered in 1004/1595-6. An expedition to East Turkestan resulted only in the laying waste of the provinces of Kāshghar and Yārḡand. 'Abd Allāh's last years were darkened by a quarrel with his only son 'Abd al-Mu'min, who ruled in Balḡh from the end of 991/autumn 1582 in the name of his father. As 'Abd Allāh had been the real ruler under

Iskandar, in the same way 'Abd al-Mu'min wanted to occupy the same position in relation to his now aging father. 'Abd Allāh would, however, not hear of any diminution of his power, and only the mediation of the clergy prevented an open breach between father and son, and compelled 'Abd al-Mu'min to yield. On hearing of the strained relations between father and son, the nomads had penetrated into the region of Taghland and had defeated between Taghland and Samarkand an army sent against them. At the beginning of a punitive expedition against this enemy 'Abd Allāh was overtaken by death in Samarkand (end of the "ben year", 1006/beginning of 1598).

'Abd al-Mu'min was murdered only six months later by his subjects. The conquests in Khurāsān and Khāḍīrīm were lost, and in the Orzbeḡs' own country the power fell into the hands of another dynasty. Of greater permanence were the results of 'Abd Allāh's activity in internal affairs; the administration, especially the coinage system, was remodelled by him, many public works (bridges, caravanserais, wells, etc.) were completed. Even at the present day popular folklore ascribes all such monuments either to Timur or to 'Abd Allāh.

**Bibliography:** The life of this ruler up to the year 996/1587-8 is described in detail by his eulogist Hāfiḥ Tāghī, *Shahr-nāma-yi Shāhī* (Irbid), usually called *'Abd Allāh-nāma*. Much information (especially about the last few years) is given by 'Abd Allāh's Persian contemporary Iskandar Munshī in *Ta'wīḡ-i 'Ālam āra-yi 'Abd Allāh* (biography of Shāh 'Abd Allāh I, Teheran 1897). Extracts from both works are in Welyaminow-Zernow, *Islyudeniya o kashimovskikh taryakh i taryakh* (in the *Trudy* vol. 10, *old. imper. arkhiv. obšč.*, 2, German transl., Leipzig 1897), and before that in his *Moneti bukhariya i khuzhuya*. See also my extracts from the little known *Bahr al-Aḥdāḥ* by Mahmūd b. Wālī in the *Zafkisi wustol. old. imper. arkhiv. obšč.*, xv, on the *Bahr al-Aḥdāḥ* comp. Ethé, *India Office Cal.*, No. 575. The information given by Yambeyr, *Grand Eschah*, and by Howarth, *Hist. of the Mongols*, II, div. 3, who follows him, is to be accepted with great caution.

(W. BARTHOLO)

'ABD ALLĀH R. ISMĀ'IL, 'Alawid [q.v.] sultan of Morocco, whose first reign started 4 Sha'ban 1141/5 March 1729, while his last ended with his death 27 Safar 1171/10 Nov. 1757.

This sovereign was in fact deposed several times, five times according to the Arabic historians, and as often recalled to power. For the good order established in Morocco under Mawlay Ismā'īl [q.v.] was at that time but a memory. When 'Abd Allāh assumed power, two of his brothers, Ahmad al-Hababī and 'Abd al-Malik, had been fighting for it for two years, and had caused, by their mutual bids and their weakness, violent antagonism between the black army of their father, the *'abid al-Bukhārī*, and the *qish* [djaysh, q.v.] tribe of Ōdayā and the Berbers of the Middle and Central Atlas. When it is added that the sons of Mawlay Ismā'īl were numerous and that several of them aspired to power, and that, on the other hand, 'Abd Allāh showed himself from the beginning to be capricious and cruel, then it is plain why Morocco was at this time the scene of constant disorders.

Raised to power by the *'abid*, who had been won over by his mother, 'Abd Allāh immediately stirred up against himself the city of Fez, whose resistance

was overcome only after a siege of six months. He then tried to pacify his kingdom, but in consequence of a disastrous campaign in the Central Atlas, excited the enmity of the *'abid* and had to flee, on 29 Sept. 1734, to the Wādī Nūn, to his mother's tribe. Replaced by his brother 'Alī al-A'rāḍī, he was recalled in 1736, but was again expelled a few months later by the *'abid*. He took refuge with the Berber Aḥl Idriṣān and was replaced successfully by two of his brothers, Muh. b. al-'Arabīyya and al-Mustadī. Recalled in 1740, he fought against al-Mustadī and his ally, the pasha of Tangier, Ahmad al-Rifī, when another son of Ismā'īl, Zayn al-'Abidin, was elevated to the throne by the *'abid*. 'Abd Allāh found new supporters among the Berbers, with whose help he regained power in the same year. He then succeeded in defeating al-Mustadī and al-Rifī and made an effort to pacify Morocco. New revolts, however, followed each other without interruption and the sultan constantly changed his allies, relying sometimes on the *'abid*, sometimes on the Ōdayā, sometimes on the Berbers. He was deposed yet again (1748) in favour of his son Muḥammad governor of Marrakech. His son, however, remained loyal and assured the reign of 'Abd Allāh until his death, but in the midst of continual disorders. 'Abd Allāh resided partly in Meknes, and partly in a country house near Fez, Dār Dibaḡh.

'ABD ALLĀH R. KHĀZIM al-SULAMī, governor of Khurāsān. On the first expedition of 'Abd Allāh b. 'Amir [q.v.] into Khurāsān in 31/651-2, Ibn Khāzīm commanded the advance-guard which occupied Sarakhs. According to some accounts, he put down a rebellion led by Kīrīn in 31/651-4 and was rewarded with the governorship of the province, but this is probably an anticipation of the events of 42/662. During Ibn 'Amir's second governorship of Baḡra (41/661), Kays b. al-Haytham al-Sulamī was appointed to Khurāsān, and 'Abd Allāh b. Khāzīm and 'Abd al-Rahmān b. Samura were despatched to recover Balḡh and Sijidīstān. When Kays showed himself unable to deal with an Ephthalite revolt which broke out in the following year, Ibn 'Amir replaced him as governor by 'Abd Allāh b. Khāzīm, who remained in Khurāsān until recalled by Ziyād in 45/665.

Ibn Khāzīm returned to Khurāsān with the army of Salīm b. Ziyād (61-2/680-2), and when the latter withdrew after the death of Yazdgerd I Ibn Khāzīm persuaded him to nominate him as governor of the province (64/684). Having gained possession of Marw after defeating its Tāmitite governor, he then attacked, with the aid of Tamīm, the Bakrite governors of Marw al-Rūdī and Harāt, and overcame them after a long struggle. The victory was followed by repeated raids of the Tamīm against Ibn Khāzīm, now nominally governor on behalf of Ibn al-Zubayr. In 72/692 he received, but indignantly rejected, an offer by 'Abd al-Malik to confirm him as governor for seven years; the offer was then made and accepted by his deputy in Marw, the Tāmitite Bukayr b. Wighāh, who overtook and killed him (probably

in 73/692-3) as he was attempting to join his son Muṣā in the stronghold which he had previously prepared at Tirmidh. The career of the Khāzim was afterwards embellished with saga-like accretions, which make it difficult to establish many details with precision.

**Bibliography:** Tabarī, index (tr. Zotenberg, iv, 63-3, 113-4); Balādī, 136 ff., 499, 413 ff.; Ya'qūbī, ii, 258, 322-4; id. *Bulāḥ*, 279, 296-9; Muh. b. Habib, *al-Muḥabbat*, 225-2, 308; *Nabā'id Dīyar wa-Farāzdaq*, index; al-Kāṣī, *Ḥayy al-Ḥayy*, 32; Wellhausen, *Arab. Chron.*, 258-62; Caetani, *Annali*, vii, 275 ff., 493 ff.; *Fiṣṭiḥ*, 337 and the Twelver legends quoted by Ivanow, *Alleged Founder*, 91 ff. and G. Vajda, *RSO*, 1937, 192, 196, 224), and became, with certain additions and variations (cf. Lewis, *Origins*, 54-63) the standard account of Sunnī authors about the rise of Ismā'īlism. This is not the place to discuss in detail the vexed and apparently insoluble problem of the antecedents of the Fāṭimids (see *RYMISM* and also *RYMISM*). Yet it must be pointed out that the view that the Fāṭimids descended from Maymūn al-Kaḍḍāh seems to have been entertained not only by Ibn Riḍwān, a great enemy of Ismā'īlism, but also by certain sections of the Ismā'īlī movement itself, and the Ismā'īlī al-Mu'izz had to polemize against some of his followers who considered him as a descendant of Maymūn (see the letter of al-Ma'izz quoted by 'Imād al-Dīn Idrīs and printed by Ivanow in the *J. of the Bombay Branch of the RAS*, 1940, 74-6, and, confirming and completing that piece of information, a passage in al-Nu'mān's *al-Maḡḥīl* see *'L-Muḥabbat*, MS of SOAS, London, 2534 fol. 76 ff., to be published by the author of this article). W. Ivanow (*The Rise of the Fāṭimids*, Bombay 1914), see especially 12-27-28; *The Alleged Founder of Ismā'īlism*, Bombay 1940) denies the truth of any connection between Ismā'īlism and Maymūn and 'Abd Allāh, or their descendants, considering the whole story as freely invented by their enemies—although it is difficult to see why they have picked out just Maymūn and 'Abd Allāh for the role and how early Ismā'īlī circles could come to accept them mainly on the authority of scandal invented by their enemies, as the ancestors of the leaders to whom they paid allegiance. B. Lewis, *The origins of Ismā'īlism*, Cambridge 1940 (see especially 49-73), admits, on the whole, the historicity of the role of Maymūn and 'Abd Allāh as leaders of the extremist movement out of which grew Ismā'īlism. The evidence is as yet not sufficient for a definite solution of this problem, and it would seem possible that the basis for the story about Maymūn and 'Abd Allāh is to be sought in the role that some descendants of 'Abd Allāh b. Maymūn may have played in the Ismā'īlī movement in its beginnings about 260/873, and that the story was spun out of this knowledge of the connection of some 'Kaddāhids' with Ismā'īlism (S. M. STERN).

**'ABD ALLĀH b. MU'ĀWIYA**, 'Aḥī rebel. After the death of Abū Ḥāshim, a grandson of 'Alī, claims were laid to the Imānate from several quarters. Some asserted that Abū Ḥāshim had formally transferred his right to the dignity of Imān to the 'Abbasid Muḥammad b. 'Alī. Others said that he had spoken in favor of 'Abd Allāh b. 'Azar al-Kindī and wanted to revivify him. As he, however, did not come up to the expectations of his followers, they turned from him and declared 'Abd Allāh b. Mu'āwiya, a great-grandson of 'Alī's brother 'Dīfār, to be the rightful Imān. The latter asserted that both the godhead and the prophetic office were united in his person, because the spirit of God had been transferred from the one to the other and had finally come to him. In accordance with this his followers believed in metempsychosis and denied the resurrection. In Muharram 127/Oct. 744, 'Abd Allāh revolted in Kūfa where he was joined by many followers, especially from amongst the Zaydites (q.v.). The latter captured the citadel and expelled the

who gives Maymūn the kunya Abū Ḥāshim, cf. Ibn al-Aḥqar, viii, 21, presumably in order to identify him with the *isādī* Abū Ḥāshim, for whom see al-Kharrāṣī, *al-Fatāwā*, 40, 142; *Fiṣṭiḥ*, 337 and the Twelver legends quoted by Ivanow, *Alleged Founder*, 91 ff. and G. Vajda, *RSO*, 1937, 192, 196, 224), and became, with certain additions and variations (cf. Lewis, *Origins*, 54-63) the standard account of Sunnī authors about the rise of Ismā'īlism. This is not the place to discuss in detail the vexed and apparently insoluble problem of the antecedents of the Fāṭimids (see *RYMISM* and also *RYMISM*). Yet it must be pointed out that the view that the Fāṭimids descended from Maymūn al-Kaḍḍāh seems to have been entertained not only by Ibn Riḍwān, a great enemy of Ismā'īlism, but also by certain sections of the Ismā'īlī movement itself, and the Ismā'īlī al-Mu'izz had to polemize against some of his followers who considered him as a descendant of Maymūn (see the letter of al-Ma'izz quoted by 'Imād al-Dīn Idrīs and printed by Ivanow in the *J. of the Bombay Branch of the RAS*, 1940, 74-6, and, confirming and completing that piece of information, a passage in al-Nu'mān's *al-Maḡḥīl* see *'L-Muḥabbat*, MS of SOAS, London, 2534 fol. 76 ff., to be published by the author of this article). W. Ivanow (*The Rise of the Fāṭimids*, Bombay 1914), see especially 12-27-28; *The Alleged Founder of Ismā'īlism*, Bombay 1940) denies the truth of any connection between Ismā'īlism and Maymūn and 'Abd Allāh, or their descendants, considering the whole story as freely invented by their enemies—although it is difficult to see why they have picked out just Maymūn and 'Abd Allāh for the role and how early Ismā'īlī circles could come to accept them mainly on the authority of scandal invented by their enemies, as the ancestors of the leaders to whom they paid allegiance. B. Lewis, *The origins of Ismā'īlism*, Cambridge 1940 (see especially 49-73), admits, on the whole, the historicity of the role of Maymūn and 'Abd Allāh as leaders of the extremist movement out of which grew Ismā'īlism. The evidence is as yet not sufficient for a definite solution of this problem, and it would seem possible that the basis for the story about Maymūn and 'Abd Allāh is to be sought in the role that some descendants of 'Abd Allāh b. Maymūn may have played in the Ismā'īlī movement in its beginnings about 260/873, and that the story was spun out of this knowledge of the connection of some 'Kaddāhids' with Ismā'īlism (S. M. STERN).

**'ABD ALLĀH b. MU'ĀWIYA**, 'Aḥī rebel. After the death of Abū Ḥāshim, a grandson of 'Alī, claims were laid to the Imānate from several quarters. Some asserted that Abū Ḥāshim had formally transferred his right to the dignity of Imān to the 'Abbasid Muḥammad b. 'Alī. Others said that he had spoken in favor of 'Abd Allāh b. 'Azar al-Kindī and wanted to revivify him. As he, however, did not come up to the expectations of his followers, they turned from him and declared 'Abd Allāh b. Mu'āwiya, a great-grandson of 'Alī's brother 'Dīfār, to be the rightful Imān. The latter asserted that both the godhead and the prophetic office were united in his person, because the spirit of God had been transferred from the one to the other and had finally come to him. In accordance with this his followers believed in metempsychosis and denied the resurrection. In Muharram 127/Oct. 744, 'Abd Allāh revolted in Kūfa where he was joined by many followers, especially from amongst the Zaydites (q.v.). The latter captured the citadel and expelled the

prefect. In a short time, however, 'Abd Allāh b. 'Umar b. 'Abd al-'Azīz, the governor of 'Irāq, put an end to his manoeuvres. When it came to fighting, the ever unreliable Kufans deserted; only the Zaydites fought bravely and continued the battle till 'Abd Allāh was granted the unimpeded retreat. From Kūfa he proceeded at first to Maḍīn and then to al-Dībāl. His power was in no way broken. From Kūfa and from other places numbers of people flocked to him and he soon succeeded in winning over several important strongholds in Persia. After residing for some time in Isfahān, he went to Isfahān. Owing to the temporary weakness of the government in Persia as a result of the disorders in 'Irāq and Khurasān, he had no difficulty in extending his rule over a great part of al-Dībāl, Ahwāz, Fārs and Karmān. The Khārijites, who had fought against Marwān II on the Tigris, withdrew into 'Abd Allāh's domain and other opponents of the caliph also joined him, including some 'Abbasids. In the end, however, he was unable to maintain his power. 'Umar b. Duḥayr, one of Marwān's generals, who had been entrusted with the pursuit of the Khārijites, led an army into 'Abd Allāh's domains and brought his rule to a sudden end. In the year 129/746-7, 'Abd Allāh was defeated at Marw al-Shāhīn and forced to flee to Khurasān, where Abū Muslim, the celebrated general of the 'Abbasids, had him executed. After his death, some of his followers, called al-Dībālīs (q.v.), maintained that he was still alive and would return; on the other hand, others, the so-called Hārīgites, believed that his spirit was reincarnated in Isḥāq b. Zayd b. al-Hārīḥ al-Anṣārī.

**Bibliography:** Tabarī, ii, 1879 ff.; Ibn al-Aḥqar, v, 246 ff.; Mas'ūdī, *Murūj*, vi, 41 ff., 67 ff., 109; Shahrastānī, 112-3 (transl. Haarbrücker, i, 170); *Al-Bihar*, Index; G. Weil, *Gesch. d. Califats*; Wellhausen, *Das arab. Reich*, 219 ff.; id., *Die rel.-pol. Oppositionen*, in *Abd. G. W. Göll.*, 1/2, 98 f.; Caetani and Gabrieli, *Onomasticon*, ii, 853.

**'ABD ALLĀH b. MUHAMMAD**, Sharīf of Mecca [see MAKKA].

**'ABD ALLĀH b. MUHAMMAD b. 'ABD AL-RAḤMĀN AL-MARWĀNī**, seventh Umayyad Amīr of Cordova. He succeeded his brother al-Mundhir on the latter's death before Hobastro, centre of 'Umar b. Ḥafṣ's rebellion, on 15 Safar 273/Jan. 885. The circumstances of his death aroused the suspicion that the new governor was not quite innocent of it. At his accession, 'Abd Allāh, born in 229/844, was forty-four years old. His reign, which lasted for a quarter of a century, until his death on 2 Rabi' I 300/16 Oct. 912, was described in detail by the chronicler Ibn Ḥayyān, in that part of his *Muḥabbat* which has been preserved in an Oxford manuscript, long since known and utilized, and published in a somewhat faulty edition by M. M. Asfura, Paris 1937.

His biographers present a flattering portrait of the Amīr 'Abd Allāh and omit to mention his cruelty and his lack of scruples. They extol his sobriety, his piety and his Islamic culture. It may be granted to him as an undoubted merit that he maintained, in a difficult period, the Hispano-Umayyad dynasty and contrived to counter a multitude of internal dangers, notably the Andalusian revolt fomented by the *muwallads* and the particularist tendencies of the Arab country of Seville and Elvira. For further details see Umayyads or Spain.

(E. LÉVI-PROVENÇAL)

**'ABD ALLĀH b. MUHAMMAD AL-TA'Ā'ISHI** (his name is invariably pronounced as 'Abdullāh), the successor of Muḥammad Ahmad (q.v.), the Sudanese Mahdī. He belonged to the Awlad Umm Surra, a clan of the Djabart section of the Ta'ā'isha, a tribe of cattle-breeding Arabs (Bakkāra) in Dārūr. His great-grandfather is said to have been a Tunisian *gharīf* who married a woman of the tribe. His father Muḥammad b. 'Alī Karīm bore the nickname of *Tār Shayn* (Ugly Bull). Religious pretensions were hereditary in the family, and both father and son were *fakīh* of repute. Zubayr Raḥma, the famous merchant-adventurer and conqueror of Dārūr, relates that 'Abdullāh narrowly escaped execution at his hands, when taken prisoner during the Dārūr fighting in 1873, and that even then he was in search of the Expected Mahdī. *Tār Shayn* died when the Dīn's tribe in Kordofān and, according to the legend, he enjoined on his son to seek out Muḥammad Ahmad the future Mahdī. 'Abdullāh adhered to him in the Djabra before he had manifested himself, and was the first to believe in his mission. He was his closest adviser during the years of propaganda and fighting (1881-85), and his gifts of leadership and religious piety contributed to the successes which culminated in the fall of Khartūm (26 Jan. 1885). In an epistle, dated 17 Rabi' I 1300/26 Jan. 1883, the Mahdī nominated him as his *khālifa* with the title of al-Siddīk, and as *amīr* of the Mahdīst army. On the Mahdī's death at Omdurman (22 June 1885) 'Abdullāh assumed control of the new Mahdīst state. A convinced believer in the Mahdī's mission and himself claiming supernatural gifts, he rigorously upheld the religious ordinances of the Mahdiyya, without neglecting the temporal aim of establishing his personal and absolute rule. With this end in view he deprived the Mahdī's blood-relations (the Aḥl-rā'ī) of all influence and successfully crushed the opposition of powerful tribal chiefs and of rival religious pretenders. Not himself a military leader, 'Abdullāh was served by a number of capable *amīr* who, in the first year of his reign, captured the last posts still held by the Egyptian garrisons. His governor of the eastern province, the redoubtable 'Uḡmān Dīgā (q.v.) fought numerous actions with varying success against the Anglo-Egyptian forces based on Suakin. Between 1887 and 1889 there was intermittent warfare with the Abyssinians (sack of Gondar by the Mahdīsts in 1887; battle of Kallabāt 9 March 1889 when an Abyssinian victory was turned into rout by the death in battle of King John). In the execution of his policy 'Abdullāh relied largely on the Bakkāra tribesmen of Kordofān and Dārūr, whose loyalty to the Central Sudan where they incurred much unpopularity as a privileged and predatory class. 'Abdullāh's most trusted associate was his brother Ya'qūb and he seems to have intended his eldest son 'Uḡmān Ḥayyān al-Dīn to be his successor.

The first serious reverse of his reign was the defeat at Tophī (12 Aug. 1889) of the Mahdīst army under 'Abd al-Raḥmān al-Naḍfīn which attempted the invasion of Egypt with quite inadequate forces. The country over which 'Abdullāh still ruled with absolute power was now devastated by incessant warfare and by the terrible famine of 1889. The end came when the British government, then in virtual control of Egypt, decided on the re-conquest of the

Sudan. The occupation of Dongola (1896) by Anglo-Egyptian forces was followed by their advance to Omdurman and the decisive defeat of the Mahdist army (2 Sept. 1898). 'Abdullāh fled to Kordofan where he maintained himself with a considerable body of followers for another year. In the final battle of Umm Dubaykah (21 Nov. 1899) he met death with courage and dignity.

The Mahdi and his successor proposed to re-live the life of the Prophet and of early Islam, and 'Abdullāh's epistles, in which he exhorted the Sultan of Turkey, the Khedive of Egypt, and Queen Victoria to embrace the Mahdist faith, vividly display the anachronistic spirit of the Mahdiyya. Reticent towards external enemies and suspected rivals, and governing without regard for the material welfare of his country, 'Abdullāh yet remained true to his fanatical faith and to the primitive code of a Bakfari Arab. In contrast to European writers who stress the cruel and barbaric character of his reign, Sudanese tradition credits him with the virtues of simplicity in his private life, generosity as a host, and bravery as a fighter. From his numerous household of legal wives and concubines he had 21 sons and 11 daughters, not counting those who died in infancy.

'ABD ALLĀH b. AL-MUKAFFA' (see Ibn AL-MUKAFFA').

'ABD ALLĀH b. MUSA b. NUSAYR, eldest son of Musa b. Nusayr (q.v.), the conqueror of the Maghrib and Spain. When his father left for Spain, he was charged with the administration of Ifriqiya (93/711). When Musa, denounced to the caliph al-Walid by Ṭārik, left for the East, whence he never returned, he again left 'Abd Allāh as his lieutenant. Involved in his family's disgrace by the caliph Sulaymān, who saw not without disquiet Ifriqiya governed by one son of Musa ('Abd Allāh), Spain by a second ('Abd al-'Aziz) and the Maghrib by a third ('Abd al-Malik), he was deposed in 66/714-5 and replaced by Muḥ. b. Yazid, who assumed his office in 97/715. It is uncertain what happened to him; he is said to have been accused of having instigated the murder of Yazid b. Abū Muslim and to have been executed in 102/720 by Hishām b. Sa'd. In the orders of the caliph Yazid b. 'Abd al-Malik.

'ABD ALLĀH b. MUTI' b. AL-ARWAD al-'ADAWI, was, together with 'Abd Allāh b. Hārith al-Ja'fari, one of the chiefs of the revolt against the caliph Yazid I in Medina. When he saw that after the accession of Yazid the Umayyad government was rousing increasing opposition, Ibn Muti

proposed to leave Medina, but 'Abd Allāh b. 'Umar (q.v.) advised him to remain, and he gave in to Ibn 'Umar's arguments. When the inhabitants of Medina revolted against the new caliph, he became the leader of the Kurayshite elements in the city and took part in the battle of the Harra in Dhū l-Hijja 65/August 685. Escaping from the general rout, he took refuge in Mecca with the anti-caliph 'Abd Allāh b. Zubayr, who appointed him in Ramaḍān 65/April 685 governor of Kūfa. Shortly afterwards he was attacked by the Shi'ite adventurer al-Mukhtar b. Abī 'Ubayd (q.v.). Al-Mukhtar, besieged in his palace and probably betrayed by his own general Ibrāhīm b. al-Ash'ar, he relinquished his post, withdrew to Basra, and then joined Ibn al-Zubayr in Mecca. There he joined Ibn al-Zubayr's forces and was killed together with him in 73/692.

(K. V. ZETTERSTEN—CH. PELLAT)

'ABD ALLĀH b. RAWĀHA, a Khazrajite, belonging to the most esteemed clan of the Banu 'Hārith. At the second 'Akaba assembly in March 622, 'Abd Allāh was one of the 12 trustworthy men, whom the already converted Medinans, conformably to the Prophet's wish, had chosen. When Muhammad had emigrated to Medina, 'Abd Allāh proved himself to be one of the most energetic and upright champions of his cause. Muhammad appears to have thought a great deal of him, and often entrusted him with honorable missions. After the battle of Badr in the year 2/63, in which the Muslims were victorious, 'Abd Allāh together with Zayd b. Haritha hastened to Medina to bring the tidings of victory. During the so-called "second campaign of Badr", in Dhū'l-Ka'da 4/Apr. 626, 'Abd Allāh remained behind in Medina as lieutenant-governor. When in 5/627, at the commencement of the siege of Medina, the fidelity of the Banu Kurayza, his allies, was suspected, the Prophet sent 'Abd Allāh together with three other influential Medinans to find out the real sentiments of his allies. After Khaybar had been conquered in the year 7/628 and its territory divided, Muhammad appointed 'Abd Allāh as appraiser of its yield. On sending out the Mu'ta expedition in the year 8/629, 'Abd Allāh was appointed by the Prophet as second in succession to the commander of the army, and when both his superiors had fallen, he sought and met his death as they had done fighting for the Faith.

Besides his military talents 'Abd Allāh possessed other qualities which made him valuable to his master; he was one of the few pre-Islamic men who could write, and was for that reason, together with other faithful followers, chosen as secretary by the Prophet. Muhammad appears to have esteemed him very highly, more especially on account of his poetical gifts. In the *Aghāni* it is expressly stated that the Prophet considered his poems equal to those of his "court" poets Ḥassān b. Ṭābit and Ka'b b. Malik. It is characteristic of 'Abd Allāh's "literary tendency" that he attacked the Kuraysh more especially for their unbelief, while the ten other poets always reproached them with their impious deeds. Only about 50 verses of his have been preserved and they are for the most part to be found in Ibn Hishām.

'ABD ALLĀH b. SABA', reputed founder of the Shi'a. Also called Ibn al-Sawda', Ibn Harb, Ibn Wabb. "Saba'" appears also as Sabā', the name of the associated sect appears as Saba'iyya, Sabā'iyya, or, corrupted, as Sabā'iyya. Sabā'iyya.

In the Siunt account he was a Yamanite Jew converted to Islam, who about the time of 'Alī first introduced the ideas ascribed to the more extreme wing of the Shi'a (*ghalī*, q.v.). Especially attributed to him is the exaltation of 'Alī himself: that 'Alī stood to Muhammad as divinely appointed heir, as Joshua did to Moses (the *isāya* doctrine); that 'Alī was not dead, but would return to bring righteousness upon earth (*the rag'a*); that 'Alī was divine, exalted to the clouds, and the thunder was his voice. To Ibn Saba's conspiratorial cunning was ascribed by Sunnis after al-Tabari the first breach in a perfect harmony among the *Sahāba* (cf. al-Makrizi, *Khatā*, ii, 314). He is said to have roused the Egyptians against 'Uthmān on the ground of 'Alī's special rights; and the bloodshed between 'Alī and Ṭāba and Zubayr is then ascribed to these same murderers of 'Uthmān under the name of *Saba'iyya*.

For the Shi'a he sometimes figured as type of the extremist, the *ghalī*, being so cursed by Dja'far (Kashshī, *Ma'rifat Aḥbār al-Riḍā*, 70). Ibn Saba' became the subject of traditions used by both in attacking and in defending the extremist Shi'a. 'Alī is said to have had him or his followers burn for declaring him ('Alī) God. An Ismā'īlī source cites the incident in Ibn Saba's favour, claiming that he suffered only in appearance (cf. al-Makrizi, *Bad' al-Khālī*, ed. Huart, v, 181; and the *Haft Bāb* *Bāb Sayyid-na*, ed. Ivanov, in *Two early Ismā'īlī treatises*, Bombay, 1933, 15).

It is not clear what historical person or persons lay behind this figure. Al-Tabari's source, Sayf b. 'Umar, is the chief authority for his political activity against 'Uthmān. Al-Dhahabī notes a general condemnation of Sayf as a traditionist (quoted by Friedländer, *ZA*, 1909, 297), a condemnation supported on other grounds by Wellhausen (*Shi'ism und Vorarbeiten*, vi, 6); and surer sources seem to exclude Ibn Saba' from any major rôle there. Friedländer suggests that Ibn Saba's chief rôle was not to proclaim 'Alī's divinity, but to deny 'Alī's death, teaching that he died only in appearance (doctism), and would in the end come again from the clouds (messianism)—perhaps with the background of a Yamanite Judaism related to that of the Falashas of Ethiopia. Caetani would make Ibn Saba' in origin a purely political supporter of 'Alī, around whom later generations imagined a religious conspiracy like that of the 'Abbasids. Massingon considers the Saba'iyya of al-Mukhtar's time as one of the 'ayniyya sects (Massingon, *Salmīn*, Paris 1934, 37, 40).

Already in the earliest sources available contradictory teachings are ascribed to Ibn Saba' and the Saba'iyya (cf. Khushaysh al-Nasā'ī, d. 253), reported in al-Maṭalī, 118, 120). We may suppose that personally Ibn Saba', perhaps together with a seceder from the 'Abbasid movement, was a supporter of 'Alī, who denied 'Alī's death. He was probably not a Jew (Levi Della Vida, *RSO*, 1912, 495). He was either founder or hero of one or more sects called Saba'iyya, which exalted 'Alī's religious position.

'ABD ALLĀH b. SA'D, Muslim statesman and general. Abū Yalāyā 'Abd Allāh b. Sa'd b. Abī Sarb al-'Ammir belonged to the clan of 'Ammir b. Lu'ayy of Kuraysh and was as foster brother of the subsequent caliph 'Uthmān a chief partisan of the Umayyads. He was less a soldier than a financier. The judgements of historians on his character vary greatly. His name is connected in many ways with the beginnings of Islam. First he is mentioned as one of Muhammad's scribes; he is supposed to have arbitrarily altered the revelation, or at least he boasted of doing so after his apostasy from Islam, and thereby incurred the hatred of the Prophet. For this reason the latter desired to have him executed after the capture of Mecca, but 'Uthmān obtained, though with difficulty, the Prophet's pardon. This story afterwards became very famous. 'Abd Allāh later on showed himself grateful to 'Uthmān for his rescue by agitating for the latter's election as caliph. He was one of the Hijra-Companions who took part in the conquest of Egypt under 'Amr b. al-'As (q.v.) and appears to have governed Upper Egypt independently under 'Umar, after the latter's quarrel with 'Amr. It is impossible exactly to fix the date when he was appointed governor of the whole of Egypt; according to Ibn Taghribirdī, as early as the year 25/645-6, and therefore before the revolt of Alexandria under Manuel. As he was not able to suppress this rising, 'Amr was recalled, who, however, immediately after his victory had to restore the government to 'Abd Allāh. 'Uthmān desired to confirm 'Abd Allāh as financial prefect and to appoint 'Amr as military governor, but the latter declined. 'Abd Allāh now succeeded in considerably increasing the state revenues of Egypt, much to the satisfaction of the caliph. Although his principal aim was the administration of the finances, he also became renowned as a general. 'Abd Allāh regulated the relations between the Muslims and the Nubians and supported Mu'āwīya's expedition against Cyprus. He himself undertook several expeditions against Roman Africa, the first probably in the year 25/645-6, the most important and most successful certainly in the year 27/647-8. He subjected the territory of Carthage to Islam. His most important military performance, however was the naval battle of Dhāt al-Sawāfī, comparable in significance to the battle of the Yarmūk (q.v.), in which the Roman fleet was completely destroyed. This battle took place in the year 34/655, although different dates are given in some sources. Soon afterwards the agitations against 'Uthmān began in many parts of the empire. 'Abd Allāh appears as the principal champion of the regime represented by the caliph. He endeavoured to warn the caliph and even left Egypt in order to support him. His lieutenant al-SA'D b. Hishām was expelled by the Egyptian revolutionary party under Muhammad b. Hudhayfa and 'Abd Allāh himself was prevented from returning to Egypt. On the frontier 'Abd Allāh learned of the murder of the caliph, and fled to Mu'āwīya. Shortly before the latter's march to Siffin, he died in Askalon or Ramla (in 36 or 37/656-8). His supposed participation

in the battle of Siffin and his late death in the year 57/676-7 belong to the numberless myths connected with the battle of Siffin.

'ABD ALLĀH b. SALĀM, a Jew of Medina, belonging to the Banū Kaynakā and originally called al-Husayn (on the name Salām), see Ibn Kh̲aṭīb al-Dahshī, *Ṭuhfa*, ed. Mann, 66. Muhammad gave him the name of 'Abd Allāh when he embraced Islam. This conversion is said to have taken place immediately after Muhammad's arrival at Medina, or according to others, when Muhammad was still in Mecca. Another account which makes him accept Islam in the year 8/629-30 is worthy of more credence—though Muslim critics think it badly accredited—for his name is sought in vain in the battles which Muhammad had to wage in Mecca. The few unimportant mentions in the *Maghāzī* may well have been inserted in order to remove the glaring contradiction with the generally accepted tradition. He was with 'Umar b. al-Daḥbiya and Jerusalem, and under 'Uthmān took the latter's side against the rebels, whom he in vain endeavored to dissuade from murdering the caliph. After 'Uthmān's death he did not do homage to 'Aī and implied him not to march to 'Irāq against 'Aṣṣāḥ; legend brings him into relation with Mu'āwīya also. He died in 43/663-4. In Muslim tradition he has become the typical representative of that group of Jewish scribes which honored the truth, admitting that Muhammad was the Prophet predicted in the Torah, and protecting him from the intrigues of the co-religionists. The questions which 'Abd Allāh is made to ask Muhammad and which only a prophet could answer, the contents of the hadiths which the works on tradition ascribe to him, and the story of Bulūkūya which Ṭabāḥī al-Balḥī puts into his mouth, mostly have their origin in Jewish sources; if they do not really come from 'Abd Allāh himself, they certainly come from Jewish resuscitator circles. While his contemporaries often reproached him with his Jewish origin, later on traditions were circulated in which Muhammad assures him of entry into Paradise, or in which the Prophet and celebrated Companions give him high praise. Certain verses of the Qur'ān are also said to refer to him. The "questions" which he put to Muhammad were subsequently enlarged to whole books, and in the same manner several other works were foisted on him, which are partly based on what is related by him in Ḥadīṭh. As well as his sons Muhammad and Yūsuf, 'Abd Hurayra and Anas b. Mālik also handed down his traditions. Tabarī took more especially Biblical narratives from him into his *Chronicle*.

'ABD ALLĀH b. ṬĀHIR, born 182/798, died 230/844, was a poet, general, statesman, confidant of caliphs and, as governor of Khurāsān, almost an independent sovereign. His father, Ṭāhir b. al-Husayn, had founded the powerful Ṭāhirid [s.v.] dynasty which ruled over a territory extending from al-Rayy to the Indian frontier, with its capital at Naysābūd.

In 206/821-2 the caliph al-Ma'mūn appointed 'Abd Allāh b. Ṭāhir governor of the region between al-Rakka and Egypt and at the same time he was placed in command of the caliph's troops in the campaign against Nasr b. Shabab, a former partisan of al-Amin, who was endeavoring to regain possession of Mesopotamia. After subduing Nasr 'Abd Allāh went in 218/826-7 to Egypt, where for ten years refugees from Spain had been further weakening an already weak state, and he swiftly captured the leaders and restored order.

While he was at Dinawar, in al-Dijlād, busy raising troops to quell a revolt of Bābak the Kh̲urramī, his brother, Ṭāḥa, died and in 214/829-30 he was appointed by al-Ma'mūn to succeed his father as governor of Khurāsān. He proved to be an exceedingly wise ruler, establishing a stable government in his domains, protecting the poor against abuses by the upper classes and bringing education to the masses; no boy, however poor, was denied the means to acquire knowledge. As a result of litigations in Naysābūd he ordered an investigation into the use of water for irrigation, and the *Fiṭṭ* of Canak, which was the outcome of this, established legal rules for water utilization which served as a guide for several centuries (cf. A. Schmidt, *Islamic*, 1930, 128).

During the caliphate of al-Mu'tasim, 'Abd Allāh subdued the revolt of the 'Alid pretender, Muhammad b. al-Kāsim, in 219/834-5; and in 224/838-9 in Tabaristān, which was under his jurisdiction as governor of Khurāsān, he quelled the far more alarming revolt of its *shahād*, al-Māsiyir [s.v.], incited to rebel by al-Aṭṭār.

Gardizi relates that al-Mu'tasim so hated 'Abd Allāh b. Ṭāhir for a personal criticism that 'Abd Allāh had expressed about him that when he became caliph he attempted to poison 'Abd Allāh by sending him a slave girl with a gift of poisoned cloth, but the attend failed because the slave girl fell in love with 'Abd Allāh and revealed the plot. However that may be, 'Abd Allāh seems to have enjoyed the caliph's esteem. His most implacable enemy, al-Aṭṭār, during his own heresy trial, testified bitterly to the high regard the caliph had for him, and al-Mu'tasim himself referred to 'Abd Allāh as "one of our great men (curious to note, all of them Ṭāhirids) of his brother's reign and regretted that he had not been able to foster any men of the same noble calibre."

Like all Ṭāhirid rulers, 'Abd Allāh was enormously wealthy; his magnificent palace in Baghdad enjoyed

the royal right of sanctuary and served as a residence for the governor of the city, which remained under Ṭāhirid domination for a long time (Le Strange, *Baghdad*, 119).

He was a man of wide culture with a deep love and respect for learning; in the controversy regarding the relative merits of Arabic vs. Persian culture, which engaged the keenest minds of that day, 'Abd Allāh strongly supported all things Arabic. In his own right he was an accomplished musician and a poet of note, as well as a sympathetic patron of the poet Abū Tammām, the compiler of the *Hamāz*, who sang his praises in many poems.

At the age of 48 'Abd Allāh b. Ṭāhir died as a result of quinsy after an illness of three days, on Mon. 11 Rabi' I, 230/Nov. 26, 844, according to most Arab historians (but Nov. 26 was Wed.) and, in true dynastic fashion, he was succeeded by his son, Ṭāhir. At the time of his death the taxes from the provinces under his control amounted to 48 million dirhams.

'ABD ALLĀH b. ṬĀHAWR [see ABU FUBAYH]

'ABD ALLĀH b. UBAYY b. SALŪT (Salūl being Ubayy's mother), chief of the al-Hubālā (also known as Sālim), a section of the clan of 'Awf of the Kh̲azraj, and one of the leading men of Medina. Prior to the hijra he had led some of the Kh̲azraj in the first day of the Fajr al-ḥudaybiyya, but did not take part in the second day of the Fajr al-ḥudaybiyya since he had quarrelled with another leader, 'Amr b. al-Nu'mān of Bayda, over the latter's unjust killing of Jewish hostages, perhaps because he realized the need for justice within a community and feared 'Amr's ambition. But for the coming of Muhammad he might have been the "king" of Medina, as the sources suggest. When all but a small minority of the Medinans accepted Islam, Ibn Ubayy followed the majority, but he was never a whole-hearted Muslim. In 2/624 when Muhammad attacked Banū Kaynakā, Ibn Ubayy pleaded for them since they had been in league with him in pre-Islamic times; he probably urged his importance as a fighting unit in view of the expected Meccan onslaught. In the consultations before Uhud (3/625) he supported the policy originally favoured by Muhammad of remaining in the strongholds. When Muhammad decided to go to meet the enemy, Ibn Ubayy disapproved, and eventually with 300 followers retired to the strongholds. This move may have stopped the Meccans from attacking Medina itself after the battle, but it showed cowardice and lack of belief in God and the Prophet (cf. Qur'ān, III, 166-8 [160-2]). Up to this point Ibn Ubayy had done little but criticize Muhammad verbally, but for the next two years he also intrigued against him. He tried to persuade Banū al-Nadīr not to evacuate their homes at Muhammad's command, even promising military support. On the expedition to Maraya he used the occasion of a quarrel between Emigrants and Ansār to try to undermine Muhammad's position and make men think of expelling him; and immediately afterwards he was active in spreading scandal about 'Aṣṣāḥ. Muhammad called

a meeting and asked to be allowed to punish him (without incurring a feud). There was high feeling between the Aws and the Kh̲azraj, but it was clear that Ibn Ubayy had little backing. His reputation of being leader of the Hypocrites (*munaḍḥiq*) or Muslim opponents of Muhammad is based on these incidents. After this year there is no record of his actively opposing Muhammad or intriguing against him. He took part in the expedition of Hudaybiya, but stayed away from that to Ṭabūk, doubtless because of ill health, since he died shortly afterwards (5/63). He was probably not involved in the intrigues connected with the "invasion of disunion" (*fatḥ al-ḥudaybiyya*), since Muhammad himself conducted his funeral. Throughout his dealings with Ibn Ubayy Muhammad showed great restraint.

Ibn Ubayy had a son 'Abd Allāh b. 'Abd Allāh and several daughters who became good Muslims.

(W. MONTGOMERY WATT)

'ABD ALLĀH b. 'UMAR b. 'ABD al-'AZIZ, son of the caliph 'Umar II. In the year 126/744 'Abd Allāh was appointed governor of 'Irāq by Yazid III, but in a short time aroused the discontent of the Syrian chiefs in that place, who felt that they were unfavorably treated by the new governor compared with the inhabitants of 'Irāq. After the accession of Marwān II, 'Abd Allāh b. Mu'āwīya [s.v.] and his brother 'Abd Allāh b. 'Ubayy, rebelled in Kūfa in Muharram 127/Oct. 744, but was expelled by 'Abd Allāh b. 'Umar, whereupon he transferred his propaganda to other parts. When Marwān transferred to al-Nadīr b. Sa'd al-Harāḡi the governorship of 'Irāq, 'Abd Allāh energetically refused to leave his post. Al-Nadīr appeared at Kūfa, whilst 'Abd Allāh remained in Hira and hostilities broke out between them. Soon after, however, a common enemy appeared in the person of the Kh̲aridite chief al-Dahhāk b. Kays, and then the two adversaries had to come to terms and even to join forces. In Rajab 127/April-May 745 they were defeated by al-Dahhāk and 'Abd Allāh withdrew to Wasit, whilst the victor captured Kūfa. Thus the old enmity between the two governors again broke out, but for a second time al-Dahhāk put an end to their quarrels. After a siege lasting several months 'Abd Allāh was obliged to make peace with al-Dahhāk. Subsequently Marwān had 'Abd Allāh arrested. According to the usual account, he died of plague in the prison of Harrān in the year 132/749-50.

'ABD ALLĀH b. 'UMAR b. AL-KHATTĀB, one of the most prominent personalities of the first generation of Muslims, and of the authorities most frequently quoted for Traditions. He derived his reputation not only from being a son of the Caliph, but also because his high moral qualities compelled the admiration of his contemporaries. At a time when the Muslims were being carried by their passions into civil war, Ibn 'Umar was able to maintain himself aloof from the conflict; furthermore, he followed the precepts of Islam with such scrupulous

obedience that he became a pattern for future generations, to such a degree that information was collected as to how he dressed, how he cut and dyed his beard, etc. The biographies of him are full of anecdotes and charming touches which serve to illustrative his native wit, his deep piety, his gentleness, modesty, propriety and confidence, his determination to detach himself from all that he loved most. Some of these stories may have been invented, but his nobility of soul is incontestable. As a transmitter of Tradition, he has been regarded as the most scrupulous in neither adding to nor omitting anything from the *ḥadīth* narrated by him. The Caliphate was offered to him three times: immediately after the death of 'Uthmān (35/653); during the negotiations of the two arbiters appointed at Siffin to resolve the dispute between 'Alī and Mu'āwīya (37-8/657-8); and after the death of Yazīd I (64/683). On each occasion he refused, because he would have desired his election to be unanimous and wished to avoid bloodshed in securing it. Whether or not this was due to narrow-mindedness (as Lammens has suggested), it is undeniable that Ibn 'Umar was lacking in energy, and his own father recognized this defect in him.

The following are the events recorded on the life of Ibn 'Umar. Born before the *hijra*, at an unspecified date, he emigrated with his father, 'Umar, and emigrated to Medina some time before him. The Prophet sent him back on account of his age when he presented himself to fight at Badr and at Uhud, but accepted him at the siege of Medina known as the Battle of the Moat, when he was about fifteen years old (this served as a precedent later in analogous cases). Afterwards he took part in the disastrous expedition to Mu'ta (7), in the conquest of Mecca (8), in the wars against the false prophets Musayyima and Tulayha (12), in the Egyptian campaign (18-21), in the battle of Nihāwand (23), in the expedition of the year 30 to al-Jundīl and Tābaristān, and in Yazīd's expedition against Constantinople (42). In political affairs, he appears for the first time as adviser to the Council appointed by the dying 'Umar to choose from among its own members the future Caliph; he had, however, no right of voting and was not eligible. At the elections of the other Caliphs who came to power during his lifetime he conformed to the will of the majority of the Muslims, and if he refused to pay homage to 'Alī it was because he was waiting for the community to reach agreement. As agreement was not reached and civil war broke out, he remained neutral. If later he refused to recognize Yazīd as heir-presumptive—he obviously disapproved of the innovation introduced by Mu'āwīya into the settlement of the succession—he showed no hesitation in paying homage to him after the death of his father. Ibn 'Umar held no important office in the administration of the empire, except a few minor ones. Perhaps he deliberately held office, devoting himself to religious practices. It is related that he would not accept the office of *kādi*, fearing that he might not be able to interpret the divine law correctly.

Ibn 'Umar died of septicaemia in 73/693, well over eighty years of age, as the result of a wound in the foot inflicted by one of the soldiers of al-Hajjāj who had been sent to his house. On the day of pilgrims returning from 'Arafāt, When al-Hajjāj visited him during his illness and asked if he knew the man who had wounded him, so that he could be punished, Ibn 'Umar reproached him for allowing his men to carry arms in the holy places

and for having been, in this way, the cause of his injury. This reproach probably gave rise to the story found in certain of the later sources, that al-Hajjāj commissioned an assassin to wound Ibn 'Umar with the poisoned tip of a lance.

(L. VECCEA VAGLIERI)

'ABD ALLĀH b. WAḤB al-RĀSĪB, Khārījite leader, a *ṣāḥib* of the Baḡdāṭa tribe, noted for his heavy and partly and surmused *ḥaḡ* 'Ṭaḡal, 'the mauls', with the 'fallies', on account of the callouses on his forehead etc. resulting from his many prostrations. He fought under Sa'd b. Abī Waḥḥā in 'Irāk and under 'Alī at Siffin, but broke with him over the decision to arbitrate and joined the dissidents at Harūra'. Shortly before their final departure from Kūfa in Shawwāl 57/March 685, the Khārījites elected 'Abd Allāh as their commander (not *khalīfa*, as usually stated), and he was also killed in the ensuing battle at Nahrawān, 9 Safar 58/27 July 685.

(H. A. R. GRON)

'ABD ALLĀH b. YĀSIN [see al-MURĀBITŪN]. 'ABD ALLĀH b. al-ZUBAYR, anti-Caliph, son of al-Zubayr, al-'Awshī [q.v.], of the *ḡ* al-'Uṣra clan of Quraysh, and Amīr [q.v.], daughter of Abī Bakr and sister of 'Aṣṣāḥa. He was born at Medina twenty months after the *hijra* (c. 12/634), and killed in battle against the Syrian troops under al-Hajjāj, 17 Dhu'dhā I or II, 73/4 Oct. or 3 Nov. 692. Some sources (Ibn Kutayba, *Maṣ'ūdī*, 116; Ibn Habb, *Masāḥib*, 275; etc.) state that he was the first child born to the Muhājirīn at Medina. The close kinship linked him to the family of the Prophet on both sides was a factor which contributed to building up his reputation, both as against the Umayyads and also (it would seem) against the 'Alids.

He is reported to have been present, though still a boy, with his father at the battle of the Yarmūk (Rajab 12/Aug. 636), and accompanied him when he joined the forces of 'Amr b. al-'Ās in Egypt (19/640). He took part in the expedition of 'Abd Allāh b. Sa'd b. Abī Sarh in 26-7/647 against the Byzantines in Iṭrīkiya and is said to have killed the exarch Gregory with his own hand. On returning

to Medina to announce the news of the victory, he is credited with an eloquent description of this exploit (*Aḡḡān*, vi, 59, on which most of the later narratives depend). He accompanied Sa'd b. al-'Ās in his campaigns in northern Persia (29-30/650), and was subsequently nominated by 'Uḡḡān to be one of the commission charged with the official recension of the *Qur'ān* (*Giesch. des Qur'ān*, *I*, 47-55). After the assassination of 'Uḡḡān he accompanied his father and 'Aḡḡā to Raqqa and commanded the infantry in the battle of the Camel (10 Dhu 'Dhī, 30/4 Dec. 656); after the battle he returned with 'Uḡḡā to Medina and took no further part in the civil war, except to attend the Arbitration at Dūmat al-Jandal (or rather Adhrub), where he is said to have advised 'Abd Allāh b. 'Umar to bribe 'Amr b. al-'Ās (Nasr b. Muṣ'ab, *Wak'at Siffin*, Cairo 1365, 623).

During the reign of Mu'āwīya I, 'Abd Allāh, who had inherited a considerable fortune from his father, remained in the background, hiding his true bent, but refused to take the oath to Yazīd as heir-presumptive. On Mu'āwīya's death (60/680), he, together with Husayn b. 'Alī [q.v.], again refused to swear allegiance to Yazīd, and to escape the threats of Marwān they fled to Mecca, where they remained un molested. When, however, after the expedition of Husayn and his death at Karbala', Ibn al-Zubayr began actively to enroll adherents, a small force was sent from Medina under the command of his brother 'Amr to arrest him. 'Amr was defeated and taken prisoner, beaten and incarcerated in a cell until he died, and his body was exposed on a gibbet (61/681). 'Abd Allāh now publicly declared Yazīd deposed, and his example was followed by the Ansār at Medina, who elected 'Abd Allāh b. al-Zubayr [q.v.], known as Ibn al-ḡḡāl (Ibn Sa'd, *VI*, 46-9) as their chief. Yazīd, realizing that he had temporized too long, despatched a Syrian army under Muslim b. 'Ukba, which defeated the Medianians in the battle of the Harra (27 Dhu 'l-Hijja 63/27 Aug. 683) and proceeded (notwithstanding Muslim's death) to besiege 'Abd Allāh b. al-Zubayr in Mecca (28 Muh. 64/24 Sept. 683). 'Abd Allāh, after a desperate and unavailing defence of 23 days, fled, on receiving the news of Yazīd's death, the Syrian forces desisted, and the commander, Husayn b. Numayr, tried to persuade Ibn al-Zubayr to accompany them back to Syria, but he determined to stay in Mecca.

The ensuing confusion in Syria and the outbreak of civil war gave Ibn al-Zubayr his chance. He proclaimed himself *amīr al-mu'mīnīn*, and the opponents of the Umayyads in Syria, Egypt, southern Arabia and Kūfa recognized him as Caliph. But his authority remained almost wholly nominal. The victory of Marwān I [q.v.] at Marj Rāḥit (end of 64/July 684) and the revolt of Muḡḡḡār [q.v.] at Kūfa fifteen months later, placed his supporters in Syria, Egypt and 'Irāk on the defensive; and although al-Muhallab's support was secured, Ibn al-Zubayr at Raqqa and subsequent victory over Muḡḡḡār (67/687) restored a Zubayrid government in 'Irāk, Muṣ'ab was to all intents an independent ruler. At the same time, the Bakrite Khārījites, who had separated from Ibn al-Zubayr after the death of Yazīd and had established themselves in eastern Najd under the command of Najdā, occupied the province of al-Baḡdāṭa (the Harūrā), and in 68/687-8 seized al-Yaman and Hadramawt, followed next year by the occupation of Ṭā'if, thus completely isolating him in the Hijāz. At the Pilgrimage of 68/688 no fewer than four different leaders presided over their separate groups of partisans: Ibn al-Zubayr, a Khā-

rijite, an Umayyad, and Muḥammad b. al-Hana-fiyya. Finally, after the Umayyad reoccupation of 'Irāk, 72/691, 'Abd al-Malik despatched al-Hajjāj to deal with Mecca. The siege began on 2 Dhu 'l-Ka'da 72/25 March, 692, and lasted for more than six months, during which the city and the Ka'ba were under bombardment. When at length his supporters gave way, and even his own sons surrendered to al-Hajjāj, 'Abd Allāh, urged on by his mother, returned to the field of battle and was slain. His body was placed on a gibbet on the spot where his brother 'Amr had been exposed, and some time later was given back by orders of 'Abd al-Malik to his mother, who buried it in the house of Saḡiyya at Medina.

'Abd Allāh is the principal representative in history of the second generation of the noble Muslim families of Mecca, who resented the capture of the Caliphate by the Umayyad house and the gulf of power which this had created between the clan of 'Abd ḡḡān and the other Meccan clans. This resentment is still clearly visible as a groundtheme in the numerous anecdotes on his relations with Mu'āwīya (see *Iḡḡ*, under Balādhuri), in spite of their later elaboration and of Muslim idealization of this challenger of Umayyad rule, which has transformed a brave, but fundamentally self-seeking and self-indulgent man, into a model of piety (see especially *Ḥilya al-'Awliyā'*, *I*, 292-317). On the other hand, many sources portray him as avaricious, jealous, and ill-natured, and reproach him particularly for his harsh conduct towards his brother, Muḥammad b. al-Hanafiyya, and 'Abd Allāh b. 'Abbās.

(H. A. R. GRON)

'ABD ALLĀH BINEWET (see BINEWET). 'ABD ALLĀH b. GHĀLĪB b. AL-ḡḡAL AR-RUḡḡMAN, Sa'dīd sultan, son of one of the founders of the dynasty, Muḥammad al-Shaykh al-Mahdi. He was born Ramadān 933/June 1527 and, designated as heir presumptive, was recognized as sultan on his father's death, assassinated by his Turkish guardsmen 29 Dhu'l-Hijja 964/23 Oct. 1557. His reign lasted till his death, due to a crisis of asthma, 28 Ramadān 971/28 Jan. 1574.

His reign as a whole was peaceful. Yet the sultan showed himself uneasy in expectation of an eventual intervention of the Turks, who had killed his father, immediately afterwards invaded the North of Morocco, whence they had been repulsed, and who offered asylum to three of his brothers: al-Muḡḡḡ, 'Abd al-Malik and Ahmad. Thus he sought an alliance with the Spanish. These preoccupations formed the background to the cession of the Pefos de Velez (1564), the taking of Shāḡḡḡḡ (1567) and the embarrassed attitude of the sultan at the time of the revolt of the Moriscos (1568-72). He had relations with other European powers also. He negotiated

with Antoine de Bourbon, king of Navarre, and was prepared to cede to him al-Kasr al-Saghir in exchange for 500 soldiers, and entered into commercial relations with England. He tried to conquer the fortress of Mazarg, which was in the hands of the Portuguese, dispatching against it a numerous army under the command of his son Muhammad, his heir. The siege lasted from 3 March to 30 April 1562 and ended with the failure of the Sa'idi troops, who suffered heavy losses.

In internal affairs he consolidated the work of his father, without meeting any serious opposition. He seemed to have feared especially the members of his family; he had his brother al-Ma'nin assassinated in Tlemcen and put to death his nephew Muḥ. b. 'Abd al-Kādir, whose popularity roused his ill-will (975/1567-8). He also seems to have suspected some of the religious leaders: he imprisoned, or put to death, several members of the Yūsufiyya order and had crucified in Marrākuḥ the *jaḥīl* Abū 'Abd Allāh Muḥ. al-Andalusī, accused of heresy (15 Dhū'l-Hijja 980/7 April 1572). He constructed several important buildings in Marrākuḥ, such as the Ibn Yūsuf madrasa. Diego de Torres also attributes to him the establishment of the *mawāḥid* of Marrākuḥ in its present location. He also built a fortress to protect the harbour of Agadir.

**'ABD ALLĀH PASHA** MUḤAMMAD ZAKI ÇELEBI, Ottoman statesman and general, son of Muḥsin Çelebi, descended from a family of merchants at Aleppo. He started his career in 1115/1703 in the financial administration with the post of supervisor (*emin*) of the Mint (*dar-ahḥadīḥ*), the *dehshdar* of which was his brother, Mehmed Efendi. He became *san-ol-ḥāḥ* (*damād*) of a Paḡha, head of the imperial chancery (*niḥāḍatī*), *agha* of the Janissaries, Beylerbey of Vidin, of Rumeli and of Bosnia. He was commander (*ser'asker*) at Bender, in Bessarabia, when Russia invaded the Crimea (1736) and Austria threatened to intervene on the Danube. Negotiations at Niemirow (Poland) led to no results. Appointed by Sultan Mahmud I (1730-54) as Grand Vizier (6 Rabi' II, 1150/August 1731, 1737). 'Abd Allāh Pasha directed the war operations, without achieving the results hoped for by the court. Recalled to Istanbul after four months, he had to hand

over the seal of office to the new Grand-Vizier Yegen Paḡha (Dec. 19th, 1737). He continued to fill posts as commander of fortresses and governor of provinces and died in Rabi' II, 1162/spring 1749 in Trikala, Thessaly, at the age of 90 years. His son Mehmed Paḡha Muḥsin-Zade signed the peace of Kükük Kaynarca (1749).

**'ABD ALLĀH SARİ** (see SARİ 'ABD ALLĀH EFENDİ).

**'ABD AL-'AZĪZ** (ARḌIAR), the thirty-second Ottoman sultan, born on 3 Feb. 1830, the third son of sultan Mahmud II (q.v.), he succeeded his brother 'Abd al-Majid II (q.v.), 20 June 1881. His reign was marked by revolts and insurrections in the Balkan provinces (Montenegro, Serbia, Bosnia, Herzegovina and Bulgaria) and in Crete, which brought about the intervention of the great powers. From 1870 onwards, the influence of Russia, supplanting that of France and England, preponderated in Istanbul, and General Ignatiev, the Russian ambassador, often imposed his views on the grand vizier Mahmūd Nadīm Paḡha. Russia also made efforts to stir up the discontent of the subjects of the Porte: Slavs, Albanians, and even Arabs and Egyptians.

In spite of internal crises, the policy of reforms, called *tanzimat* (q.v.), was not abandoned. The administration of the provinces was reorganized (law of *wilāyets* modeled on French law, 1867) and some attempts were made to reform the institution of the *waḥḍ* (1867). On French advice, a council of justice (*shūrā-yi dawlat*), composed of Muslims and Christians, and a council of justice (*shūrā-yi aḥkām-i adlīyye*) were set up (1868). Public education was reorganized after the French model and a *lycée* was opened in Galata-saray. It was open to all Ottoman subjects and instruction was given in French by French teachers (1868). A university (*dār al-fünūn*) was established. At the same time, the army, and especially the navy, were reorganized. Foreigners acquired the right to possess immovable property (1867). Other attempts at economic reform were fruitless: in 1875 the deficit of the budget reached 212 millions. The government, judging itself unable to face its obligations, followed the advice of the Russian ambassador, reduced by half the payment of interest on the debt and had to declare itself bankrupt. The deplorable state of the national economy, the financial crisis, the revolts and insurrections in the Balkan provinces, made it particularly difficult to apply the reforms, which the great powers were dissatisfied, while the Old Turks considered them incompatible with religion and the Young Turks insufficient. This resulted in general discontent against the sultan, who was deposed on 30 March 1876 and committed suicide a few days later.

**'ABD AL-'AZİZ B. AL-HĀDĪDĪ BRĀHĪM** AL-TAMAMĪ, al-Jazā'irī, celebrated Ḥadīth scholar, b. c. 1120/1717-8, probably at Warḡān (Ouargla). d. Rajab 1223/August 1808, at Banū Isḡān (Beni Isguen) in the Mzab, where, at the age of about forty, he had begun his studies under the *shaykh* Abū Zakariyyā? Yahyā b. Sālih, of Djarba. 'Abd al-'Aziz is held by the Ḥadīths to-day to be one of the greatest scholars who ever lived in the Mzab, where he has left the reputation of a man of exceptional piety, remarkable sagacity, great imperturbability, perfect self-control, and astonishing assiduity.

He devoted himself to the composition of a dozen works on theology and jurisprudence. His most important work is *K. al-Niḥ wa-Shāḥ* *al-'Aḥlī*, autographed at Cairo 1305/1887-8. This treatise, conceived on the plan of the *Muḥṣṣar* of Ḥāḍhī, but less concise in style, is a complete exposition of Ḥadīth legislation, put together from the most authoritative works of Ḥadīth scholarship in 'Umdān, Djarba Naḥṣa, Djarba and the Mzab, all of which can be identified without difficulty. It was on this work that E. Zeys drew for his studies on this subject. The other works of 'Abd al-'Aziz are the following: *Takmilat al-Niḥ*, published at Tunis some 25 years ago; *al-Ward al-haṣim fī Riyāḍ al-Ḥakīm*, a précis of jurisprudence devoted chiefly to questions of judgment; *Ma'ālim al-Dīn*, a reasoned exposition of the Ḥadīth creed, along with refutation of the arguments put forward by the defenders of the other sects (unpublished); *Muḥṣṣar al-Muḥṣṣar min K. Abi Maṣ'ūd wa-Aḥwāḥ*, on questions of inheritance; *Uḥd al-Dawāḥ*, a summary of *Kandī* al-*Khayr* of al-Dīyatī, on worship and religion (unpublished); *Muḥṣṣar Ḥabībāt al-'Arwād*, on the rights and duties of husband and wife (unpublished); *Tāḍī al-Manṣūm min Durar al-Minkhāḍ al-Ma'ālim*, abridgement of a voluminous 'Umdān work of jurisprudence (unpublished); *Taḥṣīs al-Maḥṣṣar fī Ḥikm al-Narāyān* *al-Mawḍi al-Habrayn* (unpublished); *al-'Asar al-Narāyān*, on travel and the accompanying rites (autographed in Egypt 1306/1888-9); *al-Nār*, on the principal dogmas of the Faith (autographed in Egypt 1306/1888-9); *Muḥṣṣar Hawāḍiḥ al-Tarīb*, résumé of several Ḥadīth works on *ḥādīḥ*.

(A. R. MORELLO-DE T. LEWICKI)

**'ABD AL-'AZİZ B. AL-HĀDĪDĪ ĀDĪD B. 'ABD AL-MALIK**, Umayyad general. He was a faithful partisan of his cousin Yazīd III and one of his

most eminent assistants. Already in al-Walīd II's reign he helped Yazīd, who headed the malcontents, to enlist troops against the caliph. When they had succeeded in getting together an army in Damascus, 'Abd al-'Aziz received the supreme command and marched against al-Walīd. Yazīd's brother 'Abbas, who was about to go to the caliph's assistance, was attacked and forced to pay homage to Yazīd. Shortly afterwards 'Abd al-'Aziz stormed the castle of Baḡhrā, whither al-Walīd had withdrawn, and put the caliph to death. This was in the year 126/744. Yazīd was now proclaimed caliph; the inhabitants of Hims (Emesa), however, stoutly refused to do homage to the usurper and marched against Damascus. Yazīd sent two army divisions against them, and while the rebels were engaged with one division, 'Abd al-'Aziz advanced with the other and decided the combat, whereupon the rising was suppressed. In the same year Yazīd died after settling the succession on his brother Ibrāhīm and after him on 'Abd al-'Aziz. The inhabitants of Hims, however, again refused to do homage to the new ruler, who for that matter was hardly recognized outside the capital. On Ibrāhīm's orders 'Abd al-'Aziz therefore began to lay siege to the town, but withdrew when Marwān b. Muḥ., then governor of Armenia and Adharbayḡān, advanced against him. Hims opened its gates to Marwān, the followers of the late caliph were defeated in Safar 127/Nov. 744 at 'Ayn al-Djār, and Marwān had himself proclaimed caliph in Damascus. As soon as he had entered the town, 'Abd al-'Aziz b. al-Hādīdī Ādīd was murdered by clients of al-Walīd II.

**'ABD AL-'AZİZ B. AL-HASAN**, sultan of Morocco from 1594 to 1608. He was born, according to Weisgerber, on 24 Feb. 1575, according to Doutté and Saint-René Taillandier 18 Rabi' I 1298/15 Feb. 1587, of the sultan Mawlay al-Hasan and Lalla Rukayya, of Circassian origin. When his father died on a campaign, 9 June 1594, 'Abd al-'Aziz was proclaimed sultan in Rabat, thanks to the *hādīḥ* Amad b. Māḥ, called Bī Ahmad, who had been in charge of his education, and received as reward the title of Grand-Vizier. 'Abd al-'Aziz left the management of affairs in the hands of Ahmad until his death on 13 May 1600. During this period Morocco continued to live more or less in its traditional way.

After the death of his mentor, 'Abd al-'Aziz fell under the influence of a small group of Europeans, including Sir Harry McLean, instructor of the Sherifian infantry, who encouraged the natural taste of the ruler for modernism, so that very soon the Sherifian palaces housed photographic cameras, billiards, etc. All this shocked the conservative feelings of the Moroccans and cost money. Moreover, in Sept. 1601, 'Abd al-'Aziz contemplated an equitable reform of taxes, *farḥ*, in order to abolish the privileges and immunities of the existing system. In consequence, an agitator (*rāḡ*), called Djalīl b. Idrīs al-Zarḥnī al-Yūsufī, nicknamed Bū Ḥamra (Abū Hamāra), rose in the district of Taza, gave himself out as a brother of the sultan and quickly became master of the region to the east of Fez (1601), threatening the capital itself in 1603.

On the other hand, the European powers exerted a strong pressure upon the Sherifian government, to protect the Europeans established in Morocco,

repress frontier incidents (region of Figini), and obtain a guarantee for the considerable sums lent to the sultan by various European groups. These pressures, marked by various incidents, such as the visit of the German Emperor William II to Tangier (31 March 1905), led to the conference of Algiers. The Act of Algiers (7 April 1905), interpreted as an admission of surrender to the demands of the European powers, made 'Abd al-'Aziz even more unpopular in Morocco. Anarchy and discontent increased equally, and the sultan was unable to bring about any improvement. One of his brothers, Mawlay 'Abd al-Hafiz, was proclaimed sultan in Marrākuṣh on 10 August 1907, immediately after the disembarking of French troops in Casablanca.

'Abd al-'Aziz tried to resist by organizing an expedition to Marrākuṣh in July 1908. His army broke up and was defeated by the troops of his brother on 19 August at Bô Adjiba on the Wadi Tassā'ūt. 'Abd al-'Aziz took refuge in Casablanca and there abdicated on 21 August 1908. After a short stay in France, he established himself in Tangier, where he lived, without mixing in politics, until his death, 10 June 1943.

'ABD AL-'AZIZ B. MARWĀN, son of the caliph Marwān I and father of 'Umar b. 'Abd al-'Aziz. 'Abd al-'Aziz was appointed governor of Egypt by his father, and the appointment was confirmed by 'Abd al-Malik, when he ascended the throne. During his twenty years' sojourn in Egypt, 'Abd al-'Aziz proved himself a capable administrator, who really had the welfare of his province at heart. When in the year 69/689, 'Abd al-Malik, after the assassination of his rebellious lieutenant 'Amr b. Sa'id, intended to have the latter's relatives executed as well, 'Abd al-'Aziz interceded for them and persuaded the increased caliph to spare their lives. Towards the end of his life 'Abd al-'Aziz suffered from the ill will of his brother 'Abd al-Malik. Marwān had nominated him to succeed 'Abd al-Malik, but the latter wished to secure the throne for his two sons, al-Walid and Sulaymān, and therefore cherished the project of removing his brother from his governorship and excluding him from the succession to the throne, when in the year 85/74 news suddenly reached Damascus that 'Abd al-'Aziz was dead.

'ABD AL-'AZIZ B. MUHAMMAD B. IBRĀHĪM al-Sayyid al-Fihri al-Muriciyan writer, b. 956/1549, d. at Marrākuṣh 1093/1682-2, was head of the chancery (*waṣṣ al-balān al-'aḥd*) and official

historiographer (*muṣawwif ta'riḥ al-dawla*) of the Sa'did sultan Ahmad al-Mansūr al-Dhahabī (q.v.). Of his literary and historical works, which were considerable, there survive only lengthy quotations, especially by the chronicler al-Iṣṭiṣṭāqī (q.v.) in his *Nuḥat al-Hādī*. Al-Iṣṭiṣṭāqī, who was a contemporary and friend of al-Makkarī (q.v.), the author of *Nah al-Tib*, composed annals of the Sa'did dynasty down to his own times, under the title of *Manāḥil al-Safā' fi ḥikmah al-Mulūk al-Sharāfiyya*. He was the author also of many panegyric poems, more particularly *manāḥil al-Safā'* (q.v.). The verses used for the epigraphic decoration of the palace of al-Badr at Marrākuṣh were of his composition.

'ABD AL-'AZIZ B. MŪSĀ B. NUṢAYR, first governor of al-Andalus, after the departure to the East of his father Mūsā b. Nuṣayr, the famous conqueror of the Iberian peninsula, in 93/714. Mūsā, on leaving, gave him instructions to pursue the Muslim advance and to pacify the regions which had been thrown under Muslim control. According to certain traditions, it was under his government that part of what is now Portugal, including the towns of Évora, Santarém and Coimbra, and the subpyrenean regions from Pamplona to Narbonne were conquered. He himself took Malaga and Elvira, and then subdued the land of Murcia, concluding with a Gothic lord, Theodemir (who gave his name to the district, Tudmir (q.v.)) a treaty, the more or less authentic text of which has survived.

'Abd al-'Aziz married the widow of the last Visigothic king Roderic, Egilón, who is said to have adopted Islam and taken the name of Umm 'Asim. This princess gained so much influence over the governor that he soon became suspect to his compatriots and was accused of abusing his power. He was, accordingly, banished, and he fixed his residence, by a certain Ziyād b. 'Udhra al-Balawī, at the beginning of Raḡlab 97/March 718, and was succeeded by his maternal cousin, Ayyūb b. Ḥabīb al-Lakhmī.

(E. L. YETTERSTEN)

'ABD AL-'AZIZ AL SA'DID (see SA'DID).  
'ABD AL-'AZIZ B. AL-WALID, son of the caliph al-Walid I. In 91/709-10, he took part in the campaign against the Byzantines, under the orders of his uncle, Maslama b. 'Abd al-Malik, and during the following years, he also participated in the battles against the same enemies. In 96/74-5, al-Walid, who had designated successor to his son Sulaymān b. 'Abd al-Malik, tried to exclude Sulaymān from the succession in favour of his son 'Abd al-'Aziz, but his attempt failed: After the death of Sulaymān at Dābik, 99/717, 'Abd al-'Aziz wanted to claim the crown, but learning that 'Umar II b. 'Abd al-'Aziz had been proclaimed as caliph, he betook himself to him and paid him homage. He died in 106/738-9.

'ABD AL-'AZIZ EFENDI KARA ÇELEBİZADE (see KARA ÇELEBİZADE).

SHĀH 'ABD AL-'AZIZ AL-DIHLAWI, the eldest son of Shāh Walī Allāh al-Dihlawī (q.v.), a noted Indian theologian and author of several religious works in Arabic and Persian, was born at Delhi in 1206 (hence his courtesy name Ghulām al-Arḍīn) and died there in 1239/1824. He studied mainly with his father, after whose death in 1276/1762 he soon began to teach as the head of the Madrasa Rahimiyya, founded by his grandfather. As a teacher, preacher and writer, he exercised a considerable influence on the religious thought of his time. His chief works are as follows. In Arabic: (1) *Sirr al-Shahādātayn* (Dihlī 1261), in which he sets forth the ingenious view that the Prophet vicariously acquired the merit and distinction of *ghalib* or martyrdom through the tragic death of his grandson, Husayn son of 'Alī. One of his pupils, Salāmāt Allāh wrote a commentary on it in Persian (Lucknow 1882). (2) *ʿAsā al-Hibās fi Faḍā'il al-Hayr al-Nāz*, a collection of traditions on the virtues of the first four Caliphs (Dihlī 1322/1904, with Persian and Urdu translations). (3) *Mā'in al-'Aḥād*, a concise statement of the Muslim creed with the author's own commentary on it (Dihlī 1321 A. H.). In Persian: (4) *Tuḥfa ṣāḥib al-Ḥayriyya* (edited by Muḥammad Ṣādiq Ḥāḍī Jawl, Lucknow 1295 A. H.), in which he refutes the Shi'ite doctrine that the continuous line of the Caliphate as *ḥādī al-hādī*, *ḥādī al-hādī* 'an *Khalīfat al-Khalāfa'*. It has also been translated into Urdu. (5) *ʿIḍā'at al-Nāḥa* (Dihlī 1312, 1348 A. H.), an introduction to the science of *Hadīth*. (6) *Bustān al-Muḥaddithīn* (Dihlī 1298), a bibliography of *Hadīth* literature, giving descriptions of books together with brief biographies of their authors. (7) *Fatāwā* (in 2 parts, Dihlī 1341 A. H.), a collection of opinions and formal decisions on questions of law and doctrine. There is also an Urdu translation of part I by M. Nawwāb 'Alī and 'Abd al-Djallī (Haydarabad Deccan 1235; also Cawnpore). (8) *Fath al-'Aziz*, commonly known as *Taḥṣīl al-'Aziz*, a commentary in Persian on Suras I and II, and sections 29 and 30 of the *Qur'ān*. Sections 29 and 30 of the *Qur'ān* have both been printed at Calcutta; the former bears the date 1248 A. H., while that of the other is not traceable. There are several other prints. Urdu translations of all the various parts have been published. (9) *Malfūḥat Shāh 'Abd al-'Aziz*, the *obiter dicta* of the author, originally collected in Persian in 1223 A. H. and subsequently translated into Urdu by 'Asmāt Ḥāḍī in 1315/1897 and lithographed at Meerut.

(SU. INAYATULLAH)

'ABD AL-RAHĀ' (see RAHĀ').  
'ABD AL-DJABBĀR B. 'ABD AL-RAHMAN AL-ABD, GOVERNOR OF KHURĀSĀN. In 120/747-8 and 123/750-1 he was a supporter of the 'Abbāsids in their conflict with the Umayyads, and was appointed to command the *ghurja* during the cal-

phates of al-Saffāh and al-Mansūr. The latter sent him to Khurāsān as governor in 120/737-8. On arrival in the province, he began a violent persecution against the local aristocracy, whom he accused of partiality for the 'Alids; but it seems that his measures affected also some of the partisans of the 'Abbāsids (as is stated in the Persian version of al-Tabarī). This was apparently the reason why the caliph came to suspect him of rebellion. A cunning exchange of letters, which followed, only confirmed these suspicions, and eventually in 121/738-9 al-Mansūr sent an army against him under the command of his son al-Mahdī. On the approach of the troops the population of Marw al-Rūḥī rose and delivered up 'Abd al-Djabbār, who was brought before al-Mansūr, tortured, and put to death, probably at the beginning of 122/739-60.

**Bibliography:** Ya'qūbī, index; Tabari, index; *Chronique de Tabari* (Persian), tr. H. Zotenberg, iv, 378-80; S. Moscati, *La rivolta di 'Abd al-Gabbār*, in *Rend. Linc.*, 1917, 613-5.

'ABD AL-DJABBĀR B. AHMAD B. 'ABD AL-DJABBĀR AL-HAMAGHĀSĪ AL-ASADĀDĪ, Abū 'l-Hasan, Mu'tazilite theologian, in law a follower of the Shāfi'ī school. Born about 325, he lived in Baghdad, until called to Rayy, in 367/978, by the *shāh* Ibn 'Abbād, a staunch supporter of the Mu'tazila. He was subsequently appointed chief *kāḍī* of the province; hence he is usually referred to in later Mu'tazilite literature as *ḥādī al-hādī*. (For some anecdotes on his relations with Ibn 'Abbād see Yāqūt, *Irbād*, ii, 312, 314). On the death of Ibn 'Abbād, he was deposed and arrested by the ruler, Faḡhr al-Dawla, because of a slighting remark made by him about his deceased benefactor (*Irbād*, i, 70-1, ii, 335). No details seem to be available about his later life, and we do not seem to know, for instance, whether he was re-instated in his office. He died in 415/1025.

His main dogmatic work is the enormous *Mughnī*, of which the greater part has been preserved in San'ā, see: *Fihrist Kutub al-Ḥisāna al-Mutawakkiliyya*, 103-4; some volumes in Cairo, brought from San'ā, see: *Kh. Y. Nānī, al-Ḥaḍra al-Murayyā' al-Fayṣal al-Makḥḥūṭ al-'Arabiyya* (Cairo 1952, 15). Another important handbook of his dogmatics, *al-Maḥḥūṭ bi'l-Tablī*, was compiled by his pupil Ibn Mattawayh (q.v.). Several volumes in San'ā, *Fihrist*, 102 (vol. I, Berlin 1549; Taymūriyya, 'Aḥād 357; fragments in Leningrad, see A. Borisov, *Les manuscrits mu'tazilites de la Bibliothèque publique de Leningrad*, *Bibliography*, *Fonologie*, 63-92). His monograph on prophecy (*Taḥṣīl al-Dalīl al-Nubuwwiyya Sayyidina Muhammad*, Shihād 'Alī Paṣha 1275, cf. H. Ritter, *Isl.*, 1929, 42) contains also important discussions of the views of other schools, especially those of the Shāfi'a. Another important dogmatic treatise seems to be his *Sharḥ al-Uṣūl al-Khāma* (Val. 1028). For other writings that have come down to us, cf. Brockelmann. It is not only from his own works, however, that his system can be reconstructed. All the writings of the latter Mu'tazila—including the Zaydi writers on dogmatics; as a matter of fact, his own books, too, have been preserved mainly by the Zaydis of Yaman—are full of reports on his opinions. He was the chief figure in the last phase of Mu'tazilism, but his teaching has not yet been studied.

**Bibliography:** Abū Sa'd al-Bayḥakī, *Sharḥ 'Uṣūl al-Ma'ānī*, MS Leiden, Landberg 215, fol. 123<sup>v</sup>-125<sup>v</sup>, whence Ibn al-Murtaḍā, *al-Mu'tazila*, Arnold, 66 ff.; al-Khaṣṣ al-Baḡhdādī,

Ta'rikh Baghdad, xi, 113 ff.; al-Sabki, *Tabakat*, iii, 114, 219-20; Ibn al-Athir, viii, 510-1; ix, 77-8, 235, x, 95; I. Goldziher, *Jah*, 1912, 214; M. Horten, *Die philosophischen Systeme*, 457-62; A. S. Tritton, *Muslim Tradition*, 191-3. — 'Abd al-Djabbār's *Tabakat al-Mu'tasila* was the main source of 'Abd al-Qādir al-Bayhaqi's important historical account of the Mu'tasila in the introduction of his *Shāh 'Uyūn al-Ma'adī*. Al-Bayhaqi's account was taken over, in a slightly abbreviated form, by Ibn al-Murtadā (ed. Th. W. Arnold).

'ABD AL-FATTAH FUMANI, Persian historian, lived probably in the 16th-17th centuries. Entering into government service in Fūman, the old capital of Gilān (Ch. Scherf, *Christ, pers.*, ii, 93) he was appointed controller of accounts by the vizier of the place, Behzād-beg, about 1018 or 1019/1609-10. After serving under several other viziers, he was taken to Irāk by 'Adil Shāh. He wrote in Persian *Ta'rikh-i Gilān*, a history of Gilān from 925/1517 to 1038/1628. This book, published by B. Dorn (with a résumé in his introduction), completes the histories of Zāhir al-Dīn [q.v.] and 'Alī b. Shams al-Dīn [q.v.].

*Bibliography:* 'Abd al-Fattāh Fūmanī's *Geschichte von Gilān* (vol. iii of B. Dorn, *Mohammed. Quellen zur Geschichte d. süd. Küstenländer des Kaukasien Meeres*). (Cl. Huart—H. Massé).

'ABD AL-ĞIBRĀNĪ b. ISMĀ'IL AL-NĪSĀBŪRĪ, mystic, theologian, poet, traveller, and voluminous writer on a variety of subjects, born in Damascus c. 1100-1110/1090-1000 March 1647, and the leading figure in the religious and literary life of Syria in his time. His family, traditionally *Shāfi'ī* (though his father had changed to the Hanafī rite), had long been settled in Damascus and Muhibb describes his great-grandfather as "glāyā madhābūh al-Shāfi'ī" (*Īkhwān*, ii, 433). He early showed an interest in mysticism, joining the *Kādirī* and *Nakshbandī* (*tārikas*), and as a young man shut himself up in his house for seven years, studying the works of Ibn al-'Arabī, Ibn Sab'īn and 'Aḥf al-Dīn al-Tirmidī, and bringing on himself by his unconventional behaviour charges of anti-nomianism. An early work, a *hadīṣ* in praise of the Prophet, was of such virtuosity that his authorship was doubted, until he vindicated himself by writing a commentary on it. In 1075/1664 he made his first journey to Istanbul, and in 1100/1688 he visited the Bāḳā' and Lebanon, in 1101/1689 Jerusalem and Hebron, in 1105/1693 Egypt and Hijāz, and in 1112/1700 Tripoli, and wrote accounts of all these travels except the first. His work number (including short treatises) from 200 to 250. His pupils were innumerable, the most important probably being Muṣṭafā al-Bakrī [q.v.]. He died in Damascus on 24 *Sha'bān* 1243/3 March 1731.

His works fall into three main categories: *sūfi*, poetry, travels. His *sūfi* writings are mostly in the form of commentaries on the works of Ibn al-'Arabī, al-Djīlī, Ibn al-Fārīdī and others. In these commentaries he does not merely paraphrase and epitomize, but develops the thought in the tradition of the great commentators by original, if sometimes far-fetched, interpretation, which, as it is not exclusively mystical, is an important source for his religious and theological thought in general. In several of his commentaries 'Abd al-Ğibrānī has represented a combination of two trends of mystical thought, the Andalusian-Maghribī trend (Abū Madyūn, Ibn Maḥbūb, Shuḥrābī, Sanūsī) and the Perso-Anatolian trend

(Abū al-Dīn Nūrī, Mahmūd Uskūdārī, Muḥammad Bīrgāl). He wrote also on the orders to which he belonged, as well as on the Mawlawī order. In his original writings he seems to be dominated by the concept of *wahdat al-wujūd*; of these original works the most important is the first volume of his great *divān*.

The *Divān al-dawāwīn*, which contains the main body of his poetical output, comprises, as well as the first volume on mysticism (published Cairo 1302 etc.), three other volumes, all unpublished, containing eulogies of the Prophet, general eulogies and correspondence, and love-poems respectively. This by no means represents the whole of his poetical output, many of his other works also being written in verse form, and his interest in poetry is reflected in his commentary on the poems of Ibn Hānī al-Andalusī. During his lifetime and after he had a great reputation as a poet (see Amīr Haydar, *Le Liban* (ed. Rustum), i, 8 ff., 22 ff., and for his use of the *manẓūm*, Hartmann, *Manẓūm*, 6).

In his narratives of his travels (see above) it was not 'Abd al-Ğibrānī's intention to present a description of topographical or architectural detail. They are rather records of his own mystical experiences; but at the same time they throw a considerable amount of light on the religious and cultural life of the age. They are important also because they served as models for later travellers, such as the Damascusi Muṣṭafā al-Bakrī and the Egyptian Aṣ'ad al-Lukaynī. In addition, he wrote works, some of them vast and encyclopaedic, on *tafsīr*, *badī'ih*, *kalām*, *fīkh*, interpretation of dreams (a mine of information on the spiritualism and superstitions of his age), agriculture, the lawfulness of tobacco, and many other subjects.

*Bibliography:* Murādī, *Sīk al-dawāwī*, ii, 30-8; Djabbārī, *Adjā'ib al-Ğibrānī*, i, 154-7; Muṣṭafā al-Bakrī, *al-Faḥ al-tarīq* (v. . . al-ğayb) ('*Abd al-Ğibrānī* (Ms. in the writer's possession); Ibn al-'Arabī, *Fayḍ al-ikḥām*, ed. 'Aḥfī (Cairo, 1916), i, 23; A. S. Khālidī, *Rikla al-dīyār al-Shām* (Jaffa, 1916); 'Abbūd, *Riwayat al-nabha al-hadīṣa* (Bairut, 1952), 34 ff.; R. A. Nicholson, *Studies in Islamic mysticism* (Cambridge, 1921) 143 ff.; L. Massignon, *La Passion de al-Halālī*, passim. (W. A. S. KHALIDĪ).

'ABD AL-HAKK ABD MUHAMMAD (see MARSHALL).

'ABD AL-HAKK R. SAYF AL-DIN AL-DIHLAWI al-Buḥārī, Abū l-Maḥdī, with the *laqab* *Ḥakīm*, Indian author in Arabic and Persian, born Muharram 958/Jan. 1557, died 2 Rabī' II 1052/30 June 1642. He spent some time in Faṭṭūr, studying with Faydī and Mirzā Nizām al-Dīn Ahmad, but fell out with them (cf. Badā'ūnī, iii, 115 ff.). *al-Makāshif wa l-Rasā'il*, on marg. of *Aḥbār al-Aḥyār*, Delhi, 1332, 160; 'Abd al-Hakḳ's book on the writers of Delhi, cf. below, p. 20; *Haṭṭ al-Dīn*, s. v. Dīhlī. He left for the Hijāz in 996 (*Aḥbār al-Aḥyār*, Urdu transl. of Ġhawwī's *Ğulzar-i Aḥrār*, Agra 1326, 559), studying for several years with the famous scholars there (of whom he gave an account in his *Zād al-Ma'adī*). On his return, he taught for half a century in Delhi. He won the favour of Djāhangīr (who praises him in the *Tuzuk-i Djāhangīr*, Aligarh 1864, 281 a) and the *Tuzuk-i 'Ulayd*, Alīghar, Rājasthān, *Mahabharat Shāh-Jahān*, 'Ulayd Alīghar, Rājasthān, *Mahabharat Shāh-Jahān*, Panjab Univ. Libr. Ms. no. 258 v., quotes a *risāla* by 'Abd al-Hakḳ against the "ecstatic phrases" (*ghathiyāt*) of Ahmad Kābulī (*Muḥaddith al-afī' ḥānī*, d. 1034), but ultimately

the controversy was settled peacefully (Siddiq Hasan Khān, *Tārīkh Dīyār al-Aḥrār*, Bhopal 1298, 185). The tomb of 'Abd al-Hakḳ is in the *Ḥawā'i Shāmī* in Delhi. An inscription on the wall of the *kubba* gives a sketch of his life; it is quoted fully in Ġhawwī *Alī Āzād, Ma'athir al-Kiram*, Agra 1328, 201; *Aḥbār al-Aḥyār*, 6; W. Beale, *Miftāh al-Tawārīkh*, Cawnpur 1867, 240; Ġaḥlī al-Dīn Ahmad, *Wāḥid al-Habwat*, Delhi, Agra 1919, ii, 395. According to the *Wāḥid*, 'Abd al-Hakḳ's descendants in Delhi were still celebrating every year his *vers* at the tomb.

In his *Tārīkh Kalb al-Aḥf bi-Kubātī Fihrist al-Tawā'id*, appended to his treatise on the writers and poets of Delhi (cf. the Urdu periodical *Tārīkh*, Haydarabad-Deccan, vol. i, part 34), 'Abd al-Hakḳ gives a list of his forty-nine works in Arabic and Persian. The following are the most important of his works: a *Divān* (cf. *Suhb-i Ġaḥlān*, Bhopal 1295, 141); *Lamā'at al-Tanḥīh*, Arabic commentary on al-Tibritī's *Miftāh al-Majābīh*; *Aḥf'at al-Lamā'at*, a fuller, Persian, commentary on the *Miftāh*, Lucknow 1277; *Aḥbār al-Aḥyār*, lives of saints, mostly Indian; *Zuhād al-Īḥr*, biography of 'Abd al-Kādir al-Djīlī; *Miftāh al-Faḥ*, Persian translation, with commentary, of al-Djīlī's *Faḥ al-Ğayb*; *Ḍikr al-Mulak*, a sketch of Indian history from the Ghūrīds to Akḥar; *Dīyār al-Kulab*, a history of Medina, based mainly on al-Samūdī; *Madrīdī al-Nubuwā*, a biography of the Prophet (Urdu transl.: *Madrīdī al-Nubuwā*, Lucknow 1277). His main contribution is his share of the popularisation of the study of *Hadīth* in India.

*Bibliography:* Autobiography in *Aḥbār al-Aḥyār* and another in the treatise on the writers of Delhi; *Tabakat-i Akḥarī* (Engl. transl.), Calcutta 1936, 692; 'Abd al-Hamīd, *Bidā'at-nāma*, i, 341; M. Sālib, *Amal-i Sālib*, iii, 384; *Īḥāl al-Nakāsh*, Cawnpur 1289, 303; *Tārīkh*, 112; *Aḥf'at al-Sawādī*, Cawnpur 1294, 65; *Cat. Freskhar Libr.*, 48, 173, 203 ff., 277; Brockelmann, ii, 549, S. i, 778, 277, 603; Storey, 194 ff., 181, 214, 427, 441; Zuhād Ahmad, *The contribution of India to Arabic literature*, index. (MOHAMMAD SHAFI).

'ABD AL-HAKK HĀMĪD (ABDULHAK HĀMĪD), Turkish poet, born 2 Feb. 1852. He belonged to an old family of scholars which came from Irbid, but resided for some time in Egypt before returning to Istanbul in the second half of the 18th century. His grandfather, 'Abd al-Hakḳ Molla, was chief court physician, and a great favourite during that later period of Mahmūd II's reign which began in 1826 and brought renewal to the Empire. He had a great part in the opening of the new School of Medicine, wrote occasional poetry and left a diary (*Tārīkh-i Līvā'*) describing the Sultan's sojourn in 1828 (during the Russian war) in the barracks of Rami, supervising the training of the new army. (His two brothers were also authors). Hāmīd's father, Ġhayrullāh Efendi, was one of the best historians of his day. He also wrote a journal of his visits to Paris (unpublished in this day) and was the author of the first Turkish play, *Hikāye-yi İbrahim Pāshā*.

Hāmīd grew up in this cultured environment; the childhood reminiscences of his mother, a Circassian slave girl, added to this intellectual background a fairy tale touch and Hāmīd's work was to remain to the end marked by this influence. He began his studies in one of the newly founded state schools and continued them in Paris, where he went together with his father when he was eleven

years old. Back in Istanbul, and later in Teheran, where his father was ambassador, he took private lessons, especially in Arabic and Persian. Among his tutors it was Tāḥsīn Efendi who made the deepest impression on him. It was his influence that made Hāmīd's early works (among them a narrative in verse, *Ğarām*) interesting records of the first clash between Western science and philosophy and Muslim faith.

After his father's death Hāmīd went back to Istanbul and entered the Civil Service; in 1876 he was appointed second secretary to the embassy in Paris. He had married in 1871, in Edirne, Fātma Khānūm, of the well-known Pirizade family. In Paris he met the ex-Prime Minister Mīdhat Pāshā. Letters and works written in that period testify to the intellectual crisis he was then going through. On his return he was appointed consul in Poti (Russia), then in Golos (Greece), finally in Bombay. On his way back in 1883 his wife died; her death affected deeply Hāmīd and his poetry.

In 1885 he was appointed first secretary in London, then minister in The Hague, returning as secretary, then councillor, to the London embassy. In 1908 Hāmīd, then ambassador in Brussels, became a member of the Senate, and acted, during the first world war, as a deputy president. When the Senate was dissolved, he went to Vienna, returning towards the end of the war of independence. He was elected to the National Assembly in 1928. He died in 1937 and was given a national funeral.

His works before going to Europe (1873-6): *Māğirā-yi 'Aḥb*, *Sabr ü Tḥbāt*, *İlā Kiz*, *Duḥter-i Hindu*, *Nazife*. Between his journey to Europe and his wife's death (1876-85): *Nestere*, *Tārīk yakut Endulius Fātih*, *Sakir*, *Tenar*, *Eğher*, 1885-1908: *Mahber*, *Ölü*, *Hadife*, *Bunlar o dur*, *Divandüsklerim yakut Delale*, *Dir Seffinim Hasbi-i Hāl*, 1908-23: *Zeynab*—written 1887, *İskādan bir ser*, *Ğibn*, *Liberté*, *Wāḥid*, *Turkhān*, *İḥām-i Watan*, *Mektuplar I, II*, *Abdullāh-i Şakir*, *Finlen*—1887, *Tayfār*, *Ğridi*, *Yādigar-i Harp*, *İm-i Māsā*—1887, *Yabandığı dostlar*, *Anlar*, *Kaḥbe* (*Dir Seffinim Hasbi-i Hāl*), *Khābān*. *Heḫ uya* *Heḫ*—first collection of poems, the play *Yūnus* v. 'Aḥb and some letters, as well as the last play, *Kāsinān*. *Wāḥid*, *Amir*, remained unpublished; the memoirs that have appeared in various newspapers have not come out in book form.

Hāmīd's first drama, *Māğirā-yi 'Aḥb*, is a youthful attempt which contains already the romantic elements to be developed later on by him. *Sabr ü Tḥbāt* and *İlā Kiz* are of local inspiration, full of comedy and rich in elements of folklore. Influenced also by his relative Ahmed Wefik Pāshā [q.v.], it was from the circle of Şināid [q.v.] that his personality received its first strong stamp. Hāmīd belongs to the second generation of innovators, the first being that of Şināid. Too young to join the Young Turks around Nāḥik Kemāl [q.v.], he was strongly influenced by the literature of that movement. But although Hāmīd followed Nāḥik Kemāl in his search of the ideal man, his real function may be seen in his achievement of a new Turkish poetry. In a short poem inserted in his play *Duḥter-i Hindu*, Hāmīd changed the long established rhyme scheme, abandoned the conventional poetic themes and images and enlarged the horizon of his poetry by bringing it into direct contact with life. In the collections of poems *Delale* and *Sakir*, partly written in Paris, this revolution is even deeper. In his third collection of poems *Bunlar o dur* he already appears as master of a new and better

literary form and while sometimes still hesitating, finally strikes a happy harmony between thought and language. His works reflect his joy in rediscovering nature, to which he no doubt owes the pantheistic strain of his poetry.

Nowhere, however, can Hâmîd's personality be so clearly perceived as in the poems written on his wife's death: *Mâhber üze, Hâmîd*. Obsession with death, already present in *Gherâm*, is here still more persistent and the problems of human destiny are treated with genuine anguish. The influence of a society which had lost the purity of its peaceful faith in Islam and looked with apprehension at the changing world and the literary influence of Ziya Paşa's two poems *Türkî-i İslâmî* and *Tevfîk-i İslâmî* which Hâmîd had read in his youth with great admiration, contributed to strengthen this feeling of anguish. *Mâhber* is doubtless Hâmîd's masterpiece. Fâtma's image seems never to have been absent from his mind and it is significant that his second wife Nelly, whom he married in England, resembled greatly his dead wife. Hâmîd's poems written in this second period show affinities of thought, if not of vision, with those of V. Hugo, especially with such pieces as *Dies* and *La Fin de Satan*. In the poetry written after his appointment to London, there is less philosophical searching, but the inspiration is of a clearer perfection. For example, his poem "On passing through Hyde Park" is one of the best ever written in Turkish on the subject of nature and freedom. However, 'Abd al-Hâmîd's prohibition of the publishing of his poems in the Istanbul newspapers put an end to this third period of his literary career.

In his preface to *Dükkân-ı Hindu* Hâmîd exposed his preference for the romantic and exotic drama; in other words, in all his plays, even in plays such as *Eğher*, *Nestere* or *Tesir* that seem by their very subject to be nearer to the French classical theatre, he remained faithful to this conception. A despair born of political reasons and of the realization that his plays would never see the stage, make these pieces overloaded with speculation, while the dramatic situation is either absent or lost under the weight of incident. Though a play like *Finten* pretends to be a picture of English life, though the dialogue of Râşid and *Tevfîk* *Gedide* are dealing with the problem of man's destiny, most of the plays are historical. They deal with ancient India, Greece (*Eğher*), Mesopotamia (*Sardânâpâdi*), Turkish history in Central Asia, history of Andalusia. *Eğher*, supposed to be influenced by Racine's *Alexandre* and by Corneille, is an apology of pacifism and patriotism, while *Türkî* is the expression of Nâzım Kemâl's ideology. A peculiar feature of these plays is Hâmîd's endeavour to assign to women her place in life. In *Zeyneb*, in *İsm-i Müslî*, sequel of *Türkî* and in *Finten*, Hâmîd appears as a follower of Shakespeare.

Hâmîd has deeply influenced Turkish poetry. The generations both of *Tebrîz-i Fânîs* and *Fedî-i Ât* were under the impact of Hâmîd, and followed the creative and revolutionary lead which he had given in language and form. He not only employed new metres unknown in Turkish poetry up to his day, but also quantitative verse. He even tried a sort of blank verse. In his drama he came nearer to spoken language. As, however, his works written after 1885 were not published at the time, he had little share in the developments that took place afterwards. His real influence, starting in 1885, can be said to have stopped already in 1905.

(A. HAMDI TANPINAR) Ottoman Sultan, born 5 Rabi'ab 1137/20 March 1725, succeeded his brother Mustafa 8 Zih 1-Ka'dîa 1187/21 January 1774.

'Abd al-Hâmîd succeeded to the throne during a war with Russia, in which financial difficulties, rebellions in various provinces, and the weakness caused by ill success made the situation hopeless. An absolute necessity for Turkey. At the same time Russia also had been placed by the Pugachev revolt in a position to welcome peace. The new Sultan, however, was unwilling to end the war without some kind of victory, and the Porte accordingly refused to accept the Russian proposals for peace talks; hostilities were renewed, and the Turkish army was defeated at Kozuljiz. The road spread to the headquarters at Şumla of the Grand Vizier Muhsin-zâde Mehmed Pâşâ, who was forced to sue for peace from the Russian commander Rumjancev.

The treaty by which the war was terminated, and which was dictated by the Russians, was signed on 12 Dju'mâdî I, 1188/21 July 1774 at Kuçuk Kaynardje (g.a.), and is known by the name of that town. By its terms the Crimea was to become an independent state; and Russia obtained the fortresses on the coast of the Sea of Azov (Azâk), the lands of Lesser and Greater Kabartay, the area between the rivers Dniepr and Bug, freedom of navigation in the Black Sea, and the right to pass merchant ships through the Straits. Its most dangerous feature for Turkey was the wording of some of its clauses. It gave Russia a way to claim the right to protect Turkish subjects belonging to the Orthodox church; in return, however, Russia recognized a somewhat vaguely stated claim by the Sultan, as *ghalib*, to religious authority over all Muslims. After this treaty Austria too took advantage of the weakness of Turkey and annexed Bukovina, hitherto part of the principality of Moldavia (1775).

In 1774 war broke out also between Turkey and Persia, following a Persian invasion of Kurdistan. Ottoman forces were despatched to Baghdad in 1175, with the object of putting an end to the rule of the Manlikûs, but the Porte was forced to recognize their administration, and in the following year Barra fell to the Persians. In 1779 a war was evoked in consequence of internal disturbances in Persia, and reoccupied by the manlikû Sulaymân Aghâ, who was then granted the three paghalls of al-'Irâk (1180).

The peace of Kuçuk Kaynardje proved to be no more than an armistice between Turkey and Russia. Catherine II continued to aim at the annexation of the Crimea, whereas the Turks were trying to bring the principality back to its former status. For this reason the Crimea became an area of conflict and of Russian intervention under various forms; and

in addition, the clauses concerning the Straits and the Orthodox Christians in Turkey were subjects of contention between the two countries. Although it seemed at one time that war was imminent over the Crimean question, the terms relating to the Crimea in the treaty of Kuçuk Kaynardje were interpreted and reaffirmed by a Convention, in which Russia acted as mediator, signed at Istanbul in the pavilion of Ayvân-Kawân on 13 March 1779.

Nevertheless, Catherine II, after forming an alliance against Turkey with Joseph II (who had succeeded Maria Theresa on the throne of Austria), stirred up a revolt in the Crimea against the Khân Şâhin Girây, and on this pretext sent an army to the Crimea and annexed it to Russia. 'Abd al-Hâmîd I, though deeply mortified by this action, could not, being aware of the weakness of his empire, envisage going to war. When, however, the Czarina began to form far-reaching schemes for the setting up of a Greek state with her grandson Constantine Pavlovich at its head, the Porte could no longer tolerate the menacing demonstrations against Turkey provoked by her and her ally Joseph II.

In spite of the Sultan's love of peace, war was declared against Russia and Austria by the Grand Vizier Kodja Yûsuf Paşa (1787), when a request for the return of the Crimea was rejected, and Sweden subsequently joined in on the side of Turkey. An attack by the Turkish fleet in the direction of Kibruş was unsuccessful, and the Russians laid siege to Özakov. The Turkish army, however, attached more importance to the Austrian campaign and after twice defeating, at Vidin and Slatin, the Austrian armies which had taken the offensive along the Danube, invaded the Banat. On the other hand, the Turkish fleet failed in its attempt to relieve Özakov, and after a long resistance the fortress fell and its population was put to the sword. 'Abd al-Hâmîd, whose health was already undermined by the worries of the war, died of a stroke on reading the news, 12 Rabi'ab 1203/7 April 1789.

Although 'Abd al-Hâmîd I, who succeeded to the throne at an advanced age after spending most of his life in the seclusion of the palace, cannot be considered an energetic and successful sovereign, he is noted for his piety, his humanity, and his benevolence. He gave wide powers, for that time, to his Grand Viziers and left them free in their conduct of affairs, and he endeavoured to strengthen the central government against rebel forces within the empire; e.g. he sent a punitive expedition under Djezâ'irî Hasan Paşa against Zâhir al-'Umar, who had acquired great influence in Syria, and against the rebellious Manlikûs in Egypt. It may be observed that whereas during his reign the Porte followed a special policy towards Caucasus by trying to civilize the Circassian tribes and to attach them to Turkey and, in order to further this object, developed Soğudjuk and Anapa, the Russians, in opposition to this policy, supported the Georgians.

The last important act of the Grand Vizier of 'Abd al-Hâmîd I was Khâlîl Sulaymân Paşa, who was a supporter of reforms and, in order to put them into effect, tried to dethrone the old Sultan and to put the young prince Selim (afterwards Selim III) in his place. During the tenure of office of this enlightened Grand Vizier, who paid for his attempt with his life, the corps of Cannoniers, Bombardiers and Miners were reorganized.

The opening of the Imperial Naval Engineering School (*Mühendishâne-yi bahri-yi humâiyun*), for the education of trained officers, and the reopening

of Ibrahim Muterrikka's (g.a.) printing house, which had been allowed to fall into disuse, are among the achievements of 'Abd al-Hâmîd I. He also founded the Beylerbeyi and Mîrân mosques on the Bosphorus, as well as a number of benefactions such as libraries, schools, soup-kitchens, and fountains.

'ABD AL-HAMÎD II (GEMAL) (AMURATAMPA) 35th Ottoman Sultan, fifth child of thirty of 'Abd al-Majîd (Abdülmejid) (g.a.), born Wednesday, 21 September 1842. He is traditionally represented as a reserved child, easily offended, and, in spite of his keen intelligence, not given to study. It is said that, after a stormy youth, he led a thrifty family life in the palace, which earned him the undeserved nickname 'Pîntî Hâmîd', Hamid the Skinfint, taken from a comedy by Kaşşâb. He early showed a great liking for the company of devout persons (Pertew-niyâ, a distortion of Pertew-nihâl, *wâide sultân* of 'Abd al-'Azîz) and for mystics, soothsayers, and wonder-workers (the *şâyih* 'Abd al-Rahmân al-Sûdî of Sayda, prototype of the astrologer Abu'l-Hudâ, who later exerted so great an influence on 'A.).

On 1 September 1876 he succeeded his brother Murâd V, who had been deposed, with the support of the Young Turks, whose leader, the celebrated Midhat (Mithat) Paşa (g.a.), was a former grand vizier of Sultan 'Abd al-'Azîz. The Porte was then engaged in victorious war with Milan, prince of Serbia and Nihilist ruler of Montenegro. The put stop to the intervention of the powers, in agreement with Midhat, initiated an international conference at Istanbul, and on the very day of its opening (23 December 1876) a *khâtt-i humâiyun* promulgated the first Constitution or *hikmân-ı kanunî* *esâsî*, a 'fundamental Law' instituting a two-Chamber parliamentary system. This Parliament, summoned to meet on 27 March 1877, and presided over by the famous Ahmed Vefik Paşa (g.a.), was prorogued *sine die* on 13 February 1878 (actually for a period of thirty years).

In the course of his reign Turkey had to wage two wars, one with Russia (1877-8), the other with Greece (18 April-5 June 1897); finally the inextricable Macedonian imbroglio, in which the most varied races were bitterly engaged, led to interventions by the Concert of Europe which precipitated the Young Turk revolution. On 3 July 1908 the vice-major (*kol-aghân*) Niyâzi Bey took to the mountains at Resna and seized Monastir. On the 23rd, the major (*bin-bâgî*) Enver Bey, former military attaché in Berlin, rose in revolt at Salonika. The Sultan and Minors were reorganized. The Constituent Assembly, which had never disappeared from the official Year-book (*sul-nâme*), was simply revived on 24 July (which was later kept as a national holiday). After

the coup de force carried out by the reactionaries and by troops roused to fanaticism, on 13 April 1909, the 3rd army corps of Macedonia, commanded by Marshal Mahmud Şhewket, which had for that occasion become an "investing" or "marching" army (*haraket ordusu*), brought back the fugitive Young Turks and the Constitution to Istanbul (24 April).

'Abd al-Hamid was deposed by a decision (*hukm-nâme*) of the two Chambers, meeting as a National Assembly on 28 April 1909, based on a *fatwa* of the same day, a document in which appeared in particular the strange imputation that he had "forbidden and burnt the books of the religious Law". The brother of 'Abd al-Hamid, Muhammad (Mehmet) Reşid, succeeded him as Muhammad V.

'Abd al-Hamid was exiled to Salonika. When the Balkan war broke out, in 1912, he was moved to the palace of Beylerbeyi (on the Bosphorus). He died there of pneumonia, on Sunday, 10 February 1918, at the age of 75, and was buried in the *turbe* of his grandfather, Mahmud II.

The two salient points of Abd al-Hamid's political system were absolutism and Panislamism.

1) Absolutism (*sûbûdîlik*).—Although their power was unlimited, 'Abd al-Hamid's predecessors interfered relatively little in the affairs of government. They usually left it to the administrative representative, the grand vizier (*Sadr-ı A'zam*), who was regarded as their *velî-i muâlef* (in the term which has sometimes been translated as 'vicar absolute'). The government was "the (Sublime) Porte" of the grand vizier. 'Abd al-Hamid wished to create an instrument of domination carrying even closer personal control, and he gave great importance to "the Palace" or "the Court". In Turkish, this was termed the *Mabeynîs*, an Arabic term which means literally "that (which is) between (the private apartments and the Porte)". It was a separate building (within the precincts of Yıldız), and contained the offices of the chamberlains (*mabeynîdâr*) and of the rapporteurs or referendaries (*âmîdgi* or *îmîdî*). Hence the power of the first secretary of the *Mabeynîs* (of the sultan, in actual fact)—Tahsin Paşa, for instance—or of a second secretary such as İzzet 'Alâ, a Syrian who was the object of public execration. The palace of Yıldız, usually shortened to Yıldız (*q.v.*), with its harem and its administrative departments, became a sort of town with several thousand residents—a town half shrouded in secrecy, which long haunted and terrified people's imaginations, often without cause.

This system, carried on at a time when there existed a strong revolutionary ferment, was not calculated to discourage conspiracies, and it was only by miraculous good fortune that 'Abd al-Hamid escaped an Armenian bomb in 1905. This only intensified the fear and suspicion which dominated all his life. He encouraged informing and espionage, which developed into an increasingly complex network. The name *shafîyye*, which means literally "secret (police)" finally came to include the whole range of informers and spies, from the highest social levels to the lowest. Written denunciations were known as *ghurnal*, from an expression borrowed formerly from Muhammad 'Alî of Egypt, and which meant originally "daily administrative report".

The severity of the censorship reached a degree of ineptitude that seems incredible, but is proved by authentic documents. The censor struck out words like *satan*, "fatherland", because it was a conception that implied rivalry to dynasty and religion, and

other words, such as liberty, explosion, bomb, regicide, murder, plot, etc.

2) Panislamism.—'Abd al-Hamid had a deep sense of the importance of his role (which was, however, debatable) of *halîfa*, by virtue of which he was protector of the religion of Islam (art. 3 of the Constitution of 1876). He greatly esteemed Djamâl al-dîn al-Afghânî (*q.v.*), who had led out to him the bright prospect of bringing the *shî'ites* themselves back into the bosom of Sunnism. This sterile and even dangerous policy was largely based on the illusion that he could count on the loyalty of the Arabs, his spoilt children.

Strangely enough, the Turcolotist Arminius Vambéry, a Hungarian Jew who was on terms of friendship with 'Abd al-Hamid, encouraged him in these tendencies. They had one useful result at least, in that they prompted 'Abd al-Hamid to build the Hijâz railway to the holy places of Islam. This undertaking, which had also strategic value because of the frequent troubles in the Yaman, and in which 'Abd al-Hamid was justly proud, was paid for by collections made exclusively among Muslims, and by the revenue from the "Hijâz-stamp". The railway was begun on 1 September 1900, on the 25th anniversary of the Sultan's accession. It was also the indirect cause of the Anglo-Turkish dispute over Tabat and the Gulf of 'Akaba, in which England appeared for the first time (1906) as the official defender of Egyptian interests. The line reached Medina in 1908.

Another manifestation of Panislamism was less successful. This was the sending to Japan of the screw training ship *Ertogul*, a wooden vessel that went down within sight of the Japanese coast (25 September 1890).

The European press and caricaturists accused 'Abd al-Hamid of blind fanaticism, and branded him with the name of 'Red Sultan' because of the role attributed to him in the suppression of revolts or of bloody conflicts in Macedonia and Crete, and especially Armenia (risings in 1894 and 1895, raid on the Ottoman Bank in 1896). The least that can be said, indeed, is that he did little or nothing to prevent horrible massacres (just as he did nothing to prevent extortion). On the other hand, the atrocities had begun before his time, and did not stop after his disappearance. The Turkish population, fanatical for these occasions, was not the only one to take part. There were also other Muslims: the Circassian immigrants from the Caucasus, and the Kurds.

It would be unjust to judge 'Abd al-Hamid, who has so often been accused of obscurantism, without giving him credit for all the institutions established during his reign.

Physically, 'Abd al-Hamid had regular features, an aquiline nose and lightcoloured eyes, but as he grew older his appearance became that of a bent and hunched old man. He had a loud, deep voice, and knew how to be agreeable. In his dress he was quiet, very simple, and distinguished. He was a man of contrasts. Very approachable, unlike most of the Ottoman sultans, he was given to sudden fits of anger, which were, however, quickly suppressed. Authoritarian to the point of despotism, very intelligent, and possessed of an excellent memory, he had an exceptional capacity for work, and liked to deal with all affairs himself—a paralysing trait in the head of a State.

**Bibliography:** Works, in alphabetical order of authors, which, without being general histories

of Turkey, are devoted entirely or in part to 'Abd al-Hamid. (No sultan has elicited in Europe so many studies, for the most part tendentious).

'Abd al-Rahmân Sherif and Ahmed Refik, *Sultan 'A. 'Abdîye dâ'ir* (deposing; burial), Istanbul 1918; 'Ali Tayyar Mihabî Bey, *Mihabî-Pasha, ta sen o'zbek* (chap. vi), Paris 1908 (Turkish version, Cairo 1322/1906); idem, *Hatıralarım* 1872-1946, Istanbul 1946, 194-216; 'Ali Nouri, *Unter dem Scepter des Sultans*, Berlin 1908; Ali Vahbi Bey, *Fenâles et souvenirs de l'ex-sultan 'A.*, Paris, n.d.; P. The numerous articles in periodicals are not given. (J. DESVY)

'ABD AL-HAMID b. YAHYÂ b. SA'b, the founder of Arabic epistolary style, *mauallâ* of the Kurâşî clan of 'Amîr b. Lu'ayy. He was probably a native of al-Anhâr, and is said to have been a travelling pedagogue before he was employed in the Umayyad secretariat under Hishâm's chief secretary, the *mauallâ* Sâlim; he was then attached to Marwân b. Muhammad, whom he continued to serve as chief secretary after Marwân's accession to the Caliphate. He refused to desert his master in misfortune and is generally said to have shared his fate at Bâṣir on 26 Dhû'l-Hijja 121/5 August 739. According to another account he took refuge in the house of his disciple Ibn al-Mukaffa, but was traced and seized. His descendants continued to live in Egypt under the name of Banu 'l-Muhâjjir and furnished secretaries to Ahmad b. Tulûn.

The surviving compositions of 'Abd al-Hamid, comprising six formal *rasâ'id* and a few chancery pieces and private letters, exhibit a remarkable divergence of styles. His most elaborate *rasîda*, a long epistle addressed to Marwân's son and heir 'Abd Allâh, with advice on personal conduct, ceremonial, and the conduct of war, is composed in a language and style based on the idioms, rhythms, and vivid metaphors of Arabic poetry and rhetoric, but elaborated by the addition of often lengthy sequences of qualifying clauses. Since the same style appears in most of his other official *rasâ'id*, it can only be conjectured (in the absence of earlier secretarial documents) that this feature—unusual in both earlier and later Arabic style—is to be traced to Greek influences in the Umayyad secretariat.

His most famous *risāla*, on the other hand, that addressed to the Secretaries (*kuttāb*), setting forth the dignity of their office and their responsibilities, is fluent, simple and straightforward. A comparison of its contents with the writings of Ibn al-Mukaffā and later quotations from Persian works shows clearly that it is inspired by the tradition of the Sāsānid secretariat, and largely reproduces with an Islamic gloss the maxims of the Iranian *dihkāt* (see A. Christensen, *L'Iran sous les Sāsānides*, Copenhagen, 1944, 132 ff.). Also of Persian inspiration, and quite distinct from the traditional Arabic presentation of the subject, is his *risāla* describing the incidents of a hunt, evidently written for the entertainment of the court. A large proportion of the maxims addressed to the prince in the first *risāla* mentioned above are also derived from Sāsānid court ceremonial and usages, although the military instructions are more probably influenced by Greek tactics, either through literary channels or from actual experience in the Byzantine wars.

It would appear, therefore, that both views expressed by later Arabic critics in regard to 'Abd al-Hamid are justified, in spite of their apparent incompatibility. On the one hand is the statement (e.g. al-As'kari, *Diwān al-Ma'dūd*, ii, 89) that 'Abd al-Hamid extracted from the Persian tongue the modes of secretarial composition which he illustrated, and transposed them into the Arabic language. On the other hand there is the description of him (e.g. Ibn 'Abd Rabbih, *al-'Ihd al-Farīd*, ii, 169 (1121) = iv, 195 (1944/1963)) as having been "the first to open up the buds of rhetoric, to smooth out its ways, and to loosen poetry from its bonds". He was also a master of pithy epigram, several examples of which are recorded in the *asāb* works.

'ABD AL-HAMID LĀHAWRĪ, Indo-Persian historian, died 1065/1654-5, author of the *Pañjshāh-nāma*, an official history of the Indian sultan Shāh Jihān. The work is composed of three parts, each containing the history of one decade. Only the first two parts, comprising the years 1037-1057, were written by 'Abd al-Hamid; the last part was arranged by his pupil Muhammad Wazīrī. Parts I and II were published in the *Bibliotheca Indica*, 1866-72.

**Bibliography:** Elliot and Dowson, *History of India*, vii, 25; Storey, ii, fasc. 3, 57-2.

'ABD AL-HAYY, AMR 'L-HASANAT MUHAMMAD, the son of Mawlawi 'Abd al-Hallam, an Indian theologian of the Hanafi school, associated with the famous seminary of Farangi Mahall, Lucknow, was born at Bānda in Bundelkhand in 1264/1848. He studied with his father and another scholar till the age of seventeen, when he began to assist his father as a teacher. He twice made the pilgrimage to Mecca, where he met the Mufti Ahmad b. Zaynī Dāhūdī (d. r.), from whom he obtained *ijāza* for a large number of works. He wrote glosses and annotations on a large number of text-books current

in the Indian madrasas, besides numerous works chiefly on religious and legal topics, mentioned by himself in his *al-Nāfi' al-Kābir* and in his introduction to his edition of al-Shaybānī's recension of the *Muwatā'* (Delhi 1907, 27-9). As a work of general interest and utility, special mention is due to his *al-Fawā'id al-Bahā'iyya fi Tarāḡim al-Hanāliyya* (Delhi 1293; Cairo 1324), which is an abridgement, with additional biographical notices, of Mahmūd b. Sulaymān al-Kaffawī's *Katāib 'A'ālam al-Ākharī*. He was a distinguished and influential teacher, whose lectures were attended by a large number of students, who achieved the grades of teachers and scholars in their own turn. One of his pupils, Mawlawī Hafiz Allāh wrote his biography under the title of *Kans al-Barāhāt*. He died at Lucknow in 1304/1886.

**Bibliography:** Rahmān 'Alī, *Taqhīrāt 'Ulamā'* (Hind in Persian, Lucknow 1944 and 1941), 114-7; Zuhād Ahmad, *Contributions to India in Arabic Literature* (Jullundur 1946), 114, 186; Sarkis, *Dictionnaire de bibliographie Arabe* (Cairo 1928), col. 1395-7; Brockelmann, S. II, 857-78 (where works nos. 18 and 19 are wrongly ascribed to the subject of this article).

(S. INAYATULLAH)

'ABD AL-KĀDIR b. GHAYYĪ AL-HAYAT AL-MARĠĠĠ, the greatest of the Persian poets (writers) in Arabic music, died at Marḡā, about the middle of the 8th/14th century, he had become one of the minstrels of al-Buḥayrī, the Ljālā'īd Sultan of Irāk, about 781/1379. Under the next Sultan, Ahmad, he was appointed the chief court minstrel, a post which he held until Timur captured Baghdad in 793/1393, when he was transported to Samarkand, the capital of the conqueror. In 801/1399 we find him at Tabriz in the service of Timur's wayward son Mirānshāh, for whose erratic conduct his "boon companions" were blamed. Timur acted swiftly with the sword, but 'Abd al-Kādir, being forewarned, escaped to Sultan Ahmad at Baghdad, although he once more fell into Timur's hands when the latter re-entered Baghdad in 803/1400. Taken back to Samarkand, he became one of the four brilliant men who shed lustre on the court of Shāhrukh. In 824/1421, having written a music treatise for the Turkish Sultan Murād II, he set out for the Ottoman court to present it in person in 826/1423. Later he returned to Samarkand, dying at Harāt in 838/March 1435.

Of the fame of 'Abd al-Kādir in his day, and since, there can be little doubt. Mu'īn al-Dīn Jidī, the author of the *Rasā'id al-Diyārāt*, eulogizes him for his threefold talents as musician, poet, and painter, but it was more especially for his skill in music that he was called "the glory of the past age". In addition to being a deft performer on the late (*ūd*) and a prolific composer (*ṭarīf*), he excelled as a music theorist. His most important treatise on this subject is the *Diwān al-Kādir* ("Encyclopaedia of Music"), autographs of which are preserved at the Bodleian Library and the Nūru 'Ōghmāniyya Library, Istanbul. The first of these, written in 808/1405 for his son Nūr al-Dīn 'Abd al-Rahmān, was revised by the author in 816/1413. The second, dated 818/1415, carries a dedication to Sultan Shāhrukh. Several abridgments of this work by the author also exist, notably a shorter one, an autograph, without title, dated 821/1417, which is at the Bodleian. It was written, evidently, for Bāyquṣluḡ. A longer version in the same library, called the *Mahāsid al-Akḥās* ("Purports of Music"), written about 834-7/1427-3, was dedicated to the Turkish Sultan Murād II,

according to the Leiden copy. A third treatise on music, the *Kanz al-Tuhaf* ("Treasury of Music"), which contained the author's notated compositions, has not survived. His last work, the *Sharḥ al-Adwār* ("Commentary on the *Kitāb al-'Adwār*" [of Sāfi al-Dīn]), is to be found in the Nūru 'Ōghmāniyya Library. At Leiden there is a short *Kitāb al-Adwār* in Turkish bearing his name. These works are of great importance in the history of Persian, Arabian, and Turkish music. Although only a few of his musical compositions have survived in the *Diwān*, many have been handed down *sine nota* in a form known in Turkish as the *Kār*.

A son, 'Abd al-'Azīz, who is thought to have settled at the Ottoman court after 1435, was the author of a music treatise, the *Nahā'id al-Adwār* ("The Select of the Modes"), dedicated to the Turkish Sultan Muhammad II (d. 886/1481), whilst a grandson, Mahmūd, who lived under Bāyazīd II (d. 918/1512), compiled a *Mahāsid al-Adwār* ("Purports of the Modes"), both mss. being at the Nūru 'Ōghmāniyya Library.

FARMER)

'ABD AL-KĀDIR b. MUHYI AL-DIN AL-HASANĪ, the Amir 'Abd al-Kādir, descended from a family which originated in the Rif and settled in Algeria among the Hilālites, was born in 1223/1808 at the gulf of the Wādī al-Hammām, some twenty kilometres west of Mascara. Studies at Arzew, then at Oran, marriage, and a pilgrimage to Mecca in 1244/1828-9 were the most outstanding events in a youth that was devoted to the reading of sacred books and to physical exercises, under the direction of his father, who, by his piety and charity, had acquired a great influence.

The indication shown by the French after the capture of Algiers (5 July 1830) in the organization of their conquest favoured Muhyi al-Dīn in Orania, and he took the initiative in the struggle against the Christians, but soon yielded first place to his son, who was proclaimed Sultan of the Arabs on 5 Rajab 1242/22 November 1829 by the Hilālites, the Banū 'Amir, and the Ghāribā. In spite of the opposition of certain elements of the population and the failure of his supporters before Oran and Mostaganem (1833), 'Abd al-Kādir's action prevented the pacification of the country. This state of affairs prompted General Desmichels to treat with his adversary (4 and 26 February 1834). Thus after the recognition of the new Amir of the Faithful extended his authority to the gates of Algiers (April 1835), but his claims provoked the renewal of hostilities. First Claudel and then Bugeaud avenged the defeat on the Macta (28 June) by burning Mascara (6 December), occupy-

ing Tlemcen (13 January 1836), and winning a great victory on the Wādī Sikkak (6 July); but these successes were fruitless. Three times abandoned by his troops, 'Abd al-Kādir immediately regrouped them. The position of the French remained precarious, with their towns invested, their columns ceaselessly harassed, and their allies receiving heavy punishment. The desire to be secured against attacks in the west while an expedition against Constantine was being carried out led Louis-Philippe's government to negotiate. By the signature of the treaty of the Tafna (30 May 1837) Bugeaud repeated, in even more formal language, the mistake made by Desmichels. Though the French kept Oran, Arzew, Mostaganem, Bida, and Kolea, the Amir obtained the whole province of Oran, part of that of Algiers, as well as the whole baylīk of Titteri.

From June 1837 to November 1839 'Abd al-Kādir used the cessation of hostilities to organize the territories that had been handed over to him. After establishing his capital at Tagdempt, he travelled about his new state, imposing chiefs, by force if necessary, on all the tribes between Morocco in the west and Kabylia in the east, and gaining recognition for his domination as far as the Sahara.

In the course of these journeys 'Abd al-Kādir, taking advantage of the faulty wording of the Treaty of the Tafna, had gone beyond the boundaries that had been assigned to him; Marshal Valde therefore submitted to him a draft of an additional treaty which accurately indicated, and reduced, the territories over which France recognized his rights, but he refused to ratify it. The 'Iron Gates' expedition, in the course of which the Duke of Orleans linked Constantine to Algiers, provided the Amir with a pretext for restarting the war. On 20 November 1839 his forces invaded the Mitidja, sacking farms and massacring settlers. Algiers was threatened. The occupation of Miliana, then of Medea (May-June 1840) by the French did not ease their difficulties, for the supplying of their garrisons made necessary the movement of convoys which were exposed to continual attack.

The nomination of Bugeaud as governor-general (29 December 1840) changed the course of events; he realized that Algeria would never be pacified until the power of 'Abd al-Kādir was crushed and until the tactics of 'active columns' took the place of 'limited occupation'. Between 1841 and 1843 he seized the towns of Tagdempt, Mascara, Boghar, Taza, Saida, Tlemcen, Sedou and Nedroma, and sent out expeditions with instructions to capture his enemy and destroy his supporters. The capture of the *emala* (16 May 1843), the travelling capital of the Amir, was a serious blow to him. The tribes submitted to France. Hunted and weakened, 'Abd al-Kādir took refuge at the end of the year on the borders of Morocco, to obtain shelter, to recruit soldiers, and to compromise French relations with that empire. His hopes were not deceived. The occupation of Lalla Maghnia by la Moricière stirred up a conflict, but the bombardment of Tangier and Mogador (6 and 15 August 1844) and the victory of the lily (14 August) compelled the Sultan Mawlay 'Abd al-Rahmān to refuse his guest any support and to declare him an outlaw. 'Abd al-Kādir appeared again in Algeria in 1846 to take the lead in the insurrections which were breaking out on all sides. His first successes (Sidi-Brachin, 23 September) seemed to promise final triumph for his cause. No less than eighteen columns were needed to stem the revolt and to throw the Amir back into Morocco

collections *al-Faṭḥ al-Rabbānī* (62 sermons; Cairo 1302) and *Fuṭūḥ al-Ḍiḡayy* (78 sermons; on the margin of al-Shattānawī) 'Abd al-Kādir often directs the attention of his audience to the perfect saint. Yet both the contents and the style show that the sermons were not addressed to exclusive *ṣūfī* circles. The plain manner, avoiding *ṣūfī* terminology, and the often very simple moral admonishment suggest that they were delivered before a large audience. Before men, who experience the power of fate as a permanent threat, he sets the ideal figure of man: the saint, who has overcome his accidental self and reached his essential being, conquering the fear of fate and death, because he participates in Him who orders fate and death. *Sūfism* as taught by the Hanbalite 'Abd al-Kādir consists in fighting, in a *ḡhayb* greater than the holy war fought with weapons, against self-will; in thus conquering the hidden *ḡhayb*, i.e. the idolatry of self and, in general, of creaturely things; in recognising in all good and evil the will of God and living, in submission to His will, according to His law.

Al-Shattānawī's work on 'Abd al-Kādir, *Bahāḡat al-Aṣṣar*, from which several other writers derived their information, was written just over a hundred years after 'Abd al-Kādir's death. His account, rejected as untrustworthy already by al-Dhahabī [*JRAS*, 1907, 267 ff.], presents him as the supreme saint. He is not described according to the ideal of the saint conceived by 'Abd al-Kādir himself. He is not a man who serves as a symbol for cosmic resignation, whose example can be followed by resigning this and the next world, by accepting in both of them the lot given by God. The figure of 'Abd al-Kādir as a saint, as it is drawn by al-Shattānawī, is the outcome of a piety which relinquished the hope of being able to put the ideal into practice.

According to the legend, 'Abd al-Kādir himself, by the sentence which remained closely associated with his name: "My foot is on the neck of every saint of God", laid claim to the highest rank and obtained the consent of all the saints of the epoch. A poem ascribed to him, *al-Kayḍ al-Ḥawāṭimīyā*, speaks, in a style that is very different from that of his authentic writings, of his mystery that has the power to extinguish fire, raise the dead, crush mountains, dry up seas, and of the exaltedness of his position. In the 'Abd al-Kādir of legend, the inconceivable, incomprehensible majesty of God has become manifest. From his earliest childhood, when he marked the beginning of the fast by refusing the breast of his mother, his life is a chain of miracles. His appearance, his knowledge and his power are all miraculous. He punishes distant sinners and assists the oppressed in a miraculous manner, walks upon water and moves through air. Nothing is impossible for him. Angels and *ḡinnas*, "people of the hidden world", and even Muḥammad himself, appear at his meeting and express their appreciation. When Ibn al-Dīḡawī recommends his hearers to confine themselves to the study of the religious sources and the literature dealing with them, but to read also edifying books, he does so because he realises the danger of legalistic intellectualism. The sober Hanbalite, who "fought with passion against passion", had, however, in mind the biographies of the pious and exemplary people of the past. The literature about 'Abd al-Kādir does not describe a man who can be an example to other men. The subject of their description is the concrete presence of the Divine with its inconceivable and miraculous quality. In a situation in which it seemed that the

claims of religion could not be complied with, the saint was experienced as the presentality of that which was unattainable to human effort. The saint does not make demands, but bestows grace for men who worship the inconceivable. In this capacity, 'Abd al-Kādir became one of the best known mediators in Islam. His tomb, over which sultan Sulaymān had a beautiful *turba* built in 947/1535, has remained to the present day one of the most frequented sanctuaries of Islam in Baghdad.

**Bibliography:** The collection of legends by al-Shattānawī was used among others by Muḥ. b. Yahyā al-Tāḡaffī, *Kalā'id al-Dīḡawīyāt*, Cairo 1331. Other works by 'Abd al-Kādir and on him, Brockelmann, I, 506, S. I, 777; Carré de Vaux, *Gazali*, Paris 1902 (European bibliography); D. S. Margolouth, *Contributions to the biography of 'Abd al-Kādir* (after al-Dhahabī), *JRAS*, 1907, 267-310; W. Braune, *Die Fuṭūḥ al-Ghayb des 'Abd al-Kādir*, Berlin 1933; G. W. J. Drewes and Poerbatjaraka, *De mirakelen van Abdolkadir Djalanī*, Bandoeng 1938; *Fuṭūḥ al-Ḍiḡayy*, English transl. by Aḥmad al-Dīn Aḥmad (with critical introduction), Lahore, n. d.

'ABD AL-KĀDIR b. 'ALĪ b. 'YUSUF AL-FĀSĪ, the most famous representative of the Moroccan family of the Fāsīyyūn, b. in al-Kaṣr al-Kabīr 1077/1599, d. 1091/1680. He was the head of the *ṣūfiyā* of the Shādhiliyya in al-Kaṣr al-Kabīr. He wrote a *fatḥ* and some books on *ḥadīth*, but he is best known as one of the main representatives of Moroccan *ṣūfiyā* at the beginning of the 17th century. His descendants form today a very numerous and important branch of the religious and scholarly aristocracy of Fez (the inhabitants of the town being called, in order to avoid a confusion with the family of the Fāsīyyūn, *ahl Fās*).

**Bibliography:** E. Lévi-Provençal, *Hist. Choria*, 264-5 (with references). [E. LÉVI-PROVENÇAL]. 'ABD AL-KĀDIR AL-KURASHĪ, MUḤYI AL-DĪN 'ABD AL-KĀDIR b. MUḤAMMAD b. MUḤAMMAD b. NĀṢIR ALLĀH b. SULTĀN b. AḤM. 'L-NĀṢIRĪ, Egyptian professor of Hanafite jurisprudence and biographer, born Sha'bān 696/May-June 1297, died 7 Rabī' I 775/27 August 1373.

He is best known for his collection of alphabetically arranged brief biographies of Hanalites, *al-Dīḡawīyāt al-Mudīyā fī Tabāḥit al-Hanāfiyya* (Haydarābād 1334/1913-4), a valuable reference work, generally considered to be the first to deal with its particular subject. Written in a country in which the Hanafite school was weakly represented, and in a period just preceding its renaissance, the work has little firsthand information but preserves much material, especially from Persian local histories.

In addition, 'Abd al-Kādir wrote a biography of Abū Hanīfa (*al-Bustān fī Maṣābiḥ Imāmīn al-Nāṣiriya*, used in *Dīḡawī*, I, p. 25 ff.) and a collection of biographies of persons who died between 696/1297 and 760/1359. His other publications (most complete lists in Ibn Kutlūbughā ed. Flügel, p. 28, and Ibn Tūlūn) belong to the ordinary run of juridical textbooks, commentaries, and indexes.

**Bibliography:** Brockelmann, II, 96 f., 511, 59. Additional biographies in Ibn Ḥadīra, *Tuhfat*, anno 775; Ibn Tūlūn, *Ghannā* (nos. Shafūd '541 1924, fol. 149b-149c); Ibn al-Ḥindī, *Shāḡḡharāt*, vi, 238. References to his life and activities in *Dīḡawī*, for instance: I, 21, 93 f., 292, 304, 323, 346, 353, 367; II, 121, 127, 187, 204, 229 f., 228, 231 f., 440, 444, 445 f. (F. ROSENTHAL).

'ABD AL-KARIM BUKHĀRĪ, a Persian historian, wrote in 1232/1818 a short summary of the geographical relations of Central Asiatic countries (Afghānistān, Bulghārā, Khijwā, Khokand, Tibet and Kashghar), and of historical events in those countries from 1160 (accession of Ahmad Shāh Durrānī) down to his own times. 'Abd al-Karīm had already left his native country in 1222/1808 and accompanied an embassy to Constantinople; he remained there till his death, which took place after 1246/1830, and wrote his book for the master of ceremonies 'Arif Bey. The only manuscript was obtained by Ch. Schefer from 'Arif Bey's estate and published in the *PELOV* (the text was printed in Békák, 1200/1873-4, the French translation in Paris in 1876). The *Histoire de l'Asie Centrale* is a most important authority for the recent history of Central Asia, especially for Bulghārā, Khijwā and Khokand. (W. BARTHOLO).

'ABD AL-KARIM, KUTB AL-DĪN b. ISRĀ'IL AL-DĪLĪ, a Muslim mystic, descendant of the famous *shīfī* 'Abd al-Kādir al-Dīlānī, was born in 767/1365 and died about 832/1428. Little is known of his life, as the biographical works do not mention him. According to some of his own statements in *al-Insān al-Kāmil*, he lived from 796/1393 until 805/1402-3 in Zabīd in Yaman together with his *shaykh* Shāra' al-Dīn Ismā'īl al-Djābarī. In 790/1387 he was in India. He wrote about thirty books and treatises, of which *al-Insān al-Kāmil fī Ma'rāfat al-Dawāḥir* wa 'l-Adwā' is the best known (several editions printed in Cairo). An analysis of it has been given by R. A. Nicholson: *The Perfect Man (Studies in Islamic Mysticism)*, Cambridge 1921, Ch. II. Al-Dīlī is an adherent of the well-known pantheistic mystic Ibn 'Arabī, to whose *Futūḥāt* he wrote a commentary and whose doctrines he developed and modified. According to his ontological doctrine exposed in his *al-Insān al-Kāmil* and his *Marāḥib al-Wudūd*, nothing really exists but the Divine Essence with its creative (*khāliq*) and creaturely (*ḥāḍir*) modes of being. Absolute Being develops in a scale (*marāḥib*) of individualisations or "descents" (*tanazzulāt*). The most important of these are the following: *ʿamā*, the simple hidden pure Essence before its manifestation (*taḡayyūl*); *ahādīyya*, the first descent from the darkness of *ʿamā* to the light; the manifestation, the first manifestation of Pure Essence (*ḥāḍir*) exclusive of Divine attributes, qualities or relations; *shubūhiyya*, the manifestation of the Essence with the attributes and qualities and their effects under the aspect of unity. It is plurality in unity. On this scale there is no distinction between the attributes, they are identical with each other and with the One. Opposites coincide—Mercy and Vengeance are the same. *Ilāhiyya* is higher than the above-mentioned manifestations. It comprehends both Being and Non-being in all degrees, the "places of manifestation and the manifested" (*al-maḥāḍir wa 'l-maḥāḍir*), i.e. the Creator and the Creature (*al-ḥāḍir wa 'l-ḥāḍir*). At the same time it is the principle of order for the whole series of individualisations and maintains each of them in its proper place. All opposites exhibit their relativity in the greatest possible perfection, they do not coincide any longer. *Rahmāniyya* manifests the creative attributes (*al-sifāt al-ḥāḍiriyya*) exclusively, whereas *ilāhiyya* comprehends both the creative and the creaturely. The first *Mirrah* (*rahma*) of God was His bringing the Universe into existence from Himself. God is the substance (*ḥaqīqat*) of the Universe. The Universe is like ice, and God is the water of which the ice is

made. *Rahmāniyya* comprehends those attributes that require an object and are shared by man, as knowing, hearing, seeing. The differentiation of the phenomena of the Universe is caused by their mutual relations to the respective divine attribute through which God manifests Himself. In his *al-Insān al-Kāmil* al-Dīlī deals with most of the cosmic, metaphysical, religious and psychological notions current in his time. He establishes their place in his system and explains their relations to the respective divine attribute. In doing so he has succeeded in giving many new, unexpected and highly interesting interpretations of well-known theologoumena. Thus he builds a phantasmal cosmology which differs widely from orthodox views: e.g. Adam ate the forbidden fruit because his soul manifested a certain aspect of Lordship (*rahmāniyya*), for it is not in the nature of Lordship to submit to a prohibition; for the people in Hell God creates a natural pleasure of which their bodies become enamoured; Hell at last will be extinguished and replaced by a tree named *Qirjīl*; Iblīs will return to the presence and grace of God; all infidels worship God according to the necessity of their essential natures and all will be saved, etc. Al-Dīlī's doctrine of the Perfect Man (*al-Insān al-Kāmil*), the *Logos*, is almost the same as that of Ibn 'Arabī (cf. H. S. Nyberg, *Kleinere Schriften des Ibn al-Arabi*, Leiden 1919, 104). He is Muḥammad the Prophet who may, however, assume the form of any holy man. So al-Dīlī met him in 796 in Zabīd in the form of his *shaykh*. He is a copy of the Prophet who becomes visible in him, and at the same time, he is a copy of the Universe, which is brought into existence from him. His whole being is sensible of a pervasive delight and contemplates the emanation of all that exists from himself, etc. Al-Dīlī had many auditions and visions. He talked with angels and cosmic beings. When in 800 he stayed in Zabīd, he met all the prophets and saints; he wandered through Heaven and Hell, in which he met Plato. In the *Marāḥib al-Wudūd* forty degrees of Being are enumerated, the first being *al-ḥāḍir al-ilāhiyya* or *al-ḡayb al-mutlak*, the last *al-insān*. The other books and treatises of al-Dīlī have not yet been studied by European scholars. They are listed in Brockelmann, II, 264-5, S. II, 281-2. (H. RITTER).

'ABD AL-KARIM KASHMĪRĪ, a Kashmiri MAHMUD b. DULĀ' b. MUḤ. RĪPĀ, Indo-Persian historian. From autobiographical references in his *Bayān-i Wāḥ* we learn that he was living in Dillī at the time of its sack by Nādir Shāh (1151/1739), and entered the service of Nādir as a *muṣāḥḥab*. He accompanied Nādir on his march from Dillī to Karwīn, reaching Karwīn in 1154/1741. From there he travelled to Mosca and returned to India by sea in 1156/1743. He died in 1208/1784.

He is the author of a history of his own times from Nādir Shāh's invasion of India to 1198/1784 (the India Office copy, Ethé 566, comes down to 1199/1785), including an account of his own travels, entitled *Bayān-i Wāḥ*. He gives much information obtained from Nādir's courtiers, including 'Alawī Khān, the *hakīm biḡhī*, or based on personal observation, and is not afraid to criticise Nādir. The text has not been printed so far; a condensed translation was published by F. Gladwin, *The Memoirs of Khoja Abdulkarim*, Calcutta 1788, 1812, London 1793; abridged version of this by L. Langley, *Voyages de l'Inde à la Mecque*, Paris 1797. To the MSS enumerated by Storey can be added: *The Panjab Public Library Cat. (Persian)*, Lahore 1942, p. 31,

copied 1230/1815; Panjab Univ. Library Shyranī MS (1185/1771); MS in the possession of the writer (1214/1800, from a copy made in 1193/1779).

*Bibliography*: Elliot and Dowson, *History of India*, viii, 122-39; Ch. Rieu, *Cat. of Pers. MSS* (Brit. Mus.), 321; Storey, *ibid.*, 326-7; L. Lockhart, *Nadir Shah*, London 1938, 301.

(MOHAMMAD SHAFI)

'ABD AL-KARIM MUNSHI, or more fully MUNSHI MAWLAWI MUR. 'ABD AL-KARIM 'ALAWI, Indo-Persian historian of the middle of the 19th century. He may have lived in Lucknow (*Ta'rikh-i-Panjāb*, 2, *Mubāraba* 21) or Cawnpur (*Mubāraba*, 3). He was fond of studying history, and during his retirement rendered from Arabic into Persian al-Suyufi, *Ta'rikh al-Khalifa*, and *Ta'rikh al-Majid*, and prepared an abridged version of Ibn Khallikān in Persian. He also translated astronomical and geographical works from English into Persian and Urdu, as well as story books, the whole of the Arabian Nights, a history of Bengal etc. In Beale, *Oriental Ringer*, Dic., Calcutta 1881, 4, it is said that the Munshi had "died about thirty years ago", which places the date of his death not much later than the end of 1851 (he is spoken of as alive in the *Mubāraba* (preface) in 1848 and Sept. 1851). Of his Persian works, the following three, on contemporary history, have been lithographed. He is praised for his careful and objective writing of history and his simple, vivid and clear narrative.

(i) *Mubāraba-yi Kabul wa-Kandahār*, lith. Lucknow 1264/1848 and Cawnpur 1267/1851, describes the Afghan War down to General Pollock's expedition (Sept.-Oct. 1842). The author had prepared a rough draft of the history of the Kabul and Kandahār expedition at the time, but in 1263/1847 he made suitable additions and emendations in his work after studying the *Akbar-nāma*, a Mathnawī poem in the style of the *Shah-nāma* and quoted passages from it on occasions. This fairly long poem (comprising 8612 *bayts* in all) which is called *Zafar Nāma* in its Dastar 1, Section 5 (*madh-i-Shah-i-Diyāddār*), was finished in 2 dastars, in 1261/1844 by Munshi Khāim Dīn "Mirza Khāim Beg madh-wajin balda-yi Shāh Dīyāddār" in one of the three Panjab University MSS., which was transcribed in Agra, in 1847. The poet had himself taken part in the expedition (for details see the *Mubāraba*, 4, based on the *Khāṣṣa* of the *Akbar-Nāma*, Dastar 1).

Khāim's *Akbar-Nāma* (for MSS. other than those noted above and for the Agra ed. of 1272 see Storey, *ibid.*, 402) is not to be confounded, as has been done by Ivanow (*Descript. Cat. of the Pers. MSS. in the Curzon collection*, 12, no. 22) with Hamid Kashmīrī's *Akbar-Nāma* (Kabul, 1320 *shamsī*), a similar work in theme and metre and date (it also was finished in 1260).

The Curzon collection of the A.S.B. (see Ivanow's *Cat.*, mentioned above) has a ms. of the *Mubāraba*.

(ii) *Ta'rikh-i-Panjāb* *Ta'rikh-i-Hind* (or *Ta'rikh-i-Ahli*) lith. Matla' Muhammadī (prob. Lucknow), 1265/1849, deals with the Anglo-Sikh Wars. It is divided into two *kāṣṣas*, the first relating to the first Sikh War (1845-6) and the second to the second Sikh War (1848-9), written in order to show that the English had won the wars (Preface).

It is based on the statement of English officers and the accounts published in contemporary Urdu newspapers, duly checked. The work contains some curious documents such as a statement of the revenues of the Panjab in the Sikh period, texts of Anglo-Sikh treaties and texts or summaries of

British public announcements in the Panjab at the time, inscriptions on the Sikh gurus etc.

(iii) *Ta'rikh-i-Ahmad* (or *Ta'rikh-i-Ahmadshāh*), lith. Lucknow 1266/1850 (for the ms. of the work see Storey, *ibid.*, 403). Having completed the history of Shughlā' al-Mulk Durrañi (see *ibid.* above) who left Ludiānā and with the help of the British Government regained the throne of his ancestors in 1255/1841, the author decided to write a complete history of the Durrañis. Till 1212/1797 about the middle of the reign of Zamin Shāh he based it on the *Usayyāt* of the late *Ta'rikh-i-Husayn* (see Rieu, *Cat. Pers. MSS. Br. Mus.*, iii, 904b) by Imām al-Dīn who had lived for a long time in Afghanistan. A very brief history of the subsequent period up to the fall of the dynasty he based on the information received from well-informed, trustworthy and truthful visitors of his from Kabul, Kandahār and vicinity (*Ahmadshāh*, b. 51). After stating the genealogy of the Abdāl he gives the history of Ahmad Shāh and his successors. In the last quarter of the work is given an account of the chief amirs of Zamin Shāh, a geographical note on the Panjab and the stages of the route Kabul-Kandahār-Harāt-Cīst with a list of the tombs of the Cīstī saints), and a chapter on Turkīstān and its ruler Narbūta Bey. The last event mentioned is the death of Shughlā' al-Mulk and the recall of the British troops from Afghanistan, to which is appended a list of the 17 sons of Pī'nāda Khān.

This work and the *Mubāraba* are among the sources of the *Sirāṭ al-Ta'wīd* (Kabul 1337), a history of Afghanistan compiled under the orders of the Amir Habib Allāh Khān.

An Urdu version of the *Ta'rikh-i-Ahmad* by Mir Warīth 'Alī Sayfī and entitled *Wah'at-i-Durrañi* was lith. in Cawnpur, 1292/1875.

E. Edwards, *Cat. of the Persian Printed Books in the British Mus.*, London 1922, 21, ascribes to him: *A dictionary of Anglo-Persian homonymous words etc.*, Bombay 1889.

*Bibliography*: Storey, *ibid.*, 402-4, 413, 673; O. Mann, *Oudhichronique ou Geschichte des Ahmad Shāh Durrañi*, in *ZDMG*, 1856, 106 ff.; Fr. trand of the chapter on Turkīstān in Ch. Scherer, *Histoire de l'Asie Centrale par Mir Abolmou Boukhary*, Paris 1856, 280 ff.

(MOHAMMAD SHAFI)

'ABD AL-KAYS (rarely 'Abd Kays), i.e. 'Servant of (the god) Kays', old Arabian tribe in East Arabia. The *nishā* is 'Abd al-'Abkād.

'Abd al-Kays belongs to a group of tribes once settled in the modern province of al-'Aṣīd, whence it advanced to the North-West as far as present-day Sudayr and to the South-East as far as al-Bharīd. This group was later, in the genealogy of the Northern Arabs, given the name of Rab'a (g.s.). Already in the 5th century parts of this group detached themselves and started to nomadize partly within, partly beyond the arch of the Tuwayk. To the latter belonged 'Abd al-Kays, which in the 6th century penetrated into the two great oasis districts of Eastern Arabia, namely al-Bahrayn inland, and al-Kaṭif on the coast. The oasis of al-Bahrayn (known since the 10th century as al-Aḥsa'), and only since the 19th as al-Haṣā (g.s.) is plentifully watered by wells and natural and artificial streams, the greatest of which is called 'Ayn al-Muhalim. The district reached in the north as far as 'Aynayn (= al-'Uyūn), badly sanded already in the 12th century, and in the south as far as the village of al-Kaṭib, which survived till the Middle Ages. The capital was

Haḍjar, with its citadel al-Muḥakkkar. Another fortified place was Dīwāḡā. The oasis district on the coast reached from Saḥā (a name that does not occur before the Middle Ages) in the north to Zahrān in the south, its capital being Zāra near Kaṭif.

'Abd al-Kays was divided into two groups, Shann and Lukayy. Lukayy comprised the tribes of Nukra, al-Dū, 'Iḡl and Muḥārīb b. 'Amr. The last three were distinguished by the denomination al-'Umūr from their "brothers" the Annār. These latter consisted of the tribes of 'Amir b. al-Hārīth (with the sub-tribes of Banū Murra and Banū Mālik) and Dījāḥima b. 'Awf (in which the branches 'Abd Shann, Hiyay and 'Amr condescended, under the name Barāḍīn, against the stronger Hārīḡā).

The Muḥārīb lived in the villages of the oasis of al-Bahrayn. Haḍjar itself was inhabited by a mixed population, not bound by tribal ties. The same was probably the case in Zāra and other towns of the coastal oasis, where there existed also a considerable population of non-Arabic origin (Persians, Indians, Jews, Mandaean), and it can be assumed that this was the case in Haḍjar as well, though to a smaller extent. Kaṭif was inhabited by the Dījāḥima b. 'Awf and Zahrān by the Nukra. In regard to land-ownership, we know only that in Sulāṣī, in the East Arabian Dījāw (around Dīrā = al-Dīr = 'Ayn Dīr) a certain 'Amir was the owner, *raḥb*, of the oasis. In the summer, the northern 'Abd al-Kays: Shann, 'Amir b. al-Hārīth and al-'Umūr used to nomadize together inland around Wādī Farūḡ, while the Nukra grazed between Zahrān and the district of Baynāna, S.E. from Katar (where also the last village of the tribe, Lu'ba, is to be looked for).

Emigration from the over-populated oases started at an early date, directed partly towards the other coastal lands of Arabia, 'Uman (fractions of Nukra and Dī, 'Awaka, "brothers" of the 'Umūr and Annār, etc.), and partly towards the Persian coast.

When 'Abd al-Kays penetrated into Eastern Arabia, they are said to have found there remnants of Iyād, who were at that time migrating towards 'Irāk. Later, they had as their northern neighbours those of the Kays b. Tha'labā (of Bakr-Rab'a) who had their dwellings in 'Aḥṣā and were grazing along the line Thāḡīl—Kāṣīma—Fakḍ — al-Bāṭin. The enemies of 'Abd al-Kays were the Sa'd, a group of Tamīm, who roamed on both sides of the Dahna' as far as Wādī Farūḡ and Wādī al-Sabbā.

The oases of the coast were from the time of Shīḡūr II (310-79) under direct Persian rule. The country inland belonged at the beginning of the 6th century to the kingdom of Kinda, while after its fall about 530 a lateral line of that dynasty reigned in Haḍjar. After its extinction, al-Bahrayn was conquered, no doubt with the consent of the Persians, by the Lakhmids of al-Ḥira. Under al-Nu'mān III (579-601) the resistance of the Shann and Lukayy was broken by plundering expeditions. After the fall of the Lakhmids the oasis was ruled by a Persian *ṣakān* residing in Muḥakkkar and assisted by an Arabian person of trust. The cordial reception given by the governors and later also by the 'Abd al-Kays to Muhammad's envoys and letters can be probably explained by the fact that the two governors had lost the support of the home country owing to the strife over the succession to the throne that broke out in Persia in 628. During the *ṣakān* part of the 'Abd al-Kays, under al-Dīḡād (of the Hārīḡā—Dījāḥima) remained faithful to Medina, while others, led by the chief of Kays b.

Tha'labā, proclaimed a Lakhmid as their ruler. The Muslims were besieged in Dīwāḡā, but held out. After the arrival of reinforcements, made available by the victory over Musaylima, they took the initiative and attacked (12/633). It was not before the autumn of 634 that the Persian garrison of Zāra was forced to surrender.

With the Muslim conquest starts a new movement of emigration. Labū' (an older tribe than Shann and Lukayy) took part in an expedition across the Gulf against Fars and settled mainly in Tawwāḡ. The emigration was directed mainly towards Basra; in Kūfa, the 'Abd al-Kays were not so strongly represented. With the troops of Kūfa they reached Mosul, with those of Basra Khurāsān, where their strength in 715 was four thousand men. The 'Abd al-Kays took no prominent part in the politics of the newly conquered provinces. They more often, with a few exceptions, adapted themselves to local conditions, were 'Alid in 'Abd Kūfa, and participated in Basra and Khurāsān in the feuds between the tribes. In Basra, Ḥarīm b. Ḥayyān, one of the earliest pietists of Islam and a forerunner of al-Ḥasan al-Baṣrī, belonged to this tribe.

In their native country the 'Abd al-Kays tried to withstand, but without success, the Khārīdite movement of Najdā, centered in the Yamāma (67/686-7). At the same time, the tribal distribution there begins to change. Of the tribes of 'Abd al-Kays only Dījāḥima b. 'Awf and Muḥārīb remained in their old sites—Muḥārīb occupying also the harbour of 'Ukayr, and 'Amr b. al-Hārīth remaining in Zahrān and on one of the smaller islands of Bahrayn (Sītra?). The rest of their territory was occupied by the Sa'd—Tamīm, who penetrated into Bahrayn itself and built there the village of al-Aḥsa'. And from 'Uman established themselves on the coast, probably at the same time as in Basra, i.e. about 60/680. Some of them settled, together with 'Abd al-Kays, in the oasis of Tu'ām = Tawwā/Tuwaym in Sudayr.

In the IXth century an oasis principality was set up in East Arabia. An Azdite ruled in Zāra, one Ibn Mismār of the Dījāḥima b. 'Awf in Kaṭif, the Banū Hafā, also belonging to 'Abd al-Kays, in Saḥā. Bahrayn was divided into the principalities of Haḍjar and Dīwāḡā under al-'Ayyāḡ al-Muḥārīb and al-'Uyayn (of the Banū Mālik), respectively. In the years 249-54/863-8 an 'Alid, or pseudo-'Alid, rebelled in Bahrayn. He tried his luck first in Haḍjar, then in al-Aḥsa' among the Sa'd. Finally he withdrew into the desert and collected an army consisting of Tamīm and of tribes which had newly immigrated from the west. It cost al-'Uyayn much trouble, with help of the other chiefs of 'Abd al-Kays, to expel the rebel, who soon afterwards started the great rising of the Zandī (g.s.) slaves in Basra.

The immigrants just mentioned and beduins who infiltrated afterwards, as well as good families from Kaṭif, became in the next generation the supporters of the Karmatian missionary Abū Sa'īd al-Dīḡānī. The revolution broke out in 268/889. Kaṭif fell first, Zāra was burned, and finally Haḍjar too was taken, notwithstanding the Caliph's intervention. Al-Aḥsa' became the capital of the East-Arabian state of the Karmatians (g.s.). This was overthrown in 469/1076-7 by the 'Uyaynids (g.s.), i.e. the al-Ḥāḡim, belonging to the Banū Murra of al-'Uyayn. The new dynasty soon showed signs of decline, interrupted only by a short period of recovery at the end of the 12th century. About 1245 this last dynasty of the 'Abd al-Kays collapsed.

(MOHAMMAD SHAFI)

'ABD AL-KARIM MUNSIF, or more fully MUNSHI MAWLAWI MUR. 'ABD AL-KARIM 'ALAWI, Indo-Persian historian of the middle of the 19th century. He may have lived in Lucknow (*Ta'rikh-i-Panjāb*, 2, *Mubāraka* 21) or Cawnpur (*Mubāraka*, 3). He was fond of studying history, and during his retirement rendered from Arabic into Persian al-Suyufi, *Ta'rikh al-Khalaf*, and *Ta'rikh Mijr*, and prepared an abridged version of Ibn Khallikān in Persian. He also translated astronomical and geographical works from English into Persian and Urdu, as well as story-books, the whole of the Arabian Nights, a history of Bengal etc. In Beale, *Oriental Ringer*, Dic., Calcutta 1881, 4, it is said that the Munshi had "died about thirty years ago", which places the date of his death not much later than the end of 1851 (he is spoken of as alive in the *Mubāraka* (preface) in 1848 and Sept. 1851). Of his Persian works, the following three, on contemporary history, have been lithographed. He is praised for his careful and objective writing of history and his simple, vivid and clear narrative.

(i) *Mubāraka-yi Kābul wa-Kandahār*, lith. Lucknow 1264/1848 and Cawnpur 1267/1851, describes the Afghan War down to General Pollock's expedition (Sept.-Oct. 1842). The author had prepared a rough draft of the history of the Kābul and Kandahār expedition at the time, but in 1263/1847 he made suitable additions and emendations in his work after studying the *Akbar-nāma*, a Mathnawī poem in the style of the *Shāh-nāma* and quoted passages from it on occasions. This fairly long poem (comprising 8612 *bayts* in all) which is called *Zafar Nāma* in its Dāftar 1, Section 5 (*madh-i Shāh-i-Diyāddār*), was finished in 2 dafatir, in 1261/1844 by Munshi Khām Dīn "Mirza Khām Beg madh-wajin balda-yi Shāh Dīyāddār" in one of the three Panjab University MSS., which was transcribed in Agra, in 1847. The poet had himself taken part in the expedition (for details see the *Mubāraka*, 4, based on the *Khidma* of the *Akbar-Nāma*, Dāftar 1).

Kāsim's *Akbar-Nāma* (for MSS. other than those noted above and for the Agra ed. of 1272 see Storey, *ibid.*, 402) is not to be confounded, as has been done by Ivanow (*Descript. Cat. of the Pers. MSS. in the Curzon collection*, 12, no. 22) with Hamid Kashmīrī's *Akbar-Nāma* (Kābul, 1320 *shamsī*), a similar work in theme and metre and date (it also was finished in 1260).

The Curzon collection of the A.S.B. (see Ivanow's *Cat.*, mentioned above) has a ms. of the *Mubāraka*.

(ii) *Ta'rikh Panjābī Tuhfat-i-I-I-Abhāb* (or *Tuhfat-i-Abhāb*) lith. Matla' Muhammadī (prob. Lucknow), 1265/1849, deals with the Anglo-Sikh Wars. It is divided into two *kāmilas*, the first relating to the first Sikh War (1845-6) and the second to the second Sikh War (1848-9), written in order to show that the English had won the wars (Preface).

It is based on the statement of English officers and the accounts published in contemporary Urdu newspapers, duly checked. The work contains some curious documents such as a statement of the revenues of the Panjāb in the Sikh period, texts of Anglo-Sikh treaties and texts or summaries of

British public announcements in the Panjāb at the time, inscriptions on the Sikh gins etc.

(iii) *Ta'rikh-i-Ahmad* (or *Ta'rikh-i-Ahmadshāhī*), lith. Lucknow 1261/1850 (for the ms. of the work see Storey, *ibid.*, 403). Having completed the history of Shughlā' al-Mulk Durrānī (see *ibid.* above) who left Ludiānā and with the help of the British Government regained the throne of his ancestors in 1255/1841, the author decided to write a complete history of the Durrānīs. Till 1212/1797 (about the middle of the reign of Zāmīn Shāh) he based it on the *Usayyāt* of the late *Ta'rikh-i-Husayn* (see Rieu, *Cat. Pers. MSS. Br. Mus.*, iii, 904b) by Imām al-Dīn who had lived for a long time in Afghanistan. A very brief history of the subsequent period up to the fall of the dynasty he based on the information received from well-informed, trustworthy and truthful visitors of his from Kābul, Kandahār and vicinity (*Ahmadshāhī*, 3, 51). After stating the genealogy of the Abdālīs he gives the history of Ahmad Shāh and his successors. In the last quarter of the work is given an account of the chief amirs of Zāmīn Shāh, a geographical note on the Panjāb and the stages of the route Kābul-Kandahār-Harāt-Cāit (with a list of the tombs of the Cāit saints), and a chapter on Turkīstān and its ruler Narbūta Bey. The last event mentioned is the death of Shughlā' al-Mulk and the recall of the British troops from Afghanistan, to which is appended a list of the 17 sons of Pā'inda Khān.

This work and the *Mubāraka* are among the sources of the *Sirāj-i al-Tawārīkh* (Kābul 1337), a history of Afghanistan compiled under the orders of the Amir Habib Allāh Khān.

An Urdu version of the *Ta'rikh-i-Ahmad* by Mir Warīth 'Alī Sayfī and entitled *Wah'id-i-Durrānī* was lith. in Cawnpur, 1292/1875.

E. Edwards, *Cat. of the Persian Printed Books in the British Mus.*, London 1922, 21, ascribes to him: *A dictionary of Anglo-Persian homonymous words etc.*, Bombay 1889.

*Bibliography*: Storey, *ibid.*, 402-4, 413, 673; O. Mann, *Oudhichische und Griechische des Ahmad Shāh Durrānī*, in *ZDMG*, 1856, 106 ff.; Fr. trans. of the chapter on Turkīstān in Ch. Schefer, *Histoire de l'Asie Centrale par Mir Abolmou Boukhary*, Paris 1876, 280 ff.

(MOHAMMAD SHAFI)

'ABD AL-KAYS (rarely 'Abd Kays), i.e. "Servant of (the god) Kays", old Arabian tribe in East Arabia. The *nishā* is 'Abd al-'Abkāsh.

'Abd al-Kays belongs to a group of tribes once settled in the modern province of al-'Aḥūd, whence it advanced to the North-West as far as present-day Sudayr and to the South-East as far as al-Bharīd. This group was later, in the genealogy of the Northern Arabs, given the name of Rab'as (g.s.). Already in the 5th century parts of this group detached themselves and started to nomadize partly within, partly beyond the arch of the Tuwayk. To the latter belonged 'Abd al-Kays, which in the 6th century penetrated into the two great oasis districts of Eastern Arabia, namely al-Bahrayn inland, and al-Kaṭif on the coast. The oasis of al-Bahrayn (known since the 10th century as al-'Aḥsā'), and only since the 19th as al-Baḥā' (g.s.) is plentifully watered by wells and natural and artificial streams, the greatest of which is called 'Ayn al-Muhallim. The district reached in the north as far as 'Aynayn (= al-'Uyūn), badly sanded already in the 12th century, and in the south as far as the village of al-Kaṭib, which survived till the Middle Ages. The capital was

Hadjar, with its citadel al-Muḥakkkar. Another fortified place was Dīwāḡā. The oasis district on the coast reached from Saḡa (a name that does not occur before the Middle Ages) in the north to Zahrān in the south, its capital being Zāra near Kaṭif.

'Abd al-Kays was divided into two groups, Shann and Lukayy. Lukayy comprised the tribes of Nukra, al-Dū, 'Iḡl and Muḥārīb b. 'Amr. The last three were distinguished by the denomination al-'Umūr from their "brothers" the Annār. These latter consisted of the tribes of 'Amir b. al-Hārīth (with the sub-tribes of Banū Murra and Banū Mālik) and Dīdhīma b. 'Awf (in which the branches 'Abd Shann, Hiyay and 'Amr condescended, under the name Barāḡīn, against the stronger Hārīḡā).

The Muḥārīb lived in the villages of the oasis of al-Bahrayn. Hadjar itself was inhabited by a mixed population, not bound by tribal ties. The same was probably the case in Zāra and other towns of the coastal oasis, where there existed also a considerable population of non-Arabic origin (Persians, Indians, Jews, Mandaeans), and it can be assumed that this was the case in Hadjar as well, though to a smaller extent. Kaṭif was inhabited by the Dīdhīma b. 'Awf and Zahrān by the Nukra. In regard to land-ownership, we know only that in Sulāḡī, in the East Arabian Dīaw (around Dīrā = al-Dār = 'Ayn Dīr) a certain 'Amir was the owner, *raḡb*, of the oasis. In the summer, the northern 'Abd al-Kays: Shann, 'Amir b. al-Hārīth and al-'Umūr used to nomadize together inland around Wādī Farūḡ, while the Nukra grazed between Zahrān and the district of Baynīna, S.E. from Katar (where also the last village of the tribe, Luḡā, is to be looked for).

Emigration from the over-populated oases started at an early date, directed partly towards the other coastal lands of Arabia, 'Uman (fractions of Nukra and Dū, 'Awakā, "brothers" of the 'Umūr and Annār, etc.), and partly towards the Persian coast.

When 'Abd al-Kays penetrated into Eastern Arabia, they are said to have found there remnants of Iyād, who were at that time migrating towards 'Irāk. Later, they had as their northern neighbours those of the Kays b. Thaḡaba (of Bakr-Rab'as) who had left their dwellings in 'Aḥsā' and were grazing along the line Thāḡā—Kārima—Fakḡ—al-Bāṭin. The enemies of 'Abd al-Kays were the Sa'd, a group of Tamīm, who roamed on both sides of the Dahnā' as far as Wādī Farūḡ and Wādī al-Sabbā.

The oases of the coast were from the time of Shīpūr II (310-79) under direct Persian rule. The country inland belonged at the beginning of the 6th century to the kingdom of Kinda, while after its fall about 530 a lateral line of that dynasty reigned in Hadjar. After its extinction, al-Bahrayn was conquered, no doubt with the consent of the Persians, by the Lakhmids of al-Ḥira. Under al-Nu'mān III (579-601) the resistance of the Shann and Lukayy was broken by plundering expeditions. After the fall of the Lakhmids the land was ruled by a Persian *trāsabāḡ* residing in Muḥakkkar and assisted by an Arabian person of trust. The cordial reception given by the governors and later also by the 'Abd al-Kays to Muhammad's envoys and letters can be probably explained by the fact that the two governors had lost the support of the home country owing to the strife over the succession to the throne that broke out in Persia in 628. During the *trāsabāḡ* part of the 'Abd al-Kays, under al-Dīdhīd (of the Hārīḡā—Dīdhīma) remained faithful to Medina, while others, led by the chief of Kays b.

Thaḡaba, proclaimed a Lakhmid as their ruler. The Muslims were besieged in Dīwāḡā, but held out. After the arrival of reinforcements, made available by the victory over Musaylima, they took the initiative and attacked (12/633). It was not before the autumn of 634 that the Persian garrison of Zāra was forced to surrender.

With the Muslim conquest starts a new movement of emigration. Labū' (an older tribe than Shann and Lukayy) took part in an expedition across the Gulf against Fars and settled mainly in Tawwāḡ. The emigration was directed mainly towards Basra; in Kūfa, the 'Abd al-Kays were not so strongly represented. With the troops of Kūfa they reached Mosul, with those of Basra Khurāsān, where their strength in 715 was four thousand men. The 'Abd al-Kays took no prominent part in the politics of the newly conquered provinces. They more often, with a few exceptions, adapted themselves to local conditions, were 'Alid in 'Alid Kūfa, and participated in Basra and Khurāsān in the feuds between the tribes. In Basra, Ḥarīm b. Ḥayyān, one of the earliest pietists of Islam and a forerunner of al-Ḥasan al-Baṣrī, belonged to this tribe.

In their native country the 'Abd al-Kays tried to withstand, but without success, the Khārīdite movement of Najdā, centered in the Yamāma (67/686-7). At the same time, the tribal distribution there begins to change. Of the tribes of 'Abd al-Kays only Dīdhīma b. 'Awf and Muḥārīb remained in their old sites—Muḥārīb occupying also the harbour of 'Ukayr, and 'Amr b. al-Hārīth remaining in Zahrān and on one of the smaller islands of Bahrayn (Sīḡra?). The rest of their territory was occupied by the Sa'd—Tamīm, who penetrated into Bahrayn itself and built there the village of al-'Aḥsā'. And from 'Uman established themselves on the coast, probably at the same time as in Basra, i.e. about 60/680. Some of them settled, together with 'Abd al-Kays, in the oasis of Tuḡam—Tawam/Tuwaym in Sudayr.

In the IXth century an oasis principality was set up in East Arabia. An Azdite ruled in Zāra, one Ibn Mismār of the Dīdhīma b. 'Awf in Kaṭif, the Banū Hafs, also belonging to 'Abd al-Kays, in Saḡā. Bahrayn was divided into the principalities of Hadjar and Dīwāḡā under al-'Ayyāḡ al-Muḥārībī and al-'Uyayn (of the Banū Mālik), respectively. In the years 249-54/863-8 an 'Alid, or pseudo-'Alid, rebelled in Bahrayn. He tried his luck first in Hadjar, then in al-'Aḥsā' among the Sa'd. Finally he withdrew into the desert and collected an army consisting of Tamīm and of tribes which had newly immigrated from the west. It cost al-'Uyayn much trouble, with help of the other chiefs of 'Abd al-Kays, to expel the rebel, who soon afterwards started the great rising of the Zandī (g.s.) slaves in Basra.

The immigrants just mentioned and beduins who infiltrated afterwards, as well as good families from Kaṭif, became in the next generation the supporters of the Karmatian missionary Abū Sa'īd al-Dīnābī. The revolution broke out in 268/899. Kaṭif fell first, Zāra was burned, and finally Hadjar too was taken, notwithstanding the Caliph's intervention. Al-'Aḥsā' became the capital of the East-Arabian state of the Karmatians (g.s.). This was overthrown in 469/1076-7 by the 'Uyaynids (g.s.), i.e. the al-Ḥāshimī, belonging to the Banū Murra of al-'Uyayn. The new dynasty soon showed signs of decline, interrupted only by a short period of recovery at the end of the 12th century. About 1245 this last dynasty of the 'Abd al-Kays collapsed.

The attempt of the 'Uyūnī 'Alī b. Mukarrab to revive the ancient glory of the tribe by his poems miscarried, partly because the old Arabian world had long since become petrified, partly because also the cases of East Arabia were permeated by new immigrants.

Before the 'Abd al-Kays accepted Islam, the tribe seems to have been overwhelmingly Christian. Only a few names bear witness to its original pagan religion: 'Amr al-Afkal from Shann, 'Abd Shams, 'Abd 'Amr (f.). The office of the *afhal* (from Babylonian *aphallu*, "priest") was taken over, as in other tribes, from the early Arabian town civilisation. Tradition, ignorant of this fact, made of 'Amr al-Afkal a representative of *āfāris*.

The genealogy of the 'Abd al-Kays is, compared with that of other tribes, remarkably incomplete, to judge by Ibn al-Kalbī's *Muḥāsasat* (Table A of Wüstenfeld contains many, Ibn Hazm's *Djāhiz* some errors, the latter not only in the printed text, but also in the good MSS of Rāmpore and Basijew). Firstly, many units, known from other sources, are missing; secondly, the position of the "Companions", or the members of the embassy of the tribe to the Prophet, varies up to five generations, and an officer of the caliph al-Manṣūr is put higher than some of them.

Similar uncertainty exists concerning the poets of the tribe, viz. al-Muḥallabī and al-Mumazzalī of Nukra, Yazid and Suwayd b. al-Bḥāḥidh al-Shann. Yazid (according to others al-Mumazzalī) described, as an onlooker, his own burial; this is something new. Al-Salātān, the poet from Baṣra, a contemporary of 'Uḥayr, belongs to Shann; Ziyād al-Aḍḍān, who lived in Persia, was a *mawla* of the 'Amir b. al-Hārith.

Al-Muḥallabī uses several Persian loan-words, not current otherwise, and some difficult expressions, but they are not peculiarly dialectal. At any rate, the dialect of the 'Abd al-Kays must not be identified with that of al-Baḥrayn (here used, as generally in later times, as the name of the province), considered by the Arab philologists as an inferior one. Striking are the three forms for the personal and tribal name Dī, Dīl, Dūh, "vessel", among the 'Abd al-Kays, Bakr and Kināna.

Mukarrab, *Diwān*, Bombay 1350. (W. Cassek.)

'ABD AL-LATIF AL-BAGHDADI, MUWAYYAR AL-DIN ABU MUHAMMAD AL-YUSUFI, also called AL-LABBIDI, a versatile scholar and scientist, born at Baghdad in 557/1162-3, died there in 692/1231-2. In Baghdad he studied grammar, law, tradition etc. (giving in his autobiography a vivid

picture of contemporary methods of study) and was persuaded by a Maghribī wandering scholar to devote himself to philosophy, mainly according to the system of Ibn Sina, and to natural science and alchemy. In 585/1189-90 he went to Mosul (where he studied the works of al-Suhrawardī al-Maklūf, but found them inept), next year to Damascus, then to the camp of Saladin outside 'Akkā (587/1191), where he met Bahā' al-Dīn b. Shaddād and 'Imād al-Dīn al-Isfahānī, and acquired the patronage of al-Kādi al-Fāḍl, and then to Cairo. Here he made the acquaintance of Mūsā b. Maymūn and a certain Abū 'Iḥsān al-Shīrāzī, who introduced him to the works of al-Fārābī, Alexander of Aphrodisias and Themistius, which turned him away from Ibn Sina and alchemy. In 588/1192 he met Saladin in Jerusalem, then went to Damascus, whence he returned to Cairo. After some years he went to Jerusalem and then, in 604/1207-8, again to Damascus. Some time later he went via Aleppo to Erzurūm, to the court of 'Alā' al-Dīn Dāwūd. When the Saljuqids Kaykubādī conquered Erzurūm, 'Abd al-Latif, after a journey to Erzerum, returned from Erzurūm to Aleppo via Kamāhī, Diwrigi and Malatya (606/1228-9), and soon afterwards returned to his native Baghdad where he died.

His numerous writings covered almost the whole domain of the knowledge of those days. Of those extant, *al-Fida* and *al-Fihrist*, a short description of Egypt, was widely known in Europe and was translated into Latin, German, and French; cf. S. de Sacy, *Relation de l'Egypte par Abd al-Latif*, Paris 1810; the others are on philology, tradition, medicine, mathematics and philosophy. (For his work on metaphysics cf. P. Kraus, in *BIF*, 1941, 272.) His account of the Mongol invasion was taken over by al-Dhahabī (cf. J. de Sotomayor, *Id.*, 1937, 106 ff.). His notes are quoted by Ibn Abi Usaybi'a for information on personalities in Baghdad (cf. index).

**Bibliography:** Ibn Abi Usaybi'a, ii, 201-13 (based on his autobiography); Kutubī, *Fawā'id*, ii, 9 ff.; *Dhahabī, Ta'wīḥ al-Fidā*, MS Oxford, i, 654, fol. 16-7; L. Leclerc, *Hist. de la médecine arabe*, ii, 182; Brockelmann, i, 632, s. 1, 880.

'ABD AL-LATIF KASTAMUNLIL (see LATIF). 'ABD AL-MADJID I (ABDULMECIT), OTTOMAN sultan, son of Mahmūd II and his second *kadin* Bezm-i 'Aleḥ (a remarkable woman), born on Friday, 14 (not 11) *Shā'ban* 1238/25 April 1823. He succeeded his father, whose reforms he was to continue, on 19 (not 23) *Rabi' II* 1255/11 July 1839, a few days after the defeat of Nith (21 June) inflicted on the Turks by Ibrahim Pasha [g.o.]. The concert of the powers, which included, for the first time, Turkey, but not France, saved, however, the Ottoman Empire (Convention of London, 13 July 1840).

The most important events of his reign were the proclamation of the *ḥatt-i shērīf*, or *ḥatt-i hümayūn*, of Gülhānīyah, 156 *Shā'ban* 1255/9 Nov. 1839, and the Crimean war, which began in 1853 and was ended by arbitration in the Treaty of Paris (30 March 1856). For the proclamation see *TANZIMAT, GÜLHANE, HATT-I HÜMAYÜN, 'UTTMANLILAR*, for the Crimean war 'UTTMANLILAR and, in general, the handbooks on history. It is worth mentioning here that the famous defence of Silistria, on the Bulgarian Danube (19 May-23 June 1854), was the subject of a famous poem by Nāḥik Kemāl [g.o.].

There was also a whole series of troubles, insurrections and massacres: in Kurdistan (1847), in the Danubian principalities (1848), in Bosnia (1850-51),

in Montenegro (1852-3), in the Lebanon (1849), in Djidda, in the Lebanon and in Syria (1860), not to speak of Bulgaria and Albania.

Apart from his legislative work, 'Abd al-Majid was the author of important reforms, in regard to the administration (in the *cyclus* or *vildāye*, "provinces"), the army (law of 6 Sept. 1845; see *NOTES*), education (*ḥidādi*, "military preparatory" schools, 1845; *rüşdiyye*, "higher primary" schools for boys and girls, 1847; *dār ul-ma'ārif*, 1849; *mekteb-i 'eḥmānī*, "École ottomane" in Paris 1853), and the coinage (money of good alloy, carefully coined, especially the pieces called *maḍḍiyye*, of 20 piastres; issued from 1844). To him is due the building of hospitals and other edifices, such as the palace of Dolma Baghçe (1853), the restoration of the Aya Sofiya mosque by Fossati (20 July 1849), the first depository for the state archives, *Ḥazine-yi Ewrah* (1843), the first theatre (French Theatre or "Crystal Palace", by Giustiniani), the first *sāl-nāme*, or "imperial year-book" (1847).

It was from his reign onwards that the imperial princes (*ḥāsh-i sālā*) bore the simple title of *ḥendī*.

'Abd al-Majid was the first sultan to speak a Western language (French). He was a subtle and polished person, lightly built, but of weak health undermined by the abuses of drink and harm. He was a spendthrift. Capricious, but courageous, he gained universal respect by his refusal to hand over to the Austrians in 1849, Roussah and the other Hungarian political refugees. The annals of Turkey have as yet no record of a sovereign more humane, of such gentle manners, animated by such civilizing tendencies; his mild and attractive features revealed a generous soul" (Mgr. Louis Petit—pseudonym: Kutubī Efendi, Catholic bishop of Athens, *Les Contemporains*, no. 333, Maison de la Bonne Presse, 1899).

He died young, on 17 *Ḥijāz* 1277/25 June 1861, in the middle of the financial crisis of the country. He was buried in a modest *türbe* near the mosque of Sültan Selmā.

For three out of the ten Grand-Viziers of his reign, see RAḤİD PASHA, 'ALİ PASHA, RUMUZZA PASHA. The foreign diplomat who played during the reign of this sultan the most important role in Istanbul was Stratford Canning (Lord Stratford de Redcliffe).

'ABD AL-MADJID II (ABDULMECIT), last Ottoman caliph, son of 'Abd al-'Azīz [g.o.]. He was elected caliph of the 'Abd al-Nasir Assembly, 18 Nov. 1922, and succeeded, in this quality only, his cousin Muhammad VI, who, after the abolition of the sultanate (1 Nov. 1922) took refuge on board a British warship and left İstanbul. During some months, all the opponents of the regime established in Ankara by Mustafa Kemal called round the caliph who had, in reality, no power at all. Mustafa Kemal put an end to these intrigues by proclaiming the republic, 29 Oct. 1923. A little more than four months afterwards, 3 March 1924, the Great National Assembly resolved upon the abolition of the caliphate. The next day 'Abd al-Majid left İstanbul. He died in Paris, 23 August 1944.

'ABD AL-MALIK B. MUHAMMAD B. ABI 'AMIR AL-MA'AFIRI ABU MARWAN AL-MU'AFFAR, son and successor of the famous "major domo" (kādhib) al-Manṣūr [g.o.] under the reign of the Umayyad caliph of al-Andalus Hishām II al-Mu'ayyad b. Bakk. He was the real sovereign of Muslim Spain after the death of his father in Medina al-Madīnat (Sakim) in 392/1002.

'Abd al-Malik, second son of al-Manṣūr, was born in 364/975; his mother, an *umm walad* called al-Dhahāf, survived him several years. Even before succeeding his father he gained experience as general in several campaigns, both in the North of Spain, against the Christians, and in Morocco. He was appointed by his father as a kind of viceroy of Morocco in 388/998, and took up his residence in Fez, but was recalled to Cordova the next year. On the career of 'Abd al-Malik as sovereign we are informed in sufficient detail by the newly discovered Hispano-Arabic chronicles. One gets the impression that 'Abd al-Malik b. Abi 'Amir, without having the genius of his father, was not lacking in certain statesmanlike qualities. At any rate, the seven years during which he held power are represented as the last favourable period of the history of al-Andalus before the fall of the Umayyad caliphate of the West.

The "major domo", remaining faithful to the line followed by al-Manṣūr, continued his policy of harassing the Christian enemy beyond the frontier zones (*huḡḡār*). For this purpose he undertook year after year an expedition to one or the other of the marches of al-Andalus. In 393/1003 he directed his army towards the Hispanic March (*bilād al-Ifrānḡī*), attacked the surroundings of Barcelona and laid waste thirty-five fortresses of the enemy. In 394/1004, he attacked the territory of the count of Carle, Sancho García, who asked for an armistice and in the following year helped 'Abd al-Malik in his campaign against Galicia and Asturias. In the summer of 396/1006, 'Abd al-Malik started an

offensive against the Frankish county of Ribagorza. His most famous expedition, however, was that of the following year, aimed against the fortress of Clunia, which was taken and destroyed. This victory gained for the 'Amirid *kādib* the honorific title of al-Muẓaffar. In 387/707 he had again to take up arms against Sancho García and Castile, and yet again in the following year. While he was preparing to set out against Castile, he succumbed to a disease of the chest, near Cordova, on the Gudiñellato (Wādī Armallā), 16 Safar 390/2 Oct. 708.

During the seven years of his rule, 'Abd al-Malik al-Muẓaffar preserved for the State of Cordova its strong administrative structure, by favouring the Slavonic dignitaries (*sakāliba*) against the Arab aristocracy. Nevertheless, several attempts were made on his person. There are reasons to assume that his brother, 'Abd al-Rahmān Saneulo, who succeeded him, was not without his share in the unexpected and premature death of the second 'Amirid.

**'ABD AL-MALIK B. KATĀN AL-FIRĀI**, governor of al-Andalus. He succeeded in this office 'Abd al-Rahmān b. 'Abd Allāh al-Ḍahūdī [g.s.], when the latter was killed during his expedition into Gaul, 114/732. He had to surrender his office, in 116/734, to 'Ukba b. al-Ḥadijīdī al-Saḍīfī, but resumed it in 123/740. Belonging to the Meccan party, he evinced a rather unfavourable attitude towards the caliph of Damascus. Almost at once, however, he was confronted with grave difficulties caused by the Berbers who revolted in the Iberian peninsula and soon afterwards menaced Cordova. In face of this danger, and in view of the insufficiency of his own military resources, 'Abd al-Malik had to appeal, whether he liked it or not, for the services of a group of Arabs belonging to various *dhimma* [g.s.] of Syria, who were besieged in the North-African fortress of Ceuta, and gave them permission to cross the Straits under the command of their chief Balḍā [g.s.]. Thanks to this reinforcement and to three successive defeats which they inflicted upon the rebellious Berbers, he succeeded in allaying the danger that threatened him. The Syrian troops, however, confident in their strength, had no difficulty in removing 'Abd al-Malik b. Katān and put in his place as *waḥīd* of al-Andalus their own general Balḍā, at the beginning of 129/1 Ka'da 123/Sept. 741. One of the first actions of the new governor was to order the execution of his predecessor, who was then a very old man.

**'ABD AL-MALIK B. MARWÂN**, fifth Caliph of the Umayyad line, reigned 65-86/685-705. According to general report he was born in the year 26/646-7, the son of Marwān b. al-Hakam [g.s.], his mother being 'Aḥḥā bint Mu'awiyā b. al-Mughira. As a boy of ten he was an eye-witness of the storming of 'Uthmān's house, and at the age of sixteen Mu'awiyā appointed him to command the Madinian troops against the Byzantines. He remained at Medina until the outbreak of the rebellion against Yazīd I (62-3/682-3). When the Umayyads were expelled by the rebels, he left the town with his

father, but on meeting the Syrian army under Muslim b. 'Ukba he returned with him, after giving Muslim information concerning the town and its defenses. This was followed by the battle of the Harra and the total defeat of the Madinians (27 129/1-Ḥijjāda 63/27 Aug. 683). After the assassination of his father (Ramādān 65/April-May 685), 'Abd al-Malik was recognized as Caliph by the partisans of the Umayyads, but he was faced with serious difficulties. Although the battle of Marj Rāhit had reaffirmed Umayyad control of Syria and Egypt had been recovered, and was strongly held by his brother 'Abd al-'Azīz [g.s.], Zafar b. Ḥārith held out in the north at Kīrkisīyya, with the support of the Kays, until 71/690-1, and the Byzantines were giving much trouble on the frontiers, even recouping Antioch in 68/688, as well as Mecca, 'Abd Allāh b. al-Zubayr [g.s.] had been proclaimed Caliph, and was at least nominally recognized in most provinces of the empire. Nevertheless, 'Abd al-Malik showed himself equal to the task, and within a few years succeeded in restoring the unity of the Arabs under Syrian leadership.

At first, however, 'Irāk and the East had to be abandoned. The governor, 'Ubayd Allāh b. Ziyād, driven out by the tribesmen after the death of Yazīd, was unable, in spite of his success in defeating an attack by Kūfan forces in Mesopotamia (Ramādān 65/May 685), to recoupy Kūfa and Basra. Kūfa was shortly afterwards seized by the *Shi'ite* leader Muḥṭār [g.s.], whose partisans, after an indecisive engagement with the Syrians (129/1-Ḥijjāda 66/July 686), totally defeated 'Ubayd Allāh on the *Khāb* river in the following month under the command of Ḥarūth b. al-Ash'ath. For the next five years 'Irāk remained under the rule of Muḥ'ab b. al-Zubayr, whose general al-Muhallab b. Abī Sufra, with the troops of Basra, defeated Muḥṭār's forces at Ḥarūrī in Ramādān 67/April 687 and recouped Kūfa. In order to free his hands for dealing with 'Irāk, 'Abd al-Malik in 69/689 made a ten years' truce with the Greek Emperor, by which, in return for an annual tribute, the latter removed the Mandates from Syria into Greek territory. Immediately afterwards 'Abd al-Malik set out from Damascus against Muḥ'ab, but was obliged to return in order to deal with a revolt in the capital led by his kinsman 'Amr b. Sa'īd al-Ash'adī [g.s.]. 'Amr fortified himself in the residence, but on the Caliph's arrival he capitulated on promise of life and liberty. Nevertheless, 'Abd al-Malik was unable to trust him, and soon afterwards had him seized and executed him, according to the general statement, with his own hand. In the following year (70/690) the campaign against Muḥ'ab was renewed, but both armies faced one another in Mesopotamia without result. In the third year, 'Abd al-Malik opened his campaign by besieging Zafar in Kīrkisīyya for some months. After its capture he recouped Upper Mesopotamia, and reinforced by the Kays marched into 'Irāk. At Dayr al-Ḍahūdīk, near Māshīn, Muḥ'ab and Ibn al-Ash'ath were defeated and slain (Ḍumādā I or II, 72/Oct.-Nov., 691). Al-Muhallab with the troops of Basra was engaged in the struggle with the *Khāridjites*, and most of the 'Irākīs were weary of the conflict which had brought them little but hardships and loss. Immediately after the Caliph's entry into Kūfa, where he received the homage of the province, a force of 2000 Syrians was despatched under al-Ḥadijīdī to deal with Ibn al-Zubayr at Mecca. After a halt at Ta'if, al-Ḥadijīdī laid siege

to Mecca on 1 129/1-Ka'da 72/23 March 692; it was a little more than six months before Ibn al-Zubayr was killed on the field and the city surrendered (17 129/1 or II, 73/4 Oct. or 3 Nov., 692). Al-Ḥadijīdī was rewarded with the governorship of the *Hijāz*.

The recovery of 'Irāk involved 'Abd al-Malik in the necessity of organizing immediate measures against the *Khāridjites*. After an initial failure, the combined forces of Kūfa and Basra defeated the *Najdiyya* of Yamīna at Muḥabbār in 73/692-3, but the more dangerous and fanatical *Azāriqa* in Persia set a tougher problem. Even under the command of al-Muhallab, the war-weary *muhādila* showed little stomach for this task until in 75/694 'Abd al-Malik transferred al-Ḥadijīdī to the governorship of Kūfa. With his ruthless and energetic backing al-Muhallab was able to hunt down the *Azāriqa* in a three-years' campaign. In the meantime a fresh *Khāridjite* rising broke out among the *Rabī'a* tribesmen in Mesopotamia, who, under the leadership of Shāhib, swept down on the territories of Kūfa and seized Madā'in (76-7/695-6). When the *muhādila* of Kūfa, recalled from Persia, proved unable to prevent Shāhib from investing the city, al-Ḥadijīdī obtained the services of 4000 Syrian troops, who, after driving off the attackers and killing Shāhib (end of 77/beg. of 697) went on to break up the Arab section of the *Azāriqa* in Tabaristān. Following on an outbreak of disorder in *Khurasān* in the same year (78/697), 'Abd al-Malik added this province also to the government of al-Ḥadijīdī, who appointed al-Muhallab to govern it as his deputy. Al-Muhallab reopened shortly afterwards the campaigns towards Central Asia, but few positive gains are recorded before his death in 82/701, when he was succeeded by his son Yazīd. At the same time 'Abd al-Rahmān b. Muḥammad b. al-Ash'ath, who had been appointed to Sijidjān, was engaged in Afghanistan with the troops of Kūfa and Basra. Enraged by the criticisms directed against them by the plebeian vicery, Ibn al-Ash'ath and the *agrārī* revolted (81/700-1) and marched back into 'Irāk. The small body of Syrian troops and their supporters were unable to withstand the united forces of the province, and for a time the situation was critical; but with the aid of reinforcements from Syria the rebels were defeated at Dayr al-Ḍumādī (II, 82/July 701) and again routed at Māshīn on the *Dudjānī* (Shābān 82/Oct. 701), and the remnants were pursued into Sijidjān and *Khurasān*, where they were dispersed by Yazīd b. al-Muhallab (83/702). In the same year al-Ḥadijīdī built a new garrison city for the Syrian troops at Wasīl. This episode proved to be a turning-point in the history of the Umayyad Caliphate and the Arab empire. Henceforward a permanent Syrian army of occupation garrisoned 'Irāk, and the *muhādila* of Kūfa and Basra were never again called out on a war footing. For twelve years more the heavy hand of al-Ḥadijīdī maintained order and security, and laid the foundations of future economic prosperity in 'Irāk, but at the cost of more bitter resentment amongst the tribesmen, especially in Kūfa.

The war with the Byzantines was renewed in 73/692, in consequence of the Emperor's refusal to accept the new Muslim gold currency struck by 'Abd al-Malik. Despite some initial successes in their raids into Anatolia and Armenia, the Syrian troops, commanded by the Caliph's brother Muḥammad, gained little territory, but prepared the way for the expeditions of the next reign. In North Africa,

however, the *muhādila* of Egypt, under Ḥassān b. al-Nu'mān, after regaining the southern part of Ifrīkiya, advanced on Carthage with naval support (78/679). A reinforcing Greek fleet was defeated, Carthage occupied, and a secure base established at Kayrawān for further conquests.

In the midst of these preoccupations with internal conflicts and external wars, 'Abd al-Malik found time to develop the administrative efficiency of his empire. The answer to the disintegrating tendencies of tribalism was centralization, and various reforms were put in hand to this end. The most important was the substitution of Arabic for Greek and Persian in the financial bureaux; this was a first step towards the reorganization and unification of the diverse tax-systems in the provinces, and also a step towards a more definitely Muslim administration. This appears even more clearly in the decision to issue an Islamic gold coinage, replacing the Byzantine *denarius* with its image of the Emperor by a Muslim *dīnār* with Kur'ānic texts. Despite the hostility which later tradition displayed towards the Umayyads and al-Ḥadijīdī in particular, it cannot be doubted that already the influence of Islam was strongly felt in this, the first generation of Muslim rulers who had been brought up from childhood in the Muslim faith. Another, and even more far-reaching reform was the re-edition of the 'Uthmānic text of the Kur'ān with vowel-punctuation, a measure generally attributed to al-Ḥadijīdī, but which enraged the pietists of Kūfa who held to the 'reading' of Ibn Mas'ūd. 'Abd al-Malik was also the builder of the *Kubbat al-Sākira* [g.s.] at Jerusalem.

The last years of his reign were on the whole years of prosperity and peaceful consolidation, but for his anxiety over the succession. Marwān had appointed as successor to 'Abd al-Malik his brother 'Abd al-'Azīz, but 'Abd al-Malik wished to exclude him in favour of his own sons al-Walīd and Sulaymān. A split was avoided just in time, by the death of 'Abd al-'Azīz in Egypt in 83/1, 86/May 705, only five months before the death of 'Abd al-Malik (Shawwāl 86/Oct. 705). He was succeeded by his eldest son al-Walīd [g.s.].

**'ABD AL-MALIK B. NŪH** [see SĀMĀNIDS].  
**'ABD AL-MALIK B. ŠĀLIH** b. Aḥl, cousin of the caliphs Abū 'l-'Abbās al-Saffāh and Abū Ja'far al-Manṣūr. In the reign of Ḥārūn al-Rashīd 'Abd al-Malik led several campaigns against the Byzantines, in 174/790-1, in 181/797-8, and according to some authorities also in 175/791-2, although other sources assert that in this year the forces were commanded not by 'Abd al-Malik but by his son 'Abd al-Rahmān. He was also for some time governor of Medina and held the same office in Egypt. At length, however, he could not escape the Caliph's suspicion; in 187/803 he was, for no adequate reason, thrown into prison and remained there until al-Rashīd's death in 183/809. The new Caliph, al-Amin, restored him to liberty and appointed him in 196/811-2 governor of Syria and Upper Mesopotamia. 'Abd al-Malik set out at once for al-Raqqa, but fell ill and died in that town shortly afterwards (the year

of his death, 196/812-3, is confirmed by al-Ma'ādi, *Taḥṣīb* 348; but the same author, Murūḡi, iv, 437, gives 197, while Ibn Ḥishām indicates 193 (trans. de Slane, i, 376) and even 199 (ibid., ii, 665, 669). Some years later the caliph al-Ma'mūn ordered his tomb to be destroyed, it is said, because 'Abd al-Malik had sworn, during the civil war between al-Amin and al-Ma'mūn, never to pay homage to the latter.

'ABD AL-MU'ĪN b. 'ĀLĪ b. 'ALW b. YĀ'LA AL-KUMĪ ABU MUHAMMAD, SUCCESSOR of the Mahdi Ibn Tūmart (q.v.) in the leadership of the reformist movement of *faṭḥ*, known as the Almoravid movement (see AL-MUWAḤḤIDŪN), and founder of the Mu'minid dynasty, which in the West, in the 6th/12th century, took the place of the kingdoms of Ifrīkiya and of the Almoravid dynasty of Morocco and of Spain, with its capital at Marrākūsh (q.v.). The history of the origins of the Almoravid movement and of the reign of 'Abd al-Mu'min has been illuminated and in large measure reinterpreted since the present author had the good fortune to find, in a miscellaneous collection in the Escorial library, some extracts from an anonymous *Kitāb al-Andal* devoted to the principal protagonists of the religious and political system set up by Ibn Tūmart, and especially the extremely lively and certainly authentic 'Memoirs' of a companion of the Mahdi and his successor, Abū Bakr b. 'Ālī al-Sinḥāḡī, called al-Bayḍāḡ (E. Lévi-Provençal, *Documents inédits d'histoire almoravide*, Paris 1928). This extremely important find was followed by the discovery of a volume of the *Naṣm al-Djumān* by Ibn al-Kāttān on the beginnings of the movement (published in part by E. Lévi-Provençal, *Sur fragments inédits d'une chronique du début des Almoravides, in Mélanges René Basad*, Paris 1925, ii, 315-93), and also of a collection of official letters from 'Abd al-Mu'min and his immediate successors (E. Lévi-Provençal, *Trente-sept lettres officielles almoravides*, Rabat 1942; *Un recueil de lettres officielles almoravides*, analysis and historical commentary, Paris 1941). It has thus become possible, without having to rely only on later Arabic historians, to attempt a detailed critical account of this period which covered a large part of the 6th/12th century and coincided with an unprecedented revolution in the history of the Islamic West—an account which, however, still remains to be written.

The circumstances of the meeting of Ibn Tūmart and of his disciple 'Abd al-Mu'min might have been regarded as legendary were they not confirmed by al-Bayḍāḡ, who was a witness. 'Abd al-Mu'min, a humble student, of the Arabized Berber tribe of the Kūmya, of the ethnic group of the Zanāta, settled in the north of what is now the province of Oran, not far from Nedroma, made no attempt to claim, as did his master, an Arab and even prophetic ancestry until very much later. Still a young man—the year of his birth has not been ascertained—he had, with his uncle Yā'ūs, left his native village of Tāḡrā to visit the East, for possibly Ifrīkiya only, in order to complete his studies there. But this peregrination for the purpose of *ḡalāb al-'ilm* was to take

him no further than Bougie (Bijḡiya). It was in a suburb of that town, Mallāḡa, that Ibn Tūmart, the 'faṭḥ of the Sin', as he was then called, who was on his way back to Morocco, encountered the man who was to be his successor. He persuaded him to join the small group of disciples who accompanied him, and taught him his "unitarian" doctrine, during the few months that he remained at Bougie. This meeting probably took place in the course of the year 511/1117.

From this time onwards and until the death of the Mahdi in 524/1130, 'Abd al-Mu'min plays an extremely active part at the side of his master, who attached him by adoption to his own tribe, the Harḡha, and gave him a place in his "Council of Ten". He took part in all the expeditions, had a say in the deliberations of the Almoravid general staff, and found a far-seeing protector in the person of the most active member of the movement, Abū Hafs 'Umar al-Hintāḡī (q.v.). It was the latter who, at the death of Ibn Tūmart, imposed on the Berber hillmen of Tinnallal acceptance of the choice made by the Mahdi of his own successor. Three whole years were, however, to elapse before 'Abd al-Mu'min was proclaimed. He then received from all his new subjects the *bay'a* of allegiance, but had at the same time to face an uncertain political situation. Events went on to reveal his outstanding qualities as a statesman, as a general, and as chief of a coalition which was still, in spite of appearances, heterogeneous. His first task was, leaving aside all other business, to break down the Almoravid structure, whose foundations were already undermined. Fortune favoured him to a degree beyond his highest hopes. The career of 'Abd al-Mu'min as a sovereign began on the day of his proclamation, in 527/1133, and continued until his death in 558/1163. Here we shall merely summarise its principal stages.

The first stage was to secure for the Almoravids the whole of Morocco. The conquest proved long and difficult. 'Abd al-Mu'min first of all attacked the Sūs and the Dra (Wādī Dar'a) (q.v.), then the line of Almoravid fortresses which in the North encircled the Grand Atlas, preventing access to the plains and to the capital, Marrākūsh. Then he swung towards the northeast, took the fortified towns of Dammāt and Dāy, and step by step secured possession of the middle Atlas and of the oases of the Tāḡlāt during the years 534-55/1140-47. Then the Almoravid columns debouched into northern Morocco, and, from their base in the mountainous region of the Džabal, occupied the fortresses in the region of Tāḡra. There, they went on to win over to the movement the sub-Mediterranean tribes of the Wādī Lāw, and of Bādis, Nakūr, Mellila, and the North-Oranian region; to his own village of Tāḡrā, 'Abd al-Mu'min returned as a conqueror.

From this moment, 'Abd al-Mu'min, at the head of considerable forces, felt himself strong enough to abandon the guerrilla operations in hilly country which had hitherto been his tactics, and to confront the Almoravids in the plain. The carrying out of this intention was made all the easier for him by the death of the Almoravid amir, 'Ālī b. Yūsuf b. Tāḡhufī, which took place in 537/1143, leaving a tottering throne to his son Tāḡhufī, and open rivalry between the Lamtūna and Masmūda chiefs in regard to the succession to the amirate. Another untoward circumstance for the Almoravids was the tragic death of one of their most devoted and skilful generals, the Catalan Reverter (al-Rubartayr), leader of their Christian militia, who was killed in an engagement with the Almoravids, in 539/1145, in eastern Morocco.

Finally, the adhesion of the Zanāta to the *faṭḥ* had further inclined the balance in favour of the rebel movement. The armies of 'Abd al-Mu'min and of Tāḡhufī b. 'Ālī met before Tlemcen, and the Almoravids were forced to fall back on Oran, but he died as a result of a fall from his horse in the same year, 539. Now the road to Fez was open: first Oujda (Wādīja) and then Guefīd (Aḡdāfīd) were taken, and the capital of north Morocco fell after a siege of nine months in 540/1146, followed by Meknasa (Meknās) and Salé.

This series of victories was quickly followed up by the capture of Marrākūsh. The Almoravid capital made some attempt to resist the attackers, but was soon forced to capitulate, in spite of the heroic defence made by the garrison of the *ḡasaba* (Shawwāl 541/Aḡst 1147), and there was great slaughter of the Almoravids, among the dead being the young prince Ishāḡ b. 'Ālī b. Yūsuf. Henceforward the Mu'minid dynasty had the capital of its choice. The Almoravid palace was selected as his personal residence by 'Abd al-Mu'min, who gave orders for the erection in its vicinity of the monumental Mosque of the Bookkeepers (*ḡidma* al-Kutubīyyin), whose imposing minaret still towers above Marrākūsh today.

The final destruction of Almoravid power made it possible for 'Abd al-Mu'min to organise his new empire, using as a basis the political system of the Almoravid community, but broadened and adapted to his purpose. He carried out a new scrutiny of his supporters, thousands of whom, judged to be of doubtful loyalty or lacking in religious fervour, went to the sword. Then he seemed to him that the time had come to extend his conquests beyond the boundaries of the Almoravid possessions in the Maghrib, and be prepared to annex Ifrīkiya.

Ifrīkiya was in any case an easy prey at that moment. The Sinḡhādīn dynasties of Bijḡiya and Kayrawīn were thoroughly undermined, and the wave of beduin incursions was swamping the whole country, while the Normans, led by Roger II, king of Sicily, were gaining a foothold in the principal ports of Ifrīkiya. An Almoravid expedition against Ifrīkiya could therefore be regarded as all the more justified, in that it could claim to be a *ḡihad* against the infidel. 'Abd al-Mu'min concentrated his troops at Salé, in 546/1151, then, in the course of an irresistible thrust towards the east, took possession one after another of Aleis, Rouis, and of Kal'sūl. Bad Hammād, and utterly routed near Seif the nomadic Arabs, formerly in the service of the Hammādiids of Bougie, after which he did not seem to accept their services, and for the time being refrained from advancing any further towards Tunisia.

Ifrīkiya properly so called was not conquered until eight years later. 'Abd al-Mu'min, leaving as his lieutenant in the Maghrib Abū Hafs 'Umar al-Hintāḡī, arrived before Tunis, after a journey of six months, in Djumādā II 554/June 1159. Having taken the town, he went on towards al-Mahdiyya and attacked this fortified town, which was in the hands of Roger II of Sicily, with powerful forces; the town fell in Muharram 555/January 1160. In the course of this campaign he also secured possession of Sūs, Kayrawīn, Sfax, Gafsa, Gabes, and Tripoli. Then the ruler returned to Marrākūsh, whence he left for Spain in 556/1161.

The establishment of the Almoravids in the Iberian peninsula had begun in 539/1145, immediately after the capture of Tlemcen. In the next year the Almoravid admiral Ibn Maymūn, who had gone over to 'Abd al-Mu'min, contributed his part by taking Cádiz. In 541/1157 an Almoravid army took success-

sively the fortified towns of Jerez, Niebla, Silves, Beja, Badajoz, Mérida, and finally Seville. In 549/1154 Granada was surrendered to the new masters of the country by its Almoravid governor. In 552/1157 Almería was recaptured from the Christians, who had seized it, and whose designs on al-Andalus became ever more obvious. It was in these circumstances that 'Abd al-Mu'min decided to cross the Straits himself, and established his head-quarters at Gibraltar (Djabal Tāḡr, afterwards Djabal al-Faṭḥ), whose reconstruction he had ordered in the previous year. He remained there for two months of winter, and sent out his columns towards Jaén, where the mercenaries of Ibn Mardānīsh (q.v.) had engaged in raiding.

'Abd al-Mu'min returned to Morocco at the beginning of 558/1164. He proceeded to concentrate his troops in the huge uccine built opposite Salé, the *Rihāt al-Faṭḥ*, now Rabat, with a view to another expedition to the Iberian peninsula. But he had to take to his bed, and, after a long and painful illness, died in the month of Djumādā II 558/May 1163. (All the historians agree as to the month and the year, but not as to the actual day). His remains were taken from Salé to Tinnallal and buried near the tomb of the Mahdi Ibn Tūmart.

In all probability, it was at the time of the capture of Marrākūsh that 'Abd al-Mu'min had allowed his entourage to confer on him the exalted title of *amir al-mu'minīn*, whereas the Almoravids had used only the title *amir al-muslimīn*, recognising the spiritual suzerainty of the 'Abbāsid caliphate of the East. Also, break with the Almoravid tradition, which itself had been inspired by the Hispano-Umayyad organisation, he set up an administrative system which took into account the political needs of his great empire, as well as his desire not to give offence to his entourage of Berbers, "Almoravids from the very beginning". Many regulations that formed part of this system are still in evidence in the organisation of the *maḡāzra* (q.v.) of modern Morocco. But he had also to turn to Andalusian experts for his chancellery, mostly to men who had formerly been secretaries at the Almoravid court. He cleverly secured his succession in the direct line, and in 546/1154 had his eldest son Muḥammad nominated as his presumptive. In 551/1156 he appointed his other son to governorship of the principal towns of his empire, posting with each one, as mentors, men of the highest rank in the Almoravid hierarchy.

Various estimates have been given of 'Abd al-Mu'min, who was in no way marked out for the brilliant career that he made for himself. If, at the beginning and during the years that followed the death of Ibn Tūmart, he seems to have been somewhat timid and to have allowed himself to be led by his principal collaborator Abū Hafs 'Umar Inti, it appears that he later manifested in increasing measure not only strategic but also political qualities, handling tactfully his susceptible entourage of Almoravid Berbers, winning the good will of the Arabs of Ifrīkiya after subjugating them, and carrying out with great intelligence and energy, and also cruelty, his role as head of a State and guardian of the doctrine of the Mahdi, to whom he owed his own fortune and that of his dynasty.

'ABD AL-MUTTALIB B. HĀSHIM, paternal grandfather of Muhammad. Passing through Medina on trading journeys to Syria, Hāshim b. 'Abd Manāf married Salmā bint 'Amr of the clan of 'Adīl b. al-Nadīdīr of the Khazraj, by whom he had four children, 'Abd al-Muttalib (or Shayba) and Ruqayya. The mother and her son remained in her house in Medina, this apparently being the practice of her family in accordance with a matrilineal kinship system. Some time after Hāshim's death his brother al-Muttalib tried to strengthen his deteriorating position in Mecca by bringing his gifted nephew from Medina to help him. The common explanation that the youth was called 'Abd al-Muttalib because he was mistaken for the slave of al-Muttalib is not acceptable; the name has probably a religious significance. Arabic sources give the impression that 'Abd al-Muttalib was the leading man in Mecca (sayyid *Kuraysh*), whereas some Western scholars have tried to show that he was insignificant. It seems more probable that he was a leader of a political group within Kuraysh which had developed out of the alliance of the Muttayyabīn (B. 'Abd Manāf, B. Asad, B. Zuhra, B. Taym, B. al-Hārith b. Fihr) by the secession of B. Nawfal b. 'Abd Manāf and B. 'Abd Shams b. 'Abd Manāf. It is significant that 'Abd al-Muttalib is said to have had disputes with Nawfal and the group, and that the explanation that he was the brother of 'Abd Shams. Moreover it is doubtless as leader of this group that he negotiated with the leader of an Abyssinian army invading Mecca, perhaps hoping thereby to obtain some advantage over Meccan rivals. He also appears to have been in alliance with tribes from the neighbourhood of Mecca, *Khu'za'a*, *Kināna* and *Tha'lab*, and to have owned a well at al-Ṭāḥ. The basis of his prosperity was trade, especially with Syria and the Yemen, coupled with the *shibya* and *ridāla* (the privilege of supplying pilgrims to Mecca with water and food), which he had inherited from Hāshim. He is credited with having dug several wells, notably that of Zamzam at the Ka'ba. Fātima bint 'Amr (of B. Ma'athim) was mother of most of his children, including 'Abd Allāh (g.a.) (Muhammad's father) and Abū Ṭālib, he had other wives from B. Zuhra of Kuraysh, al-Namir, 'Amir b. Sa'ya'a and *Khu'za'a*, mothers respectively of Hameza, al-'Abbās, al-Hārith and 'Abd Lahab. On the death of Muhammad's mother he took the boy of six to his own house. While the stories about 'Abd al-Muttalib have been subject to tendentious chipping, there may be more fact underlying them than sceptical Western scholars have allowed.

(W. MONTGOMERY WATT)

MIRZĀ 'ABD AL-RAHIM KHĀN, KHĀN-i KĀSHĀN, general, statesman and scholar, was born in Akbar himself, who died in Dec. 1536, the son of Akbar's first wife, Bayrām Khān (g.a.). He belonged to the Bahārī, a branch of the Kara Koyunlu Turks, and his mother was a daughter of Dīnāl Khān Mewālī, whose elder daughter the emperor Humāyūn had married. When he was four his father was murdered and he was thereafter brought up by Akbar himself, who gave him an excellent education and training, and from whom he received the title of Mirzā Khān. In 1572 he accompanied Akbar to Gujrat and then had assigned to him, under the tutelage of Sayyid Ahmad of Bārahā, the district of Patan, within which his father had been murdered.

In Dīnādā I 981/Aug. 1573 he accompanied Akbar on his first forced march to Gujrat and he shared the command of the centre in the battle of Sarāl which destroyed the power of the rebel Mirzā. In 1576 he was appointed governor of Gujrat, Wazīr Khān Harawī being entrusted with the actual administration of the province. He was deputed in the same year to the Mewār expedition and assisted in the conquest of Gogunda and Kumbhāner in 1578. As a mark of great confidence the emperor appointed him, in 1581, *mir 'ard*, an office which was previously held by seven officers jointly. He was also given the *diqdar* of Ranthambore and ordered to pacify the area. In 1582 he was appointed *atālīk* to Akbar's son Salīm, then a boy of thirteen. In 1583 he was deputed to suppress the revolt of Muzaḥfir Shāh Gujratī, which he broke by defeating Muzaḥfir against heavy odds in Muharram 992/Jan. 1584, at the two battles of Sarkhēd and Nādōt. In recognition of his victories he was given the title of Khān-i Khānān and raised to what was till then the highest *manṣab*, of 5,000. He remained in command of Gujrat, pursued Muzaḥfir into Kāthiawār, and subjugated Nawāgar. In 1585, during his temporary absence at the grant of the *shāhī*, he raised the banner of revolt. He quickly returned to Gujrat and pacified the province. In the following year, when the system of joint governors was instituted, Kulīdī Khān was associated with him in the government of the province. In 1587 he was permitted to return to the court while retaining nominally the governorship. In 1589, Gujrat was taken from him and given to Mirzā 'Azīz Kōka, the brother of his wife, Māh Rān.

In the same year he was appointed to the highest office at the court, that of *wazīr*, and given *Dīnawār* as *diqdar*. In that year he presented to the emperor his Persian translation of *Bābur-nāma*, entitled *Wāḥid-i Bāburi*. In 1590-1 his *diqdar* was transferred against his wishes from Dīnawār to Mīlān and Bhakar and he was appointed to command the army sent to conquer Kandahār and to annex Thatta, then held by Mirzā Dīnāl Beg Tarīkhān. 'Abd al-Rahīm decided, according to Abū 'l-Faḍl, to proceed against Thatta in preference to Kandahār in the hope of getting more booty. Consequently the command of the Kandahār expedition was entrusted to Akbar's son Dīnāl Beg. In 1600 Dīnāl Beg married one of his daughters in 'Abd al-Rahīm's son, Shāh Nawāz Khān (Iḥdī), and came to the court along with 'Abd al-Rahīm.

In 1593 he was appointed to assist the prince

Dāniyāl who was given the command of an expedition to the Deccan, but on his advice the expedition was cancelled. Two years later, when the conquest of the Deccan was entrusted to another of Akbar's sons, Mirzā, 'Abd al-Rahīm was given Bihāsa as *diqdar* and ordered to assist the prince. From this time his services were directed to the Deccan, except for short breaches for nearly thirty years. In consequence of his delay, he was received discourteously by Mirzā and did not take an active part in the campaign except when he defeated a largely outnumbering force under Suhayl Khān of Bīdājūr in an important battle fought in 1597. His relations with the prince remained strained and in 1598 he was recalled from the Deccan.

On the death of Mirzā, Dāniyāl was appointed to the Deccan in 1599; 'Abd al-Rahīm was ordered to join him and besiege Ahmadnagar, which was being heroically defended by Čānd Bibī. After the fall of Ahmadnagar Dāniyāl was appointed to its government and was married to Dīnāl Begum, 'Abd al-Rahīm's daughter. In 1601 'Abd al-Rahīm was ordered to repair to Ahmadnagar and pacify the territory and in the following year the command of Berār, Patāl and Telīngāna was made over to him.

When Salīm ascended the throne with the title of Dīshāhīr, 'Abd al-Rahīm was in the Deccan. He was confirmed in his post and the emperor especially sent Mukarrāb Khān to reassure him. When Malik 'Anbar, the commander of the Nīrām Shāhī dynasty of Ahmadnagar, made a bid to recover the territory lost to the Mughals, 'Abd al-Rahīm promised the emperor quick victory provided he received adequate assistance. A strong army under the command of Dīshāhīr's son Parwīz was despatched to assist him, but largely as a result of lack of cooperation among the generals, 'Abd al-Rahīm was compelled to conclude a dishonourable treaty with Malik 'Anbar in 1610. He was recalled to the court in disgrace and accused of mismanagement and treachery. He was soon forgiven and in the following year received Kālpī and Kannawāḍ as *diqdar* with the responsibility of suppressing revolts in those districts.

Since, however, Mughal fortunes in the Deccan did not improve, 'Abd al-Rahīm was again appointed to the Deccan in 1612/1612, but could do little more than retrieve the situation, until in 1616 Parwīz was replaced by the prince Khurram (later Shāh Dīshāhī) who was sent with a large force. Malik 'Anbar was defeated and concluded in 1617 a treaty restoring the Mughal conquests, but again attacked Mughal territory in 1620 and was again defeated by Shāh Dīshāhī. In 1622 Shāh Dīshāhī was recalled from the Deccan along with 'Abd al-Rahīm and asked to command the army against the Persians who had conquered Kandahār. Shāh Dīshāhī refused to obey the summons and revolted. 'Abd al-Rahīm joined him but was arrested for communicating with Mahābāt Khān, the commander of the Imperial forces, and subsequently released on the latter's insistence to negotiate terms of peace. When he reached the Imperial army, his communication with the rebel forces was cut off and although he agreed to join the Imperial side, he was placed under surveillance.

In 1625 Dīshāhīr called him to the court, restored his title and honours and gave him one lac of rupees as a gift. After the emperor was released from the captivity of Mahābāt Khān, who had rebelled, 'Abd al-Rahīm asked for the command of the expedition against the rebel general, and towards the close of

1626 was ordered to make preparations for the expedition and was assigned most of the *diqdar* formerly held by Mahābāt Khān. Before the preparations were completed, he fell ill at Lahore, and died on arrival at Delhi in 1630/1627, at the age of 72. His tomb still stands near that of the *shaykh* Nīrām al-Dīn Aswīlī. He survived his four sons, Mirzā Iḥdī entitled Shāh Nawāz Khān, who rose to be a commander of 5,000 and died in 1639; Mirzā Dīrāb entitled Dīrāb Khān, also a distinguished commander who was made governor of Bengal by Shāh Dīshāhī during his rebellion, fell into the hands of Mahābāt Khān and was executed in 1625-6; Mirzā Rāhīm-dād (d. 1619); and Mirzā 'Amr Allāh who died young.

Mirzā 'Abd al-Rahīm was a distinguished scholar and poet, and was proficient in Arabic, Persian, Turkī and Hindī. Under the pseudonym Rahīm he composed poetry in all four languages. He is especially famous for his Hindī poetry which is saturated with the emotions of *bhakti*. He was a great patron of arts and letters, and the *Ma'athir-i Rahīmī* contains a long list of poets who enjoyed his patronage. His munificence and generosity were proverbial and anecdotes of his liberality are numerous. Though frequently accused of treachery and corruption, he possessed a better grasp of the problems of the Deccan than any other Mughal general.

In his religious views he was professedly a Sūfī. Though religious leaders like *shaykh* Ahmad Sarbīndī and *shaykh* 'Abd al-Hakī Dīlāwī counted him among the orthodox, his religious outlook remained mystical and liberal. The belief that he was suspected of practising *taḥiyya* and of secretly following Shī'ite tenets is not supported by contemporary evidence.

'ABD AL-RAHMĀN, the name of the Marwānīd prince who restored the Umayyad dynasty in al-Andalus, and of four of his successors.

1. 'ABD AL-RAHMĀN I, called al-Dāḥid, 'the Immigrant', was the son of Mu'awīya b. Hishām (g.a.). When his relatives were being hunted down by the 'Abbasids, 'Abd al-Rahmān, still a youth—he was born in 133/731—contrived to escape secretly to Palestine, whence, accompanied by his freedman Badr, he made his way first to Egypt, and then to Ifrīkiya. At Kayrawān, the hostile attitude of the governor, 'Abd al-Rahmān b. Habib, drove him to seek refuge in the Maghrib. He stayed for some time in the region of Tāhart; subsequently he sought hospitality first from the Berber tribe of the Miknasa, and then from the Berber tribe, on the Moroccan shore of the Mediterranean, taking ad-

vantage of his family connections—his mother having been a captive woman from that very tribe. But the Berbers did not look with favour on the political schemes of the young Syrian émigré, who with the help of his *muwallad*, decided to try his luck in Spain.

'Abd al-Rahmân b. Mu'awiya managed most cleverly, and with keen political sense, to turn to account the bitter rivalries which at that time grouped the Arab Kayate party and Yamanite party in the Iberian peninsula in opposed camps. We succeeded similarly in enlisting the support of the numerous Umayyad clients who had come to Spain with Baljû b. Bishr [q.v.], and who formed there a local cadre of Syrian *ghunads* dominating a large part of the south of Andalusia. The ground having been well prepared by Hadr, 'Abd al-Rahmân entered the peninsula: he disembarked at Aloufcar (al-Munakabi) on 1 Rabî' I 139/14 August 755, and at once put forward his claim to the sovereign power. The governor of al-Andalus, Yûsuf b. 'Abd al-Rahmân al-Fihri, soon had to take up arms against him. 'Abd al-Rahmân, whose forces were continually increasing, made his entry into Seville in Sha'wal 139/March 756, defeated Yûsuf al-Fihri in the outskirts of Cordova on the 10 Dhu'l-Hijja following (15 May), and entered the capital, where he was proclaimed amir of al-Andalus.

The founder of the Umayyad amirate of Cordova was to reign for more than thirty-three years. He spent the greater part of them in consolidating his position in the capital itself. The news of his success spread in the East, and soon a stream of dependents or supporters of the Umayyads was flowing into Spain to help with the restoration in the West of the dynasty that in the East had fallen from power. It was not long before the amir of Cordova was forced to confront a multitude of political problems. He had first of all to subdue finally the former wali Yûsuf al-Fihri, who had collected round him a certain number of malcontents and tried to retake Cordova; but he was defeated in 141/758 and in the next year was killed near Toledo. Meanwhile, just as in the time of the former governors, embers of revolt were smouldering in almost every part of the new kingdom; unrest was stirred up not only by the neo-Muslim Spaniards and by the Berbers of the mountainous regions, but also by the mutual hostility of the Arab clans. 'Abd al-Rahmân II thus had to stamp out rebellion at many different points: for example, in 145/763, the rising of the Arab chief al-'Alî b. Mughith al-Djadhîdî, and, in 152/769, that of the Berber Shakyâ in the Santaver district (Santaverriya), now the province of Cuenca. Later, a certain number of the Arab chiefs on the eastern side of the Peninsula formed a coalition, and asked for help from Charlemagne. The latter himself crossed the Pyrenees at the head of a Frankish army and laid siege to Saragossa in 162/778; but a sudden recall to the Rhineland compelled him to raise the siege. On the way back his army was attacked in the narrow valley of Roncesvalley by bands of Basques (Bachkuns), and was decimated (episode of Roland, Duke of Brittany). 'Abd al-Rahmân in his turn laid siege to Saragossa, and gained possession of it for a time. But he was forced to give up the idea of recapturing other towns that had fallen into the hands of the Christians. Thus it was that Gerona (Djarunda) came under Frankish control in 169/785.

Three years later, on 25 Rabî' II 172/30 September 788, 'Abd al-Rahmân I died at Cordova before

reaching his sixtieth year. The State of Cordova was doubtless still very insecure; but at least he had provided it with an administrative and military organisation similar, on a lesser scale, to that of the former caliphate of Damascus, and which was to last as long as the Marwânids of al-Andalus remained faithful to the 'Syrian tradition'. In any case, the success of the 'Immigrant' made a deep impression in the East, and the 'Abbasid caliph Abd Dja'far al-Mansûr gave him the name *yabr Kuraish*, 'Hawk of Kuraish', as a tribute to his courage and his spirit of enterprise.

**Bibliography:** E. Lévi-Provençal, *Hist. Esp. musul.*, I, 91-138. The essential Arabic source for the career of 'Abd al-Rahmân I is the anonymous compilation, entitled *Alkhabr Maghmû'a* [q.v.], 46-120. For the other sources and the bibl., see *Hist. Esp. musul.*, I, 91, n. 1.

2. 'ABD AL-RAHMÂN II b. al-Hakam b. Hisham b. 'Abd al-Rahmân b. Mu'awiya, great-grandson of the above, succeeded his father al-Hakam I on 25 Dhu 'l-Hijja 206/21 May 822. He was born at Toledo in 176/792 and was chosen as heir presumptive by his father. The recent discovery of that part of the *Muhabbat* of Ibn Haysân which deals with the reigns of al-Hakam I and 'Abd al-Rahmân II has made it possible for the present writer to offer a rather different picture of the latter sovereign and of the kingdom of al-Andalus during his period from that which Dory based on the documentation available in his time. It now appears that the reign of 'Abd al-Rahmân II, which covered a third of a century, was much more prosperous and brilliant than was thought hitherto; in the history of Andalusian civilisation it represented a decisive turning-point, when for the first time there penetrated to Cordova manners and a way of life directly borrowed from Baghdad and from the 'Abbasid civilisation which firmly set their stamp on the aristocracy (Abbas) of Muslim Spain, and led to a continuous ebbing of the Syro-Umayyad tradition in the Marwânid kingdom.

At the beginning of the reign of 'Abd al-Rahmân II some disturbances, which came about as a reaction against the iron rule with which al-Hakam I had governed al-Andalus, were easily put down; gradually the Levantine territories (Sijak al-Andalus) were brought completely under the crown, and a new town, Murcia was founded in 216/831 to replace the former chief town, Ello. A revolt on a considerable scale broke out at Toledo; it was finally put down, and the town taken by storm in 222/837. At the same time the ruler of Cordova took up afresh the struggle against the Christians along the frontiers of al-Andalus, and nearly every year personally led or sent summer expeditions (ghazâs) against the Asturio-Leonese kingdom. He also had to deal with the revolt of the Berber Mahmûd b. 'Abd al-Djabbâr in the region of Merida and with the minor aggressive outbursts of the *muwallad* Banû Kasî family [q.v.] of Aragón, while at the same time waging war, at request of the Greeks, against the Bispey kingdom of Pamplona and the Hispanic Marches (now Catalonia), which then formed part of the empire of the Franks (Ifrandj) [q.v.].

Two important political events also took place during the reign of 'Abd al-Rahmân II. The first, following upon a recrudescence of nationalist propaganda, was the famous revolt of the Morabar Christians [q.v.] of Toledo and Cordova, fomented by certain fanatics. Arabic historiography makes no mention of this revolt, and information about it

can only be obtained from a few contemporary Latin sources. Not without reluctance, the government of Cordova had to deal severely with a large number of Morabar, priests and lay persons, men and women, who were guilty of having reviled the religion of the Prophet. At this time there was a disturbing outbreak of voluntary martyrdom, which was brought to an end by a Council held at Cordova and presided over by the Metropolitan of Seville (*madrid*) in 238/862. Seven years later the priest Eulogius, who had been the leading spirit of this movement and was trying to reanimate it, was arrested and beheaded, by the orders of amir Muhammad I.

Far more serious was the raid of the Norsemen, in 230/844, on Muslim Spain. The flotillas of Norsemen (Urdmålslýrðin), usually called *Maglôs* [q.v.] by the Chroniclers, first made their appearance at Lisbon, then came up the Guadalquivir from its mouth and sacked Seville and all the surrounding country. The counter-stroke was not delayed, and after a bloody battle Seville was recaptured from the pirates at the end of Safar 230/14 November 844. To meet this unexpected menace and to forestall any new attack the navy was reinforced.

'Abd al-Rahmân II instituted friendly relations with three little independent kingdoms of western Barbary: the Rustumid kingdom of Tâhart, the Sâlihîd kingdom of Nakûr, and the Midrarîd kingdom of Sijilmâsa, but made no advances to the Aglabids of Ifrîkiya, who were partisans of the 'Abbasids and had just conquered Sicily. From his reign too dates the opening of diplomatic relations between Cordova and Byzantium. An embassy from the emperor Theophilus arrived in Spain in 235/849 to demand the restitution of Crete, which had been occupied by the Andalusian adventurer Abû Hafs 'Umar al-Ballûtî [q.v.]. The reply was in the negative, but a Cordovan deputation, of which the poet al-Ghazâl [q.v.] was a member, went to Constantinople at this time.

'Abd al-Rahmân II was to become particularly renowned as an organiser and builder, and as a patron of letters and the arts. He reorganised the administration of his kingdom on the lines of the 'Abbasid system, ordered the construction at Cordova of several works of public utility, and on two occasions undertook the extension of the great mosque in his capital, in 238/853 and 234/848. His court soon became most brilliant. From the time when the musician and singer Ziriyâh [q.v.], who came to Cordova in 207/822, won acceptance at Cordova for the refined usages of the Baghdad civilisation. Several poets won fame in the entourage of the amir of Cordova: for example, al-'Abbas ibn Firnâs [q.v.], al-Ghazâl, mentioned above, and Ibrahim ibn Sulaymân al-Shâmi. During his reign the Maliki school of Cordova developed greatly, and several *shâhîs* acquired a reputation in juridical science, in particular the Berber Yahyâ [q.v.] al-Layth, whose dictates 'Abd al-Rahmân II followed in his choice of kâds. The end of the amir's life was darkened by palace intrigues, instigated by his *fâtâ* Nâsr and by his concubine Tarîb. He died at Cordova on 3 Rabî' II 238/22 September 852, after a reign that, taken as a whole, can be called glorious, and which should henceforward be assigned the position which it deserves in the history of Umayyad Spain.

3. 'ABD AL-RAHMÂN III b. Muḥ. b. 'Abd Allâh, the greatest of the Hispano-Umayyad rulers and first caliph of al-Andalus.

The successor of the amir 'Abd Allâh was only twenty-three at the time of his accession; in spite of his youth he had been chosen by his grandfather as heir presumptive because of his high qualities. The choice was fully justified. Indeed, no reign in the annals of Hispanic Islam was more brilliant or more glorious. Its great length—a whole half century, from 300/928 to 350/961—ensured for the policies of 'Abd al-Rahmân III the benefits of an unusual degree of continuity, and made it possible for him to subdue one after another all the centres of disaffection in al-Andalus.

The reign of 'Abd al-Rahmân III can be divided into two principal periods: first a period of internal pacification, the result of which was the achievement of political unity in the kingdom of Cordova, a unity which had been gravely threatened in the reign of amir 'Abd Allâh [q.v.]; then a longer period, mainly distinguished by activity in external policy: an offensive against Christian Spain, and a struggle with the Fâtimid empire for influence in North Africa.

As soon as he came to the throne, 'Abd al-Rahmân III mustered all his resources to put an end to the revolt in southern Andalusia, and to neutralise one and for all the aggressive power of the principal instigator of this revolt, 'Umar b. Hafsun [q.v.]. Until 305/917 he unceasingly harassed the Andalusian rebels and attacked the Arab aristocrats of Seville, Carmona, and Elvira, who were forced to submit. After the death of Ibn Hafsun, his sons quickly gave up the struggle. Their head-quarters at Bobastro [q.v.] were taken by storm in 315/925. Five years later the last centre of resistance, Toledo, fell in its turn.

At the same time the ruler of Cordova took care not to allow himself to be outflanked by sporadic outbursts of aggression by his Christian neighbours. He stopped the advance of the king of Asturio-Leon, Ordoño III, in 308/920, and seized a series of strongholds along the strategic line of the Duero, Omsa, San Esteban de Gormaz, and Clunia, particularly after his victory at Juncaria (Valdejunquera). Four years later the victorious operations known as the Pamplona campaign put him in a position to sack the Basque capital, the seat of Sancho Garres I, and to secure his land frontiers for several years. But he was to find a powerful opponent in the new king of Leon, Ramiro II, who, shortly after his accession, took the offensive against Islam and, after a series of encounters in which he was beaten, succeeded in inflicting on the ruler of Cordova, in 327/939, the very serious defeat at the 'moat' of Simancas (sometimes wrongly called the battle of Alhandega).

Ten years had already passed since 'Abd al-Rahmân III, after the taking of Bobastro, and as a retort to the designs of the Fâtimids on his realm, had adopted the exalted title *amir al-mu'minin*, and the honorific appellation al-Nâsir li-Dîn Allâh. He was now to pursue in North Africa a policy of attraction and to combat, particularly in Morocco, the influence of the new masters of Ifrîkiya. In order to secure from bases of operations on African soil, he occupied certain presidios, Ceuta in particular, which was taken in 339/951. On this battle of influences, which was to continue until the end of the tenth century, see the art. Umayyads of Spain.

After the Simasica disaster, 'Abd al-Rahmān III quickly succeeded in restoring the situation, especially as his enemy Ramiro II died in 339/951 and his sons Ordoño III and Sancho quarrelled over the succession. Al-Nāṣir took full advantage of the civil wars which at that time stepped the kingdoms of Leon and Pamplona in blood (for fuller details see the art. Umayyads).

'Abd al-Rahmān III died at Cordova on 22 Ramaḍān 350/15 October 961, at the height of his fame and power. During the latter part of his reign he had lived in the style of a veritable potentate, and had transferred his residence to his royal establishment of Madīnat al-Zāhira [q.v.], at the gates of Cordova, which he made into a town by itself. Of the kingdoms of al-Andalus, which under his predecessors had ever been an object of contention shaken by civil war, the rivalries of the Arab clans, and the clash of ethnic groups in opposition to each other, he had contrived to make a pacified, prosperous, and immensely rich State. From that time Cordova was a Muslim metropolis, a rival to Kayrawān and to the great cities of the East. It far surpassed the other capitals of Western Europe, and enjoyed in the Mediterranean world a reputation and a prestige comparable to that of Constantinople.

'Abd al-Rahmān IV b. Muḥ. b. 'Abd al-Malik b. 'Abd al-Rahmān, grandson of 'Abd al-Rahmān al-Nāṣir, Umayyad caliph of al-Andalus, who took at the beginning of his short reign the honorific title of al-Murtadā. This personage, who, at the time of the *hijra* of Cordova, had retired to Valencia, was proclaimed at the end of 408/1018, after the assassination of 'Alī b. Hammūd [q.v.] by a number of supporters collected together by the lord of Almería, the Sevillian *hād* Ḥayyān. Al-Murtadā, before trying to retake Cordova and to install himself there, laid siege to Granada, where the *shahīda* of Zāwī b. Zīrī [q.v.] were in command, and suffered a serious defeat. Betrayed, and abandoned by his own men, he took refuge at Guadix (Wādī Ḥaḡh), where he was before long assassinated.

**Bibliography:** E. Lévi-Provençal, *Hist. Esp. musul.*, II, 328-30.

5. 'ABD AL-RAHMAN V b. Hishām b. 'Abd al-Djabbār, one of the last Umayyad caliphs of al-Andalus, was proclaimed on the 16 Ramaḍān 474/4 December 1023 at Cordova, and took the honorific title of al-Mustashir bi'llah. He had barely attained his majority, and showed remarkable literary gifts. He surrounded himself with counsellors chosen from among the aristocracy of the capital, men such as the great writer 'Alī b. Harūn, but was able to remain in power for only forty-seven days. The Cordovan mob deposed him in the course of a riot, and replaced him by Muhammad III al-Mutamir, on 3 Dhu'l-Ka'dī of the same year/17 January 1024. The first act of his successor was to put 'Abd al-Rahmān al-Mustashir to death.

**Bibliography:** E. Lévi-Provençal, *Hist. Esp. musul.*, II, 334-5. (E. Lévi-Provençal)

'ABD AL-RAHMAN b. MUHAMMAD b. ABI 'AMIR, nicknamed Sanchuelo (Shandwilo), the 'hija' (little) son (as he was by his mother a grandson of Sancho Garoñe II of Aburra, Basque king of Pamplona), son of the famous 'al-Mansur al-Nāṣir [q.v.]. He succeeded his elder brother 'Abd al-Malik [q.v.] al-Murraḡir on his death, 26 Safar 399/20 Oct. 1008, with the consent of the titular

caliph, the Umayyad Hishām II al-Mu'ayyad bi'llah. Indifferently gifted, vain, debauched, 'Abd al-Rahmān Sanchuelo, from the moment that he assumed power in Cordova, made one mistake after the other and alienated public opinion. He started by obtaining from Hishām II his designation as presumptive heir of the crown. The text of the document of investiture, dated Ramaḍān 1 399/Nov. 1008, has been preserved. The designation was very badly received by the people of Cordova, who were already exasperated by the pro-Berber feelings of the 'Amirid *hājib*. While 'Abd al-Rahmān misguidedly decided to go, in the middle of winter, on an expedition against the kingdom of Leon, an opposition party was formed in Cordova. They deposed the throne the Umayyad Muhammad b. Hishām b. 'Abd al-Djabbār, whose first care was to order the sack of the residence of the 'Amirids, al-Madīna al-Zāhira [q.v.]. The reaction of 'Abd al-Rahmān to this news was half-hearted. He turned back in the direction of Cordova, but during his return journey he was abandoned by his troops and arrested, not far from the capital, by emissaries of the Umayyad prisoner, who put him to death, 3 Ramaḍān 399/3 March 1009.

'ABD AL-RAHMAN b. 'ALI [see Ibn al-Dawāḡī]. 'ABD AL-RAHMAN b. 'AWF, originally called 'Abd 'Amr or 'Abd al-Kaḡh, the most prominent early Muslim convert from B. Zubayr of Kuraysh. He took part in the *hijra* to Abyssinia and in that to Medina, and fought at Badr and the other main battles. He commanded a force of 700 men sent by Muhammad in Sha'bān 6/December 627 to Dumat al-Djandal; the Christian chief, al-Asbagh (or al-Ayya) al-Kalbi, became a Muslim and made a treaty, and 'Abd al-Rahmān married his daughter Tunāḡir (but cf. Caetani, *Annali*, I, 709). By his shrewdness and skill as a merchant he made an enormous fortune. Politically he was a friend of Abū Bakr and later of 'A'isha. On 'Umar's death, as one of the *shūra* or council of six who had to choose the new caliph, he played a leading part in the appointment of 'Uthmān. He died about 31/652 aged 75. According to Tradition he was one of the ten whom Muhammad had assured of Paradise.

'ABD AL-RAHMAN b. HISHAM [q.v.] al-Lawid [q.v.] sultan of Morocco, born in 1204/1790. Proclaimed in Fer, 15 Ramaḍān 1238/30 Nov. 1822, he succeeded his uncle Mawlay Sulaymān [q.v.], who had appointed him as his heir. Recognized without great difficulties, the new sovereign had nevertheless to repress during his reign several revolts of the tribes. Among these were the revolts of Zemmir, in 1240/1825, in 1250/1835, in 1260/1852 and in 1274-5/1857-8, the revolt of Banū Za'wāl in 1241/1825, that of Shidyāna in 1245/1827-8, that of Amir and Za'ā'ir in 1265/1849 and that of Banū Mōā in 1269/1853. The two most serious revolts were, however, that of Shidyāna in 1244/1828 and that of the *qayḡ* of Wādīya in 1247-8/1831-2. The sultan besieged Tāz al-Djādīd, where the rebels had fortified themselves, and after taking the city, dismissed them and scattered them near Marrāḡḡh, at Rabat and at al-'Arā'ḡh (Larache).

The relations of Mawlay 'Abd al-Rahmān with the European nations were marked by a series of failures that made him abandon his earlier plans of aggression and expansion. The blockade of Tangier by the English in 1828 and the bombardment of al-'Arā'ḡh (Larache), Arzila and Tittāwīn undertaken by the Austrians in 1829 as reprisals for the seizure of merchant ships, made an end to an attempted reconstruction of a corsair navy, while the military successes of France in Algeria forced the sultan to renounce all intervention in the territory of the late regency. He tried in 1830-2 to extend his influence to the East of his empire by appointing *khāḡifas* in Tiemlen, Miliana and Medea, but had to recall, or disavow, them, because of their troubles and the protest of the French government. From 1832 to 1834 he lent 'Abd al-Kādir, leader of the holy war, his moral and material support and allowed himself to be involved in a conflict with France when his ally took refuge in Morocco in order to continue the struggle. The reverses which he suffered; battle of Isly (14 August 1844), bombardment of Tangier and Mogador (6 and 15 August), obliged 'Abd al-Rahmān to renew the *al-Maḡ* (treaty) of Tangier, 26 Oct. 1844. In 1847 he decided to expel him from the country, thus compelling him to give himself up to the French. Several incidents, due to the fanaticism of his subjects, such as the murder of the Spanish consular agent Darmon (1843), that of the Frenchman Rosey (1855) and the pillage of the brig 'Couraoul Pey' (1851), embarrassed his relations with the foreign powers, but generally he gave in before threats or force (bombardment of Salé, 1851).

During his reign, Portugal (1823), England (1824, 1827), Sardinia (1825), Spain (1825), France (1825, 1844), Austria (1830), the kingdom of Naples (1834), the United States of America (1836), Sweden and Denmark (1844), renewed, or completed, their commercial treaties with Morocco.

A pious ruler and a good administrator, Mawlay 'Abd al-Rahmān had many monuments built or restored: in Fer (Mosque of Mawlay Idrīs), Meknes, Salé (minaret of the Great Mosque, fortifications), Tangier (harbour), Safi, Mazagan, Marrāḡḡh (mosque of Bū Ḥassān, Kanariyya, al-Wuṣṭā, and the plantation of the Agḡāl), etc. He died in Meknes, 29 Moharram 1278/28 August 1859.

'ABD AL-RAHMAN b. KHALID b. al-Walid al-Maḡrūbī, the only surviving son of al-Fatḡ al-Baḡ general. At the age of eighteen he commanded a squadron at the battle of the Yarmūk. Mu'awīya subsequently appointed him governor of Hims and he commanded several of the later Syrian expeditions

into Anatolia. During the civil war, after successfully opposing an 'Irakī expedition into the Euphrates, he joined Mu'awīya at Siffin and was made standard-bearer. According to the received tradition, Mu'awīya, fearing that 'Abd al-Rahmān might be a rival of Yazīd for the succession to the Caliphate, had him poisoned in 46/666 by his Christian physician Ibn Uthlū, who was himself killed shortly afterwards by one of his victim's slaves. H. Lammens (see *Bibl.*) has disputed the reliability of this tradition (transmitted from 'Irakī sources) and ascribed its origin to incidents connected with an outbreak of anti-Christian violence at Hims.

'ABD AL-RAHMAN b. MARWAN b. YUSUF, called Ibn al-Djilīlī ('son of the Galician'), famous chief of insurgents in the West of al-Andalus in the second half of the 3rd/9th century. He belonged to a family of neo-Muslims (*muwalladūn*), originating from the North of Portugal and established in Merida. Although his father had been governor of this town on behalf of the sovereigns of Cordova, 'Abd al-Rahmān revolted against the Umayyad Amir Muhammad I in 254/866. The Amir besieged him and forced him, after the capitulation of the city, to reside in Cordova. He remained in the capital until 261/875, when he returned to the region of Merida and threw off his allegiance to the Umayyads. He fortified himself in the castle of Alange (Hims al-Hanashīn), but was again forced to surrender by the Amir Muhammad I, who assigned to him as residence Badajoz. It was not long before Ibn al-Djilīlī again raised the standard of revolt, supported by the *muwallad* lord of Porto (Bartakāl), Sa'dūn al-Surubakī, and by Alfonso III, king of Asturias and Leon. The insurgents laid an ambush for the loyalist general Hāḡīm b. 'Abd al-'Aṣṭr, in the region of the Serra de Estrella, captured him and delivered him into the hand of the Christian king, who released him only against a high ransom. Fearing, justly, a violent reaction from the government in Cordova, Ibn al-Djilīlī took refuge with Alfonso III. After staying for eight years in Christian territory, he returned in 271/884 to Badajoz and reached a tacit agreement with Cordova. This allowed him to rule over a veritable principality extending over the valley of the Guadiana and the south of what is now Portugal. Under the reigns of the Amirs al-Munḡir and 'Abd Allāh, 'Abd al-Rahmān practically had a free hand and ruled over his territory as an independent prince, until his death in 276/889. He was succeeded by his son Marwān who only survived him by two months, and after him by a grandson 'Abd Allāh b. Muḡammad b. 'Abd al-Rahmān, who died in 311/923 and was followed by a son, 'Abd al-Rahmān. This great-grandson of Ibn al-Djilīlī was finally compelled to submit to 'Abd al-Rahmān III in 318/930.

'ABD AL-RAHMAN b. MUHAMMAD b. AL-ASH'ATH [see Ibn al-Ash'ATH].

'ABD AL-RAHMAN b. RUSTUM (see RUSTUM).

'ABD AL-RAHMAN b. SAMURA b. HADIR b. 'ABD SHAMS b. 'ABD MANAF b. KUSAYB, Arab general. The name 'Abd al-Rahman was given him by Muhammad on his conversion in place of his former name 'Abd al-Ka'ba. His first command was in Sijidistan in succession to al-Radi b. Ziyad in the latter years of the caliphate of 'Uthman when he conquered Zanzibar and Zanzibar Island and made a treaty with the ruler of Kerman. He withdrew after the death of 'Uthman; according to Chinese sources, Pirat, the son of Yairdird III, then attempted to establish himself in Sijidistan (Chavannes, *Documents sur les Tou-tou occidentaux*, 275, 279). 'Abd al-Rahman b. Samura was, along with 'Abd Allah b. Amir, one of the envoys of Mu'awiyah to al-Harith b. 'Ali [?]. Ibn 'Amir, responsible governor of Baera and the East, despatched 'Abd al-Rahman and 'Abd Allah b. Khaytham in 42/602 to restore Arab rule in eastern Khurasan and Sijidistan. In 43/603 'Abd al-Rahman reconquered Sijidistan and captured Kabil after a siege of several months. He then led an expedition to al-Rukhbadh (Arachosia) and Zibulistan (region of Ghazna), and again attacked and captured Kabil, which had rebelled, probably in 43/605. Mu'awiyah subsequently made him directly subordinate to the Caliph, but shortly after the appointment of Ziyad as governor of Baera he was replaced. He brought back with him a body of captives from Kabil, who built a mosque for him in his *har* at Baera in the architectural style of Kabil. He died in 107/705 in Baera, where his descendants formed a powerful and influential clan during the next century.

'ABD AL-RAHMAN b. 'ABD AL-KADIR al-FASI, Moroccan scholar, b. at Fez 1040/1631, d. in the same town 1096/1685. He was the pupil of his father, 'Abd al-Kadir b. 'Ali [?], and of numerous other masters. He became a famous jurist, polygrapher, celebrated by all his biographers for the breadth and the variety of his knowledge. He is said to have compiled more than 170 works on Malikiite *fiqh*, medicine, astronomy and history. But it is especially as a lawyer that he is an authority, and his main works are his great collection on the "customs" of Fez, *al-'Amal al-Fasi*, and a commentary on *al-Shafi'i* by the famous *hujat* 'Isa, entitled *Majma' al-Shafi'i*. He is also the author of a long didactic poem in *najaz*, *al-Umum fi Majma' al-'Ulam*. **Bibliography:** E. Lévi-Provençal, *Hist. Chérif*, 266-9 (with references); Brockelmann, ii, 612, S. 1, 694. (E. LÉVI-PROVENÇAL)

'ABD AL-RAHMAN b. HADIR b. AMI 'URAYDA (or 'ABDA) al-FIHRI, great-grandson of the famous *tabi'* 'Uqba b. Nafi', independent governor of Ifrikiya at the end of the Umayyad caliphate. His father, Habib, had sent expeditions against the Sās, Morocco and Sicily, in which 'Abd al-Rahman, still a youth, took an active part. He was one of the survivors of the bloody defeat inflicted by the

Berber upon the regular Arab troops in 123/741, in which his father and the governor, Kulthum b. 'Iyad, lost their lives. He crossed over to Spain, but fearing for his life, returned in 127/745 to Ifrikiya, where he revolted against the actual governor, Hanzala b. Salwān al-Kalbi, who two years later saw no other choice but to yield the power to him. 'Abd al-Rahman, on becoming master of al-Kayrawān, had to suppress several rebellions and undertook several large expeditions, notably against Sicily and Sardinia, in 135/752. His seizure of power was the less contested as it coincided with the fall of the Umayyad dynasty. It seems that 'Abd al-Rahman at the beginning he acknowledged the 'Abbasid allegiance, but shortly afterwards repudiated it, on the receipt of an insulting message from the caliph al-Mansur. No doubt at al-Mansur's instigation, two of the brothers of 'Abd al-Rahman decided upon his ruin; he was assassinated by one of them, Hayk b. Habib, who took possession of al-Kayrawān 137/753. Habib, son of 'Abd al-Rahman, with the help of another uncle of his, 'Isma'il b. Habib, governor of Tunis, soon afterwards attacked the usurper and, in turn, made himself master of Ifrikiya.

Another 'Abd al-Rahman b. Habib al-Fihri, a contemporary of the preceding, who was called, to distinguish him from the former, by the surname of al-Shahid, was a propagandist of the 'Abbasids in Spain. Pursued by the Umayyad prince, 'Abd al-Rahman I, he was assassinated near Valencia in 102/728-9.

'ABD AL-RAHMAN b. 'ABD ALLAH al-GHAFIRI, governor of al-Andalus. He succeeded Muhammad b. 'Abd Allah al-Ash'ath in this office at the end of 111 or at the beginning of 112/729, and retained it until his death in 114/732. 'Abd al-Rahman, who had already governed Spain provisionally for about two months in 102/721, was a *tabi'* reputed for his piety. He is chiefly famous for the incursion into Gaul that cost him his life. His expedition, which was carefully prepared, had for its object the basilica of St. Martin at Tours. He collected a numerous army, and from Pamplona marched through the pass of Roncesvalles on Bordeaux, which he devastated, Duke Eudes of Aquitaine being powerless to oppose his advance. He then advanced towards the Loire, but was checked in his progress by the Duke of the Franks, Charles Martel, who engaged him about 20 km. to the north east of Poitiers and inflicted on him a severe defeat. The battle is known as the 'Battle of Poitiers' in French historiography, while the Arabs call it *halal al-Bashada*, "causeway of the martyrs of the faith". The Muslim survivors retreated in disorder towards Narbonne, leaving behind on the battlefield many dead, including 'Abd al-Rahman. The date of this memorable encounter can be fixed at the end of Oct. 732/Ramadan 114.

'ABD AL-RAHMAN b. 'UMAR al-SUFI, Abu 'l-Husayn, eminent astronomer, born at Rayy

14 Muharram 291/8 Dec. 903, died 13 Muharram 376/25 May 986. In 317/948-9 he was in Isfahan, in attendance on the vizier Abu 'l-Fadi b. al-Amid, in 320/961 at the court of 'Adud al-Dawla, no doubt in the same town. He was the court astronomer of this ruler, who boasted of three of his teachers: in grammar al-Fārid, in the knowledge of astronomical tables Ibn al-A'lam, and in the knowledge of the constellations 'Abd al-Rahman al-Sufi (Ibn al-Kūfī; cf. also Yāqūt, *Irdhād*, iii, 10). His best known work is a description of the fixed stars (*Suwar al-Kawākib al-Sābiqa*, quoted in his different titles), which he wrote about 355/965 and dedicated to 'Adud al-Dawla. The book described the constellations both according to the system of the astronomers (after Ptolemy) and the Arabic tradition of the *awna'* [cf. Nawā]. The work was illustrated by drawings, which the author, according to his own declaration, preserved by al-Mutawakkil b. al-Dawla, *Genesio der Mathematiker bei den Griechen und Arabern*, Erlangen 1922, 86), traced from a celestial globe. He also saw, however, as he says in his introduction, an illustrated work on the constellations by 'Uṭrid b. Muhammad. The earliest extant MS. in the Bodleian Library, was copied and illustrated by the author's son, in 400/1009-10. There are many other manuscripts, illustrated in the styles of the various epochs. See J. Upton, *Metaphysical Museum Studies*, 1933, 189-99; K. Hutter, *Die Islamischen Miniaturhandschriften vor 1350*, Zentralbl. f. Bibliothekswesen, 1937, 2-5; cf. *Ar. Islamica*, 1940, 101. The text and translation of the introduction was published by Causin de Perceval, *Notices et Extraits*, xii, 216 ff., a full translation by H. C. F. Schjellerup, *Description des étoiles fixes par Abd al-Rahman al-Sufi*, St. Petersburg 1871. The Arabic text was published, mainly after the Paris MS (being the copy of Uluḡ Beg), in Hyderabad 1953, under the editorship of M. Nizamuddin. His other extant works are a handbook of astronomy and astrology and a treatise on the use of the astrolabe. A silver globe made by al-Sufi for 'Adud al-Dawla was preserved in the library of the Fatimid palace in Cairo (Ibn al-Kūfī, *al-Furūq*, 107). The *Urdun* of the fixed stars, attributed to a son of his, cf. Brockelmann, S. 1, 863; it was published at the end of the Hyderabad edition of the *Suwar*.

(S. M. STERN)

'ABD AL-RAHMAN KHAN [c. 1844-1901], Amir of Afghanistan, was the son of Afdal Khan, the eldest surviving son of Dost Muhammad Khan, the founder of the Barakzai dynasty in Afghanistan. In 1853 he proceeded to Afghani Turkestan where his father was serving as governor of Balkh. Despite his youth he took part in a series of operations which extended Dost Muhammad's power over Kataghan, Badakhshan, and Derwaz. Before his death in 1863 Dost Muhammad had nominated a younger son, Shīr 'Ali, as his successor to the exclusion of his two elder brothers, Afdal Khan and Aqam Khan. Shīr 'Ali's succession was therefore the signal for five years of fratricidal warfare in which at the early age of nineteen 'Abd al-Rahman became involved. After temporary successes his father, Afdal Khan, was defeated and imprisoned, whereupon 'Abd al-Rahman fled to

Bulghār. In 1866, taking advantage of Shīr 'Ali's absence at Kandahār, 'Abd al-Rahman, with the help of Rafiq Khan, a general who had deserted Shīr 'Ali, seized Kabul. The defeat of Shīr 'Ali's forces at Sayyidabad led to the fall of Ghazni. Afdal Khan was at once proclaimed Amir and coins were struck in his name. Shīr 'Ali was once more defeated at Kilāi-Ghulzay in 1867 and driven from Kandahār. In the same year Afdal Khan died and 'Abd al-Rahman, who had hoped to be accepted as Amir, found it expedient to support the claims of his uncle Aqam Khan. Their combined forces were defeated by Shīr 'Ali and his son Ya'qub Khan at Zama Khan, near Ghazni, as a result of which 'Abd al-Rahman became a homeless wanderer, first in Wadristik and later in Persia. From Mashhad he crossed the Kara-Kum desert to Kijwa and Samarkand. At Tashkent he was received by General Kaufmann, the Russian governor-general. His request for assistance against Shīr 'Ali was refused but he was granted an allowance and permitted to reside at Samarkand, where he remained for eleven years until the defeat of Shīr 'Ali by the British in the Second Afghan War of 1878-80. The flight and death of Shīr 'Ali, the failure of his successor Ya'qub Khan to control his unruly tribesmen, and the assassination of Cavagnari the British Resident accelerated the removal of Ya'qub Khan to India. This left the Afghan throne vacant.

Because of Russian expansion towards the Oxus it was decided to build up a strong, friendly, and united Afghanistan to serve as a buffer state to the British dominions in India. In July 1880, 'Abd al-Rahman Khan, the most powerful candidate in the field, was informed that the British were prepared to recognize him as Amir of Kabul, provided he acknowledged their right to control his foreign affairs. He was also assured that the British would aid him in repelling unprovoked aggression on his dominions. These terms were accepted by 'Abd al-Rahman at the conference of Zimma, 31 July-1 August 1880 (Foreign Office 65, 1104). Papers printed for the use of the Cabinet. Three years later this promise was renewed by the Marquis of Ripon who bestowed on the Amir an annual subsidy of twelve lakhs of rupees to be devoted to the payment of his troops and the protection of his north-western frontiers. The British were now pledged to defend a buffer state of unknown limits. Hence the most important event in the reign of 'Abd al-Rahman was the delimitation and demarcation of the boundaries of Afghanistan. By 1886, although the Pandjsh incident [?], of the previous year had brought Britain and Russia to the verge of war, an Anglo-Russian Boundary Commission had demarcated the northern frontier of Afghanistan from Dhu'l-Fikr to the meridian of Dulci, within forty miles of the Oxus. The process of demarcation was completed in 1888. The final boundary dispute with Russia was settled by the Pamir Agreement of 1893 which defined the Afghan boundary between Lake Victoria and the Tagdumbash.

Although pro-British in so far as Russian expansion was concerned, 'Abd al-Rahman's desire to annex the territories of the Pathan tribes of the Indian frontier was not calculated to improve Anglo-Afghan relations. The tension was somewhat eased by the Durand Agreement of 1893 which delimited a boundary on the Indo-Afghan frontier across which neither the Amir nor the Government of India was to interfere in any way. Afghan intrigues

on the Indian side of this frontier still continued and were partly responsible for the Indian frontier conflagration of 1897. In fact, Afghān intrigues were the chief cause of unrest on the Indian frontier from 1890 onwards.

The greatest service rendered by 'Abd al-Rahmān to his country was the suppression of internal rebellion. The powerful Ghilzay tribesmen were crushed in 1886; the rebellion of Ishāk, son of Aḥmad Khān, was suppressed in 1888; and finally, after seven fighting, the turbulent Hazāras of central Afghānistān were forced to acknowledge his authority. In 1896 the territories of the non-Muslim tribes of Kāfiristān to the west of Citral were annexed and the Kāfirs converted to Islam. 'Abd al-Rahmān Khān died in 1901 and was succeeded by his son Habib Allāh Khān.

'ABD AL-RAZZĪD B. 'ABD AL-ḠAYYUR AL-HU-SAYNĪ AL-MARĀNĪ AL-TATTĀWĪ, Persian lexicographer, born in Tatta, but a Sayyid by descent; died after 1069/1658. His principal work is a Persian dictionary, usually called *Farhang-i Razzāhī*, or *Razzāhī Fārsī*, the first critical dictionary, which was compiled in 1064/1653 and published in 1075 in the *Bibliotheca Indica*. Spleth revised the preface (*Mukaddama*): *Grammaticae persicae proscripta ad regulas* (Halle 1846). 'Abd al-Razzāhī dedicated an Arabic-Persian dictionary, *Munadhab al-Lughāt*, or *Razzāhī 'Arabi* (1046/1636-7), to Shāhjahān (editions: Calcutta 1808, 1810, 1830; Lucknow 1835, 1869; Bombay 1879/1862).

**Bibliography:** Blochmann, in *JRAS Bengal*, xxviii, 20 seq.; Rieu, *Cat. of Pers. MSS.*, 501, 510; Pertsch, *Verz. d. pers. Handschr.*, Berlin, nos. 198-200.

'ABD AL-RA'ŪF B. 'ALĪ AL-DJAWĪ AL-FANŠIRĪ AL-SINKIRĪ, religious teacher, b.c. 1620 at Singkel, north of Fānsūr (west coast of Sumatra), d. after 1693, and buried at the mouth of the Acheh river. He studied for nineteen years in Arabia, was initiated into the *Shattāriyya tarīqa* by Ahmad al-Kuḥshārī and his successor Ibrāhīm al-Kūrānī, and returned about 1661 to Acheh, whence this *tarīqa* was propagated by his pupils throughout Indonesia, especially in Java. Directions for "recitation" (*dhikr*), as practised by this order, form the most important subject of his writings, of the majority of which are in Malay, but a few in Arabic — some with a Malay rendering after each phrase. The subject is dealt with most fully in his '*Umdat al-Mahdūdīn ilā Sulūk Maslak al-Mufriḍīn* which has as introduction a summary of dogma on the same lines as al-Sanā'a's *Umm al-Iḥāsān*. He took as a theoretical basis for his mysticism the doctrine of the seven grades and of man as the image of God, which he set out in such works as *Kifāyat al-Mukhlidīn*, *Dab'ih al-Hurūf* and *Bayān Taḥḍīlī*. In this he remained within the bounds of orthodoxy; he rejected the extreme mysticism which flourished at Acheh at the beginning of the 17th century, but at the same time did not associate himself with the violent polemics of al-Rāzīnī [p. 8]. 'Abd al-Ra'ūf moreover

translated the *Kur'ān* into Malay with a concise commentary taken from various Arabic exegetical works (cf. *Taḥḍīr al-Mustafid*) and wrote a Malay handbook of *Shāhī* 'the *fiqh* which deals only with the *mu'āmalāt* and is plainly intended as a supplement to al-Rāzīnī's *al-Sirāt al-Mustahīm* which contains only the '*ahādī*. His translations from the Arabic are so literal that they are unintelligible without a knowledge of that language, and moreover not without mistakes. It is not altogether certain whether he was the translator of *al-Mawā'iz al-Bad'iya*, which is a translation into Malay of a popular Arabic collection of 32 *hadīth* *ḥadīth* and eighteen other admonitions. There are some other works ascribed to him, such as the mystical eschatological Malay poem *Shair ma'rūfāt*, which are certainly not by his hand. After his death, as Teungku di-Kuala, 'Abd al-Ra'ūf enjoyed such veneration that he was even accorded the honour of having been the bearer of Islam to Acheh.

'ABD AL-RAZZĀK KAMĀL AL-ŪTH M. ANU 'L-ḠANĀ'IM AL-KĀSHĀNĪ (or KĀSHĀNĪ or KĀSHĀNĪ), celebrated Sūfī author, died according to Ḥādīdī Khālifa (ed. Flügel, iv, 427), in 730/1329. Ḥādīdī Khālifa, however, confusing him with the historian of the same name, the author of the *Maḥā* al-Sa'dāin, says in another place (ii, 175) that he died in 885/1482 and, besides, gives his name as Kamāl al-Dīn Abū 'L-Ḡanā'īm. 'Abd al-Razzāk b. Djamāl al-Dīn al-Kāḡhī al-Samarḡandī. Little is known of 'Abd al-Razzāk's life; according to *Djāmī* (*Nafahāt al-Uns*, quoted by St. Guyard), he was a pupil of Nūr al-Dīn 'Abd al-Samad and a contemporary of Rukn al-Dīn 'Alā' al-Dawla, with whom he carried on a somewhat acrimonious controversy, and who died in 726/1326. The immediate cause of this correspondence was a conversation which 'Abd al-Razzāk had with a certain amir Ikḥāl Sīstānī, a pupil of 'Alā' al-Dawla's, on the road to Sultāniya on the vexed question of the orthodoxy of Ibn 'Arabī. *Djāmī* then gives a long letter which 'Abd al-Razzāk wrote to 'Alā' al-Dawla on this question, in which he says that he had just read 'Alā' al-Dawla's book, the '*Uṣṣa*. As this work was written in 721/1321, the date 730/1329 given as that of his death must be assumed as the correct one. We have then to place 'Abd al-Razzāk in the *Djibāl* province (Kāshān) under the *Ilkhāns* of Persia, and especially in the reign of Abū Sa'īd (716—36/1316—35).

He was the author of a large number of works, several of which have been published. So far back as 1828, Tholuck used his *Lat'if al-'Alām* in *Die speculative Theistologie des späteren Orients* (13—22, 28 ff. seq.) and translated some passages, but without knowledge of the author. In 1845 Sprenger published at Calcutta the first half of his *Ilḥādāt al-Sūfiya*, or *Dictionary of the technical terms of the Sūfīs*. An

analysis of the second part had been given by Hammer-Purgstall, in the *Jahrbücher der Literatur* (lxviii, 68 ff.). This book also was used by Tholuck, and cited under the author's name (loc. cit. 7, 11, 18, 26, 73). It is of special interest because in the preface he states that it was written after he had finished his commentary on the *Manāzil al-Sā'irīn* of al-Harawī in order to explain the Sūfī technical terms which occur but are inadequately explained in that work, and also in his commentary on the *Fuṣṣ* al-*Ḥikām* of Ibn 'Arabī (Cairo 1309) and in his *Taḥḍīl al-Kur'ān*. According to Ḥādīdī Khālifa (ii, 175) the *Taḥḍīl* of 'Abd al-Razzāk related to Sūfīs *ḥaṣṣ* only, yet Berlin MS. no. 872 covers the entire *Kur'ān*, but apparently in abstract. *Kisāla fī 'l-hadā' wa'l-badā'*, treatise on predestination and free will, first translated into French, (*JA*, 1873; revised edition 1875), then the text published by St. Guyard (1879); it will be dealt with in detail below. The treatise seems to have excited attention, for Ḥādīdī Khālifa (iii, 429) gives three answers to it by Ibn Kamāl Faḡla, Taḥḍīr-ḡāzī and Bāl Khālifa Sūfiyawl. A commentary on the *Ta'wīya* poem of Ibn al-Fārid (Cairo 1310). His works as yet unpublished are: *Kisālat al-Sarmādiyya*, on the idea of an eternal Being; *Kisālat al-Kumayliyya*, on the traditional answer by 'Alī to the question of Kumayl b. Ziyād fī *ḥādīth* (comp. the Berlin MS. no. 3462; Ḥādīdī Khālifa iv, 38; *JA* 14, 81); a commentary on the *Maḥā* al-Sa'dāin of Ibn Arabī and Taḥḍīr al-Sūfiyya. Ḥādīdī Khālifa (iv, 587) adds *Miḥāb al-Hādīya*. For MSS. reference will suffice to Brockelmann, ii, 203, 204; S. ii, 280-1; the Gotha cat. no. 76, 2, and Palmer's *Trinity College Cat.* 116.

It will already be tolerably clear what 'Abd al-Razzāk's interests and positions were. He was a Sūfī of the school of Ibn 'Arabī, the great theosophist of the Western Arabic type, though with touches of independence, and he gave much labor to defence and exposition of his master. In the three great divisions of Muslim theologians, the upholders of tradition (*naḥl*), of reason (*'aql*), and of the unveiling of the mystic (*kashf*), he took his place with the third. It may be significant that his name never indicates to what legal school he adhered. Like many mystics, he may have regarded such matters as beneath notice, or he may, like Ibn 'Arabī, have been a belated Zāhirite in law, as he was evidently a Bāṭinite in theology. The last is plain through the title itself of his exposition of the *Kur'ān*, *ta'wīl*, not *tafsīr*, and is shown in detail in his *Ilḥādāt* and his treatise on *badā'*. In the last we have the normal combination of the Aristotelian universe, the Neo-Platonic metaphysics and theology and the *Kur'ānī* mythology of Muhammad. These all appear, too, in Ibn 'Arabī, but perhaps 'Abd al-Razzāk is more anxious to lay the last element prominent, and to proclaim thus his essential orthodoxy. Certainly, he strives to avoid the absolute merging of the individual, and the consequent fatalism of Ibn 'Arabī and to lay a possible basis for individual responsibility, for freedom and rewards and punishments hereafter. His method in this is as follows. In order to bring out clearly the forces leading to any event and the close interweaving of all causes and effects to make up the great organism of the universe, he begins with a description of the universe on the Sūfī scheme. It is the Neo-Platonic chain. Above is God, the One, the Alone; from him proceeds, by a dynamic emanation, the Universal Reason

(*al-'aql al-awwal*), called also the Primary or Universal Spirit (*al-rūḥ al-awwal*) and the Highest Knowledge (*al-'ilm al-'alā*). This is a spiritual substance and the first of the properties which the divine essence implies. From it two other substances are produced, one spiritual (*rūḥāniyya*) which is the substance of the world of the Universal Reason, considered as apart from God and inhabited by particular intelligences, somewhat as fractions of the Universal Reason, which are the angels of revealed religion; the other is psychical, being the Universal Soul (*nafs*). Finally come the material elements with their natural forces and laws. In the Universal Reason are the types of all things, as universals, and this Reason, with its types, is known directly by God. God's omnipotence (*kāhriyya*) is manifested through these angels or Intelligences, and their world is therefore called the World of Power (*'ālam al-hudra*). But they also, in their perfection, repair the imperfections of other beings. Their world again, therefore, is called the World of Repairing (*'ālam al-ghabar*). Some, however, take the other sense of the root *ghar* and render it, the World of Constraint, because they constrain other beings towards perfection. This world is also called the Mother of the Book (*umm al-kitāb*; *Kur'ān*, xiii, 39, xli, 4), from it comes all knowledge of divine mysteries, it is above all fetters of time and change. The world of the Universal Soul, on the other hand, is called the World of Ruling (*'ālam al-malakūt*), is a step nearer the particular, material world. The types which exist in the Universal Reason become in it general conceptions, and these are further specialized, determined, limited, brought near to what we know, by being engraved on the individual reasonable souls, which are the souls of the heavenly bodies, corresponding to the angelic Intelligences, the fractions of the Universal Reason. This world, from its likeness to the human imagination, is called the Imagination of the World (*ḥayyāl al-'ālam*) and the Nearer Heaven (*al-samā' al-dunyā*). From it issue all beings in order to appear in the World of Sense (*'ālam al-shakāda*), it moves and directs everything, measuring out matter and assigning causes. The heavenly bodies, then, have reasonable souls just like our own, these are the imaginative faculties of the particular reasonable souls, into which the Universal Soul divides. On their changes all change in this world below depends (comp. al-Ḥazālī's scheme, in *JAOS*, 1899, 116 ff.).

Further, this constitution of the universe corresponds to man's body, macrocosm to microcosm. Just as the brain is the seat of man's ruling spirit, so the Universal Spirit or Reason is seated in the throne (*'arḡ*) above the sphere of the fixed stars. The fourth heaven, the sphere of the sun, which vivifies all, is the seat of the Universal Soul, in man this is the heart, wherein is his particular, reasonable soul. So the fourth sphere is like the heart, and the sun like the physical heart. The individual soul of the sun corresponds to the animal spirit in the heart, which is the source of human life.

Next, as to the place of predestination in this scheme, for that there are three words, *badā'*, *badā'* and *'ināya*. *Kadā'* means the existence of the universal types of all things in the world of the Universal Reason, *Kadā'* is the arrival in the world of the Universal Soul of the types of existing things, after being individualized in order to be adapted to matter, these are joined to their

causes, produced by them, and appear at their fixed times. 'Ināya is, broadly, Providence and covers both of the above, just as they contain everything that is actual. It is the divine knowledge, embracing everything as it is, universally and absolutely. It is not in any place, for God's knowledge, in His essence, is nothing else than the presence of His essence before His essence, which is essentially one and goes with all the qualities which inhere in Him. Further, while the essence (*ḥaṣṣa*) of *ḥādā* is part of the 'Ināya of God, its entelechy (*ḥamāl*) is in the world of the Universal Reason. The Universal Soul is sometimes called the Preserved Tablet (*al-lawḥ al-maḥfūḥ*), for on it are preserved unalterable all the general conceptions which are on their way to the individual heavenly souls.

It is the world, then, of *ḥādā*, of the Soul, which sets everything in motion. This is by the yearning of the reasonable souls of the heavenly bodies towards their spiritual source, the Universal Reason. They try to assimilate themselves to this, to universalize themselves. Step by step, they mount up, and with each advance they perceive a new outpouring from that source, drawing them on farther. With each movement, there flows from them an influence upon matter according as it is adapted to receive it, and thus there is a series of changes in the material world, corresponding to those in the world of the Soul. These changes may be either absolute of creation and destruction, or, between those extremes, simply of condition. The duration of existence constitutes the Kur'ānic *adāl*, and all these are fixed by *ḥādā*.

Finally, this exegesis of Kur'ān, li, 1-6 will show how 'Abd al-Razzāk applied Scripture. "By the Mount and by a Book Inscribed in a Parchment Outspread, and by the Frequent House, and by the Raised Roof, and by the Flowing Sea!" The Frequent House is the Spirit of the fourth sphere, that of the sun. Therefore Jesus, the Spirit of God, has been placed there, whose miracle is the raising of the dead. The Mount is the 'Arak, the seat of the Universal Reason. The Book Inscribed is *ḥādā*, which is in that Reason; and the Parchment Outspread is the Reason itself. The Raised Roof is the nearest heaven, where are the individual celestial souls; it is mentioned immediately after the Frequent House, because from this heaven the forms descend on the earth, and from the Frequent House comes the breath of the Spirit, by the combination of which the creation of animated beings is achieved. The Flowing Sea is the sea of primary matter which spreads everywhere and is filled with forms.

Now, then, is such a scheme related to predestination and free will? It is highly complicated, consisting of a remote first cause and an infinity of intermingling and crossing, nearer, secondary causes. It is possible to look at these last only, and so to assign absolute creative and deciding power to our own will. Or to look only at the first cause and become fatalists. We must preserve the balance and hold by both. The complete cause of anything into which human will can enter must have as an element in it, among so many others, free will. It sets all the others in movement. Under this conception, though never clearly stated, is evidently implied that man has in him an element of the divine nature, there must be also in his emanations. For Ibn 'Arāk the essence of the divine

nature over against the creation had overcome everything. 'Abd al-Razzāk lays stress on the multitudinous interweaving causes of the world, its constantly developing processes, to show that in life, purpose and will there must be multiplicity. The divine is spread down through the sub-lunar things, it does not simply rule from above. Again, amongst the many causes working in the world and upon men are the restraints and influences of religion, the promises and threatenings of the prophets. These we should permit to have their effects upon us as parts of the whole scheme, the process of training under which we are. But, again, why should training be necessary? Why are there good and bad? Here, again, is an implication, once pretty clearly expressed. Matter is of very differing natures, grosser and finer, it can receive only a corresponding soul, therefore souls also vary. Character and disposition is a combination of both, and it is for the soul to overcome its material body and itself rise. This evidently is the fundamental thought, but 'Abd al-Razzāk does not give much space to it. Rather, he uses the old theological argument that it is the best possible creation, otherwise God would have created a better. Further, if all things were equal, there could be neither order nor organization. This would also be hard on those less perfect things thus ruled out of existence. All things should have a chance; it is for them to use it. God knows their differences and will allow for them. The most and the greatest sin are from ignorance, and God will so treat them. In the life to come the same thing is to go on. Some will attain felicity, others, because they might have done better, must undergo purification by punishment, but that will not be eternal. Here, perhaps, 'Abd al-Razzāk is most unsatisfactory. He passes over into the normal Muslim conception although it is not at all clear that his system can be in any way apart from matter. Freed souls, we should expect, would either return into the unity, or else be sent forth again to another material life. Like so many in Muslim theology and philosophy, this tractate was adapted to an audience, and was not perfectly ingenious. Yet behind its caution of statement the real system is tolerably plain. It is nearer orthodox than that of Ibn 'Arāk, but not as near as this exegesis would suggest.

**Bibliography:** St. Guyard, in *Journ. As.*, 7th ser., i, 125 ff., which is the main source; Brockelmann, ii, 203-2 (treating him as two different persons), S ii, 280-1.

(D. B. MACDONALD)

'ABD AL-RAZZAK KANAL AL-DIN B. DIALAL AL-DIN ISMA'IL AL-SAMARKANDI, Persian historian, author of the well-known *Maṭla' al-Sa'dayn wa-Maṭla' al-Bakrayn*, born in Harāt Shāhān 887/Nov. 1413, died there 944/Dec. 1487. His father was *imām* and *add* of the camp (*ḥaṣṣa*) of Shāhrukh and read out books and expounded various problems (*masā'il*) to him (*Maṭla'*, ii, 704, 879, cf. 709). He received the usual type of education, and one of his teachers was an elder brother 'Abd al-Kābir. He also attended when his father read the two *Sakhs* to Shams al-Din Muḥ. al-Djazarī (d. 833/1429) (*ibid.*, ii, 631-1294) and received an *idjāza*. After the death of his father, he used to attend the court of Shāhrukh with his elder brothers, but when in 841/1437-8 he dedicated his *Shāh* on al-Rūḍa al-Rāḥiyya to the king and presented it to him, he was taken into

service and allowed to attend the court regularly. Two years later, he was examined by the '*ulamā'*' at the court, and granted a salary and provisions (*marāḥim* 904/*ṣalāḥ*) (*ibid.*, ii, 704, 731 f.).

In Ramadān 845/Jun. 1441 'Abd al-Razzāk was sent to India as ambassador and returned in Ramadān 848/Dec. 1444. (For his mission and the result obtained see *Maṭla'*, ii, 783; T. W. Arnold, *The Caliphate*, Oxford 1924, 113). He was similarly sent to Gilia in 860/1446. He was ordered to make ready for a mission to Kept in the same year, but due to the death of Shāhrukh this was cancelled. In the period following the death of that king he served his successors Mirzā 'Abd al-Latif, Mirzā 'Abd Allāh and Mirzā Abū'l-Kāsim Bābur, with some as *padr*, with others as *na'ib* and *khāṣṣ*; see *ibid.*, ii, 1440. Under the last-named prince, who included him among his confidants, he enjoyed many favours (*ibid.*, ii, 1119). In 856/1452 he was in 'Yam with Mirzā Bābur, when the Mirza interviewed Sharaf al-Dīn 'Alī Yazdī, and in 856/1452 he was with the same prince when he besieged Samarkand, in which city 'Abd al-Razzāk had many friends and old acquaintances (*Maṭla'*, ii, 1041, 1078). In 860/1462 he was sent to Asfuzār for fixing taxes (*ḥuṣūl* *ḥaqāq*). Soon after, under Sultan Abū Sa'īd, he was appointed *ḥāṭim* Jan. 1461 the vizier Khwārdizād. Kuṭb al-Dīn Tā'ib Simnānī appointed him *ḥāṭim* (governor) of the *ḥaṣṣa* of Shāhrukh (*Maṭla'*, ii, 1270), which post he held till his death.

The *Maṭla'* describes, with a brief mention of the birth (704/1304-5) and accession (716/1316-7) of the ʿIlkhān Abū Sa'īd, the events of the years 717-823/1317-1417, in chronological order. Up to the year 820/1426-7 it is principally made of the *Zuhd al-Tawārīkh* of Hāfiẓ-i Ahrū (q.v.), which is at times quoted literally. The famous account of the embassy to China in 823-5/1420-2, is also taken from the *Zuhd*. For the period from 830 to 875/1426-71 'Abd al-Razzāk's work is one of the most important original sources of information. Cf. the letter of 'Abd al-Waḥid al-Nisābūrī (for him see *Ḥabīb al-Siyar*, iii, 1, 325) in *Maṭla'*, ii, 1420, which refers to his indebtedness to Hāfiẓ-i Ahrū for the earlier period and his impartial narrative relating to the period in which he himself lived. An edition of vol. ii was published piecemeal in the *Oriental College Magazine*, Lahore Nov. 1933 onwards, and later a separate edition was published in two parts (Lahore 1960/1961 and 1960/1962). Ms. of the work are to be found in nearly all the larger European collections but they are now rare in the East. The Panjab University Library has an autograph copy of vol. ii, acquired recently. It was completed by the author on 17 Rabī' i, 875/13 Sept. 1470, the correction of the copy being completed by him on the 18th Sha'ban 885/23rd Oct. 1486. E. Quatremère gives extracts from the work in the *Nouvelles études*, Paris, part 1; as also H. M. Elliot in his *History of India*, iv, 89-126, and others (for whom see Storey).

From the *Maṭla'* (ii, 190) we learn that 'Abd al-Razzāk also wrote a work on the history of Harāt and its districts (*ḥaṣṣa*). In some places in the *Maṭla'* (e.g. ii, 951, 1208) he also quotes his own poems.

**Bibliography:** Storey, ii, 203-8; W. Barthold, *Turkistan*, 261; Khwāndamīr, Bombay 1857, iii/3, 315. (W. BARTOLD-MOHAMMAD SHAFI) 'ABD AL-SALĀM B. MASHISH AL-HASANĪ. Practically nothing is known of this personage, who has become one of the "poles" (*ḥaṣṣ*, q.v.) of popular mysticism in Morocco. The only fairly certain fact

is that he died in 625/1227-8 by assassination in his hermitage on the Djabal al-'Alam, in the territory of the Banū 'Arūs, to the south-east of Tetuan. He is said to have fallen victim to a man of the region, Muhammad b. Abī Tawāḍīn al-Kutāmī, belonging to Kaṣr Kutāma, who had rebelled against the decaying Almohad power and was attempting to pass himself off as a prophet, and who assassinated the saint because the latter's prestige was an obstacle to his ambitions. 'Abd al-Salām was buried at the top of the mountain, at the foot of an oak, and seems to have been for a long time the object of a purely local cult; Ibn Khaldūn does not mention him, nor for that matter the revolt of his murderer.

Besides this account of his death, which seems to be reasonably probable although reported by much later authors, little more is known of the saint than his genealogy, which, through several ancestors with typically Berber names, attaches him to the house of the Prophet. He is said to have been born in the neighbourhood of the Djabal al-'Alam, into the tribe of the Banū 'Arūs, and to have gone "in pursuit of learning" to the East at the age of sixteen; then, on his return, to have followed at Bādīya (Boogie) the instruction of the famous Andalusian mystic Abī Madyan (q.v.), and to have come back finally to stay in his native country, where he lived an edifying life as an ascetic in his mountain hermitage.

His teaching is scarcely better known, in spite of the elaborations which it acquired in Moroccan mysticism. "Perform the obligations of the Law and avoid sin", he is said to have advised a disciple who had asked him for a rule of life, "keep your heart aloof from every temporal attachment, accept what God sends you, and put above all else the love of God" (Ibn 'Aṣād, *K. al-Ma'ādhīr*, 106). It is related also that he had as a disciple Abū 'I-Haṣṣan 'Alī al-Shādhilī (q.v.), who came to him for his initiation into mysticism.

Only from the 13th century, it seems, at the time when the marabout movement connected with al-Shādhilī became active in Morocco, did the fame of 'Abd al-Salām extend beyond the limits of his tribe into the whole northern part of Morocco. He was then regarded as the "pole" of the West, as 'Abd al-Kādir al-Gilāni was regarded as the "pole" of the East. A pilgrimage was organized around his tomb in the three days following the *maulūd nahāl*. A colourful description of it, applying to the last years of the 19th century, will be found in *Le Maroc inconnu* of A. Mouléras.

'ABD AL-SAMAD B. 'ABD ALLĀH AL-PALIMBĀNĪ, i.e. of Palembang in Sumatra, was a pupil of Muhammad al-Samānī (d. 1790/1776), the founder of the Samānīyā order (cf. Brockelmann, S II, 535 and Nachtr.). He is known chiefly as translator of al-Ḥazālī's *Lubāb al-ḥayā'* 'Uṣūl al-dīn into Malay, under the title of *Sayr al-Salāṭin al-dīn* 'Uṣūl al-dīn al-Salāṭin. It was begun in 1793 and finished at Ta'īd in 1203. The translation is very free, shortened in some places, enlarged elsewhere by numerous additions, the sources of which are enumerated in book iii, bāb 10. Here we find also an interesting list of 107 literature recommended by the author to three stages of pupils in Siliṭim. Most of the works in this list are in Arabic, but some in Malay. It seems that 'Abd al-Samad lived mostly in Arabia. One of his earlier writings, *Zahr al-Murīd fī Bayān Kalimat al-Tawhīd*, is an Arabic treatise on *muṣṣaṭ* and *uṣūl al-dīn*, based on notes which he took during a lecture given at Mecca by Ahmad al-Damāshqī (Brockelmann, II, 371) in 1778. His *Ḥudayāt al-Salāṭin fī Salāṭ al-Muṣallīn al-Muṣallīn* is a Malay adaptation of al-Ḥazālī's *Ḥudayāt al-Hudayāt*, finished at Mecca, 5 Muḥ. 1192. In Arabic he compiled a collection of *awā'id* entitled *ʿUṣūl al-Wuḥūd wa-Salāṭ al-Ḥikm*, a *riḥab*, and a treatise entitled *Nashat al-Muṣallīn*. This last work contains fervent admonitions to holy war against infidels. It inspired the author of the Acehese poem *Ḥikayat Prang Sabi*, of which various redactions were circulated in Aceh during the war against the Dutch in the last quarter of the 19th and the beginning of the 20th century.

**Bibliography:** Ph. S. van Ronkel, *VBG* 37, 383, 400, 429, 441, *Suppl. Cat. Arab. Mus. Batavia*, 139, 216; R. O. Winstedt, *A history of Malay literature* [JMBRAS 17, III], 103; H. I. Dams, *Ḥikayat Prang Sabi*, in *ITJG* 84, 345 ff.; for the Samānīyā: C. Snouck Hurgronje, *The Acehnese*, II, 216 ff. Two of 'Abd al-Samad's works have been frequently printed: *Sayr al-Salāṭin*, Mecca 1306 (18th.), 1309 etc.; *Ḥudayāt al-Salāṭin*, Mecca 1307 (18th.), Bombay 1311, etc. On two works of dubious authorship see *TBG* 85, 110. The tract *Uṣūl al-Muṣallīn* by 'Abd al-Samad b. Fakih Husayn b. Fakih Muhammad is not the work of an Indonesian author, though on the title-page of the lithographed edition the epithet al-Palimbānī is added to the author's name; its attribution to a Zaydī author (Brockelmann, S II, 906) is equally false. (P. VOORHOEF)

'ABD AL-WĀDĪDS (BANC 'ABD AL-WĀD, or ZAYYĪNS, BANC ZAYYĪNS), a Berber dynasty which, from the first half of the 7th/13th century to the middle of the 10th/16th century had its capital at Tlemcen [Tilimsin, s.v.], and extended its power, against frequent opposition, over the central Maghrib (from the frontiers of the present Morocco to the meridian of Bougie).

According to the correct record by Ibn Khaldūn, the Banū 'Abd al-Wād were Zanāta 'of the second race'. Like the Banū Marīn, B. Taghā, B. Rikāhid and B. Maṣh, they belonged to the great Zanāta family of the Banū Wāṣin. Living as nomads, like their neighbours and relatives, the B. Marīn and B. Taghā, they once occupied a more extensive territory, reaching to the vicinity of the Awrūs. In consequence of the Hilāl invasion (5th/11th century) these Zanāta nomads, driven eastwards, were forced to abandon their territory to the Arab nomads and to emigrate to the high plateaux of what is now the province of Oran. The

conquest of the country by the Almohads, at the beginning of the 6th/12th century, made the fortune of the Banū 'Abd al-Wād. They proved themselves loyal and useful allies of the caliphs of Marrākūsh, especially at the time when the terrible ravages of the Almoravid Banū Ḥabībīya brought destruction upon Ifrīkiya and the central Maghrib (581-600/1185-1203). The assistance which they gave to the Almohad forces earned its reward. Tlemcen, successfully defended, profited by the ruin of the neighbouring centres and by the emigrations that were depopulating them. In 631/1235 the chief of the Banū 'Abd al-Wād, Yaḡmurāsan, better: Yaḡmūrān, b. Zayyān, inherited from his brother the command over all the branches of the family. This dignity, ratified by the consent of the tribes, was confirmed by a diploma of investiture issued by the Almohad caliph al-Kāshīd.

Yaḡmurāsan, the ḡayyāh of an imposing nomad group, who used to lead his tribesmen and their flocks periodically from the desert to the plains of the province of Oran and who could speak only the Berber dialect of the Zanāta, became the sedentary sovereign of a powerful state. He had moreover the qualities of a founder of empire: energy, the ability needed to hold his associates together around him, political insight, a taste for grandeur and the generous gesture. During a reign that lasted not less than 48 years (631-81/1235-83), he also encountered the dangers that never ceased to menace the kingdom of Tlemcen. These arose on the one hand from the legacy of the clan's former life and the rivalries that set Berber against Berber, and on the other hand from the consequences of the new situation in which the 'Abd al-Wādīs found themselves. True to his duty as a vassal, he supported the last Almohad caliphs against the Marīnids, who had become the masters of Fez. The fall of the Almohads in 646/1248 left him face to face with the Marīnids. Between the Marīnids and the 'Abd al-Wādīs there was a long tradition of conflict; it was singularly widened by the establishment of the two kindred kingdoms, neighbours and all the more ardently rivals.

These are the main themes which dictated the course of the external history of the 'Abd al-Wādīs. Yaḡmurāsan foresaw their development and on his death-bed, so the story goes, he traced for his son 'Uḡmān the conduct he should adopt with regard to the other powers: a strictly defensive attitude as against Marīnid Maghrib; attempts at expansion at the expense of the Hilāl kingdom of Tunis, as occasion should offer. In addition to this political testament, his successors could derive lessons from the activities of Yaḡmurāsan himself: his firmness in the face of the Zanāta, his relatives in the central Maghrib, namely Maḡrawa and Banū Taghā; in Spain, the triple alliance which he concluded with the sultan of Granada and the Christian king of Castile, as occasion should offer; the action of the Marīnids, their common enemy, both in North Africa and in the Peninsula.

The struggle of Fez against Tlemcen, the attack on the 'Abd al-Wādīd kingdom—the first objective of their expansion in North Africa—by their western neighbours, the Marīnids, is the principal motif of this history and could serve to mark its stages. The first noteworthy episode was, under 'Uḡmān, the son of Yaḡmurāsan, the long siege of Tlemcen by the Marīnid sultan Abū Ya'qūb al-Manṣūr, who isolated it during eight years (698-706/1298-1306) by a rigorous blockade and began to build the

encampment-town of al-Manṣūra (see ANC ZAYYĀN I). This time, Tlemcen did not fall. After expanding eastwards, under Abū Hammū II [s.v.], the 'Abd al-Wādīs were again attacked by the Marīnid Abū 'Iḥāsān (see ANC ZAYYĀN I), and on 2 Ramadan 737/2 May 1337 Tlemcen was taken by storm. After ten years of Moroccan domination, Tlemcen was delivered from the foreign yoke in 749/1348 by the two brothers Abū Sa'īd and Abū Ṭhābit, but in 753/1352 was again conquered by the Marīnid Abū 'Iḥāsān, and was not regained by the 'Abd al-Wādīs until 760/1359.

These two Moroccan interregnums caused a break in the history of the 'Abd al-Wādīs which was to show itself in all fields of action. Under Abū Hammū II (760-92/1359-89 [s.v.]), the kingdom regained a relative freedom of movement, but attempts at expansion in the direction of the Hilāl

kingdom were frustrated (the expedition of 767/1366 against Bougie ended in disaster) and Marīnid invasion remained as a periodical threat. The struggle with the Marīnids had also taken on a new character, for various reasons: firstly, because of the role played by the Ma'ālī Arabs of Tāfilalt and the valley of the Mālīya (Wādī Mālīyā), who supported Tlemcen against Fez; secondly, through the policy of the Marīnids, whose aim was less to annex Tlemcen than to support an 'Abd al-Wādīd pretender and so to reduce the kingdom to a vassal state; thirdly, owing to the incapacity of the sultans of Tlemcen to defend their capital, and its temporary abandonment by the sovereign to seek refuge with his nomad allies.

This is, in its main lines, the history of the 'Abd al-Wādīs during the second half of the 8th/14th century. For the further hundred and fifty years

## A LIST OF THE 'ABD AL-WĀDĪDS

Abū Yahyā Yaḡmurāsan b. Zayyān  
(633-81/1236-83)  
Abū Sa'īd 'Uḡmān I b. Yaḡmurāsan  
(681-703/1282-1303)  
Abū Zayyān I Muḥ. b. 'Uḡmān  
(703-7/1303-8)  
Abū Hammū I Muḥ. b. 'Uḡmān  
(728/1308-9)  
Abū Ṭāḡhūfī I 'Abd al-Rahmān b. Muḥ.  
(718-37/1318-1337)

## First Marīnid interregnum

Abū Sa'īd 'Uḡmān II b. 'Abd al-Rahmān b. Yahyā b. Yaḡmurāsan—reigning together with his brother Abū Ṭhābit (749-53/1348-52)

## Second Marīnid interregnum

Abū Hammū II Muḥ. b. Abū Ya'qūb Yūsuf b. 'Abd al-Rahmān b. Yahyā b. Yaḡmurāsan  
(760-92/1359-89)  
Abū Ṭāḡhūfī II 'Abd al-Rahmān b. Muḥ.  
(791-6/1388-93)  
Abū Ṭhābit II Yūsuf b. 'Abd al-Rahmān  
(796/1393)  
Abū 'Iḥādīdī Yūsuf b. Muḥ. (796-7/1393-4)  
Abū Zayyān II Muḥ. b. Muḥ. (797-802/1394-9)

during which the dynasty continued to exist they never again became masters of their own fate. It is true that they had nothing more to fear from Morocco, where the weak Wattāsids had succeeded to the Marīnids; but the hegemony passed to Tunis. The last two great Hafṣids, Abū Fāris (827/1422) and 'Uḡmān (871/1466), harking back to the tradition of the first rulers of the dynasty, led victorious expeditions against Tlemcen and imposed in their turn vassal sovereigns of their own choice on the 'Abd al-Wādīd kingdom.

The incurable weakness of this kingdom, its internal quarrels and the cupidity of the foreigners made of the last phase of its history—i.e. the first half of the 10th/16th century—an epoch of submission and decadence. Tlemcen passed successively under the suzerainty of the Spaniards (who had become masters of Oran in 915/1509), then under that of the Turks of Algiers in 923/1517, again from the Spaniards to the Turks, finally under the suzerainty of the Sa'īdī sovereigns of Marrākūsh, from whom it was seized by the Turks in 957/1550.

Abū Muḥ. 'Abd Allāh I b. Muḥ.  
(802-4/1399-1401)  
Abū 'Abd Allāh Muḥ. I b. Muḥ. (804-13/1401-11)  
'Abd al-Rahmān b. Muḥ. (813-4/1411)  
Sa'īd b. Muḥ. (814/1411)  
Abū Mālīk 'Abd al-Wāḥid b. Muḥ.  
(814-27/1411-23)  
Abū 'Abd Allāh Muḥ. II b. 'Abd al-Rahmān  
(827-31/1423-7, 833-4/1429-30)  
Abū 'Abd Allāh Muḥ. III al-Mutawakkil b. Muḥ. b. Yūsuf (866-73/1461-68)  
Abū Ṭāḡhūfī III b. Muḥ. al-Mutawakkil (873/1468)  
Abū 'Abd Allāh Muḥ. IV al-Ṭhābit b. Muḥ. al-Mutawakkil (873-910/1468-1504)  
Abū 'Abd Allāh Muḥ. V al-Ṭhābit b. Muḥ. IV (910-23/1504-17)  
Abū Hammū III Muḥ. b. Muḥ. III (923-34/1517-27)  
Abū Muḥ. 'Abd Allāh II b. Muḥ. III (934-47/1527-40)  
Abū 'Abd Allāh Muḥ. VI b. 'Abd Allāh (947/1540)  
Abū Zayyān III Ahmad b. 'Abd Allāh (947-50/1540-3, 951-7/1544-50)  
al-Ḥasan b. 'Abd Allāh (957/1550)

There can be no doubt that, compared with the kingdom of their Marīnid kinsmen, that of the 'Abd al-Wādīs appears less rich in men, fertile land and cities, and in every respect less well furnished. Thus it was unable to undertake great military enterprises in North Africa or in Spain. Its geographical position exposed it to the attacks of its covetous neighbours to the east and to the west. The place taken by the Arabs, notably by the great Hilāl tribes of the Banū 'Amīr and Suwayd, who had invaded the plains of the district of Oran, imposed upon it a ruinous collaboration with these nomads. The Arabs, providing troops that could easily be mobilized, and acting as collectors of taxes and repaid in this service, took part in the dynastic crises and always profited by them. The liberation from the Moroccan yoke was due to them. The greater part of the 'Abd al-Wādīd territory passed into their hands, in the form of *shā'is*, beneficiary estates.

In spite of these precarious conditions of existence, and in spite of their slighter resources, which did

from their allegiance, but was killed, in 286/899, at the instigation of Zikrawayh, the leader of the loyalists. The account of the evidently well informed Aghū Mubsin— Ibn Rāḥim is confirmed by Ibn Hawkal (Kramers), 295. The party of 'Abdān survived in southern 'Irāk for some years. It seems that Fātimid orthodoxy rehabilitated 'Abdān's memory. He is mentioned by the author of the *Dawir al-Munadigim* (M. J. de Goeje, *Mémoires sur les Carmathes*, 204) as "one of the most famous among the hidden Imāms". He was made into an author; his 'mystic', 'Ṭa. b. Mūsā, is said to have concocted books in the name of 'Abdān (Aḥbū Mubsin, in al-Nuwairi, and al-Makrīfī, *Ḥiṣṣ*, 130). At any rate, the *Fihrist*, 289, knows numerous books attributed to 'Abdān. B. Lewis, *The Origins of Isma'īlism*, 68, states that several works by 'Abdān are claimed to be in the possession of Syrian Isma'īlī circles; cf. also W. Ivanow, *A Guide to Isma'īlī Literature*, 31. (See also ARBAMATIAN).

(S. M. STERN)

AL-'ABDARĪ (i.e. descendant of 'Abd al-Dār b. Kūwayr, of the tribe of Kurayyah), MUHAMMAD b. MUHAMMAD b. 'Alī b. AHMAD b. SA'UD ABU MUHAMMAD, author of a book of travels bearing the title of *al-Rihla al-Maghrībiyya*. He was staying, with the Ḥāḥā, near Magdala, when he wrote on his journey on 23 Dhū l-Ka'da 688/12 Dec. 1289. The dates of his birth and death are not known: all biographical data are lacking, although he was always held in esteem as the learned author of the *Rihla*. Ibn al-Kādi (*Diwān al-Ḥiṣṣ*, lith. Fez, 199; *Durrat al-Ḥiṣṣ*, i, 124) and al-Makrīfī, *Andalus*, 789, 800 know of him only from his work. That he had still affinities is shown by his interest in the cult of saints; he himself tells that he received the *ṣūfi ḥikma* from the *shaykh* Abū Muhammad 'Abd Allāh b. Yūsuf al-Andalusī in Tunis (MS. Algiers, fol. 154b). In politics he seems to have been a partisan of the Marinids as against the 'Abd al-Wādids. It was due, probably, to this circumstance that he was unable, on his return, to publish his book in Tlemcen.

On his journey he received instruction from the following: *Sharāf al-Dīn al-Dimayṣī* (al-Ḥababī, *Tadhkira*, iv, 278), the famous traditionist Ibn Daḥik al-'Id (al-Suyūṭī, *Ḥusn al-Muhādida*, i, 143), Zayn al-Dīn b. al-Munayyir (Ibn Farḥūn, *al-Dihādī*, 203; Ahmad Bābā, *Nayl*, 191), 'Abd Allāh b. Harīn al-TAY al-Kurayshī in Tunis, Abū Zayd 'Abd al-Rahmān b. al-Asadī in Kayrawān, Abū Ḥasan 'Alī b. Ahmad al-Karāfi and others. His son Muḥammad (see Ibn al-Hāḍim) and Abū Ḥāsim b. Ridwān are mentioned as his pupils. He writes approvingly of some, such as al-Dabbāḡi (author of *Ma'ālim al-Imān*), while others are treated with devastating criticism (e.g. Abū 'Abd Allāh b. 'Abd al-Sayyid of Tripoli).

The importance of his book does not lie in its geographical details. Though he thinks it proper to criticize—with scant justification—some statements of al-Bakrī, he is not a geographer and his summary descriptions of various sights—where he usually follows other geographers—are of no great value. His rhetorical descriptions have no more than literary interest, putting him in the line of similar *Rihlas* (e.g. that of al-Balawī, who travelled 737-45/1336-40). Al-'Abdārī's main concern is with the state of Muslim scholarship and instruction. His notes are important contributions to the history of the scholars of the Maghrib. He shared the customary passion for *ghāṣa*, and gives details of the

authorities from whom he obtained, both for himself and his son, such certificates of study. Thus his *Rihla* turns into a specimen of the rich literature about teachers and books (*tarbiyat*, *ḥadīth*), from which we gain an insight into the range of works usually studied, classical, post-classical, and contemporary. In Kur'ān-reading and grammar the late works of the Andalusians are preferred, in poetry most interest is shown in the famous post-classical poetry of North Africa. Among the longer poetical pieces quoted are *al-Kasida al-Shāhīdiyya*, by Abū Muḥammad 'Abd Allāh al-Kurayshī (cf. 466-1073), in praise of the Prophet, and a *ḡhazl* of the *Montaridja*. He quotes also some of his own poems; for instance one to his son, containing moral advice, another addressed to the Sultan Salāh al-Dīn Yūsuf b. Ayyūb, praying him to deliver the lands of Islam from the Christian yoke.

The influence of the *Rihla* (a MS of which was copied as late as 1883) can be traced in the geographical and historical literature of the Maghrib from the 14th to the 18th cent. For instance, Ibn Baṭṭūṭa's description of the Pharos of Alexandria (i, 29-30) is derived from it; other travellers, e.g. al-Balawī, and also biographers like Ahmad Bābā and Ibn al-Kādi used it extensively. Finally, its moral precepts, to be taken as material and as moral statements of contemporary Iṭṭīkya and Middle Maghrib, makes the *Rihla* a document of considerable interest.

AL-'ABDARĪ ABU 'ABD ALLAH MUHAMMAD b. MUHAMMAD b. AL-HADIM AL-FASĪ (see Ibn al-HADIM).

ABDAST (see WUPU').

'ABDĪ, Ottoman historian. Among the Ottoman historians who bore the *maḥabb* 'Abdī (cf. Babinger, 432 f.), the secretary (*ḫāṣṣ*) of Yūsuf Agha, chief of the eunuchs, is worthy of mention. He was an eye-witness of the magnificent festivities organized in Adrianople in June and July 1673 on the occasion of the circumcision of the crown-prince Muṣṭafā, son of Muḥammad (Mehmed) IV, and of the marriage of the princess Khādīde with the second vizier Muṣṭafā Paṣha (cf. Hammer-Purgstall, vi, 307 ff. and 313 ff.), and in which his master took a prominent part. A different account given in a more concise anonymous description of the same circumcision festival, mostly bearing the title *Medīna-i Sūra Humayūn* (MS Vienna, 1072, of which a part has been lost since Hammer-Purgstall's time but of which the greater part is still preserved; Hammer's translation, iv, 704, replaces the lost section; Hamburg, cod. or. 269 contains only the list of the presents). Also diverging from 'Abdī's account (that of an anonymous author in Paris, suppl. turc. 889, bound together with the translation of the *ŷeane de Langues* Étienne Roboly. Of 'Abdī's book there are MSS in Paris, suppl. turc. 501 (incomplete) and 1943 (the best MS), in the private collection of R. Tschudi, Basle, and in Istanbul, Millet Kütüphanesi, 277 (414).

**Bibliography:** Babinger, 217 f.; J. H. Mordt-mann, in *Id.*, 1925, 364. (FR. BABINGER)

'ABDĪ EFENDİ, Ottoman historian. The only information about his life is that he worked under the sultans Mahmūd I and Muṣṭafā III, i.e. about 1730-64. His history, called either simply 'Abdī Ta'riḫi, or Ta'riḫ-i Sultān Mahmūd Khān, deals mainly with the antecedents of Patrona Ḥalil's rebellion and with the revolution itself (1730-1) and is one of the main contemporary sources for this event. MSS are to be found in Istanbul, Eṣfād Efendi, 2153 and Millet Kütüphanesi 409.

**Bibliography:** F. R. Unat, 1730 *Patrona ḫitālatı hāshinda bir eser Abdī tarīhi*, Ankara 1943; *Osmanlı Müderrisi*, iii, 106; *İsmail Anzoklopedisi*, i, 31; Ahmed Reṭik, *Lille desir*, Istanbul 1233, 125, 125, 140; *Rāimī Tedhīr*, MS Millet Kütüphanesi 762, 185; *Safinet ul-Rū'asā*, 83 ff., 90 ff.—For the MSS cf. *Istanbul Kütüphaneleri Tarīh-Coğrafya Yazmaları Kataloqları*, i: *Türkçe Tarīh Yazmaları*, 2nd fasc., Istanbul 1944, 103 f. (FR. BABINGER)

'ABDĪ PAṢHA, Ottoman historian. 'Abd al-Rahmān 'Abdī Paṣha came from Anatolia, was on the Bosphorus, was educated in the Seray, and finally attained the post of imperial privy secretary (*sirr Māshih*). In Muharram 1080/June 1669 he was promoted to the office of *nigāhdār* with the rank of a vizier, and later was appointed *ḫā'im-mahām* of the capital. In April 1679 he became governor of Bosnia, next year again *nigāhdār*, in March a so-called vizier of the cupola, in August 1684 governor of Basra (cf. Hammer-Purgstall, vi, 379). Deposed in 1686, he was in the next year appointed governor of Egypt. In 1688 he was governor of Rumelia, next year governor of Crete, where he died in Rāḡiāb 1103/March 1692. 'Abdī Paṣha is usually described, though whether correctly is open to some doubt, as the first officially appointed historiographer (*ṭarīḫī-nāvis*); cf. Ismail Hakki Uzunçaralı, *Osmanlı devletinin merkezi ve bahriyesi teşkilatı*, Ankara 1948, 64-8. At any rate he was the author of a history of the Ottoman empire, which starts with the beginning of the reign of Muḥammad (Mehmed) IV, 1058/1648 and ends with 3 Ramadan 1093/5 Oct. 1682. The book, usually called Ta'riḫ-i 'Abdī, is divided into 12 *ḫizmet* (Füleg, no. 1421), but also *Wāḥa-nimay* 'Abdī Paṣha, was dedicated to the sultan Mehmed IV. For the MSS cf. Babinger; additional MSS in Istanbul, *Ḥaḡḡād Köşku*, 217, Khāled Ef., 615 (cf. *Isl.*, 1942, 207), and *Istanbul Kütüphaneleri Tarīh-Coğrafya Yazmaları Kataloqları*, xi: *Türkçe Tarīh Yazmaları*, 2nd fasc., Ankara 1944, 111 f. A partial French translation, by Étienne Roboly, is preserved in Paris, suppl. turc. 867 (Blochet, *Cat.*, ii, 78).

**Bibliography:** Babinger, 227 f. (with further references); *İsmail Anzoklopedisi*, i, 30; Hammer-Purgstall, iii, 558 f. (FR. BABINGER)

ABDJAD (or ARADJAD or ABU DJAD), the first of the eight mnemotechnical terms in which the twenty-eight consonants of the Arabic alphabet were encoded. In the East, the whole series of these *encrez mnemotiques* is ordered and, in general, vocalized as follows: 'ahdjad hawasa kutūy hālamān sa'fas karāḡat ḥāḡḡah dāḡaḡ. In the West (North Africa and the Iberian peninsula) groups no. 5, 6 and 8 were differently arranged; the complete list was as follows: 'ahdjad hawasa kutūy hālamān sa'fas karāḡat ḥāḡḡah dāḡaḡ.

The first six groups of the Oriental series preserve faithfully the order of the "Phoniasis" alphabet. The last two, supplementary, groups consisted of the consonants peculiar to Arabic, called, for this reason, *ramādīf*, "mounted on the hind-quarters".

From a practical point of view, this arrangement of the alphabet has only one point of interest, namely that the Arabs (like the Greeks) gave each letter a numerical value, according to its position. The twenty-eight characters are thus divided into three successive series of nine each: units (1 to 9), tens (10 to 90), hundreds (100 to 900), and "thousand". Naturally, the numerical value corresponding to each of the letters that belong to groups no. 5, 6 and 8 differs in the Oriental and the Occidental systems.

The use of the Arabic characters as numerals has always been limited and exceptional; the ciphers proper (cf. *ḤISAB*) have taken their place. Nevertheless, they are used in the following cases: (i) on astrolabes; (ii) in chronograms, usually versified (epigraphic or otherwise), formed according to the system called *al-dijmal* (see *ḤISAB* and Ta'riḡi); (iii) in various divinatory procedures and in composing certain talismans (type of *ḡhazl* = 2-4 6-8, see *ṢUN'UṢ*). Even in our own days the *ḡhazl* of North Africa use the numerical value of the letters for certain magical operations, according to the system called *ayḡaḡ* (1.10.100.1000); a specialist in this technique is called in the vernacular *yahḡḡāḡ*; (iv) in the pagination, according to the modern convention, of prefaces and tables of contents, where we would use the Roman letters.

This "abecedarian" order of the Arabic letters does not actually correspond to anything, whether from the point of view of phonetics or of graphical representation. To be sure, it is very old. For the first twenty-two letters, it appears already in a tablet discovered at Ra's Shamra which gives the list of the cuneiform signs that constitute the alphabet of the people of Ugarit in the 14th century B.C. (Ch. Virel, *L'abbé de Ra's Shamra, GLECS*, 1950, 57). Its Canaanite origin, at least, is therefore certain; but moreover, the order was kept in the Hebrew and Aramaean alphabet, and was, no doubt, taken over by the Arabs together with the latter. Yet the Arabs, having no knowledge of the other Semitic languages and moreover full of prejudices arising from their strong self-consciousness and their national pride, sought other explanations for the mnemotechnic words *ahdjad* etc., handed down by tradition and incomprehensible to them. All that they had to say on this head, however interesting, is but a fable. According to one version, six kings of Madyan arranged the Arabic letters after their own names; according to another tradition, the first six groups are the names of six demons; a third tradition explains them as the names of the days of the week. Sylvestre de Sacy has noted the fact that in these traditions only the first six words are used, and that, e.g., Friday is not called *ḡhazḡḡ*, but *ṣarḡaḡ*; yet it is not admissible to base on such vague traditions the conclusion that the Arabic alphabet had originally only twenty-two letters (J. A. Sylvestre de Sacy, *Grammaire arabe*, ii, par. 9). In fact, even among the Arabs there were some more enlightened grammarians, such as al-Mubarrad and al-Sirāfi, who, not satisfied with the legendary explanations of *ahdjad*, straightforwardly declared that these mnemotechnic words were of foreign origin.

There is, however, one noteworthy detail among

these fabulous indications. One of the six kings of Madyan had the supremacy over the others (*sa'ukawm*); this was Kalamam, whose name is perhaps somehow connected with the Latin *elemodum*.

For the other arrangement of the alphabet which exists alongside this "abecedarian" order and which is the one currently employed, see *muḥḥa al-ḥijāzī*.

It may be added that in North Africa the adjective *ḥabūdī* is still alive, with the acception of "beginner, tiro, green", literally, "one still at the abecedarian stage" (cf. the Persian/Turkish *abjad-kān*, English *abecedarian*, German *Abcchüler*).

**ABEŠIR** (*ABEŠIR*), capital of the Sultanate of Wādā's, Territory of the Tchad, French Equatorial Africa, 12° north lat. and 21° east long., to the south of Wara, the old capital. Founded in 1850, chief town of a region and a district of 125,000 inhabitants (119 Europeans). Important center of transit between the Anglo-Egyptian Sudan and the Tchad; many *gallabé* merchants from Omdurman have installed themselves in the town. Center of trade in cattle, meat (freezing installations planned) and karakul sheep, bred in the neighbouring steppe-walk of Abugadum. A Franco-Arabic *medersa* was opened in 1951, the master of which belongs to the Tidjānī order, like all the Wādā's. The town, built in a vast dry plain, dominated by isolated mountains, comprises five big villages and a European township.

**ABHĀ**, capital of the Saudi-Arabian province of 'Asīr [g.s.] situated in Wādī Abhā (c. 18° 13' N. lat. and 42° 30' E. long.) at an elevation of c. 2200 meters. Perhaps 10,000 people, almost all Shī'ites, live in its several villages now growing together but retaining distinctive names. One of the largest is Mandzīr, sometimes given as the ancient name of the place; al-Hamdānī (l. 115) fails to mention Mandzīr but names Abhā as a location of the tribe called 'Asīr. Banū Mughayyid, dominant in modern Abhā, belong to 'Asīr.

Other communities are al-Karā, perhaps the largest; Mukhād, joined to the main group by a stone bridge across Wādī Abhā; Na'nān and al-Rubūḍ; al-Nasab, where the principal mosque is located; al-Khaḥḥa; and al-Miftāḥ. The focal point of town life is a large open square, where a Tuesday market is held, with the adjacent stone fortress of Shādā, the center of provincial administration. Most of the houses have mud walls with multiple

swaves of flat stone as protection against water erosion. Annual rainfall of c. 30 centimeters, augmented by irrigation from numerous wells, supports grains, fruits, and vegetables grown in terraced plots. Turkish forts crown the promontories ringing the town; two have been repaired and are used by the Sa'ūdī army: Dhīra, 125 meters above the town to the SSE, and Shamsān to the north. Motor routes connect Abhā with Mecca, about 840 kilometers to the north via Dhīra, and Zahrān and Naḍrān to the south and south-east; there is only animal transport for the steep descent to the Red Sea ports of al-Kunfūḥa and Dhīra.

Little is known of Abhā's history until Wahhābī doctrine swept across the mountains about 1215/1800. The subsequent Turco-Egyptian campaigns brought an army including several Europeans to Mandzīr, which was occupied for about one month in 1230/1834 (Tanner mentions a nearby village of "Apha"). Al 'Ayid, the shaykhly clan of Banū Mughayyid, thereafter ruled from Abhā, later receiving the blessing of the resurgent Wahhābīs under Fayyāl b. Turki. In 1287/1871 when the Turks were engaged in reoccupying the Yaman, Muḥammad b. 'Ayid attacked them in the lowlands but they soon overwhelmed him, occupied Abhā, and put him to death. The town became the center of a *kaḍā* in the Yaman wilāyat and remained Turkish until after the 1918 armistice, except for several months in 1928-9/1930-1 when the Idrīsīs [g.s.] of Ḥabāḥ wrested it from Sulaymān Shafīk, the Turkish governor. A relief expedition led by Sharīf Ḥusayn of Mecca arrived in Dhūmāḍā II 1329/June 1911 to find Abhā once more in Sulaymān's hands.

After the Turkish withdrawal, Al 'Ayid again became sole ruler, but was promptly challenged, first by Muḥammad al-Idrīsī, then by the Sa'ūdīs, whose two campaigns (one in 1339/1921 and another in 1340-2/1922) led by Fayyāl b. 'Abd al-'Azīz broke their power. Abhā has since been the seat of a Sa'ūdī governor, increased in importance by the Sa'ūdī acquisition of Idrīsī territory in 1345/1926. The force commanded by Sa'ūdī b. 'Abd al-'Azīz in the Yaman War of 1355/1934 was based on Abhā. Two years later Philby found the place still suffering from the ravages of its former insecurity, but under peaceful rule prosperity is returning.

For bibliography see 'Asīr. (H. C. MUELLER)

**ABHAR** (in *Ḥudūd al-'Alam*: Awhar), a small town owing its importance to the fact that it lies half-way between Rawm (86 km) and Zandjīn (88 km) and that from it a road branched off southwards to Dinawar. It was conquered in 24/645 by Bāḡ b. 'Azīz, governor of Rayy. Between 386/996 and 409/1020 it formed the fief of a Muḥallid [g.s.] prince. The stronghold of Sar-ḡāḥān (in *Rihāt al-sūdān*: Sar-fāḥān), lying some 25 km. N.W. of Abhar near a pass leading into Tārm [g.s.] played an important rôle under the Salḡūḥids.

**Bibliography:** Le Strange, *op. cit.*; Schwarz, *Iran*, 726-8; Minorsky, *Studies in Caucasian History*, 1912, 165.

**AL-ABHARI**, *Aḥlī* al-Dīn Mufaḍḍal b. 'Umar, philosophical writer, about whose life nothing is known; d. in 661/1264 (according to Barhebraeus in 1262). He was the author of two works on scholastic philosophy, which were much in use and often commented. (i) *Ḥudūd al-Hikma* in three parts: a Logic (commented), (ii) *Ḥudūd al-Hikma* in three parts: a Logic (commented), b. Physics (commented), c. theology (commented). The best known commentary is that by Mīr Ḥusayn al-Maybūḍī, written in 860/1475. (ii) *al-Isḡhādī*, an adaptation of the *Isḡah* of

Porphyry (cf. *ḥikmat* 1005). Of the commentaries, that by Shams al-Dīn Ahmad al-Fanārī (d. 534/1470) has been printed in Istanbul; for other commentaries and glosses, see Brockelmann.

**ABD** [see *TA'ABD*].

**'ABID** [see *'ABD* and *MAẒHĀN*].

**'ABID** b. AL-ABRAS, pre-Islamic Arab poet, of the tribe of Asad. Very little is known of his life, which must have lain in the first half of the 6th century A.D. The probably legendary story that his death was caused by al-Mundhir III, king of Hira, would fix as a *terminus ante quem* the date of the king's death, 554. The literary tournament with Imru' al-Kays, attested by the historical-literary tradition and by verses in the *diwān* of 'Abid, shows that the two poets were contemporaries; their joust would have to be placed between 530 and 550. About 530-40 Lyall assumes—the Banū Asad revolted against the supremacy of the kings of Kinda and killed king Huḍayr, father of Imru' al-Kays; hence the enmity and the rivalry between the two poets.

The *diwān* of 'Abid (edited and translated together with that of 'Amir b. al-Tufayl by Ch. Lyall, Leiden 1913, GMS xii) contains thirty more or less complete *ḥayḥ*s and seventeen fragments. The very distinct archaism in the structure and the language of the *diwān* is a strong argument for its authenticity. The dominant tone is one of melancholic and sentimental austerity, as well as of a proud dignity which finds in individual and tribal *jalāl* the expression that becomes its best.

The sentiment of love appears in a very restrained and already strongly stylized form, so that the *nasīb* is more often devoted to the collective regret for a dispersed group than for an individual woman (e.g. *ḥayḥ* 1, 18, xv, etc.). It is perhaps this melancholic contemplation of life's flight and of its fleetingness, so often expressed with original accents in the poetry of 'Abid, that gave rise to the legend that places him amongst the *mu'ammarrīn* [g.s.]. He seems to have died, according to Grunbaum's view (*Orientalia*, 1939, 343, 345), rather young, perhaps even before his fiftieth year. The sentimental mood of 'Abid is expressed not only in his *nasīb* but for the past, but also in his praise of himself and of his tribe (iv, vii, xvii, xxiv etc.) and in his virulent polemics against Imru' al-Kays and other, unknown, poets. The allusions to his poetical talent are especially noteworthy (x and xxiii); they show that he had a clear conscience of his inspiration and his artistic technique. The old Arab critics admired his descriptions of storms and desert tempests, but the modern reader appreciates most among all the poems of his *diwān* his descriptions of animals, such as the famous scene of an eagle chasing a fox (i) and that of the fish in the sea (xxiii). In these poems and in other celebrated tableaux, 'Abid appears as one of the most powerful poets of the *ḡhābiyya*.

**'ABID** b. SHARYA [see *'UBAYD* b. SHARYA].

**ABIK** [see *'ABD*].

**ABISU** [see *BALEH* (URIDS)].

**ABWARD**, or *BĀWARD*, a town and district on the northern slopes of the mountains of *Ḥā'ir* in an area now belonging to the autonomous Turkoman republic which forms part of the U.S.S.R. The whole oasis region including Naṣā [g.s.], Abward etc. (known by the Turkish name of *Alak* "foothills") played a great part in ancient times as the first line of defence of Khurāsān against the nomads.

In the Arsacid period this region was in the ancestral country of the dynasty. Isidore of Charax, par. 13 (at the beginning of the Christian era) mentions between Παρθρη (with the town of Naṣā) and Μαργαρη (= Marw) the district of 'Απασπεριχ with the town of 'Απασπεριχ, cf. Pliny, vi, 46: *Aparione*, and Justin, xli, 5: *mons (Zafarpoortum) with the inaccessible town of Dara (= Kāstī?) built by Arsak*.

Under the Sāsānians the country remained broken up into little principalities. Ibn Khurādādhbih, 99, has preserved the names of the kings of Sarakhs *Zādāya*; of Naṣā: *Abrik* (?), and of Abward: *B. hm. na* (B. *hmiya* *بهمي*) which is perhaps connected with the name of Mahana, Mayhana (in the district of Khawāran to the east of Abward).

Under Ma'mūn, 'Abd Allāh b. Ṭāhir built the *raḥīl* of Kūfan, 6 farsakhs west of Abward.

Perhaps even before the great migration of the *Ghuzz* [g.s.] the district had been occupied by the Khālajī Turks; cf. the *Ḍiḥān-namā* of Muḥ. b. Naḍīb Bakrān (written in 1200). Other Turkoman tribes later succeeded the Khālajī.

In the 12th-14th centuries Abward passed into the hands of the Dīn Ghūrbādī princes, of Mongol origin (cf. 705). In the time of 'Abbas I Atāk was outside the zone of Persian influence. Under Nādir who belonged to this region, Atāk became the starting point for his remarkable career. At that time the river of Telen (the Har-lud) was regarded as the eastern boundary of the cultivated lands of Abward (*muḥallā-yi ma'sūra-yi sarhaddā-yi Abward*; cf. *Ta'arīḥ-i Nādir*, under 1142 A. H. [The same source mentions among the dependencies, of Abward (?): Yangi-kā'a, Kā'a-yi Baghwān, Zāghān (?) etc.]). After the disappearance of Nādir from the scene, the semi-independent khāns of Kāstī [g.s.] exercised a certain influence in the district down to 1881, when, after the annihilation of the Russo-Persian frontier, Atāk with its Turkomans was incorporated in Russian territory. The resulting return of security to northern Khurāsān enabled the Persians to develop agriculture on the upper courses of the rivers running into Atāk. The irrigation of the latter region has suffered considerably as the result.

**Antiquities.** The ruins of the old town (Kuhna-Abward) are situated about 5 miles W. of the station of Kahka (Kakhaka) on the Transcaspian railway and cover an area of 14,000 square yards. The central *tell* is 60 feet high and 700 feet round. About 2 miles N. E. of Kuhna-Abward is the little hill of Namāzghān and to the north of it the site of some ancient town surmounted by a *ḡhāz-tāh* ("gateway") 45 feet high. Another important site is that of Kuhna-Kakhaka, a fortress rebuilt by Tīmūr in 784/1382 (*Zafar-nāma*, I, 343). The whole region is very rich in tells (*burgān*) 14 miles S. of Kakhaka are the ruins of Khwa-ābād which was settled by Nādir with prisoners liberated after the taking of Khwa; 11 miles S. E. of the station of Artūk are the ruins of a town called Čagondur (after the *masir* of the holy man which dates from the 13th century). Several

of these sites must go back to the Aeneas period (Isidore of Charax mentions for example a town of 'Paymō etc.) and some are even prehistoric; cf. R. Pumpelly, *Explorations in Turkestan*, Washington 1909, excavations at Akau.

(V. MINORSKY)

**AL-ABIWARDI**, أَبُو ل-مَوْضَائِرِ MUHAMMAD B. AHMAD, Arab poet and genealogist, a descendant of 'Anbasā b. Abi Sufyān (of the Umayyad lineage of the younger Mu'awiyā). He was born in Abiward (Khurāsān), or more exactly in the village of Kuwfan (not Kūfan) near Abiward (he is therefore sometimes called al-Kawfani), and died from poison in Ishābān in 207/111 (not 257/161-2). His philological and historico-genealogical works, notably a history of Abiward and a book on the different and identical names of the Arab tribes, are lost; but al-Naysarāni extensively used the latter work. Of his *shu'arā*, the three most important sections: *al-Nadāyiyāt*, *al-'Irābiyyāt* (mostly on the caliphs al-Mu'tasim, al-Mustafīr and their vipers) and *al-Waḡḡiyyāt* are preserved in several MSS. A *diwan*, arranged according to the alphabetical order of the rhymes, was published in the Lebanon in 1317, but many poems by al-Ghazālī have been erroneously included; a choice of less important poems: *Mukhaṣṣat al-Abiwardi al-Umayri*, was published in Cairo, 1277/1860-1.

**Bibliography:** Yāqūt, I, 111; idem, *Ishābāt*, vi, 342-58; Subki, *Tahabāt*, iv, 62; Suyūṭi, *Ṭabaṭ*, 30; Ibn Khallikān, no. 646; Abū'l-Fidā', *Mukhtasar*, vi, 380; Ibn al-Jawzi, *Muntazam*, ix, 176-7; Rūf, *Aḥbāb al-Muhammadin min al-Shu'arā'*, MS Paris, 20v-12r; Brockelmann, I, 253, S. 1, 447; a critical study of the poet and his work by Al-J al-Tahir, *La Poésie arabe sous les Seldjoukides* (Sorbonne thesis, 1953).

(C. BROCKELMANN—CH. FELLAT)

**ABEAYE** (properly BUKAYE), a town and oil field in al-Baṣā Province, Saudi Arabia. The name is taken from that of the shallow water sources (*naba'*) of Bukayy in the sands some 15 miles north of the present town. The names Bukayy and al-Bukka (similar water sources not far to the north) appear to be associated with meanings of the Arabic root *baḥka* relating to water rather than bugs. The Bedouins know the location of the town as Aba 'L-Ri'dān, "the place of the young male camel".

Surrounded by the heavy dunes of al-Bayḍā', Abkayy (40° 40' E. long., 25° 15' N. lat.) is about halfway between al-Fahrān and al-Hufuf on the main road connecting inner Arabia with the Persian Gulf ports of al-Dammām and Ra's Tanūfira, and is also on the Saudi Government Railroad (al-Dammām-al-Riyāḍ). Prior to the discovery of oil in the Abkayy field by California Arabian Standard Oil Company

(now Arabian American Oil Company) in 1939/1940, no settlement existed there. In 1972/1973 the population was approximately 15,000, including 1,310 Americans.

The American geologist Max Steineke was primarily responsible for finding oil in this wilderness of dunes. The oil field is about 32 miles long, averages 5 miles in width, and for a time was the most productive field in the world. In 1970/1971 daily production reached about 600,000 barrels (90,000 tons) from only 61 wells.

(W. E. MOLLIGAN)

**ABKHÄZ**. 1. For all practical purposes the term *Abkhāz* or *Abkhāz*, in early Muslim sources covers Georgia and Georgians (properly *Ḍarūdī*, *g.r.*). The reason (cf. below under 2.) is that a dynasty issued from Abkhāz ruled in Georgia at the time of the early 'Abbāsids. A distinction between the Abkhāzian dynasty and the Georgian rulers on the upper Kur is made by al-Mas'ūdī, II, 65, 74. The people properly called *Abkhāz* is positively referred to only in the tradition represented by Ibn Rusta, 139:

أَبْخَازٌ، read \* *أَبْخَازٌ* *Abghaz*, see Marquart, *Streifzüge*, 164-76, and *Hudūd al-'Ālam*, 456. Characteristically, Ibn Rusta places this people at the end of the Khazar dominions.

2. *Abkhāz*, a smaller people of Western Caucasus on the Black Sea, which called itself *Abkhāz* in its relations between the mountain range and the sea, between the river Psoz (north of Gagra) and the mouth of the Ingur in the south. Since the 17th century (and possibly much earlier) a portion of the tribe has crossed the main ridge and settled on the southern tributaries of the Kuban.

The *Abkhāz* are mentioned in ancient times as *Abasgi* (by Arrian) or *Abasgi* (by Pliny), cf. Constantine (A.D. 1475): *Assaria*, in older Russian: *Oset*, in Turkish: *Abasa*. According to Procopius (5th cent. A.D.) they were under the sovereignty of the Lazae (*g.r.*), and in those days slaves (*saucasa*) were brought to Constantinople from *Abkhāz*. Subjugated by Justinian, *Abkhāz* was converted to Christianity. According to the Georgian Annals (Brosset, *Histoire de la Géorgie*, I, 237-43), the Arab general Marwan-Kru ("Marwan the Deaf") having occupied the passes of Darial and Darband, invaded *Abkhāz* (whither the Georgian kings, Mir and Arčil, had fled), and ruined Tskhum (Sukhum). Dysentery and floods, combined with the attacks of the Georgians and the *Abkhāz*, caused great losses to his army and made him retreat. The chronology of the Annals is very uncertain. The name Marwan-Kru seems to refer to the Umayyad Muhammad b. Marwan, or to his son Marwan b. Muhammad, i.e. to the early part of the 8th century, cf. al-Balādhurī, 205, 207-9. Towards A.D. 800 the *Abkhāz* won their independence with the help of the Khazars; the prince (*erist'ava*) Leon II, of the local dynasty issued from Ančabān, married to a Khazar princess, assumed the title of king, and transferred his capital to Kutafsi. Under the governor of Tiflis, Ishak b. Isma'il (c. 850-5), the *Abkhāz* are said to have paid tribute to the Arabs. The most prosperous period of the *Abkhāz* kingdom was between 850 and 950; their kings ruled over *Abkhāz*, Mingrelia (Egrisi), Imnereti and Abkhat, and also interfered in Armenian affairs. Since that period Georgia has remained the language of the educated classes in *Abkhāz*. In 978 the Georgian Bagratid Bagrat III, son of the Abkhāzian princess Gurandukht, occupied the *Abkhāz* throne and by 1010 united all the Georgian lands. As his first successes were based on the hereditary rights of

his mother, and as even in his later title the rank of "king of *Abkhāz*" occupied the first place, the Muslims continued to call the Georgian kingdom *Abkhāz* (down to the 13th century, and occasionally even later).

About the year 1325 the house of Sharvashidze (in Russian: *Shervashidze*, alleged to be descended from the dynasty of the *Shirvan-shāhs*, *g.r.*) was installed with *Abkhāz*, towards the middle of the 15th century (under king Bagrat VI) the Sharvashidze were confirmed as *erist'aves* of the country. According to a letter from the emperor of Trebizond in the year 1459, the princes of *Abkhāz* disposed of an army of 30,000 men.

After the settlement of the Ottomans on the east coast of the Black Sea, the *Abkhāz* came under the influence of Turkey and Islam, although Christianity was but slowly supplanted. According to the Dominican John of Lucena, even in his time (1637) the *Abkhāz* passed as Christians, although the Christian usages were no longer observed. Since the separation from Georgia the country had been under its own Catholicos (mentioned as early as the 13th century) in Pitund. Up to the present day the ruins of eight large and about 100 small churches, including chapels, are said to exist in *Abkhāz*. The house of Sharvashidze did not embrace Islam until the second half of the 18th century, when Prince Leon recognized Turkish sovereignty. On this account, he was given the fort of Sukhum, which had already been besieged by the *Abkhāz* about 1725-8. The country was divided politically into three parts: 1) *Abkhāz* proper, on the coast from Gagra to the Galidzga under the said Sharvashidze; 2) the highlands of Trebelia (without any centralized government); 3) the country of Samurzakon on the coast extending from the Galidzga to the Ingur (ruled by a branch of the house of Sharvashidze, subsequently united with Mingrelia).

After the incorporation of Georgia by Russia in 1805, the *Abkhāz* had also to enter into relation with this new powerful neighbour. The first attempt was made in 1803 by Prince Keleş-beg, but was abandoned soon afterwards. After the assassination of this prince in 1808, his son Sefer-beg came into closer touch with Russia and claimed her help against his brother, the parricide Arslan-beg. In 1810 Sukhum was taken by the Russians. Sefer-beg, who had become converted to Christianity and assumed the name of George, was installed as prince, but from that time on Sukhum was occupied by a Russian garrison. The two sons of Sefer-beg, Demetrius (1821) and Michael (1822, after poisoning his elder brother) had to be put in power by the Russian armed force. Their rule was limited to the neighbourhood of Sukhum, whose garrison could communicate with headquarters only by sea. By the incorporation of the whole coast-line from Anapa to Poti (Treaty of Adrianople in 1829) Russia's position was naturally strengthened, but even in 1835 only the north-western part of the country, the district of Brblh, is said to have been in the possession of Prince Michael. The other parts had remained under the rule of his Muslim vassals. Later on, with the help of Russia, Michael succeeded in establishing his power almost as an absolute ruler, but he too, in spite of his Christian faith, had surrendered himself with Turks.

After the final subjugation of Western Caucasasia by the Russians (1864) the dominion of the House of Sharvashidze, like that of the other native princes, came to an end; in November 1864 Prince Michael

had to renounce his rights and leave the country. *Abkhāz* was incorporated into the Russian empire as a special province (*oblast'*) of Sukhum and divided into three districts (*okrug*)—Pitund, Ošemeti and Trebelia. In 1866 an attempt made by the new governor to collect information concerning the economic conditions of the *Abkhāz*, for the purpose of taxation, led to a revolt, and, subsequently, to a considerable emigration of the *Abkhāz* to Turkey. In the thirties of the 19th century the population of *Abkhāz* was estimated at about 90,000, and the number of all *Abkhāz* (i.e. including those living in the north outside *Abkhāz*) at 128,000 souls. After 1866, the population of *Abkhāz* was reduced to c. 65,000. The almost depopulated district of Trebelia ceased to be a district and was placed under a special "Settlement Curator" (*poselennitskii nauchnyi*). Later the whole of *Abkhāz* under the name of district (*okrug*) of Sukhum-Kale (Sukhum-Kal'a) formed a part of the government of Kutais. The population again decreased through emigration, especially after the *Abkhāz* took part in the rebellion of the mountain tribes caused by the landing of Turkish troops (1877); in 1881 the number of *Abkhāz* was estimated at only 20,000. No statistics on the *Abkhāz*ians in Turkey are available.

SOVIET ABKHÄZIA. The Soviet power was proclaimed for a short time in 1918, and finally in 1921. In April 1930 *Abkhāz*, as an autonomous republic (A.S.S.R.), became part of the Georgian republic (S.S.R.) and its special constitution was confirmed in 1937. The *Abkhāz*ian A.S.S.R. has a population of 395,000, but in this number the *Abkhāz*ians are but a minority. In 1939 the total number of the *Abkhāz*ians in the Soviet Union (i.e. apparently including the northern colonies in Cerkesia) was 59,000. The capital (Sukhum) has 44,000 inhabitants. The territory of the republic has acquired great importance for subtropical cultures. Its water power has been considerably exploited (in 1935, 45 electrical stations).

Since the time when an *Abkhāz* alphabet was invented by the eminent specialist in Caucasian languages General Baron P. K. Uslar (in 1864), and when a book on Biblical history was compiled by a priest and two officers of *Abkhāz* nationality, *Abkhāz* letters have had a considerable development. In 1920 the founder of the new literature, Dimitri Gulia (born in 1874), published a book of popular poems. He has been followed by writers in prose (G. D. Gulia, Papaskiri), poets (Kogonia 1905-20), L. Kvintina etc. *Abkhāz*ian folklore has been collected and schoolbooks written (Čoč'ua etc.).

The *Abkhāz* "polysynthetic" language belongs to the same type as the Cerkas languages. It has two basic vowels as against 65 consonants in the northern (Dzh) dialect, and 57 in the southern (Abkh). The latter has been adopted as the literary language. It is now written in the Georgian alphabet suitably completed.

(W. BARTHOLOMÆUS, MINORSKY)

'ABLA, sweetheart of 'Antara (g.n.).  
AL-ABLAQ, castle of Samaw' (g.n.).  
ABLUCTION (see gawis, ṬAYAMMUM, wud'ū').  
AL-ABNĀ', "the sons", a denomination applied to the following:

(I) The descendants of Sa'd b. Zayd Manāt b. Tamim, with the exception of his two sons Ka'b and 'Amr. This tribe inhabited the sandy desert of al-Dahab'. (Cf. F. Wüstenfeld, *Register zu den geneal. Tabellen der arab. Stämme*).

(II) The descendants born in Yaman of the Persian immigrants. For the circumstances of the Persian immigration in Yaman under Khawrazmīn (331-79) and the reign of Sayf b. Uthaym, as told by the Arabic authors, cf. Sayf b. Uthaym. After the withdrawal of the foreign troops Sayf was murdered and the country again subjugated by the Ethiopians, so that the Persian general Wahiz had to return. The power of the Ethiopians was this time definitely broken and Yaman turned into a vassal state of Persia. At the time of the Prophet the Persian governor Bādhān (Bādhān) was, together with his people, converted to Islam and acknowledged the suzerainty of Muhammad. Later, however, troubles broke out in Yaman which led to complete anarchy; it was only under the reign of Abū Bakr that order was restored. (Cf. also al-YAMAN).

ABRAHA, a Christian king of South Arabia in the middle of the sixth century A. D. In Islamic literature his fame is due to the tradition that he led a Yamanī expedition against Mecca (referred to in the Qur'ān, cv) in the year of Muhammad's birth, c. 570 A.D. The details of Abrahā's life given by Muslim historians are largely stories of folk-lore origin which have been attached arbitrarily to the name of a famous personage. For

authentic information we must turn to Procopius and the Himyarite inscriptions. According to Procopius, Hellestheos king of Abyssinia (ἡ/ἡ/ἡ/ἡ of the inscription Istanbul 7068 bis) invaded South Arabia a few years before 531 A.D., killed his king, appointed a puppet-ruler named Esimphaos (ἡ/ἡ/ἡ/ἡ of the inscription), and retired to Abyssinia; subsequently, Abyssinian deserters who had remained in South Arabia revolted against Esimphaos and set on the throne Abrahā, originally the slave of a Byzantine merchant of Adulis; two expeditions sent by Hellestheos against the rebels were unsuccessful, and Abrahā retained the throne; Justinian's attempts to incite Abrahā to attack Persia were in vain, for he merely marched a little way northward and then retired; so long as Hellestheos was alive, Abrahā refused to pay tribute to Abyssinia, but agreed to do so to Hellestheos' successor. Our main epigraphic source is Abrahā's long inscription on the Ma'rīb dam (*Corpus inscr. sem.*, IV, 341). This records the quelling of an insurrection supported by a son of the dejected Esimphaos in the year 657 of the Sabaean era (between 640-650 A.D.); repairs effected to the dam later in the same year; the reception of embassies from Abyssinia, Byzantium, Persia, Ilira and Harīth b. Djablah the phylarch of Arabia; and the completion of repairs to the dam in the following year. A further text (Ryckmans 506, see *Le Muséon*, 1953, 275-84) discovered at Murayghin, east of the upper Wādī Taḥlīb, records a defeat inflicted by Abrahā on the North Arabian tribe Ma'ad in 662 of the Sabaean era. The Ma'rīb text begins, "By the power and favour and mercy of God and His Messiah and the Holy Spirit (ḥ/ḥ/ḥ/ḥ)". It is perhaps significant of a sectarian distinction that Esimphaos, who was no doubt a Monophysite like his Abyssinian patron, uses a different formula, "In the name of God and His Son Christ victorious and the Holy Spirit (ḥ/ḥ/ḥ/ḥ)"; possibly Abrahā had Nestorian leanings. The titulature adopted by Abrahā is identical with that of his immediate predecessors, "King of Saba" and Ḥū-Ḥaydān and Hadramawt and Yamanāt and their Arabs in the plateau and lowland", but in the Ma'rīb text he calls himself in addition "ḥ/ḥ/ḥ/ḥ". The word *ḥ/ḥ/ḥ/ḥ* is not found elsewhere, nor is so satisfactory explanation of the phrase has yet been given. Conti-Rossini's rendering "the valiant king, of the (tribe) 'Aḡḡar'" is syntactically improbable; and Glaser's "vicerey of the Abyssinian king" is incompatible with the passage later in the inscription where Abrahā receives an Abyssinian embassy on the same footing as those of Byzantium and Persia. J. Ryckmans' proposed reading "ḥ/ḥ/ḥ/ḥ" "the king's highness" is worth consideration. From here onwards reliable sources are silent, and we have only the probably legendary story in the Islamic sources, which attributes the motive of the Meccan expedition to Abrahā's jealousy of the Meccan sanctuary and a futile attempt to substitute his church at San'a' as the place of pilgrimage for all Arabia. If Abrahā really made such an expedition (the Qur'ān does not name its leader), a more likely explanation of his aims is that the rapprochement with Abyssinia under Hellestheos' successor caused Abrahā to adopt a more aggressive policy towards Persia, and the expedition was the first move of a projected attack on the Persian dominions. However, it proved a failure, and only provoked the Persians to their invasion under Wahiz a few years later, which finally destroyed the ancient South Arabian kingdom. The *Martyrium Arthas* asserts

that Abrahā was placed on the throne by the Abyssinian king Elstas (usually identified with Procopius' Hellestheos) immediately after the death of Ḥū-Ḥaydān. Other ecclesiastical sources, such as the *Leges Homeritarum* attributed to Gregentius bishop of Zaḥār, give similar accounts. This version of events, which conflicts fundamentally with both Procopius and the inscriptions, must be regarded as unhistorical and due either to a confusion of names or to a fabrication for polemical reasons.

ABRAHAM (see IBRAHĪM AL-KHALIL).

ABRAHIM (see IBRAHĪM).

AB-ABSHIH (see AL-IBSHIH).

ABU (see KUNYA).

ABU L-'ABBĀS AL-SAFFĀH, 'ABD ALLĀH B. MUHAMMAD b. 'ALL b. 'ABD ALLĀH b. 'ABD ALLĀH, the first 'Abbasid caliph. The surname al-Saffāh means "the bloodthirsty" or "the generous". With the other members of the 'Abbasid family, he took refuge in Kūfa in Ṣafār 132/Sept.-Oct. 749, shortly after the occupation of the town by al-Hasan b. Kaṭṭāb and was proclaimed as caliph in the great mosque on 12 Rabi' II/28 November, on which occasion he pronounced a famous speech.

The first task of Abū l-'Abbās was the total defeat of the Umayyads. The 'Abbasid troops, under the command of his uncle 'Abd Allāh b. 'All, achieved a complete victory on the Upper Zab (Djumāda II 132/Jun. 750) and flung themselves into the pursuit of Marwān II through Mesopotamia, Syria and Palestine. When Marwān was killed in Egypt (Ḥijāz 132/August 750), the main campaign could be considered as ended. The isolated resistance of Ibn Hufayr (g.n.) in Waḥit was soon overcome by treachery, while the revolts that broke out in Mesopotamia and Syria were bloodily repressed. The conquerors abandoned themselves to violent acts of revenge, of which the first in importance was the episode on Nahr Abī Futrus (g.n.). Here 'Abd Allāh b. 'All, having killed about eighty Umayyad chiefs, laid tables over their bodies, which he afterwards threw to the dogs to eat. Similar scenes occurred in al-Kūfa, al-Basra and in the Ḥijāz. Furthermore, the tombs of the Umayyad caliphs were violated. Similarly, the discontent of the 'Alids, who, after having supported the cause of the revolt, saw themselves deprived of its fruits, was suppressed in blood: in 133/750-1, the governor of Khurāsān, Abū Muslim, put down a rising on behalf of the 'Alids in Buḥārā.

In this way, soon after the accession of the 'Abbasids to the caliphate, the principal sources of opposition, namely the Umayyad and the 'Alid enemies, were eliminated. The 'Abbasids, however, wanted to go even further, to the elimination of their own political and military chiefs who had gained too great an authority, or who were, rightly

or wrongly, suspected of insubordination. With the complicity of Abū Muslim, Abū Salama (g.n.) and Sulaymān b. Kaṭṭāb (g.n.) were suppressed. Afterwards it was the turn of Abū Muslim; the first attempt against him, in connection with the rebellion of Ziyād b. Šālih in Transoxania (135/752-3) was unsuccessful; the second, immediately after the death of Abū l-'Abbās, was carried out successfully by his successor, al-Manṣūr (g.n.).

Abū l-'Abbās died in al-Anḥar, to which town he had transferred his residence, in Ḥijāz 136/June 754. It is difficult to pass a judgment on his personality, as we do not exactly know what was his personal share in the events of his short caliphate. What is certain is that during his reign the 'Abbasid movement not only passed from the revolutionary to the legal phase, but also consolidated itself, and the first signs appeared of that political and economic power which were confirmed by the caliphate of al-Manṣūr.

ABŪ 'ABD ALLĀH YAK'UB b. DĀ'UD, vizier. Belonging to a philo-'Alid family, he participated, together with his brother 'All, in the revolt of Ibrahim and Muhammad b. 'Abd Allāh against the caliph al-Manṣūr in 145/762-3. Imprisoned for this, he was pardoned by the next caliph al-Mahdī in 159/775-6 and succeeded in gaining his favour, it is said, by revealing the plan of escape of another partisan of the 'Alids. Having become a confidant and counsellor of the caliph, he was appointed vizier in 163/779-80 in place of Abū 'Ubayd Allāh, and used his power in favour of his 'Alid friends. This policy was the main reason for the suspicion, following upon some court rumours, entertained against him by al-Mahdī. The story goes that the caliph put him on trial by handing over to his charge an 'Alid with the order to kill him secretly; but he let him escape. When this was discovered, he was deposed and thrown into prison, from which he was released only by Harūn al-Raḡhī. Completely blind by now, his only wish was to be sent to Mecca, where he died, probably in 186/802. His policy was perhaps the expression of an attempt at reconciling the 'Abbasids and the 'Alids; if so, he himself was at the same time the symbol and the victim of the precarious nature of such an attempt.

ABŪ 'ABD ALLĀH AL-SHĪ' AL-FUḤAYR b. AHMAD b. MUW. b. ZAKARIYYĀ', sometimes also called al-MURṬASIB (he had allegedly been a *muḥtasib*, market overseer, in 'Irāq), the founder of Fātimid rule in North Africa. A native of San'a', he joined the Ismā'īlī movement in 'Irāq and was sent to Yaman, where he spent his apprenticeship with Manṣūr al-Yaman (Ibn Hawḥab), head of the

ismā'īl mission in that country. On the pilgrimage of 279/892 he met in Mecca some Kutāma pilgrims and accompanied them back to their native country, which they reached on 14 Rabi' I 280/3 June 893. He first established himself in Ṭāḡjan near Saṭīf. In face of the opposition directed against him by a confederacy of Kutāma clans, Abū 'Abd Allāh transferred his headquarters to Tāzrūt, where he steadily strengthened his position, captivated Mīla and was able to withstand the attacks of two expeditions sent against him by the Aglabid government (289/902 and 290/903). On the occasion of a temporary setback, his headquarters were moved back to Ṭāḡjan, which remained his base for subsequent operations. In 299/902 the *imām* al-Mahdī 'Ubayd Allāh [g.a.] fled from Syria, attempted to join Abū 'Abd Allāh, but had to take refuge in Siḡilmāsa, where he was imprisoned. Abū 'Abd Allāh's brother Abū'l-'Abbās Muḥammad, who had accompanied the *imām*, fell into the hands of the Aglabids. Abū 'Abd Allāh then took Saṭīf, Tabna (293/900) and Bilizima (same year), was victorious in the battle of Dār Maḥallū, conquered Tījda, Bāghāya, defeated the Aglabid army near Dār Madyan, and seized Kartilya and Kafsa (295/900). When he took al-Uṣayn (Laribus), the key of Ifrīqiya (23 Dhu'l-Ḥiḍja II, 296/19 March 900), the Aglabid *amīr* Ziyād al-Allāh fled from Rakkāda. Abū 'Abd Allāh entered the Aglabid capital on 7 Rabi' al-awwal 296/19 March 900. Leaving his brother Abū'l-'Abbās as his lieutenant, Abū 'Abd Allāh led an expedition against Siḡilmāsa and liberated the *imām*, who triumphantly entered Rakkāda on 20 Rabi' II 297/6 Jan. 910, and conferred high honours on Abū 'Abd Allāh and Abū'l-'Abbās. The ruler and his powerful servants, however, soon fell foul to each other and both brothers were murdered on 1 Dhu'l-Ḥiḍja 298/13 July 910.

**Bibliography:** The main authority, and almost the unique source for the later historians, is al-Kāfi al-Nu'mān, *Itihāq al-Da'wa* (MSS preserved among the Bohra). Written in 346/957-58, this book mainly consists of a very detailed account of Abū 'Abd Allāh's activities. It is quoted in al-Makrīfī, *al-Muḥallaf*, transl. E. Fagnan, *Cronica Michela Amari*, I, 35 ff., an extensive précis in 'Imād al-Dīn Idrīs, *U'yūn al-Aḥbār*, first half of vol. v. Ibn al-Rakkī, in his lost history of Ifrīqiya, followed the account of al-Nu'mān (see the quotation in al-Nuwairī, *beg. of section on the Fātimids*; cf. J. A. Silvestre de Sacy, *Exposé de la religion des Druses*, I, p. cccclii). On Ibn al-Rakkī was based the relevant chapter in Ibn Shabādd's history of al-Kayrawān, known from the excerpts in Ibn al-Aḥlī, viii, 23 ff.; al-Nuwairī, al-Makrīfī, *al-Muḥallaf*, transl. Fagnan, 47-53, 67-78. In this way, al-Nu'mān's narrative entered into the main stream of Islamic general history. (Cf. also Ibn Hamādī (Vonderheiden), 77; Ibn Khallikān, *Hist. des Berb.*, II, 509 f.; Makrīfī, *Kāfi*, I, 349-50, II, 10 ff.; Ibn Khallikān, no. 171.)—The account of 'Arīb (printed in the editions of Ibn 'Udhālī, *al-Bayān al-Muḥarrar*; Dozy, I, 129 ff.; Lévi-Provençal and Colin, I, 134 ff.) is independent of al-Nu'mān; Ibn 'Udhālī (ed. Dozy, I, 128 ff., ed. Lévi-Provençal and Colin, I, 134 ff.) copies Abū Marwān al-Warrāk, 6th/12th century (who ultimately depends upon al-Nu'mān), and 'Arīb.—Of modern accounts—all of them antiquated by the recovery of the *Itihāq*—that by F. Wüstenfeld, *Gench. d. Fātimiden-Chalifen*, Göttingen 1881, 8 ff., can be recommended. For the phases of Abū 'Abd Allāh's career where it touches that

of the *imām*, cf. W. Ivanow, *Rise of the Fātimids*, index, and al-MAHDI 'UBAYD ALLAH.

(S. M. STERN)

**ABU 'L-'ĀLĀ' AL-MA'ARRĪ** (see **ABU 'L-'ĀLĀ' AL-KALANDAR** [Shaykh] SHAARAF AL-DIN VĪSĀMĪ, one of the most venerated of Indian saints, is believed to have died in 724/1324). There is little authentic information about his life and none of the surviving contemporary works even mention him by name. The earliest reference to him is in 'Alī's *Ta'wīḥ-i Firāz-Shāhī* (written in 800/1396), wherein Sulṭān Ghūyāḡ al-Dīn Tughlugh's visit to him is recorded. According to the accounts of his life written in the 1172/1760, he was a native of Pānpāt, to which place his father, Sālār Fakhr al-Dīn, had come from 'Irāk. Trained as a theologian, he ultimately renounced scholasticism, threw away his books in the river, and became a *Kalandar*. In the ecstasy of divine love, he gave up observing the commandments of God and the Prophetic Traditions, though he subjected himself to great self-mortification. He is supposed to have been a spiritual descendant of Kuth al-Dīn Bakhshīr [g.a.]; however, it is doubtful if he belonged to any organized *sūfī* order. Numerous legends regarding his life, miracles and death have grown, and it is difficult even to say whether the tomb at Pānpāt or at Karmāl is his, though the former is more famous. The works attributed to him include letters on divine love addressed to Ishrāq al-Dīn (Sulaymān Coll., Aligarh Univ.); *Usham-nāma* (Soc. Bengal, Ivanow: 1196), which is definitely apocryphal; and two *maḥnawīs*: *Kalām-i Kalandar* (Meerut) and *Maḥnawī Dū 'Alī Shāh Kalandar* (Lucknow 1891).

**Bibliography:** *Aḥbār al-Aḥbār*; *Gulzar-i Aḥbār* (Al. Soc. Bengal, Ivanow 259, ff. 32-3); *Sulḥ-i Sādāt* (A. S. Coll., Aligarh Univ., II, 411a); *Siyar al-Aḥbār*; *Muḥallaf al-Aḥbār* (B. M. Or. 216, f. 386a); *Ma'arīḡ al-Wāḍiyya* (Nizām's MSS, Aligarh Univ., 230-5); *Sharaj al-Maḥallid* (Sulaymān Coll., Aligarh Univ.); *Punjab Dist. Gazetteer*, Karnal 1918, 76, 210-1, 223-4; *Proc. Al. Soc. Bengal*, 1870, 125; 1873, 97. (NURUL HASAN)

**ABU 'ĀLĪ AL-KĀLĪ** (see **ABU 'ĀLĪ MUHAMMAD B. ILYĀS** [see **ILYĀS**]).

**ABU 'L-'ĀLIYA RUFAY' B. MINRAN AL-RIYĀHĪ**, a liberated slave of the Banū Riyāḡ, belonging to the first generation of *tābi'īn* residing in Baṣra; d. 90/708-9 or 96/714. A commentary on the *Ku'fān* is attributed to him (Hādijī Khalīfā [Flügel], II, 352), but he is mainly known as a traditionalist and a transmitter of the *Ku'fān*. Having collected in al-Baṣra and in Medina ḥadīṡ transmitted particularly by 'Umar and Ubayy b. Ka'b, he was considered trustworthy (ḡibā) and contributed to the training of Kaṭāda, Dā'ūd b. Abū Hind, 'Āṣim al-Aḥwal and other traditionalists of renown. His name figures frequently in the 'chains' of transmission of *ḥadīṡ* admitted into the great collections. In the same way, data on which his name is admitted by al-Tabarī, *Ta'wīr*, *passim*, e.g. I, 228; cf. al-Bayḍawī, *Amṣar al-Tawālī* (Fleischer), I, 124<sup>a</sup>. He transmitted his system of 'reading' (*ḥirā'a*) to al-'Amaḡh and to the readers of Baṣra Abū 'Amr b. al-'Ālā' [g.a.] and Shufayy b. al-Ḥabbāb al-Anṣī (d. 130/747). He played no political role and took no part in the conflict between 'Alī and his partisans and the Umayyads.

**Bibliography:** Ibn Sa'd, vi, 82-3; Ibn Kutayba, *Ma'arīf*, Cairo 1333/1934, 200; Tabarī, I, 108-25; Abū Nu'aym, *Hilya*, Cairo 1351-6, II,

217-24; Ibn 'Aḥkīr, *Ta'wīḥ*, Damascus 1332, v, 323-4; Nawawī, *Taḥḥīṡ al-'Ama'ā* (Wüstenfeld), 718-9; 'Uṡmānī, *Tabaḥḥāt al-Fubakā'*, MS Paris 2093, 431v; Ibn al-Aḥlī, *Uṡd*, II, 186-7; Ibn al-Djazarī, *Kurra'*, no. 1272; A. Sprenger, *Leben des Mohammed*, II, cvii, cxvi. (R. BRACHÉRE)

**ABU 'AMR ZARRAN B. AL-'ĀLĀ'**, a celebrated 'reader' of the *Ku'fān*, regarded as the founder of the grammatical school of Baṣra, died c. 154/770. The scholar seems to have claimed a genealogy connecting him with the Arab tribe of Māzin of the confederation of Tamīm; see Ibn Khallikān and the other biographers, including Ibn al-Djazarī, who, however, in one isolated statement, links him with Ḥanīfa. His name, Zabbān, has never been fully confirmed, and is only given in preference to a score of others. He is believed to have been born c. 70/689 at the latest, either at Mecca, according to the generally accepted view, including that of Ibn al-Djazarī, I, 292 (citing a disciple of Abū 'Amr, the 'reader' Abū al-Warīṡ, d. 280/796), or at Kāzārīn, in southern Persia, according to an isolated piece of evidence in the works of Ibn al-Djazarī, I, 289. If the former is correct, he must have passed his childhood in Ḥijāz before going to 'Irāk; if it is the latter, the opposite would be the case. The only established fact is that Abū 'Amr accompanied his father when the latter, harassed by al-Ḥadīḡjī's police, fled from 'Irāk to seek refuge in southern Arabia; see Ibn al-Djazarī, I, 289 (there appear to be lacunae in the text), and Ibn Khallikān, I, 380 ad *fin*. (Ibn al-Anbārī, 32, merely says that Abū 'Amr had fled from Ḥadīḡjī, without giving any details). According to his own recollections, Abū 'Amr was then a little more than twenty (which gives some force to the statements which put his year of birth at 70/689); see Ibn Khallikān, I, 387. It seems permissible to assume, from the passage of Ibn al-Djazarī, I, 289<sup>a</sup>, that this journey gave him the opportunity of pursuing further his 'readings' of the *Ku'fān* at Mecca and Medina, studies which he would appear to have continued on his return to 'Irāk. It is difficult, however, to reconcile this assertion with the statement of Ibn Khallikān, I, 387, that Abū 'Amr and his father returned immediately to 'Irāk upon the death of al-Ḥadīḡjī, in 93/714. However that may be, when Abū 'Amr had settled in 'Irāk, it appears that he rarely left Baṣra again. If it is indeed he who is praised in a line of al-Farazdaq (d. 114/732-3) (see al-Suyūṡī, *Baḡhyā*, 367), he was already before that date a celebrity of some standing in his city of adoption: cf. the flattering comment on him attributed to al-Ḥasan al-Baṣrī (d. 110/728) and handed on by Ibn al-Djazarī, 291. Nevertheless, there is no evidence that reveals anything about his relations with the Umayyad authorities. On the other hand, when the 'Abbasids came to power, his celebrity seems to have won him recognition even in governmental circles, since he is said to have had dealings with the uncle of the caliph al-Saffāh, Sulaymān (Ibn Khallikān, I, 387), and with the uncle of the caliph al-Mahdī, Yazīd (see *Fihrist*, 50<sup>b</sup>), as well as with the governor of Syria, Abū al-Walīḡh. It was on his return from a visit to the last-named that he died and was buried at Kūfa, c. 154/770 (or 155/771 or 157/773); see Ibn al-Djazarī, 293 (Ibn Khallikān gives also 150/775).

Abū 'Amr seems to have left no written works, and when Ibn al-Nadīm, 41, states that he saw manuscripts of this master, at al-Ḥadīṡa, in the 4th/10th century, and when this same author adds,

88, that a *K. al-Nawādir* was handed down in the version left by him, he must have been referring to writings taken down from his oral teaching by his disciples.

Abū 'Amr belongs to the generation of scholars for whom the study of Arabic was dependent on that of the *Ku'fān*. It is thus an arbitrary distinction if one tries to separate in him the 'reader' of the *Ku'fān* from the grammarian and the 'transmitter' of poetry.

During his stay in Ḥijāz, Abū 'Amr initiated himself into the system of 'reading' in process of formation at Mecca and Medina, following the teaching of Abū 'L-'Āliya [g.a.] and Ibn Kaṭhīr in particular. In 'Irāk he studied the system of Ibn Abī Ishāq al-Ḥadramī and of others (at Baṣra), and that of 'Āsim (at Kūfa). A list of his masters is given by Ibn al-Djazarī, 289; cf. also al-Suyūṡī, *Muḥṣir*, II, 398, and *Fihrist*, 39. He built up a system of his own in which the Mecca and Medina influences predominate; a complete table of the origins of this system has been drawn up by C. Pellat, *Musée basrien*, 77 f. The 'reading' of Abū 'Amr, at Baṣra, displaced all others previously existing in the town, and especially that of al-Ḥasan al-Baṣrī; see Pellat, *op. cit.*, 76; it is said to have been recommended by the 'reader' of Kūfa, Shu'ba (d. 193/808); see Ibn al-Djazarī, 292; it was taught by disciples who later became famous, such as Yūnus b. Ḥabīb, al-'Asma', and a large number of others; see the list *ibid.*, 289. In the 4th/10th century, when the reforms of Ibn al-Mudjahīd were introduced, this system took its place among the canonical 'Sever readings'. At the time of Ibn al-Djazarī (d. 813/1429) it was the accepted system in Yaman, in Ḥijāz, and in Syria, a province where it had finally ousted that of Ibn 'Amr in the 5th/11th century; see Ibn al-Djazarī, 292. This system of 'reading' was the subject of a treatise by Ibn al-Mudjahīd, see *Fihrist*, 31<sup>a</sup>. Nevertheless, writings of the same order had been composed before that period; see the list, *ibid.*, 28. Another summary is also known, entitled *al-Kaṣar al-Miṣrī fi ḥirā'a* Abū 'Amr b. al-'Ālā' al-Baṣrī, by 'Umar b. al-Kāsim al-Naḡhshār (d. 900/1495), which is preserved in Berlin; see *Alwadhī*, no. 639. We have, too, an opuscle based on the oral tradition, on the orthography of the *Ku'fān*; see O. Rescher, in *WZKM*, 1912, 94 (this opuscle is in a miscellaneous collection, in Aya Sofia, no. 4814). The influence of Abū 'Amr was of the first importance for the development of grammatical and lexicographical studies at Baṣra. It is less easy to follow, however, than the influence of his system of 'reading'. Among his disciples, the following names are worthy of note: Yūnus b. Ḥabīb, al-'Asma' (see al-Suyūṡī, *Muḥṣir*, II, 323, 329; *Fihrist*, 42; Ibn al-Anbārī, 30), Abū 'Ubayda (see Ibn Khallikān, 387), Khallaf al-Aḥmar (see al-Suyūṡī, II, 278, 401), and the future founder of the School of Kūfa, al-Ru'āṡ (see *id.*, II, 400). It is possible that already then, under his stimulus, the method of seeking information from the Beduins, in matters concerning grammar and lexicography, was developed at Baṣra. (See the anecdote recorded by *id.*, II, 278 and 304). By his disciples, and especially by Abū 'Ubayda and by such a scholar as al-Djāḡib, Abū 'Amr was regarded as 'the most learned man in things pertaining to the Arabs, and combining with the accuracy of his auricular transmission the veracity of his statements' (see al-Djāḡib, *Bayān*, I, 255, 256; cf. Abū 'L-'Yayyib, who expresses a similar view in *Muḥṣir*, II, 399). And yet this point raises a very delicate problem. This scholar seems, indeed, like a number

of his contemporaries, to have been an enthusiastic collector of archaic poetry and of accounts of the 'Days of the Arabs'; cf. Blachère, *Histoire de la littérature arabe*, Paris, 1952, I, 101 f. According to an account taken from Abū 'Ubayda by al-Dhahabī, *Bayān*, I, 256 (repeated in a somewhat changed form by Ibn al-Djazarī, 290, Ibn Khallikān, I, 386, and al-Kutubī, I, 104), 'the books which Abū 'Amr had written by taking the words down from such Arabs as were worthy to serve as informers filled a room in his dwelling. Later on, having devoted himself to 'reading' (of the Qur'ān), he burnt these books.' This piece of evidence, which we have no means of checking, does not say that Abū 'Amr destroyed the collections of poetry made by himself, as has been too often asserted. Actually, the main point to keep in mind is that after this destruction—if it took place—Abū 'Amr continued nevertheless to communicate orally the documentation which he had accumulated in his memory. There are many anecdotes which show his knowledge of ancient poetry; see for example, al-Dhahabī, *Bayān*, I, 256, II, 121; al-Sifrā, 30; Ibn al-Ashbāt, 31, 34. It is known that on one occasion he did not hesitate to forge a line; see al-Suyūfī, *Mushir*, II, 415. This fact, which he himself admitted, in no way detracted from his acknowledged authority as a 'transmitter' (*rawī*). His place among Arab lexicographers seems to have been very important, since he is said to have been, in this sphere, the master of al-Khaliḥī (291); see ibid., II, 398, and also the numerous references to Abū 'Amr's lexicographical authority, ibid., II, 73, 117, 291, 360. The authors of *adab* and the anthologists often quote too, his judgements on the poets; see for example, ibid., II, 479, 484, 486.

It is no exaggeration to say that the figure of Abū 'Amr b. al-'Alā' dominates the intellectual activity of the centre of Basra at the period when the generation of scholars was growing up—men such as al-Khaliḥī, al-Aḡna'ī, Abū 'Ubayda—who were to become the masters of the philological and grammatical school of that town.

**Bibliography:** *Djāhiz, Bayān* (Sandūbī), Cairo 1351, I, 255-6 and *passim*; *Sifrā, Akhbār al-Nah-utayyīn* (Krenkow), and again in Ibn al-Ashbāt, *Nuḥāt al-Fihāq*, 29-38; *Fihrist*, I, 35, 39, 88, and *passim*, used by Flügel, *Die grammatischen Schulen*, 32 ff.; Ibn Khallikān, 478; and again in al-Yāqūt, *Miṣbāt al-Djāwān*, I, 325 f.; Kutubī, *Fawa'id*, I, 104; Ibn al-Djazarī, *Ghayat al-Nihāya* (Beigsträsser), Cairo 1935, I, 288-92 and *passim*; *Suyūfī, Dughayr al-Wa'd*, 367, and *Mushir* (Bodjéwī), Cairo 1942, I, 298 f. and *passim*; C. **ABU 'L-'ARAB MUHAMMAD b. TAMM b. TAMMAM al-Tamīmī, Malikite** (*jabhī*), traditionist, historian and poet from Kaysarīyah. Offspring of a great Arab family (his great-grandfather was governor of Tinnis, seized Kaysarīyah in 28/799 and ended his life in prison in Baghdad), Abū 'l-'Arab, born in Kaysarīyah between 250/864 and 260/873, devoted himself to study under various masters, trained, in his turn, several pupils (notably Ibn Abī Zayd al-Kaysarīyah), took part in the revolt of Abū Yazīd against the Fatimids, was put in prison and died in 318/935. Of the works on *ḥikā*, *hadīth* and history attributed to him, only the *Tabaḥḥiṭ 'Ulamā'* *Iṭṭihāya*, a collection of anecdotal biographies of the scholars of Kaysarīyah and Tinnis, seems to have been preserved (ed. and transl. by

M. Ben Cheneb, *Clases des savants de l'Iṭṭihāya*, Algiers 1915-20).

**Bibliography:** *Djāhiz, Taḥḥiṭ*, III, 105; Ibn Farḥūn, *Dihādī*, 233; Ibn Nāḍī, *Ma'ālim*, III, 42; Ibn Khayr, *Fahrasa* (BAH), IX, 297, 301; H. H. 'Abd al-Wahhāb, *al-Muḥaddith al-Madrasī*, Cairo 1924, 37-8 (C. Pellat).

**ABU 'ARISH**, a town in 'Asir, about 20 miles from Dīlān. Philby describes it as kite-shaped, nearly a mile across, consisting mainly of brushwood huts ('*arā'ish*) and adjoining extensive ruins. The population (about 12,000) grows millet and sesame. The merchants are mostly of Hadramūt origin.

First settled by a *shaykh* (7th/13th century), it prospered under the *Zaydī* Imams who captured it in 1036/1627. In the next century the local *asirī* became independent. They temporarily submitted to the Wahhābīs (1217/1802-3) and later to the Egyptians. When the latter abandoned Hudayda (1256/1840) Sharif Husayn occupied the Tiḥama, was made Paṣhā and threatened 'Adan. Britain protested and the Turks drove him back to 'Asir. The power of the *asirī* weakened by civil war and the attacks of Muhammad b. 'Aḥd, disappeared when the Turks recaptured 'Asir; Philby could find no trace of them. Abū 'Arīḥ has since belonged in turn to the Turks, the Idrisī and Ibn Sa'ūd.

**Bibliography:** Descriptions: C. Niebuhr, *Reisebeschreibung von Arabien*, 267; Tamsier, *Voyage en Arabie*, I, 383-91; H. St. J. Philby, *Arabian Highlands*, 181-101-2; Tamsier, *op. cit.*, I, 365-74; Philby, *op. cit.*; A. S. Tritton, *Rise of the Imams of Sana'a*; H. F. Jacob, *Cities of Arabia*, 51-4; Muhammad b. Abī Mūsā al-Muḥammad b. Ma'wūn al-Sulamī al-Harrānī, *ḥadīth* scholar of Harrān (b. ca. 222/837, d. 318/930-1).

Practically nothing is known about his life, except the names of his authorities and his students, some of them very famous personalities. He is said to have been judge or *mufī* of Harrān. One source (Ibn 'Asākir *apud* al-Dhahabī) states that he was a partisan of the Umayyads.

According to the *Fihrist*, 230, Abū 'Arṭiba wrote only one work, a collection of traditions which were transmitted by his authorities. This work seems to be identical with the *Tabaḥḥiṭ* which are mentioned as a work of Abū 'Arṭiba by al-Dhahabī. An excerpt from the *Tabaḥḥiṭ*, which deals with the men around Muhammad and their traditions, is preserved in Damascus (cf. Yūsuf al-'Iṣṣah, *Fahrasa Maḥḥabīdī* *Dār al-Kutub al-Zihiriyya*, Damascus 1947, 160). Abū 'Arṭiba is also quoted as the author of a history of Harrān (or collection of biographies of scholars of the *Djazīra*) and a *Kutub al-Aswād*.

(F. ROSENTHAL)

**ABU 'L-ASWAD al-DU'ĀLI** (or, according to West-Arabian pronunciation al-Dīl, some relatives from al-Du'āl b. Bakr, a clan of the Banū Kināna),

a partisan of 'Alī. His name (Zālim b. 'Amr) and genealogy are uncertain; his mother belonged to the clan 'Abd al-Dār b. Kusayy of Kuraysh. He was probably born some years before the Hīḡra. In the caliphate of 'Umar he went to Basra. He lived first among his own tribe, then among the Banū Hudhayl, and for some time also among the Banū Kughayr, the kinsmen of his favourite wife; but his Shi'ite propensities as well as his obstinacy and avarice made him disagreeable to his neighbours. It is doubtful whether he held any office under 'Umar and 'Uthmān. In 'Alī's caliphate he rose to prominence. He is said to have taken part in the unsuccessful negotiations with 'Aḡha and in the ensuing 'Battle of the Camel', and also fought at Siffin for 'Alī. He was employed at Basra either as *ḥāḍ* or as secretary to the governor 'Abd Allāh b. 'Abbās, and he even said to have held a military command in the wars against the Khawāriḡ. When 'Alī's star was setting, and according to al-Madīnī, 'Abd Allāh b. 'Abbās planned to leave Basra, taking with him the treasury, Abu 'l-Aswad tried to stop him and reported the matter to 'Alī, who appointed him governor. This post he held, if at all, only for a short time. When 'Alī was murdered, he made a poem (no. 59 in Rescher's numbering) the Umayyads responsible for it. But his sentiments were of no consequence, as there was no large Shi'a element in Basra (*Aḡhānī*, XI, 121). He did not realize that he had lost all influence. He had reason to complain about Mu'āwīya's representative 'Abd Allāh b. 'Amīr, with whom he had formerly been on good terms (Poems nos. 23, 46), and also tried in vain to gain the favour of the viceroys Ziyād b. Abīh. Relations between them had been strained already in the caliphate of 'Alī, when Ziyād was in charge of the revenue-offices (*Aḡhānī*, XI, 119). He lamented the death of al-Husayn in 61/680 (no. 61) and cried for vengeance (no. 62). The last event mentioned in his poems is his complaint to the 'Prince of the Faithful' Ibn al-Zubayr about his representative at Basra in c. 67/686 (Ibn Sa'd, v, 19). He died, according to al-Madīnī, at Basra during the great plague in 69/688.

A collection of his poems, made by al-Sukkārī, is extant, but has been published only in part. They are poor in language and style and artistically and historically insignificant; most of them deal with petty incidents of everyday life; some of the poems are apparently forged. This applies also to the widely circulated allegation—invented most probably by some philologist of the Basra school—that it was Abū 'l-Aswad who laid down for the first time the rules of Arabic grammar and invented the vocalization of the Qur'ān.

**ABU 'ATĀ' al-SINDI, AḡLAM** (or MARZŪQ) b. YASĀR, Arab. poet. He owned his name of al-Sindi to the fact that his father came from Sind; he himself was born in Kūfa and lived there as a client of the Banū Asad. He fought for the declining Umayyad dynasty with pen and sword, praising them and casting stones on their adversaries. It is true, however, that when the 'Abbasids obtained power, he tried to insinuate himself into the favour of the new rulers by singing their praises. But the

iron character of al-Saffāh was but little sensible to such flattery, and under the reign of his successor, al-Ma'mūn, the poet was even obliged to keep himself hidden. Only after al-Ma'mūn's death in 158/774 did he again make his appearance. He died, no doubt, shortly afterwards, but the exact date is not known. Abū 'Atā' was considered a good poet—his elegy on Ibn Hubayra [q.v.] being especially famous—although he pronounced Arabic badly and even stammered, so that he was obliged to have his poetry recited by others.

(A. SCHAADT)

**ABU 'L-'ATĀHIYA**, poetic nickname ('father of craziness') of Abū ISHĀK ISMĀ'ĪL b. al-Kāsim b. SUWAYD b. KAYSAN, Arab. poet, born in Kūfa (or 'Ayn al-Tamr) 350/748 and died 270/883 or 211/826. His family had been *muḥallif* of the 'Anaza tribe for two or three generations, and were engaged in menial occupations; his father was a copper, and the poet himself as a youth sold earthenware in the streets. His outlook on life was embittered by a sense of social inferiority; in his later verse he gave vent to his hatred of the governing class and the wealthy; and he was notorious for covetousness and meanness to the end of his life. But like Baḥshār b. Bard, he had a natural gift for poetry, and hoped to find in this the door to a larger life. On account of his poverty he had not the time to attend lectures on philology and the poetry of the ancients, and to this we must attribute the freshness and unconventionality of his style. As a young man he associated with the profligate circle of poets grouped around Wāliba b. al-Hubbāb, and gained a reputation with his *ghazals* and wine-songs; later critics have condemned these productions as poor and effeminate (Ibn Kutayba, *Shi'r*, 497), and only fragments of them have survived. Like most of the spontaneous poets, he showed a preference for simple language and short metres, and first rose to fame by a panegyric on al-Mahdī which, in spite of these unconventional characteristics, gained the caliph's favour. He made himself notorious in Baghdad by his *ghazals* in praise of 'Uṭba, a slave-girl of al-Mahdī's cousin Rayta, who hoped to gain the caliph's notice but had no intention of throwing herself away on a penniless nobody. He held the caliph responsible for his failure to win 'Uṭba, and some indiscrete verses gained him a flogging and banishment to Kūfa. When al-Mahdī died, he took his revenge in some verses which could be read ambiguously.

Back in Baghdad his fulsome praise of al-Hadi annoyed the latter's successor Harūn al-Raḡhīd, who sent him to prison along with his friend Ṭhrāḥīm al-Mawillī. Restored to favour, he charmed Harūn with his love-lyrics, but suddenly renounced the *ghazal* and devoted himself to asseptic poetry (c. 178). Harūn at first took umbrage at his conversion and suppressed him, but was reconciled later at the instance of al-Fadl b. Raḥī, and in part also no doubt because of his popularity with the masses. It may be suspected that al-Fadl's patronage was connected with his intrigue, in association with the queen Zubayda, against the Barmakids, and that Abū 'L-'Atāhiya's new 'asetic' productions conveniently served their purposes. However that may be, Abū 'L-'Atāhiya maintained henceforward a vast

output of sermons in verse, long and short, painting the horrors of al-Jevelling Death, and directed especially against the rich and the powerful, not excluding the caliph himself. So profitable was it that when Abū Nuwās also began to produce *zuhdiyyāt* Abū 'L-'Atīhiya warned him not to trespass on the field to which he had established a prescriptive right (*Akhbār Abi Nuwās*, Cairo 1924, 70). Some later critics questioned, not without cause, the sincerity of his conversion, notably the real ascetic Abū 'L-'Alī al-Ma'arrī, who referred to him as "that astute fellow" (Ibn Faḍl Allāh, *Mawāliḥ al-Abḥār*, xv, MS Brit. Mus. 575, fol. 136).

A more frequent accusation brought against Abū 'L-'Atīhiya is that of heresy, which was a favourite weapon at the time; and it was suggested by Goldziher that one reason for his imprisonments may be sought in the occasionally unorthodox tone of some of his poems. Having no theological education he seems to have been influenced by the modified legacy of Manichaean beliefs still current in 'Irāk, which accounted for the disorders of this world by the existence of two primary substances, good and evil, though Abū 'L-'Atīhiya held that both were the creation of Allāh. In certain of his verses also, such as "If you would see the noblest of mankind look for a king in the guise of a pauper", there may be suggestions of a concealed attachment to Mūsā al-Kāsim and the cause of the Shī'ite imams, still strong in Kūfa.

His astonishing success as a poet was due to the simplicity, spontaneity, and artlessness of his language, which contrasted with the laboured artificiality of some of his contemporaries, and expressed the feelings of the people in verse that they could understand. He was fortunate also, by his friendship with Ḥurūth al-Mawālī, to have many of his poems set to music by the foremost musician of the day. He and his younger contemporary Abū al-Ḥanīd [s.c.] were the first to use *mudawwiḡ* (couplet) rhyming verse, and he was the first, according to al-Ma'arrī (*al-Fuṣūṭ wa'l-Ghayāt*, i, 131), to invent the metre *muddirī*. He also used a metre consisting of eight long syllables. Owing to his enormous output his entire diwan was never collected. The *zuhdiyyāt* were put together by the Spanish scholar Ibn 'Abd al-Barr (d. 463/1071).

**ABU 'L-'A'WAR** 'AMR b. SUFYĀN al-SULAMĪ general in the service of Mu'āwīya. He belonged to the powerful tribe of Sulaym (hence "al-Sulamī"); his mother was a Christian and his father had fought *Akhbār Abi 'L-'A'war*, many of which are to be found in the *al-Aghāni*. The book itself as well as the collection of his poems have not been preserved. He became blind at the age of 40, later on he emigrated to Baghdad, but returned to Basra again and died there in the year 282 or 283/896.

by sea. In addition, he showed also diplomatic and administrative abilities. At Siffin, he took part in the negotiations with 'Alī and prepared the preliminary draft for the conference of Ḥudaybiya. He was also commissioned to count the *falāḥ* of Palestine for a new distribution of taxes. Mu'āwīya had in mind to appoint him in Egypt to the post of 'Amr b. al-'Asl, who had been guilty of showing a too independent attitude; but this plan came to nothing, and he was appointed to the governorship of the province of al-Urdunn. On the ground of his services the Arabic annalists counted him among the main lieutenants of Mu'āwīya, those who constituted his *shif'a* or *hilāfa*. He died in the year 282 or 283, the political scene before the end of Mu'āwīya's reign.

**Bibliography:** Ibn Sa'd, *ii*, 102, 106; Ibn Rusta, 213; Tabarī, index; Mas'ūdī, *Murūj*, iv, 351; Michael the Syrian (Chabot), ii, 442, 445, 450; Bayhaqi, *Makāsib*, 149; Ibn al-Aghir, *Uṣd*, v, 138; Ibn Ḥajjar, *Iṣḥāḥ*, iv, 14; H. Lammens, *Études sur le règne de Mu'āwīya*, 42 ff. (H. LAMMENS).

**ABÜ 'AWN** 'Awn al-Ma'arrī b. Yazīd al-Kutaybī, general in the service of the 'Abbasids. After the outbreak of the rebellion in Khurāsān, 25 Ramadan 129/June 747, Abū 'Awn several times took part in the war against the Umayyads. At first he accompanied the 'Abbasid general Kahtaba b. Shabīb; then he was sent by the latter to Shahrazūr, where on 20 Dhū'l-Hijja 131/10 August 749, in conjunction with Malik b. Ta'if, he defeated 'Uyayna b. Sulaym. While Abū 'Awn remained in the vicinity of Mosul, the Umayyad caliph Marwān II marched against him. Under the supreme command of 'Abd Allāh b. 'Alī, Abū 'Awn took part in the battle by the Greater Zab (11 Djumādā II 132/25 January 750), in the pursuit of Marwān, and in the capture of Damascus. When 'Abd Allāh remained behind in Palestine, he sent Sāliḥ b. 'Alī together with Abū 'Awn and a few others to continue the pursuit to Egypt, and it was there that the caliph, after a fresh defeat, was tracked down and killed in the same year. Abū 'Awn remained in Egypt till further orders as governor. In 139/775-6 he was appointed governor of Khurāsān by al-Mahdī, but deposed in the following year.

**ABU 'L-'AYNĀ** MUHAMMAD b. AL-KĀSIM b. KHALIL b. YASIR b. SULAIMAN al-HASHIMĪ, an Arabian litterateur and poet. He was born about the year 700/80 in al-Aḥwāl (his family came from al-Yamāma) and grew up in Basra, where he received instruction from the most famous philologists, Abū 'Uthāla, al-Aḡmā, Abū Zayd al-Anṣārī and others. He was renowned amongst his contemporaries not only for his linguistic attainments, but also for his quickness at repartee. Ibn Abī Tāhir collected anecdotes concerning him in a special work entitled *Akhbār Abi 'L-'A'war*, many of which are to be found in the *al-Aghāni*. The book itself as well as the collection of his poems have not been preserved. He became blind at the age of 40, later on he emigrated to Baghdad, but returned to Basra again and died there in the year 282 or 283/896.

**Bibliography:** *Fihrist*, 125; Ibn Khallikān, no. 645.

**ABÜ AYYÜB** KHALID b. ZAYD b. KULAYT al-ANṢARĪ al-ANŞARĪ, generally known by his kunya, companion of the Prophet. It was in the

house of Abū Ayyūb that the Prophet stayed on his emigration to Medina, before his own mosque and house were built. He took part in all the Prophet's expeditions, was present at all the battles of early Islam and served under the command of 'Amr b. al-'Asl during the conquest of Egypt. Later on he was appointed by 'Alī to the governorship of Medina, but was obliged to rejoin 'Alī in 'Irāk when Buḥayr b. Abī Arīṭa expelled the town with an army of 300 men put at his disposal by 'Amr b. al-'Asl. In 'Irāk Abū Ayyūb al-Anṣarī took part in the battles fought there by 'Alī. During the reign of Mu'āwīya, he took part in the invasion of Cyprus and the expedition against Constantinople led by Yazīd b. Mu'āwīya. During the siege of the Byzantine capital Abū Ayyūb died of dysentery, in the year 52/672 (the years 50, 51 and 52 are also given as the date of his death). At his own request, he was buried under the walls of Constantinople.

150 *hadiths* are attributed to Abū Ayyūb, but only a small number of them (thirteen altogether) have been admitted as authentic by al-Bukhārī and Muslim.

(E. LÉVI-PROVENCAL).

The tomb of Abū Ayyūb is mentioned for the first time by Ibn Kutayba, *al-Ma'arrī*, 140 (ed. Cairo 1934, 119); according to al-Tabarī, ii, 234, Ibn al-Aghir, iii, 381, Ibn al-Djauzi and al-Kawtharī, 408, the Byzantines respected it and made pilgrimage to it in times of drought to pray them for rain (*istisqā'*). The probably legendary—discovery of the tomb by Ak Shams al-Dīn [s.c.] during the siege of the city by Muḥammad II can be compared to the finding of the Holy Lance by the Crusaders during the siege of Antioch. The Turkish legend is fully reproduced in Leunclavius, *Historiae musulmanae*, Frankfurt 1591, 38 ff. and in the careful monograph by Hādijīl 'Abd Allāh, *al-Jāmi' al-Madīniyya li'l-Mamdhūb al-Khalidīyya*. See also A. M. Schneider, in *Oriens*, 1951, 113 ff.; P. Witte, *Aywanariy*, in *Annales de l'Inst. de phil. et d'hist. orientales et slaves*, Bruxelles 1951, 505 ff. (esp. 513 ff.).

(J. H. MORITZMAN \*).

A mosque was built on the spot by Muḥammad II in 863/1458; it was enlarged by Etmekdiz-zāde Ahmad Paṣha in 1000/1591; two new minarets, each with two galleries, were added in 1116/1723. It was in this mosque that the sultan Mahmūd II deposited the relics of the Prophet discovered in the treasury of the Sarāy (the imprint of the foot). The grand-vizier Sinān Paṣha (d. 1133/1729), Mah Pīrīz Khādija (mother of the sultan 'Uthmān III), the grand-vizier Semiz 'Alī Paṣha, Gurdjī Muḥammad Paṣha, Lala Mustafa Paṣha (the conqueror of

Cyprus) and a number of other important persons are buried in the *ṣayra* or in the immediate vicinity of its court-yard. The mosque is situated outside the Byzantine walls, and an important suburb (Eyyūb [see ISTANBUL]) grew up round it. The mosque was the object of special veneration and it was forbidden for non-Muslims to enter it. According to a rather late custom (cf. *Id.*, 1931, 184 ff. and *MAWLAWIYYA*) it was in this mosque that the sultan, on his accession, was girded with the sword of his ancestors by the *Celebi Efendi*, the head of the Mawlawī order who came especially from Konya to carry out the ceremony.

**Bibliography:** Hādijīl Husayn b. Hādijīl Ismā'īl, *Hadīṭat al-Ḍiyāḥ*, Istanbul 1281, i, 243, cf. Hammer-Purgstall, xviii, 57; Cl. Huart, *Konia*, 206; F. W. Hasluck, *Christianity and Islam under the Sultans*, Oxford 1929, ii, 604 ff. (CL. HUART \*).

**ABÜ BAKR**, the first caliph.

i. Name, family, and early life.—Abū Bakr was probably born shortly after 570 as he is said to have been three years younger than Muḥammad. His father was Abū Kūḥāla ('Uthmān) b. 'Amr of the clan of Taym of the tribe of Quraysh, and he is therefore sometimes known as Ibn Abī Kūḥāla. His mother was Umm al-Khayr (Salmā) bint Saḥr of the same clan. The names 'Abd Allāh and 'Atik (the latter) are attributed to him as well as Abū Bakr, but the relation of these names to one another and their original significance is not clear. Muḥammad seems to have made a play on the name 'Atik and to have said that he was 'freed from Hell'. He was later known as al-Siddiq, the truthful, the upright, or the one who counts true; the last meaning is supported by the tradition that he alone immediately believed Muḥammad's story of his night-journey (*isrā'*, 60.).

In the course of his life he had four wives. (1) Kutayla bint 'Abd al-'Uzza of the Meccan clan of 'Amr, who bore him 'Abd Allāh and Asmā' (who married al-Zubayr b. al-'Awwām); (2) Umm Rūmān bint 'Amr of the tribe of Kināna, who bore him 'Abd al-Rahmān (originally 'Abd al-Ka'ba or 'Abd al-'Uzza) and 'Aḥṣā; (3) Asmā' bint 'Umayy of the tribe of Khaylān, who bore him Muḥammad; (4) Hālidā bint Khārida, of the Medinan clan of al-Hārith b. al-Khazraḡi, who bore him Umm Kulthūm posthumously. The last two marriages were made late in his life and were doubtless political; Asmā' bint 'Umayy was the widow of Ḍiyāḥ b. Abī Tālib who was killed in 6/629. The first two marriages were probably concurrent, since 'Abd al-Rahmān was the eldest son, but only Umm Rūmān accompanied Abū Bakr to Medina.

Little is known about Abū Bakr's life before his conversion. He was a merchant (*ṭiḡīr*) worth 40,000 dirhams, indicating (according to H. Lammens, *La Mecque à la Veille de l'Hégire*, Beirut 1924, 226-8) that his business was comparatively unimportant. He is not mentioned as having travelled to Syria or elsewhere, but he was an expert in the genealogies of the Arab tribes.

ii. From his conversion to the death of Muḥammad.—Abū Bakr was possibly a friend of Muḥammad before the latter's call to be a prophet and his own conversion. According to some traditions he was the first male Muslim after Muḥammad (Ibn Sa'd, ii/1, 121; al-Tabarī, i, 1165-7); but this may simply be a reflection of his later preeminence, since the same claim is made for 'Alī and Zayd b. Ḥāritha.

Similarly the statement that Abū Bakr was responsible for the conversion of 'Ughmān b. 'Affān, al-Zuhayr, 'Abd al-Rahmān b. 'Awf, Sa'd b. Abī Wakkās and Talhah b. 'Ubayd Allāh is suspicious because these five and 'Alī continued the *ghirā* or council to elect a successor to 'Umar. What is certain is that for some time before the Hijra, Abū Bakr was the foremost member of the Muslim community after Muhammad.

He remained in Mecca when many Muslims emigrated to Abyssinia. This is an obscure affair. It has been suggested that the emigrants objected to the policy of the group among the Muslims led by Abū Bakr. The traditional view, however, was that the emigrants went to avoid persecution; and it may be that Abū Bakr's clan of Taym, like others belonging to the group known as *Hilf al-Fudhīl*, did not persecute its members. It seems, however, that it also lacked the will or the power to defend them, for it allowed Abū Bakr and his fellow clansman Talha to be bound together by a man of the Meccan clan of Asad; and at a later date Abū Bakr left Mecca and only returned on receiving the protection (*ḥimā*) of Ibn al-Dughunna, the chief of a nomadic group in alliance with Quraysh. The slaves bought and set free by Abū Bakr, notably 'Amr b. Fuḥayra and Hilāl, suffered bodily violence. The purchase of slaves who professed Islam, though showing Abū Bakr's devotion to the cause, does not completely account for the reduction of his wealth to 5,000 dirhams at the Hijra, and economic pressure by the leading merchants of Mecca is to be suspected.

Muhammad chose him to accompany himself on his migration to Medina, an event to which reference is made in Kur'ān ix, 40. His family, that is, presumably Umayyān, 'Aḥqab, Asma' and perhaps 'Abd Allāh, followed soon afterwards. Abū Kahlāḥ, however, remained in Mecca, and Abū Bakr's son 'Abd al-Rahmān actually fought against the Muslims at Badr and Uhud, but was converted to Islam before the conquest of Mecca. In Medina Abū Bakr found a house in the district of al-Sunab. His special position in the community was marked by Muhammad's marriage to his daughter 'Aḥṣā. He was a participant in all the expeditions led by Muhammad in person, and was constantly at his side, ready to help with advice and information. In critical moments he was steady as a rock and did not lose heart. There seems to have been a remarkable degree of harmony between leader and follower. When others (including 'Umar who was inseparable from Abū Bakr) questioned Muhammad's decisions to make peace at al-Hudaybiyya and to abandon the siege of al-Tā'if, Abū Bakr gave immediate and wholehearted support. He was the first to know the true objective of the expedition which conquered Mecca in 630. In other words, he was Muhammad's chief adviser. He did not have any separate military command, except of a small party detached from a larger expedition in 632 and of a minor expedition against the tribe of Hawẓin in 7/628. In 8/629 he served with 'Umar under the command of Abū 'Ubaydah, probably in order to smooth over political difficulties. By his being appointed to conduct the pilgrimage of A. H. 9 and to lead public prayers in Medina during Muhammad's last illness, and by other signs of respect, he was marked as successor.

iii. His caliphate, 11/632-12/634.—The day of Muhammad's death (12/3 Rabi' I, 12/8 June, 632) was a critical one for the young Islamic state. The Ansār set about appointing a leader from their own

number, but were persuaded by 'Umar and others to accept Abū Bakr. He took the title of *Khālifat Rasūl Allāh*, 'deputy or successor of the messenger of God', and after a short time moved to a house in the centre of Medina.

His caliphate of a little over two years was largely occupied in dealing with the *ridā* or 'apostasy'. This phenomenon, as the name given by Arabic historians indicates, was regarded by them as primarily a religious movement; but recent European scholars, especially J. Wellhausen (*Shi'ra and Vorarbeiten*, vi, Berlin, 1899, 7-37) and L. Caetani (*Annali*, ii, 349-83) have argued that it was essentially political. More probably it was both. Medina had become the centre of a social and political system, of which religion was an integral part; consequently it was inevitable that any reaction against this system should have a religious aspect. There were six main centres of this reaction. In four of these, the leader had a religious character and is often called a 'false prophet': al-Aswad al-'Ansī in the Yemen, Musayyima among the tribe of Huzayl in the Yamama, Tulayha in the tribes of Asad and Ghatafan, and the prophetess Saḍḍāb in the tribe of Tamim. The form of the *ridā* in each centre varied according to local circumstances; it involved the refusal to send taxes to Medina and to obey the agents sent out by Medina. In the Yemen the *ridā* began before Muhammad's death, and when Abū Bakr came to power al-Aswad had been replaced by Kaḥṣ, b. (Hubayra) b. 'Abd Yagūth al-Makḥūm. In other places there had presumably existed for some time a movement against the rule of Medina, but it became open revolt only after Muhammad's death. During the absence of the main Muslim army in Syria under Usāma b. Zayd, some neighbouring tribes tried to surprise Medina, but were eventually defeated at Dhu 'l-Kaḥṣa. After the return of the Syrian expedition, a large army commanded by Khālid b. al-Walid was sent against the rebels. First Tulayha was defeated in a battle at Burzūlā, and the area restored to its allegiance to Islam. Soon afterwards, Tamim abandoned Saḍḍāb and submitted to Abū Bakr. The most important battle of the *ridā* was the battle of the Yamama at 'Akraḥ' (about Rabi' I, 12/May 633), known as 'the garden of death' on account of the great slaughter on both sides. Here Musayyima, the most serious opponent of the Muslims, was defeated and killed, and central Arabia brought under their control. Subordinate commanders were entrusted with subsidiary operations in al-Habrayn and 'Umdn (with Muzra), while Khālid pacified the Yamama before moving towards 'Irāq. The *ridā* in the Yemen and Hadramawt was defeated by another commander, al-Muhajir b. Abū Umayya. In dealing with captured leaders Abū Bakr showed great clemency, and many became active supporters of the cause of Islam. The traditional view was that the *ridā* had been quelled before the end of 11 A.H. (March 633); but Caetani has shown that the events require a much longer time, and that it may have continued into 13/634.

The size of Muhammad's expeditions along the road to Syria shows that he had realized the urgency of expansion if peace was to be maintained among the Arab tribes. Abū Bakr was aware of this strategic principle. In the first days of his caliphate, despite the threats of rebellion in Arabia, he persisted with Muhammad's plan of sending a large army under Usāma towards Syria. Again, once the danger from Musayyima in central Arabia was removed, no time

was lost in despatching Khālid towards 'Irāq. Thus was set on foot under Abū Bakr's direction the great 'conquest of the lands'. The traditional account of the conquests and their chronology has been radically revised by European scholars' critique of the sources (Wellhausen, op. cit. 37-113; De Goeje, *Mezra'at al-Qaṣṣa de la Syrie*, Leiden, 1909; N. A. Miednikoff, *Paléontologie, St. Pétersbourg, 1897-1907* [in Russian]; Caetani, *Annali*, ii, iii). By the time of Abū Bakr's death the position would seem to be as follows. Khālid, joining a force of B. Bakr b. Wāḥid under al-Muthanna b. Haritha, had advanced plundering into 'Irāq and threatened al-Hira, which paid 60,000 dirhams to be left alone. While al-Muthanna remained on this sector, Khālid carried out a celebrated march to Damascus and lined up with three Muslim columns which, under Yazid b. Abī Sufyān, Shuraybīl b. Hasana and 'Amr b. al-'As, had been operating with success in Palestine, but were now retiring before a superior Byzantine army. The united Muslim forces defeated the enemy at al-Ajdidiyān (probably a corruption of al-Djan-nabastayn) between Jerusalem and Gaza at the end of Dhuḥāḍa I (July 634). Thus the expansion into the Persian empire was initiated by Abū Bakr, but he still laid most emphasis on Syria. At what stage the decision was made, not merely to raid these lands, but to conquer them, is not clear.

Abū Bakr died on 22 Dhuḥāḍa II, 13/23 August 634, and was buried beside Muhammad. The great simplicity of his life, with its rejection of all wealth, pomp and pretension, became in later times a legend, though there is doubtless a kernel of truth. The assertion that he began the 'collection of the Kur'ān' is now usually held to be mistaken in view of the general ascription of this to 'Umar.

ABÜ BAKR b. 'ABD ALLĀH (see **IBN ABİ 'L-DUNYĀ**).

estates given him by 'Umar and transmitting *ḥadīṭ*, in which he is regarded as trustworthy by the authorities.

His biographers give him as his mother Sumayya, so that he is considered as the brother, on the mother's side, of Ziyād b. Abihl, with whom, however, he quarrelled when Ziyād joined the party of Mu'āwiyā. Abū Bakra left numerous descendants, among them seven sons: 'Abd Allāh, 'Ubayd Allāh, 'Abd al-Rahmān, 'Abd al-'Aziz, Muslim, Rawwād, Yazid and 'Utha, who had a part in the transmission of *ḥadīṭ*. Enriched by the exploitation of the public baths and favoured by Ziyād, they gained a place among the bourgeoisie, and even the aristocracy, of Baḡra, and forged themselves an Arab genealogy, claiming that Abū Bakra was the son of al-Harith b. Kalada, the 'physician of the Arabs'. Al-Mahdi, on ascending the throne, did not recognize this genealogy and forced the descendants of Abū Bakra to return to the status of *masā'il* of the Prophet (Ibn al-Tiktāk, *al-Fakhri* (Dorenburg), 245; al-Makḥidī, *al-Baḡ* (Huart), vi, 94-5; I. Goldziher, *Mus. Stud.*, i, 137 ff.). A descendant of the family was the kāfī Abū Bakra Bakir b. Kutayba (184-270/798-864; see Ibn Khallikān, no. 115).

(M. TH. HOUTSMAN/CH. FÉLIX)

The main work of Abū'l-Barakāt is the *Kutāb al-Ma'ārif*, dealing with logic, *naturalia* (including psychology) and metaphysics (published in three volumes by Šereḥfīn Yaltika, Hyderabad 1358/1939). A detailed commentary on Ecclesiastes, composed in Arabic, is of considerable philosophical interest; it is almost entirely unpublished. Among the smaller treatises ascribed to Abū'l-Barakāt is to be noted the *Risāla fī Sabab Zuhār al-Kawākib Laylā* (no. *Khāṣṣa* *Nahī*) (cf. Ibn Abī Usaybi'a, i, 280), transl. by E. Wiedemann (in *Eders Jahrbuch für Photographie*, 1909, 49-54). Under a slightly different title *Ru'ya 'L-Kawākib ḥiṭ-Laylā* is *ḥiṭ-Nahī*, it passes for a work of Ibn Sīnā (cf. G. C. Anawati, *Essai de Bibliographie arabo-islamique*, no. 162).

In *al-Mu'tabar*, modelled in great part on the *Shifā'* of Ibn Sīnā, Abū'l-Barakāt sometimes takes over these from that book, quoting them literally, but at the same time attacks others that are among the most essential. In his opposition to Ibn Sīnā he is often at one, in the field of physics, with the tradition that bore in Islamic lands the name of the Platonic, and which was followed by Abū Bakr al-Rāzī. His psychology is, in some respects, related more than that of the *Shifā'*, or more manifestly so to that of the Neoplatonists.

Abū'l-Barakāt's method of philosophizing does not, however, lend itself easily to recourse to the authority of tradition. This is shown by the very title of the *Kutub al-Mu'tabar*, which in the usage of Abū'l-Barakāt means something like: "The book about what has been established by personal reflection". As a matter of fact, this method is distinguished in the first instance by the appeal to self-evident truths, the certainties *a priori*, which nullify the theses *a posteriori* of the ruling philosophy of the period. Abū'l-Barakāt refuses to make a difference between the certainties of reason, admitted as valid by the Peripatetics, and those depending on the estimative faculty (*wahm*), dismissed by them.

It is mainly this method that leads Abū'l-Barakāt to assert, against the partisans of the Aristotelian theory of space, the existence of a tridimensional space. With John Philoponus he refuses the proposition denying the existence of the void. Having demonstrated the fallacy of the peripatetic arguments to the contrary, he proves the infinity of space by the impossibility for man to conceive a limited space.

Similarly, it is the appeal to the *a priori* knowledge of the human mind that allows Abū'l-Barakāt to clarify the problem of time—the true solution of which, according to him, depends upon metaphysics rather than upon physics. In effect, he shows that the apprehension of time, of being, and of self, is anterior in the soul to any other apprehension the soul might have, and that the nature of being and that of time are closely linked. According to his definition, time is the measure of being (not, as the peripatetics held, of movement). He does not admit the diversity of the various levels of time, the gradations of *zaman*, *dahr*, *sarmad* assumed by Ibn Sīnā and other philosophers. In his opinion, time characterizes the being of the Creator as well as that of created things.

He identifies prime matter with the body considered merely from the point of view of corporeity, apart from any other characteristics; corporeity being an extension susceptible of being measured. Among the four elements, earth alone is, in his view, constituted of corpuses, indivisible because of their solidity.

Dealing with the movement of projectiles, Abū'l-Barakāt accepts, though with modifications, the theory of Ibn Sīnā—ultimately, as it seems, inspired by John Philoponus—according to which the cause of this movement is a "violent inclination", that is to say a force (called later by certain Latin schoolmen (*impetus*) imparted by the projecting body to the projectile. He explains the acceleration in the fall of heavy objects by the fact that the principle of natural inclination (*insay* *al-hayā'*, a current philosophical term), which is them, furnishes them with successive inclinations. The text of the *Ma'tabar* treating of this doctrine is the first one, as far as is known at present, where one finds implied this

fundamental law of modern dynamics: a constant force gives rise to an accelerated movement.

It is especially the psychological doctrine of Abū'l-Barakāt that shows in the most palpable way the role given in his philosophy to recourse to what is self-evident. As a matter of fact, this doctrine has as its starting point the consciousness that man has of himself, i.e. of his soul. This consciousness bears the stamp of certainty and is anterior to any other knowledge; it would be there even without the perception of the sensible things. Ibn Sīnā had already availed himself of this *a priori* datum, which he had great difficulty in integrating with his psychology—which bears the stamp of Peripateticism—while Abū'l-Barakāt is led by it towards other psychological vertices, equally guaranteed and authenticated by their self-evident character. For instance, the valid consciousness that man has of being one—the same when he sees and hears, thinks, remembers or desires, or accomplishes any other psychical act—is sufficient in the view of Abū'l-Barakāt to refute the various theories postulating a multiplicity of the faculties of the soul. Another example: the certainty that one has of perceiving, in the act of seeing, the very object that one sees, and at the place where it really is—and not an image, that according to certain hypotheses is situated inside the brain—this certainty proves by itself the truth of the impressions that it guarantees. We have, then, a psychology that consists, partly, of a system of self-evident truths, and is dominated up to a certain point by the notion of consciousness or apperception (*shu'ūr*, a term used in a similar sense by Ibn Sīnā). It denies the distinction established by the Aristotelian doctrine between intellect and soul. In fact, according to Abū'l-Barakāt, it is the soul that accomplishes the so-called acts of intellection—a concept which he criticizes. Similarly, he denies the existence of the active intellect postulated by the peripatetics.

Platonic or Plotinian influences—which are, to be sure, in harmony with the personal intuitions of Abū'l-Barakāt—appear perhaps in the definition of the soul as an incorporeal substance acting in and by the body. Immortality is taken by Abū'l-Barakāt as a matter of course in a way which is not current at all; so for instance in the theory of memory. The human souls are caused, in the view of Abū'l-Barakāt, by the stellar ones, and return, after death, to their causes.

The knowledge of God, cause of causes, comes at the end of the knowledge of existing things and that of being perceived by an *a priori* knowledge, which divides being into necessary and contingent. On the other hand, the wisdom manifested in the order of nature proves the existence of a Creator. Last not least there are ways of direct communication between God and men. Abū'l-Barakāt, following in this point the Avicennian tradition, does not admit the proof for the existence of God based on movement.

He holds that the essential attributes of God, such as knowledge, power and wisdom, belong to His essence in the same way as having three angles equal to two right angles belongs to the essence of a triangle.

In his view God may have manifold knowledge, also about particulars. In order to refute arguments to the contrary, he refers to his psychological doctrine, where he proves that the forms of the things perceived, stored up in the human soul, are immaterial, like the entity that has perceived them.

In this way divine knowledge appears as being up to a point analogous to human knowledge.

Rejecting the theory of emanation held by the philosophers, Abū'l-Barakāt thinks that things have been created by a succession of divine volitions, either pre-eternal or coming into being in time. The first of these volitions, an attribute of the divine essence, created the first thing in existence, viz. according to religious terminology, the highest of the angels.

The personism of the conception of God in Abū'l-Barakāt sometimes relates it to the doctrines of the *halām*. Nevertheless, this does not necessarily justify the conclusion that the *halām* has influenced his thought.

So far as the problem of the eternity of the world is concerned, Abū'l-Barakāt, having confronted the theses of those who affirm it and those that deny it, does not explicitly state his own conclusions, but hints that one who has understood his exposé of the question will not fail to find the correct answer. It seems, in summing up the discussion, that the true solution is, in the view of Abū'l-Barakāt, that which asserts the eternity of the world.

Abū'l-Barakāt whose authority was invoked by a Jewish scholar of 'Irāk, Samuel b. 'Eli, in his polemic against Maimonides, had as his partisans amongst the Muslims 'Alī' al-Dawla Farāmura b. 'Alī, prince of Yazd, who defended him and his doctrines in a work bearing the title *Muqaddat al-Tauhid* and in a dispute he had with 'Umar al-Khayrī (see al-Bayhaqi, *Tatimmat*, 110-1). The influence of Abū'l-Barakāt over a personage of the first order, Fakhr al-Dīn al-Rāzī, seems to have been decisive. It is manifest especially in *al-Mabāhith al-Magħribiyya*, a capital work of Fakhr al-Dīn, and was of great historical importance. In fact, the observation of the *Shifā'* Mūh. b. Sulaymān al-Tanakhūnī, a Persian author of the 15th cent., who says, in substance, that the tradition of Ibn Sīnā had almost succumbed under the attacks of Abū'l-Barakāt and Fakhr al-Dīn, before being re-established by Naṣir al-Dīn al-Tūsī (*Kīyās al-'Ulum*), lith. 1304, 278), refers to a crisis in Muslim philosophical speculation, a crisis originated by Abū'l-Barakāt, the memory of which remained alive among the Iranian students of Ibn Sīnā.

**ABŪ BAYHĀS AL-HAYYAN B. DĪYĀRIS, KHĀRĪDĪTTE**, of the Banū Sa'd b. Duḥay'a. In order to escape from the persecution of al-Hadijīdī, he fled to Medina, but was arrested by the governor, 'Uḡmān b. Ḥayyān, and cruelly executed (94/713). He gave his name to the Bayhaysiya, one of the Khārīdīte sects, who occupied an intermediate position between the strict Anṣārīte and the milder Sufīte and Bāḍīte. The Bayhaysite, though admitting that Muslims of different

opinion from their own were unbelievers, considered it permissible to live amongst them, to intermarry with them and to inherit from them. Their tenets again diverged, so that they branched off into various subdivisions.

**ABŪ BILĀL** [see MIRDĀS B. UDĀYĀYA].

**ABŪ BURDĀ** [see AL-ANṢĀRĪ].

**ABŪ DAHĀL AL-DJUMAHĪ, WAḤB B. ZAM'Ā**, Kuraayshite poet of Mecca, who started to compose poetry before *awāḥid* and died after 67/75. He is included among the erotic poets of the *Hijāz* by his poems devoted to three women: 'Amra, of a noble Meccan family, a Syrian woman who led him into a breach with his family, and especially 'Adika, daughter of Mu'āwīya, whom he first saw during a pilgrimage. His verses, soon becoming famous, attracted the attention of the princes, whom he followed to Damascus, but the caliph, though recognizing the chaste character of Abū Dahāl's relations with his daughter, took umbrage and sent the poet away.

Abū Dahāl is not, however, an exclusively erotic poet, as an important part of his work is devoted to panegyrics on Ibn al-Azrak, governor of al-Djānād in Yaman, appointed by 'Abd Allāh b. al-Zubayr, and 'Umīra b. 'Amr, governor of Hadramawt. The incident with Mu'āwīya seems to have turned him away from the Umayyads and made him a partisan of the anti-caliph; the *Aghnī* even quotes some verses alluding to the murder of al-Husayn b. 'Alī.

**Bibliography:** Brockelmann, S I, 80 and the references given there; to the fundamental article in the *Aghnī*, vi, 154-70 should be added al-Marashīdī, *al-Munawwadhah*, 70, 189; idem, *Mu'djam*, 117, 342; Nallino, *Scritti*, vi, 35; O. Roscher, *Abriis*, i, 144-5; and especially the sources quoted by F. Krenkow, *JRAS*, 1910, 1017-75, who has collected the verses of the poet. (Ch. PELLIAT)

**ABŪ DAMDAM**, the hero of a collection of anecdotes, cited already in the 10th century. All kinds of foolish remarks are attributed to him, and more particularly comical decisions on questions of law, similar to those later attributed to Karakāh. This Abū Dāmdām is probably identical with the devotee who, before or during the lifetime of Muḥammad, offered up his good name in place of the poortax to the servants of God; for this express sacrifice of the respect of his followers may easily be interpreted as a permission or invitation to expose the devotee as the typical figure of foolishness. To one bearer of the same name there is ascribed an extraordinary knowledge of the ancient poetry, but there is no means of deciding whether this is the same personage.

**Bibliography:** Ibn Kutayba, *Adab al-Kātib* (Grünert), 3-4; idem, *Shifā'*, 3 f.; *Fihrist*, 313; Ibn 'Abd Rabbih, *ʿIhd*, Cairo 1302, iii, 445; Ibn al-Aḥfīr, *Und*, v, 232; Ibn Ḥajar, *Iṣṣah*, iv, 204; M. Hartmann, in *Zeitschr. d. Vereins f. Volkskunde*, v; J. Horowitz, *Spuren griechischer Mimen*, 31, note.

(J. HOROWITZ).

**ABŪ 'L-DARDĀ' AL-ANṢĀRĪ AL-KHARAKHĪ**. His name and genealogy are given in the *Uḡayyām* b. Zayd b. Kays b. 'Aḥḍa b. Umayyā b. Malik b. Adī b. Ka'b b. al-Khazraj b. al-Harith of the Balhārīth family of the Khazraj. Some sources give his name

as 'Amir instead of 'Uwaymir, and for his father's name instead of Zayd we find variously 'Amir, 'Abd Allāh, Mālik or 'Thalaba, while some give him the *nisha* al-Rahid. He was a younger contemporary of Muḥammad who is generally listed among the Companions (*Ṣaḥāba*) though some source raise doubts as to the legitimacy of this. He did not become a Muslim till after the battle of Badr and it is noted that he was the last of his family to become a convert to Islam. Some list him among those present at Uhud. When Muḥammad established "brotherhoods" between the Emigrants and the people of Medina he was the "brother" chosen for Salīm al-Fārisī. A certain number of traditions are reported on his authority and are given in the *Ḥaḥḥīr al-Manawī*, iii, 158-62. The *Sūfis* claimed him as one of the *ahl al-ṣūfa* (q.v.), quoting a number of sayings of an ascetic or pietistic character from him, which is probably the reason why in the biographical dictionaries he is called a *ṣāhid* and one to whom 'Im was given. These sources also say that he became known as the sage (*ḥakīm*) of the early Muslim community. He is reported as having said that before Islam he was a merchant, but after his conversion found that business life interfered with strict attention to cult duties (*ʿibāda*) so he gave up business. His great reputation, however, was as an authority on the Kur'ān. He is listed as one of the few who collected (*ḡamāʿa*) revelations during the Prophet's lifetime, and a small number of variant readings from him is recorded in the *ḥirāʾid* books. During his stay in Damascus, where he was sent to serve as a *kādi*, he made it a practice to gather to the mosque groups to whom he taught the Kur'ān, thus becoming the true father of the Damascus School later headed by Ibn 'Amr (q.v.). He died at Damascus in 32/652, or thereabouts, his tomb and that of his wife Umm al-Darda' being shown there near one of the gates.

**ABU DĀ'UD AL-SIJISTĀNĪ**, (SULAYMĀN b. AL-AMR) *ṢIB*, a traditionist, born in 202/817. He travelled widely in pursuit of his studies and gained a high reputation for his knowledge and piety. Eventually he settled at Baḡa, which is no doubt why some wrongly held that the *nisha* Sijistān comes from a village near Baḡa called Sijistān (or Sijistāna), and not from the province of that name. He died in Sāwād 270 Febr. 89.

Abū Dā'ud's principal work is his *Kitāb al-Sunan*, which is one of the six canonical books of Tradition accepted by Sunnis. He is said to have submitted it to Ahmad b. Hanbal who gave it his approval. Ibn Dāsa says Abū Dā'ud declared that he collected this work of 4800 traditions from a mass of 500,000, and that it contains sound traditions, those which seem to be so, and those which are nearly so. He also said, "I have made clear the traditions in this book of mine which contain great weakness, and those about which I have said nothing are good (*ṣāḥih*), some being sounder than others". This refers

to the notes which he often adds to his traditions to express his opinion on the value to be attributed to them. Muslim has an introduction to his *Ṣaḥīḥ* in which he discusses some general questions of criticism; but Abū Dā'ud is the first to give such detailed notes, paving the way for the more systematic criticism of individual traditions given by his pupil al-Tirmidhī in his collection. Abū Dā'ud quotes men not found in the two *Ṣaḥīḥ*, his principle being that transmitters are counted trustworthy provided there is no formal proof to discount them. His work which has the generic title of *Sunan*, dealing mainly with matters of law, or allowed, or forbidden by law, received high praise. For example, Abū Sa'īd b. al-'Aḥbāb said that anyone who knew nothing but the Kur'ān and this book would have sufficient knowledge; and Muḥammad b. Maḥḥad said that the traditionist accepted it without question just as they accepted the Kur'ān. But one is surprised to find that, although many men in the fourth century praised it highly, no mention of it is made in the *Fihrist*. Indeed, Abū Dā'ud is merely mentioned there as the father of his son. People of later times have expressed some criticisms. Al-Mundhīrī, for example, who produced a summary of it, called al-*Muḥḥab*, criticized some of the traditions not supplied with notes, and Ibn al-Djauzī added further criticisms. But while faults have been found with the work, it still holds an honoured place. The *Sunan* was transmitted through several lines, some versions being said to contain material not found in others. Al-Luḥḥī's version is the one which has gained most favour. A number of editions of the *Sunan* have been printed in the East (see Brockelmann). A small collection of *ṣunna* traditions by Abū Dā'ud, entitled *Kitāb al-Maḥḥad*, was published in Cairo in 1318/1892.

**Bibliography:** Brockelmann, I, 168 f., S I, 266 f.; Ibn Khallikān, no. 271; Ibn al-Salībī, *Uṣd al-Hādīḥ*, Aleppo, 1350/1911, 38-41; Ibn Ḥajjār, *Taḥḥīṭ al-Taḥḥīṭ*, iv, 169-73; Nawawī, *Taḥḥīṭ al-Asmā'* (Wüstenfeld), 708-12; Ḥādīdī Khallīf, no. 7265; Goldziher, *Mus. Stud.*, ii, 250 f., 255 f.; W. Marçais, in JA, 1900, 330, 502 f.; J. Robson, in MAF, 1951, 167 f.; *idem*, in BOS, 1952, 579 ff. (J. Robson).

**ABU DHARR AL-GHIFARĪ**, a Companion of Muḥammad. His name is commonly given as Dūndub b. Dūnada, but other names are also mentioned. He is said to have worshipped one God before his conversion. When news of Muḥammad reached him he sent his brother to Mecca to make enquiries, and being dissatisfied with his report, he went himself. One story says he met Muḥammad with Abū Bakr at the Ka'ba, another that 'Alī took him secretly to Muḥammad. He immediately believed, and is surprisingly claimed to have been the fifth (even the fourth) believer. He was sent home, where he stayed till he went to Medina after the battle of the Ditch (5/627). Later he lived in Syria till he was recalled by 'Uthmān because of a complaint against him by Ma'qīriya. He retired, or was sent, to al-Rabādha, where he died in 32/652-3, or 31. He was noted for humility and asceticism, in which respect he is said to have resembled Jesus. He was very religious and eager for knowledge, and is said to have matched Ibn Ma'ūdī in religious learning. He is credited with 281 traditions, of which al-Buḥārī and Muslim rendered 31 between them.

Sprenger, *Das Leben und die Lehre des Muḥammad*, i, 454 ff.

**ABU DHU'AYB AL-HUDHALĪ**, *ḤUWAYLID* b. KHALID, Arabian poet, a younger contemporary of the Prophet. The legend presents him journeying to visit Muḥammad but reaching Medina the very morning after his death. There is some justification for the assumption that Abū Dhū'ayb migrated to Egypt under 'Umar. From there he joined Ibn Abī Sarḥ's campaign into Irbīḥya (26/647). He died on his way to Medina where he accompanied 'Abd Allāh b. al-Zubayr who had been charged by Ibn Abī Sarḥ with informing the caliph 'Uthmān of the successes won by his armies (probably in 28/649). The only other known incident of his biography is contained in the report—probably factually correct but possibly spun out of the opening lines of Poem 1—that in Egypt he lost within one year five sons to the plague.

Recognized by the Arab critics as the foremost poet of his tribe, a judgement to which the modern reader will readily subscribe, Abū Dhū'ayb excels the bards of the *ḡhīḥīya* by the stringent composition of his *ḡhīḥīya*. In the care he devoted to the structure of his odes he continued a trend already traceable in the work of Sā'ida b. Dhū'ayb, an older Hudhalī poet, whose *rdā* Abū Dhū'ayb was. Both poets share the description of wild honey and its gathering along with a certain delight in the intimate and accurate description of the bees as well as the procedure of the collector—a motif which is not really popular with other Hudhalī poets. A peculiar treatment of the massing of a cloud formation and the subsequent downpour is also characteristic of Sā'ida and his *rdā*. In Abū Dhū'ayb's love poetry an adumbration of what came to develop into the style of the Medinese school is clearly noticeable. Another feature that seems to anticipate future developments is the manner in which Abū Dhū'ayb tends to elaborate the *naṣīb* into a complete ode (cf. nos. II and XI, where the other themes are, as Caetani says, *ḡhīḥīya*). Like his master Sā'ida, Abū Dhū'ayb is fond of, and excels in descriptions of weapons and of hunting-scenes, but is weak in depicting horses (as already noted by al-Asmā'ī). Almost half of his preserved verse belongs to elegies in which the gentle melancholy of his obsession with the instability of fate provides an appropriate emotional background. His masterpiece, the elegy on the death of his sons (poem I), shows a unity of mood and thought—the theme of the inevitability of doom is stated and connected with the occasion of the *marḥūmīya*, then illustrated in three gripping scenes, to be concisely restated in the last line—which is unsurpassed in ancient poetry.

**ABU DJAHL**, properly Abū Ḥakīm 'AMR b. HISHAM b. AL-MUGHIRĀ of the Banū Maḥḥim of Quraysh, also named Ibn al-Hanzaliya after his

mother, Asmā' bint Muḥḥaribha. He was born about 570 or a little after; he and Muḥammad were youths together at a feast in the house of 'Abd Allāh b. Dūd'ān, while his mother became a Muslim and lived until after 13/635. A few years before the Hijra Abū Dīḥl seems to have succeeded al-Walīd b. al-Muḥḥirā as leader of Maḥḥim and also of the group of clans associated with Maḥḥim. He was less inclined to compromise with Muḥammad than was al-Walīd, as his position in Meccan affairs was more endangered by Muḥammad than that of the older man. He was perhaps largely responsible for the boycott of Hāshim and al-Muḥḥalib, and the ending of the boycott was a defeat for his policy. He won an important success, however, when he and 'Ukba b. Abī Mufayy, soon after Abū Tālib died and was succeeded by Abū Lahab as chief of Hāshim, persuaded the latter to cease giving protection to Muḥammad. Just before the Hijra he seems to have tried to have Muḥammad killed, and to make revenge impossible there was to be a man from each clan involved. Owing to his hostility to Muḥammad during the latter years of the Meccan period many acts of persecution of Muslims are attributed to him, though probably not all really happened (cf. E. xvii, 62, xiv, 43, xvi, 6 and commentators). He and his brother al-Hārīḥī b. Hāshim persuaded their uterine brother 'Ayyāḥ b. Abī Rabi'a to return from Medina and kept him (perhaps forcibly) in Mecca. Abū Dīḥl's influence was based on his commercial and financial strength. The expedition of Ḥanzala to Sīl al-Bahr in 1/623 came near a large caravan directed by Abū Dīḥl. In 2/624 when Mecca was informed that Abū Sufyān's caravan from Syria was threatened by the Muslims, Abū Dīḥl led the force of about 2000 men which went to save it, and perished in the battle of Badr (q.v.). Abū Dīḥl sought battle with the Muslims even after the caravan was known to be safe, perhaps in the hope of gaining military glory, since Abū Sufyān, when available, had the privilege of commanding. After Abū Dīḥl's death the leading men in the group of clans associated with Maḥḥim were Sa'ūd b. Umayya (Dūnada), Suhayl b. 'Amr ('Amīr) and eventually Abū Dīḥl's son 'Ikrima.

**Bibliography:** Ibn Hishām, *Wakīdī*, Tabarī—see indexes; Ibn Sa'ūd, *Ḥīl*, 194, 10/2, 35, viii, 193, 220; Ya'qūt, *Uṣd*, ii, 27; Caetani, *Annali*, i, 294-5, 309, 478, 491, etc.; Montgomery Watt, *Muḥammad at Mecca*, by index; Azrak, *Wüstenfeld*, 455, 469. (W. MONTGOMERY WATT)

**ABU DU'AD AL-İYĀDĪ**, *ḤUWAYRA*, *ḤUWAYRIVA* or *HARITHA* b. AL-HARITHĪ (or again HARĀLA b. AL-SHARĪ, which was more probably, however, the name of Abū Ṭ-Tamāshī al-Kaynī, see *Ṣaḥīḥ*, 229), pre-Islamic poet of al-Ḥira, contemporary of al-Mundhīr b. Ma' al-Samā' (about 500-554 A.D.), who put him in the charge of his horses. The expression *ḡhīḥīya* *ḡhīḥīya* Abū Du'ad, which appears in a line of Kays b. Zubayr and has become proverbial, gave rise to several traditions showing Abū Du'ad as the "protégé" of a noble and generous *ḡhīḥī*, who is either al-Mundhīr, al-Hārīḥ b. Hammām or Ka'b b. Māma.

As a poet, Abū Du'ad is famous for his description of horses, and in this genre some critics consider him superior to Tufayl al-Ghanawī and al-Nabīḥa al-Dī'ādī. Nevertheless, the lexicographers have not collected his poems systematically, as the *yid* did not collect those of 'Adī b. Zayd, because his language was not "naḡdī" and he did not follow the poetical tradition. Moreover, al-Asmā'ī accuses *Ḥabīb* al-

Abma of having attributed to Abū Du'ād forty *hasidas* composed by himself (al-Marzubānī, *Munawwih*, 252).

**Bibliography:** Brockelmann, S. I, 58; Caussin de Perceval, *Essai sur l'histoire des Arabes*, II, 120-3, putting together the traditions; the fundamental article is that of al-Aghādī, xv, 95-9; see also Ibn Kutayba, *Shāh*, 120-3; Maydānī, *Amḥāl*, Cairo 1352, I, 49, 179 (in reference to *ḡar ka-ḡar* A.D. and al-naḡīr al-'arḡān); Marzubānī, *Munawwih*, 71-4, 88; idem, *Mu'jam*, 115; Ibn Durayd, *Lihāḡh*, 104; Ya'qūbī, I, 299-300; W. Ahlwardt, *Somnambula*, 8-9; O. Rescher, *Abriis*, I, 30-1; Nallio, *Scritti*, v, 36, who classifies him among the Christian poets, although Cheikh, *Naghrīniyya*, does not mention him. A number of verses are to be found in Ahlwardt, *op. cit.* I, 27-8, 68-70; Buhturī, *Hamāsa*, 87 (Cheikh); al-Jālibī, *Hayawān*, index; as well as in the works of philologists and lexicographers. Collection of fragments by G. E. von Grunewald, *Abū Du'ād al-IVādī. Collection of fragments*, WZKM, 1948, 1952. (CH. PELLAT)

**ABU DULAF**, MIB'AR b. MUHAIBIL AL-KHAZRAJĪ AL-YANBU'Ī, an Arab poet, traveller and mineralogist. The earliest date in his biography is his appearance in Buḡhārā towards the end of the reign of Nāṣir b. Ahmad (d. in 331/943). His travels in Persia hint at the years 331-339/943-951. Abū Du'ād mentions b. Ahmad, whom Abū Du'ād mentions as his patron in *Sīstān* (read: 'Ahmad b. Muḥammad), ruled 331-352/943-63. The author of the *Fihrist* (completed in 377/987) refers to him as *ḡawwāl* "globe-trotter" and as his personal acquaintance. Al-Ṭabarānī in his *Yatima al-Da'ir*, Damascus, III, 176-94, associates him with the circle of al-Shāh Ibn 'Alī b. 'Abdāḡ (326-85/938-95), probably during the later period of al-Shāh's life. As transmitters of the verses of Abū Du'ād, al-Ṭabarānī mentions chiefly the natives of Hamādhān, and among them Badī' al-Zamān (d. 398/1007). The long *hasida* on the slang of the rogues (*Baṣā' Sāṭiān*), which enchanted the *Sāḡib*, was written in imitation of the poem of 'Uḡayl al-Uḡaylī who belonged to the same literary circle of Rāy (Yatima, II, 285-8). Abū Du'ād himself supplied the commentary on the difficult expressions.

The two patrons, to whom Abū Du'ād dedicated his two geographical *risālas*, and who introduced into them their own remarks, are still unknown. The first *risāla* describes Abū Du'ād's journey in the company of the envoys of the Turkish king Kālīn b. al-Jahḡrī, who were returning from Buḡhārā to Sandābil. Marquart, *Streitsage*, 88-90, identified Sandābil with Kan-ḡo, the capital of the Western Uyghur king. On the way there, Abū Du'ād quotes in order disorder the names of the Turkish tribes which he pretends to have visited. From Sandābil he suddenly goes over to Kāṣ (Kra in Malaya), and then, in a desultory way, refers to various places in India, to emerge finally in *Sīstān*. Grigoriev, Marquart and von Mink recognized the spurious character of the journey (except for the direct road Buḡhārā-Sandābil, and *Sīstān*). Later (1945) Marquart thought that the genuine Abū Du'ād might be discovered in the quotations found in al-Fihrist. The analysis of the Maghad text shows that both the *risālas* are equally genuine, as far as the authorship goes, and therefore the fake must be attributed to Abū Du'ād himself. The quotations in *Fihrist*, though differing from the first *risāla*, have no better claim to veracity. On the contrary, the second *risāla*, describing Abū

Dulaf's journey in more easily controllable regions (western and northern Persia, Armenia) gives a clear itinerary and contains a number of interesting details which can be verified.

Pruv.*, 1872, 1:45; Marquart, *Streitsage*, 1892, 74-95; al-Dar Kāzab, in *Festschr. f. E. Sachau*, 1915, 271-2; A. von Rohr-Sauer, *Der Abu Du'ad Bericht über seine Reise nach Turkestan, China und Indien*, Bonn 1939, (translates the text of the Maghad MS. discovered by A. Z. Validi-Togan; H. von Mink, in his review of this work, *OLZ*, 1942, 240-2, has pointed out the leniency of Rohr-Sauer's conclusions); V. Mironsky, *La dernière route d'Abu Du'ad*, in *Oriens*, 1952, 237-42; id., *Abu Du'ad's travels in Iran* (being printed in Cairo, 1954)—gives the Maghad text of the second *risāla* with a detailed commentary. (V. MIRONSKY)

**ABU DULĀMA** ZAND b. AL-ḌAWNA, a black slave, client of the Banī Asad in Kūfa. He is already mentioned in the history of the last Umayyad caliph, but he appears as "ḡar ka-ḡar" only under the 'Abbasids and plays the part of a court jester in the palace of al-Saffāh and especially in those of al-Manṣūr and al-Mahdī. His poem on the death of Abū Muslim (137/754-5) is said to have been the first of his works to make him a name. Examples of his poetry show him to have been a clever, witty versifier, who readily seizes upon low expressions and displays all sorts of flimsy and cynical jigs; but he does not despise the most loudly fulsome praise when this form of mendacity promises some reward. He laughs at the praise of the crowd and his spiteful tongue is feared by all. It is true he did not spare himself and still less his near relatives; he would even occasionally revenge himself for the coarse jokes which the magnates played on him when one of his patrons was pleased to ridicule another through him. He also enjoyed the jester's liberty of being above the Islamic laws and could make them the butt of his insolent mockery. He has given proverbial fame to his mule, which possessed all possible defects and to which he dedicated a witty *hasida*.

Abū Dulāma embodied a popular type of crude and unrestrained comicality; hence the historicity of some of the anecdotes that are told both of him and of Abū Nuwās is somewhat doubtful.

Statements as to the date of his death vary: according to some he died in 160/766-7, according to others in 170/786-7; the first of these dates being the more likely.

**ABU 'L-DUNYĀ** ABU 'L-HASAN 'ALĪ b. 'UḡMĀN b. AL-KHATTĀB (or 'Uḡmān b. al-Kh.), one of those to whom preternatural longevity has been ascribed (*mu'ammarrun*, g.n.); he is also called al-Mu'ammarr al-Maghribī or al-Aghādī al-Mu'ammarr. He is said to have been born about 600 A.D. and to have died in 316/928, 327/938-9, or even 370/984. Of the tribes of Hamādhān, he drank in his youth from the source of life in the presence of al-Khadrī (g.n.), then joined 'Alī b. Abī Ṭālib, with whom he fought at Siffin and from whom he received the name of Abū 'L-Dunyā, after his horse had made a scar on his face (al-Aghādī al-Mu'ammarr the scarred one). After the death of the caliph, he went to Tangier. He returned at the beginning of the eighth century, to fulfil the pilgrimage and to relate traditions which he claimed to have heard from the mouth of 'Alī. The information about him goes back to the 4th century (see Ibn Bābawayh, *Ithbāt*, 297-303, cf. I. Goldziher, *Abhandlungen*, II, lxviii, n. 4; al-Dhahabī, *Mīrāt al-Fīdā*, II, 647; Ibn Haḡar, *Lisān al-Mīnā*, iv, 134-40, 101-2) and one may think that this is no more than the tale of a vulgar impostor. Nevertheless al-Dhahabī, *Tarīkh* (Pellat), para 746, mentions an Aghādī b. 'Amr (read al-Mu'ammarr?) alongside al-Sufyān (g.n.) and al-Aḡar al-Kahtānī, and, according to the prophecies of Daniel "one with a scar", sometimes identified with 'Umar b. 'Abd al-'Azīz (Ibn Kutayba, *Ma'drif*, Cairo 1353, 358; G. van Vloten, *Recherches*, 35-6, 79, and references), well all the world with justice. It is therefore possible that a group of Sūnīs put, as early as the 3rd century, their hope in an Aghādī, especially as the Shi'ite Ibn Bābawayh uses the word *mukhlifīn*, "our adversaries", to describe those who deny the existence of the *hā'im*, but believe in the longevity of Abū 'L-Dunyā. (CH. PELLAT)

**ABU 'L-FADL** (see Ibn al-'Amīn).  
**ABU 'L-FADL** (Fadl) 'ALLĀMĪ (Shaykh), author, liberal thinker, and informal secretary of the emperor Akbar, was the younger brother of the poet Fayḡ (g.n.), and the second son of Shaykh Muḥarrir Nāḡawrī (d. 1593), one of the most distinguished scholars of his age in India, and the author of a commentary on the *Ru'āṣ*, *Maṣṣāḥ* al-Nāḡawrī al-Uḡaylī. He was born on 6 Muharrar 954/14 Jan. 1557 at Agra, where his father had settled, in 1543, as a teacher. Abū 'L-Fadl was a pupil of his father, and owed his profound scholarship and liberality of outlook largely to the training given him by the latter. By his fifteenth year he had studied religious sciences, Greek thought and mysticism; but formal education did not satisfy the yearnings of his soul, nor did the orthodox faith bring him spiritual solace. While teaching in his father's school, he spent his time in extensive reading, deep meditation and frequent discussions of religious questions.

Abū 'L-Fadl was presented at the court by his brother, Fayḡ, in 1574. He soon gained high favour with Akbar by his scholarly criticism of the narrow-mindedness of the 'ulamā' in the religious discussions which were started in the *ḡhadd Khāna* in 1575. He helped in freeing the Emperor from the domination of the 'ulamā', and was instrumental in bringing about their ultimate political downfall by the promulgation, in 1579, of the decree (*maḡhar*), drafted by him in collaboration with his father, which invested Akbar with the authority of deciding points of difference between the theologians. A firm believer in God, whom he regarded as

transcendental and the Creator, Abū 'L-Fadl considered that there could be no relationship between man and God except that of servitude (*abdulāh*) on the part of the former. Servitude required sincerity, suppression of the ego (*nafs*) and devotion to Him, resignation to His will, and faith in His Mercifolness. Though he regarded formal worship as mere hypocrisy, he believed that there were many ways of serving the Lord, but only divine blessing could reveal the Truth. "In the main", he wrote, "every sect may be placed in one of two categories—either, it is in possession of the Truth, in which case one should seek direction from it; or, it is in the wrong, in which it is an object of pity and deserving of sympathy, not of reproach" (*Akbar Nāma*, II, 660). His faith in being at "peace with all" (*ḡadh-i-kull*) involved not only toleration of all religions but also love for all human beings.

In political affairs, Abū 'L-Fadl sought to emphasise the divine character of Akbar's kingship. Royalty, he claimed, was light emanating from God (*far-i-ṭān*), communicated to kings without the intermediate assistance of any one. Though the existence of kings was necessary at all times, it was only after many ages that there appeared, by divine blessing, a monarch who could not only rule effectively, but could also guide the world spiritually. Since Akbar could ensure the material as well as the spiritual well-being of his subjects, he could be truly regarded as the "Perfect Man" (*insān-i-kāmil*). It was the duty of all to give Akbar complete loyalty and to seek his spiritual guidance by following his disciples. The chosen among the disciples would be those who attained the "four degrees of devotion" (*chakrī marāṭab-i-ikhḡā*), i.e. preparedness to place at Akbar's disposal their property, life, honour and faith.

Though Abū 'L-Fadl's religio-political views earned for him the enmity of the 'ulamā', the policy of religious toleration which he helped Akbar in evolving, the non-denominational yet spiritual character of obedience to the Emperor which he advocated, his justification, on ethical grounds, of every imperial action, and his persistent efforts to incite, especially among the nobles, a sense of mystical loyalty to Akbar, contributed greatly to the political consolidation of the Mughal Empire.

In spite of Abū 'L-Fadl's immense influence over Akbar and the numerous duties which he performed at Court (especially in drafting letters to nobles and foreign potentates), his progress in the official hierarchy was slow. It was only in 1585 that he was promoted to the *maṣab* of 1000, which was doubled in 1592. Six years later it was raised to 2500. Except when he was associated, for a short time in 1586, with Shāh Kālī Khān Mahram in the joint-government of Delhi, Abū 'L-Fadl never held any office until 1599, when he was posted to the Deccan, at the instance of hostile elements at the Court. He distinguished himself there as an able administrator and military commander. In recognition of his services, he was promoted, in 1600, to the rank of 4000, and two years later, to that of 5000. The same year he was hastily summoned to the court when Akbar's son Salīm (afterwards the Emperor Jahāngīr) rebelled. On his way back, he was waylaid and assassinated by Rājā Bīr Singh Dēva, the disaffected Bundela chieftain of Orchha, on 4 Rabi' I 1011/22 Aug. 1602. His head was severed and sent to Salīm, at whose instance the crime had been committed, while the body was buried at Antārī (near Gwalior). The news came as

a great shock to Akbar, who mourned the loss deeply and never forgave Salim for instigating the murder. Abū'l-Fadl was survived by his son, 'Abd al-Rahmān Aḥmad Khān (d. 1613), who rose to be governor of Bihār.

Abū'l-Fadl's principal title to fame as an author rests upon his monumental work, *Akbar Nāma*, a history of Akbar (down to the 46th regnal year) and of his ancestors, compiled in three dafṭars (first two dafṭars published in *Bibl. Ind.* 3 vols.). The third dafṭar, *Ā'in-i-Akbarī* (*Bibl. Ind.*, 3 vols.), dealing with Imperial regulations and containing detailed information on Indian geography, administration and social and religious life, was the first work of its kind in India. Abū'l-Fadl's compositions, characterised by an individual literary style, served as a model for many generations, though none was able to imitate him successfully. His numerous works include a Persian translation of the Bible; *Yūsuf-i-Dināsh* (a recension of *Asnād-i-Sukayy*); prefaces to *Tārīkh-i-Afī* (unfortunately lost), in the Persian translation of *Mahabbarāta*, and to many other works; and a *Munāẓid* (ed. by Rizvi, *Medieval India Quarterly*, Aligarh, 1910). His letters, prefaces and other compositions were compiled by his nephew under the title *Inshā-i-Abū 'l-Fadl* (3 vols.). Another collection of his private letters is entitled *Ruḥ-i-Abū 'l-Fadl*.

**Bibliography:** Autobiography: *Autobiography*, accs. *Ā'in-i-Akbarī*, iii (at end); *Inshā-i-Abū 'l-Fadl*, iii. Biographies: *Ma'sū'ir al-'Umarā'* (*Bibl. Ind.*), ii, 608-42; Elliot and Dowson, v, 2 f.; Blochman, Introduction to his translation of *Ā'in-i-Akbarī*; Storey, iii, 541-51 (detailed references on 551).

(NURUL HASAN)

other singers, such as Ma'bad and Ibn Surayj, and

ABU 'L-FADL ṬYAD (see ṬYAD).

ABU 'L-FARADJ (see FARADJ); Ibn al-Bawāḥ; Ibn al-'Iṣṭi; Ibn al-Nadīm.

ABU 'L-FARADJ AL-ISBAHĀNĪ (or AL-ISFAHĀNĪ), 'Alī b. al-Husayn b. Muḥ. b. Aḥmad al-Kurāḡī, Arab historian, litterateur and poet. He was born in 284/897 in Isfahān (whence his *naba*) in Persia, but was of pure Arab race, a descendant of Kuraysh, or, to be more exact, of the Marwānī branch of the Umayyads. In spite of this, he was a *Shi'ite*. He studied in Baghdad, where he passed the greater part of his life, protected by the Būyids, especially by the vizier al-Muḥallabī. He found also a warm welcome in Aleppo at the court of the Hamdanid prince Sayf al-Dawla. He died in Baghdad on 14 Dhū'l-Hijja 356/26 Nov. 967. His main book, on which he worked according to his own testimony for fifty years, is the *Kātib al-Aghānī* ("Book of Songs"). In it the author collected the songs that had been chosen, by order of the caliph Hārūn al-Raḡhīd, by the famous musicians Ibrāhīm al-Mawṣilī, Ismā'īl b. Dīnār and Fulayh b. al-'Awra', and later revised by Ishāk b. Ibrāhīm al-Mawṣilī; he added songs by other singers such as Ma'bad and Ibn Surayj, and by caliphs and their descendants; for each song he indicated its melody. This is, however, but the least part of his work, as Abū'l-Faraj added rich information about the poets who were the authors of the songs, giving an account of their life and quoting many of their verses, as well as about the composers of the melodies. Furthermore, he gives many details about the ancient Arab tribes, their *ayyūm*, their social life, the court life of the Umayyads, society at the time of the 'Abbasid caliphs, especially of Hārūn al-Raḡhīd, the milieu of musicians and singers. In one

word, in the *Aghānī* we pass in review the whole of Arabic civilization from the *dihālīyya* down to the end of the 3rd/9th century. The author even does us another service: following the method of the Arab writers, he quotes long passages from earlier writers, whose works have not come down to us. His book is thus a source also for the development of Arabic style.

The first edition of the *Aghānī* was published in Būlāq 1285/1868-9 in twenty volumes, to which should be added a twenty-first volume published by R. Brünnow (*The twenty-first volume of the Kātib al-Aghānī*, Leiden 1888). For a lacuna see J. Wellhausen, *ZDMG*, 1896, 145-51. Tables by I. Guidi (Leiden 1895-1900). A second edition, being a reproduction of the Būlāq ed., together with the twenty-first volume and the *Tables* of Guidi, Cairo, 1323/1905-6. Cf. also Muḥ. Mahmūd al-Shūṭī, *Tajribat*, Cairo 1334/1916). A third and much superior edition was started in Cairo in 1927.

Another work of Abū'l-Faraj which has come down to us is *Makhlūf al-Tāhīyya* wa-*Abūrahman*, a historical work composed in 313/925. It contains biographies of the descendants of Abū Tālib (from Dī'a'far b. Abū Tālib to the seventy who died under the reign of al-Mu'tadīr, 295-320/908-32) who in some way lost their lives for political reasons, including those who died in prison or in hiding. This book was published in lithography, Teheran 1307 and in print, Najaf 1351. The Bombay edition (1911) in the margin of Faḡir al-Dīn al-Nadījāfī, *Mawāḥib fi 'l-Ma'ādhī* wa-*'l-Khāṭab*, contains the first half only.

Among those books that are lost should be mentioned books on genealogy and a *Kātib Ayyam al-'Arab*, where 1700 "days" were mentioned. Abū'l-Faraj also edited the *diwān* of Abū Tamīm, al-Buḥārī and Abū Nuwās.

**Bibliography:** Ibn Khallikān, no. 351; Yāqūt, *Irbid*, v, 149-68; al-Khatīb al-Baghdādī, *Tārīkh Baghdād*, xi, 398-400; Brockelmann, i, 146, S. 1, 225-6. A good biography, quoting his poetry and containing information about the *Aghānī*, in *Aghānī*, preface, i, 25-37 (the information about the *Muḥaddithab* is to be corrected). For MSS of the *Aghānī* see H. Ritter, in *Oriens*, 1949, 276 ff.; for miniatures illustrating it, D. S. Rice, in *Burlington Magazine*, 1953, 128 ff.

(M. NALLINO)

ABU 'L-FATH (see Ibn al-'Aṣmī; Ibn al-Furāt; AL-MUẒAFFAR).

ABU 'L-FIDĀ, Ismā'īl b. (al-Aḥḍal) 'Alī b. (al-MuẒAFFAR) MAHMūd b. (al-MANḤūr) MUHAMMAD b. TARK al-Dīn al-Mawṣilī b. SHĀHANSHĀH b. AYYUB, al-MALIK AL-MU'AYYAD 'IMĀD al-Dīn, Syrian prince, historian, and geographer, of the family of the Ayyūbids (g.w.), born in Damascus, Dhūm. 1, 672/Nov. 1273. At the age of 12, in the company of his father and his cousin al-MuẒaffar MAHMūd II, prince of Hamāh, he was present at the siege and capture of Marāb (Margat) (683/1285). He took part also in the later campaigns against the Crusaders. On the suppression of the Ayyūbid principality of Hamāh in 698/1299, he remained in the service of its Mamlūk governors, at the same time ingratiating himself with the Mamlūk sultan al-Malik al-Nāṣir (g.w.) MUHAMMAD b. KALĀWUN. After several vain attempts to obtain the government of Hamāh, he was finally appointed on 18 Dhūm. 1, 701/4 Oct. 1310, at the instance of the "king of the Arabs", MUHAMMAD, shaykh of Al Fadl. In 715/1312, his government was converted to a life principality, but two years later he, with the other governors,

was made directly subordinate to the governor of Damascus, Tankiz, with whom his relations were for a time strained. In the following years he strengthened his position by lavish patronage and generosity, especially on the occasion of his visits to Egypt. In 719/1319-20 he accompanied sultan MAHMūd al-Nāṣir to Mecca, and on their return to Cairo he was publicly invested with the insignia of the sultanate and the title of al-Malik al-Mu'ayyad (17 Muh. 720/28 Febr. 1320), and given precedence over all governors in Syria. He continued to enjoy the great reputation which he had acquired as patron and man of letters, as well as the friendship of the sultan, until his death at Hamāh on 23 Muh. 732/27 Oct. 1321. With the support of Tankiz, his son al-Aḥḍal MUHAMMAD was nominated as his successor, and was also granted the insignia of the sultanate. (For his grave, cf. *ZDMG*, lxi, 657-60; lxiii, 329-33, 853 ff.; *Bull. d'Etudes Orient.*, 1931, 149).

The Arabic biographical notices furnish several specimens of his poetical productions, which included a versification of the juristic work *al-Hiṣṣ* of al-Mawṣilī (g.w.). Of various other writings on religious and literary subjects almost all have perished. His reputation rests on two works, both largely compilations, but rearranged and supplemented by himself. The *Muḥassar* *ra'ish al-baḡar*, a universal history covering the pre-Islamic period and Islamic history down to 729/1329, is in its earlier part based mainly on Ibn al-Aghir. Its contemporary popularity is shown by the continuations to it written by Ibn al-Wardī (g.w.), Ibn Ḥabīb al-Dimashqī, and Ibn al-Shihna al-Halabī (g.w.). It was a major source of eighteenth-century orientalism, through the editions of J. Gagnier, *De vita... Mohammedis* (Oxford 1723) and J. J. Reiske, J. G. Chr. Adler, *Annales Moslemicae* (Leipzig 1754 and Copenhagen 1789-94). The complete text was first published in Istanbul (2 vols., 1286/1869-70).

The *Takwīm al-Buldān*, a descriptive geography supplemented by physical and mathematical data in tabular form (derived mainly from the Arabic translation of Ptolemy, the tenth-century *K. al-atawāl*, al-Bīrūnī and Ibn Sa'd al-Maghrībī (g.w.)), their divergences being noted) and completed in 721/1321, largely replaced all earlier geographical works. It is extensively quoted by al-Kalāshandī (g.w.), and several later abridgements were made, including one in Turkish by Muḥ. b. 'Alī Siphāzade (d. 997/1589). Individual sections were edited and translated by European scholars from the seventeenth century (John Greaves, London 1650; J. B. Koehler, Leipzig 1766; etc.). The entire work was edited by J. T. Reinaud and MacGuckin de Slane (Paris 1840) and translated by Reinaud (Paris 1848) and Stanislas Guyard (Paris 1883), the first volume of the translation consisting of a classic survey entitled *Introduction générale à la géographie des Orientaux*. The judgments of scholars on Abū 'L-Fidā's geography have differed widely, from "a rather poor compilation of earlier sources" (J. H. Kramers, in *Legacy of Islam*, Oxford 1915, 27; cf. C. E. Dugher, *Abū Ḥamid al-Granadino*, Madrid 1953, 182) to G. Sartori (see *DiM.*), for whom Abū'l-Fidā is "the greatest geographer of his age". See also the art. *ḡUGRĀFIYA*.

**Bibliography:** Autobiography (extracted from the History), trans. de Slane, in *Recueil des Historiens des Croisades, Orientaux* i, 166-186 (see also *Appendix 744-51*); *Tahābāt*, 7:7-128 (see also *Appendix 744-51*); *Tahābāt*, 7:7-128; *al-Idām*, Suppl., Leiden MS. 785; Kutubī, *Faṣl* (Cairo 1951), i, 70; Ibn Ḥadjar, *al-Duwar*

*al-hāmīna*, Hyderabad 1348, i, 371-3; Suhbī, *Tahābāt al-Shāfi'iyya*, vi, 84-5; Ibn Taghrībirdī, Cairo, ix, 16, 23, 24, 39, 58-62, 74, 93, 100, 292-4 (largely reproduced in Makrīf, *Sulūk*, i, Cairo 1941, 87, 89, 90, 137, 142, 166, 196, 202, 235); idem, *Les Biographies du Manḥāl Sa'ī* (G. Wiet, Cairo 1932) no. 432; F. Wistenfeld, *Geschichte schreiber der Araber*, 1881, 101-6; Brockelmann, II, 44-6; S II 44; M. Hartmann, *Das Muḥaddithab*, Weimar 1896, 101; Carra de Vaux, *Les Peussiers de l'islam*, Paris, i, 139-46; G. Sartori, *Introduction to the History of Science*, ii, Baltimore 1947, 200, 308, 795-9; A. Ates in *Oriens*, 1932, 44.

ABU FIRĀS AL-HAMDĀNĪ, poetic cognomen of AL-HĀRĪN b. Abū 'L-'ĀLĀ' Sa'īd b. HAMDĀN TAGHĪBĪ, Arab poet, born in 320/932, probably in 'Irāk. Sa'īd, himself a poet, was killed by his nephew Nājir al-Dawla Hasan on attempting to occupy Mawṣil in 323/935. The mother of Abū Fīrās, a Greek *uṣm* *salūd*, moved with her son to Aleppo after his occupation by the poet's cousin Sayf al-Dawla in 333/944, and there he was trained under the eye of Sayf al-Dawla, who also married his sister. In 336/947-8 he was appointed to the governorship of Manbij (and later also of Harrān), where, in spite of his youth, he distinguished himself in the conflicts with the Nizārī tribes of Diyār Madar and the Syrian desert. He also frequently accompanied Sayf al-Dawla in his Byzantine expeditions, and was captured in 348/951 but succeeded in escaping from imprisonment at Kharrāḡana by leaping on horseback into the Euphrates. In 351/962 he was again captured at Manbij during the Greek operations preliminary to the siege of Aleppo, and taken to Constantinople where he remained, in spite of his entreaties to Sayf al-Dawla, until the general exchange of prisoners in 355/966. He was then appointed governor of Hims and in the year after Sayf al-Dawla's death attempted to revolt against his son and successor (and his own nephew) Abū'l-Ma'ālī, but was defeated, captured and killed by the latter's general Karghawayh, a Dīmuḥdī, i, 357/4 April 968.

The reputation of Abū Fīrās owes much to his personal qualities. Handsome in person, of noble and brave, generous, and extolled by his contemporaries as "excelling in every virtue" (though also egotistic and rashly ambitious), he lived up to the Arab ideal of chivalry which he expressed in his poetry. This is probably the thought which underlies the often-quoted phrase of Ibn 'Abdāb: "Poetry began with a king (sc. Inru' al-Kayy) and ended with a king (sc. Abū Fīrās)". His earliest output is composed of *hazā'ir* of the classical type, devoted to praise of his family's nobility and warlike deeds (notably a *ra'yūya* of 225 lines recounting the history of the Hamdanid house) or to self-praise, and shorter lyrical pieces on anatomy or friendship themes of the 'Irākī type. The former are remarkable for their sincerity, directness, and natural vigour, in contrast to the metaphorical elaboration of his chief rival at the court of Sayf al-Dawla, al-Mutanabbī; the latter are elegant trifles, formal and unoriginal. Noteworthy also are his outspokenly *Shi'ite* odes, satirizing the 'Abbasids. But it is more especially on the poems of his captivity, the *Rūmīyāt*, that his fame rests. In these he gives expression in affecting and eloquent terms to the captive's yearning for home and friends, mingled with unselfish self-praise, reproach to Sayf al-Dawla for the delay in ransoming him, and bitter complaints at being neglected.

His *diwan* was edited with a commentary (largely from the poet himself) shortly after his death by his tutor and friend, the grammarian Ibn Khālawayh (d. 370/960). The manuscripts present, however, so many variations in text and arrangement that other recensions must also have been circulated, including probably that of al-Babbāghā (d. 398/1008; see Tanūkhī, *Ibid.*). All the earlier defective editions (Bayrūt 1873, 1900, 1920) are superseded by the critical edition of S. Dahhān (3 vols., Bayrūt 1941), with full bibliography.

**Bibliography:** Tanūkhī, *Niḡmāt al-Mubādara*, i, London 1921, 110-2; *Tha'ālibī, Yaṭima*, i, 22-62 (Cairo 1, 27-71); also ed. and translated with an introd. by R. Dvofak, *Abū Firs, ein arab. Ritter, in *Oriens* 1948, 377-85. (H. A. R. Gibb)

**ABU FUDAYK** 'ABD ALLĀH B. 'UḤAYY, a Khāridgite agitator, of the Banu Kays b. Tha'ālabā. Originally associated with Nāfi' b. al-Azrak (q.v.), he left him to join Najdā b. 'Amr (q.v.), whom he did not meet. He was a controversialist, and certain differences of opinion that arose between them after this murder he gained control over Bahrayn (72/691) and succeeded in withstanding the attack of an army from Basra sent against him by 'Abd al-Malik. Shortly afterwards (73/693) a second expedition, consisting of 10,000 men from Basra and commanded by 'Umar b. 'Ubayd Allāh b. Ma'nār succeeded in defeating him.

Wellhausen, *Die religiös-politischen Oppositionen*, 32. See also *ghawāṣṣ*.

(M. Th. Houtsma\*)

**ABU FUTRUS** (see NAME ABU FUTRUS).

**ABU 'L-FUTŪḤ HASAN** (see MAKKA).

**ABU 'L-FUTŪḤ AL-RĀZĪ**, Persian commentator of the Qur'ān. He lived between 480/1087 and 525/1131, fixed by conjecture. Among his disciples are Shāfi'ī theologians Ibn Shahrāshūb and Ibn Bārbūya (q.v.), who describes him as a scholar, preacher, commentator of the Qur'ān and a pious man. According to al-Shuḥrātī (*Madjālis al-Mu'minin*) he was a contemporary of al-Zamakhsharī, whom he quoted as his master—which would explain the Mu'tazilism of his commentary. Mub. Karwān has proved that his commentary could not date from before 510/1116. He claimed that he was a descendant of the Companion Nāfi' b. Budayr. His *Rawḍ al-Qiṣṣa wa-Rawḍ al-Diyāna* (Teheran 1905, in two volumes; 1937, in three volumes) is one of the earliest—if not the earliest—of the Shī'ite commentaries composed in Persian. In his introduction he declared that he gave preference to this language because those who knew Arabic were in the minority. The commentary, preceded by an introduction concerning the exegesis of the Qur'ān, deals with grammar, rhetoric, juridical and religious commands and the traditions about the origin of the verses. The influence of al-Tabarī's *Taṭīr* can be perceived; the Shī'ite tendency is less pronounced than in the later Persian commentaries.—In ad-

dition to the commentary he is said to be the author of a commentary on the *Shikāb al-Aḥbāb* of Mub. b. Sa'īda al-Kudā'ī (Brockelmann i, 343).

**Bibliography:** Storey, section 4, no. 6; H. A. Massé, in *Mélanges W. Marasi*, Paris 1950, 243 ff. (H. Massé)

**ABU GHĀNIM** BISHR B. GHĀNIM AL-KHURĀSĀNĪ, eminent Iḥādī lawyer of the end of the 2nd/8th and the beginning of the 3rd/9th century, a native of Khurāsān. On his way to the Rustamid capital, 'Abd al-Wāḥid (168-208/784-822) at Tāhārt, to offer him his book of *Madaṣṣana*, he stayed with the Iḥādī ḡayyāḥ, Abū Ḥafṣ 'Amrūs b. Fath, of Djabal Nafīsa, who rendered a service to Iḥādī literature by conserving in the Maghrib a copy of the work.

The *Madaṣṣana* of Abū Ghānim is the oldest Iḥādī treatise on general jurisprudence, according to the teaching of Abū 'Ubayda Muslim al-Tānimī (d. under al-Manṣūr, 136-58/754-75) (cf. *awṣaf*) as transmitted by his disciples. The manuscript of the *Madaṣṣana*, copied by 'Amrūs b. Fath, was composed of twelve parts; the titles are given in the catalogue of Iḥādī books compiled by Abū 'l-Kāsim al-Barrādī (8th/14th century). The book has become very rare; according to information received from S. Sogut, a manuscript in script was in the possession of an Iḥādī ḡayyāḥ in Guernata (Mzāb). Al-Barrādī's catalogue also quotes another law book by Abū Ghānim.

**Bibliography:** *Shammākhī, al-Siyar*, Cairo 1301, 228; Sālimī, *al-Lam'a*, in a collection of six Iḥādī works published in Algiers 1326, 184, 197-8; A. de Motylinski, in *Bull. Corr. Afr.*, 1883, 18, nos. 11-12, 21-22.

**ABU 'L-GHĀZĪ BAHĀDUR KHĀN**, ruler of Khīwa and Caghātāy historian, born probably on 16 Rabi' i, 1012/24 Aug. 1603, son of 'Arab Muḥammad Khān, of the Özbek dynasty of the Shaybānids (q.v.), and of a princess of the same family. He spent his youth in Urgandj at that time largely depopulated owing to the change of course of the Oxus, at the court of his father, who was khān of this place. In 1029/1619 he was appointed to be his father's lieutenant in Khūh, but when his father was killed soon afterwards in a rebellion of two of his other sons, had to take refuge at Samarkand with Imām-kulī Khān. After long fighting he, together with his brother Isfandiyyār, succeeded in ousting the rebellious brothers, with the aid of some Turkmens. In 1031/1621 he became lieutenant of his brother in Urgandj, but quarrelled with him, in connection with Turkmens tribal feuds, in 1036/1626 and had to flee to Tashkent, where he lived for two years at the Kazakh court. After another attempt to seize the throne in Khīwa, he spent ten years (from 1039/1629) as an exile at the court of the Safawids, mostly at Isfahān. Here he widened his knowledge of the most of his people, acquired at the Kazakh court, by the study of Persian sources. By the evidence of his translation, he knew Persian and Arabic well. After his flight from Persia he perfected his knowledge at the Kalnink court, by collecting Mongol traditions.

It was only after the death of Isfandiyyār (1052/1643) that Abū 'l-Ghāzī became (in 1054/1645) khān of Khīwa. As khān, he maintained diplomatic relations with all his neighbours, including Russia, interrupted by repeated wars. Expeditions against the Turkmens in 1054/1644, 1058/1646, 1058/1648, 1062/1651 and 1064/1653, led finally to the submission of some of these tribes in Kara-Kum and

Mangishlak. He was engaged also against the Kalninks in 1059/1649, 1064/1653 and 1067/1656, and against Būghdā in 1066/1653 and 1071/1662. Occasionally he allowed Russian caravans passing through his territory to be plundered, but had, in the interests of his own trade if for no other reasons, to pay compensation. For the rest, he endeavoured to further the welfare of his country and to promote scholarship. The military gifts which he ascribes to himself were, according to less partial sources, rather modest. He died in 1074/1661, shortly after he had abdicated in favour of his son.

Of his works we possess: 1) *Shedire-i Tārīkime*, composed in 1070/1659, mainly derived from Maḡhdāl-Dīn and the Oghuznāma, but with additions of independent value. The Caghātāy text was published in facsimile by the Türk Dil Kurumu, Ankara 1937; there is a Russian translation by A. Tumaniskī, *Shakhshōd* 1892, 2) *Shedire-i Ansh* (*Shedire-i Türk*), which he left unfinished at his death; the part from 1054/1644 was finished by his son Abū 'l-Muzaḥfir Anshā Muḥammad Bahādur in 1076/1665. This work contains the history of the Shaybānids from the middle of the 15th century, and is the main source for the dynasty up to 1074/1663, though written mostly "from memory", without direct use of sources, and widely defective in number, who had been expelled from the capital, decided to emigrate and try their luck in the Mediterranean. They succeeded in gaining a foothold in Egypt and occupied Alexandria for a few years. Besieged by the governor, 'Abd Allāh b. Tāhir, they had to capitulate in 212/827 and then decided to attempt a landing in Crete. Under the leadership of their chief, 'Abd Ḥafṣ al-Azīz b. Tāhir, they captured the island, which thus passed under Muslim domination. There is little information about the chronology of the dynasty founded by al-Ballūtī and the history of the island during that period. All that is known, thanks to Byzantine historians, who call Abū Ḥafṣ *Apochope* or *Apochopeia*, is that all attempts by the Byzantines to recapture Crete were in vain. It was also in vain that in 225/840 the emperor Theophilus addressed himself to 'Abd al-Rahmān II (q.v.) to ask for the restitution of the island. During its Muslim occupation, Crete maintained economic and cultural relations with al-Andalus, and its capital, al-Bhandak (modern Candia), was quite a brilliant intellectual centre.

**Bibliography:** Ibn Khāldūn, *Iḥār*, iv, 211; Kindī (6/MS XIX), 158-184; M. Gaspar Remiro, *Corcheos musulmanes en Alejandria y Creta, Homenaje Codera*, Saragosa 1904, 217-33; A. Vasiliev, *Byzance et les Arabes*, i (Fr. edition by Grégoire and Canard), Bruxelles 1935, 49 ff.; Zambaur, nos. 48, 70; A. Freixas, *España en los siglos dorados bizantinos, Cuadernos de Hist. de Esp.*, Buenos Aires, xi, 1949, 21-2; Lévi-Provençal, *Hist. Esp. Mus.*, i, 169-73, ii, 145-6. (E. Lévi-Provençal)

**ABU ḤAFṢ 'UMAR B. DJAMĪ**, Iḥādī scholar, probably a native of the Djabal Nafīsa, mentioned in al-Shammākhī's *K. al-Siyar* (Cairo 1301, 561-2), in a short note that gives no chronological information, but from which it may be deduced that he lived at the end of the 8th/14th or the beginning of the 9th/15th century.

He translated into Arabic the old 'Aḥida of the Iḥādīs of the Maghrib, originally composed in Berber. This translation was in use, at the time of al-Shammākhī (d. 928/1521-2), in the island of Djabar and in the other Iḥādī communities of the Maghrib, excepting the Djabal Nafīsa. It is still the catechism of the Iḥādīs of the Mzāb and of Djabar. The 'Aḥida

of Abū Ḥafṣ was the subject of numerous commentaries: by al-Shammākhī (circulating in MSS); by Abū Salaymān Ḍa'ūd b. Ibrahim al-Thalātī of Djabar (d. 967/1556-60) (see Eszica di Kayer, *Description et histoire de l'île de Djerba*, Tunis 1884, 9-10 text, 9-10 transl.); and finally those by 'Umar b. Ramadān al-Thalātī (12th/18th century), autographed or printed after the 'Aḥida, in the editions of Algeria (e.g. Constantine 1323) or Cairo.

The 'Aḥida of Abū Ḥafṣ was published and translated, with notes taken from the Iḥādī commentaries, by A. de Motylinski, *L'Épique des Abadites, Recueil Mém. et Textes XIV<sup>e</sup> Congrès des Orientalistes*, Algiers 1905, 305-45.

(A. DE MOTYLSKI—T. LEWICKI)

**ABU ḤAFṢ 'UMAR B. SHU'AYB AL-BALLŪTĪ**, native of Pedroche (Bitrawj) in the Faḡs al-Ballūtī, a district to the north of Cordova, founder of a minor dynasty which ruled over the island of Crete (Iḥrītīth [q.v.]) between 212/827 and 350/961, when his descendant 'Abd al-Azīz b. Shu'ayb was dethroned and the island recaptured by the general and future Byzantine emperor Nicephorus Phocas.

After the celebrated revolt of the Suburb which broke out in Cordova in 202/818 and was harshly suppressed by the amir Hakam I (cf. *UḤAYYAD* of *awṣaf*), a group of Andalusians, several thousand in number, who had been expelled from the capital, decided to emigrate and try their luck in the Mediterranean. They succeeded in gaining a foothold in Egypt and occupied Alexandria for a few years. Besieged by the governor, 'Abd Allāh b. Tāhir, they had to capitulate in 212/827 and then decided to attempt a landing in Crete. Under the leadership of their chief, 'Abd Ḥafṣ al-Azīz b. Tāhir, they captured the island, which thus passed under Muslim domination. There is little information about the chronology of the dynasty founded by al-Ballūtī and the history of the island during that period. All that is known, thanks to Byzantine historians, who call Abū Ḥafṣ *Apochope* or *Apochopeia*, is that all attempts by the Byzantines to recapture Crete were in vain. It was also in vain that in 225/840 the emperor Theophilus addressed himself to 'Abd al-Rahmān II (q.v.) to ask for the restitution of the island. During its Muslim occupation, Crete maintained economic and cultural relations with al-Andalus, and its capital, al-Bhandak (modern Candia), was quite a brilliant intellectual centre.

**ABU ḤAFṢ 'UMAR B. YAHYĀ AL-HINTĀTĪ** (an Arabic relative adjective formed from the name of a Berber tribe of the Anti-Atlas in Morocco, the Hintātā, or, according to the more current Berber form, Inti, the chief companion of the Almohade Mahdī, Ibn Tūmārtī, q.v.) was the most active supporter of the dynasty of the Mu'minids (see 'ANU al-MU'MIN). It was his own grandson, the amir 'Abd Zakariyā' Yahyā b. 'Abd al-Wāḥid who, in 634/1236-37, renounced his allegiance to the Mu'minids in Ifrikiya and founded, with himself and his descendants as rulers, the dynasty of the Hafṣids (q.v.), which was to be called after their ancestor.

Abū Ḥafs Infi—on whom the "Memoirs" of al-Bayhaqī [g.n.] is the most detailed source, whose information is most likely to be authentic—bore, in common with all his fellow-tribesmen before the activity of the Almohade Maḥdī, a Berber name, which appears to have been Faḥd b. Ḥ. Maḥdī. Ibn Tamiẓ himself, after he had persuaded him to support his cause, gave him the name of Abū Ḥafs 'Umar, in memory of the famous companion and lieutenant of the Prophet. Their first meeting, after the Maḥdī's return to his native mountains, can be placed in the year 514/1120-21; Abū Ḥafs, at this time, was apparently about 30 years old. From that time on, he was to make a remarkable career for himself, showing an extremely developed political sense, a more and more marked ascendancy over the first Almohade caliph, his own "creature", and enjoying the respect of all those who benefited under the new régime, from the highest to the lowest; in short, he was the "eminence grise" of the Almohade system which owed to him more than any other the fact that it did not fall to pieces at the outset. Until his death at a ripe age, in 571/1175-76, this intrepid Berber, vigorous general, valued counsellor and venerated *shaykh*, appeared continually in the forefront of the historical scene of the Maghrib, al-Andalus and Ifrīkiya. For details of his long political and military activities, see the articles *al-Muwāḥḥidūn* and *al-Muḥaddithūn*.

**ABŪ ḤAMĪD AL-ĠHARNĀTĪ**, MUHAMMAD B. 'ABD AL-RAḤMĀN (variant al-Rahmān) B. SULAYMĀN AL-MARĪNĪ AL-KAYLĪ, Andalusian traveller and collector of *'aḥādīṭ* [g.n.] at the beginning of the 6th/12th century, the perfect type of the Occidental *rakābiya*, drawn by the desire of *jalāl al-'ilm* and the spirit of adventure to the farthest limits of the lands of Islam. There is little biographical information about him and the main dates of his adventurous life are given by himself in his works. He was born in Granada in 475/1080, no doubt studied in his native city, and perhaps stayed some time in Uḡla (Uḡliḡ); when he was about thirty years old he left his native country, never to return. First he spent some years in Ifrīkiya, then embarked in 511/1117-18 for Alexandria, stayed first in that town and later in Cairo, until 515/1123. After a stop at Damascus, he went to Baghdad, where he spent four years. In 521/1129 he was in Aḥlat in Persia and subsequently near the mouth of the Volga. He went, much later, to Hungary, staying there for three years, until 548/1153. He then travelled through the lands of the Sakābiya (Eastern Europe),

and reached *Kh'arizm*; from there he went, via Bughārā, Marw, Nishāpūr, Rayy, Iṣfahān and al-Basra, to Arabia, to perform the pilgrimage. In 550/1155 he settled in Baghdad, but left six years later for Mosul. He then went to Syria, and after staying in Aleppo, established himself at Damascus, where he died in 565/1169-70.

It was in Baghdad, and then in Mosul, that Abū Ḥamīd al-Ġharnāṭī composed the two works that made him famous. In Baghdad he wrote for the well-known vizier Yahyā b. Hubayra *al-Ma'arib an al-'Aḥādīṭ al-Maghrībīy*, in Mosul, on the demand of his protector and Meccan, Abū Ḥafs al-Ardābilī (cf. Brockelmann, S. 783-4), his *Tahḍīb al-Aḥādīṭ* (or *al-Aḥādīṭ wa-Nuḥḍat al-'Aḥādīṭ*, which was abundantly cited by Muslim authors in the West as well as in the East. These two books, which are extant in numerous MSS, are full, not only of interesting information and exact records, but also of legendary or marvellous accounts. They have formed the object of elaborate monographs, with edition of the text and annotated translation; the *Tahḍīb* was published by G. Ferrand in *JA*, 1925, I, 148, 193-303; the *Ma'arib* by C. E. Dubler, with a Spanish translation and a hypercritical study (*Abū Ḥamīd al-Ġharnāṭī y su relación de viaje por tierras euroasiáticas*, Madrid 1952). A translation of the description of Rome contained in the *Tahḍīb* was published, from a Palermo MS, in the same city, by C. Crispo Moncada in 1900.

**Bibliography:** Makkarī, *Analekti*, I, 617-8; *Hadith* [Khalifa], II, 222, IV, 189-90; Pons Boigues, *Ensayo bio-bibliográfico*, 229-31; Brockelmann, S. I, 877-8.

**ABŪ ḤAMMŪ I** MUḤA B. ABĪ SA'ĪD *'UḡḡAMAS* B. YAGMURASAS, fourth king of the 'Abd al-Wāḥid dynasty. Proclaimed on 21 Shawwāl 707/15 April 1308, he had first to repair the damage caused by the siege of Tlemcen by the Marinids; he then prepared the defence of his capital against external attacks and fortified it in the expectation of a new siege. In the exterior, he restored his authority over the Banū Tūḡlūn and the Maghāwra and pushed as far as Būḡiyya (Bougie) and Constantine, while in the west he hindered the Marinids from advancing beyond Waḡḡa (Oujda). Preoccupied by the upkeep of a strong army, he could give little thought to the material and intellectual situation of his subjects. He showed extreme harshness even towards his son Abū Ṭaḡhūf, who had him murdered on 22 Dhuḥda I 718/22 July 1318 and was proclaimed as his successor.

**Bibliography:** see 'ABD AL-WĀḤID. (A. BEL)

**ABŪ ḤAMMŪ II** MUḤA B. ABĪ YAKŪB YUSUF B. 'ABD AL-RAḤMĀN B. YAHYĀ B. YAGMURASAS, king of the 'Abd al-Wāḥid dynasty. Born in Spain in 723/1323-4, he was brought up at the court of Tlemcen. After the victory of the Marinid army over his uncles Abū Sa'īd and Abū Ṭāḥib, in Dhuḥda I 753/June 1352, he had to take refuge with the Hafsid court of Tūnis. When the relations between the Hafsiids and Marinids deteriorated, he was put at the head of an army and reconquered Tlemcen, where he was proclaimed as king on Rab'ī I 760/9 February 1359. In 772/1370 the capital again fell under the rule of the Marinids, who, however, evacuated it in 774/1372. Abū Ḥammū, returning to his dominions, had to face several revolts and especially the hostility of his son Abū Ṭaḡhūf II [g.n.], who attacked Tlemcen at the head of a Marinid army in 791; Abū Ḥammū was killed in the battle, on 1 Dhu'l-Hajja 790/31 Nov. 1389.

Abū Ḥammū had a highly cultivated mind and sought the society of scholars and poets; he himself composed a treatise on political ethics. His secretary, intimate friend and historian, was Yahyā b. Khaldūn, who was assassinated in Ramaḍān 780/Dec. 1379, at the instigation of Abū Ṭaḡhūf.

(A. BEL)  
**ABU HAMZA** [see AL-MUQTAR B. 'UWAYR]  
**ABŪ ḤANĪFA AL-NU'MĀN B. ṬAMR**, theologian and religious lawyer, the eponym of the school of the Hanafīs [g.n.]. He died in 150/767 at the age of 70, and was therefore born about the year 80/699. His grandfather Zūḥrā is said to have been brought as a slave from Kābul to Kūfa, and set free by a member of the Arabian tribe of Taym-Allāh b. Ṭa'āḥ; he and his descendants became thus clients (*mawālī*) of this tribe, and Abū Ḥanīfa is occasionally called al-Taymī. Very little is known of his life, except that he lived in Kūfa as a manufacturer and merchant of a kind of silk material (*ḥabaz*). It is certain that he attended the lecture meetings of Ḥammād b. Abī Sulaymān (d. 120) who taught religious law in Kūfa, and perhaps on the occasion of the *'aḥādīṭ* of those of 'Alī b. Abī Rabbāh (d. 114 or 115) in Mecca. The long lists, given by his later biographers, of authorities from whom he is supposed to have "heard" traditions, are to be treated with caution. After the death of Ḥammād, Abū Ḥanīfa became the foremost authority on questions of religious law in Kūfa and the main representative of the Kūfian school of law. He collected a great number of private disciples to whom he taught his doctrine, but he was never a *hādī*. He died in prison in Baghdad, where he lies buried; a dome was built over his tomb in 459/1066. The quarter around the mausoleum is still called al-A'zamiyya, al-Imām al-A'zam being Abū Ḥanīfa's customary epithet.

The biographical legend will have it that the 'Abbāsid caliph al-Manṣūr called him to the newly founded capital, wanted to appoint him as a *hādī* there, and imprisoned him because of his steady refusal. A variant makes already the Umayyad governor Yazīd b. 'Umar b. Hubayra, under Marwān II, offer him the post of *hādī* in Kūfa and flog him in order to make him accept it, but again without success. These and similar stories are meant to explain the end of Abū Ḥanīfa in prison, and the fact, surprising to later generations, that the master should not have been a *hādī*. The truth is probably that he compromised himself by unguarded remarks at the time of the rising of the 'Alids al-Nafs al-Zakiyya and his brother Ibrāhīm, in 145, was transported to Baghdad and imprisoned there (al-Khatīb al-Baghdādī, xii, 329).

Abū Ḥanīfa did not himself compose any works on religious law, but discussed his opinions with and dictated them to his disciples. Some of the works of these last are therefore the main sources for Abū Ḥanīfa's doctrine, particularly the *Ḥabṣ* [d. Abī Ḥanīfa] *wa'Abī Laylā* and the *Radd 'alā Siyar al-Awā'if* by Abū Yūsuf, and the *al-Ḥudūd* and the version of Malik's *Muwatta'* by al-Shaybānī. (The formal *ṣawāb al-Shaybānī*—Abū Yūsuf—Abū Ḥanīfa, that occurs in many works of al-Shaybānī, designating as it does merely the general relationship of pupil and master, is of no value in this connection). For the doctrine that Abū Ḥanīfa himself had received from Ḥammād, the main sources are the *al-Ḥāḍir* of Abū Yūsuf and the *al-Aḥād* of al-Shaybānī. The comparison of Abū Ḥanīfa's successors with his

predecessors enables us to assess his achievement in developing Muhammadan legal thought and doctrine. Abū Ḥanīfa's legal thought is in general much superior to that of his contemporary Ibn Abī Laylā (d. 148), the *hādī* of Kūfa in his time. With respect to him and to contemporary legal reasoning in Kūfa in general, Abū Ḥanīfa seems to have played the role of a theoretical systematizer who achieved a considerable progress in technical legal thought. Not being a *hādī*, he was less restricted than Ibn Abī Laylā by considerations of practice; at the same time, he was less firmly guided by the administration of justice. Abū Ḥanīfa's doctrine is as a rule systematically consistent. There is so much new, explicit legal thought embodied in it, that an appreciable part of it was found defective and was rejected by his disciples. His legal thought is not only more broadly based and more thoroughly applied than that of his older contemporaries, but technically more highly developed, more circumspect, and more refined. A high degree of reasoning, often somewhat ruthless and unbalanced, with little regard for the practice, is typical of Abū Ḥanīfa's legal thought as a whole. Abū Ḥanīfa used his personal judgment (e.g., 12/2) and conclusions by analogy (*hiyāl*) to the extent customary in the schools of religious law in his time; and as little as the representatives of the other schools, the Medinese for example, was he inclined to abandon the traditional doctrine for the sake of "isolated" traditions from the Prophet, traditions related by single individuals in any one generation, such as began to become current in Islamic religious science during the lifetime of Abū Ḥanīfa, in the first half of the second century A. H. When this last kind of tradition, two generations later, thanks mainly to the work of al-Shāfi'i, had gained official recognition, Abū Ḥanīfa for adventitious reasons was made the scapegoat for the resistance to the "traditions of the Prophet" and, parallel to this, for the excessive of personal judgment in the ancient schools of law, and many sayings shocking to the later taste were attributed to him. Al-Khatīb al-Baghdādī (d. 463/1071) made himself the mouthpiece of this hostile tendency. The legal devices (*hiyāl*) which Abū Ḥanīfa had developed in the normal course of his technical legal reasoning, were criticised too, but they became later one of his special titles to fame (cf. Schacht, in *Id.*, 1926, 221 ff.).

As a theologian, too, Abū Ḥanīfa has exercised a considerable influence. He is the eponym of a popular tradition of dogmatic theology that lays particular stress on the ideas of the community of the Muslims, of its unifying principle, the *umma*, of the majority of the faithful who follow the middle of the road and avoid extremes, and that relies on scriptural rather than on rational proofs. This tradition is represented by the *al-Aḥim wa'-'Mata'allim* (wrongly attributed to Abū Ḥanīfa) and by the *Fikḥ al-Aḥim*, which both originated in the circle of Abū Ḥanīfa's disciples, and later by the works of Hanafī theologians, including the creed of al-Ṭabṭāwī (d. 321/932) and the catechism of Abū 'Alaysh al-Samarikandī (d. 383/993) which has always been very popular in Malaya and Indonesia, in territory which in matters of religious law is solidly Shāfi'i. This dogmatic tradition arose out of the popular background of the theological movement of the Muḥaddiths [g.n.], to which Abū Ḥanīfa himself belonged. The only authentic document by Abū Ḥanīfa which we possess is, in fact, his letter to 'Uḡḡamān al-Battī, in which he defends his *mudh'ite*

period. At that time the Coptic name *Helit* (*Helik*), or as al-Kudā'ī (quoted by al-Makrīdī) has it: *Helakā* (*Helak*), was also still known. The Arabic Abu 'l-Hawl is most probably a popular etymology based on the Coptic designation; the initial *H* probably represents the Coptic article, which has been transformed in Arabic, as often happened, into *Abū*. In the old tradition the name Abu 'l-Hawl was applied only to the head of the homobed sphinx, as the body was covered by sand in the Middle Ages and was designated only in 1872. Modern Arabic authors use the word for "sphinx" in general, not only for the sphinx in the vicinity of the pyramids.

The Arabs, who had no knowledge of ancient Egyptian civilization, regarded with superstitious awe the head which reached high above the sand of the desert in majestic dimensions. It was considered to be a talisman preventing the encroachment of the sand on the valley of the Nile, the same magical effect was ascribed by others to the pyramids. Another, female, colossal statue—to judge by the descriptions probably a statue of Isis with the child Horus—which lay on the other shore of the Nile in Fustāt, was considered to be the beloved of Abu 'l-Hawl. She had her back to the river, as Abu 'l-Hawl had his to the desert, and was thought to be talisman against the flooding of Fustāt by high water. This statue was destroyed in 711/1311 by treasure-hunters and its stones were used in the building of a mosque. According to another tradition Abu 'l-Hawl was the effigy of the legendary Ughmūn, to whom the Sībians used to sacrifice white cocks and incense.

The Arabic accounts have but little to contribute to the history of the monument. According to al-Makrīdī the face was apparently no longer intact in 375/985, although later accounts praise its beauty and the harmony of its features, whose reddish colour is frequently mentioned. About 780/1378 a fanatical *ghayk* caused further damage to the statue. *Bibliography*: Makrīdī, *Kātib*, I, 122 ff.; ed. Wiet, II, 123 ff. (with notes); Ibn Dūqūmkī, IV, 21 f.; Makrīdī, 270; Yāqūt, IV, 966; S. de Sacy, *Relation de l'Égypte*, 180; 'Abū Muḥrāk, *al-Kātib al-Dīdāda*, xvi, 44 ff.; E. ABU 'L-HAYYAN AL-HAMMAD (see HAMMAD).  
ABU HAYYAN ABU 'L-ḤAYYAN MUHAMMAD b. YUSUF al-GHARNĀTĪ, the most distinguished Arab grammarian of the first half of the 12th century, was born in Granada, Špawwāl 654/Nov. 1256, and died in Cairo, Šafar 745/July 1344, where, after 10 years of productive study and travel throughout the entire Arab world, he had served as a professor of the *Kur'ān* disciplines in the Ṭūlūn mosque. This creative scholar is reported to have written 63 works, many of them multi-volumed, on Arabic and other languages (notably Turkish, Ethiopic, and Persian), *Kur'ān*ic studies, traditions, jurisprudence, history, biography, and poetry.

Of the 13 extant works the most important are: *Manḥadj al-Sālik*, a commentary of the *Alfiyya* of Ibn Mālik (ed. Sidener Glaser, New Haven 1947); includes, besides text, a complete bio-bibliography of Abū Ḥayyān and a historical sketch of native Arabic grammar; *al-Idrāk li-Lisān al-A'rāb*, the most ancient grammar of Turkish available (ed. A. Caceres, Istanbul 1931; cf. also *Jā*, 1892, 346-351); *al-Baḥr al-Muḥīl*, an extensive commentary on the *Kur'ān* (cf. *Geogr. des Qur.*, III, 243 and Brockelmann, S II, 136).

Abū Ḥayyān's greatness as a grammarian was due not only to his mastery of the linguistic data and control of his predecessors' efforts (he knew Sibawayh's *Kutāb* by heart, for he accorded it an authority in grammar equal to that of *ḥadīth* in religion), but to his remarkably modern approach to descriptive and comparative grammar (cf. S. Glaser, in *JACS*, 1942), as shown both by his willingness to illuminate an Arabic grammatical concept through quotations from other languages and by following such operational principles as "Qibṭi must base rules of Arabic on frequency of occurrence" and "Analogous formations that contradict genuine data found in good speech are not to be permitted". This unusual spirit of objectivity and respect for facts have made of the *Manḥadj al-Sālik* a work of great distinction. Besides elucidating and correcting Ibn Mālik's brilliant if occasionally over-compression of the totality of Arabic grammar into 1000 verses of poetry, the *Manḥadj* presents a miniature bibliography of grammatical science and a panorama of thought on some of its most difficult problems on which the opinions of hundreds of grammarians, *Kur'ān* readers, and lexicographers are cited. It was considered to be obscure by the more scientific taste of a later generation, but written by his pupils Ibn 'Aḥl and Ibn Ḥijām.

*Bibliography*: Makrīdī, *Analekt*, I, 823-62; Kutābī, *Fawā'id*, II, 282, 352-6; Ibn Ḥadjar al-'Askalānī, *al-Durār al-Kāmina*, Hyderabad 1330/1911, IV, 303-8; Suyūṭī, *Daḡayl al-Waḍī*, 121-2; Zarkashī, *Ta'wīḡ al-Fanālaya*, Tunis 1289/1873, I; Brockelmann, II, 109, S II, 136; I. Goldziher, *Die Zāhīdīn*, Leipzig 1884, 188 ff.

(S. GLASER)

ABU HAYYAN AL-TAWHIDI, 'Aḥl b. Muḥ. b. al-'Aḥmās (probably called al-Tawhīdī after the sort of dates called *tawhīd*), man of letters and philosopher of the 4th/10th century. The place of his birth is given either as Nishāpūr, Shīrāz, Wāsiṭ or Baghdād; its date must be placed between 320-202/922. He studied in Baghdād, grammar under al-Sīrāfī and al-Rumādī, *Shāfi'ite* law under Abū Ḥāmid al-Marw al-Rūḡḡī and Abū Bakr al-Shāhī; and also frequented *ṣūfi* masters. He supported himself by acting as a professional scribe. It is said, in a somewhat doubtful passage (see al-Sukūṭī, al-Safādī, al-Dhahabī, Ibn Ḥadjar) that he was, owing to heretical opinions, persecuted by the vizier al-Muḥallabī (d. 352/963). He was in Mecca in 353/964 (*al-Imā'ā*, II, 79; *Basīr*, IV, Cambridge, fol. 167v) and in Rayy in 358/971 (Yāqūt, *Iḡḡād*, II, 292; at the court of Abū 'l-Faḍl b. al-'Amīdī, d. 360/970). From his *al-Muḥāḥadī*, 256, we know that in 361/971 he attended lectures of the philosopher Yāliya b. 'Adī in Baghdād. He tried his luck with the vizier Abū 'l-Faḍl b. al-'Amīdī in Rayy (d. 366/976), to whom he addressed an elaborate epistle; to judge from his hostile sentiments towards the vizier, he did not achieve much. From 367/977 he was employed by Ibn 'Abbād as an amanuensis. In this case, too, he was anything but a success, owing, no doubt, mainly to his own difficult character and sense of superiority (he for example refused to "waste his time" in copying the bulky collection of his master's epistles), and was finally given his dismissal. He felt himself badly treated and avenged himself by a pamphlet containing brilliant caricatures of both Abū 'l-Faḍl b. al-'Amīdī and Ibn 'Abbād (*Ḥamām*—or *Maḥabbat* or *Abḥād*—*al-Waḥayy*; considerable extracts in Yāqūt, I, 281, II, 44 ff., 282 ff., 317 ff.; v. 359 ff., 392 ff., 406 f.).

It was in the period between 359-65/961-73 that he composed his anthology of *adab*, entitled *Basīr al-Kudāmī*, also called *al-Basīr wa'l-Dhahabī*, etc.) in ten volumes (vols. I-V in Fātūh [Istanbul, 3295-9; I-II in Cambridge 134, in *Ḥār Allāh* [Istanbul] and in Manchester 767; unidentified volumes in the 'Umūmiyya [Istanbul, Rāmpūr I, 330, Ambrosiana II]). It was probably Ibn Rayy that he addressed as "Khalafah" the question which the latter answered in his *al-Hawāṣil wa'l-Shawā'id*. After his return to Baghdād, at the end of 370/980, he was recommended by Zayd b. Rīfā'a and Abū 'l-Wafā'a al-Būrdjānī, the mathematician, to Ibn Sa'dūn (also called, after his function as an inspector of the army, al-'Aḥnd—cf. al-Rūḡḡarawī, *Ḍaḡayl Taḡrīb al-Dināw*, 9; hence the confusion in Ibn al-Kūṭī and in modern authors). For him he started his book on Friendship, which was finished, however, only thirty years later. He frequented regularly at this epoch (lectures attended in 371/981, *al-Muḥāḥadī*, 246, 286) the man who exercised the greatest influence on him, namely Abū Sulaymān al-Mantikī (q.v.), who was his main oracle, especially on philosophical matters, but also on every other conceivable subject. Ibn Sa'dūn was appointed by Sa'mān al-Dawla as his vizier in 373/983. Abū Ḥayyān remained an assiduous courier of the vizier, attending his evening receptions where he had to answer the vizier's questions on the most varied topics of philology, literature, philosophy, court- and literary gossip. (He very often reproduces the views of Abū Sulaymān—who lived in retirement and did not attend the court—on the matter in question). At the request of Abū 'l-Wafā'a the mathematician, he compiled for his personal record of thirty-seven of these sessions, under the title of *al-Imā'ā wa'l-Mu'āḥad* (cf. A. Aml and A. al-Zayn, Cairo 1939-44). In 375/985-6 Ibn Sa'dūn fell and was executed, and Abū Ḥayyān apparently remained without a patron. (He wrote for Abū 'l-Kāsim al-Muḥallabī, vizier in Shīrāz for Sa'mān al-Dawla in 382-3/992-3, *al-Muḥāḥadī* wa'l-Muḥallabī; quotations in Yāqūt, I, 15, II, 87, v. 382, 405, vi, 466). Of the later period of his life we know very little; he evidently lived in poverty. It was in these later years that he compiled his *al-Muḥāḥadī* (Bombay 1306, Cairo 1937)—both very faulty editions), a collection of 100 conversations on various philosophical subjects. The chief speaker is again Abū Sulaymān, but there appear all the other members of the Baghdād philosophical circle. *al-Muḥāḥadī* and *al-Imā'ā wa'l-Mu'āḥad* are mines of information about contemporary intellectual life and they should prove invaluable for a reconstruction of the doctrines of the Baghdād philosophers.—Towards the end of his life Abū Ḥayyān burned his books, alleging as reason the neglect in which he had to live for twenty years. In the preface to his treatise on Friendship (*al-Sādika wa'l-Sadīk*), printed together with a short treatise on the use of science, Istanbul 1307), which he finished in 400/1009, he makes similar complaints. A guide book to the cemetery of Shīrāz (*Shād al-Faḥr wa'l-Faḥr al-Azhar*, 17) claims that the tomb of Abū Ḥayyān al-Tawhīdī which it calls, however, Ahmad b. 'Abbās) was to be seen in Shīrāz and gives as the date of his death 411/1021.

Abū Ḥayyān was a master of Arabic style. He was a great admirer of al-Dīhīrī, in whose praise he wrote a special treatise, *Taḡrīb al-Dīhīrī* (quoted by Yāqūt, I, 124, II, 86, vi, 58, 69; Ibn Abī 'Hādīd, *Sharḥ Naḡdī al-Balgha*, III, 282 f.), and his wish to imitate the style of the great prose-writer is evident.

His talent is most apparent in the passages, frequent in his books, where he characterizes people. As for his beliefs, he does not seem to have had any original system. He was obviously impressed by Abū Sulaymān's Neo-platonic system, which the latter shared with most of the other contemporary Baghdād philosophers. Like the other members of the circle, Abū Ḥayyān also showed an interest in Sūfism, but not enough to make him a regular Sūfi. His *al-Ṭibār al-Iḥkāmī* (ed. 'A. Badawī, Cairo 1951) "consists of prayers and homilies and only occasional references to Sūfi technicalities". Abū Ḥayyān was coupled with Ibn al-Rāwandī and al-Ma'arri as one of the *zindīk* of Islam (*JRAS*, 1905, 80) but his extant works scarcely justify this assertion" (D. S. Margulouth, in *EP*, s.v.).

*Bibliography*: Yāqūt, *Iḡḡād*, v, 380 ff.; Ibn Khallikān, no. 707; Sukūṭ, IV, 21; Safādī, *Wāfi*, in *JRAS*, 1905, 80 ff.; Dhahabī, *Muḥāḥad*, III, 353; Ibn Ḥadjar, *Lisān*, IV, 369; Suyūṭī, *Buḡya*, 348; Brockelmann, I, 283, S I, 435; Muhammad b. Keilani, *Abū Ḥayyān al-Tawhīdī* (in French), Beyrouth 1950.—Abū Ḥayyān's little treatise on writing, ed. F. Roenthal, *Arī Islamica*, 1948, 1 ff.; three epistles (*Riḍālat al-Imāma*—quoted by Ibn al-'Arabī, *Muḥammadi*, II, 77; Ibn Abī 'l-Hādīd, *Sharḥ Naḡdī al-Balgha*, IV, 594 ff., etc., and containing a message purporting to be addressed by Abū Bakr to 'Aḥl, but which, it has been suspected, was invented by Abū Ḥayyān himself; *R. al-Hayy*, from a philosophical point of view; and the above mentioned treatise on writing) have been edited by I. Keilani, *Ṭalāṭh Rasā'id*, Damascus 1952. An extract from al-Zuḥlī, *al-Rūḡḡarawī*, 75. (S. M. STERN)

ABU 'L-HUDHAYL AL-'ALLAF, MUHAMMAD b. AL-HUDHAYL b. 'UBAYD ALLAH b. MAKHUL, with the *nisba* of al-'Aḥmās (being a *maḥall* of 'Aḥd al-Kays), the first speculative theologian of the Mu'tazila. He was born in Basra, where he lived in the quarter of the *al-lāḥūn*, or foragers (whence his surname); the date of his birth is not known (335/753-4 or 342/751-2 or even 312/728-9. In 203/819 he settled in Baghdād and died at a great age, in 226/840-1, or according to another tradition, in the reign of al-Wāḥidī (227-32/842-7), or, on the authority of others, in 235/849-50, under al-Mutawakkil. He was indirectly a disciple of Wāḥid b. 'Aḥl, through the intermediary of one of Wāḥid's companions, 'Uḡmūn al-Tawīl. Like Wāḥid, he was lettered; his profound knowledge of poetry was especially celebrated. Some *ḥadīṭ* also are quoted under his name.

The theology which he inherited from the school of Wāḥid was still rudimentary. Essentially polemical, it opposed—in a rather unsystematic fashion, it seems—the anthropomorphism of popular Islam and of the traditionalists, the doctrine of determinism favoured for political reasons by the Umayyads, and the divinization of 'Aḥl preached by the extreme *Shī'ites*. While continuing this polemic, Abū 'l-Hudhayl was the first to engage in the speculative struggles of the epoch, a task for which he was exceptionally well equipped by his philosophical mind, his sagacity and his eloquence. He became the apologist of Islam against other religions and against the great currents of thought of the preceding epoch:

the dualists, represented by the Zoroastrians, the Manichaeans and other Gnostics; the philosophers of Greek inspiration, the *dahriyya*, mainly represented by the champions of the natural sciences; finally against the increasingly numerous Muslims who were influenced by these foreign ideas. crypto-Manichaean poets like Sāliḥ b. 'Abd al-Kudrī, the theologians of the "modern" type who had adopted certain gnostic and philosophical doctrines, etc. It seems that it was only at a mature age that he made himself acquainted with philosophy. On the occasion of his pilgrimage (the date of which is unknown) he met in Mecca the Ṣūfī theologian Ḥajjīm b. al-Hakam and disputed with him concerning his anthropomorphic doctrines, which show a gnostic influence; and it was only then that he began to study the books of the *dahriyya*. Later historians observe certain similarities between his doctrine of the divine attributes and the philosophy of Pseudo-Empedocles, forged by the Neo-Platonists and natural scientists of late antiquity; in effect his philosophical sources must have been of such a kind, which are represented in general by medieval Aristotelianism. These philosophers attracted, as well as repelled, him; while combatting them, he adopted their methods and their manner of looking at problems. Naive as a thinker, and having no scholastic tradition, he approached speculative problems with a daring which did not even recoil from the absurd. Hence all the premisses and the lack of balance which characterize his theology, but also the freshness of his attempts. He was the first to set many of the fundamental problems at which the whole of the later Mu'tazila was to labour.

The unity, the spirituality and the transcendence of God are carried in the theology of Abu 'L-Hudhayl to the highest degree of abstraction. God is one; he does not resemble his creatures in any respect; he is not a body (against Ḥajjīm b. al-Hakam); he has no figure (*ḥay'a*), form (*ṣūra*) or limit. God is knowing with a knowledge, is powerful with a power, alive with a life, eternal with an eternality, seeing with a faculty of sight, etc. (against the Ṣūfīs who asserted that God is knowledge, etc.), but this knowledge, power, etc. are identical with himself (against popular theology which regarded the divine attributes as entities added to essence); provisional formulas of compromise which did not satisfy later generations. God is omnipresent in the sense that he directs everything and his direction is exercised in every place. God is invisible in the other world; the believers will see him with their hearts. The knowledge of God is unlimited, as to what concerns his knowledge of himself, as for his knowledge of the world, it is circumscribed by the limits of his creation, which forms a limited totality (if it were not limited, it would not be totality). The same applies to the divine power. Abu 'L-Hudhayl strove to reconcile the Kur'ānic doctrine of creation *ex nihilo* with the Aristotelian cosmology, according to which the world, set in motion by God, is eternal, movement being co-eternal with the prime mover himself. While accepting movement as the principle of the universal process, he declared it to be created in the Kur'ānic sense; in consequence, movement also will reach its end and will cease. This end is placed by him in the other world, after the last day; movement having ceased, paradise and hell will come to a standstill and their inhabitants will be fixed in a state of immobility, the blessed enjoying for eternity the highest pleasures and the damned enduring the most cruel torments. This bizarre

doctrine, which, according to tradition, he himself revoked, is unanimously rejected by all the Muslim theologians, Mu'tazilites or not; nor has its grave consequences for the doctrine of God's omniscience and omnipotence escaped them. In regard to theology, Abu 'L-Hudhayl taught that God has the power to do evil and injustice, but he does not do it, because of his goodness and wisdom. God admits the evil actions of man, but he is not their author. Man has the power to commit them, he is responsible for them, and responsible even for the involuntary consequences resulting from his actions (theory of *ta'wil*), first developed by Abu 'L-Hudhayl. The responsibility being in man, the entire world is together with his visible body. It was Abu 'L-Hudhayl who introduced into Mu'tazilite speculation the concept of the accidents (*a'rā'id*) of bodies, and that of the atom, which he called *ḡiṣḡar*. These concepts, which originally had a purely physical relevance, were made by him to serve as the basis for theology proper, cosmology, anthropology and ethics. This is his most original innovation, as well as the most heavy with consequences; it was this which gave to Mu'tazilite theology its mechanical character. Life, soul, spirit, the five senses, are accidents and therefore not enduring; even spirit (*rūḥ*) will not endure. Human actions can be divided into two phases, both of them movements: the first is the approach ("I shall do"), the second the accomplished action ("I have done"). Man having free will, the first movement can be suspended in the second phase, so that the action remains unaccomplished; it is only the accomplished action which counts. Divine activity is interpreted in the light of the doctrine of accidents: the whole process of the world consists in an incessant creation of accidents, which descend into the bodies. Some accidents, however, are not to be found in a place or in a body; e.g. time and divine will (*irāda*). The latter is identical with the eternal creating word *ḥusn*; it is distinct from its object (*al-murād*) and also from the divine order (*amr*), which man can either obey or disobey (while the effect of the creating word *ḥusn* is absolute: *ḥusn ya-yahḥusn*, Kur'ān ii, 111, etc.). Those who are not acquainted with the Kur'ānic revelation, but who have nevertheless accomplished laudable acts prescribed by the Kur'ān, have obeyed God without having the intention to do so (theory of *ḡā'a la yurādū'lāḥu bihā*, otherwise attributed to the Khārijites). The Kur'ān is an accident created by God; being written, recited or committed to memory, it is at the same time in various places. In the question of the mediaeval bay'a al-ma'zalatayn Abu 'L-Hudhayl took up a position which was in conformity with the political situation of his time: he did not reject any of the combatants round 'Alī, yet preferred 'Alī to 'Uthmān. He enjoyed the favour of al-Ma'mūn, who often invited him to the court for theological disputes.—

All the writings of Abu 'L-Hudhayl are lost. During his long life, Abu 'L-Hudhayl had an enormous influence on the development of theology and he collected round him a large number of disciples of different generations. The best known amongst them is al-Nazzām, though he quarrelled with his master because of his destructive theories concerning the atom; Abu 'L-Hudhayl condemned him and composed several treatises against him. Among his disciples are named Yahyā b. Bishr al-Arṣādī, al-Shāhīm, and others. His school continued to exist for a long time; even al-Djubbā'ī still avowed his indebtedness to Abu 'L-Hudhayl's

theology, in spite of the numerous points on which he differed from him.—Unfortunately, the theology of Abu 'L-Hudhayl was exposed to the malevolence of a renegade from Mu'tazilism, the famous Ibn al-Rāwandī, who, in his *Faḍīḥat al-Ma'tazila* grossly misrepresented it, by substituting it to an often too cheap criticism; this caricature has been faithfully reproduced by al-Baghdādī in his *Farḥ* and often recurs in the résumés of the Mu'tazila. It is only with the help of al-Intisār, by al-Khayyāt, the severe critic of Ibn al-Rāwandī, that we are able to unmask the latter's procedure and gain an exact idea of the true motives of Abu 'L-Hudhayl's speculation. Al-Aṣḡarī, in his *Makāshif*, reproduced his thesis with admirable impartiality; after the school tradition of the Mu'tazila, al-Shahrastānī based his expose on the later Mu'tazilite tradition, especially, it seems, on al-Ka'bi.

**ABŪ HURAYRA AL-DAWĪ AL-YAMĀNĪ**, Companion of Muḥammad. His name 'Abd Shams was changed to 'Abd Allāh or 'Abd al-Rahmān when he became a Muslim, but numerous other names have also been mentioned. He was called Abū Hurayra because, when he herded his people's goats, he kept a kitten to play with. When he came to Medina the Prophet was on the expedition to Khaybar (726/27). Accepting Islam, he associated closely with Muḥammad on whose charity he depended, and was one of the seven men called *alḥudūd* (73-7). He was devoted to his mother whom he persuaded to become a Muslim. 'Umar appointed him governor of Bahrain, but deposed him and confiscated a large sum of money in his possession. When 'Umar later invited him to resume the post, he refused. Marwān is said to have appointed Abū Hurayra his deputy when he was absent from Medina, but another version says Mu'awiya gave him this appointment. Abū Hurayra had a reputation both for his piety and his fondness for jesting. He is said to have died in 57, 58, or 59; but if it is true that he prayed at 'Aḥisha's funeral in 58, the date must be 58/678, or 59. He was 78 years old.

Although he became a Muslim less than four years before Muḥammad's death, Abū Hurayra is noted as a prolific narrator of traditions from the Prophet, the number of which is estimated at 3500. Ahmad b. Hanbal's *Musnad* contains 213 pages of his traditions (ii, 228-541). 800 or more men are credited with transmitting traditions from him. There is a story, given in slightly different forms, in which he explains why he transmitted more traditions than others. He says that while he was occupied with their business, he stayed with Muḥammad and so heard more than they. When he complained that he forgot what he heard, Muḥam-

mad told him to spread out his cloak while he was speaking and draw it round himself when he had finished. Abū Hurayra did so, and thereafter forgot nothing he heard the Prophet say. He had to defend himself against suspicions regarding his traditions; but whether this is genuine, or has merely been invented for the purpose of overcoming the suspicions of people at a later period, it is impossible to prove. The traditions attributed to him contain much material which cannot be genuine; but Sprenger is scarcely justified in calling him a pious humbug of the first water, as the traditions traced to him are not necessarily his. He may be little more than a convenient authority to whom inventions of a later period have been attributed. Abū Hurayra presumably did tell many stories about Muḥammad, but the authentic ones may be only a small amount of the huge number of traditions traced to him. Many of his traditions appear in the *Ṣaḥīḥ* of al-Buḥārī and Muslim.

Munabbih, containing traditions from his teacher Abū Hurayra, was published by M. Hamidullah, *MIMIA*, 1933, 96 ff. (J. ROSSIGNOL)

**ABŪ HUSAYN** (BAḤĀ ABĪ HUSAYN) Sicilian dynasty (see KALIDIS).

**ABŪ 'INĀN FĀRIS**, eleventh sovereign of the Marīfid [a.] dynasty of Fez, born in 729/1329, had himself proclaimed at Tlemcen in 749/1349, when his father, Abū 'L-Ḥasan 'Alī, after being defeated at Kayrawān, was returning as a fugitive to Morocco. Ibn al-Aḥmar describes him as very tall, with a fair skin (his mother was a Christian slave), and says that he had a long beard. A fearless horseman, he was also widely versed in literature and the law. Like his father, he was a prince with a passion for building, and completed several of the foundations that his father had begun, in particular medersas at Fez, Meknes, and Algiers. The Bu 'Ināniyya at Fez is the most monumental of these Maghribi colleges.

Having gained the throne by usurpation, Abū 'Inān went on to assume the caliphal title *amir al-mu'minin*, which his father had not borne. He made it his aim to rebuild his father's empire in Barbary and fairly quickly succeeded in doing so, but only for a few years. He seized Tlemcen from the 'Abd al-Walīdīs (1352), and, the same year, took possession of Bougie. In 757/1357 he occupied Constantine and had himself proclaimed at Tunis; but, abandoned by his Arab auxiliaries, the Dawīwīda of the Constantine region, he was compelled to return to Fez. Not long afterwards he fell ill (759/1358) and was strangled by his vizier al-Fāddī, who had the son of his victim proclaimed, and thus inaugurated the series of palace revolutions and the long decadence of the Marīfids.

**ABŪ 'ISĀ' AL-ISFAHĀNĪ**, Jewish pretender to the title of the Messiah under the Umayyad 'Abd al-Malik b. Marwān, or according to others under Marwān II. The most noteworthy of his doctrines was his acknowledgement of the validity—for the non-Jews—of Islam and Christianity. He was killed in a battle against the Muslims; the sect, called 'Isawiyya, survived into the 10th century A.D.

**Bibliography:** Birnī, *al-Ġharīb al-Bakīya*, 15; Ibn Hānī, *Fīḥ*, I, 114-5; Shahrastānī, 108; Makrīfī, *Khīṭāf*, II, 478-9 (= S. de Sacy, *Chrest. arabe*, I, 116); H. Grätz, *Gesch. d. jüd. Volkes*, v, 173 and note 17 (by A. Harkavy); *Encyclopaedia Judaica*, s.v. Abū Isā. (S. M. STERN)

**ABŪ 'ISĀ MUHAMMAD B. HĀSĀN AL-WARRĀK**, a Mu'tazilite at first, became one of the arch-heretics in Ḥilān; his friend and pupil, Ibn al-Rāwandī [q.v.], went through the same metamorphosis. The date of Abū 'Isā's death is given by al-Mas'ūdī (vii, 236) as 247/861; if it is true, however, that Ibn al-Rāwandī died about the end of the 3rd/9th century (see Kraus, 379), this date would seem to be too early. The issue would be decided if one could be sure that the paragraph in al-Shahrastānī, 108, where the date 271 occurs, still contains the quotation from Abū 'Isā.

Abū 'Isā was accused of Manichean sympathies. Al-Murtadā's defence, *al-Kāfi*, 13, to the effect that his books *al-Maḥḥabī* and *al-Nawā' al-Baḥā'im* were spuriously attributed to him by the Manicheans, deserves, of course, no credit. On the other hand it is not very likely that he was a formal adherent of Manichaeism; most probably he was an "independent thinker" (L. Massigou). Interesting quotations, showing his method in criticising current religious beliefs, and taken from his *al-Ḥarīb al-Maḥḥabī*—such is the full title also in *Fihrist*, 177, and al-Tūsi, 99; a "stranger from the East" was evidently introduced as the exponent of heterodox views—are to be found in Abū Ḥayyān al-Tawhīdī, *al-Idā' wa 'l-Mu'ānaṣa*, III, 192.

His main work was a book on religions and sects, *al-Makhlūṭ*, which served as an important source for writers such as al-Ash'arī (Makhlūṭ al-Ladīmīyya, 33, 34—Shī'a; cf. also index, 37), al-Mas'ūdī (Muraḥḥ, v, 473 ff.—Zaydiyya), al-Baḥḥānī (Fārḥ, 49, 51), al-Bīrūnī (al-Aḥḥār al-Bakīya, 277, 284—Jewish sects, Samaritans), Abū 'Alī Naṣrī (Bāyān al-Aḥḥār [Eghbal], 10—refutation of the pagan Arabs; as the editor points out, 54 ff., similar passages are to be found in Ibn Abī 'Iḥḥādī, *Sharḥ Naḥḥ al-Balāgha*, I, 39, iv, 437; Ibn Abī 'Iḥḥādī quotes Abū 'Isā in other passages also), al-Shahrastānī, (141, 143)—Shī'a; 192—Mānā; 188—Mānā). Abū 'Isā's Mu'tazilite adversaries insinuated that he was too eager to reproduce in his book the arguments of the Manicheans.

Abū 'Isā wrote books favourable to the Shī'a (*al-Imāma*; al-Sakḥā, quoted by al-Mufīd, cf. Eghbal, *Rihānā-nā Naubakḥī*, 86)—hence the partiality of Shī'ite authors for him.

His critical examination of the three branches of Christianity (Orthodox, Jacobite, Nestorian) survives in the refutation by Yahyā b. 'Adī (cf. A. Preter, *Yahyā bin 'Adī*, 17, 150 ff.; L. Massigou, *Textes inédits concernant l'Église de la mystique*, 182-3; A. Abel, *Abū 'Isā al-Warrāq*, Brussels 1949).

(S. M. STERN)

**ABŪ ISHAK AL-ILIRI**, ILIRĪNĪ b. Ma'sūd b. Sa'īd al-Tuḥḥī, Andalusian jurist and poet, native, as shown by his *nisba*, of Ilīra (Elvira), which in the century of the *muluk al-tama'iq* lost its position to the neighbouring Granada. Little is known of his life. Born in the last years of the 4th/10th century, he was, during the reign of the Zirid king of Granada, Bāds b. Habbis, secretary of the *khāṭ* 'Alī b. Muḥ. b. Taḥḥa and at the same time occupied in teaching. In his poems he protested against the increasing influence of the Jews in the kingdom of Granada and especially against the functions, too important in his eyes, entrusted to the famous vizier Samuel b. Naḥḥīd Ibn Naḥḥīl, and to his son Joseph, who succeeded him in this office in 448/1056-7. It was no doubt at the latter's instigation that Bāds assigned to the *fakīh* a forced residence in the *al-ḥaḥ* of al-'Ukāb, in the Sierra de Elvira. Abū Ishak, however, did not give way, and the celebrated political poem, to which he owes most of his reputation, was, if not the determining cause, at least one of the factors which brought about the well-known pogrom in Granada, on 9 Saḥar 459-30 Dec. 1066, during which Joseph b. Naḥḥīl and some of his poems were murdered. Abū Ishak al-Ilirī died shortly afterwards, at the end of the same year of 459/1067.

In addition to his fulminating poem, to which attention was long ago drawn by Dory, Abū Ishak left a collection of poems, which are in the majority of assonic inspiration and which he apparently composed at an advanced age. This *diwān*, of which a MS has been preserved in the Escorial (no. 404), has been published by the author of this article with an introduction. It is very characteristic of the limited poetical faculties of an Andalusian *fakīh* of medium culture, who rises to eloquence only when expressing his intolerant fanaticism.

**Bibliography:** Dabbi, no. 520; Ibn al-Abbār, *Tahmīn* (Algiers), no. 132; Ibn al-Khāṭib, *Iḥḥā*, article reproduced by E. Dory, *RSO*, I, 48-54 and App. xxvi (*Poème d'Abū Ishak d'Elvira*); and *contre les Juifs de Grenade*; idem, *Hist. Mus. Esp.*, III, 70-3; E. García Gómez, *Un alifan español: Abū Ishak de Elvira*, Madrid-Granada, 1944; Brockelmann, S. I, 479-80.

(E. GARCÍA GÓMEZ)

**ABŪ ISHAK** (see al-Sakā' and al-Shihāz).

**ABŪ KABIR AL-HUDHALI**, early Arab poet, after Abū Dhū'ayb the second greatest poet of the tribe of Hudhayl. He belonged to the Banū Sa'd, or, according to some, to the Banū Dīrāyib. His real name was 'Amīr b. 'Uwaymīr b. al-Mulays (also named as the 'aric), according to other statements, 'Amīr b. Dīrāyib, but he was always known by his *nisba*. According to some commentators (cf. e.g. al-Thirīfī in the *Hamāṣ*), Abū Kabīr belonged to the mother of the famous Ta'abbata Sharḥ and as the stepson was displaced at this union Abū Kabīr is said to have been advised by the mother of Ta'abbata Sharḥ to kill him at the first opportunity, but failed on account of the latter's bravery. This

story can hardly be true but is rather an attempt to explain the well-known lines of Abū Kabīr in the *Hamāṣ* in which he describes a companion in arms, an ideal hero in terms of the Arab conception. Moreover, in some versions the roles are interchanged (cf. Ibn Kutayba, *al-Shī'r*, 422): Ta'abbata Sharḥ married Abū Kabīr's mother and so on. The story that represents Ta'abbata Sharḥ as the constant companion of our poet deserves equally little credence because his tribe was continually at feud with the Fahals. He flourished in the second half of the 6th and the beginning of the 7th century, so that biographers like 'Izz al-Dīn b. al-Aḥḥār (*Uṣṣ al-Ḥabā*, Cairo 1280, vi, 272) and Ibn Ḥadīr al-'Asḥālī (*al-Faḥ*, Cairo 1325, vii, 162) number him among the *shāhā*.

From the content of his poems he is, however, decidedly to be classed as a *ghāḥil*. His *diwān*, edited and translated for the first time by F. Bajraktarević, consists of only four long *bayyats* and 19 short fragments mostly wrongly attributed to him, but is in many ways very interesting and valuable; all the *bayyats* are composed in the same metre (*kāmil*) and begin in the same way, as was pointed out particularly by Ibn Kutayba (*al-Shī'r*, 420). What is especially striking also in his poems is the complete absence of any description of the camel. Arab critics frequently rank Abū Kabīr very highly as a poet. Al-Ma'arri, it is true, accuses him of narrowness of range but singles out some of his verses as particularly fine, while 'Awf b. Muḥallim (in *Yakūṭ*, *Fihrist*, vi, 57) goes so far as to call him the greatest poet of Hudhayl.

**ABŪ KALAMMAS** (see KALAMMAS).

**ABŪ KALAMM** means originally a certain textile of a peculiar sheen, then a precious stone, a bird, and a mollusc. The origin of the word is not certain; the unanimous statement of the Arab philologists that Abū Kalamīn is a Byzantine product would indicate the derivation of the word from Greek. In the *K. al-Tabayyū* b. 'Abū Kalamīn is listed as a precious Byzantine textile. According to H. L. Fleischer (*Die Glossen Habbakhanī*, Leipzig 1856, 106), followed by Dory (*Suppl.*, I, 6, 85), it is derived from *ὀφιοειδής*, supposed to mean "striped cloth". S. de Sacy proposed to derive the word from *χαλαρόν*, "chameleon", proverbial for its changing colours (*Christ. arab.*, III, trad. 268). But neither the dictio-

aries nor Djabīr nor Damīr know of Abū Kalamīn as a name for the chameleon (though, according to the *Burḥān al-ḥāqī*, the word has this meaning in Persian). The proverb: "more changeable than Abū Kalamīn", or: "than Abū Barāḥīsh" (e.g. Freitag, *Proverbia*, I, 409; Hamaḥḥānī, *Makhlūṭ*, Beyrūt 1924, 86; Ibn Ḥazm, *Tawḥ*, 66, cf. *And.*, 1959, 353), could refer to the chameleon or to a bird of changing colours which is also called Abū Barāḥīsh (cf. Karwīnī, ed. Wüstenfeld, I, 406). Further, according to Muḥammad, 240-1 (ed. and transl. Pellat, 53 and no. 143), Abū Kalamīn denotes a mollusc (pinna), the byssus or "beard" of which is used in the manufacture of a sheeny cloth, which is also known as *ḥal al-bahr* (cf. Dory, *Suppl.*, s.v.). P. Kraus, *Jābir ḥn Ḥayyān*, II, 110 refers to the use of *ḥayyān* as a term for the philosophers' stone in ancient alchemy (cf. Lippmann, *Entstehung... Alchemie*, I, 298). This usage explains why Djabīr gave one of his books, in which he treats of the various colours of the seven metals (*al-ḥayyān*), the title *Kutīb Abi Kalamīn* (P. Kraus, *op. cit.*, I, 24; cf. Kuska, in *JA*, 1925, 102 n.).

**ABŪ KALB** (see KIKKA).

**ABŪ KĀLDJĀR AL-MARZUBĀN B. SULTĀN AL-DAWLĀ**, a prince of the *ḥawā* yild [q.v.] dynasty, born in al-Baḥra in Shawwāl 399/May-June 1009, when he was 14/1021. Muḥarrir al-Dawla's Daylamite troops murdered his waṣī at al-Aḥwā and declared for his brother Sultān al-Dawla [q.v.], the latter, whom Muḥarrir had supplanted as ruler of al-'Irāk in the previous year, took heart and sent them his son Abū Kāldjār, though then only a boy of twelve, to take over the city in his name. In the following year Muḥarrir and Sultān made peace, Muḥarrir retaining al-'Irāk and Sultān regaining Fārs and Khūzistān; but in Shawwāl 415/December 1023-January 1024 Sultān died, on which the control of those provinces was for the next two years disputed between Abū Kāldjār (who was even then no more than sixteen) and another of his uncles Abū 'l-Fawāris, the ruler of Kirmān. Abū Kāldjār emerged victorious from this struggle, but then failed in an attempt to dislodge Abū 'l-Fawāris also from Kirmān; so that when they made peace in 418/1027 he was obliged to pay Abū 'l-Fawāris a yearly tribute of 20,000 dinars.

Meanwhile these preoccupations had prevented Abū Kāldjār from accepting the invitation of the Baghdad garrison to replace yet a third uncle, 'Izzāl al-Dawla [q.v.], as Amīr al-Umawī, on the latter's failure to appear in the capital after the death, in Rabi' II 416/June 1025, of Muḥarrir al-Dawla. Abū Kāldjār was nevertheless acknowledged in the *ḥabā* at Baghdad for some eighteen months (from Shawwāl 416/Dec. 1025 to Djumādā I 418/June-July 1027); in 417/1026 he was likewise acknowledged in the *ḥabā* at al-Kūfa; and in the following year he was able to send his waṣī, Ibn Bāshḥādī, to assert his authority over the Euphrates marshes, though the only result of this move was a rebellion of his inhabitants against the waṣī's extortions. In 419/1028 Abū Kāldjār added both al-Baḥra and Kirmān to the area under his control, the former by a timely intervention in a conflict between the Daylamites and Turks of 'Izzāl's garrison, and the latter by the death of Abū

1-Fawris. In 420/1027 however, on his seining Wāsit, ʿIzzād retaliated by sacking al-Ahwāz; and when in Kahl' I 421/April 1030 they met in a three-day battle, Abū Kālidjār was severely defeated. ʿIzzād then retook Wāsit and the marches, and for a time his troops also reconquered al-Basra, but this was soon recovered by those of Abū Kālidjār; and in Shawwāl/October of the same year he in turn defeated ʿIzzād at al-Majlāḡ.

During the next five years ʿIzzād was repeatedly forced to leave Baghdad owing to the insubordination of his Turkish mercenaries; and on two such occasions—in 425/1032—his name was replaced in the legends of the capital at their instance by that of Abū Kālidjār. On the second of these occasions Abū Kālidjār despatched a force to help the chief Turkish commander, which took and held Wāsit for a few months. During most of 424/1033, on the other hand, al-Basra was occupied by ʿIzzād's forces and the same year pronounced itself Abū Kālidjār's in the ʿIzzād's there, but these mutual aggressions proving of no advantage to either, in 428/1037, after ʿIzzād's recovery of Wāsit, uncle and nephew concluded a formal peace, swearing to molest each other no more.

In 433/1039 Abū Kālidjār joined in suppressing his tributary governor of al-Basra with Ibn Mukram of ʿUmdū, whom the governor had annoyed; and later in the same year and again in 437/1043 he was obliged to send troops to ʿUmdū itself to suppress disorders consequent on Ibn Mukram's death. In the latter year Abū Kālidjār's intervention in a quarrel between the sons of the Kākawayhid (Kākūyid) 'Alī' al-Dawla was fruitless; but in 434/1042-3 his forces repulsed the first Saljuḡid attack on Kirmān. Then in Sha'ban 435/March 1044 ʿIzzād died, and though the Baghdad garrison first offered its allegiance to his son al-Malik al-'Adī (q.v.), Abū Kālidjār prevailed on them with the offer of an ample accession gratuity to withdraw it in his favour. In Safar 436/September 1044, accordingly, he was acknowledged in the *ḡubūr* not only in Baghdad itself but also in the Ḥawāṣ district, the Euphrates territory and Diyār Bakr, and thus became sole Buwayhid sovereign, receiving from the caliph the *lubb* Muḡy al-Dīn.

During his ensuing four years' reign Abū Kālidjār was chiefly concerned to preserve his power against Saljuḡid encroachment. This had already caused him to begin walling his capital, Shīrāz, for the first time, and in 437/1045-6 only the outbreak of disease among his homes prevented him from challenging a Saljuḡid advance into the south-western ʿIzzād. Two years later, however, he decided instead to ally himself with the Saljuḡids; and, Tughrul (q.v.) proving amenable, an alliance was sealed by Tughrul's marriage with Abū Kālidjār's daughter and the marriage of Abū Kālidjār's second son to Tughrul's niece. This alliance preserved his dominions in the west from further Saljuḡid attacks; but in 440/1048, a Saljuḡid force again invaded Kirmān, where, instead of being opposed, it was joined by Abū Kālidjār's governor. He therefore set out to vindicate his authority in person, but suddenly died before reaching his destination (ʿIzzādī 440/October 1048).

Abū Kālidjār left at least nine sons, the eldest of whom, entitled al-Malik al-Kābilū (q.v.), succeeded him as Amir al-Umūrāʾ, the last of the dynasty to rule in Baghdad and al-'Irāq, and the second of whom, Fāḡlād-Sūṭrān, succeeded him as ruler of Fāz until murdered by a rebel in 454/1062.

In 479, while in Shīrāz, Abū Kālidjār, in common

with many of his Daylami troops, was converted to Ismāʿīlism by the Fāṭimid *dalī* al-Muʾayyad B. ʿUṭū (q.v.). Some four years later, in order to maintain good relations with the ʿAbbāsīd al-Kāʾim he was obliged to banish the *dalī* from his dominions; but it would appear from the account of those events in the latter's *Sūva* (ed. Kāmil Husayn, Cairo 1949, 77) that he remained personally devoted to the Fāṭimid cause. A reference to Abū Kālidjār's dealings with al-Muʾayyad is made also by Ibn al-Balḡhī in his *Fāris-nāma*.

**ABŪ KĀMİL SHUDJĀʿ** B. ARLAN B. MUH. B. SHUDJĀʿ AL-HASHI AL-MISRI, next to Muḡb. B. Mūsā al-Khārizmī (q.v.) the oldest Islamic algebraist of whose writings we still possess some remains; they entitle us to place him among the greatest mathematicians of the Islamic Middle Ages (for the development of Islamic algebra see AL-ZABR wa 'l-MUʿADABALA). Through Leonard of Pisa and his followers he exercised considerable influence on the development of algebra in Europe and no less great was the impact of his geometrical writings (algebraic treatment of geometrical problems) on Western geometry. No details of his life are known; all we can say is that he lived after al-Khārizmī (d. about 850 A.D.) and before ʿAlī b. Ahmad al-Umīdī (d. 344/955-6) who wrote a commentary on his *Algebra*.

The *Fihrist*, 281, lists a number of books on astrological and mathematical subjects as well as on other topics such as the flight of birds etc. Two of these titles, *Kāmil fi ʿl-ḡubūr* and *ʿl-Taḡrīf*, are augmenting and diminishing; the *Fihrist* attributes a work bearing the same title to al-Khārizmī and K. al-ḡubūrāʾya, "On the two errors", have been the objects of elaborate discussions ever since F. Woeckle (JA, 1863, 514) tried to identify al-Dīnawarī with the Latin *augmentum et diminutio* occurring in the *Liber augmenti et diminutionis*, ed. Libri, in *Historia scientiarum mathematicarum in Italia*, Paris 1838, 213-97, 2nd ed., 1865, 304-69; cf. H. Suter, in *Bibl. Math.*, 1902, 330-4, and J. Huska, *Zur ältesten arab. Algebra und Rechenkunst*, in *SBAG*, Heidelberg, 1917/2, 14-23.

None of the works mentioned in the *Fihrist* has survived in Arabic. A work preserved in Arabic is *al-Tarāʾif* (MS Leiden, 1001, fol. 50v-58v), transl. and commented by H. Suter, *Der Buch der Schönheiten der Rechenkunst von Abū Kāmil al-Misri*, *Bibl. Math.*, 1910-1, 100-20. It deals with the integral solutions of indeterminate equations ("Diophantine analysis" according to modern usage; it may be well to state that this term is historically incorrect; Diophantus, 3rd cent. A.D., whom we have to regard, at least as far as the Greek work is concerned, as the founder of indeterminate analysis, is interested only in rational, not exclusively integral, solutions of his problems). Of *al-Tarāʾif* there exists a Hebrew version (Munich 225, 4) by Mordechai Finai of Mantua

(c. 1460) who translated also Abū Kāmil's treatises on algebra (Munich 225, 3). As assumed by G. Sacerdote, *Il trattato del pentagono e del decagono di Abu Kāmil*, in *Festschrift Steinschneider*, Leipzig 1896, 160-94, and proved by Suter, *Die Abhandlung des Abu Kāmil Shudjāʿ b. Arlan über das Fünfeck und Zehneck*, *Bibl. Math.*, 1909-10, 13-42, these translations were made not from Arabic or Latin, but from Spanish. According to Suter, it is probable that the Paris MS 7377 A, no. 6, is a Latin version of *al-Tarāʾif*. (The same MS contains Latin versions of Abū Kāmil's algebra and of his treatises on the pentagon and decagon.)—Indeterminate equations with integral solutions appear in India fully developed about 1150 in Bhāskara's *Vijaganita* (ed. Colebrooke, *Algebra with arithmetic and mensuration*, London 1817, 233-5), but the problem is referred to already by Āryabhaṭa (b. 476), who even anticipates for its solution the method of continued fractions, to which Bhāskara applies the term *kuṭṭaka* "dispersion" (cf. M. Cantor, *Gesch. d. Math.*, i, 588 ff.) Abū Kāmil's procedure is less systematic and therefore inferior to the Indian. He finds his solutions mainly by way trial, yet shows considerable skill in overcoming the difficulties involved. It is hard to decide whether or not he knew the *kuṭṭaka* method. However that may be, it is certain that the anonymous author of a commentary on *al-Tarāʾif*, of which the Leiden MS contains a fragment (fol. 101-2), was familiar with it, because he clearly refers to the proof of a method of finding integral solutions that has hardly been different from the *kuṭṭaka* method.

The connection between Abū Kāmil and the Indians is shown by a curious detail: they resort to the same, or at least similar, varieties of birds as examples in their problems. In Europe, we meet with indeterminate equations in Leonard of Pisa's *Liber abaci* (1202; *Scripta*, ed. Boncompagni, Roma 1857-62, 4)—again with reference to birds. The first appearance in Europe of this problem seems to be marked by a MS composed about 1000 A.D. in the monastery of Reichenau. Later European algebraists, in particular the German "Consists" (Adam Kiese, etc.) usually substitute men, women, or virgins for the birds, and therefore the term "regula virginum" (for "r. potiorum", "r. coet", or "r. coet") was adopted by them. This framework the author, led on by his philological inclinations, has interwoven so much of his extensive knowledge of the *adab* literature and of the terminology of the different trades and also of pornographic poetry—he quotes many verses of Ibn al-Haddjādī—that the realism of the description as well as the unity of the tale suffer considerably.

**Bibliography:** Abū ʿl-Muṭahhar al-Aḡḡ, *Hikāyat Abi ʿl-Kāsim*, ed. A. Mez, Heidelberg 1902; J. M. de Goeje, in *GG*, 1903, 721 ff.; C. Brockelmann, in *Literarisches Centralblatt*, 1902, 1568 ff. (J. HOROWITZ).

**ABU ʿl-KĀSIM** (see AL-ZAHRAWĪ).

**ABU ʿl-KĀSIM BĀBUR** (see TĪMURĪD).

**ABU ʿl-KHĀSIB**, a canal to the south of Basra (called after a client of the caliph al-Mansūr), the most important among the canals that in the Middle Ages flowed from the west into the main channel of the Tigris, the Dīḡla al-'Awrāʾ of Arabic authors, i.e. the modern *Shatt al-'Arab*. Its bed still exists. It was on its bank that the Zangī rebels built in the 3rd/9th century the great fortress of al-Mahdīyā.

**Bibliography:** Le Strange, 47 f.; M. Streck, *Babylonien nach den arab. Geogr.*, Leiden 1900, i, 42 (M. STRECK).

The treatise "On the pentagon and decagon", Latin version, MS Paris A, German transl. by Suter, cf. above; Heber version, Munich 225, 3, Italian transl. by Sacerdote, cf. above. All problems occurring in this treatise are solved in a clear and simple mode by applying algebraic methods to geometry. Throughout his treatise, Abū Kāmil chooses special values—in most cases the value 10—for the given quantity, instead of denoting it by a letter or even equalling it to 1. In this respect, he has not freed himself from the method of al-Khārizmī; but in his way of handling the problem he is far superior to his predecessor, and his work definitely marks an important progress. Sacerdote has shown that Leonard of Pisa knew this treatise and made extensive use of it in his *Practica geometriae* (*Scripta*, ii).

**Bibliography:** Suter, 43; Brockelmann, S I, 390; M. Steinschneider, *Hebräische Übersetzungen*, 584-5. (W. HARTNER).

**ABU ʿl-KĀSIM**, the name of a famous paraisir, whom Muhammad b. Ahmed Abu ʿl-Muṭahhar al-Aḡḡ depicts in his *Hikāyat Abi ʿl-Kāsim al-Baḡdādī* as a Baghdad type. The book was probably written in the first half of the fifth century and purports to relate faithfully a day in the life of its hero. Abu ʿl-Kāsim by means of his pious eloquence gets a hearing in a society of people at a banquet, rails at the guests and the host and shows his linguistic skill in a detailed comparison of the advantages of Baghdad and Ispahan. As the numerous courses of the repast are served, they are accompanied by his glib remarks. When the wine goes to his head he becomes importunate and vulgar, till finally, being forced to drink still more deeply, he falls asleep; when the intoxication is over he again plays the devout believer. Into this framework the author, led on by his philological inclinations, has interwoven so much of his extensive knowledge of the *adab* literature and of the terminology of the different trades and also of pornographic poetry—he quotes many verses of Ibn al-Haddjādī—that the realism of the description as well as the unity of the tale suffer considerably.

**ABU 'L-KHATTĀB** MUHAMMAD b. Abi ZAYNAB MIKĀS AL-AJDA' AL-ASADĪ, Muslim heresiarch. According to al-Kashshī, his father was Mikās b. Abi 'L-Khattāb, and he himself used the kunya Abū Ismā'īl and Abū 'L-Zuhayr. He was a Kufan, and a member of the tribe of Asad. In the Nuyārī writings he is also called al-Khālīl. He was one of the chief dā'īs of the Imām Dī'ār al-Šādīk, but fell into error and taught false doctrines, as a result of which he was repudiated and denounced by the Imām. Seventy of his followers, assembled in the mosque of Kūfa, were attacked by order of the governor 'Isā b. Mūsā, and after a bitter struggle, were killed. Abū 'L-Khattāb himself was arrested and brought before 'Isā b. Mūsā, who had him executed and crucified at Dār al-Rīk, on the Euphrates, together with a number of his followers. Their heads were sent to the Caliph al-Manṣūr and impaled by the gate of Baghdad for three days. The date of these events is not precisely known, but a conversation recorded by al-Kashshī as having taken place in 135/755 appears to refer to the recent extermination of Abū 'L-Khattāb and his followers (fa'nha'af ad-dhūmūn wa-nafayāt ad-dūlūm: al-Kashshī 197; cf. Lewis, 33; Ivanov, however (p. 117) interprets this tradition as referring to the repudiation of Abū 'L-Khattāb by Dī'ār, and places his death in about 145/760). According to the Nuyārī, he will still reverberate Abū 'L-Khattāb, 'he manifested the dā'wa' at Dār al-Rīk on 10 or 11 Muḥarram, and both this and the day of his 'appointment' by Dī'ār al-Šādīk (11 Dhū 'l-Hijja) are sacred anniversaries. He seems to have played a role of some importance in the early development of extremist Ṣūfite doctrine, and is named by the Central Asian Ismā'īlī book *Umm al-Kūth* (Ist., 1936, pts. 1 and 2, cf. W. Ivanov, *REI*, 1932, 428-9), as well as by a number of Sunni and Ighnā'ashari sources, as a founder of the Ismā'īlī faith. He is however condemned in later Ismā'īlī writings of the Fātimid period, in much the same terms as in the books of the Ighnā'ashariyya. For a discussion of his doctrines see KHATTĀRIYYA.

**Bibliography:** The best accounts of the life and death of Abū 'L-Khattāb are to be found in Ighnā'ashari works, especially Kashshī, *Ma'rifat al-Ridālī*, Bombay, 1317, 187 ff.; Nawbakhtī, *Firāz*, 37 and 58 ff. An Ismā'īlī account will be found in the Kāfi Nu'mān's *Dalā'im al-Islām* (A. A. Fyfe, vol. 1, Cairo, 1951, vol. 6, 11). There are also some interesting references in the Nuyārī work *Madā'ir al-A'yād*, ed. R. Strothmann, in *Ist.*, 1946, 6, 8, 10, 128, 159, 202. For general discussions see Henry Corbin, *Étude préliminaire pour le Livre révélateur des deux sagesse* (de Nādir-Khorram, Tehran 1953, 14 ff.; W. Ivanov, *The Alleged Founder of Ismā'ilism*, Bombay 1946, 115 ff.; B. Lewis, *The Origins of Ismā'ilism*, Cambridge 1949, 32 ff.; Muhammad Kaẓwīnī, in *Djauwayrī*, III, 344 ff. (B. Lewis).

**ABU 'L-KHATTĀB AL-KALWADHĀNĪ** [see AL-KALWADHĀNĪ].

**ABU 'L-KHATTĀB** 'ABD AL-A'ZĪZ b. AL-SAMM AL-MA'AFIRI AL-HIMYARI AL-YAMANI, the first imām elected by the Ibādīs of the Maghrib. He was one of the few missionaries (kama'at al-ṣūm, 'carriers of science') sent to the Maghrib by Abū 'Ubayda al-Tamīmī of Basra, the spiritual head of the sect, in order to preach there the Ibādī creed [cf. KHATTĀRIYYA]. These missionaries received from Abū 'Ubayda the order to establish an imamate amongst the Ibadhiyya of Tripolitania, with Nuyār

'L-Khattāb as imām. The activities of the *kama'at al-ṣūm* were crowned with success. In 140/757-8 the Ibādī notables of Tripolitania, in a council held in Sayrād, near Tripoli, elected Abū 'L-Khattāb as imām. The Ibādī Berber tribes, Hawwara, Naḥsa etc., commanded by the new imām, conquered with the slogan *la ḥukm illā l'ḥimā wa-lā ḥa' illā l'ḥat* Abū 'L-Khattāb, the whole of Tripolitania, including Tripoli, which became the residence of their chief. In Safar 141/Juni-July 758 the army of Abū 'L-Khattāb took al-Kayrawān, capital of Ifrīkiya, at that time in the possession of the Sufarīs of the Berber tribe of Warfajjajūma. 'Abd al-Kāhīm b. Rustam, the future founder of the Ibādī imamate of Tāhart, was appointed governor of the town. The outcome of Abū 'L-Khattāb's conquests was the creation of an Ibādī state comprising the whole of Ifrīkiya, viz. Tripolitania, Tunisia and the eastern part of Algeria. It even seems that Abū 'L-Khattāb had a certain influence over the Sufarīs of al-Jazīra.

In Dhū 'l-Hijja 141/April 759, Muhammad b. al-Agh'ash al-Khuzā'i, 'Abbasid governor of Egypt, sent to Ifrīkiya an army commanded by al-'Awwām b. 'Abd al-'Azīz al-Baḡdālī, to reconquer the province. The army was defeated by the Ibādīs in the region of Surt, near the eastern boundaries of Abū 'L-Khattāb's possessions. Another 'Abbasid army, led by Abū al-Nuwayr al-Ahwas al-'Iḍīdī, was defeated at Maghaddis (Makmadēs Syrtis, modern Marsa Zafra). In the meantime, Ibn al-Agh'ash received orders to march himself against the Berbers and to assume the government of Ifrīkiya. On receiving this news, Abū 'L-Khattāb set out with a considerable army. Deceived, however, by a stratagem of Ibn al-Agh'ash, who pretended to return to the city, he allowed his troops to disband. When Ibn al-Agh'ash shortly afterwards reached the neighbourhood of Tripoli, the imām hastily assembled the nearest tribes to check his advance. The battle took place at Tāwurgā (on the coast, a few days' journey to the east of Tripoli) in Safar 144/May-June 761. It was very bloody: Abū 'L-Khattāb with twelve or fourteen thousand of his followers were killed. In Jumādā l/August, Ibn al-Agh'ash reoccupied al-Kayrawān.

**Bibliography:** Abū Zakariyyā', *al-Sira wa-dhikr al-A'imma* (MS coll. S. Smogorzewski), fol. 17, 6'-13'; E. **ABU 'L-KHATTĀR AL-HUṢAYN b. DIRĀR AL-KALBĪ**, GOVERNOR of al-Andalus, who arrived in that country from Ifrīkiya in 125/743, to replace the *waḥī* Ḥa'faba b. Salama al-'Amīlī. He carried out a liberal policy, and skillfully removed from Cordova the representatives of the Syrian *djunds*, who had come to Spain under the leadership of Baljī b. Bihār [q.v.]. On the advice of Count Arabast (Arbābas), son of the Visigothic prince Witiza, he settled these *djunds* on fields, requiring from them in return that they should respond to mobilisation appeals that might be made to them. It was in this way that the Syrian system of the *djund* came to be introduced into al-Andalus. The representatives of the *djund* of Damascus were installed in the Elvira district, those of the *djund* of the Jordan in the district of Rayyo (Archidona and Malaga), those of the *djund* of Palestine in the district of

Sidona, those of the *djund* of Hims (Emesa) in the districts of Seville and Niebla, those of the *djund* of Kinnasir in the district of Jaén, and those of the *djund* of Egypt in the Algarve and in the region of Murcia (Tudmir). A little later Abū 'L-Khattār entered into conflict with a powerful chief of the *djund* of Kinnasir, al-Samsay [q.v.], b. Hātim al-Kūshī, who mustered troops and defeated the governor in Raḡlab 127/April 745 on the Gualdele. In vain did Abū 'L-Khattār afterwards attempt to regain his office; it was seized by the *Djughānīte* chief Ṭawāba b. Salama, who himself died the next year.

**ABU 'L-KHAYR**, ruler of the Ōzbeḡs (see UZBEKS) and founder of the power of this nation, descendant of Shāyḡān, Djuḡi's youngest son (see SHAYYARĪD), born in the year of the dragon (1412; as the year of the hidjra 816/1413-4 is erroneously given). At first he is said to have been in the service of another descendant of Shāyḡān, Djamādūkh Khān. The latter met his death in a revolt; Abū 'L-Khayr was taken prisoner, but was released and shortly after proclaimed Khān in the territory of Tura (Siberia) at the age of 17 (year of the ape-1425; as the year of the hidjra 833/1429-30 is given). After a victory won over another Khān of the family of Djuḡi the greater part of Kipčak submitted to him. In 841/1439-40 he conquered Khāzrim with its capital Urgandī, which was plundered, but soon afterwards he gave it back. According to his biographers, Abū 'L-Khayr later vanquished two more princes, Mahmūd Khān and Ahmad Khān, conquered the city of Urdū-Hāzār, and seized (though for a short time only) the 'throne of Sāyin Khān', i.e. that of Batu. Shortly before the death of Sultān Shāhrukh (850/1447) Abū 'L-Khayr established himself firmly through the subjugation of the fortresses of Signak (at present the ruins of Sınak-Kurgan), Arlık, Surak, Ak-Kurgan and Urdūn on the Sir Daryā—the most significant event in his reign for the further history of the Ōzbeḡs. Signak seems to have been his capital from that time. South of this region no durable conquests were made under Abū 'L-Khayr; even the neighbouring town of Yast (now Turkistan) remained in the power of the Timurids. Manoeuvring expeditions were frequently undertaken, even as far afield as Buḡārā and Samarkand. Abū 'L-Khayr appeared with greater forces in 853/1451-2 as an ally of the prince Abū Sa'īd against the then ruler of Samarkand 'Abd Allāh; with his aid 'Abd Allāh was defeated and killed and Abū Sa'īd was installed as ruler in Samarkand; Kibi's Sultān Bēgum, daughter of Ulugh Beg, was given in marriage to Abū 'L-Khayr. A second attempt to interfere in the disputes of the Timurids fell out less happily; Muhammad Djuḡl, favored by Abū 'L-Khayr against Abū Sa'īd, was forced in 855/1460-1 after some successes to raise the siege of Samarkand at the approach of his enemy, to quit the country ravaged by Abū 'L-Khayr's auxiliary troops (under Burkās Sultān) and in 868/1465—having, it seems, received no assistance from Abū 'L-Khayr—to surrender to his adversary. Shortly before, probably about 861/1456-7 (Abū 'L-Khayr's grandson, Mahmūd, born in 858/1454, is said to have been then three years old), Abū 'L-Khayr's power received a severe blow from the Kalmak (Kalmucks); beaten in the open field, he had to flee to Signak and let the enemy ravage the whole country up to the Sir. About 870/1465-6 there appears to have taken place among the Ōzbeḡs that split, through which the proper

inhabitants of the steppes, since called Kazak, separated from the other portion of the nation. The year of the rat (1468; erroneously identified with 874/1469-70) is given as the year of Abū 'L-Khayr's death; the power founded by him was after a short interruption restored and extended by his grandson Muhammad Shāh b. al-Kubistānī.

**Bibliography:** Abū 'L-Khayr's biography was written towards 950/1543-4 by Ma'ūd b. 'Uḡmān al-Kubistānī (*Ta'rikh-i Abū 'L-Khayr Khān*); the statements in Howarth, *Hist. of the Mongols*, II, 687, are correct only so far as concerns the MS. of the British Museum, but not the work itself; cf. Rieu, *Cat. of Pers. MSS.*, I, 102; the Leningrad MSS, including that of the University Library or 812, used here, have also the beginning of the biography. Ma'ūd was also able to utilize the oral narratives of Abū 'L-Khayr's son Šayūnūd Khān (d. 937/1525), who seems to have drawn his information from written sources, as for example the *Mafāḥ al-Sa'dāyān* of 'Abd al-Razzāk al-Samarḡandī. Information about Abū 'L-Khayr is also to be found in the historical works on his grandson Shāyḡān and his successors, especially in the *Tawārīkh-i Nujrat Nāma* (cf. Rieu, *Cat. of Turkish MSS.*, 276 ff.) and the writings dependent on it. (W. BARNOLD)

**ABU 'L-KHAYR AL-ISHLBILĪ**, surnamed al-Shadīqīyā, 'the arboriculturist', author of a book on agriculture, was a native of Seville (Ishbillya). Neither the date of his birth or that of his death are known, and one can only say that as he is quoted by Ibn al-'Awwām [q.v.], who lived in the second half of the 6th/12th century, he must have belonged to an earlier period. He was probably the contemporary of the botanist-physician and 'gardeners' of the 5th/11th century, such as Ibn Wafīd al-Lakhmī, Ibn Bāḡdāl, the *Ḥadīdī* al-Ishbīlī and al-Tighnārī. His *K. al-Filāḥa* is preserved in MSS in the Bibliothèque Nationale in Paris, in the Zaytūna mosque in Tunis and some private libraries in North Africa.

The following are the main contents of Abū 'L-Khayr's book. (i) General considerations on planting (*shadāra*): favourable months; influence of the moon; the time needed for plants to grow and to yield fruit; age of trees; damage (weather, animals, fire, water); special treatment of olive-trees, vines, fig-trees, palm-trees. (ii) Plantations proper: trees, bushes, grain, seeds; layering, pruning, grafting; fruit and vegetable concerns; growing of vegetables; aromatic plants, flowers; flax and cotton; bananas and sugar-cane. (iii) Animals: of the back-yard, especially pigeons; bees and wild animals; harmful animals (reptiles, rodents and insects). (iv) Finally two pages on the *taḡdīb al-ām*, i.e. meteorological or astrological prognostications.

Abū 'L-Khayr appeals to his personal experience and observations in the gardens, parks, fields, vineyards and forests of the Aljizaf (al-Jizaf, district of Seville). His literary documentation consists in quoting, no doubt at second hand, the *K. al-Nabāt* of Abū Ḥanifa al-Dīnawarī (which had been expounded in 60 vols. by Ibn Ukt al-Ghanīm—cf. Makkarī, *Analekī*, II, 270), Ariatole, Anatolius, 'Kastūs' (Cassianus Bassus Scolasticus), Philo—through adaptations of the *Geoponica* and through the *Filāḥa al-Nabāḥiyya* of Ibn Wabḡḥiyya [q.v.]. (For this agricultural literature see FİLĀḤA.) On the whole, the book is an empirical work of technical science, but, like the agricultural literature in general, is not without its popular and superstitious

side, and formulas for amulets and descriptions of talismans are given.

**Bibliography:** The *K. al-Fidk* published in Fez 1357-8 is falsely attributed to Abu 'L-Khayr. An edition with annotated French translation is in preparation by the author of this article. Some paragraphs were published by A. Cherbonneau and H. Pérès, *K. al-Fidk ou Livre de la Culture*, in *Bibl. Arabo-Française*, v, Algiers 1946. See also 'A. Abu 'L-Nasr, in *MMJA*, 1953, 557; J.-J. Clément-Mullet, intr. to *Livre de l'Agriculture d'Ibn al-Fuwat*, Paris 1864, I, 78; C. E. Duhler, in *And.*, 1941, 137; E. García Gómez, in *And.*, 1945, 132-4, 137-9; E. Lévi-Provençal, *Hist. Esp. musul.*, III, 241; J. M. Millás Vallicrosa, in *And.*, 1943, 267; 1948, 331-2; idem, in *Tamuda*, Tetuan 1953, 48; H. (H. PÉRÈS)

**ABU KHIRĀSH** KHUWAYYID B. MURRA AL-HUMAYD, *mushāfir* Arab poet, who was converted to Islam and died under the caliphate of 'Umar, from the bite of a snake while he was drawing water for Yamanite pilgrims (who were then required by the caliph to draw water). Abu Khirāsh is counted among the pre-Islamic warriors who could run faster than horses, sharing this distinction with his nine brothers Abū Dīundab, 'Urwā, al-Aḥabāh, al-Aswad, Abū 'L-Aswad, 'Amr, Zuhayr, Dīandad and Sufyān, who were also poets of rank.

**Bibliography:** The *Diwan* of Abū Khirāsh was published by J. Hell, *Neue Haddadīn-Diwan*, II, Leipzig 1933. Biographical notes and verses in *Idābit*, *Hayasda*, IV, 267, 517; Ibn Kutayba, *Sh'v*, 427-8; Abū Tammām, *Hamāda* (Preval), 365, 370; *Aghāḍ*, xxi, 24-70; Ibn Ḥajar, *Isāb*, no. 2345; Baghdādī, *Khāḍa*, Cairo 1347, I, 400, 'Askāf, *Diwan al-Ma'āḍ*, I, 131, II, 72; Nallino, *Scritti*, vi = *Literatura*, 46 (French transl. 77). (Ch. PELLAT)

**ABU KUBAYṢ**, a sacred hill on the eastern edge of Mecca. Rising abruptly from the valley floor, it overlooks the Great Mosque a few hundred meters away. The Ka'ba corner containing the Black Stone points towards the hill, at the foot of which is al-Sa'īd, the southern end of al-Madīna. Buildings now hem the hill in on nearly every side. Muslim tradition holds that this was the first mountain created by God, Adam and other ancients are sometimes said to be buried there. The hill's older name was al-ʿAmīn, given because the Black Stone was kept safe there during Noah's Flood. Various stories explain the origin of the name Abū KubayṢ (Yāqūt, 437; al-Azraqī, 477-8, inclines towards the version identifying Abū KubayṢ as a man of Iyād, the first to build on the hill. Dījal Abū KubayṢ and al-Aḥmar on the western side of the valley were together called al-Aḥḥabān (the Two Rough Ones); a *hadīth* says that Mecca will last as long as these two. According to popular tradition, the Prophet was standing on Abū KubayṢ when the moon was rent in twain (Kar, IV, 1). The hill was destroyed in 640/3-4 by shots from a *manḡniya* fixed on Abū KubayṢ, and in medieval times a castle crowned the hill; no fortifications now remain there. The first *ziyāra* of the Sa'ūdī order was built on Abū KubayṢ c. 1252-3/1837,

and in Snouck Hurgronje's time a large Naqshbandī establishment also stood on the slopes (*Makha*, II, 285).

**For bibliography, see MARKA.** (G. RENTZ)  
**ABU KURRA** TEOUROPE, Melkite Bishop of Hama, said to be the first Christian writer of importance to produce works in the Arabic language. He was born at Edessa c. 740 and must have died c. 820. He refers to himself in his writings as a disciple of John of Damascus (d. 749), but though he studied as a youth in the monastery of St. Saba in Palestine, he can hardly have been a student under the Damascene. Like that of John, however, his name is associated with the early stages of Christian apologetics against Islam, and with that Christian learning which played so large a part in moulding the development of Islamic theology. He wrote in his native Syriac, in Greek and in Arabic. His writings are for the most part polemical in nature, which may be explained by the fact that in his days the city of Hama was a centre of vigorous intellectual life in which pagans and Manichees, Jews, Muslims and Christians of orthodox and of non-orthodox persuasion all shared. In his extant treatises he defends his orthodox faith against the teachings of all these opposing traditions. His Greek treatises have been edited in Migne, *Patr. Gr.*, xvi, and the Arabic by Constantin Bacha, *Oeuvres arabes de Théodore Aboucurra, évêque de Hama*, Beyrouth, n.d., though there is some doubt as to the authenticity of certain treatises included in each of these collections (see Peeters, in *Acta Iordaniana*, 1939, 94, and H. Beck, in *Orientalia christiana analecta*, 1937, 40-3).

**Bibliography:** Michael Syrós, *Chronique*, III, 29-31; C. Bacha, in *Mach*, 1903, 633-6; G. Graf, *Gesch. d. christl. arab. Lit.*, II, 7-25; id., *Die arabischen Schriften des Theodor Abu Qurra*, Paderborn 1910. His part in the Muslim controversy is discussed in A. Palmieri, *Die Polemik des Islam*, 181; G. Güterbock, *Der Islam im Licht der byzantinischen Polemik*, 1912, 13 ff.; I. Kratschovsky, in *Kristianskiy Vostok*, 1916, 301-9; A. Guillaume, in the Centenary Suppl. to *JRAS*, 1924, 233-44; C. H. Becker, *Islamstudien*, I, 434 ff.; W. Eichner, in *Isl.*, 1930, 136 ff. (A. JEFFREY)

**ABU LAHAB**, son of 'Abd al-Muṭṭalib and Lubā bint Ḥaḍir (of Khuz'a), and half-brother of Muḥammad's father. His name was 'Abd al-'Uzza and his kunya Abū 'Uṭba; Abū Lahab (literally 'father of the flames') was a nickname given by his father on account of his beauty. At one time, doubtless before Muḥammad's preaching had roused opposition, he was friendly with his nephew, for his sons 'Uṭba and 'Uṣayba were married (or perhaps only betrothed) to Muḥammad's daughters Rukayya and Umm Kulthūm respectively. During the boycott of Ḥaḥim and al-Muṭṭalib by other clans Abū Lahab distanced himself from Ḥaḥim, probably because through his wife, a daughter of Harb b. Umayya, he was connected with 'Abd Shams. On the death of Abū Tālib, shortly after the end of the boycott, Abū Lahab became head of the clan and at first promised to protect Muḥammad, presumably for the sake of the honour of his clan. He withdrew his protection, however, when Abū Tālib and 'Uṭba b. Abū Muṣṣab managed to convince him that Muḥammad had spoken disrespectfully of deceased ancestors like 'Abd al-Muṭṭalib and said they were destined for Hell. This loss of protection probably led to Muḥammad's attempt to settle in al-Ta'if; when it proved vain, Muḥammad,

before entering Mecca again, had to obtain the *ḡiyār* of the head of another clan. This hostile conduct was doubtless the occasion of *Sūra cxi* which, with a play on the name, consigns Abū Lahab and his wife to the flames of Hell. He died shortly after the battle of Badr to which he is said to have sent in his place a man who owed him money. There is a long story about his reaction to the news of this defeat. His sons 'Uṭba and Mu'attib became Muslims in 63/60, and 'Uṭba's grandson, al-Faḍl b. al-'Abbās, was known as a poet (*Aghāḍ*, xv, 2-11).

**Bibliography:** Ibn Hishām, 69, 231-3, 244, 440-461; Ibn Sa'd, *lit.*, II, 707, 47-51; Waki'dī, ed. Wellhausen, 42, 251; Tabarī, index; Caetani, *Annali*, I, 308-9, 496; A. Fischer, in *Ber. d. d. Verh. d. Sächs. Ak. Wiss.*, Bd. 89, Heft 2. (W. MONTGOMERY WATT)

**ABU 'L-LAYTH** AL-SAMARKANDI, NASR B. MUḤ. B. AHMAD B. ISRĀ'ĪM, known as *Imām al-Buḍā*, a Hanafī theologian and jurist, one of the 4th/10th century. The date of his death is variously given as between 379/983-4 and 393/1002-3. He must not be confused with his slightly older contemporary al-Ḥafīf al-Samarkandī, whose name was also Abu 'L-Layth Nasr. The oldest known biographical source, 'Abd al-Kādir (d. 775/1373), attributes to this latter person some of the main works that generally go under the name of the *Imām al-Buḍā*, but this seems to be a mistake.

Abu 'L-Layth was a very successful author in several fields of the Islamic sciences, and his books have become popular from Morocco to Indonesia. His main works are: (1) a *Tafsīr*, printed Cairo 1310/1892-3; this was translated into old Ottoman Turkish by Ibn 'Arabshāh (d. 854/1450-1), and Ibn 'Arabshāh's work was expanded by Abu 'l-Faḍl Muḥ. al-Faḍlī, a contemporary, under the title *Anfas al-Dīwānī*; manuscripts of these Turkish editions are among the oldest dated Ottoman Turkish manuscripts; (2) *Khiṣṣat al-Fiḥ*, a handbook of Hanafī law; (3) *Muḥṭaṣṣat al-Rimṣa*, on the divergent doctrines of the ancient Hanafī authorities, in three editions; (4) *al-Muḥṭaṣṣat fi 'l-Salāt*, on the nature of ritual prayer, with many commentaries; (5) *Tamshīl al-Ḥaḥḥim* and (6) *Buḥṭān al-'Arṣīn*, both on ethics and piety, often printed; (7) an *'Aḥḍa*, in the form of question and answer (ed. A. W. T. Juybolli, *ETLV* 1881, 215 ff., 267 ff.), with a commentary by Muḥammad b. 'Umar al-Nawāwī (d. after 1305/1888), under the title *Kaṣr al-Ḥaḥṭh* (Brockelmann, S. II, 814; C. H. Becker, *Isl.* 1911, 23), often printed; (8) *al-Maḥal* and *Jawānib* interlinear translations. This *'Aḥḍa* is authentic (against Juybolli, l.c., and F. Kern, *ZA* 1912, 170) and represents a popular, Hanafī current of theological thought (Schaerh, in *Studia Islamica*, II).

**Bibliography:** 'Abd al-Kādir al-Kurashī, *al-Dīwān al-Muḥṭaṣṣat*, Hyderabad 1332, II, 198, 264-1; G. Flügel, *Die Krone der Lebenslehre*, Leipzig 1862, 55 f., 122 f.; Muḥammad 'Abd al-Hayy al-Laknawī, *al-Fawā'id al-Bahīyya*, Cairo 1324, 220; Brockelmann I, 210 f.; S. I, 347 f. (nos. 6 and 7 refer to the same work). (J. SCHACHT)

**ABU 'L-MA'ĀLĪ** MUḤAMMAD B. 'UNAYD ALLĀN, Persian writer. His sixth ancestor was Husayn al-Aḥḡar, traditionist and son of the *Imām* Zayn al-'Abīdīn. His family lived for a long time in Balḥ. He was a contemporary of Nāṣirī Khuzraw, whom he may have known and about whom he gives us the earliest information available.

From two passages of his only work *Ch. Schefer* assumed that he was at the court of the ḡhanawid sultan Ma'ūd III when he composed his *Bayān al-Aḡyān*, dated 485/1092, the earliest known work on religions in the Persian language. The first two chapters are devoted to religions before Islam and to some heresies; the third and fourth to the exposition of the Sunnite and Shī'ite doctrines and to the Islamic sects (especially Ismā'īlism); the fifth chapter, dealing with the extremists (which may, therefore, have been of importance) is lost. He mentions his main sources. His work has not the bulk of the *Tahzīb al-Aḡyān* of Shāfi'ī Murādā (second half of 12th century), but it commands itself by its clear precision and by the sober vigour of its style. It is among the best of the rare prose works in Persian from the ḡhanawid period. Editions by Ch. Schefer (*Chrestomathie persane*, I, 131-7) and Abbas Iqbal, Teheran 1313/1934 (detailed genealogy of Abu 'L-Ma'ālī in the introduction); transl. H. Massé, *RHR*, 1926, 17-75. (H. MASSÉ)

**ABU 'L-MA'ĀLĪ 'ABD AL-MALIK** [see AL-DUWAYKIL]

**ABU MADYAN**, SHU'AYB B. AL-HUSAYN AL-ANDALUSI, famous Andalusian mystic, born about 520/1126 at Cantillana, a little town about 20 miles NNE of Seville. Spring from a very modest family, he learnt the trade of weaver, but, impelled by an irresistible taste for knowledge, he learnt the Kufic and, as soon as he was able, went to N. Africa to complete his education. At Fez he was the disciple of renowned masters, who owed, however, their fame less to their theological learning than to their piety and their ascetic lives—men such as Abū Ya'azzā al-Hammī, 'Alī b. Hīrīm, and al-Dakkāk. This last invested him with the *shāhīda*, the robe which bore witness to his vocation of 560; but his real initiator into the theories of mysticism seems to have been Abū Ya'azzā. With the permission of this master, he left for the Orient. There he succeeded in absorbing the tradition of al-ḡhazālī and of the great mystics. At Mecca he may have encountered the famous 'Abd al-Kādir al-ḡlīlī (d. 561/1166). He returned to the Maghrib, and settled at Bulḡiya (Bougie), where he became known for his teaching and his exemplary life. His fame reached the ears of the Mu'minid ruler Abū Yūsuf Ya'qūb al-Manṣūr, who summoned him to the court at Marrākūsh, no doubt apprehensive about such religious prestige outside the Almohad seat. When within sight of Tlemcen (Tlemcen) Abū Madyan was taken ill and died (594/1197). Following his expressed wish he was buried at al-'Ubbād, a village on the outskirts of Tlemcen, which was apparently already frequented by ascetics, but which, as his burial-place, was to become especially venerable.

The place which he occupies amongst the most important figures in western Islam is not due strictly speaking to his writings; at least, his only surviving writings are "a few mystical poems, a *wasīyya* (testament), and an *'ahida* (creed)" (A. Bell). It is because of the memory of him handed down by his disciples, and the maxims attributed to him, that he has been considered worthy to be regarded as a *shāh* (pole), a *ḡhawṣ* (supreme succour), and a *walī* (friend of God). The maxims proclaim the excellence of the ascetic life, of renunciation of this world's goods, of humility, and of absolute confidence in God. He used to say: "Action accompanied by pride profits no man; idleness accompanied by humility harms no man. He who renounces

calculation and choice lives a better life". He often repeated this line: "Say: Allah and abandon all that is material or has to do with the material, if thou desirest to attain the true goal". Actually there is nothing original in his conception of *silṣim*, but the success of his doctrine and its long-continued influence can be explained by its conciliation of various tendencies and by the type of society which received it. "His great merit and his great success lie in his having realised, in a way that his hearers could understand, a happy synthesis of the influences which he had undergone. With him the moderate *ṭāṣiṣ* that Ghazālī had already, a century earlier, incorporated in Muslim orthodoxy, principally for the use of a privileged élite, is now adapted to the mentality of the North African believer, whether man of the people or literate... Abū Madyan... gave once and for all the keynote for North African mysticism" (R. Brunschwig).

The books of *hagiography* attribute miracles to him, and Tlemcen, where he died, adopted him as patron. His tomb, which became the centre of a fine architectural complex (mosque of al-'Ubbād 732/1339, *maḥṣara* 747/1347, little palace, *ḥammām*) mainly built by the Marīnid sultan of Fez Abū 'l-Ḥasan, ruler of Tlemcen, is still a place of pilgrimage for the country people of the province of Oran and eastern Morocco.

**ABŪ 'L-MAHĀSIN** DĪMĀL AL-DIN YUSUF B. TAḤḤIRBIRDĪ, Arabic historian, born at Cairo, probably in 812/1409-10 (exact date doubtful). His father was a manikūl from Asia Minor (Rūm) bought and promoted by Sultan al-Zāhir Barḳūk; under Sultan al-Nāṣir Farajī he became commander in chief of the Egyptian armies (*amir al-jish*, *amir al-jaysh*) in 850/1407, and in 853 viceroys (*waḥīd al-saltana*) of Damascus, where he died early in 853/1412. The boy Yūsuf was brought up by his sister, wife of the chief kādī Muḥammad b. al-'Adīm al-Hanafī and then of the chief kādī 'Abd al-Rahmān al-Buklīnī al-Ḥāḥirī (d. 814). He studied under many noted scholars the usual learned disciplines, and also music, Turkish and Persian. At the same time he had entrance to the Manikūl court, became proficient in military exercises, and was granted a fief (*ikṭā'*). He made the pilgrimage to Mecca in 846/1423, in 849/1445 (as a *biḥāḥ* in the *ḥajj* escort), and again in 863/1459. In 856/1432 he took an active part in the Syrian campaign of Sultan Barḳūk, with whom he was on intimate terms (as he was with other sultans), and turned to the writing of history after he had heard al-'Aynī's works read to that sultan.

His first important work was *al-Mankal al-Sāfi* wa *'l-Mustawṣi* *ba'd al-Waḥī*, biographies of the sultans and important amirs and scholars from 650/1248 to 853/1451, but with some additions as

late as 862/1458; an annotated résumé was published by G. Wiet in *MIE*, 1932, 1-486.

Next came *al-Nuḡm al-Zāhira fī Mulūk Miṣr wa 'l-Kāhira*, a history of Egypt from 206/641 to his own time, and continuing also the biographical series of the *Mankal*. It was written, he says, for himself and his friends, especially Sultan Dīḡmak's son Muḥammad, and at first went only to the end of Dīḡmak's reign, Muharram 857/Jan. 1455. Later he continued it to 873/1467 (see below). Editions: *Abū 'l-Mahasin ibn Taḥḥir Birdi Annales*, from 206/641 to 365/976, ed. Juvénal and Mathieu, *Le volk*, Leiden 1855-61; *Abū 'l-Mahasin ibn Taḥḥir Birdi's Annales*, from 366/977 to 566/1171 and from 766/1365 to 774/1477, ed. W. Popper (Univ. of California Publ. in Semitic Philology, II, III part I, v, vi, xii) Berkeley 1909-29; *al-Nuḡm al-Zāhira*, from 206/641 to 799/1397, Cairo 1348/1929 ff. (Dār al-Kutub al-Miṣriyya, al-Kim al-Adabī).

The death of al-Makrīzī in 843 and of al-'Aynī in 855 left Abū 'l-Mahāsīn as Egypt's principal historian, and he wrote *Ḥawāḍith al-Duḥūr fī Maḍa 'l-Ayyām wa 'l-Ṣūḥūr*, chronicles from 845/1441 to 12 Muharram 874/July 16, 1469, to continue al-Makrīzī's *al-Sulūk li-Ma'rifaṭ Duḥal al-Mulūk*. Simultaneously he continued his own *Nuḡm*, but omitted from it much of the *Ḥawāḍith*'s fuller material regarding persons and economic and political conditions. Edition: *Extrait from Abū 'l-Mahasin ibn Taḥḥir Birdi's Chronicle Hawadith al-Duḥūr*, ed. Popper (Univ. Cal. Pub. in Semitic Phil., VIII), 1930-42 (contains all passages not represented in *Nuḡm*, vol. vii).

Two other extensive historical works, not mentioned by him or his biographers, are ascribed to him: *Nuḥdat al-Ri'ā'ya* for 698-742/1279-64, and *Bahr al-Zāḥir fī 'Im al-Anwāl wa 'l-Āḥir*, for 32-71/652-90.

He wrote also several condemnations or extracts from his main works: *al-Dall al-Shāfi 'ala 'l-Mankal al-Sāfi*; *Kutāb al-Wuzarā'*; *al-Biḥāra fī Takmilat al-Iḡbara* (supplement to al-Iḡharī's *Iḡbara*); *al-Kawāḍith al-Zāhira*; *Maḥṣara 'al-taḥṣīl fī Ḥikm al-Walāyā'*; *Khiṭāb*, and *Maḥṣara 'al-taḥṣīl fī Ḥikm al-Walāyā'*; *Salṭana wa'l-Khiṭāb*, ed. with Latin translation by J. E. Carlyle, Cambridge 1798.

His works other than on history were: *Taḥḥir Aḥlāḥ al-'Arab fī 'l-Asma'* *al-Turkiyya*; *al-Amṭhāl al-Sā'ira*; *Ḥilyat al-Sifāt fī 'l-Asma'* wa *'l-Simā'āt* (anthology of poetry, history and literature); *al-Sulūk al-Kāhira wa'l-Jaysh*, 1279 ff. (part of mystic content); and a short treatise on vocal music. He left the manuscripts of his works to the tomb-mosque which he had built for himself. He died on 5 Dhū'l-Hijja, 874/5 June 1470.

**ABŪ 'L-MAHĀSIN** YUSUF B. MUḤAMMAD B. YUSUF AL-FĀSĪ, Moroccan scholar, and 800 *ḡayyāḥ* of repute, born in 938/1530-31, the ancestor of the Fāsiyyūn (vernacular Fāsiyyūn) family, which, since the 16th century, has provided the town of Fās with a long succession of scholars and jurists.

Abū 'l-Mahāsīn al-Fāṣī himself belonged to the Fihrite tribe of the Banu 'l-Djadd, which, about 880/1475, had emigrated from Malaga, in Spain, to Morocco. He was born at al-Kabr al-Kabr (or, in the Spanish form, Alcazquivir), where his grandfather Yūsuf had settled after a stay of seven years at Fās (this is how he came to acquire the appellation al-Fāṣī, which remained that of all his descendants). But it was to the capital of North Morocco that Abū 'l-Mahāsīn al-Fāṣī went to study, and there he finally settled, from 988/1580 onwards. He soon acquired there an exceptional reputation for learning and piety, and founded a *ṣūfiyya* which has been much frequented ever since. In 1066/1578, he took part in the famous battle of Wādī 'l-Maghāzī against the Portuguese (see *al-Niḥās*). He died on 18 Rabī' I 1073/August 1604. Among his most famous descendants should be mentioned his son Muḥammad al-'Arabī al-Fāṣī, author of a monograph on Abū 'l-Mahāsīn, the *Ma'rifa 'l-Mahāsīn* (lith. at Fez in 1324), his grandson 'Abd al-Kādir b. Aḥī (d. ca. 1625), and the son of the latter, 'Abd al-Rahmān (d. ca. 1645). A genealogical table of the Fāsiyyūn family will be found in *Hist. Chorfa*, 242.

**Bibliography:** E. Lévi-Provençal, *Hist. Chorfa*, 240-41, and the numerous references mentioned there, 240, n. 4, among which may be cited here only Iḥrāḥ, *Salwat man Inṣāḡar*, Fez, n. d., 27; Kādirī, *Nagh al-Mathnawī*, Fez 1310, I, 89; Muḥibbī, *Khiṭāb al-Athar*, Cairo 1384, IV, 507; Kattānī, *Salwat al-Anfās*, Fez 1316, II, 306 ff.; M. **ABŪ MAṢŪR** LĪYĀS AL-NAFŪSĪ, governor of Djabal Nafūsa and Tripolitania, on behalf of the Rustamid *imām* of Tāhart, Abū 'l-Yakrān Muḥammad b. Aḥlāb (d. 281/894-5). He came from Tindemira, a village in the Djabal Nafūsa, but the exact dates of his birth and death are unknown. His province comprised the whole of Tripolitania, except the town of Tripoli which belonged to the Aghlabids. He had immediately to engage in conflict with the Berber Iḥādī tribe of Zawāḡha, who occupied the coast between Tripoli and Djerba. The tribe, which sought to free itself from dependence on the Nafūsa and had adopted the dissident doctrines of Khālīd b. al-Samī, revolted against Abū Maṣūr, who had the leadership of the son of Khālīd, who had taken refuge with them. Abū Maṣūr, attacked by the Zawāḡha, defeated them with severe losses; their leader fortified himself on the island of Djerba, but his followers were bribed and delivered him up to Abū Maṣūr.

According to Ibn al-Rāḥīqī, quoted by al-Shamṣī, *maḥṣara*, when in 266/879-80 he invaded Abū 'l-'Abbās Ahmad b. Tulūn defeated the Aghlabid governor of Tripoli, Muḥammad b. Kurub, and besieged the city for forty three days, the inhabitants called Abū Maṣūr to their help. He arrived with twelve thousand men, attacked Ibn Tulūn outside the city and routed him.

**ABŪ MAṢŪR** (see AL-THĀ'ALĪB).

**ABŪ MA'SHAR** DĪMĀ' FAR B. MUḤAMMAD B. 'UMAR AL-BALKHĪ, astrologer, usually known

in western Europe as Albumasar, was born at Balkh in eastern Khurāsān, studied at Baghdad, and was a contemporary of the famous philosopher al-Kindī (first half of 3rd/9th century); after studying the Islamic traditions, he devoted himself particularly to the study of astronomy and astrology, and it is to the latter that he owes his celebrity. He benefited fully from the very flourishing state of astronomical studies in Baghdad, but had a decided preference for astrology. In any case, in his various astrological works it is possible to pick out the astronomical principles and laws that he derived from contemporary scholars. He died at Wasit, about a centenary, in 272/886.

In the works of Abū Ma'shar can be observed the influences exerted at that time on Arab learning by cultural currents from Persia (in the Pahlavi tongue), and, more indirectly, from India. But Abū Ma'shar not only benefited from the learning of his contemporaries; even in his own time he was reputed to be a plagiarist. The author of the *Fihrist*, on the authority of Ibn al-Makrīzī, tells us that Abū Ma'shar plagiarized various authors, particularly the works of Sind b. 'Alī, and these accusations are corroborated by modern criticism.

Among his numerous works may be cited:

(1) a collection of astronomical tables (*ḥiḡl*), unfortunately lost, in which the movements of the planets were calculated for the meridian of Gandīst (or Gandes in Pahlavi), and in agreement with the Indian theory of millenary cycles (*ḥashrāt*).

(2) *al-Madḡhal al-Kabrī* (The great introduction to Astrology), a treatise divided into eight books and still unpublished in Arabic, twice translated into Latin, first in 1130 by Johannes Hispalensis, then, in 1150, by Hieronymus Secundus or the German. This work was to have a great influence in Christian Europe; the Latin manuscripts of it are numerous, and Hermann's translation was printed at Augsburg quite early, in 1489, under the title *Introducitur in astronomiam Albumasaris Abolacis octo continens libros partiales*; it was also printed in Venice in 1495 and again in 1506. It is important to note that this exposition of astrology contains an exposition of the theory of tides, and it can be said that medieval Europe learned the laws of the ebb and flow of the sea from it. There are in this theory, side by side with true observations, some completely fantastic explanations. The moon is made to influence also the winds, rainfall, and the whole subterranean world.

(3) *Alḥikm Tahsilī* *Sinī* *al-Madḡhal*, translated by Johannes Hispalensis under the title *De magnis conjunctionibus et annorum revolutionibus ac eorum perfectionibus octo continens tractatus*, printed at Augsburg in 1489, and at Venice in 1515. The Arabic text is found in Escorial ms. 917 (Brockelmann, I, 221, is wrong in supposing that this is a ms. of the preceding work), and also in ms. 2284 of the Bibl. Nat. de Paris. Gallini believed that the translation of *De magnis conjunctionibus*... was from an Arabic original, *Dalālat al-Aḥḡbās al-'Uṣṭayya* ('Indicazioni date dalle persone superiori dagli astri'), and Suter denied any connection between the *De magnis conjunctionibus* and the *Kitāb al-Kirāmāt* which is also attributed to Albumasar; but, as J. Vernet points out in a recent article, there is a large measure of correspondence between the two works.

(4) *al-Nuḥat*, a sort of summary of the previous treatise, translated by Johannes Hispalensis under the title *Flores astrologiae*; the Arabic text is in Escorial ms. 918, x, and 938, 5, and also in folios 1-29 of ms. 2588 of the Bibl. Nat., Paris. The Latin

translation was printed at Augsburg in 1488, at Venice in 1488, 1489, and 1506.

(5) *al-Uluf fi Bayat al-'Abdān* was, judging by the quotations from it in later authors, a study on the temples built in the world in each millenary.

(6) *Mawā'id al-Riqā' al-Ni'ā'*, a treatise on the horoscopes of men and women, divided into twelve chapters, and preserved in ms. Berlin no. 3881.

Some other works are also attributed to Abū Ma'ishar, but their authenticity cannot be proved; in any case, they do not involve a different view of the scientific character of our author, which is almost exclusively astrological.

**Bibliography:** Brockelmann, I, 221, S. 1, 394; H. Suter, *Die Mathematiker und Astronomen der Araber*, 28, Nacht, 162; Ibn al-Kūfī, *Ta'riḥ al-ḥukamā'* (Lippert), 157; J. **ABU MA'ISHAR** Naḥḥ b. 'ABD AL-ḤAMMAM AL-SINDI AL-MADAKI, a slave from the Yaman, possibly of Indian parentage, who purchased his freedom and lived in Medina. He was considered a rather 'weak' ḥadīth scholar, but he is deservedly famous as the author of a Kitāb al-Maḥāḥiz. Numerous fragments of it have been preserved by al-Wāḥidī and Ibn Sa'd. Among his authorities he mentions Nāḥ, the master of Ibn 'Umar, Muhammad b. Ka'b al-Kurāzī, and other scholars of Medina. In the year 160/776-7, he left Medina and remained in Baghdad until his death in Ramadān (?) 170/787. There he enjoyed the favor of several members of the court of the 'Abbasid caliph al-Taḥarī. Abū Ma'ishar has taken from him information on Ḥilālī history and on Muhammad's life and especially chronological statements, the latter going down to the very year of his death.

Horowitz, in IC, 1928, 195-8.

(J. HOROWITZ-F. ROSENTHAL)

**ABU MIBHAR** (see SIKKĀ).  
**ABU MUḤJIB** (see ALLĀH or MĀLIK or 'AMR) b. HAZM, Arab poet of the Thaqif tribe, counted as one of the *muḥabbirūn*. After taking part in the defence of al-Ḥaḥī against Muḥammad, when he wounded with an arrow a son of Abū Bakr (in 630), he was converted in 635/2 and fought at al-Kalbiyya. The story goes that, in order to take part in this battle, he escaped first from his escort (for 'Umar had banished him to Ḥaḥawa, see Goldziher, *Abhandl.* II, then managed to obtain provisional liberty, thanks to the wife of Sa'd b. Abū Waḥshī; Sa'd had imprisoned him for drunkenness, but the poet's conduct in the battle—which has been somewhat embroidered by the historians—

won for him the general's pardon. It is possible that Abū Muḥjib also took part in the battle of Vologesus (Ullayy). In 637 he was again exiled by 'Umar to Nāsī, and died shortly afterwards; it is said that his tomb was to be seen on the frontier of Ḥaḥabbaylān or of Ḥijāz.

The fragments of his poetry that have been preserved show no originality, but his reputation as a poet is upheld mainly by his baruchanālī songs (the famous line: 'When I die, bury me at the foot of a vine...' is attributed to him); and a group of poems in which he openly challenges the Kur'ān's prohibition of wine must be taken seriously. It was this attitude that led to his being banished several times by 'Umar.

This poet should not be confused with his namesake Abū Muḥjib Nuḥayb b. Rabāh, on whom see NUSAYB.  
**Bibliography:** The *divān* of Abū Muḥjib has been edited by C. Landberg, *Primæri arabici*, I, Leiden 1886 (another ed., Cairo n.d., with a commentary by al-'Askari) and by Abel, Leiden 1887 (with a biography and a Latin translation). Accounts of him are to be found in *Diwan al-Tahāḥī* (Cairo, 105-6; Ibn Kutayba, *Sāḥ*, 231-2; *Ma'āḥim*, *Murūj*, IV, 213-19; *Aḥḥāḥ*, XI, 337-43; XXI, 270-24; Ibn Maḥjar, *Jahā*, IV, no. 1027; Baghdādī, *Riḥāla* (Hilālī), III, 550-6; Caṭṭānī, *Anwāl*, v, 224-264; Brockelmann, I, 40, S. I, 70; O. Rescher, *Abriq*, I, 105-7; Nallin, *Scritti*, VII, 46. N. KROGODKARIS-CH. PELLAT

**ABU MUḤJIB** LĒT b. YUSUF b. SA'ĪD b. MUḤJIB AL-ANZI, one of the earliest Arabic traditionists and historians, d. 137/774. He is credited in the *Fihrist* with 32 monographs on diverse episodes of Arab history, relating mainly to 'Irāq, much of the contents of which is preserved in the chronicles of al-Baladhūri and al-Taḥarī. The separate works which have come down to us under his name are later pseudographs. His great-grandfather Muḥjib was the leader of the 'Irāqī Aḥl on the side of 'Alī (for him see Ibn Sa'd, VI, 22 and Naḥr b. Muḥjib, *Waḥā' al-Sūfī* (Cairo 1365), index); on the whole, however, Abū Muḥjib presents an 'Irāqī or Kūfī, rather than purely Shī'ite, point of view in his historical narratives. As a traditionist he is regarded as weak and unreliable.

(R. A. R. GIBB)

**ABU MUHAMMAD** 'ABD ALLĀH b. MUHAMMAD b. BARAKA AL-'UMĀNĪ, commonly called Ibn BARAKA, Ḥāḥīte author from the township of Ḥaḥī in 'Umān. The precise dates of his life are not known, but an 'Umīnī Ḥāḥīte, Ibn Muḥjib, regards him as a disciple and partisan of the imām Sa'd b. 'Abd Allāh b. Maḥbūb, killed in 328/939-40. He himself played a considerable part in the political life of 'Umān and composed several historical and juridical works, of which only the following are extant: 1. *al-Diḥāḥ*, on the principles of law; 2. *al-Mawāḥid*, on the condition of 'Umān at the time of the imām al-Salt b. Mālik, and dealing also with certain points of principle and their juridical solutions; 3. *al-Sira*, somewhat similar to the preceding work; 4. *Madh al-'Ilm*, in praise of

knowledge and those who pursue it; 5. *al-Tahyāt*; 6. *al-Ta'arūf*; 7. *al-Sharḥ li-Diḥāḥ Ibn Dja'far*, doubtless a commentary on *al-Diḥāḥ*, a work by Abū Ḥāḥīb Muḥammad b. Dja'far al-Aḥkawlī of 'Umān, dealing with the application of legal principles.

**Bibliography:** Sālimī, *Taḥḥat al-'Aḥḥān fi Sira al-'Umān*, I, Cairo 1332, 151, 166, 167; idem, *al-Lam'a* (in a collection of six Ḥāḥīte works published in Algeria, 1326), 210-1; al-Siyar al-'Umāniyya, ms. **ABU MUHAMMAD SĀLĪH** b. VASĪḤAN b. GHAFIYYAH AL-DUKKĀL AL-MĀḤḤĪT, famous Moroccan saint of the 6th-7th century A.H., patron of the town of Aḥḥ (q.v.), the present-day Safi. Born about 550/1155, his principal master was the famous Abū Maḥdyan (q.v.) al-Ghawḥ, patron of Tilmisān (Tlemcen). He went on pilgrimage to Mecca and is believed to have stayed in Alexandria twenty years to follow the teaching of the 10th 'Abd al-Razāk al-Djardūlī, who was of Moroccan origin. After his return to Morocco he became the propagandist among his fellow-countrymen of the *ḥadīḥ* and *ḥalal al-ḥim* in the East, and retired to the *ribāḥ* of Aḥḥ, where he died on 25 Dhū l-Ḥiḥḍja 631/12 September 1234. A monograph on him, entitled *Muḥḥad al-Ḥadīḥ fi Taḥḥīḥ Riḥāḥ al-Muḥammad Sālik*, was written by his great-grandson Ahmad b. Ḥaḥḥīm b. Aḥmad b. Abū Muḥ. Sālik. **Bibliography:** Ibn Farḥūn, *Dihādī*, Cairo 1320, 132; Bāḥḥī, *Makḥḥad*, tr. G. S. Chorje*, 221 and n. 3. (E. LÉVI-PROVENÇAL)

**ABU MUSA** (see AL-ASH'ARĪ).  
**ABU MUSLIM**, leader of the revolutionary 'Abbasid movement in Khurāsān. He was of obscure antecedents, probably a slave of Persia, in the service of the Banū 'Uḥayb in Kūfa. Here he made contact with the ḥaḥī and in 119/737 he is found among the followers of the ḥaḥī al-Mughira b. Sa'd. In 124/747-8, the Khurāsānī *nawab* of the 'Abbasids, proceeding to Mecca, found him in prison. They liberated him and took him to the imām Ḥaḥḥīm b. Muḥammad. After instructing him, the imām sent him in 128/745-6 to Khurāsān with the mission of directing the movement of insurrection in that province.

On arrival in Khurāsān and after overcoming the initial hostility of the local chiefs of the movement (especially Sulaymān b. Kaḥḥīr), Abū Muslim managed with dexterity and energy to reap the fruits of the long 'Abbasid propaganda. On 1 Shawwāl 129/15 June 747 the black banners of the insurgents were publicly raised. Profiting by the internal disorders of the Umayyad army, Abū Muslim gained support among the Yamanites, and succeeded in taking Marw in Rabī' II or Djuḥḥā I 130/December 747 or January 748. From there his generals operated in all the surrounding regions; one of them, Kaḥḥāb b. Ḥaḥḥīb (q.v.), took up the pursuit of the Umayyad forces towards the west, while he was to end in the fall of the dynasty. After the proclamation of al-Saffāb as caliph, Abū Muslim remained as governor in Khurāsān, ensuring, on the one hand, internal security (sup-

pression of the Shī'ite revolt in Buhārā, 133/750-1), and extending, on the other hand, the Islamic conquest towards the east (expedition of Abū Ḥāḥīd, the same year). His relations, however, with the new dynasty, which in great part owed to him its success, became increasingly strained. It does not seem that there was, on his part, an actual design of revolt, nor do the assertions of some hagiographers, followed by modern scholars, that he was carrying on an extremist religious propaganda, seem to correspond to the truth. His great prestige and power, however, were enough in themselves to alarm the 'Abbasids. The accession of al-Mansūr in 136/753-4 marks the beginning of the crisis. After making use of Abū Muslim against his uncle 'Abd Allāh b. 'Alī (q.v.), he invited him to present himself at court. Abū Muslim, after long hesitation, suspecting, but not fully crediting, what was waiting for him, decided to do as he was bid, and was treacherously killed. His memory remained alive in the Eastern provinces, and, starting with the movement of al-Mukanna' (q.v.), gave rise, during many years, to political and religious agitation.

**ABU 'L-MUTHIR** AL-SALT b. KHUḤAL AL-BAHLAWĪ AL-'UMĀNĪ, Ḥāḥī historian and lawyer, native of Ḥaḥā in 'Umān. His exact dates are not known; but he is counted among the Ḥāḥī scholars of the second half of the 3rd/9th century. He left valuable literary materials, especially in the field of history, and also took an active part in the political life of his time, being a zealous partisan of the imām al-Salt b. Mālik, deposed in 273/886-7.

Among his works, the following are worthy of note: (1) *al-Aḥḥāḥ wa 'l-Saḥī*, devoted to events in 'Umān at the time of al-Salt b. Mālik, and to the circumstances of his deposition; (2) *al-Bayān wa 'l-Bayān*, on the principle of the institution of the Imamate in connection with the affair of al-Salt; (3) *al-Sira*, containing information about the important figures of the earliest period of Ḥāḥī. — MSS of these three books were in the possession of S. Smogorzewski. (4) *Taḥḥir al-ḥaḥī ma'at Aya*, commentary on five hundred verses dealing with football and permitted things.

Masqueray, *Chronique d'Abou Zaharia*, Algiers 1878, 139, note; al-Siyar al-'Umāniyya, MS Lwow University, fol. 37-106, 172-156, 372-479, 1339-1340, 268; 270v; A. de Motylinski, *Bibliographie du Maab*, *Bull. de Corr. Afr.*, 1885, 20, no. 7; S. Smogorzewski, *Matériaux pour servir à la bio-bibliographie ḥāḥīte* (unpublished). (T. LEWICKI)

**ABU NADDĀRA**, Ya'ḥḥū b. RAFA'IL SAḤQ' (also James Sanaa), prolific Jewish Egyptian journalist and playwright (1839-1921). He indirectly induced the 'Urabi Revolt by teaching, lecturing, writing and performing short satirical plays and first starting the publication of *Abū Naddāra Zarḥā* ("the man with green spectacles"),

an anonymous lithographic sheet, enlivened by cartoons in the Egyptian falakāh dialect. Because he had criticized the Khedive and his counsellors, he had to leave Egypt in 1887; but he continued to publish his newspaper in Paris intermittently, in Arabic and French, and smuggled it into Egypt under various names. Copies also reached North Africa, Syria and India. Besides Abū Naddāra himself, many characters drawn from Egyptian life appeared in his newspapers, notably the greedy *ḡayyāh al-kāra* (the Khedive Ismā'īl), officials, merchants, brokers, beggars, etc. They expressed their views in conversation form, letters, short plays, and minutes of meetings. He also contributed articles in various French newspapers. Besides his plays — of which he claims to have written over 30 (one preserved in Arabic) — he published a few stories and pamphlets, of little literary value. His political-journalistic activity in his exile had two phases. In the first, until 1882, he attacked the Khedives Ismā'īl and Tawfīq, and encouraged the National Party and its supporters. In the second phase, after the failure of the 'Urabi Revolt and the exile of its leaders, he inveighed against the British and their Egyptian supporters; called on France and Turkey to oust the British; proposed Prince Halim, son of Muhammad 'Alī, for the throne of Egypt; and campaigned, albeit perfunctorily, for the betterment of the lot of the falakāh. All in all, he was the creator of the satirical newspaper and the modern satirical play in Arabic.

**ABŪ 'U-ḤADĪM AL-FADL** (d. 1170).  
**ABŪ 'U-ḤADĪM AL-ISFAHĀNĪ** Arab poet of the 12th-13th century (d. after 1057/24). Although he composed several *kasidas*, he owes his celebrity to his verses in *radjās* in which he treats of beduin subjects (descriptions of camels, horses, oases, etc.), and eulogizes the Umayyads 'Abd al-Malik, Hishām, 'Abd al-Malik b. Ibrāhīm, and the governor al-Ḥajjājī. The critics, who include him in the *ḡayyāh al-kāra* (with his fellow-tribesman al-Aḡlabī and the two Tamīmītes of al-Baḡra, al-'Adūdī and his son Ruḥbān), rank him highest for description, and praise his facility for improvisation. His rivalry with al-'Adūdī (Mudar against Rabī'a) is famous, and the biographers describe a grotesque scene in which, at the *Mabāḥ*, Abū 'U-Ḥadīm mounted on a he-camel puts to flight his rival and his she-camel, and recites the well-known line: "I and every poet of the human race have demons to inspire us": his is female and mine male! Nevertheless it was Ruḥbān who gave the name *Umm al-radjā* to a long *arḍiyya* which Abū 'U-Ḥadīm recited to Hishām, whose wrath was aroused by an ill-chosen word; he was soon reconciled back into favour, however, and was rewarded from Hishām an endowment in the Sawād al-Kūfa.

**Bibliography:** Brockelmann, S I, 90; Rescher, *Abriis*, I, 223; Nallino, *Scritti*, VI, 98; A bio-

graphical account and some verses are to be found in Ibn Sallām, *Tabakāt* (Heli), 148, 149-50; Ibn Kutayba, *Sh'ar*, 381-6; *Aḡḡānī*, ix, 77-83; Baghdādī, *Khizāna*, I, 103, II, 340-53; *MMIA*, 1928, collects together the biographical data (385-94), and publishes the *Umm al-radjā* (472-9). *A l-masya* has been published by Maymānī, *al-Tarā'if al-adabiyya*, Cairo 1937, 55-71, and there are scattered verses in a number of works, particularly al-Ḥabībī, *Bayān* and *Hayawān*, in the indexes; Asma'ī, *Fuḥala*, *EDMG* 1911, 499, 503, 511, 515; Abū Tammīm, *Hamāsa* (Freitag), 45, 144, 574, 755; Marzubānī, *Muḡam*, 310; 'Askarī, *Diwan al-Ma'rif*, I, 153, 279. (Cf. PELLIAT)

**ABŪ NU'AYM AL-ISFAHĀNĪ**, AHMAD b. 'ABD ALLAH b. ISHĀK b. MUSA b. MIRHĀN al-SHĀRĪ, born in Isfahān in Radjāb 336/Jan.-Feb. 948 (Ibn Khallikān: or 334, Yāqūt, *Buldan*, I, 298, 330), d. Monday 21 Muharram (Ibn Khallikān: or Safer; Yāqūt: Monday 20 Muharram; Dhabībī, *Subḥi*: 20 Muharram) 410/23 Sept. 1018, an authority on *fiqh* and *tasawwuf*. His grandfather Muḥ. b. Yūsuf was a well known ascetic, the first of his kin to accept Islam (Ibn Khallikān). Abū Nu'aym mentions him as his forerunner in *Ḥilyat al-Awliyā'* (I, 4). His father who also was a scholar (Yāqūt, *Buldan*, iv, 344) had him taught by important teachers, such as Ṭūsif al-Khūṭī and al-Asamm, from his sixth year. From 360/97 he travelled and studied in Trak, Hicāz and Khurāsān, and for 14 years he was reckoned as one of the best *kāḍi*-authorities. This is stated by his contemporary al-Khāṭib al-Baghdādī who quotes him (*Ta'rikh Baghdād*, xii, 407, 412) and by al-Dhahabī and al-Subkī, but neither al-Khāṭib nor Yāqūt include him in their biographies of learned men. The number of those who transmitted *ḥadīth* from him is said to be about eighty. Al-Sulamī, his older contemporary, quotes one *ḥadīth* in his authority with one intermediary (*Ṭabakāt al-Shūfiyya* sub Abu 'l-'Albās b. 'ATĀ). Al-Khāṭib, according to al-Subkī one of his nearest pupils, criticizes him for treating *igīdā'*s lightly, but is in this contradicted by al-Dhahabī, 278. The strife between Hanbalites and Shāfi'ites caused sharp criticism of him by his fellow-townsmen Abū Allāh b. Mandāh (cf. Brockelmann, S I, 285) and led to bodily attacks on him. He was even expelled from the mosque of Isfahān, which saved his life as, according to tradition, Subukhtīn, when he conquered the town, massacred the people assembled in the mosque at the Friday-service; this is reckoned one of his *kāḍi*-at. Al-Nabḥānī (cf. Brockelmann, S II, 765 f.) relates that the mosque fell down twice and crushed the crowd because A. N. had cursed it. Abū Nu'aym's work *Ḥilyat al-Awliyā'* was *Ṭabakāt al-Awliyā'* (Cairo 1351/1932-1357/1938) was finished in 422/1031 (see x, 408). It was written to strengthen what he regarded as the true *ḥadīth* (I, 4). After a general description of *ḥadīth* he mentions the different chronologies of the word, about all its derivations from *ḥil*, on which he had written a book *Lah al-Shif*, stressing its connotation of humility (I, 20, 23). The rest consists in accounts of and sayings by 649 pious people (*nuṣṣāḥ*) reckoned as *ḥadīth*, beginning with the four "righteous caliphs"—an evidence of the interpretation of *ḥadīth* and orthodoxy. Every section begins with *ḥadīth* (Abū Nu'aym, "said"). It differs from al-Sulamī's *Ṭabakāt*, which gives only sayings with few or no anecdotes. It is told that he brought the work personally to Nishāpūr

where he sold it for 400 dinārs. Extracts from it are used in Ibn al-Djāwī, *Saḥāḥ al-Saḥāḥ*.

His second large work, *Ḍikhr al-Aḡḡāh Isfahān* (ed. S. Dodering, Leiden 1931) contains biographies of people who had connections with Isfahān, mainly scholars, after a short history and topography of the town. On this topic he had several forerunners (cf. Dodering, II, p. vii). Besides these works he wrote several smaller books on the proofs of prophecy, the medicine of the prophet, the excellence of Muhammad's first followers, with extracts from al-Buḡḡārī and Muslim etc. He died in Isfahān and his tomb is said by Yāqūt (I, 298) to be in Murdāb. **Bibliography:** Brockelmann, S I, 616 f.; Yāqūt, *Diwan al-Ma'rif*, I, 153, 279; Ibn Khallikān, *Tadhkirat al-Awliyā'*, Haydarābād 1314, III, 275-79; Subkī, *Ṭabakāt al-Shāfi'yya*, Cairo 1324, 7-9; Shā'irānī, *al-Ṭabakāt al-Kubrā*, Cairo 1315, I, 50; Ibn al-'Imād, *Shahādāt*, II, 245; Nabḥānī, *Ḍijma' Karāmi* al-Awliyā', Cairo 1329, I, 293.

(J. PEDERSEN)

**ABŪ NU'AYM AL-FADL b. DUKAYN AL-MULĀ'Ī**, *ḥadīth* scholar and historical informant (b. 130/748, d. 29 Sha'bān 219/8 Sept. 834).

He was a client of the family of Muhammad's Companion Talha. He lived in al-Kūfa and made occasional visits to Baghdād, where he was once received by al-Ma'mūn. Dukayn's actual name is said to have been 'Amr. A son of Abū Nu'aym, 'Abd al-Rahmān (perhaps the father of the Kūfān commentary, referred to in *Fihrist*, 34), and a grandson, Ahmad b. Miḡdam, are mentioned.

Abū Nu'aym is considered a very reliable transmitter of traditions. He is also highly praised for the courageous way in which he stood up for the uncreedness of the Kūfān against Mu'tazilite inquirers. On the other hand, he was suspected of being a Shī'ite. He admitted his secret veneration for 'Alī, though he wanted it understood that he was moderate in his attitude. He moved in 'Alid circles, and appears quite often as a transmitter of information about Tālibids and 'Alids (cf., for instance, Ibn Sa'd, III, 160; iv, 23 ff., 30; v, 66 ff., 236-8; Abu 'l-Faraj al-Isfahānī, *Mabāḥīl al-Fābiyya*, Cairo 1368/1949, 46). He was acceptable to and respected by both Shī'ites and 'Abbasids. When he died, a descendant of Abū Tālib prayed for him first. Then, the 'Abbasid governor of al-Kūfa, a fifth cousin of the reigning caliph al-Mu'tasim, insisted upon repeating the ceremony.

Of Abū Nu'aym's work nothing has come to light so far, except the frequent references of the historians to him. He appears as a transmitter mainly of biographical data but also of some general historical information. He himself probably never published any historical work. *Fihrist*, 227, credits him with two works concerned with ritualistic and legal problems, a *Kitāb al-Manāḥiṣ* and a *Kitāb al-Masā'il fi 'l-Fikāh*.

**Bibliography:** Ibn Sa'd, vi, 279 f., and *Jaḥiz*; Baladhuri, *Anasib* (Gutten), v, index; Buḡḡārī, *Ta'rikh*, Haydarābād 1316, vi, 133; Ibn Kutayba, *Ma'ārif*, 122, 262; Tabarī, index; Ibn Hibbān, *Ṭibāḥ*, ms. Topkapı Sarayı, Ahmet III, 2995, fol. 292b; *Aḡḡānī*, xiv, 21; *Fihrist*, 227; al-Khāṭib al-Baghdādī, *Ta'rikh Baghdād*, Cairo 1340/1931, xii, 346-57; 'Abd al-Ghānī al-Djannā'ī, *Kamāl*, in MSOS 45, 1904, 186-93; Subkī, *Ḥuṭūṭ* (Wiesbaden), I, 24; id., *Nabḥānī*, ms. Topkapı Sarayı, Ahmet III, 2910, vii, fol. 174a-178a; Ibn Ḥajjar, *Tadhkirat*, Haydarābād 1325-7, viii, 270-6. (Fr. ROSENTHAL)

**ABŪ NUMAYY I and II**, *sharifs* of Mecca [see MAKKA].

**ABŪ NUWĀS** AL-HASAN b. HANĪ' AL-HAKAMĪ, the most famous Arabic poet of the 'Abbasid period. He was born in al-Aḥwāz between 130/747 and 145/762 and died in Baghdād between 198/813 and 205/815 (so also Hamza al-Isfahānī, MS Fatih 3773, fol. 6r). As his *diwān* contains a *mawḍi'a* on al-Aḥwāz (d. 198/813), earlier dates are improbable. His father belonged to the army of the last Umayyad, Marwān II, and was a *mawālī* of al-Djarrāh b. 'Abd Allāh al-Hakamī, who came from the South Arabian tribe of Sa'd b. 'Aḡḡar; hence the *nisba* of Abū Nuwās and his dislike of the Northern Arabs. His mother Gullabān (= Gulistan) was Persian.

While still very young, Abū Nuwās came to Basra, and later to Kūfa. His first master was the poet Wālība b. al-Hubbāb, who is said to have been in erotic relationship with him. After Wālība's death (cf. the *mawḍi'a*, *Diwān*, Cairo 1868, 32), he became the pupil of the poet and *ra'si* Khālāf al-Aḥmar. He acquired a knowledge of the Kūfān and *ḥadīth* also, and studied under the grammarians Abū 'Ubayda, Abū Zayd, etc. He is also said to have spent, according to the old custom, some time among the beduins in order to improve his linguistic knowledge.

His education finished, Abū Nuwās came to Baghdād, to gain the favour of the caliph with panegyrics. He found, however, little favour at the court, but was better received by the Barmakids. After the fall of the Barmakids he had to flee to Egypt, where he composed panegyrics on the head of the *diwān al-ḥarāḡī*, al-Khāṭib b. 'Abd al-Hamid. Soon, however, he was able to return to his beloved Baghdād, where he now spent, as a boon companion of al-Aḥlī, the most brilliant years of his life. Nevertheless, even al-Aḥlī once prohibited him from wine drinking and even imprisoned him on that account.

There are different reports about his death. According to one tradition he died in prison, to which he had been sent on account of a blasphemous verse, according to another in the house of a woman named *Ḥabīb*, according to a third, in the house of the learned Shī'ite family of the Al-Nawbakht. He was linked to this family, especially to Ismā'īl b. Abī Sahl al-Nawbakhtī, by close friendship, though this did not prevent him from composing some wounding lampoons on Ismā'īl (*Diwān*, 171 f.). The assertion, therefore, that he was murdered by the Nawbakhts is probably mere slander, especially as this family interested itself even later in the collection of Abū Nuwās' poems and Hamza al-Isfahānī made use of information derived from them (cf. MS Fatih 3773, fol. 3v).

The Arab literary critics themselves regarded Abū Nuwās as the representative of the modern school of poets, the *mudabbāt*. "What Imra' al-Kays was for the ancients, that is Abū Nuwās for the moderns" (Būḥārī, 3773, fol. 7r). At most, only Baḡḡārī b. Burd could possibly compete with him. Although in his panegyrics Abū Nuwās still uses in general the classical form (cf. e.g. *Diwān*, 77, the panegyric known as *munāḥa*, addressed to al-Fadl b. al-Rabī), to which Ibn Jinnī devoted an extensive commentary, otherwise the old forms, *ḥadīth*, *ḥuṭūṭ* (Wiesbaden), I, 24; id., *Nabḥānī*, ms. Topkapı Sarayı, Ahmet III, 2910, vii, fol. 174a-178a; Ibn Ḥajjar, *Tadhkirat*, Haydarābād 1325-7, viii, 270-6. (Fr. ROSENTHAL)

St. Petersburg 1899, after two detective manuscript; reprint Teheran 1313 H. Sh., new ed., Tehran 1334 H. Sh. (quoted as AT). Manuscripts also Shantari, Hudayr, Tan. 437; Istanbul, Şehidî 'Ali Paşa 1416. This work was the source used in the *Tadhkirat al-Awliya'* of 'Atiyyi and the *Nafahat al-Uns* of Djalal. The father of Abū Sa'īd was a druggist known as Babu Bu 'L-Khayr. He took the boy with him occasionally to the sacred performances of dances (*sama'*) which the *gōls* of the town gave by turns in their houses. Abū Sa'īd received his first instruction in mystical devotion from Abū 'L-Kāsim Bighr-i Yāsīn (d. 380/990), who had a poetic streak in him and is the author of the majority of the verses which Abū Sa'īd later quoted in his sermons. As a young man Abū Sa'īd studied Shāfi'ite law in Marw under Abū 'Abd Allāh al-Haṣṣī and Abū Bakr al-Kāfilī (d. 417; al-Subkī, *Tadhkirat*, iii, 198-200). Among his fellow-students was Abū Muḥammad al-Dīwaynī (d. 438; al-Subkī, iii, 208-19), the father of Imām al-Haramayn. Then he studied exegesis of the Qur'ān, dogmatics and Hadith in Sarāghs under Abū 'Alī Zāhir (d. 389; al-Subkī, ii, 223), who succeeded in rooting out Mu'tazilism from Sarāghs.

In Sarāghs the crazy saint Luḥmān al-Sarāghī introduced him to the ṣūfi Abū 'Fāḍl Muḥ. b. Ḥasan al-Sarāghī. It was he who induced Abū Sa'īd to abandon the study of learned subjects and to devote himself entirely to *yūfism* and became his *pir* whom he consulted in all difficulties: moreover after Abū 'L-Haṣṣā's death Abū Sa'īd was in the habit of visiting his grave in Sarāghs when dejection (*ḥaḥḥ*) overtook him. He had, at the injunction of 'L-Faḍl, the *ḥikma* bestowed upon him by the celebrated ṣūfi al-Sulamī. After the death of Abū 'L-Faḍl he went through Naṣā to Āmul and spent some time with Abū 'L-Abbās al-Kaṣābī, who likewise bestowed the *ḥikma* upon him. Upon his return to Maybāna—the exact chronology of this period is by no means easy to establish—he gave himself up with extreme zeal to severe ascetic and mystic exercises. He spent his time partly in total seclusion in a room in his father's house, but also stayed in neighbouring monasteries, in particular the so-called *ribāṭ-i ḥuṣān*. Here he was sometimes observed by his father in the midst of extraordinary practices of self-castigation. He went beyond the prescribed measures in his religious abstinence, washed the doors and walls of his cell, never reclined, ate nothing whatever during the day, at night only a morsel of bread, spoke to people only when it was unavoidable, and shut himself off during the performance of *ḥikma* by padding his ears so as to be undisturbed. At times he could not bear so much as the sight of his followers and would disappear for months in the mountains or the neighbouring desert.

This period of forming himself through asceticism with the object of subduing the sensual soul (*nafs*) and breaking asunder all bonds with the world, as well as of following up an ideal model of the Prophet in the minutest detail, is said to have lasted up to the fortieth year of his life. Already at this time the social motive of *yūfism*, the "service of the poor" (*ḥāḍimat-i darwīshān*) begins to assume importance for him. He begged for the poor, swept mosques, cleaned washing-places, and so on. This "service of the poor", conceived principally for self-abasement at first, came ever more to the fore in the course of his life. "The shortest way to God", he put it once, "lies in bestowing comfort upon the soul of

a Muslim" (*rūḥānī ḥāḍim-i muṣallamīn rasūdan*) (AT, 424). This mode of life is exhibited in its fully-developed form at the period of his one year's residence in the capital of Khurāsān, Nishāpūr, where he stayed in the monastery of Abū 'Alī Tarsūḍ in the quarter of 'Adanākūbān. There young men flocked to him; he preached before large audiences and displayed himself as a kind of spiritual guide (*sidā ma' al-Haḥḥ, nāḥ ma' al-ḥaḥḥ*). At this juncture the gift of thought-readiness (*firāda*), peculiar to him and esteemed a miracle (*mir'at*) by his followers, stood him in good stead: it revealed to him the most intimate impulses of the hearts even of his enemies, discerned his adversaries and converted many of them into followers instead. He liked to arrange lavish, even extravagant entertainments for his followers, culminating in sacred dance music (*sama'*). During these, dancing and crying out (*saḥḥa zādan*) were, as was customary, the order of the day. In the threes of ecstatic *gōras* were thrown off, torn up, and distributed around. To finance these luxurious occasions, at which as much as a thousand *ḍīnārs* is supposed to have been spent in a day, and which moved 'Awfī to remark that in later years Abū Sa'īd lived hardly as an ascetic but rather as a sultan (Barthold, *Turkestan*, 311), he did not hesitate to incur debts; these were the cause of frequent embassies to his household manager Ḥasan-i Mu'addib. Some wealthy devotee, however, was always found, who, often at the last moment, provided the requisite money. Sometimes he sent Ḥasan to followers, even to opponents, with whom he stayed, in order to raise money in an almost barefaced manner. The money was immediately spent, as it was regarded as a principle to possess no assured property (*ma'wān*) and to accumulate nothing. His way of living caused offence the Karrāmites Abū Bakr Muḥ. b. Ishāq b. Miḥ-naghāḥ made common cause with the Hanafites kādī Sa'īd b. Muḥammad al-Ustuwā'ī (d. 432; on both see 'Uṭbi-Masūnī, ii, 300 ff., Persian translation by Djalālīdī, Teheran 1272, 427 ff.; W. Barthold, *Turkestan*, 289-90, 311; on the latter see Abū 'L-Wazīr, *al-Dīwān al-Muḍā'ī*, no. 685, and al-Sam'ānī, *Amād*, under al-Ustuwā'ī) and laid information about Abū Sa'īd before sultan Maḥmūd b. Subuktigin, who ordered an enquiry, perhaps in conjunction with a universal heresy hunt carried out by the aforementioned Karrāmite governor Abū Bakr (Barthold, *Turkestan*, 290). However, Abū Sa'īd contrived to disarm both through his skill in thought-reading, with the result that they abandoned the prosecution. The indictments were, that the *ḥayyāḥ* recited on the pulpits verses in place of the Qur'ān and Hadith, that he gave too luxurious feasts and that he had made the young people dance. The great al-Kushayrī, who encountered Abū Sa'īd in Nishāpūr, took exception to the excessively liberal way of life of the *ḥayyāḥ* and to his dance music. The contrast between the characters of the two men is illustrated by an apt anecdote: al-Kushayrī had repudiated a derwish and banished him from the town. Abū Sa'īd showed him at a banquet how by very much gentler methods a derwish may be sent travelling (Nicholson, 35-6).

A strong kindness of nature and an affection for his fellow-men were conspicuous characteristics of Abū Sa'īd. He was no preacher of repentance; seldom, if ever, did he refer in his sermons to the verses of the Qur'ān threatening the torments of Hell. Numerous stories were related of how by means of his *firāda* he saw through the ultimate thoughts of sinners and opponents and thoroughly

abashed them. The guiding motif of his life is said to have been the *ḥadīth*: *Sū man ḥaḍaḥa ḥaḍaḥa man ḥarama wa'ḥḍa man ḥaḍaḥa* (AT, 311). The celebrated ṣūfi Ibn Bāḳiyya (d. 442/1050) reproached him for allowing young people to sit together with old and for treating them just as he did the old, for allowing them to dance and for giving back the cast-off *ḥikma* to its owner, whereas it should by long cast off and become common property. Abū Sa'īd contrived to give plausible reasons for these innovations (AT, 170-1), the Ḥāẓim brands him as an unbeliever, since he wore now wool, now silk, sometimes prayed a thousand *raḥ'as* a day, sometimes not at all (Fisal, iv, 188). At all events social work played a very much greater role in the second period of his life than individual mystic experience: and from this point of view he is comparable (in spite of substantial differences) with Abū Ishāq al-Kāẓirānī [a.s.]. However he once gave tongue to a pronouncement similar to al-Hallāj's *Ana 'L-Haḥḥ*. In the course of a sermon he was overcome by a state of inner excitement and called out *Laysa fi l-fuḥḥāḥ illā 'Alāh*. "There is none other than God in this robe". So saying he ran his forefinger through his gown. It was divided and the portion with the hole made by his finger preserved.

In Nishāpūr he also met the philosopher Ibn Sīnā and is supposed to have held lengthy conversations with him. A correspondence between the two is preserved. Abū Sa'īd asked the philosopher what was the way to God according to his experience, and received a reply (printed by H. B. S. Nicholson, 48, 1878, 52 ff.; Ibn Sīnā, *al-Naḍāḥ*, Cairo 1321, 12-3; Ibn Abī 'Usaybi'a, ii, 9-10; al-'Amīlī, *al-Kaḥḥāḥ*, Cairo 1318, 264-5). At the end of his stay in Nishāpūr he wished to accompany his son Abū Tāhir on the pilgrimage, but was restrained from this in Khurāsān by the celebrated ṣūfi Abū 'L-Ḥasan Khurāsānī. He then went to Bistām where he visited the grave of Abū Yazīd, and to Dāmghān, eventually reaching Ray before returning with his son. He spent the rest of his life in his home town of Maybāna.

Abū Sa'īd is supposedly the author of a great number of quatrains. (On editions cf. Nicholson, 48, note; also editions Bombay 1294 and Lahore 1934.) However it has been expressly stated that he composed only one verse and one quatrain (Nicholson, 41). The quatrains may not therefore be attributable to him. One of them, with which he is supposed to have cured his Qur'ān-teacher Abū Sūlīm of an illness (AT, 229) and which opens with the word *ḥawāḍ* was made the subject of a commentary by 'Abd Allāh b. Maḥmūd al-Shāhī under the title *Riḍā-i Ḥawāḍ* (AT, 322-5).

Abū Sa'īd left a numerous family, who tended his grave for more than a hundred years and were held in great respect in Maybāna. His eldest son Abū Tāhir Sa'īd (d. 450) continued the "service of the poor" and thereby involved himself in debts which were paid by Niḡām al-Mulk. He was an uncultured individual, however, who left school before he was ten years old and knew by heart only the 48th *sūra* of the Qur'ān, and did not have the personality to found an order after his father's death (as did the son of Djalāl al-Dīn Rūmī, Sūltān Walad), although Abū Sa'īd did leave behind a kind of statute for an order (Nicholson, 46). The tradition was however broken by political events. Abū Sa'īd lived to see the entry of the Salḡūks into Khurāsān. They occupied Maybāna, and Abū Sa'īd was on friendly relations with Tughlāk and Çağrı Beg, Sūltān Ma'ūd laid siege to the town and captured it

shortly before his decisive defeat at Dandānākh in the year 451/1040. During the devastation of Khurāsān by the Ghūrs in the year 548/1153 the place was absolutely laid waste, no fewer than 115 members of Abū Sa'īd's family being tortured and put to death. A follower of Abū Sa'īd, Dōst Bā Sa'īd Dādā, whom the *ḥayyāḥ* had sent to Ghazna not long before his death to have the Sultan discharge his accumulated debts, found Abū Sa'īd dead, went to Baghdad on his return, and founded a daughter monastery there. At the time of Ibn al-Munawwar his family held the position of *ḥayyāḥ al-ḥayyāḥ* in Baghdad, but nothing is known of the subsequent destiny of this offshoot (AT, 294-300).

**ABU SA'ID al-DJANNABI** [see al-DJANNABI].  
**ABU SA'ID b. MUHAMMAD b. MIRĀNSHĀH b. TIMÜR**, Timūrid sultan. In 853/1449, at the age of twenty-five, Abū Sa'īd, taking advantage of the desperate situation of Ulugh Beg, at whose court he lived, tried his fortune in Transoxiana. A siege of Samarkand (1449), then a rising at Kōhāḥ (May 1450) both ended in failure. Not long afterwards he seized Yazd (Turkistan), and held it against the troops of 'Abd Allāh b. Ibrahim Sultān b. Shāhrūgh. In Dīwānā I 853/June 1451 he drove the latter out of Samarkand with the help of the Orghuz khān Abū 'L-Khayr. In spring 856/1454 Abū Sa'īd crossed the Oxus and took Balkh. Abū 'L-Kāsim Bābūr, ruler of Khurāsān, invaded Transoxiana and laid siege to Samarkand (Oct.-Nov.), where resistance was organized by the famous Nakshbandī *ḥayyāḥ* 'Ubayd Allāh Ahrār, who is said to have restrained Abū Sa'īd from deserting his capital. Peace was made, Abū Sa'īd keeping the right bank of the Oxus. The relations of the two princes remained cordial until the death of Bābūr (Rabī' I 861/ March 1457).

Abū Sa'īd then tried to take Harāt, where Ibrahim b. 'Alā' al-Dawla b. Baysunghur had succeeded in having himself proclaimed. The siege (July-August 1457), marked by the execution of Gawhar Shād, who was accused of intelligence with Ibrahim, was raised without result. Defeated by the Kara Koyunlu Dīyābhānshāh, Ibrahim sought an alliance with Abū Sa'īd (beginning of 862/winter 1457-8), and a defensive treaty was concluded. At the end of June 1458 Dīyābhānshāh occupied Harāt. Abū Sa'īd, who had stationed his army on the Murgāb to watch the course of events, took advantage of Dīyābhānshāh's difficulties to get possession of the town peacefully (Nov. 1458), and thus became master of Khurāsān, which he had always coveted. In Dīwānā I 863/ March 1459 the three Timūrid princes 'Alā' al-Dawla, Ibrahim b. 'Alā' al-Dawla, and Sultān Saḡghar were defeated at Sarāghs.

The year 1459 was spent in mopping up Khurāsān. In 1460 Abū Sa'īd occupied Māzandarān; in his rear the amir Khālīl came from Slatīn and laid siege to Harāt (summer 1460); and when cald had been restored in Shībzā (autumn 1460), Abū Sa'īd had to deal with a revolt in Transoxiana (winter 1460). Sultān Husayn took advantage of this to recapture Māzandarān and besiege Harāt (Sept. 1461), but Māzandarān was retaken by Abū Sa'īd in the same year.

Abū Sa'īd's power extended theoretically over Transoxiana, Turkistan (to the confines of Kāshghār and of the Daḡh-i Kipčak), Kābulistan and Zābu-

Istān, Khurāsān and Māzandarān. In fact, he was powerless to prevent the Özbek raids to the south of the Sir Daryā. In 1414 the Timūrid Uways b. Muhammad b. Baykara had risen at Otrar with the support of Abu'l-Qāyir Özbek, and had inflicted a crushing defeat on Abū Sa'īd. In 863/1461 Muhammad Dīkūt b. 'Abd al-Latif b. Uluğ Beg, after devastating Transoxiana, took refuge at Shīhrūkhīya (Tashkent). Abū Sa'īd besieged this stronghold for ten months (Nov. 1462–Sept. 1463). Each year, the Özbeks made raids into Transoxiana. In 868/1464, Sulṭān Husayn, who had sought refuge in Khurāsān, ravaged with impunity Khurāsān from Abīward and Māghdāh as far as Tūn.

Abū Sa'īd was more fortunate in the north-east, and succeeded in averting the Mongol threat to his frontiers. During his reign in Samarkand he had repulsed two attacks by the Mongol Ḫān Esen Bugha. In 1456 he recognized Yūnus, the elder brother of Esen Bugha, and on several occasions gave him help in establishing himself in the western part of Moghūlīstān. In 868/1464 Yūnus once again sought refuge with Abū Sa'īd, who lent him troops.

**Bibliography:** Sources. The *Maṭla' al-Sa'dayn* of 'Abd al-Razzāk Samarkandī is the main source (ed. M. Shafī', Lahore 1941-9). Supplement with: *Kawāṭ al-Sa'īd*; *Ḥabīb al-Siyar*; *Ma'īz al-Ansāb*; *Bihar-nāma*, ed. and transl. Bircanlar, and *Idrārī*, *Kawāṭ al-Dīwānī* fi *Tārīkh al-Hārī* (cf. Bircanlar, *de Mubārak*, *JA*, 1862(11), 'Mongol' policy; *Tārīkh*; *Kāshghar*, ed. Elias, transl. E. D. Ross, Biographies: Sayf al-Dīn Ḥāḡī, *al-Hār al-Waṣṣā'* (ms.); *Ḫā'andāmīr*, *Dastūr al-Waṣṣā'*, ed. Tiberius 1317; and the Nakshbandī collections, *Kāshghar*, *Ḥashkāt 'ayn al-hayāt*, two ed., Tashkent and Leningrad; *Abīwardī*, *Kawāṭ al-Sāḫīn* (ms.), etc. Documents: see the collections of *ṣaḥā'ī* nūṣ, especially B. N. Paris, Suppl. Pers. 1815; A. N. Kurat, *Tophāḡ Sarayī Muzey arxivindeki... yashik ve bükler*, İstanbul 1940 (one letter); cf. also Ferīdūn Bey, *Munṣa'āt*.

**Studies.** In the absence of monographs on the period, works dealing with questions or periods bordering on it must be used. See particularly V. V. Barthold, *Uluğ Beg i 1460-1469*, 1918 (Germ. transl. by Hinz, *Uluğ Beg und seine Zeit*, 1935), and *Mir Ali Shīr i politsicheskaya žizn'* (transl. Hinz, *Herat unter Husayn Bayqara*); the articles (by Yakubovskij, Molčanov, Belenitskij, etc.) in the two collections *Rodonat'nik ushekhskoj literatury*, Tashkent 1940, and *Ali Shīr Navoi Shornik*, Tashkent 1940; Belenitskij, *K istorii feudal'nogo zemel'adelstva Srednei Azii pri Timuridakh*, in *Istorik-Markshist*, 1941/4; the works of I. P. Petrushevskij; W. Hinz, *Iran's Aufstieg zum Nationalstaat*, 1936. On the Russian embassy to Harāt in 1464 cf. ZVO, I, 30 sqq. See also Browne, *ibid.*; Grousset, *Empire des Steppes*, Bouvart, *Essai sur la civilisation islamique*, JA, 1926, and *L'Empire mongol (2e phase)*, Paris 1927, may be disregarded.

**U. ARICER**  
**ABU SAKHR AL-HUDHALI**, 'ABD ALLAH B. SALAMA, Afāb poet of the second half of the 15th century. He belonged to the tribe of Sahn, a branch of the Hudhayl b. al-Hudja, and embraced the Marwānī cause; imprisoned by the anti-caliph 'Abd Allāh b. al-Zubayr, he regained his liberty when the latter died, and according to his own account, took part in the capture of Mecca in 720/92. He celebrated in his verse the caliph 'Abd al-Malik, as well as his brother, 'Abd al-Sā'id; see *Aghānī*, xxi, 144. Above all he praised the amīr Abū Ḫālid 'Abd al-'Azīz of the Asid clan, whose brother, Umayya, had been governor of al-Basra from 716/69

until 720/69; see al-Tabarī, index; on the favour in which this family was held by the Caliph, see Ibn 'Abd Rabbih, *ʿUdā*, Cairo 1359, viii, 55. Some twenty poems and fragments by Abū Sakhr are known, which were included by al-Sukkarī in *Ḥifʿ al-Duʿā*. A number are *ḥakā'id* of the classic type; others are erotic-eloquent compositions recalling those of 'Umar b. al-'Alā. **Bibliography:** *Aghānī*, xxi, 144-54; J. Wellhausen, *Letzte Teil der Lieder der Hudhaliten*, Berlin 1884, i, Arabic text, nos. 250-261; Buḥārī, *Ḥamāsa*, no. 1009; Kudāma b. Dīʿfar, *Maḍ al-Shīr*, 13, 44-5. (R. BLANCHÉ)

**ABU SALAMA HAFS B. SULAYMĀN AL-KHĀLĀL**, vizier. A freed slave from Kūfa, he was sent in 1277/415 to Khurāsān with ample powers, as one of the chief 'Abbāsid emissaries. He took part in the armed insurrection which put an end to the Umayyad dynasty, and was appointed governor of Kūfa. At the culminating point of the revolution he inclined towards the 'Alids and seems to have attempted to set up an 'Alid caliphate. In this, one can perhaps see a consequence of the deliberate ambiguity about the rights of the "house of the Prophet", put into circulation by the revolutionary propaganda. Al-Safāh, however, was chosen as caliph and Abū Salama gave him his allegiance (132/749). The caliph appointed Abū Salama vizier, without, however, losing his suspicions, and in the same year planned to remove him. Fearing that this might irritate Abū Muslim, the powerful governor of Khurāsān, who was Abū Salama's companion in the *da'wa* and might have been acting in agreement with him, he sent his brother Abū Dīʿfar (al-Mamār) to consult Abū Muslim. Abū Muslim made no difficulties; on the contrary, he himself sent a hired assassin to kill Abū Salama. The crime was subsequently attributed to the Khārijites. Abū Salama is described as an educated and capable man, and his services in the 'Abbāsid cause are indisputable. Nevertheless, the fears of the caliph concerning him seem, by the common witness of the sources, to have been justified.

**ABU'L-SALT Umayyā B. 'ABD AL-'AZİZ B. ABU'L-SALT AL-ANDALUSI** was born in 460/1067 in Denia (Dāniya), in the Levante, and studied under the ḥadī al-Wakkāshī from whom he inherited his encyclopaedic knowledge. About 480/1096 we find him in Alexandria and Cairo, where he continued to pursue his studies. In consequence of an unsuccessful attempt to refloat a sunken ship, he was imprisoned by the vizier al-Mahdī. Exiled from Egypt, he went (in 505/1111-2) to al-Mahdiyya, where he was well received by the Zīrid amīr Yahyā b. Tamīm, and his son 'Alī b. Yahyā, and he remained in al-Mahdiyya, an honoured and respected figure, until his death on 5 Muharram 529/1134 (other dates are also mentioned).

The following may be mentioned of his numerous works. (i) *Takwīm al-Dhīn*, a short treatise on Aristotelian logic, edited and translated into Spanish by A. González Palencia, Madrid 1915 (with biographical introduction). (ii) *Riḍāla* fi *l-'Asmā' bi'l-'Asnād*, on the use of the *asna'id*; a short analysis with a list of the chapters, in Millās, *Asnād*. (iii) Answers to scientific questions (*mas'āl*) concerning different problems of physics, cosmography and

mathematics; short summary *ibidem*. (iv) A summary of astronomy, composed for the Egyptian vizier al-Aḡḡāl, which, according to the judgment of his contemporaries, was a manual without educational value and useless for teachers. (v) *Al-Adwiyā al-Mufrada*, on simples, was translated into Latin by the famous physician Arnaldus de Vilanova and into Hebrew by Yohuda Natan. (vi) *Al-Rasād al-Misriyya*, dedicated to Abu'l-Tāhir Yahyā b. Tamīm, and giving vivid information about the affairs and the customs of Egypt; ed. by 'Abd al-Salam Ḥārūn, *Nawādir al-Maghātib*, Cairo, (vii) *Riḍāla* fi *l-Mas'āl*; the Arabic original is lost, but an anomalous Hebrew translation is preserved in Paris, Bibl. Nat., Hebrew MS no. 1036.

**Bibliography:** Ibn al-Kifī, 80; Ibn Abī Usayb'a, ii, 32 ff.; Yāqūt, *Irbāḥ*, ii, 361; Ibn Ḫalīkān, 201; Maḥkarī, *Analeches*, i, 530 ff., 218-9; Bruckmann, i, 641, S I, 889; Suter, 115; M. Millās Vallicrosa, *Asnād d'Histoire de les idées positives i matematiques a la Catalunya medieval*, i, 75-81; G. Sarton, *Introduction to the Hist. of Science*, i, 230. (J. M. MILLAS)

Abū'l-Salt also wrote for al-Hasan, son of 'Alī b. Yahyā, a historical work, viz. a continuation of the History of Ifrīkiya by Ibn al-Rāḡib, bringing it down to 517/1125. Extracts are to be found in Ibn 'Idhārī, *al-Bayān al-Maghrīb*, i, 274 ff., 292 ff., al-Tijādī, *Riḥla*, Tunis 1927, 31 ff. (= JA, 1852(11), 131), go (= *ibidem*, 176), 237 (= JA, 1853, 375 ff.), and Ibn al-Ḫaṭīb (*Centenario di Michele Amari*, i, 455-9). (S. M. STERN)

**ABU'L-SARĀYĀ AL-HAMDĀNĪ** (see HAMDĀNĪ).

**ABU'L-SARĀYĀ AL-SARĪ B. MANṢŪR AL-SHAYBĀNĪ**, Shī'ite rebel. Said to have been a donkey-driver, and afterwards a bandit, he entered the service of Yazīd b. Mazyad al-Shaybānī in Armenia, and was engaged against the Khurramīyya [g.n.]. Later he commanded Yazīd's vanguard against Harḡama in the civil war between al-Anḍī and al-Ma'mūn, but subsequently changed sides and joined Harḡama. Obtaining permission to go on pilgrimage to Mecca, he openly revolted, and after defeating the troops sent against him went to al-Rakka. Here he met the 'Alid Muhammad b. Ibrahim b. Tabāṭabā [g.n.], whom he persuaded to go to Kūfa, and himself joined him there on 20 Dhu'l-Ḥiḡa 11 109/26 Jan. 815. Three weeks later he defeated the army sent by al-Hasan to put down the revolt at Kūfa, and on the following day (1 Rajab/13 Feb.) Ibn Tabāṭabā died. The Sunni sources accuse Abū'l-Sarāyā of poisoning him, but the accusation is not borne out by the Shī'ite tradition. Another 'Alid, Muhammad b. Muḥ. b. Zayd, was chosen as Imām, but the effective power remained in the hands of Abū'l-Sarāyā. He had dirhams coined in Kūfa (ZDMG, 1868, 707) and sent detachments to take Wasit, Basra, al-Aḥwāz, Mecca, etc. When he next marched on Baghdād, al-Hasan b. Sahl appealed to Harḡama, then on his way back to Khurāsān. Harḡama at once turned back, defeated Abū'l-Sarāyā at Kayr Ibn Hubayra (Shawwāl/May-June), and besieged him in Kūfa. Since the Kufans refused to support him, Abū'l-Sarāyā fled with 800 horsemen (16 Muharram 1100/26 Aug. 815), made for Sūsa, but was there defeated and himself wounded by the forces of the governor of Khuzistān, al-Hasan b. 'Alī al-Ma'mūn, and his followers dispersed. He tried to reach his

home at Ra's al-'Ayn, but was overtaken at Dajdāla by Hammād al-Kundaghūsh, who captured him and handed him over to al-Hasan b. Sahl al-Nahrawān. Al-Hasan had him beheaded 10 Rabi' I 300 (18 Oct. 815) and his body was hung at the bridge of Baghdad.

**Bibliography:** Tabarī, iii, 976 ff.; Ibn al-Athīr, vi, 212 ff., 217 ff.; Abu 'l-Faraj, *Mabāḥil al-Talibīyyin*, Teheran 1307, 178-93; F. Gabrieli, *al-Ma'mūn e gli 'Alīdī*, Leipzig 1929, 10-23; for the activities of his representative in Basra cf. Ch. Pellat, *Milieu Barren*, Paris 1953, 108-9 (H. A. R. Gibb).

**ABU SHĪMA SHUHAB AL-DĪN ABU 'L-ĪSĀS** 'ABD AL-RAHMAN B. ISMĀ'IL AL-MAKDISI, Arab historian, born in Damascus in 30 Rabi' II 590/10 Jan. 1203. All his life was spent in Damascus except when he stayed for one year in Egypt for the purpose of study, and visited Jerusalem for fourteen days, and al-Hijāz, twice, on pilgrimage. He obtained a professorship in Damascus, in the madrasa al-Rukniyya or al-Ahrafīyya, only five years before his death on 19 Ramaḍān 665/13 June 1268. Like most scholars of his time he had a varied education, on a Sūnī basis, and his works, consequently, dealt with several subjects, but his reputation rests on his historical writings.

His main works are: 1) *K. al-Rawdaṭayn fi al-Ḥikāh al-Dawlatayn*, a history of Nūr al-Dīn and Salāh al-Dīn (printed in Cairo, 1288, 1292; extracts, with French translation by Barbier de Meynard, in *Recueil des historiens des croisades, Hist. Or.*, iv, 7, Paris 1898, 1906; German translation—careless and incomplete—by E. P. Goergens, entitled *Die der beiden Fürsten*, 1879). It derives from the *Ḥikāh* of his father and preserves, in parts, the important works of al-Bārī al-Shāmī by 'Imād al-Dīn al-Kātib, *Sirat Salāh al-Dīn* by Ibn Abī Tayy and a great number of *Rasā'id* by al-Kātib al-Fādhī. The events are dealt with chronologically and the narratives are supported by documents mainly from al-Fādhī and al-'Imād. In this book he names his sources when quoting, and keeps to their wording, except for al-'Imād. 2) *Al-Dhayl 'ala l-Rawdaṭayn*, a continuation of the preceding. In the first part of this book Abū Shīma draws mainly on the *Mir'at al-Zamān* of Shīr al-Dīn al-Djāzī. In the later part he himself as an eyewitness is the main source. This book is more of a biographical than historical work, especially in the second part, and is less important than *K. al-Rawdaṭayn*. (Printed in Cairo, 1907, with the title *Taḥṣīl al-Dīn Ridā al-Karīm al-Sādīq wa 'l-Sābi'*; extracts with French translation in the *Recueil des historiens des croisades*.) 3) *Tarīkh Dimashq* (in two versions), a summary of the vast work of Ibn 'Asākir with the same title (Abhwārī, *Ferr. arab. Hs. Berlin*, no. 9782), 4) commentary on the *Rasā'id al-Shābiyya* (printed in Cairo), 5) A commentary on the seven poems of his teacher 'Alīm al-Dīn al-Sakhāwī (ed. 643/1245) in praise of the Prophet, is extant in manuscript (Paris, 3147, 2).

All of his other works, dealing with various subjects, are lost, and some biographers say that they were destroyed by fire along with his library.

**Bibliography:** Kutubī, Fawā'id, i, 252; Suyūṭī, *Tahkik al-Huṭūf*, ix, 10; Dīshakabī, *Tahkik al-Huṭūf*, Baydarshād, iv, 231; Makrīfī, *Kifāyat*, i, 46; *Orientalia*, ed. Juyonbōl, ii, 253; Brockelmann, I, 386, S. I, 550. (HILMY AMMAN)

**ABU 'L-SHAMAKMAK** 'ABU MUHAMMAD MARWĀN B. MUḤ. Arabic poet of the early 'Abbāsid period, was born in Basra in the quarter of the

Baḥū Sa'ād as a *muṣallā* of the Banū Umayya. No date is given for his birth. His *lubb* would seem to allude to his big nose and big mouth. He must have migrated to Baghdad some considerable time before the accession of Hārūn al-Raḡhīd (170/786). Ibn al-Mu'tazz, *Tahakut al-Sha'arī* al-Muḥaddith (A. Eghbal), 55, puts his death in or about 180/796. Like other poets of his time Abū 'L-Shamakmak is credited with undertaking an occasional public duty. He appears to have served as transmitter of the *ḥikāyāt* of Maḥnāt Sābūr to the caliph. On the whole, however, he made his precarious living by means of enlogies and lampoons. A number of anecdotes illustrate his position on the margin of the contemporary world of letters. Ibn 'Abd Rabbih, *al-'Ihd al-Farid*, Cairo 1353/1935, iv, 255, lists Abū 'L-Shamakmak among the "luckless wits." His originality, which was most effective in parody and to which the introduction to Arabic poetry of the talking cat that asserts its impoverished owner may be owed, went unrewarded and constant frustration induced frequent descents into unmitigated vulgarity.

**Bibliography:** A collection of his fragments with a critical introduction and a biography was published by G. E. von Grunebaum, *Orientalia*, 1953, 262-83. (G. E. VON GRUNEBAUM) **ABU 'L-SHAHWK** (see *al-Rawdaṭayn*). **ABU 'L-SHĪS** MUHAMMAD (B. 'ABD ALLĀH B. RAḤMĀN AL-KHŪZĀ'), Arab poet, died about 200/815. Like his relative Dīḥlī [q.v.], he lived at the court of Hārūn al-Raḡhīd for whom he wrote panegyrics, and afterwards dirges. He then went to al-Rakha and obtained the favours of the *amir* 'Uṭba b. al-Ash'ath, remaining his boon-companion and court poet until 198/813. He is to be judged by the quality of his work that have been preserved. Abū 'L-Shīs does not appear as an original poet in his panegyrics, hunting poems and wine songs, though these poems were valued by his contemporaries, notably by Abū Nuwās, who did not hesitate to plagiarize him. The elegies on the infirmities of old age which he composed at the end of his life, when he became blind, are of great value in that they express real feeling. Similarly, when he makes fun of himself or mocks at the poets who imitated the poetry of the desert (e.g. Ibn Kutayba, *Shif'r*, 336, concerning the *ghurāb al-bayn*), he is not lacking in humor.

**Bibliography:** Fragments of Abū 'L-Shīs's poetry and isolated verses are to be found in a number of books: Ibn Kutayba, *Shif'r*, 335-9; *Aḥmad*, v, 36, 89, 108-11; Dīshakabī, *Hayawān*, iii, 518, iv, 345, v, 184; Ps-Dīshakabī, *Mahāsin* (van Vloten), 68; Ibn al-Mu'tazz, *Tahakut*, 26-33; Bayhaqī, *Mahāsin*, 358; Tabarī, iii, 763; Ibn al-Athīr, vi, 135; Dīshakabī, *Hayawān*, 96v; al-Khatīb, *Tarīkh Baghdad*, v, 401-2; Safadī, *Nakāt al-Himyan*, 257-8; Ibn Khallikān, iv, 232; Kutubī, *Fawā'id*, ii, 261 ff.; 'Askāri, *Diwān al-Na'ā'id*, Cairo 1250, i, 455, ii, 209, 252; see also O. Rescher, *Abriss*, ii, 28-9; Brockelmann, I, 83, S. I, 135. (A. SCHAEDE-CH. FELLAT)

**ABU SHUDJĀ'** AHMAD B. HASAN (OR HUSAYN) B. AHMAD, a famous Shāfi'ī JURIST. His family came from Isfahān, his father was born in 'Abbādīn. He himself was born in 434/1042-3 in Basra, and there taught Shāfi'ī law for more than 40 years; he was alive in 500/1106-7, but the date of his death is not known. At some time, he was a *hādī*. He is the author of a short compendium of Shāfi'ī law, called *al-Ghaya fi 'l-Hikāyah*, or *al-Muḥḥṭayy*, or *al-Tahrib*. This became the starting-point of one of the later literary traditions of the

Shāfi'ī school and acquired, from the 7th/13th to the 13th/19th century, a considerable number of commentaries and glosses, many of which have been printed. Editio princeps of the text, with (unreliable) translation, by S. Keyser, *Précis de jurisprudence musulmane*, Leiden 1859; translation of the text by G.-H. Bouquet, *Abrégé de la loi musulmane*, separately printed from the *Revue Algérienne* 1935; edition (and faulty) translation of the commentary of Ibn Khāsim al-Ghazzī (d. 918/1512), with the title *Fath al-Karīb*, by L. W. C. van den Berg, Leiden 1895 (some corrections to the translation in Bouquet, *Kūṭb al-Tanbīh*, Bibliothèque de la Faculté de Droit de l'Université d'Alger, II, XI, XIII, XV, Algiers 1929-31); partial translation of the gloss of Ibrahim al-Baḡdādī (d. 1277/1861), with reprint of the corresponding chapters of the text, by E. Sachau, *Muhammedanisches Recht*, Berlin 1897.

**Bibliography:** Yāqūt iii, 598 f.; Tāj al-Dīn al-Subkī, *Tahakut al-Shāfi'īyya*, Cairo 1324, iv, 38; Juyonbōl, *Handisling*, 374 f.; Brockelmann I, 492 f.; S. I, 661 (J. SCHACHT)

**ABU SHUDJĀ' MUHAMMAD B. AL-HUSAYN** [see *al-RUDHAWARĪ*].

**ABU SUFYĀN** B. HARB B. UMMAYYA, of the clan of 'Abd Shams of Quraysh, prominent Meccan merchant and financier (to be distinguished from Muhammad's cousin, Abū Sufyān b. al-Harith b. 'Abd al-Muttalib). His name was Saḡḡr, and his Shams had been at one time a member of the political group known as the Muta'yayyibūn (which included the clan of Ḥāshim), but about Muhammad's time had moved away from this group and in some matters cooperated with the rival group, Maḥḥabūn, Dīnabā, Salm, etc. As head of 'Abd Shams Abū Sufyān joined in opposing Muhammad in the years before the hijra, but his opposition was not so violent as that of Abū Dīḥl. On several occasions he led caravans in person, notably in 2/624 when a caravan of 2000 camels returning from Syria under his command was threatened by Muhammad. In answer to his requests for help the Meccans sent out about 2000 men under Abū Dīḥl. By skilful and vigorous leadership Abū Sufyān defeated the Muslims; but Abū Dīḥl was eager to fight, and brought upon the Meccans the disaster of Badr. Of Abū Sufyān's sons Hanḥala was killed and 'Amr taken prisoner but subsequently released, while his wife Hind lost her father 'Uṭba. Abū Sufyān was apparently in charge of the preparations to avenge Badr, and commanded the large army sent to Medina in 3/625, probably as a hereditary privilege, the *ḥāḥala*. He realized that the result of the ensuing battle of Uhud was not satisfactory for Quraysh, but was prevented from attacking the main settlement of Medina by Saḥwān b. Umayya (of Dīnabā), possibly out of jealousy. Abū Sufyān also organized the great confederacy which besieged Medina in 5/627. When this proved a fiasco, he perhaps lost heart; at least resistance in Mecca to Muhammad came to be directed by the leaders of the rival group, Saḥwān b. Umayya, Suhayl b. 'Amr and 'Ikrima b. Abī Dīḥl. Abū Sufyān is not mentioned in connection with the peace of al-Hudaybiya. When in 8/630 allies of Quraysh openly broke the peace, Abū Sufyān went to Medina to negotiate. What happened is not clear, but he possibly came to some understanding with his daughter, Umm Ḥabība, may have softened his heart, even though he had been

some fifteen years in Abyssinia as a Muslim. Certainly, when Muhammad marched on Mecca soon after, Abū Sufyān, along with Ḥakīm b. Hizām, came out and submitted to him (apparently now becoming a Muslim), and those who took refuge with Abū Sufyān were guaranteed security. Thus he did much to bring about the surrender of Mecca peacefully. He took part in the battle of Hunayn and the siege of al-Tā'if, where he is said to have lost an eye; like the other Meccans he would be well aware that Ḥawāṣim and Dīḥl were as hostile to Mecca as to Muhammad. In the distribution of the spoils he and Ḥakīm seem to have received a specially large gift in recognition of their services. On the submission of al-Tā'if, Abū Sufyān, who had business and family connections there, helped to destroy the idol of al-Lāt. He was appointed governor of Najrān and perhaps also of the Hijāz, but whether by Muhammad or Abū Bakr is disputed. If it is true that he was in Mecca at Muhammad's death and spoke against Abū Bakr, he cannot have been governor of Najrān then; but the alleged speech, like many other statements about Abū Sufyān, may be anti-Umayyad propaganda. He was present at the battle of the Yarmūk, but may have done little more than exhort the younger men, as he was about 70. He is said to have died about 32/653 aged about 88. Of his sons, Yazīd died as a Muslim general in Palestine about 18/639, and Mu'āwīya was the first Umayyad caliph.

**Bibliography:** Ibn Hishām, Wakā'id, Ibn Sa'd, *Tabarī*—see indexes; Ibn Ḥajlār, *Jāmi'*, iv, 477-80; Ibn al-Athīr, *Uṣd*, iii, 12-3, v, 316; Caetani, *Annali*, i, 111. (W. MONTGOMERY WATT)

**ABU SULAYMĀN MUHAMMAD B. TĀHER B. BAHĀM AL-SUGISTĀNĪ AL-MANTĪQĪ**, philosopher, b. about 300/912, d. about 375/985. He was a pupil of Māṭī b. Yūnus (d. 328/939) and Yahyā b. 'Adf (d. 364/974), and lived in Baghdad (he was patronized by 'Adud al-Dawla, to whom he dedicated some of his treatises), occupying an eminent place among the philosophers of the capital. His system, like that of most of the other members of his environment, had a strong Neo-platonic colouring. For the content of his teaching we are mainly indebted to Abū Ḥayyān al-Tawhīdī [q.v.], whose works, especially *al-Muḥāḥad* and *al-Imdā' wa 'l-Mu'annas*, are filled with reports of Abū Sulaymān's utterances on philosophical as well as many other topics, usually expressed in a rather involved and obscure style. A few of Abū Sulaymān's shorter treatises have survived in MS. Of his history of Greek and Islamic philosophy, *Sīnān al-Hikma*, only an abbreviation is extant in several MSS (cf. M. Fleischer, in *Islamica*, 1937, 554-8; add Brit. Mus. Or. 9033; cancel Bodl. Marsh 539; Leiden 339 contains an even shorter version by al-Ghāḍanfar al-Tibrīzī). The *Sīnān al-Hikma* was one of the sources of al-Shahrastānī, *al-Milāl wa 'l-Nihāl*, for the description of the old Greek philosophers (ed. P. Kraus, in *BIE*, 1937, 207-16, 1938, 146). Various other authors also quote Abū Sulaymān for information concerning the history of philosophy: Ibn al-Nadīm (who was a disciple of his), *Fihrist*, 241, 243, 248; Ibn Maṭrān, see P. Kraus, *Jahr im Hayyān*, 4, p. 131; Ibn Abī Usaybi'a, i, 9, 15, 57, 104, 186-7.

**Bibliography:** *Fihrist*, 264, 316; Abū Shāfi'a, *Dhayl Taḥṣīl al-'Ummān* (Amnūn-Margoliouth), 757; Bayhaqī, *Taḥṣīl Sīnān al-Hikma* (M. Shafī), 74-5; Yāqūt, *Irbid*, ii, 89, iii, 100, v, 360, 398 (after Abū Ḥayyān); *Shif'r* al-Andalus, 81; Ibn al-Kifṭī, 282-3; Ibn Abī Usaybi'a, 4,

321-2; Brockelmann, I, 236, S. I, 377; Muhammad b. 'Abd al-Wahhâb Karwî, *Sharh al-Halâ' Abû Sulaymân Ma'rifat al-Sayyidî* (Irbil, de la Société des Études Iraniennes, no. 3), Chahin-sur-Sanne 1933 = *Biid Mahûla*, Tehran 1934, 94 ff.

(S. M. STERN)

**ABU 'L-SU'UD MUHAMMAD B. MUHIY 'L-DIN** MUB. b. AL-IMAD MUSTAFÂ AL-IMÂDÎ, known as Rhodja Çelebi (Hoca Çelebi), famous commentator of the *Kur'ân*, Hanafî scholar and Shaykh al-Islâm, born 27 Safar 896 to December 1499, died 15 Dhu'l-Hijja 1. 952/23 August 1572. His father, a native of Iskilîb (Iskiliy, west of Amasia) had been a notable scholar and *şâfi*. Abu 'L-Su'ud began his career as a teacher, being eventually promoted to one of the "Eight Madrasas" of Sültân Muhammad II. In 930/1523 he was appointed *hâdî*, first in Brûsa (Bursa), then in Istanbul; in 944/1537 he became *hâdî* *tasâr* of Rumelia, and in 952/1549 Sültân Sulaymân I. made him Grand Muftî or Shaykh al-Islâm. He kept this post for the rest of his life, under Sulaymân and his successor Salim II. Abu 'L-Su'ud was bound to Sulaymân by friendship, and though he could not quite maintain his exclusive influence under Salim, this Sültân too held him in high esteem. The one approach that was made against him is his scheming and his eagerness for the intimacy of the great. To Sulaymân, he justified the killing of Yâzîdî, and to Salim, the attack on Cyprus, in breach of a treaty of peace with Venice. He was buried in the Abî Ayyûb quarter of Istanbul, where his tomb still exists. When the news of his death reached the Holy City, funeral prayers for an absent person were said for him. Several of his disciples held important positions under Salim II, Murâd III, and Muhammad III.

As Shaykh al-Islâm, Abu 'L-Su'ud succeeded in bringing the *hâdî*, the administrative law of the Ottoman Empire, into agreement with the *shari'a*, the sacred law of Islam. Supported by Sulaymân, he completed and consolidated a development which had already started under Muhammad II. He formulated, consciously and in sweeping terms, the principle that the competence of the *hâdî* derives from their appointment by the Sultan, and that they are therefore bound to follow his directives in applying the *shari'a*. Already as *hâdî* *tasâr* he had begun, on the orders of the Sultan, to revise the local law of the European provinces and to apply to it the principles of the *shari'a*. (On the effect of this revision, see P. Lemerle and P. Wittek, in *Archives d'Histoire du droit oriental*, 1948, 466 ff.) His *fatâwâ*, of which a number still exist in the original, were brought together in several semi-official and private collections. In keeping with his general aim, Abu 'L-Su'ud took account of the practice in authorizing the *wa'f* of movables and in particular of money, the giving and taking of remuneration for teaching and other religious duties, (on these two questions, he became involved in polemics), in allowing the Karagöz play, and in refraining, in the end, from giving a *fatâwâ* against the use of coffee. Whilst he appreciated orthodox Sûfism, he did not hesitate to authorise the execution of extremist *şâfi*.

In his spare time, Abu 'L-Su'ud composed a commentary on the *Kur'ân*, drawn mainly from al-Baydâwî and al-Zanakhshârî, with the title *Irshâd al-'Abî al-Salim*; it became popular in the Ottoman Empire and beyond its frontiers, found several commentators and was printed a number of times. Among his other, smaller works, a book

of prayers drawn from traditions and meant to be learned by heart (*Du'â-nâma*, or *R. fi 'L-Ad'iya al-Mahâra*), may be mentioned. He also wrote some poetry in Arabic, Persian and Turkish.

**Bibliography:** 'Abî Elendî Manûk (d. 992/1584), *al-'Ibd al-Manzûm*, Cairo 1310 (on the margin of Ibn Khallûkân, *Wafâyât* II), 282 ff.; 'Atâ'î, *Dhâwî-â Shâhîdî*, Istanbul 1268, 183 ff.; Peçevi, *Târikh*, I, Istanbul 1281, 52 ff.; Ibn al-'Imâd, *Shahîdât al-Dhâbî*, viii, 198 ff.; Brockelmann, II, 579 f., S. II, 651; M. Hartmann, in *Isl.*, 1918, 335 ff. (on the publication of Sulaymân's *Kâdî-nâma-yi 'Djâdî*, containing *fatâwâ* of Abu 'L-Su'ud, and of Abu 'L-Su'ud's *Ma'rûfât*, another collection of his *fatâwâ*, in MTM, I, 2-3; P. Horster, *Zur Anwendung des Islamischen Rechts im 16. Jahrhundert*, Stuttgart 1935 (re-edition and translation of the *Ma'rûfât*); Gibb, *Ottoman Turkey*, iii, 116; Ömer Lütfî Barkan, *XV. ve XVI. asrîlarda Osmanlı imparatorluğunda şari' ehrominin hukukî ve mâlî esaslar*, Istanbul 1943; M. **ABÜ TÂHIR SULAYMÂN AL-KARMA'TÎ** (see AL-DJAHM)

**ABÜ TÂHIR TARŞÜSÎ** (TARŞÜSÎ, TOSÛ) MUHAMMAD B. HARAN B. 'ALÎ B. MÛSA, a person otherwise unknown, said to be the author of several novels in prose, prolix in style and of great length, a confused mixture of Arab and Persian legendary traditions, written in Persian and afterwards translated into Turkish. These include *Kâramûn-nâma* (about Kâramûn, a hero from the epoch of Hâshim, semi-mythical king of Idâl), *Kirân-i Bahâgî* (the story of a hero from the time of the Kayânîd king Kay Kubâdî), *Dârâb-nâma* (history of Darius and Alexander).

**Bibliography:** Firdawî, *Liwe des rois*, ed. and transl. of J. Mohl, I, preface 74 ff.; H. Ethé, in *Grandes d. Iran. Philol.*, II, 318; E. Blochet, *Cat. des persans lib.*, Nat. Paris, nos. 1201-2; *idem*, *Cat. des turcs*, *act. fonds*, nos. 331-7; Ch. Rieu, *Cat. Turcica MSS Brit. Mus.*, 219 ff. (H. MASSE)

**ABÜ TÂKA** (see SIKKÂ).

**ABÜ TÂLIB**, son of 'Abd al-Muttalib b. Hâshim and Fâtima bint 'Amr (of Makhrûm), and full brother of Muhammad's father. His own name was 'Abd Manâf. He is said to have been in the offices of *shûba* and *rifâda* (providing water and food for pilgrims) from his father, but at the Hîl al-Fudûl and war of the Fijâr his brother al-Zubayr seems to have been the leading man of Hâshim. He fell into debt, and to meet this surrendered the *shûba* and *rifâda* to al-'Abbâs. Nevertheless he seems to have remained chief of the clan of Hâshim, and their quarter of the town was called the *bayt* of Abû Tâlib. When 'Abd al-Muttalib died, he looked after Muhammad, and is said to have taken him on trading journeys to Syria. He continued to protect Muhammad when he came forward as prophet, even when most of the other clans of Quraysh boycotted Hâshim and al-Muttalib; there were presumably also economic reasons for the boycott. He died shortly after the end of the boycott, about 619, and was probably succeeded as chief by his brother Abû Lahab. Of his sons by Fâtima bint 'Asad b. Hâshim, 'Alî (who is said to have been brought up by Muhammad) and 'Djâfar became Muslims, while Tâlib fought against Muham-

mad at Badr. He himself, though protecting Muhammad, clearly did not become a Muslim; but the point was much discussed and varying traditions circulated, in connection with the theological mission of the fate of those who lived before Muhammad's mission.

**Bibliography:** Ibn Hâshim, II, 174-77; Ibn Sa'd, *ibid.*, 279-81, 314-15, 319-21; Tabarî, I, 123-6, 127-85, 129-30; Ibn Badjar, *Taiba*, IV, 211-9; Th. Nöldeke, in *ZDMG*, 1858, 27-8; Goldziher, *Muh. Studien*, II, 107; Caetani, *Annali*, I, 158, 298, 307, etc.; F. Buhl, *Das Leben Muhammads*, 115-8; Montgomery Watt, *Muhammad at Mecca*, index. (W. MONTGOMERY WATT)

**ABÜ TÂLIB KÂLIM** (see KÂLIM).

**ABÜ TÂLIB MUHAMMAD B. 'ALÎ AL-HÂRITHI AL-MAKKÎ**, d. in Baghdâd in 386/998, muh addidh and mystic, head of the dogmatic madhhab of the Sâlimiyya (q.n.) in Bagra. His chief work is the *Kât al-Kulûb*, Cairo 1310, whole pages of which were copied by al-Ghazâlî in his *Ihyâ' 'Ulûm al-Dîn*.

**Bibliography:** Brockelmann, I, 200, S. I, 359-66; Sayyid, *Murtadâ*, *ibid.*, Cairo, II, 67, 68; *passim*; *ibid.*, *Lahûl*, Cairo, II, 25; Ibn 'Abd al-Rundî, *al-Rasâ'id al-Kubrâ*, lith. **ABÜ TÂLIB KHÂN** (1752-1806), the son of Hâdîdî Muhammad Beg, of Turkish descent, was born at Lucknow. His early years were spent in Murshidâbâd at the court of Mu'azzir Djang. With the accession of Âsaf al-Dawla (1775) he returned to Oudh and was appointed *'amûlâr* of Fâtâwah and other districts. He also served as a revenue official under Colonel Hannay who farmed the country of Sarwâr. He was later employed by Nathaniel Middleton, the English Resident, and was connected with Richard Johnson in the management of the confiscated *dhigirs* of the Begums of Oudh. He remained in Oudh until 1796. In February 1799 he sailed from Calcutta to Europe where he visited England, France, Turkey, and other countries, returning to India in August 1803. An account of his travels, the *Masir-i Tâlibi fi Bulâd-i 'Irandîz* was published in 1812 and translated into English by C. Stewart (1814) and into French by G. Maho (1819). He also wrote the *Lubb al-Siyar wa-Djâhân-nûma* and the *Khulâsât al-Afâr*. His *Tarîf al-Ghâzîlî*, a history of Oudh under Âsaf al-Dawla, is an important source for the careers of Haydar Beg and the various English residents, and contains a spirited defence of Hannay's revenue administration (English trans. by W. Hovey, 1888). He published also the first edition of the *Divân* of Hâfiz, Calcutta 1791.

**Bibliography:** Elliot and Dowson, *History of India*, viii, 298 ff.; Rieu, *Cat. of Persian Mss.*, I, 378 ff. (C. COLLEN DAVIES)

**ABÜ TAMMÂM** HANIS B. AWS, Arabic poet and anthologist. According to his son Tamâm he was born in the year 188/804, according to an account deriving from himself, in the year 200/806 (*Ahhâr*, 272-3) and in the town of Dâsîm between Damascus and Thiberia. He died according to his son in 231/845, according to others 2 Muharram 232/29 Aug. 846 (*ibid.*). His father was a Christian by name Tâdhûsîs (Thaddeus, Theodosius?) who kept a wine-shop in Damascus. The son altered the name of his father to Aws (*Ahhâr*, 246) and invented for himself a pedigree connecting him with the tribe of Tayyî. He was mocked on the score of this false

pedigree in satirical verses (*Ahhâr*, 235-8); later, however, the pedigree appears to have found acceptance, and Abû Tammâm is therefore frequently referred to as "the Tayyite" or "the great Tayyite". He spent his youth as a weaver's assistant in Damascus (Ibn 'Asâkir, iv, 19). Subsequently he went to Egypt where at first he earned his living by selling water in the Great Mosque, but he also found opportunity to study Arabic poetry and its rules. The exact chronology of his life is difficult to reconstruct, at all events until the happenings mentioned in his poetry and the biography of the men eulogised by him are accurately established. According to one tradition he composed his first panegyrics in Damascus for Muh. b. al-Djâhîm, brother of the poet 'Alî b. al-Djâhîm (al-Mawâhib, 324). This, however, can hardly be correct, as this personage was only in 225 appointed governor of Damascus by al-Mu'tasim (Ibn al-Mardîm Bek, in the preface to the *Divân* of 'Alî b. al-Djâhîm, 4). According to the poet's own account (*Ahhâr*, 121), he composed his first poem in Egypt for the tax-collector 'Ayyâdh b. Lahfâ' (al-Badrî, 181). He was, however, disappointed if he and repaid him as often in similar circumstances, with lampoons (cf. al-Badrî, 174 ff.). Al-Kindî (*Governors and Judges of Egypt*, ed. Guent, 181, 183, 186, 187) quotes some verses of Abû Tammâm referring to events in Egypt in the years 211-4. From Egypt Abû Tammâm returned to Syria. At this time he is to be placed, apparently, the *onoma* and lampoons on Abu 'L-Mughîlî Mûsâ b. Ibrahim al-Râkî. When al-Ma'mûn returned from his campaign against the Byzantines (215-8), Abû Tammâm, clad in the bedouin attire beloved by him all his life, offered him a *hasida*, which however was not to the caliph's taste, since he took exception to the fact that a bedouin should compose urban poetry (Abû Hîlâl al-'As'ari, *Divân al-Ma'mûn*, II, 120). At this time the young Bulhârî perhaps came into contact with him in Hîms (*Ahhâr*, 66, cf. 205).

Abû Tammâm first rose to fame and became generally known under al-Mu'tasim. On the destruction of Amorium in the year 225/838 (cf. 'AMMŪRIYYA) the Mu'tasillite chief kâdî Ahmad b. 'Abî Du'dâ [q.n.] sent him before the caliph in Samarra. The caliph recalled the harsh verse of the poet, which he had heard in Mecca, and granted Abû Tammâm an audience only after making sure that he had with him a *rawî*, or reciter, with a pleasant voice (*Ahhâr*, 143-4). Then began Abû Tammâm's career as the most celebrated panegyrist of his time. In addition to the caliph he eulogised in his *hasida* the highest dignitaries of his epoch. One of these was Ibn Abî Du'dâ, whom, however, he offended temporarily through a poem in which the South Arabs (to whom the tribe of Tayyî? belonged) were greatly extolled to the disadvantage of the North Arabs (from which the chief kâdî claimed descent). An apologetic *hasida* had to be addressed to the patron before his reinstatement was effected (*Ahhâr*, 147 ff.). Other personalities eulogised by him were, for example, the general Abû Sa'd Muh. b. Yûsuf al-Marwâzî, who had distinguished himself in the war against Byzantium and in the operations against the Khurramite Bâbak, and his son Yûsuf, killed by the Armenians in 237 while governor of Armenia; Abû Dulaf al-Kâsim al-'Idrîsî, d. 225; Is'hâk b. Ibrahim al-Mus'abî, police chief (*sâb al-djûr*) of Bagdad from 207 to 235; Hasan b. Wahb, secretary to the waif Muh. b. 'Abd al-Malik al-Zayyât was a particular admirer of Abû Tammâm. Abû Tammâm also travelled several times to visit

philologist, and botanist. He even cultivated the art of poetry, since certain of his biographers have reproduced some of his buoche verses, and he has been given the reputation of a confirmed drinker. He has also been depicted as a bibliophile, who preserved his valuable manuscripts in envelopes of fine fabric.

In the religious sphere, Ibn Baḡhkuwāl attributes to him, without giving the title, a work on the 'signs of the prophetic mission' of the Messenger of God (*fi al-ā'im uḥuwwat nabiyyin*). As a philologist, Ibn Khayr (*Fahrasa*, B A H, ix, 325, 326, 341, 342), attributes to him four works: (1) a criticism of Abū 'Alī al-Kullī (*ḡ. 1*), al-Tawḥīd *ḡ. 1*, *Ar-Riḡā' al-ḡ. 1* al-Kullī al-Nawā'id, ed. A. Salhi, 4 vols., Cairo 1344/1926; (2) Brockelmann, S I, 202; (3) a commentary on the *Amālī* of the same, *Sinf al-La'ālī fi Shāh al-Amālī*, ed. 'Abd al-'Azīz Maymān, Cairo 1354/1936; (4) Brockelmann, *loc. cit.*; (5) a commentary on the verses quoted in al-*ḡharīb al-Muḡannaf* of Abū 'Ubayd al-Kāsim b. Sallām, entitled *Sinf al-Maḡallī*; (6) a commentary on the collection of proverbs by the same Abū 'Ubayd b. Sallām, entitled *Faḡl al-Maḡallī fi Shāh Kithāb al-Amālī* (MSS at Istanbul; cf. M. O., vii, 123; Z D M G, 1910; Brockelmann, S I, 106 f. n.). Lastly we may mention another work, semi-historical, semi-philological, which seems to be lost: *al-Ma'ālī wa'l-Muḡallaf* on the names of the Arab tribes.

The botanist work of Abū 'Ubayd al-Bakrī, *Kithāb al-Nabāt*, also indicated by Ibn Khayr, *Fahrasa*, 377, seems not to have been found yet in MS. It has its place, in any case, in the series of Andalusian treatises on descriptive botany, made up of alphabetically-arranged items, and it served as a direct source for the *muḡḡḡ* and naturalist of the 6th/12th century Ibn 'Abdūn (*ḡ. 1*) al-ḡhblī, for the composition of his *Uḡḡḡ al-Taḡḡ fi Shāh al-A'ḡḡ* (cf. M. Asín Palacios, *Glosario de voces romances registradas por un botánico andalusí hispano-musulmán*, Madrid-Granada 1943, xxvii and n. 1). This botanical treatise, which Ibn Abī Usayb'a described in a few lines (cf. M. Meyerhof, *Esquisse d'histoire de la pharmacologie et botanique chez les musulmans d'Espagne*, in *al-And.*, 1935, 141), the same, *Un glossaire de matière médicale de Maimonide*, in *Mém. Inst. d'Égypte*, iii, 1940, xxvii), mainly concentrated, as did that of Ibn 'Abdūn, on the peninsula of al-Andalus; it was made use of not only by the latter, but also by the naturalists al-ḡhblī and Ibn al-Bayḡar.

Abū 'Ubayd al-Bakrī's geographical work, on which his renown in the Arab world was mainly based, consists of two books of unequal length and importance: *Mu'ḡḡam al-ḡḡḡḡ* and *al-Maḡḡḡ* in *T-Maḡḡḡ*. The *Mu'ḡḡam*, which was published by P. Wüstenfeld in an autographed edition (*Das geographische Wörterbuch*, Göttingen, 1876-7; 4 vols, Cairo 1945-51), is a list of toponyms, mostly referring to the *ḡḡḡḡ* al-'Arab, which occur in the poetry of the *ḡḡḡḡ* and the literature of the *ḡḡḡḡ* and the spelling of which had given rise to discussions. This list is preceded by an interesting introduction on the geographical setting of ancient Arabia and the respective habitats of the most important tribes.

As for the *al-Maḡḡḡ*, the main work of al-Bakrī, we have so far only part of it, in the form of extensive fragments, not all of which have yet been published. Of the introductory volume, which deals with general geography and the Muslim and non-Muslim peoples (MS at Paris, B. N., 5503), the greater part is still

unpublished (fragment on the Russians and Slavs published at St. Petersburg in 1878 by A. Kunik and V. Rosen, *Izvestiya al-Bakrī i drugikh avtorov o Rusi i Slavyanakh*, i; cf. also A. Seppel, *Reisen von al-Bakrī*, *Zeitschrift für die Kunde des Islam*, 1878, 1879-1880, 1881, 1882, 1883, 1884, 1885, 1886, 1887, 1888, 1889, 1890, 1891, 1892, 1893, 1894, 1895, 1896, 1897, 1898, 1899, 1900, 1901, 1902, 1903, 1904, 1905, 1906, 1907, 1908, 1909, 1910, 1911, 1912, 1913, 1914, 1915, 1916, 1917, 1918, 1919, 1920, 1921, 1922, 1923, 1924, 1925, 1926, 1927, 1928, 1929, 1930, 1931, 1932, 1933, 1934, 1935, 1936, 1937, 1938, 1939, 1940, 1941, 1942, 1943, 1944, 1945, 1946, 1947, 1948, 1949, 1950, 1951, 1952, 1953, 1954, 1955, 1956, 1957, 1958, 1959, 1960, 1961, 1962, 1963, 1964, 1965, 1966, 1967, 1968, 1969, 1970, 1971, 1972, 1973, 1974, 1975, 1976, 1977, 1978, 1979, 1980, 1981, 1982, 1983, 1984, 1985, 1986, 1987, 1988, 1989, 1990, 1991, 1992, 1993, 1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2633, 2634, 2635, 2636, 2637, 2638, 2639, 2640, 2641, 2642, 2643, 2644, 2645, 2646, 2647, 2648, 2649, 2650, 2651, 2652, 2653, 2654, 2655, 2656, 2657, 2658, 2659, 2660, 2661, 2662, 2663, 2664, 2665, 2666, 2667, 2668, 2669, 2670, 2671, 2672, 2673, 2674, 2675, 2676, 2677, 2678, 2679, 2680, 2681, 2682, 2683, 2684, 2685, 2686, 2687, 2688, 2689, 2690, 2691, 2692, 2693, 2694, 2695, 2696, 2697, 2698, 2699, 2700, 2701, 2702, 2703, 2704, 2705, 2706, 2707, 2708, 2709, 2710, 2711, 2712, 2713, 2714, 2715, 2716, 2717, 2718, 2719, 2720, 2721, 2722, 2723, 2724, 2725, 2726, 2727, 2728, 2729, 2730, 2731, 2732, 2733, 2734, 2735, 2736, 2737, 2738, 2739, 2740, 2741, 2742, 2743, 2744, 2745, 2746, 2747, 2748, 2749, 2750, 2751, 2752, 2753, 2754, 2755, 2756, 2757, 2758, 2759, 2760, 2761, 2762, 2763, 2764, 2765, 2766, 2767, 2768, 2769, 2770, 2771, 2772, 2773, 2774, 2775, 2776, 2777, 2778, 2779, 2780, 2781, 2782, 2783, 2784, 2785, 2786, 2787, 2788, 2789, 2790, 2791, 2792, 2793, 2794, 2795, 2796, 2797, 2798, 2799, 2800, 2801, 2802, 2803, 2804, 2805, 2806, 2807, 2808, 2809, 2810, 2811, 2812, 2813, 2814, 2815, 2816, 2817, 2818, 2819, 2820, 2821, 2822, 2823, 2824, 2825, 2826, 2827, 2828, 2829, 2830, 2831, 2832, 2833, 2834, 2835, 2836, 2837, 2838, 2839, 2840, 2841, 2842, 2843, 2844, 2845, 2846, 2847, 2848, 2849, 2850, 2851, 2852, 2853, 2854, 2855, 2856, 2857, 2858, 2859, 2860, 2861, 2862, 2863, 2864, 2865, 2866, 2867, 2868, 2869, 2870, 2871, 2872, 2873, 2874, 2875, 2876, 2877, 2878, 2879, 2880, 2881, 2882, 2883, 2884, 2885, 2886, 2887, 2888, 2889, 2890, 2891, 2892, 2893, 2894, 2895, 2896, 2897, 2898, 2899, 2900, 2901, 2902, 2903, 2904, 2905, 2906, 2907, 2908, 2909, 2910, 2911, 2912, 2913, 2914, 2915, 2916, 2917, 2918, 2919, 2920, 2921, 2922, 2923, 2924, 2925, 2926, 2927, 2928, 2929, 2930, 2931, 2932, 2933, 2934, 2935, 2936, 2937, 2938, 2939, 2940, 2941, 2942, 2943, 2944, 2945, 2946, 2947, 2948, 2949, 2950, 2951, 2952, 2953, 2954, 2955, 2956, 2957, 2958, 2959, 2960, 2961, 2962, 2963, 2964, 2965, 2966, 2967, 2968, 2969, 2970, 2971, 2972, 2973, 2974, 2975, 2976, 2977, 2978, 2979, 2980, 2981, 2982, 2983, 2984, 2985, 2986, 2987, 2988, 2989, 2990, 2991, 2992, 2993, 2994, 2995, 2996, 2997, 2998, 2999, 3000, 3001, 3002, 3003, 3004, 3005, 3006, 3007, 3008, 3009, 3010, 3011, 3012, 3013, 3014, 3015, 3016, 3017, 3018, 3019, 3020, 3021, 3022, 3023, 3024, 3025, 3026, 3027, 3028, 3029, 3030, 3031, 3032, 3033, 3034, 3035, 3036, 3037, 3038, 3039, 3040, 3041, 3042, 3043, 3044, 3045, 3046, 3047, 3048, 3049, 3050, 3051, 3052, 3053, 3054, 3055, 3056, 3057, 3058, 3059, 3060, 3061, 3062, 3063, 3064, 3065, 3066, 3067, 3068, 3069, 3070, 3071, 3072, 3073, 3074, 3075, 3076, 3077, 3078, 3079, 3080, 3081, 3082, 3083, 3084, 3085, 3086, 3087, 3088, 3089, 3090, 3091, 3092, 3093, 3094, 3095, 3096, 3097, 3098, 3099, 3100, 3101, 3102, 3103, 3104, 3105, 3106, 3107, 3108, 3109, 3110, 3111, 3112, 3113, 3114, 3115, 3116, 3117, 3118, 3119, 3120, 3121, 3122, 3123, 3124, 3125, 3126, 3127, 3128, 3129, 3130, 3131, 3132, 3133, 3134, 3135, 3136, 3137, 3138, 3139, 3140, 3141, 3142, 3143, 3144, 3145, 3146, 3147, 3148, 3149, 3150, 3151, 3152, 3153, 3154, 3155, 3156, 3157, 3158, 3159, 3160, 3161, 3162, 3163, 3164, 3165, 3166, 3167, 3168, 3169, 3170, 3171, 3172, 3173, 3174, 3175, 3176, 3177, 3178, 3179, 3180, 3181, 3182, 3183, 3184, 3185, 3186, 3187, 3188, 3189, 3190, 3191, 3192, 3193, 3194, 3195, 3196, 3197, 3198, 3199, 3200, 3201, 3202, 3203, 3204, 3205, 3206, 3207, 3208, 3209, 3210, 3211, 3212, 3213, 3214, 3215, 3216, 3217, 3218, 3219, 3220, 3221, 3222, 3223, 3224, 3225, 3226, 3227, 3228, 3229, 3230, 3231, 3232, 3233, 3234, 3235, 3236, 3237, 3238, 3239, 3240, 3241, 3242, 3243, 3244, 3245, 3246, 3247, 3248, 3249, 3250, 3251, 3252, 3253, 3254, 3255, 3256, 3257, 3258, 3259, 3260, 3261, 3262, 3263, 3264, 3265, 3266, 3267, 3268, 3269, 3270, 3271, 3272, 3273, 3274, 3275, 3276, 3277, 3278, 3279, 3280, 3281, 3282, 3283, 3284, 3285, 3286, 3287, 3288, 3289, 3290, 3291, 3292, 3293, 3294, 3295, 3296, 3297, 3298, 3299, 3300, 3301, 3302, 3303, 3304, 3305, 3306, 3307, 3308, 3309, 3310, 3311, 3312, 3313, 3314, 3315, 3316, 3317, 3318, 3319, 3320, 3321, 3322, 3323, 3324, 3325, 3326, 3327, 3328, 3329, 3330, 3331, 3332, 3333, 3334, 3335, 3336, 3337, 3338, 3339, 3340, 3341, 3342, 3343, 3344, 3345, 3346, 3347, 3348, 3349, 3350, 3351, 3352, 3353, 3354, 3355, 3356, 3357, 3358, 3359, 3360, 3361, 3362, 3363, 3364, 3365, 3366, 3367, 3368, 3369, 3370, 3371, 3372, 3373, 3374, 3375, 3376, 3377, 3378, 3379, 3380, 3381, 3382, 3383, 3384, 3385, 3386, 3387, 3388, 3389, 3390, 3391, 3392, 3393, 3394, 3395, 3396, 3397, 3398, 3399, 3400, 3401, 3402, 3403, 3404, 3405, 3406, 3407, 3408, 3409, 3410, 3411, 3412, 3413, 3414, 3415, 3416, 3417, 3418, 3419, 3420, 3421, 3422, 3423, 3424, 3425, 3426, 3427, 3428, 3429, 3430, 3431, 3432, 3433, 3434, 3435, 3436, 3437, 3438, 3439, 3440, 3441, 3442, 3443, 3444, 3445, 3446, 3447, 3448, 3449, 3450, 3451, 3452, 3453, 3454, 3455, 3456, 3457, 3458, 3459, 3460, 3461, 3462, 3463, 3464, 3465, 3466, 3467, 3468, 3469, 3470, 3471, 3472, 3473, 3474, 3475, 3476, 3477, 3478, 3479, 3480, 3481, 3482, 3483, 3484, 3485, 3486, 3487, 3488, 3489, 3490, 3491, 3492, 3493, 3494, 3495, 3496, 3497, 3498, 3499, 3500, 3501, 3502, 3503, 3504, 3505, 3506, 3507, 3508, 3509, 3510, 3511, 3512, 3513, 3514, 3515, 3516, 3517, 3518, 3519, 3520, 3521, 3522, 3523, 3524, 3525, 3526, 3527, 3528, 3529, 3530, 3531, 3532, 3533, 3534, 3535, 3536, 3537, 3538, 3539, 3540, 3541, 3542, 3543, 3544, 3545, 3546, 3547, 3548, 3549, 3550, 3551, 3552, 3553, 3554, 3555, 3556, 3557, 3558, 3559, 3560, 3561, 3562, 3563, 3564, 3565, 3566, 3567, 3568, 3569, 3570, 3571, 3572, 3573, 3574, 3575, 3576, 3577, 3578, 3579, 3580, 3581, 3582, 3583, 3584, 3585, 3586, 3587, 3588, 3589, 3590, 3591, 3592, 3593, 3594, 3595, 3596, 3597, 3598, 3599, 3600, 3601, 3602, 3603, 3604, 3605, 3606, 3607, 3608, 3609, 3610, 3611, 3612, 3613, 3614, 3615, 3616, 3617, 3618, 3619, 3620, 3621, 3622, 3623, 3624, 3625, 3626, 3627, 3628, 3629, 3630, 3631, 3632, 3633, 3634, 3635, 3636, 3637, 3638, 3639, 3640, 3641,

have it, but of his descendants, viz. Khuraym b. 'Amr and his son 'Ughmā (see Ibn 'Asākir, *Ta'rikh*, ii, 434-7; v, 126-8). He seems to have lived in Mesopotamia, Syria, al-Basra, where he frequented dissolute poets such as Hammād 'Adhrā, Muṭṭi b. Yūsuf etc. (*Aghāni*, x, 179; xii, 82), and finally in Baghdad. In Baghdad he was connected with the entourage of al-Raḡibī (*Aghāni*, xi, 21-2) and especially with the Barmakids Yahyā al-Khatib, *Ta'rikh Baghdad*, vi, 326), al-Faḍl al-Dīnabīyārī, *al-Wuṣūl*, 150r) and Dja'far (*Aghāni*, xi, 21-2), as well as with their secretaries al-Ḥasan b. Bahbāh al-Baḡhī and Muḥammad b. Mansūr b. Ziyād (Ibn al-Djarrāb, 101; al-Djabbīyārī, 118; 170r). During the conflict between al-ʿAmīn and al-Ma'mūn, he took the part of the former (al-Mas'ūdī, *Murūj*, vi, 462-3) and composed during the siege of Baghdad a long *ḥusdā* (al-Tabarī, iii, 873-80) in which he described the destruction of the city and besought al-Ma'mūn to put an end to the fratricidal war.

The work of al-Khuraymī, known even in the Maghrib (cf. al-Buṭṭi, *Zahr* (Z. Muḥarrar), iv, 201; Ibn Shārazī, *Intihād* (Pellat), Algiers 1953, index) was no doubt more important than would appear from the *ḥusdā* quoted above and from verses scattered in books of history and *adab*. Though he composed some satires, some of which were sung by 'Allawayh (Ibn al-Djarrāb, 101; *Aghāni*, x, 120-33), al-Khuraymī is the foremost place an author of panegyrics (the *shams* of their object being dictated by self-interest) and of dirges on persons with whom he was connected, especially Muhammad b. Mansūr b. Ziyād and the members of Khuraym's family (Ibn 'Asākir, loc. cit.). At the end of his life, the loss of his second eye (he had been one-eyed before) and is sometimes called al-A'war) inspired him to moving verses (al-Djabbīyārī, *Hayasun*, iii, 113; vi, 111-2; *Aghāni*, xv, 109; al-Safadi, *Nahr al-Hind*, 72).

The critics admit al-Khuraymī's talent and state that his poetry was especially enjoyed by the secretaries of the bureau—no doubt because of his non-Arab origin; though he does not seem to have played a role among the Shī'īs.

**ABŪ YA'KŪB** IḤSĀN B. AHMAD AL-SIDJĪ, IḤSĀNĪ d.471 and one of the sect's most important authors. According to Raḡibī al-Dīn (*Djām*) *al-Tawārīkh*, MS Brit. Mus., Add. 7628, fol. 277r, "after that time"—viz. the execution of al-Nasafī in Buḡhārā, 317/942—"Iḥṣān al-Sidjī, nicknamed Khayshafānī, fell into the hands of the *amir* Khāḍf b. Iḥṣān (cf. MS, read Ahmad al-Sidjī). (Khāḍf b. Ahmad, of the "second" Saffārid dynasty, ruled 349-92). This probably implies that Abū Ya'kūb was killed by the *amir* Khāḍf. (According to W. Ivanow, *Studies in Early Persian Ismailism*, 119, note 1, his book *al-Iḥṣān* must be dated, by internal evidence—not, however, specified—after 360/974.) At any rate, the usual statement that Ya'kūb was executed in 331 in Buḡhārā together with al-Nasafī, turns out to be erroneous. (The

nickname Khayshafānī for Abū Ya'kūb—read conjecturally, as there are no points in the MSS; it is probably the word for 'cotton-seed', cf. Dozy, i, 417—occurs also in al-Bustī's refutation of Ismāʿilism, MS Ambrosiana, coll. Griffini 41, to be analysed by the present writer.)

Of the many surviving books of Abū Ya'kūb, the principal one of which seems to be *al-Iḥṣān*, only one, the *Kaṣf al-Maḡhīb*, has been published (by H. Corbin, Teheran 1949), not in the Arabic original, which is lost, but according to a Persian version. A close study of Abū Ya'kūb's works is absolutely necessary, as he is our main authority for the doctrine of the philosophical wing of Ismāʿilism in the 4th/10th century. It seems that the system expounded by Abū Ya'kūb was on the whole based on that of al-Nasafī [q.v.], who seems to have been the one who introduced Neoplatonic philosophy into Ismāʿilism about 300 A.H. (Abū Ya'kūb composed a book, unfortunately lost, in defence of al-Nasafī's main work, *al-Mabād*, against the attacks of Abū Ḥātim al-Rāzī). However, while the system of al-Nasafī can only be reconstructed from sparse quotations, in its main lines, the preserved books of Abū Ya'kūb allow us to study the system, in the form exposed by him, in all desirable detail.

**Bibliography:** *Baghdādī*, *Faḥḥ*, 267; *Birūnī*, *Hind*, 32; W. Ivanow, *A Guide to Ismaili Literature*, 33-5; idem, *Studies in Early Persian Ismailism*, index.—It is doubtful if Abū Ya'kūb al-Sidjī is the same person as Abū Ya'kūb, d.471 of Rayy about the middle of the 4th/10th century, mentioned in *Fihrist*, 189, 190. (S. M. STREUS)

**ABŪ YA'KŪB YŪSUF** a. 'Abū al-Mu'min, second ruler of the Mu'minid (g.s.) (Almohad) dynasty, reigned 558-60/1163-84. He succeeded to the throne by a coup d'état, in spite of the official proclamation of his elder brother Muhammad as crown-prince in 549/1154. It is true that Muhammad ruled for about two months, a fact that has been passed over in silence by almost all the historians of the dynasty; but the powerful vizier 'Umar b. 'Abd al-Mu'min, alleging that his father, four days before his death, had ordered the name of the heir-presumptive to be suppressed in the *ḥuḡḡa*, and that he had declared to himself ('Umar) on his death-bed that he wished Yūsuf to succeed him, summoned Yūsuf in all haste from Seville, where he had resided as governor for the last six years, and had him proclaimed by the *shaykh* and the army, in Ribāt al-Faḥḥ (Rabat), as the new caliph.

The accession of Yūsuf was by no means received with unanimous approval. His brother 'Aḥmad, governor of Fez, who went to bury his father in Tinnimal, protested against this arbitrary nomination, but died mysteriously on his return from the Atlas. Two other brothers, 'Abd Allāh, governor of Bidjāya, who died shortly afterwards by poison, and 'Uthmān, governor of Cordova, also refused to recognise him. Thus Yūsuf did not dare to take the caliphal title of *amir al-mu'minin*, but confined himself for five years to the title of *amir al-muslimin*.

Establishing himself in Marrākuḡh, after dismissing the enormous army concentrated by his father in Rabat, Yūsuf had to suppress a revolt that broke out among the Ghumāra, between Ceuta and Alcazarcquivir, while the *sayyids* 'Umar and 'Uthmān were leading a vigorous campaign in al-Andalus against the Mardaniḡh (g.s.) and his Christian mercenaries. Invading his territory, they defeated his army in 560/1165, ten miles outside Murcia. The

city resisted, however, and preserved its independence for another five years.

When the hostile *sayyids* had submitted or had been eliminated, Ibn Mardaniḡh had been defeated and the revolt of the Ghumāra had been suppressed, Yūsuf assumed in 563/1168 the caliphal title. Yet at the very moment that his proclamation was celebrated, the warlike title state of Portugal caused him grave concern. Giraldo sem Pavor, the famous captain of Afonso Henriques, captured the towns of Évora, Trujillo, Cáceres, Montánchez, Serpa and Juroemeha, and laid siege, together with his king, to Badajoz, which could be saved only by the intervention of Ferdinand II of León, the ally of the Almohads.

The problem of Ibn Mardaniḡh in the Levante resolved itself almost spontaneously. Ibn Hamuḡhū, lieutenant and father-in-law of Ibn Mardaniḡh, quarrelled with him and submitted to the Almohads. Yūsuf then mobilised all his forces and crossed the Straits. Murcia was regularly besieged, Yūsuf conducting the operations from his headquarters in Cordova. The city could not be taken, but the troops of Ibn Mardaniḡh deserted him one after the other and his cruelty lost him his last partisans. He died of chagrin, seeing the whole of his work undone (567/1172). His eldest son Hūl and all his brothers soon joined the doctrine of the *ṭawḡid* and submitted to Yūsuf, who received them well and admitted them into his council.

When the latter came to Seville, they suggested to Yūsuf to lay siege to Huete (Valladolid), which had been recently repopulated by Christians and had become a menace to Cuenca and the frontier of the Levante. Yūsuf left Seville, took Vilches and Alcaraz, and marching through the plain of Albacete, reached Huete in July. The siege at once revealed the caliph's lack of energy and the hesitant and unwarlike spirit of his troops, who failed completely. It seemed that the besieged, who withstood courageously the Almohad attacks, would have to surrender owing to lack of water, but violent summer storms filled their cisterns and threw the enemy's camp into disorder. Owing to lack of food and the approach of the Castilian army, the Almohads lifted the siege and returned, via Cuenca, Játiva, Elche and Orihuela, to Murcia; there the army was disbanded. Yūsuf rested in Seville during the winter of 568/1172-3. But the count Jimeno "the hunchback" (*al-aḡḡab*), who, with the men of Avila, had caused severe damage in the valley of the Guadalquivir, penetrated, in Shā'ban 568/April 1173, into the region of Ecija and took enormous booty. The troops that had come back from Huete were collected again, and the indefatigable Abū Ḥafs 'Umar Inti [q.v.], together with the two brothers of the caliph, Yahyā and Ismāʿīl, overtook the count near Caracac, defeated and killed him. Subsequently, Badajoz was furnished with supplies and the whole left bank of the Tagus ravaged, from Talavera to Toledo; in consequence, Afonso Henriques, on behalf of Portugal, and the count Nuño de Lara, on behalf of Castile, were compelled to ask for and to sign an armistice for five years. The winter of 569/1173-4 was spent in reuniting and fortifying Beja, in the Algarve, which had been ruined and evacuated two years before.

Later, Yūsuf celebrated with splendour his marriage with a daughter of Ibn Mardaniḡh, and during the whole year of 570/1175 did not leave Seville. This second stay of Yūsuf in al-Andalus had already lasted almost five years when he suddenly left for Marrākuḡh.

Encyclopaedia of Islam

At this time a severe epidemic was raging over the whole empire. Yūsuf lost several of his brothers and he himself remained ill for a long time while Alfonso VIII was besieging Cuenca and, after nine months, in October 1177, forced this famous fortress to surrender. The garrisons of Cordova and Seville tried to relieve it by a diversionary move towards Talavera and Toledo, but with no practical results. After the loss of Cuenca, Yūsuf, who had recovered his health, consulted with his brothers, the governors of Cordova and Seville, on ways and means to cut short the ever-increasing aggressiveness of the Christians. The armistice with Portugal had expired and the crown-prince, Sancho, earned his spurs by invading the valley of the lower Guadalquivir, attacking Triana, then Niebla and the whole of the Algarve. Beja had again to be evacuated.

Yūsuf found no other way to withstand these attacks but to transport to Morocco and al-Andalus the Arabs of Ifrikiya, but seeing that they were becoming more and more turbulent, under the leadership of 'All, a descendant of the Banu 'l-Rand, lords of Kaṣa [q.v.] (Gaza), who had revolted there, he took the field to stifle that dangerous centre of disaffection and to force the Arabs to join the holy war in Spain. He left Marrākuḡh for Ifrikiya, and after a siege of three months took Kaṣa, in the winter of 576/1180-1. 'All, surnamed al-Tawfi, capitulated and the Riyyāh pretended to submit. Only a small section of them, however, followed Yūsuf; the greater part remained in Ifrikiya, ready to support any attempt at revolt against the Almohads, and to lend assistance to Karāḡhish [q.v.] and the Banū Ghāniya [q.v.].

In the meantime, in the Iberian peninsula, an advance of Alfonso VIII towards Ecija and the taking of Santafila, near Lora del Río, coincided with a Portuguese invasion towards San Lucar la Mayor, Aznalcázar and Niebla, and with the revolt in the Anti-Atlas of the Banū Wawarziḡ, who occupied the silver mine of Zaḡundar. The caliph had to go in person to subdue the rebels, while Ibn Wawdūl led a *razzia* against Talavera. Finally Yūsuf, after undertaking the extension of Marrākuḡh to the southward and enlarging the walls during the summer of 579/1185—an enterprise continued later by his son, Ya'kūb, by the building of the imperial quarter of al-Sillā—decided, in spite of the discouraging example of Huete, to engage all his forces in a campaign designed to put a brake to the audacity of the Portuguese.

The preparations for the expedition and the concentration of the troops were very ample, but also took a long time. In May, Castile and León had concluded the peace of Fresno-Lavandera and engaged themselves to fight together against the Muslims—Ferdinand on his part renouncing his old alliance with the Almohads. Three months later, Yūsuf started collecting his troops. On 16 Rabī' I 580/27 June 1184, he appeared before Santarém (Zhanartun). The Portuguese had had about ten months to prepare the defence of the fortress, almost impregnable without a long siege. It cost the Almohads much trouble to take the suburb near the river, and at the end of a week's useless efforts and tenacious resistance, the approach of Ferdinand II with his Leonese spread terror in the Almohad army which, in panic, re-crossed the river. The caliph was mortally wounded when raising camp and died near Évora, on the road to Seville, on 18 Rabī' II 580/29 July 1184.

Abū Ya'kūb Yūsuf was considered as the most

gifted of the Almohad caliphs. The son of a Maṣnūnī woman—the daughter of the *khān* Ibn 'Imrān—and born in the heart of the Atlas, in Tlemcen, he was instructed in Marrākush in the doctrine of the *tawhīd*. Nevertheless, in spite of his Maghribī birth and education, his long stay in Seville, where he arrived at the age of seventeen years, made of him an Andalusian litterateur as refined as one of the *muḥall* al-*ṭawā'if*. Surrounded by famous philosophers, physicians and poets, he perfected his literary knowledge and developed his artistic taste. Seduced by the charms of Seville, he gave it back the title of capital of al-Andalus, which had been taken away by his father at the end of his reign, and endowed it with numerous monuments and public works. He took pleasure in taking part in the scientific meetings adorned by men like Ibn Tufayl, Ibn Raḡd and Ibn Zahr, who, encouraged by him, produced their most celebrated works.

At the same time, thanks to the terror with which his father had imposed his authority, this friend of scholarship was able to enjoy an absolute power in the Maghrib. Ifrikiya was still under his control and the dangerous enclave of Ibn Mardānīsh in Murcia disappeared. Yet in spite of appearances, the ceaseless war against the Christians in al-Andalus made manifest his incapacity as a military leader, the low morale of his enormous armies and the inefficiency of his commissariat. The small Christian states of the Peninsula, though divided by internal quarrels, could, in spite of their lack of men and resources, inflict on him the severest reverses. His urgent desire to pursue the *ghilāt* did not suffice to check the Christian drive, and led to his death before the Portuguese castle of Santarém.

ABU L-YAKZAN MUHAMMAD B. AL-AFLAH (see BIṢṬĀMĪ).

ABŪ YA'KŪB AL-FARRĀ' [see Ibn AL-FARRĀ'].

ABŪ YAẒĪD (Bisaton) [Yazīd b. 'Aṣ]. b. Sūnḡān AL-BIṢṬĀMĪ, one of the most celebrated Islamic mystics. With the exception of short periods, during which he was obliged to live far from his home town owing to the hostility of orthodox theologians, he spent his life in Biṣṭām in the province of Kūmīs. There he died in 265/873 or 267/875-8. The Iḡhādī al-Jayṣi Muḥammad Khūdhūdā is reported to have had him done erected over his grave in the year 733/1333. He wrote nothing, but some five hundred of his sayings have been handed down. In part they are extremely daring and imply a state of mind in which the mystic has as experience of himself as of one merged with the deity and turned into God (*ayn al-dīqā'*). They were collected and handed down by his circle and people who visited him, in the first place by his disciple and attendant Abū Mūsā (I) 'Aṣ b. Adam, son of his elder brother Adam. When the celebrated ṣūfi of Baghdad, al-Dīnawarī, received sayings of this nature in Persian and translated them into Arabic (*Nūr*, 108, 109, 122). The chief traditionist from Abū Mūsā is his son Mūsā b.

'Aṣ, known as "Amūd", from whom the tradition was handed down by "the lesser Tayfūr" b. 'Aṣ, whose place in the family genealogy is not quite clear, and by other traditionists. Among the visitors who recorded sayings of Abū YaẒīd must be named in the first place Abū Mūsā (II) al-Dahlī, of Dahlī in Armenia (*Nūr*, 35) and Abū Ishāq Ibrāhīm al-Harawī, known as Iṣṭanba (Satanba), a pupil of Ibrāhīm b. Adham (*Hilya*, s, 43-4) and the celebrated ṣūfi Ahmad b. Khidrīya who visited him on the pilgrimage. Abū YaẒīd was a friend of Dhū l-Nūn al-Misrī. Dīnawarī wrote a commentary on his utterances, portions of which are preserved in al-Luma' of al-Sarrāḡ. The most circumstantial source on Abū YaẒīd's life and sayings is the *Kitāb al-Nūr fi Kalimat Abi Yazid Tayfur*, by Abu l-Faḡl Mub. b. 'Alī b. Ahmad b. al-Husayn b. Saḥl al-Sahlaḡ al-Bisṭāmī, born 389/998-9, died 476/984 (not quite satisfactory edition by 'Abd al-Rahmān Badawī, *Zuhd al-Sūfiyya*, I, Cairo 1949). Amongst al-Sahlaḡ's authorities the most important are: Abū 'Abd Allāh Mub. b. 'Abd Allāh al-Shīrāzī Ibn Bāḡhā, the celebrated biographer of al-Hallāḡ, died 442/1050, whom al-Sahlaḡ met in the year 419 or 416 (Nūr, 138) and Shāwḡb al-Maḡhribī Abū 'Abd Allāh Muḥammad b. 'Alī al-Bisṭāmī (Hudjwiri, *Kashf al-Maḡhīb*, ch. xii). The al-Kawā'id edition of the 1560-Dīnawarī contains a legendary embellishment of Abū YaẒīd's "Journey to Heaven" (R. A. Nicholson, *An early Arabic version of the Mēraj of Abū YaẒīd al-Bisṭāmī*, in *Islamic*, 1926, 402-15).

Abū YaẒīd's teacher in *yūṣuf* was a mystic who was ignorant of Arabic, by name Abū 'Alī al-Sinnārī, whom he had to teach the Kur'ān verses necessary for prayer, but who in return introduced him to the *Unio Mystica*. It is not impossible that Indian influences may have affected Abū YaẒīd through him. Abū YaẒīd was, in contrast for instance with the later ṣūfis Abū Ishāq al-Kāzīmī and Abū Sa'īd b. Abī l-Khayr, a wholly introverted ṣūfi. He did not exercise, as they did, a social activity (*ghāmat al-fukarā'*), yet was ready to save humanity by vicarious suffering, from hell, even finds words to criticize the infernal punishment meted out to the damned, who are, after all, but a handful of dust. The "numinous" sense is extremely highly developed in him, together with a sense of horror and awe before the Deity, in whose presence he always felt himself an unbeliever, just about to lay aside the garb of the magicians (*ṣawā'id*). His passionate aspiration is aimed at absolutely fusing himself through systematic work upon himself "the wasmith of my own self": *ḥaddād naṣf*, of all obstacles separating him from God (*ghayb*), with the object of "attaining to Him". He describes this process in extremely interesting autobiographical sayings with partly grandiose images. The "world" (*dunyā*), "flight from the world" (*ṭawā'*), "worship of God" (*ibādāt*), nirvana (*ḥaqīqat*), *ghībr*, even the mystical stages (*maḥallāt*) are for him no more than so many barriers holding him from God. When he has finally shed his "I" in *fanā'* "as snakes their skin" and reached the desired stage, his changed self-consciousness is expressed in those famous hybrid utterances (*ghalāt*) which so scandalized and shocked his contemporaries: "Subḥānī Mā a'-ṣama ḡa'-ḡalī" "Glory be to me! How great is My majesty!" "Thy obedience to me is greater than my obedience to Thee"; "I am the throne and the footstool"; "I am the Well-preserved Tablet"; "I saw the Ka'ba walking round me"; and so on. In meditation he made flights into the supersensible

world; these earned him the censure that he claimed to have experienced a *ma'rāḡ* in the same way as the Prophet. He was in the course of them decorated by God with His Singulars (*muḥallāt*) and clothed with His "I-ness" (*anā'iyya*), but shrank from showing himself in that state to men; or flew with the wings of everlastingness (*daymūmiyya*) through the air of "no-quality" (*lā-hay'iyya*) to the ground of eternity (*azālīyya*) and saw the tree of "one-ness" (*ahādīyya*), to realise that "all that was illusion" or that it "was himself" who was all that, etc. In such utterances he appears to have reached the ultimate problem of all mysticism. A later legend makes him solve with ease conundrums put to him in a Christian monastery, thus effecting the wholesale conversion of the monastery to Islam.

(H. RITTER)

ABŪ YAẒĪD MAḤMAD B. KAYDĀD AL-NUKKĀRĪ, Kh. Arīḡidī leader (belonging to the Iḡhād al-Nukkārī [g.n.]), who by his revolt shook the Fāṭmīd realm in North Africa to its foundations. His father, a Zanāta Berber merchant (or Tūzar) in the district of Kastīliya, bought in Tadmakkāt a slave girl called Saḥība, who bore him Abū YaẒīd about 270/883 (apparently in the Sūdān). Abū YaẒīd studied the Iḡhādī *maḡhāb* and became a schoolmaster in Tāhārt. At the time of the victory of Abū 'Abd Allāh al-Shīrī he moved to Takrūt and started, in 316/928, his anti-government propaganda. After a first arrest, when he was, however, immediately released, he went to the Awrās mountain among the Hawwāra clan of the Banū Kamīlān, among whom he gained a large following (they remained to the end his staunchest supporters); the Nukkārī *imām* Abū 'Ammār al-A'mā' ceded to him the leadership. Abū YaẒīd was arrested in Tūzar, but Abū 'Ammār broke into the prison and liberated him. He spent a year in the district of Sumṣīra, after which he returned to the Awrās.

In 317/931 he started his revolt. He took Tabassa and Marmāḡianna (where he received as a present his favourite riding donkey, whence his surname *shūb al-himār*), al-Urbus (Taribus; 15 Dhū l-Hijja

332), Bāḡja (13 Muharram 333), and entered al-Kayrawān on 23 Safar, executing the Fāṭmīd commander 'Izzat b. Iḡhād and the *khāṭ* of the city. The Sumāḡ of al-Kayrawān were at first not unsympathetic to one who, though a heretic himself, liberated them from Fāṭmīd rule (for the attitude of the Mālikī *fukahā'* cf. Abū Bakr al-Mālikī, *Riyāḡ al-Nufūs*, analyzed by H. R. Idris, in *REI*, 1936, 80-7; Abu l-'Arab, ed. Ben Cheneb (*Clés des Savants de l'Ifrīqiya*), introd., viii f., xvii); but the execution of the Berbers alienated them more and more. On the other hand the stricter sectarians became not a little dissatisfied when they saw their leader abandon his former simple habits, wear silken garments and mount a thoroughbred horse.

Leaving his son Faḡl and Abū 'Ammār in al-Kayrawān, Abū YaẒīd engaged and defeated, on 12 Raḡb I, the Fāṭmīd general Maṣṣūr (whom he killed) and approached al-Mahdiyya. After an attempt to take the city by storm (3 Dhuḡdā II), during which he reached the *muṣallā* (according to a celebrated Fāṭmīd legend, it had been foretold by al-Mahdī that a future, very dangerous, rebel would reach that *muṣallā*, but would not get farther), he laid siege to it. After repeated attempts throughout Dhuḡdā II, Raḡjāb and Shāwḡl to storm the city, and after counterattacks by the besieged in Dhū l-Kāḡa 333 and Safar 334, Abū YaẒīd withdrew to al-Kayrawān. He made repentance for his luxury and returned to his former simple life; and so the Berbers again flocked to his standard. Heavy fighting went on round Tūnis (which changed hands several times) and Bāḡja; in Raḡb II Ayyūb, a son of Abū YaẒīd, was seriously defeated by the Fāṭmīd general al-Hasan b. 'Alī but soon took his revenge. Al-Hasan retired to the Kutāma country, and established himself firmly (taking Tāḡma and Bāḡhā) in the rear of Abū YaẒīd. On 6 Dhuḡdā II Abū YaẒīd laid siege to Sūsa. Al-Kā'im died on 23 Shawḡl, and a small cavalry detachment sent out from al-Mahdiyya by his successor, al-Manṣūr, succeeded in routing Abū YaẒīd before Sūsa (21 Shawḡl, so that he hastily returned to al-Kayrawān. In the meantime, the populace of al-Kayrawān had risen against Abū 'Ammār and now excluded Abū YaẒīd from the city. Al-Manṣūr entered al-Kayrawān on 23 Shawḡl; after several futile attacks on the Fāṭmīd army entrenched in the city (Dhū l-Kāḡa 334, Muharram 335) and after a heavy battle on 23 Muharram, Abū YaẒīd withdrew towards the west. Al-Hasan b. 'Alī moved against some of the remaining garrisons of Abū YaẒīd (such as that in Bāḡja) and joined the army of al-Manṣūr. The fleet of the Umayyad admiral Ibn Rumāḡis, which was on its way to Ifrikiya, turned back on the news of Abū YaẒīd's rout. (For the embassies of Abū YaẒīd to 'Abd al-Rahmān III, cf. also Ibn 'Idhārī, ii, 248 ff.; E. Lévi-Provençal, *Hist. Esp. med.*, ii, 103-4.)

Abū YaẒīd fled westwards, al-Manṣūr close on his heels. Al-Manṣūr left al-Kayrawān on 26 Raḡb I, reached (via Saḥība and Marmāḡianna) Bāḡhāya, and from there pursued Abū YaẒīd to Billuzna, Tubna and Biakra (which he reached on 3 Dhuḡdā II). From there he returned to Tubna, defeated Abū YaẒīd near Makḡara (12 Dhuḡdā II) and entered al-Mahdiyya. Abū YaẒīd fled to Dhabal Sūḡā, when al-Manṣūr searching for him in vain in that wild country, went westwards to the Shūḡhāja country. Abū YaẒīd, in the rear of al-Manṣūr, besieged al-Masla. Al-Manṣūr returned and entered al-Masla on 3 Raḡjāb, on which Abū YaẒīd took refuge in the mountains of 'Akkr and Kiyāna. Leaving al-

Masla on 10 Šahān, al-Manṣūr defeated Abū Yazid in a heavy battle; in Ramaḍān, he again defeated Abū Yazid, who retired to the fortress of Kīyāna (overlooking what was later to be Kal'at Banī Hammād). On 2 Shawwāl al-Manṣūr besieged the fortress, which was entered on 20 Muharram 330; at night, the last remaining warriors carried Abū Yazid and Abū 'Annār from the citadel. Abū 'Annār was killed, while Abū Yazid had a fall and was captured. The curious conversation that passed between al-Manṣūr and his captive has been recorded. Abū Yazid died of his wounds in 27 Muharram/19 August 947. His body, stuffed with straw, was exposed to the insults of the mob in al-Mahdiyya. Fadl, the son of Abū Yazid, gave some further trouble in the Awrāṣ and the district of Kafsa, till he was defeated and killed in Dhū 'l-Ka'da 336. Other sons of Abū Yazid found a shelter at the court of the Umayyads in Cordova.

**Bibliography:** The main source is a contemporary Fātimid chronicle of which the substance has been preserved in Idris 'Imīd al-Dīn, *Uyūn al-Akhbār*, second half of vol. v. The same chronicle was used by Ibn al-Rāṣik in his lost history of Ifrīqiya. The whole account of Ibn Hammād (Vanderleyden), 18 ff., is no doubt taken from Ibn al-Rāṣik. Ibn Shaddād, in his lost history of al-Kayrawān, also no doubt copied from Ibn al-Rāṣik, while Ibn al-Aṣṣī's account, viii, 315 ff., still seems recognizable as an abridgement of the Fātimid chronicle, evidently goes back to Ibn Shaddād. The passages in Ṭiqṣ al-Riḥla, Tunis 1927, 17, 18-9, 20-1, 232-5 (transl. in *JA*, 1852, 96 ff., 101 ff., 106 ff., 1953, 363 ff.) are taken from Ibn al-Rāṣik.—Further references: Abū Zakariyyā<sup>3</sup> (*Chronique d'Abou Zakaria*, transl. Masqueray), Algiers 1879, 226 ff.; Ibn 'Udhayr, *al-Bayān al-Magrib* (Cohn and Lévi-Provençal), I, 316 (quotes Ibn Hammād—6th/12th century, not identical with the Ibn Hammād quoted above—Ibn Sa'dūn and Ibn al-Rāṣik); Makrīfī, *Inṣāf* (Buzas), while mainly deriving from Ibn al-Aṣṣī, has some additional notes (55, 56-7).—Cf. also G. Marçais, *La Berbérie d'Orient*, 147-53; R. Le Tourneau, *La révolte d'Abū Yazid, Cahiers de Tunisie*, 1953, 103-125. (S. M. STUART)

**ABŪ YŪSUF** YA'KŪB b. Ibrāhīm al-Aṣṣāḥī AL-Kaṣrī, a prominent religious lawyer, one of the founders of the Hanafī [q.v.] school of law, Abū Yūsuf was of pure Arab extraction; his ancestor, Sa'd b. Habiba, was a youth in Medina in the time of the Prophet. (For details of his genealogy, see al-Khaṭīb al-Baghḍādī, xiv, 241.) His date of birth, reckoned backwards from the date of his death, is rather arbitrarily given as 713. According to an anecdote, the several versions of which are mutually contradictory, he was a poor boy, was helped by his teacher Abū Hanīfa [q.v.] who recognized his worth, and achieved success beyond every expectation. All we know is that he studied religious law and traditions in Kūfa and in Medina, under Abū Hanīfa, Mālik b. Anas, al-Layth b. Sa'd and others (as reasonably complete and authentic list of his teachers is given by al-Khaṭīb al-Baghḍādī, xiv, 242), and lived in Kūfa until he was appointed *ḥakīm* in Baghḍād; he held this office until his death in 182/798. He is reported to have visited Basra in 176 and in 186. It is not certain whether he was appointed by al-Mahdī, al-Ḥadi, or Hārūn al-Raḡhī. According to a story which al-Tanūkhī (ed. 184) heard from his father (Nighār al-Mashāra, 123 ff.), Abū Yūsuf was able to assure on a point of religious

law an officer who rewarded him generously and later had occasion to recommend him to the caliph Hārūn. As he succeeded in giving a satisfactory opinion to the caliph too, the caliph drew him near to his person and finally appointed him *ḥakīm*. This version has a certain inner probability, but cannot for that reason alone be regarded as authentic. It is certain, however, that by his practical sense he soon became friendly with, and even made himself indispensable to, Hārūn al-Raḡhī. By exaggerating this achievement, both his friends and his detractors made him into the prototype of the unprincipled lawyer who would find an easy way out of any legal difficulty for his clients and for himself. The existence of his *Kaṭīb al-Hiṣāl* and the misunderstandings of the serious legal purpose underlying it, could not fail to reinforce that misconception. (Cf. Schacht, in *JA*, 1926, 317.) Al-Raḡhī conferred upon him the title of Grand Cadi or *ḥakīm 'l-ḥudūd* for the first time in Islam. This was then merely an honorific title given to the *ḥakīm* of the capital, but the caliph not only associated Abū Yūsuf on the administration of Muhammadan justice, on financial policy, and on similar questions, but on the appointment of other *ḥakīms* in the empire.

His son Yūsuf became a *ḥakīm* during the lifetime of his father, as his substitute for the western side of Baghḍād; he died in 192. His most prominent disciple was al-Shaybānī [q.v.].

The literary output of Abū Yūsuf must have been considerable. The *Fihrist* mentions a list of titles of works which, with one exception, have not survived. The exception is the *Kaṭīb al-Ḥarāḡ*, a treatise on public finance, taxation, criminal justice, and kindred subjects, which Abū Yūsuf wrote at the request of Hārūn al-Raḡhī (editio princeps of the Arabic text, Būlak 1302; French transl. by E. Fagnan, Paris 1921). These further works which are undoubtedly genuine, though they do not appear in the ancient bibliography of Abū Yūsuf, have been preserved: the *Kaṭīb al-Aḥqār*, a collection of the Kūfian traditions that Abū Yūsuf transmitted (Cairo 1335), the *Kaṭīb Ṭiḥāṣ al-Ḥanīfa wa-Ibn Abī Laylā*, a comparison of the opinions of the two authorities of Kūfa mentioned in the title (Cairo 1337), also al-Sīṭa, *Kaṭīb al-Ḥanīfa*, vii, 87-105, and the *Kaṭīb al-Radd 'alā Siyar al-Awṣā'*, a reasoned refutation, with broad systematic developments, of the opinions of the Syrian scholar al-Awā'ī on the law of war (Cairo, n.d.; also in al-Shāhīdī, *ibid.*, 303-36). The *Fihrist* mentions at least two titles of the same comparative and polemical kind: the *Kaṭīb Ṭiḥāṣ al-Awṣā'* and the *Kaṭīb al-Radd 'alā Mālik al-Hiṣāl* (Book of legal devices) were incorporated by his disciple al-Shaybānī in his *Kaṭīb al-Maḥbūrī* (ed. Schacht, Leipzig 1930). Several statements on principles and methods in his polemical treatises (e.g. *Kaṭīb al-Radd 'alā Siyar al-Awṣā'*, par. 5) show Abū Yūsuf's interest in legal theory (cf. *Fihrist*, 203,); but, contrary to what is sometimes affirmed, he did not write special works on the subject.

The doctrine of Abū Yūsuf, on the whole, presupposes the doctrine of Abū Hanīfa, whom he regarded as his master. The points on which Abū Yūsuf diverged from him are therefore more relevant for appreciating Abū Yūsuf's own legal thought than those on which both are in agreement. The most prominent peculiarity of Abū Yūsuf's doctrine is that he is more dependent on traditions than his master, because there were more authoritative

traditions from the Prophet in existence in his time. Secondly, the doctrine of Abū Yūsuf often represents a reaction against Abū Hanīfa's somewhat unstrained reasoning; but Abū Yūsuf was by no means consistent, and in a certain number of cases he abandoned, by diverging from Abū Hanīfa, the sounder or more highly developed doctrine. Thirdly, we can discern in Abū Yūsuf's legal thought certain favourite processes of reasoning, such as the *reductio ad absurdum*, and a habit of rather acrimonious polemics. Finally, a remarkable feature of Abū Yūsuf's doctrine is the frequency with which he changed his opinions, not always for the better. Sometimes the contemporary sources state directly, and in other cases it is probable, that Abū Yūsuf's experience as a judge caused him to change his opinion. Abū Yūsuf represents the beginning of the process by which the ancient school of the 'Irakians of Kūfa was replaced by that of the followers of Abū Hanīfa.

**ABŪ YŪSUF YA'KŪB b. YŪSUF b. 'ADD AL-MU'AMIN AL-MANṢŪR**, third ruler of the Mu'aminid (Almohad) dynasty reigned 580-95/1189-99. On the death of Abū Ya'qūb Yūsuf before Santarém on 18 Rabi' II 580/29 July 1184, Abū Yūsuf Ya'qūb, bringing back the body of his father, reached Seville, where he was proclaimed on 1 Rujmād II 1190 August. He hastened to Marrākūsh, took the title of *amir al-mu'minin*, issued several severe financial edicts and demanded from his subjects the strictest orthodoxy. He attempted for some time to administer justice himself at public audiences and satisfied his passion for construction by endowing his empire with important buildings. Enraged the Almoravid Dār al-Badjar, where his father and grandfather had lived, too cramped, he built the suburb of al-Sāḫba, in order to take up his own residence there. But scarcely had he begun this enterprise when he received news of the landing of the Almoravid Banū Ghāniya [q.v.] in Bidjāya (Rougie).

As soon as the news of the disaster of Santarém reached Majorca, the Banū Ghāniya, rejecting the Almohad offers for submission and encouraged by the partisans of the Hammūlids in Bidjāya, fitted out a squadron which took Bidjāya on 19 Safar 581/22 May 1185. 'Alī b. Ghāniya, profiting from the disorganization caused by the capture of Bidjāya, also took Algiers, Miliana, Aghir and Kal'at Banī Hammād. The reaction of Abū Yūsuf Ya'qūb was instantaneous. An army, assisted by the naval squadron of Ceuta, recaptured in the spring of 582/1186 Algiers, Bidjāya and the other places that had passed into the possession of the Almoravids, and marched against 'Alī b. Ghāniya, then besieging Constantine. The Almoravid leader, abandoning the siege, retired hastily towards the Džarid. There he took Tūzar and Kafsa (Gafsa) and made an alliance with Karākūsh [q.v.] in Tripoli. Thus only Tunis and al-Mahdiyya remained in the hands of the Almohads in Ifrīqiya. Abū Yūsuf Ya'qūb, in these circumstances, decided to lead a great expedition to the east. He marched to Tunis and from there sent

against the rebels and their allies a strong force, which was, however, defeated on 15 Rabi' II 583/22 June 1185 in the plain of 'Umra, near Kafsa. The Almohad caliph took his revenge for this reverse three months later, at al-Hamma (9 Šahān/14 Oct.). The whole south of Ifrīqiya was again subjected to Almohad domination and the sovereign returned to the west, reaching Tlemcen. Soon, however, the troubles broke out again in Ifrīqiya, in spite of the death of 'Alī b. Ghāniya, which occurred shortly afterwards. Ya'qūb b. Ghāniya, brother of 'Alī, was able to sustain, with uncommon energy and ability, the struggle against the Almohad empire for almost another half-century, causing it grave anxieties.

On the other hand, it was time for Abū Yūsuf to turn his attention to the Iberian Peninsula, which he had left five years before, and to check the attacks of the Portuguese and the Castilians. While the Mu'aminid ruler was making his preparations, Sancho I, with the help of strong Crusader contingents on their way to Palestine, laid siege to Silves (Šibū), on the south coast. After a siege of three months, the place was taken on 20 Rujāb 583/5 Sept. 1189. At the same time, the king of Castile had taken the field against the Almohad possessions and attacked Magaera, Reina, Alcalá de Guadaira and Calasparra. In 586/1190 Abū Yūsuf Ya'qūb took the counter-offensive. He imposed an armistice on the Castilians and Loaneze, and then attacked the Portuguese fortresses of Torres Novas and Tomar, to the north of Santarém, while another army besieged Silves. Torres Novas, unable to resist, had to capitulate, but Tomar, defended by the Templars, resisted and the garrison made vigorous sallies. Lack of food and an epidemic that broke out in the Almohad camp forced the caliph to raise the siege of both Tomar and Silves. Next year, the caliph again led an expedition in the same direction. After storming several fortresses to the south of the Tagus, such as Alcazar de Sol, Palmella and Almada, he captured Silves by surprise on 25 Rujmād II 587/10 July 1191.

In 589/1193, Abū Yūsuf Ya'qūb, who had supervised personally the works undertaken in Rabat, ordered the construction of the fortress of Hiss al-Faraj (Alfarache) near Seville, on the highest and narrowest part of the Ajarafe (al-Ḥarāf); it was thereafter celebrated by the poets in a great quantity of verses. Shortly afterwards, however, he had to organize a new expedition against Christian Spain, as the armistice signed in 1190 had expired and Alfonso VIII boldly attacked the region of Seville. Abū Yūsuf had again to cross the Straits and make for Seville, whence he departed, without loss of time, via Cordova, for the col of Muradal, to meet the army of Alfonso VIII. On 8 Šahān 591/18 July 1195, took place the famous battle of Alarcos (al-Arak [q.v.]), where the Castilians were severely defeated. The Almohads captured five strongholds situated in the region of the Campo de Calatrava. On his return to Seville, the sovereign took, to mark his victory, the honorific title of al-Manṣūr 'l-Ḥiṣṣān.

Next spring, Ya'qūb al-Manṣūr, eager to exploit his victory, took Montánchez, Trujillo and Santa Cruz and devastated, in the valley of the Tagus, the region of Talavera. He pushed even as far as the Vega of Toledo and laid waste its vineyards and orchards. Another expedition next year led him without success as far as Madrid, [which was defended by Diego Lopez de Haro], Alcalá de Henares and Guadalupe.

On his return to Marrākuḥ, worn out by illness, he appointed his son Muḥammad as his heir and retired from public life, to spend his time in devotional exercises and pious works, such as the foundation of a magnificent hospital and distributions of alms. He obliged the Jews to wear a special sign to distinguish them from the Muslims. During the last days of his life he was assailed by remorse for having ordered the execution of some of his closest relations. He assembled in his palace in al-Šūbā the Almohad *shaykhs* and the members of his family and informed them of his last wishes. It seems that the date of his death can be fixed with certainty on 22 Rabi' I 595/23 Jan. 1199.

The reign of Ya'kub al-Manšur marks the apogee of the Almohad empire. His energetic character, the care and rigour with which he supervised the administration of his dominions and his personal courage made it possible for him to defeat all his enemies, in Ifrīqiya as well as in Spain, to raise the moral of his armies and to pass into the memory of posterity surrounded by an aureole of legend. His magnificent constructions in the imperial suburb of al-Šūbā and the mosque at the Montjuïc in Barcelona (*al-Kawṣayyā*) in Marrākuḥ, with its splendid minaret, the Giralda of Seville and the ensemble of the mosque of Hassan in Rabat show that he was the glorious continuator of the monumental work undertaken by his father and grandfather. His riches, the splendour of his court, his desire to be surrounded by scholars, his success in the holy war, have blinded his admirers and prevented them from observing the germs of decomposition hidden behind such a brilliant façade. In al-Andalus, in spite of his success in Portugal and Castile, he could hardly contain the Christian drive, while in Ifrīqiya the Arabo-Majorcan revolt, stifled but always reviving, opened in the flank of the empire the deep wound which soon drained it of all force and energy. When the vigour and the skill of Ya'kub al-Manšur were no longer at the helm of the Almohad ship of state, it was inevitable that it should run aground on the rocks and sink, during the reign of his successors, children or youths, who were, for most of the time, to show a total lack of ability.

(A. HUCIT MIRANDA)  
**ABD ZABI** (commonly written *Abd Zhab*), a town (54° 22' E. long., 24° 29' N. lat.) and *shaykhdom* on the Trucial Coast of Arabia. The population of the town, the only settlement of any size in the *shaykhdom*, is several thousand. The most prominent structure is the ruler's fortresslike palace.

The town is said to have been founded about 1274-5/764 by Banī Yās [g.s.], a tribe then ranging in the interior of al-Zaḥra [g.s.]. No evidence points

to any earlier settlement on the site, which lies on the seaward side of a triangular island separated from the mainland by a narrow ford (al-Makṭa'). The island is relatively secure from attacks by land and has a partially protected harbour for small craft, but the supply of drinking water is poor.

The chiefs of Banī Yās continued to reside in the interior until the accession of Shaḡhbūt b. Iḡhlāl, father of Abū Fāḡh, the ruler of *zab*, about 1209-19/795. About 1214-5/1208 the Wahhābīs of Naḡdī first appeared along the coast, but they developed close ties with the Kawkīm and the people of al-Buraym rather than with Abū Zabi. Banī Yās do not appear to have come under Wahhābī influence until the accession of Khālifa b. Shaḡhbūt in 1248/835.

Shaḡhbūt signed the General Treaty of Peace sponsored by the British in 1255/1820 following the British expedition against Ra's al-Khayma [g.s.]. In 1251/1835 Abū Zabi adhered to the first Maritime Truce, from which the Trucial Coast takes its name (cf. BAHR FĀRIS). An Exclusive Agreement in 1309/1892 gave Great Britain special rights in Abū Zabi, which like the other Trucial States is considered to be independent while under British protection. In 1357/1939 the Shaḡh of Abū Zabi granted an oil concession for 75 years which is operated by Petroleum Development (Trucial Coast) Ltd., an Iraq Petroleum Company associate; in 1372/1952 oil had not yet been found. Offshore drilling rights are held by other interests.

Zayd b. Khālifa (d. 1268/1908) during his reign of 33 years made Abū Zabi the leading power on the Trucial Coast, but during the successive reigns of his four sons Abū Zabi was surpassed in importance by al-Shārika [g.s.] and Duḡayr [g.s.], which developed more rapidly their relations with the modern world. The present ruler (1952) of Abū Zabi is Shaḡhbūt b. Sulṭān (acc. 1346/1928), a grandson of Zayd.

Abū Zabi is by far the largest of the Trucial States, though most of its boundaries in the interior remain undefined. It claims a common land boundary with Katar in the vicinity of al-'Udayd [g.s.] and extensive territory in al-Zaḥra, where members of Banī Yās still reside in some of the tiny villages of al-Dijās. Several villages of al-Buraym belong to Abū Fāḡh. Banī Yās are settled on some of the islands in the Gulf between the Trucial Coast and Katar, and they visit others while engaged in pearling, fishing, and gathering firewood. Abū Fāḡh are on friendly terms with many of the beduins of the hinterland, though in recent years the once firm connections with the Manāḡir [g.s.] have grown weaker. (G. REAGAN)

**ABD ZAKARIYYA' AL-DJANĀWUNI**, Yawvā b. al-Khāyā, Ibāḡī scholar from the Djabal Nafūsa. He was a native of Djanāwun (modern Djennouen, near Djaḡo, in the eastern part of the Djabal Nafūsa; cf. J. Despois, *La Djebel Nefusa*, Paris 1935, 213 and passim). Al-Shammākhī mentions him amongst the personages of the 6th/12th century. He was the grandson of another Ibāḡī scholar from the Djabal Nafūsa, Abū 'Iḡhār Tūzin al-Djanāwunī, contemporary of the *shaykh* Abū 'Iḡhār Tūzin al-Zawāḡhī. As the latter lived under the reign of the Zīrid al-Mu'izz b. Bāḡis (406-54/1016-62; see al-Shammākhī, *al-Siyar*, 335-9), Abū Zakariyya' can probably be assigned to the first half of the 6th/12th century. He studied under the *shaykh* Abū 'Iḡhār Sulaymān b. Abū Hārīn in the mosque of Ibāḡīs (Djabal Nafūsa) and became

famous in Ibāḡī literature by the breadth of his learning and by his works, mainly on jurisprudence. Al-Barrādī quotes in his catalogue of Ibāḡī books, written shortly after 775/1373-4, a work by Abū Zakariyya', without giving its title. According to him the work contained seven parts, on fasting, marriage and divorce, testaments, salaries, judgments, preemption and security. The *K. al-Sawm*, on fasting, has been autographed in Cairo, 1310, and the *K. al-Nikāh*, about marriage and divorce, has been autographed in Egypt, with a marginal gloss by Muḥammad Abū Sitta al-Kaḡhī; the other parts are unpublished. Abū Zakariyya' wrote also *al-Lam'* (or *al-Waḡd'*), printed in Cairo (with a marginal gloss by Muḥammad Abū Sitta al-Kaḡhī) in 1305. It deals with dogmatics (1-116) and ritual law: ablutions, purification, prayer, alms, pilgrimage, etc. (117-592).

**Bibliography:** Shammākhī, *Siyar*, Cairo 1301, 535-7; A. de Motylinski, *Bibliographie du Mzab*, *Bull. de Corr. Afr.*, 1885, 22; idem *La Djebel Nefusa*, Paris 1899, 80, n. 1; R. Basset, *Les sanctuaires de Djebel Nefusa*, Jā, 1899/1, 98.

**ABD ZAKARIYYA' AL-WARDILĀNĪ**, Yawvā b. Abī Bakr, historian of the Ibāḡīs of the Maḡrib. The Ibāḡī chroniclers al-Darḡinī (7th/13th century) and al-Shammākhī (d. 628/1522) who took the chronicle of Abū Zakariyya' as the basis for their own works, give but scanty details about him and do not indicate the date either of his birth or of his death. From al-Darḡinī it is known at least that he was a native of Wardilān (Ouargla) and that he studied in the Wādī Righ (Oued Righ) under the Ibāḡī *shaykh* Abū 'Iḡhār Sulaymān b. Iḡhlāl al-Maḡdī (d. 471/1078-9). Thus the chronicle of Abū Zakariyya' must have been written at the end of the 5th/11th or the beginning of the 6th/12th century. According to an Ibāḡī tradition of Wardilān, Abū Zakariyya' died and was buried in that place, or perhaps in the neighbouring oasis of Sadrāta.

The chronicle of Abū Zakariyya', *al-Sira wa-Aḡḡār al-A'mma*, is the oldest document concerning the history of the Ibāḡīs in the Maḡrib written by a member of the sect. It contains important information on the introduction and the development of the Ibāḡī doctrine in the Maḡrib and the history of the Rustamids, their fall, the struggle of the Ibāḡīs against the Fāṭimids, as well as on the lives of the famous *shaykhs* of the community up to the time of the author. The work, not yet published, consists of two parts; the not very numerous manuscripts are generally modern; those especially of the second part are rare and very faulty. The most important part has been translated by E. Maqarraqy (*Chronique d'Abou Zakaria*, Algiers 1878) in a rather mediocre way, after a very bad manuscript. A table of contents has been given by A. de Motylinski.

According to al-Barrādī's catalogue of Ibāḡī works (8th/14th century) Abū Zakariyya' was also the author of letters and decisions on dogmatic theology.

**Bibliography:** Shammākhī, *Siyar*, Cairo 1301, 427-8 and passim; Darḡinī, *Tahāḡ al-Maḡḡāh* (in MS); Kutubī, *Faḡdī*, Cairo 1283, ii, 400 ff.; A. de Motylinski, *Bibliographie du Mzab*, *Bull. de Corr. Afr.*, 1885, 27, 36-8, 39, 42; R. Basset, *Les sanctuaires de Djebel Nefusa*, Jā, 1899/1, 424-5. An edition and a study of the chronicle of A. Z. by Dalet and R. Le Tourneau is in preparation. (A. DE MOTYLSKI-T. LEWICKI)

**ABD ZAKARIYYA' b. KHALDŪN** [see 188 KHALDŪN].

**ABD ZAYD**, legendary hero of the Banū Hīlāl. In the cycle of romances relating to the Banū Hīlāl he is represented as the son of Rizk, ruler of the Djabal al-Sawr, and Khadrā', daughter of the *ghorif* of Mecca. He was black-skinned and his original name was Barakāt. After various adventures in Arabia Abū Zayd goes with his people to the Maḡrib; there he is treacherously murdered by the other chief figure in the romances, Diyāl (or Dhī'āb), but is avenged in turn by the killing of Diyāl. No documentary evidence has yet been found to determine whether Abū Zayd was a historical personage.—For details and bibliography, see MILA.

**ABD ZAYD AL-ANŠĀRĪ**, Sa'īd b. Aws, Arab grammarian and lexicographer of the school of Basra. He belonged to the Medina tribe of Khazraj. A pupil of Abū 'Amr b. al-'Alī [g.s.], he was one of the few Basrians who went to Kūfa, where he collected, from al-Mufaddal al-Dabbī [g.s.] the greater part of the poetic material which he used in his *K. al-Nawādir*. He was invited by al-Mahdī to come to Baghdad and died in 214 or 215/830-1. A contemporary of Abū 'Ubayda and al-Aṣma', he was considered superior to them in grammar, but of his numerous treatises only two have survived: *K. al-Maṭar*, a collection of Arabic expressions concerning rain (ed. R. Gotthelf, JAOS, xvi, 282-312; ed. L. Cheikh, Maḡh., 1905) and *al-Nawādir al-Lughā*, a collection of rare poems and phrases. This work was handed down by his pupils Abū Ḥatīm al-Šajjastānī and Abū 'Iḡhār al-Akhḡāḡ; it has been published by S. Shārtānī, Beirut 1894. 'Alī b. Hamza al-Baḡdī wrote *al-Tanbīh 'alā Aḡḡād al-Zayd fī Nawādir* (ed. al-Baḡhdādī, Khināna, iv, 39; Th. Nöldeke, in ZDMG, 1895, 318 ff.; H. L. Fleischer, *Kleinere Schriften*, iii, 471 ff.).

**Bibliography:** Ibn Kutayba, *Ma'ādir*, 270; Anḡārī, *Nuḡa*, 173-9; Zubayrī, *Tahāḡ al-Krenkow*, in ESO, 1919, 141; Strāḡī, *Aḡḡār al-Nawādir* (Krenkow), 52-7; Ibn Khālīk, no. 262; G. Flügel, *Die gram. Schulen*, 70 ff.; Brockelmann, S. I, 162. (C. BROCKELMANN)

**ABD ZAYD** [see al-Baḡdādī].

**ABD ZAYYĀN** [see al-Baḡdādī].  
**ABD ZAYYĀN I** MUḤAMMAD b. Abī Sa'īd 'Uṭmān b. Yaḡmūḡrasān, third sovereign of the 'Abd al-Wāḡid dynasty. Proclaimed in Tiemen on 2 Dhū 'l-Ka'da 703/6 June 1304, he succeeded in having the siege of his capital by the Marīnid troops raised. He then chastised the tribes in the eastern part of his kingdom who had supported the enemy; the Yūdīn Berbers were forced to submit and pay tribute, the Arab tribes were severely treated and driven back into the desert. On his return to Tiemen, he devoted himself to repairing the damage caused by the siege, but died shortly afterwards, on 21 Shawwāl 707/14 April 1308.

**Bibliography:** see 'ABD AL-WĀḢID.

(A. COUGÉ)  
**ABD ZAYYĀN II** MUḤAMMAD b. Abī Ḥamūḡ II, sovereign of the 'Abd al-Wāḡid dynasty. During the lifetime of his father he was governor of Algiers and tried in vain, on his father's death, to seize power. He took refuge with the Marīnid sultan Abū 'Iḡhār Ahmad, who led an expedition against Tiemen and made it possible for Abū Zayyān to be proclaimed in Muḡharraz 796/Nov.-Dec. 1393. He remained a faithful vassal of the Marīnids. A patron of men of letters and poets, he was assas-

minated in 803/1398 after being driven from the throne by his brother Abū Muhammad 'Abd Allāh. *Bibliography*: see 'ABD AL-WĀḤID.

(A. COOK ?)

**ABŪ ZAYYĀN III** ABMAH B. ABĪ MUHAMMAD 'ABD ALLĀH, second last 'Abd al-Wāḥid ruler of Tiemmen. Thanks to the support of the Turks of Algiers he seized the power and was proclaimed in 947/1540. The Spaniards of Oran who supported his brother Abū 'Abd Allāh Muhammad undertook an expedition against Tiemmen, which failed (949/1543). After a second, victorious expedition, the Spaniards made it possible for Abū 'Abd Allāh Muhammad to seize the power (30 Dhū'l-Ka'da 949/7 March 1543), but he was soon driven out by his own subjects, who restored Abū Zayyān to the throne. He declared himself a vassal of the Turks and reigned until his death in 957/1550.

**ABŪKĪR**, or BŪKĪR, small town on the Mediterranean coast, 15 m. east of Alexandria, on the railway which links this town with Rosetta (Raghdī). The earliest Arab geographer to describe the position of Abūkir was al-Idrīsī. But before him Arab texts on Ancient Egypt refer to the building of a light-house; and European travellers certainly mentioned, on this route, towers intended to serve as landmarks. Eutychius tells of the passage to Abūkir of the relieving fleet which had been summoned from Tarsus to protect Egypt against the Fūtimids. Abū Faḡha Mubārak, according to a source that has not been traced, relates that European pirates raided Abūkir on 27 Shā'ban 764/11 June 1361, and carried off about sixty inhabitants, who were put up for sale at Sidon. It was the period of Bonaparte's expedition that made Abūkir famous, by Nelson's naval victory on 1 August 1798 and the extermination of the Turkish army on 25 July 1799. At Abūkir, on 8 March 1801, disembarked the English army which was to end the French occupation; and, finally, Abūkir was again an English operational base in March 1807. There was an excellent anchorage and good shelter at Abūkir at that time, but the village itself was miserable.

Amfelineau erroneously believed that he had found the name Abūkir in the *Jacobi Synaxary*; the reference there is to a church in Old Cairo, dedicated to Apa Kyros.

Étienne Combe has studied at length the problem of the Alexandria-Rosetta route, as well as of the lakes along the coast, and has provided a rich bibliography of Arab writers and European travellers. In this work will be found the various transcriptions of the name of the locality, and the monotonous description of a somewhat difficult journey: a sandy region had to be crossed, uncultivated and unin-

habited, with only a few palm-trees here and there to enliven the prospect. The three lakes, from west to east, bore the names Maryūt, Abūkir and Atkū. The only account of the lake of Abūkir which is at all detailed in the South of al-Kalbiyah, but he refers to the property of the region as a thing of the past. Some few birds lived on the shores of the lake, whose waters teemed with fish. The mullet (*bār*) which was caught there formed part of the food supply of Alexandria. On the banks were some large salinas, whose product was exported to Europe.

A strong causeway, often reinforced, separated the lake of Abūkir from Lake Maryūt; the Mahmūdīya canal and the railway from Cairo to Alexandria were built along this. Since 1887 the lake of Abūkir has been drained and the land cultivated.

*Bibliography*: Ibn 'Abd al-Hakam (Torrey), 40; Eutychius, II, 81; Makrīzī, *Ḥikāḥ*, MIFAQ, xlv, 82; Synaxaire, *Patrologia orientalis*, III, 404; Amfelineau, *Géographie*, 6, 379, 381; Monnet de Villard, in *Bulletin de la société de géographie d'Égypte*, xii, 74, 76; E. Combe, *Alexandrie musulmane*, *Bulletin de la société de géographie d'Égypte*, xv, 201, 238; xvi, 111-71, 269-92; Dehérain, *L'Égypte turque*, *Hist. de la nation égyptienne*, v, 275, 377, 281-285, 435, 440, 445, 518-519, pl. 41; Durand-Viel, *Les cartes géographiques de Mohammed Ali*, I, 49, 63, 65, pl. 3, xi, xlii, xlii.

Other places of no importance in Egypt have the same name.

Worthy of mention, however, is the gorge of the Bōkīr (Bōkīrān—Bōkīrāt), in the Djabal al-Tayr (Mountains of the Birds), in Middle Egypt, north of Minya. The Arab authors associate a curious legend with this locality. The mountain is visited, on a given day each year, the meeting-place of the birds called *bōkīr*. They put their heads into a cleft in the mountain, which closed on one of them: that bird remained suspended and died there.

**ABUKLEA**, misspelling for Abū Talūḡ, so called after the *palū* tree (*Acacia seyal*), the name of a well-centre on the road through the Bayḍā desert which, avoiding the Nile bend of Abū Hamad, leads from Korti (Kurti) south of Dongola to al-Metamma, a distance of 192 miles. The place is famous as the scene of a battle fought on 17 Jan. 1885 between the *dawād* forces of Muhammad Ahmad (g.s.) and a "desert column" of some 1800 British troops who were advancing from Korti to the relief of Khartūm where the Egyptian garrison and General Charles Gordon were besieged by the Mahdists. The British under Sir Herbert Stewart found a large body of the Mahd's best troops (some 3000 Bakīra and 5000 Dā'yūḡin) in possession of the wells. Advancing in square formation they were fiercely attacked, and after desperate hand-to-hand fighting the Mahdists withdrew leaving about 2000 dead behind. The British casualties were 74 dead and 94 wounded. The way was now open to al-Metamma where the British forces were joined by four river steamers which Gordon had despatched from Khartūm. A fatal delay of a few days enabled the Mahdists to take Khartūm by storm (16 Jan.), and the relieving force was obliged to retrace its steps without achieving its object.

**AL-ABWĀ'**, a place on the road from Mecca to Medina, 23 miles from al-Djūbā in the territory of Banū Damra of Kināna. According to some authorities the name really belonged to a mountain situated there. Muhammad's mother, ʿĀmina, is commonly said to have died there while returning from Medina to Mecca, and to be buried there; but she is sometimes said to be buried in Mecca (Tabarī, I, 980). The first expedition from Medina in which Muhammad himself took part was to al-Abwā' and Waddān nearby. It is said that at al-Abwā', as the Meccans marched against Medina in 3/625, some proposed to dig up ʿĀmina's body, but the majority opposed this.

**'AD**, an ancient tribe, frequently mentioned in the Kur'ān. Its history is related only in sporadic allusions. It was a mighty nation that lived immediately after the time of Noah, and became haughty on account of its great prosperity (vi, 69; xli, 15). The edifices of the 'Adites are spoken of in xxvi, 128 f.; cf. in lxviii, 6-7 the expression: "'Ad, Iran of the pillars" (see IRAM ḡHĀT AL-'IMĀD). According to xlv, 21, the 'Adites inhabited al-Aḡlāl (g.s.), the sand dunes. The prophet sent to them, their "brother" Hūd (g.s.), was treated by them just as Muhammad was later treated by the Meccans, and on account of that they were, with the exception of Hūd and a few pious men, swept away by a violent storm (vi, 65 f.; cf. xli, 16; lii, 19, lix, 6). Finally, in xl, 32, there is mention of a drought from which they suffered. From these indications the later legends of the *biḡaḡ al-amīya'*

wove their coherent narratives. [For these, cf. also Hūd, IRAM ḡHĀT AL-'IMĀD, LUKMĀN, SHĀDDAD B. 'AD.]

It cannot be shown with certainty what more ancient traditions are at the base of the Kur'ānic story. The old poets knew 'Ad as an ancient nation that had perished (e.g. Tarāfa, I, 8; *al-Mufaḡḡalīyāt*, viii, 40; Ibn Hishām, I, 468; cf. Zuhayr, xx, 12 and LUKMĀN); hence the expression: "since the time of 'Ad", *Hamāsa* (Freitag), 195, 341. Their kings are mentioned in the *Diwān* of the Hudḡaylites, lxxx, 6, and their prudence in that of Nāḡība, xxv, 4. The mention of the 'Adite Aḡmar by Zuhayr, *Mu'allaka*, verse 32, and in the *Diwān* of the Hudḡaylites, p. 31, merits consideration, as the Muslim legend connects (Kudrī) al-Aḡmar with Ṭamūd (g.s.).

Whether there really existed, and where, a nation called 'Ad, is still an unanswered question. The genealogies of the Arabs relating to the 'Adites are naturally valueless, just as is their locating of that people in the large and uninhabitable sandy desert between 'Uman and Hadramawt. The identification of Iram with 'Ad, adopted by the Arabs and several modern scholars, is not at all likely. Of the latter, Loth has identified 'Ad with the well-known tribe of Iyād; on the other hand Sprenger sought for 'Ad in the Oadites, who according to Ptolemy lived in N.-W. Arabia; this recalls the well of Iram in Hisma (al-Hamḡdān, *Siya*, 126; A. Sprenger, *Die alte Geogr. Arabiens*, I, 207; A. Muḡl, *Arabia Petraea*, II/2, 128). The excavation of the second-century Nabataean temple at Djabal Ramm, about twenty-five miles due east of 'Akaba, brought to light Nabataean inscriptions giving the name of the place as 'ym; Savignac, very plausibly, connected this with Iram. Cf. H. W. Glidden, in *BAOR*, no. 73, 1939, 13 ff.; Ramm would also be identical with al-Hamḡdān's Iram and Ptolemy's Aramaia. But Wellhausen pointed out that instead of the expression "since the time of 'Ad" the expression *min al-'ad* also occurs; therefore he supposed that originally 'Ad was a common noun ("the ancient time"; adj. 'ādī, "very ancient") and that the mythical nation arose from a misinterpretation of that expression.

**'ADĀ'** (a.), lit. 'payments', 'accomplishments', a technical term used in the *fiḡh* to designate the accomplishment of a religious duty in the time prescribed by the law, in opposition to *ḡadā'*, which designates the belated accomplishment of a religious duty (of course when the delay is permitted). A distinction is also drawn between a perfect and an imperfect accomplishment (*al-adā'* *al-ḡadā'* and *al-adā'* *al-nāḡīḡ*).—In the reading of the Kor'ān *adā'* means the traditional pronunciation of the letters, synonymous with *ḡirā'* (g.s.).

# 'ADA (a) custom, customary law.

(i) General, (ii) North Africa, (iii) India, (iv) Indonesia.

I. — General. The realities of social life have never exactly reflected the *shari'a* [s.h.], or *shari'a*, the ideal Muslim Law corresponding to God's will. This is true not only in regard to the ritual provisions of this Law, but also and even more so in regard to its juridical aspects. It is not, of course, the modern reforms of Muslim law in various countries that are envisaged here, but the survival of pre-Islamic custom ('*ada* or '*urf* [s.h.]). The words '*ada* and '*urf* have the same meaning, but the usage varies from region to region (e.g. the first is used in Indonesia, the second in North Africa, and in East Africa one says *darfur*). In addition, the Muslim rulers have often issued administrative regulations on matters of law, called, e.g. in Persia '*urf*, in Turkey *kanun* [s.h.], for the meaning of this word in North Africa, see below ii), sometimes also *siyas* [s.h.]. Also the innumerable regulations made by rulers, establishing various taxes contrary to the Law (*mahs* [s.h.]), must be recalled here.

What is, then, the exact role of custom in Muslim countries?

a) There is first of all the case where the *fiqh* itself expressly refers to customary usage, e.g. to determine what is to be understood by equivalent dowry, or by ordinary standards of nourishment (e.g. for the *sakal al-fiqh*), etc. Some lawyers even felt justified in advancing the view, following the principle according to which everything that is not forbidden is permissible, that the Muslim Law could admit customary law in every case in which the '*urf* was not contrary to the *shari'a*; in fact, however, custom has not been admitted as one of the sources (*usul*) of the law (cf. 1901).

b) A juridico-sociological analysis of social reality allows us to make the following distinctions.

1) In the most classically Muslim countries it can be observed that alongside the religious jurisdiction there exists an administrative ("political" — *siyas*) jurisdiction, varying in forms and names, which need not be treated here, e.g. in matters concerning penal law, obligations and contracts; in customary law or the regulations (*ahkam*) of the princes are applied to a greater or lesser extent. So for example in Turkey marriage, from the 17th century onwards, had to be concluded obligatorily, from the penal point of view, before the authorities.

2) Sometimes even the religious courts are compelled to sanction local usage, either because, thanks to a juridical attitude (*fiqh* [s.h.]) the act, though contrary to the spirit of the Law, has been put into a legally unchallengeable form (e.g. in the matter of *uqub*, or the conditional repudiation in favour of the wife in Java, and especially the use of the *uqub*, in North Africa and elsewhere, to disinherit women); or even without that expedient — which is even more characteristic; thus in Java — the pre-Islamic marriage arrangement is considered as a *sarakat* (i.e. *shirkat*), a contract of commercial partnership between the husband and wife. On the island of Great Comore, there exists a kind of *uqub*, the *magahali*, in favour of women only, the validity of which is well recognized. (For the '*amal* in North Africa, see below, ii.)

3) There exist religious courts administering the Law, but, except in case of litigation, the population ignores them and follows local custom. This is the case, among others, in the Awraja (cf. below, ii), to a large extent; in the same way, the religious

courts were competent in matters of succession in Java up to 1928, but the population did not follow the *Kur'an* in this field; also the persistence of the *Lek Dukagini* among the Muslims of North Albania can be quoted in this connection.

4) The clearest case of the persistence of a customary law is that where there is no religious jurisdiction at all, but only that of the customary courts, and these apply customary law. It is, however, essential to realize that this custom can be more or less Islamized (see below, ii), concerning the Berbers). One point, especially, can be taken more or less for granted: viz. that there is no Muslim country where the marriage formalities, which are, to be sure, very simple, are not performed according to Muslim law.

It can be said that in general it is among populations which are still imperfectly Islamized (in the objective meaning of the word, as those in question may have a very fervent faith) that the predominance of customary law and the absence of religious courts can be observed. There is, however, at least one very remarkable exception: until recent times, the region of Menangkabau (Central Sumatra) was strongly attached to its patriarchal customs, which were quite contrary to Islam, and yet Islamic learning was very widely spread in that region. The same matriarchate can be observed also e.g. among the Tuaregs of the Hoggar, who are, it is true, rather lukewarm Muslims. In the Lacadive islands, inheritance follows the female line. Thus the effective manifestations of the survival of custom among the Muslim community are innumerable.

As regards the future, something on the following lines may be said. If, on the one hand, the control of Muslim Law over practice is on the decline — total abolition in Turkey and in the countries under Soviet rule, reforms in Egypt, India etc. — on the other hand the Law is almost everywhere gaining ground at the expense of custom. Custom is thus on the way of slow disappearance, partly due to the influence of European colonization and European civilization. Custom is being Islamized, because the means of communication are improving and religious courts are installed in place of the old customary jurisdictions. As a matter of fact, almost everywhere the European colonizers believed that the law of the local Muslims was essentially the theoretical religious law.

In the following sections more detailed descriptions are given of the role of customary law in three representative areas of the Islamic world.

ii. — North Africa. This region, where Berber dialects were spoken before the coming of the Arabs, has since been profoundly Arabized and Islamized.

a) As regards the Arabic-speaking regions, no study has yet been made, with a few exceptions, of what elements among the customs of the population go back to the pre-Islamic period and are Berber survivals. On the other hand, it can be observed that, especially in Morocco, the *fiqh*s sometimes apply solutions which are contrary to the prevailing Maliki view and which may possibly — though this has scarcely yet been envisaged as an object of study from this point of view — represent Berber survivals; this is the '*amal* (especially '*amal Fasi* [s.h.]).

b) As regards the Berber-speaking regions:

1) From a purely theoretical point of view, there are districts where, officially, the Berber customs have remained legally applicable, namely Greater Kabylia in Algeria and the very important zones of Berber customary law in Morocco, where the situation existing before the French conquest was made permanent by the *dhahir* (*qadiri*) of 16 May 1930. This measure roused at the time violent polemics; these are, however, completely forgotten today, since, by the *dhahir* of 8 April 1934, penal justice is no longer governed by customary law, but is unified throughout the whole of Morocco; the civil courts of customary law have been reorganized, with two courts of appeal. In Kabylia, it is the *qadiri* of the *qadiri* who administers the customary law with right of appeal to the court of the *arrondissement*. In all these cases, the matters involved are those of personal status and the law of succession.

2) The social reality is, however, much more complex. a) In Tunisia, in the few remaining isolated Berber-speaking communities, there are scarcely more than remnants of the ancient customary law. b) In Algeria, more than a quarter of the population speaks Berber. In Greater Kabylia, where the social organization of each village has remained very strong, the *djama'a* continues illegally to settle many conflicts; it applies the local *ahkam*s, i.e. rates of fines, some of which, renewed, are nowadays compiled in French (no longer in Arabic).

In Berber-speaking Lesser Kabylia and in the Awraja (where the French have installed *baïfs*), the quasi-official Berber justice continues to operate on a fairly large scale. c) It is in Morocco (where more than 40% of the population is Berber-speaking) that Berber law is most extensively applied, and there the real customary sphere tends much more to encroach upon the official sphere.

One cannot make a simple contrast between customary law and Muslim law, because the former has been influenced, to a greater or lesser degree, by the latter. In Morocco, for instance, customary law has remained pure in the central regions; it is less pure in the Northern Middle-Atlas; it is strongly Islamized in the south. In Greater Kabylia, it has been influenced by the official French reforms. The inhabitants of the Mzab, on the other hand, have a legal system that has been very greatly influenced by the heretical *ibadhi* religious law. It would be wholly premature to assert that there once existed a common stock of Berber legal institutions. My impression is that this was not the case (just as the Berber-speaking populations do not belong to one and the same race). To be sure, some characteristic institutions recur in the whole of North Africa (collective storehouses from Tunisia to Morocco, but not in Kabylia; inferior marriage, *maghrif*, in the region of Guraya in Algeria; *amazal* among the Zemmur in Morocco), but they are not found everywhere among the Berber-speaking population. On the other hand, the condition of women is essentially variable among the Berbers; it is very low, for example, among the Kabyles, very high indeed among the Tuaregs, with all the intermediate stages between these two extremes. It is true that the collective oath as a method of proof is very widely spread and, from the point of view of succession, women are in general disinherited. It seems therefore preferable to suspend judgement about the existence of a primitive Berber custom.

Everything relating to Berber public law, which was in force in Morocco until the French conquest, is but a memory. In penal law, the custom of the *diya*, i.e. blood-money (in its Berber form and not according to the rules of the *fiqh*) survives quasi-officially in several Berber-speaking regions (as well as among the Arabic-speaking population of North-Africa). The Berber civil institutions that survive in Algeria and in Morocco are being increasingly influenced by factors foreign to customary law (such as Islam or modern civilization).

persons, *adat*-functionaries and politicians tried to find a way out, that is to say a conciliation between both juridical complexes (on this occasion in the section of the law of inheritance) but without success. The view-point of the above-mentioned Minangkabau 'island', notwithstanding their concessions to *adat* law, was thoroughly traditional (orthodox).

4. There is however one outstanding problem that was already before the war—to quote a Javanese politician—"an inexhaustible source of disputes". This is the position of the woman, especially in Javanese life. From a social point of view the position of the Javanese woman is fairly high. But her position as a wife is extremely unsafe. The peculiar situation as far as this point is concerned is that in Java (and in Minangkabau) more than 50% of all marriages are dissolved by the husband's act of repudiation. Of course the *gharī'a* gives the husband that right everywhere. It is remarkable however that in the Muslim regions where a patrilineal system of relationship is in force the matrimonial bond is strong, because the husband has to pay a considerable bride-price. In Java the so-called 'tuku' (remnant of a bride-price) is only a combination of cheap presents, and even the *mahr* of the *gharī'a* often remains unpaid. The socio-familial system in Java is bilateral.

Since a score of years a strong current has set in against polygyny. Not in the first place against simultaneous polygyny (which is not so frequent: ± 2%) but mainly against 'successive' polygyny: the habit of the man (who can marry quite 'cheaply') to exchange his wife for a younger one. The *ta'rib*-*salah*-institution is not effective against this most serious social evil. This *ta'rib*-regulation is as follows: Immediately after contracting his marriage the husband has to declare to his wife's *wali* and the witnesses that, if he leaves his wife for a certain time without providing for her and without sending her tidings, if he severely ill-treats her or commits another unseemly act—then his wife is free, if she likes to do so, to complain before the Muslim authority concerned. If there is evidence of her husband's failing in these respects the authority states one *talāh* to have taken place.

The republic has improved the (officially edited) forms for the *ta'rib*-statements and given them by means of *suwal*-paying the character of an eventual *ghul*. And a bill is being prepared which is an interesting combination of elements of western law, Muslim religious law and *adat* law, although the prospects of its enactment are doubtful.

This bill has the following salient points: (a) child-marriages (not frequent in Indonesia) are forbidden; (b) each marriage is to be registered in a registrar's office in accordance with the European continental system; (c) the future married couple have to give each other certificates as to their health (influence of 'eugenics'?). (d) the mutual rights and duties of husband and wife are circumscribed partly (*mutadā muḥandā*) in the words of the Dutch code, partly in the terminology of the *gharī'a*, especially the duties of the 'polygamous' husband; (e) as to polygyny in general: 1. polygyny is to be allowed only in the interest of society; 2. no man can take a second or third wife (etc.) without the consent of the wife (wives) he already has; 3. he requires a medical certificate stating that his health allows 'polygamy'; 4. he must prove himself to possess the financial means to entertain more than one household; 5. the polygamist in *spe* must promise to be 'righteous' in his conduct. Otherwise the judge is given a considerable power to dissolve

marriages in well-defined cases, again partly derived from articles of the Dutch code, partly from regional rules of *adat* law and the usual *ta'rib*-formulas. Whether, however, in the intention of the bill, a Muslim husband can still repudiate his wife depends on the ultimate legislative elaboration of the bill.

5. There are of course other points in the incessant disputes. As was already mentioned in § 3 above, there is the question of succession-law. Notwithstanding the fact that in Java Muslim courts exist (since centuries) which deal with all suits concerning Indonesian Muslim estates, it is well-known that in reality the Javanese, as well as the Sundanese and Madurese—outside the court—followed in case of partition of estates the lines of *adat* law. For this reason suits of this kind belong since 1937 to the competence of the common 'secular' judge. There is still Muslim propaganda against this 'colonial' measure.

**ADA KAL'E**, island in the Danube in Rumania, inhabited by Turks, 4 kms above the Iron Gates and  $\frac{1}{2}$  km below Orsova, 280 m. In the 15th century the Ottoman Turks occupied the strategic points of the river in this region, but the island is mentioned for the first time only in 1697, when the vizier Darvun Mehmed Paşa conquered the 'little island in the straits of Irşowa (Orsova)' which was then occupied by 400 soldiers and called *Shaw adası*, i.e. 'entrenchment island', from German *Schanz* (Sillidie, Flindell Mehmed Paşa, *Ta'rib*, Istanbul 1928, ii, 340). In 1716 the first durable fortifications were built by the *muhafiz* of the Iron Gates, Çerkes Mehmed Paşa (Mehmed Rashid, *Ta'rib*, Istanbul 1153, ii, 133). After occupation by the Austrians, it was retaken by 'Ali Paşa, called *sardār-ı ehrem*, in 1735; it is on this occasion that the name *Ada Kal'e* appears for the first time (cf. Mehmed Sabih, *Ta'rib-i Wāḥid*, Istanbul 1918, 131, 134). It depended from the *wālī* of Vidin. The last struggles round *Ada Kal'e* took place in 1788, when during the expedition of the *sadr aṣṣam* Kodja Yūsuf Paşa against the army of Laudon, the last time when Ottoman troops appeared in the Banat, the island played the role of a river base.

A river base. 'Ali Paşa built a large bridge between Orsova and Tekov (Tekija) and reinforced the 'fortress of the Great Island (Ada-i Kebir Kal'esi)'. (The expedition is described in detail by an anonymous writer in *Sefer-nâme-yi Serdār-ı Ehrem Yūsuf Paşa*, MS Istanbul, Univ. Kütüphanesi, T.Y. 3254; another

MS in the possession of the writer). During the revolt of the Serbians, the island became an important stronghold of the Empire. The *Dayl*, who surrendered in Belgrade, were executed in *Ada Kal'e* by the *muhafiz* Redif Ağha in 1809 (Ahmed Djewdet, *Ta'rib*, Istanbul 1309, ix, 126, 128). Somewhat later Redif Ağha himself, following the example of the *aym* in the Balkans, rebelled, but was executed. His brothers, Adema, Belçir and Şâhî, who occupied the fortress of Feth İslâm (Kladovo), had to retire to the island. Well Paşa, son of 'Ali Tepedelenli, who had been charged with the pacification of Serbia, granted them pardon, on which they surrendered the island. After 1867, when the Turkish garrisons evacuated Serbia, *Ada Kal'e* remained without direct communication with the capital. At the Congress of Berlin (1878) the island was forgotten, and so remained an isolated possession of the Ottoman Empire, administered by a *nâhiye müdürü*. Its inhabitants elected deputies to the Turkish parliament. By the treaty of Trianon (1920), it was incorporated, with the Banat, into Rumania; but this was recognised by Turkey only by the treaty of Lausanne (1923).

At the present day, the island has 640 Turkish inhabitants. There are schools for the Muslim population. The fortifications, in red brick and stones, with their basements and cisterns, are noteworthy, as well as the mosque built by Selim III, with a *ayvân-gâh* of Miskîn Bîbbî, a derwîsh name in the 18th century from Turkestan and died on the island.

(AUREL DECEI)

**ADA PÄZÄRİ**, flourishing town in the province of Kodja-eli, Turkey, situated at 40° 47' N., 30° 23' E., in the fertile plain known as Akowa on the lower course of the Sakarya river. Originally it lay between two arms of this river (hence the earlier name *Ada*, 'island'), but now lies between the Sakarya and the Çarlıbı dnya. It was occupied by the Turks under Orkhan and is mentioned for the first time in a *waḥf*-foundation which goes back to him (T. Gökbilgin, *XV. ve XVI. asırlarda Edirne ve Paşa-lınas*, Istanbul 1952, 161). In 1795 it appears, with the modern name of Adapazarı, as the seat of a *nâhiye*. In 1852-3 it was raised to the rank of a town, and about 1860 had 24,500 inhabitants, according to V. Cuinet, *La Turquie d'Asie*, iv, Paris 1899, 372 ff. By the census of 1950 the population had risen to 36,210. It is a trading centre for local produce, especially tobacco, vegetables and fruit. There are no Islamic monuments of importance.

**ADAB** (A.). The history of this word reflects, parallel to and even better than the history of the words *ilm* and *din*, the evolution of Arab culture from its pre-Islamic origins to our own day. In its oldest sense, it may be regarded as synonym of *sunna*, with the sense of 'habit, hereditary norm of conduct, custom' derived from ancestors and other persons who are looked up to as models (as, in the religious sense, was the *sunna* of the Prophet for his community). The etymology of the word put forward by Vollen and Nallou agrees with this earliest meaning: both considered that the plural *adab* was formed from *da'b* ('custom, habit'), and that the singular *adab* was subsequently derived from this plural. (Indigenous lexicographers connect it with the root *ʿab*, meaning 'marvellous thing', or 'preparation, feast'). In any case, the oldest meaning of the word is that already given: it implies a habit, a practical norm of conduct, with the double connotation of being praiseworthy and being inherited from one's ancestors.

The evolution of this primitive sense accentuated, on the one hand, its ethical and practical content: *adab* came to mean 'high quality of soul, good upbringing, urbanity and courtesy', in this acception corresponding to the refining of *beduin* ethics and customs as a result of Islam (cf. Wensink, *Handbook*, s.v. *adab*) and contact with foreign cultures during the first two centuries A.H. Thus, at the beginning of the 'Abbasid epoch, *adab* in this sense was the equivalent of the Latin *urbanitas*, the civility, courtesy, refinement of the cities in contrast to *beduin* uncouthness. (In this sense, the lexicons use the word *parf*, courtesy and elegance, to explain *adab*.) The word kept this ethical and social meaning during the whole period of medieval Muslim civilization. So, for example, *adab*, etiquette, of eating, drinking, dressing (cf. *TA'AM*, *SHARAK*, *LİBAK*); *adab*, etiquette, of the boon companion (cf. the treatise *Adab al-Nadim* by Kughjish and NADIM); from another sphere: *adab*, etiquette, of disposition (cf. several treatises entitled *Adab al-Fahh* and *BAWH*); etiquette of study (cf. books on *Adab al-Dars*, *Adab al-'Alim wa'l-Muta'allim*, and *TADRİS*).

However, from the first century of the *hijra*, *adab*, in addition to this ethical and social meaning, acquired an intellectual meaning, which was at first connected with the first meaning, but then became increasingly differentiated from it. *Adab* came to imply the sum of knowledge which makes a man courteous and 'urbane', profane culture (as distinct from *ilm*, learning, or rather, religious learning, *Kuḥrān*, *hadith* and *fiqh*) based in the first place on poetry, the art of oratory, the historical and tribal traditions of the ancient Arabs, and also on the corresponding sciences: rhetoric, grammar, lexicography, metrics. Consequently this humanistic concept of *adab* was at first strictly national; the perfect *adib*, in the Umayyad period, was the man who excelled in knowledge of the ancient poets, in the *ayyām* al-*Arab*, in the poetical, historical and antiquarian sphere of Arab culture. But contact with foreign cultures widened the content of *adab*, or Arab *humanitas*, into *humanitas* without qualification; it now included a knowledge of those sections of non-Arab (Indian, Iranian, Hellenistic) literature (i.e. gnomic and technical literature) with

which Arab Muslim civilization became familiar from the early Abbasid period onwards. The *adab* of the 3rd/9th century, of which al-Dhahiri was the most perfect example, was therefore not only cultivated in Arabic poetry and prose, in maxims and proverbs, in the genealogy and tradition of the *qabā'il* and of the Arabs at a time when they were hardly yet Islamized, but broadened out in its range of interest to include the Iranian world with all its epic, gnomé, and narrative tradition, the Indian world with its fables, and the Greek world with its practical philosophy, and especially its ethics and economics. It was thus that in the 3rd/9th century there came into being the great literature of *adab*, with its varied and moving erudition, which is not pure scholarship although it often also touches on, and handles scientific subjects, but which is centred above all on man, his qualities and his passions, the environment in which he lives, and the material and spiritual culture created by him. Within this domain al-Dhahiri and his followers (Abū Hayyān al-Tawhīdī, al-Tanūkhī, etc.) turned to account and extended the heritage bequeathed to Muslim society in the previous century by the Iranian genius Ibn al-Muqaffa', who can be described as the true creator of this enlarged conception of *adab*, with his versions of foreign historical and literary works (*Khuday-nāmah* and *Kallīla wa-Dimna*) and his original ethical and didactic tracts (al-*Adab al-Kabīr* and al-*Sagīr* though the authenticity of the latter is very questionable). The literature of *adab* is the very backbone of high 'Abbasid culture.

The richness and complexity of this concept of *adab*, as humanity or culture, was on the other hand reduced, already in the 'Abbasid epoch, to a narrower acceptance. From its meaning of the "necessary general culture" expected of any man of superior education, it took on the specific meaning of "the knowledge necessary for given offices and social functions". Thus one could speak of an *adab al-kātib* or culture specially required for holding the office of secretary (such is the title of a treatise by Ibn Kutayba [cf. also Kātib]); or of the *adab* or *adab* of viziers, in the sense of the sum of special knowledge and experience proper to this office. (For the *adab* of the *hādh*, cf. also Kātib). On the other hand, the concept *adab* ended by losing the wide humanistic acceptance that it had had during the golden age of the caliphate and became restricted to a narrower, and more rhetorical sphere of "belles-lettres": poetry, artistic prose, peneumography, and anecdotal writing. This was the kind of *adab* at which al-Harīrī was an adept, with his verbal virtuosity and his entirely formal and purist interests. From *humanitas*, *adab* had become merely the literature of the academy, and remained so throughout the long decadence of Arabic letters and spirit right up to the time of the modern renaissance.

In the modern age *adab*, and even more so its plural *ādāb*, are synonymous of literature in the most specific sense of the word. *Ta'arūf al-Ādāb al-'Arabīyya* is the history of Arabic literature, *hukūyat al-ādāb* is the faculty of arts of letters in the universities organized in the European manner. But beyond the limits of technical nomenclature, the common usage of certain writers (e.g. Ṭahā Husayn) tends to give back to the word something of its former elasticity and amplitude.

**'ADAD** [see *ʿADAD*].

**ADAL**, one of the Muslim states in East Africa that played an important part in the wars between Islam and Abyssinian Christendom. Al-Makrizi (*al-Imām bi-ʿAdhīr min bi-ʿAdh al-Habasha min Mulūk al-Islām*, Cairo 1895, 5) enumerates the following seven Islamic states in Southern and Eastern Abyssinia which he designates as *mulūk al-bald Zaylaʾ*: Awlat (the common form is ʾIṭā), Dawrēb, Arayabul (Arabayul, Arabahul), Hadāyā, Shāhāb, Bālī, Dīra. From Abyssinian chronicles, other states are known which stood on the same footing as the above, one of them being Adal.—Adal ('Adal) is the farthest east of those states, and is approximately identical with the present "Côte française des Somalis". The inhabitants are partly Somali, partly ʿAtar (Danāki) [see DANAKIL]. It is mentioned for the first time in the wars between the Abyssinian king ʿAmḍa Seyōn (1314-44) and the Muslims. In the march of ʿAmḍa Seyōn upon Zaylaʾ (1332), the king of Adal, who attempted to bar his passage, was vanquished and killed. The rulers of Adal have the title of *amīr*, later on also the title of *imām*, in the Arabic texts, but of *negus*, "king", in the Ethiopic chronicles. In the 15th century Adal was part of Ifāt (Awlat [s.v.]); in the 15th century the *amīr* of Adal ruled over Ifāt and had his capital at Dakar to the east of Harar. Under the kings Zarʿa Yāʿqūb (1434-68) and Baʿda Māryām (1468-78) negotiations took place between the Abyssinians and Adal; afterwards there was fighting between them with changing fortune. Adal frequently served also for the Muslims from districts further to the west as a refuge from the Abyssinians, who, however, often followed them thither. The Muslim writers (al-Makrizi and ʿArabīkī, *Futūḥ al-Habasha*) do not mention Adal—unless it is meant by ʿAdal al-Umarʾi (al-Makrizi, loc. cit., 2)—but refer only to the sultanate of Zaylaʾ in that region. Further, the king of Adal, Melḥam son of Arwē Badlīy (Perruchon, *Chroniques de Zarʿa Yāʿqūb et de Baʿda Māryām*, 131), belonged to the family of the sultans of Zaylaʾ; he was a grandson of the celebrated Saʿd al-Dīn, after whom the dynasty and the land were called (Harīr Saʿd al-Dīn). The latter reigned 1368-1435; he fell in 1435 in the battle with King Yeshūʾ of Abyssinia (1414-29). "Adal", "empire of Zaylaʾ" are often synonymous, and their histories are closely connected with each other [cf. ZAYLAʾ]. With regard to the 16th century see also AHMAD GRÄN. In the later history of those countries, the wars with the Muslim Somali and ʿAtar are thrust into the background by those with the Galla, who since 1540 warred with the Christians and Muslims of Abyssinia. Adal is still mentioned a few times in the chronicles. Even in the 19th century, before England, France and Italy took possession of the Abyssinian littoral, King Shāhā-Sallāh of Shoa called himself also "King of Adal".

**'ADALA** [see *'ADL*]. (E. LITTMANN\*)

**ADAM** [see *ʿADAM*].

**ADAMA**, the father of mankind (Abū'l-Baqhār). In the Kurʾān it is related that when God had

created what is on the earth and in the heavens he said to the angels: "I am about to place a substitute (*dhāliḥa*) on earth", and they said: "Wilt thou place thereon one who will do evil therein and shed blood, whereas we celebrate thy praise and sanctify thee?" Then God taught Adam the names of all things, and as the angels did not know the names Adam taught them these (II, 28-32 ff.). Thereafter God ordered the angels to prostrate themselves before Adam, and when they did with the exception of Iblīs who in his haughtiness said that he was of higher rank, since he was created of fire, whereas Adam was created of clay (II, 33; VII, 12 f.; XV, 26-36; XVII, 64; XVII, 49; XX, 116). Cf. XV, 27 "we created man of dried clay, of black shaped mud". Iblīs was expelled from the garden (VII, 12; XVII, 66), in which Adam and his wife were placed to live pleasantly there, but with the order not to come near to "this tree" (II, 35; VII, 19, cf. XX, 116 f.). Next follows the fall of man. "And Satan (*al-shayṭān*) caused them to slip from it (the garden) and had them removed from the state wherein they were" (II, 36). He whispered to them in order to reveal to them their nakedness, and said that the tree was forbidden to them lest they should become angels and live eternally. So they ate of the tree and saw their nakedness, and they sewed the leaves of the garden to cover them (VII, 20; XX, 120 f.). Then God sent them down on earth to live there as enemies, but when Adam asked for forgiveness, God promised him guidance (II, 36-37; VII, 24-26; XX, 122-123). It is said that God had a covenant with Adam at first, but Adam forgot it (XII, 125), and God said: "Have I not had a covenant with you, sons of Adam, that you will not serve Satan?" (XXVII, 60, cf. v, 172). Adam was chosen by God, as later Nūḥ and the families of Ibrāhīm and Muḥsin (II, 23). Like Adam only ʾIsā was created in a special way (III, 59).

The non-biblical elements in this account are to be found in Jewish, in some cases in Christian tradition. God's conversation with the angels before Adam's creation, and Adam's superiority because of his knowledge about the names is known from *Bereghit Rabba*, XVII, 4; *Hemidbar Rabba*, XII, 3; *Pesikta*, ed. S. Buber, 342; *Vita Adami* (Kautsch, *Pseudepigraphen*, 513). The *ἡμετέρας* of the before Adam is not commanded by God in Jewish writings. The angels wanted to honour him as God, but were prevented from doing so as God made Adam sleep (*Bereghit Rabba* 8, 10; *Pirke R. Eliezer*, 19). On the other hand Athanasius (*Quaestio X ad Antiochum*) refers to the idea (which he rejects) that Satan fell because he refused to *ὑποκρίσθαι* before Adam. In *Vita Adami*, LC., whose origin is uncertain, the angel Michael prostrated himself to Adam and called upon the other angels to do so, and it is understood, but not said, that God approved of it. In the Christian Syriac *Cave of Treasures* (ed. Bezdol, 14 f.) God gave Adam power over all beings, and the angels worshipped him except the jealous devil who then was turned out from the heavens. God's covenant with Adam is mentioned in *Sanhedrin*, 58b; *Augustin, De civitate Dei*, xvi, 27, and Adam's reverse *ʿYrabin*, 18b; *ʿAdama Zura*, 8a; *Vita Adami*, 51a.

In post-Kurʾanic tradition the *hijab* about Adam were growing, and these also reflect to a great extent Jewish and Christian influence. They are mainly found in *hādith*-collections, in *biṣṭ*-collections, in the works of general history, and in the commentaries to the Kurʾān.

As a preparation for the creation of Adam it is

related that God sent Gabriel and after him Michael to the earth to take a handful of clay (mud), but the earth refused to give it for that purpose, then the angel of death was sent and took by force red, white and black clay; this is why men have different colours. Adam got his name because he was taken from the surface, *ādīm*, of the earth. The clay was kneaded and worked on until it became sticky, then slimy, stinking and at last a body of dry clay (*ʿadāḥ*). Some authors tell that Iblīs went into his mouth and emerged from his anus and vice versa; then the spirit was blown into him by God and went into his brain, from where it went into his eyes, his nose and further through the whole body, whereafter the body became flesh, blood, bone, veins and sinews. According to a tradition ascribed to the prophet the dust for the head was taken from the Kaʿba, for breast and back from Jerusalem, thighs from Yaman etc. (al-Tabarī, I, 87 ff.; idem, *Tafsīr*, I, 159; al-Masʿūdī, *Murūʾī*, I, 51-3; al-Kisāʾī, 23-7; al-Thaʿlabī, 17). In Jewish tradition the clay for Adam's body was taken from the place of the temple or from the whole world, in different colours, and Adam was first shaped as a lifeless body (*golem*) (*Targum Yerushalmi*, to Gen. II, 7; *Sanhedrin*, 38a; *Pirke R. Eliezer*, c. 11); a similar Christian tradition is found with Cyprinus and Augustine. The beauty and the length of the body of Adam are mentioned in Muslim tradition (al-Thaʿlabī, 22, cf. Kurʾān, XXV, 4) as well as in Jewish (*Bereghit Rabba*, vii, 1; xii, 6; *Sanhedrin*, 38b) and Christian (*Cave of Treasures*, ed. Bezdol, p. 12) literature.

The Jewish literature follows the tale of the Bible, in which the serpent seduces man. In *Vita Adami* (Kautsch) 52r, Satan speaks through the mouth of the serpent, and this is Christian tradition (*Cave of Tr.*, 22; *Augustin, De civitate Dei*, xiv, 11; Bar Hebraeus, *Taʾrīkh Mukhtasar al-Duwal*, 7). Whereas the Kurʾān speaks only of Satan as the seducer, the Muslim tradition also introduces the serpent. The serpent speaks by order of Iblīs (al-Tabarī, *Tafsīr*, viii, 107), or Iblīs is carried into the garden by the serpent in its mouth or its belly (al-Tabarī, 104-6). In the *Kisās* of al-Kisāʾī, (36-9) and al-Thaʿlabī, (20) the peacock (*ḥafā*) appears. Iblīs tries to enter the garden in order to seduce Adam, but God prevents him. Then he meets the peacock, the chief of the animals in the garden, whom he tells that all creatures shall die, but that he can show where the tree of eternity is. The peacock tells this to the serpent, the serpent goes to Iblīs, who rushes into its mouth and thus comes into the garden and speaks through the serpent to Adam and Eve, and Eve eats of the tree. The forbidden fruit is in Jewish tradition mainly named as grape or fig or wheat (*Bereghit*, 40a; *Bereghit Rabba*, xv, 7); the same and other opinions are found in Christian and Muslim tradition (al-Tabarī, *Tafsīr*, I, 183 ff. and other commentaries to Kurʾān, II, 35; al-Thaʿlabī, 19). [For Eve see HAWWA.]

As Adam was ordered to "go down" (*hāḥala*) to the earth paradise was thought to be in heaven. al-Tabarī says (II, 124) that the tradition that Adam was placed in India (al-Hind) has been refuted neither by Muslim, Christian nor Jewish scholars. The most common tradition is that he alighted in Ceylon (*Sarandīb*), Eve in Djidda, Iblīs in Bayṣān (or Mayṣān or Ubulla), the serpent in Ishāḥā (or the desert). Later Adam and Eve met in Muddalifa and ʿArāfa (al-Tabarī, I, 121; al-Masʿūdī, I, 60; al-Bukhārī, I, 3; al-Thaʿlabī, 21 f.). This is to be understood in connexion with the idea that Adam,

who according to a tradition founded the Jewish festivals (*'Aboda Zara*, 84), accomplished the *hadisti* ceremonies, the black stone being sent to him from heaven, whereas he built the Ka'ba (al-Tabari, i, 122; al-Ya'qubi, i, 3; al-Tha'labi, 23). He also learned, with Eve, the use of fire, agriculture and handicraft, according to a tradition of Jewish origin (Hanza al-Isfahani (Gottwald), 84, Berlin 1340, 57; al-Tabari, i, 123, 126 ff.; al-Tha'labi, 23, 25). According to al-Tha'labi he even coined *dirhams* and *dirhams*, as they are necessary for normal life. In continuation of the foregoing it is said that Adam learned all nouns and greetings and religious formulas (al-Tabari, i, 93 ff.; al-Ya'qubi, 3). The presupposition is that Adam spoke Aramaic (*Sa'ad bin*, 38; Barhebraeus, *Chron. Syr.*, 3). Al-Halabi (*al-Sira al-Halabiyya*, Cairo 1320, i, 20) says that Adam spoke Arabic in Paradise, but on the earth he spoke *uryzinyiya*, and he wrote the 12 known kinds of writing, al-Khat' (28) that he spoke 700 languages, of which the best was Arabic. He also wrote books (al-Dinawari, 8).

When Adam and Eve were united they begot children, first Kabil and Habil (g.n.), each with a twin-sister. Adam married them each to the brother's twin-sister, therefore Kabil was jealous and killed Habil. Shith (g.n.), who was born without a sister, was the favourite of Adam and his spiritual heir (*warid*). Adam begot many other children, one of whom was named 'Abd al-Harith; al-Tha'labi says that Eve bore a boy and a girl twenty times and that the number of Adam's offspring was 40,000 before he died. Al-Halabi mentions five gods of the Arabs who were sons of Adam; Iblis made images of them and these were worshipped by later generations (al-Tabari, i, 149 ff.; al-Mas'udi, i, 62 f.; al-Ya'qubi, 4 f.; al-Tha'labi, 27; al-Halabi, *Sira*, i, 28).

God rubbed the back of Adam, and all his offspring appeared to him, amongst them David. When Adam heard that David should live only a short time he gave him 40 (50 or 70) years of his own life-time, so that he did not reach the 1,000 years that were destined for him (al-Tabari, i, 156 f.; Ibn Sa'd, *Ur.*, 71; al-Tha'labi, 26). The same occurs in Jewish tradition (*Benjamin Rabba*, xvi, 12; *Yalshai Sime'on*, § 41; *Pirke R. Eliezer*, c. 19), and a related idea is the Christian tradition that everything was created at the same moment (Barhebraeus, *Ta'rikh Mukhtasar al-Dinawari*, 7).

Adam was created on Friday, the 6th of Nisan, year 1. On the same day he was expelled, and he died on a Friday at the same date of the month (al-Tabari, i, 155 ff.; al-Mas'udi, i, 60; al-Ya'qubi, i, 4). He was buried, with Eve, in a cave, *magharat al-humaz*; at the foot of Abū Kubays near Mecca (al-Tabari, i, 163; al-Ya'qubi, 4). Al-Tha'labi, 30, relates that after the flood he was brought to Jerusalem, following a Christian tradition that he was taken from the ark to Golgotha, the centre of the earth (*Cane of Treasures*, 38-42, 84, 112, 148), where the "chapel of Adam" is situated in the church of the holy sepulchre (see W. H. Roscher, *Der Omphalosgedanke*, Leipzig 1918; E. Wulstrand, *Konstantin's Kirche am heiligen Grabe*, Göteborg 1952, 36 ff.).

Adam was not only the first of men, but also the first of prophets, and so his position became influenced by the Muslim way of thinking. Just as Jesus was the second Adam in Christianity, a connexion was established in Islam between Adam and Muhammad, with Adam as the first, Muhammad

as the last apostle (*rasul*). In the *Sub'it'ya* system Adam is the first of the 7 *adams*, and some say there were men and *nabih*'s existing before him. Seth was his *awad*. They distinguish between *Adam al-kull* 'all-Adam', identical with the intelligence (*'adl*), from whom the emanation began, and *Adam al-jawid*, the first one in the period of veiling. It is this ideal Adam before whom the angels prostrated themselves because he was godly, God's spirit being in him. This is sometimes designated as an incarnation (*hulul*), which was continued by transmigration (*tawassul*). This deified ideal man was identified with "the perfect man" of Hellenism, and the same was by al-Halabi named *nabih*, as Muhammad became the centre of mankind, an idea especially emphasized in sufism, it became his essence (*hakika*) or his "light" (*warid*) that manifested itself in Adam. All creatures were created for the sake of Muhammad, and Adam and his offspring were created of his light (al-Mas'udi, i, 56; al-Sira al-Halabiyya, 23; al-Tha'labi, 16).

(J. PEDERSEN)  
'ADAM (A.) is a translation of the Aristotelian term *στυγνός* (*privatio*) and means the absence of existence or being. A definition of the word is found in Aristotle, *Metaphysics*, v, 22 and is taken over by the Arabic Aristotelians. On the whole in Aristotelian philosophy two meanings of the word must be distinguished: (1) absolute non-existence, that is absolute nothingness, (2) relative non-existence, namely (a) the absence of a quality in matter, (b) the pure potentiality of matter. Since the absence of a quality contains, according to Aristotle, potentially its opposite, it has as potentiality a certain positive character. The Aristotelian theory of becoming is based entirely on this concept of privation. There is no absolute becoming, all becoming is the actualization of a relative non-existent or potential.

However, for Aristotle, even pure nothingness seems to have a certain being, for, according to him, by being something it is. But it is the Stoics who have discussed most actively the problem of the existence of the non-existent and it is the representation of their discussions and their terminology which is found in Islam among the theologians. In particular the Mu'tazilites held that the non-existent is a thing (*shay'*), an entity (*dhāt*) and something positive (*qadīm*). According to them, before the existence of the world God knew the entities which He was going to create and what He knew had, since He knew it, a certain reality. Creating the world He gave those entities the accident of existence.

Among the philosophers al-Fārabi and Ibn Sīnā regard, like the Mu'tazilites, existence as an accident, whereas for Ibn Rushd, as for the Ash'arites, existence is an essence.

*Bibliography*: The theory of 'adam as proposed by the Mu'tazilites is found in the works dealing with that sect (e.g. Ibn Hazm, *Fisal*, v, 45); a good discussion is found in Shahrastānī, *Nabih*, al-*Adnā'* (Göttingen), 130 ff. For a general discussion of the problem I refer to S. van den Bergh, transl. of Ibn Rushd's *Tahafut al-Tahafut*, ch. i and ii; see also S. Pines, *Beiträge zur islamischen Atomlehre*, 116 f. (S. VAN DEN BERGH)

ADAMAWA, the name—deriving from the local leader of the Fulani *gɔɔɔ* in 1809 (see para. 5 below)—given to a region in the hinterland of West Africa, and used:

(a) of an area never precisely defined in geographical terms but including the conquests of this *gɔɔɔ* and the resulting sphere of Fulani influence in the region, extending from Marua in the north to well beyond Ngauru in the south and from the Benue in the east to west of Yola, approximately from 11° to 6° N. and 12° to 12° E. With the European occupation of this part of Africa early in the present century, the smaller and more closely populated western part came under the British administration of Nigeria, the eastern section became part of the German Kamerun, which, after the German defeat in the 1918-19 war, was mandated to Great Britain and France by the League of Nations.

(b) of a Province, area according to 1931 census 281, 778 sq. miles—known until 1927 as the Yola Province—in Northern Nigeria, containing that part of (a) west of the original Anglo-German international boundary, plus those areas of the former German Kamerun mandated to Great Britain. These consist of a small area north of the river Benue, and a larger area to the south of it. The Adamawa Province also includes the Amirate of Muri in its south west corner and some tribal areas, not covered by the old name Adamawa. It lies south of the Bornu Province and east of the Bauchi Province of Nigeria.

2. Geography. The main features of Adamawa are the river Benue—the principal tributary of the Niger—and an international water-way which is navigable by steamers at the height of the wet season (August to October), and by large canoes and barges at all times,—running across its centre from east to west; the Mandara Mountains, over 3,000 feet, running north and south, north of the river Benue; and an extensive crescent-shaped massif,—over 5,000 feet at its highest western end,—curving from east to west south of the river Benue.

3. Transport and Trade. The river Benue is itself extensively used for transport; the main caravan routes and modern motor roads run from south to north through the region. In earlier days, slaves and some ivory were the main exports; nowadays ground nuts and hides have replaced these. The region has numerous other items, including cotton, gum, sesame, etc. Imports consist of manufactured articles, especially cotton goods.

4. Economy. The region is not industrialised, and contains no large towns. It is self-contained so far as the necessities of life are concerned. Its population is mainly agricultural and pastoral. Its capital wealth consists in the numerous herds of cattle, sheep and goats.

5. Ethnography. (a) The population of the region comprises the Fulani (see article *FULANI*), both

nomad and settled, and numerous pagan tribes. It is not possible to give figures with any accuracy for the indefinite region described in para. 1 (a) above. At the census of 1931, the salient figures for the Adamawa Province of Nigeria (para. 1 (b) above) were as follows: Fulani 150,936; Hausa (g.n.) 21,506; Kanuri (g.n.) 10,495; other tribes 467,138; these plus some minor groups gave a total population of 1,024,755.

The figures for the main pagan tribes were: Bachama 19,793; Chamba 51,224; Homa 6,604; Bata 23,003; Hiji 6,284; Kilba 22,799; Lala 9,733; Longuda 12,809; Mambilla 19,348; Mumuye 79,272; Vere 10,866; Wurkun 25,472; Marghi 151,223.\* (Starred figures include members of the tribe outside the Provincial boundary, but inside the old "Adamawa").

(b) Languages. Fulani (Fulfulde, see under *FULANI*) is the major language of the region, and the nearest approach to a lingua franca in it. Many of the pagan tribes now use it as such, though they have their own tongues, some of which are interconnected in varying degrees (e.g. Bura and Marghi with Kilba have a common dialect). Hausa is not much spoken outside the towns, and in them mostly by the trading elements. English and French are spoken only by those educated in the more advanced schools in the west and east of the region respectively.

6. History. Prior to the Fulani *gɔɔɔ*, we have only orally transmitted tribal traditions. Most of the major tribes north of the river Benue do not claim to be indigenous and have traditions of immigration from the north and/or east. It seems clear that this was formerly the general direction of tribal movement, owing to the increasing desiccation of the Saharan areas further north, and a consequent thrust of those tribes least able to survive southwards to the better ridden coast. The Fulani must have entered Adamawa centuries before the *gɔɔɔ*. Local pagan tradition speaks (i) of an offshoot from the main Fulani tribe (round the north and west African coasts, subsequently entering the West African hinterland from the direction of Senegambia), which entered Bornu and thence Adamawa from the north, having crossed the central Sahara by the westerly caravan route via Mauritania and Bilma; and (ii) of those Fulani arriving cattleless, having lost their herds en route, and then of their obtaining cattle from the local pagans. With the *gɔɔɔ* we come to firm historical ground. When Usmanu bi Foduye (see *USMANU B. FODUYE*) started a *gɔɔɔ* in the Sokoto area in circa 1804, his reputation spread, and he was joined by a certain Modibbo (Fulani for *mu'allim*) Adama. This Modibbo Adama was born near Gurin, east of the Vere hills on the west bank of the Fazo tributary and just south of the river Benue, had studied in Bornu as a youth under a certain Modibbo Kiar thereafter returning to a village called Welutunde in the Benue region. In 1806, Usmanu gave M. Adama a flag and a few warriors with instructions to return to his own country and to start the *gɔɔɔ* there. In 1809 Modibbo Adama began a *gɔɔɔ* from Gurin, thus embarking on a career of conquest and slave raiding amongst the local pagan tribes. Speaking generally, the Fulani horsemen achieved success except where the pagans could avail themselves of mountainous features unsuitable for mounted men. In such areas, many pagan tribes, such as the Hiji, Marghi and Kilba north of the Benue and the Mambilla, Chamba and others south of it, maintained actual or virtual independence until the European occupation.

In 1838, Modibbo Adama transferred his headquarters from Gurin (now only a tiny village, but still hallowed for its associations), to the nearby Ribadu, in 1839 to Joboliu a little to the west, and, finally, in 1841, he founded Yola still more to the west (in Fulani the name means a raised area in a marsh, where he died in 1848. All these places are just south of the Benue river, and it is obvious that the intention was to control the river crossings. Details of the dynasty founded by Modibbo Adama are given below. The Fulani conquests, often amounting to little more than raids, were never closely organised except near to the capital. The administrative system was one of fiefs, feudal in character, the lesser chiefs owing allegiance to the *lamido* (Fulani = *amir*, plur. *lamibe*), and rendering tribute. But the tendency was centrifugal, and these fief holders (Fulani =

of magnitude. After an initial period of raid and counter raid, the German Kameruns were taken by an Anglo-French expeditionary force, which captured Garua on 10.6.15, and Ngamere 28.6.15. The German mountain fortress of Mora surrendered 18.2.16.

Literature ... of Nigeria*, J.R.A.S. 1943; *Infante's Manuscript* (Whitting), London 1933; Nigerian Government publications since 1900.

(C. E. J. WHITTING)

#### THE AMIRS OF YOLA

*lamido* plur. *lambe*) often achieved virtual though not nominal independence, in proportion to the distance of their fief from the capital. Good examples of this tendency were found in Madagari and Rei Daba in the north and east of the region respectively. Adamawa as a name for the region seems to have become current in the Modibbo's lifetime, for it was in use in Bornu when Clapperton was there in 1823-4.

7. Religion. Islam is the religion of the Fulani and many pagans have been converted and are in process of conversion to it, though adherents of the animistic cults are still numerous. Christian missions now operate in the region. Of these the most important numerically are the Church of the Brethren (American) in the Bura-Marghi tribal areas north of the river Benue, and the Sudan United (Danish) among the riverain Bachama tribe, west of Yola. In the 1931 census, of the total population of 1,024,755 for Adamawa Province, 674,516 were recorded as Muslim, 348,791 as animist, 7,455 as Protestant. It is certain that the next census will show considerable decrease of animists, a large increase of Muslims and some increase of Christians.

8. Miscellaneous. The first recorded European explorer was Dr. Barth in 1851. The French Lieut. Mizon visited the region in 1862-3. The Niger Company traded from bulks in the river Benue for several years before the actual military occupation of Yola by British forces on 2nd September 1901, when Yola Town was spiritedly defended with the help of deserters from Rabe's forces (see under Bornu) armed with modern rifles, and two cannon presented to the then Lamido by Lieut. Mizon, contrary to agreements negotiated by him. The German forces occupied Garua in March 1902, and the Anglo-German international boundary was delimited by a commission in April 1903. During the world war of 1914-8 the region was the scene of military operations on a considerable scale, involving transport difficulties

'ADAN (ADEN) (i) town, (ii) British crown colony, (iii) British protectorate in S.W. Arabia.

(i) Town and seaport on the South coast of Arabia, in British possession since 1839, with a mixed population of ca. 35,000. 'Adan (cf. akkad. *adina* "staple"), more precisely 'Adan Ahyari (by way of distinction from 'Adan LA, and 'Adan in a verse of Ufnid al-Taghlibi; cf. Yāqūt, iii, 622 f.; Kay, 232; AM, ii, 17, 284), or *Ṭaḡr* 'Adan from its being strongly fortified, is the *Athene* of Ptolemy, *Ἐρριπύλιν* of Philostrophos, *Ἐρριπύλιν* of the Periplus, *Ἀρριπύλιν* of Ptolemy (cf. Paddy-Wisniewska, *Suppl.*, iii, 6), and most probably the 'Aden of E.E. xxvii, 23 (see recently v. Wissmann-Höfner, *Beiträge* 306 (88), where also the triple *Ἐρριπύλιν* of CH 350, which may, however, be a fake, is quoted). For other names of the place see al-Makdisi, 30, IM, 110 (= Löfgren, *Arab. Texte*, I, 29).

The peninsula of 'Adan is an extinct volcano, nowadays called *Shamshān* (vulg. *Shamsam*), in earlier time al-'Urr "the mountain" ('Urr 'Adan); it is 1775 feet (ca. 550 m.) high. On the east side is a gap in the range opposite to the island of Sirā; here is the main part of the town, and the habitations reach the sea. 'Adan was once an island: the low and narrow isthmus is still nearly covered at high spring tide. This disadvantage was removed by means of a bridge, al-Maksir, built by the Persians (cf. "Khor Makasar" west of the isthmus). Beside the main volcano there are several minor heights, e.g. *Ḍabab* Sirā, *Hukāt*, *Marshak* (with a large light-house) and *Ḍ. Hadid* (west of the isthmus).

The old harbour was on the east side, in connexion with the town; a mole (*ḍamal*) was constructed to protect it against the SE wind (*azayāh*). The excellent harbour to which 'Adan now owes its importance is the large and well protected bay between the peninsula of 'Adan and that of "Little Adan", with the mountains Muzalkam "Sugarloaf Peak" and *Iḥsan* "Ass's Ears". Bandar Tawayih (Tawāhīh),

as the modern port is called, extends along the NW shore (for details see *Red Sea* and *Aden* *ibid.* 135). The habit of constructing dams and cisterns, typical of old Sabaean culture, has left traces in the 'Adan territory. There are remnants of some fifty reservoirs scattered over the peninsula. According to IM they were built by Persians from Sirā. They are attested by Salt in 1809 and by Haines, the future conqueror of 'Aden, in 1835, to be in a tolerable state, but from 1839 on they were neglected, and much of their stonework was carried away until 1836, when the restoration of those inside the crater was begun. There are thirteen tanks holding nearly two millions litres of water, but the scanty and irregular rainfalls seldom fill them completely. There are numerous wells within the crater and in the west part of the peninsula (cf. IM, 121 f.), but they cannot supply the need of drinking water, being for the most part brackish. In the Middle Ages al-Hayk (= al-Hawa of to-day?) was "the watering-place (*manhal*) of 'Adan" (al-Hamdān, 53). In 1807 the British government got the permission of the sultan of Labḍ (g.n.) to build an aqueduct from the village of *Shaykh 'Uḥmān*. Later on cisterns were installed.

Legend usually ascribes the foundation of 'Adan to Shaddād b. 'Ad (g.n.), who is said to have caused the famous tunnel to be cut through the mountain range and to have used the place as a prison. We are told the same of the *Tubba's* and the Pharaohs of Egypt, whence the name al-Habs or Habs Fir'awn. According to old tradition (e.g. al-Tarīf, I, 104) Kābil, having killed his brother Ḥābil (g.n.), fled with his sister from India to 'Adan, where he was visited by Iblis on *Ḍj. Sirā* and taught the use of musical instruments. His grave is shown to-day above the Main Pass gate. The "abandoned well" (*ḥīr mu'atḥ*, Kur., xxii, 44) and *Iram* (*Ḍabab al-'Imād* [g.n.] (Kur., lxxix, 6) are located in or near 'Adan. The tradition of a fire coming from Yaman or 'Adan (Sirā) and portending the day of judgement, ascribed in *Ḥadīth* to Muhammad, may be some sort of reminiscence of volcanic activity. IM makes Hanuman, the Indian ape-god who has a temple in 'Adan, fetch the wife of Rāmacandra along a subway back to Uḍḍiyāni from Sirā, where she had been brought by a demon (*Rāvana*).

Population. According to al-Hamdān (53, 124) the Arabs of 'Adan were divided into three factions: Marāb, Ḥumāhim (var. *Ḍjamāḍim*, IM) and Malāḥ (cf. Yāqūt, iii, 622; BGA, iii, 302, iv, 206). The great number of Hindus and Somalis indicates a constant immigration by sea. IM 117 ff., has details on early migrations from Madagascar (*Kumri*) via Mogadishu and Kilwa, and of Persians from Sirāf and Kays (Kigh). Cf. Ferrand, *Le K'ouen-Louen* etc. (JA, 1919); Golden, in *BSOAS*, 1954, 247 ff.; idem, in *Spexnum*, 1954, 181 ff. A considerable number of the Jews of 'Adan (about whom see *Encyclopaedia Judaica*, s.v. *Aden*) were in recent years evacuated into Israel.

The early history of 'Adan is very imperfectly known. From the *Periplus* (ca. 50 A.D.) we learn that the place had been destroyed recently by KAICAP (probably an error for IACAP = Hagarah Vahid, cf. v. Wissmann-Höfner, *Beiträge* 88), but in the time of Constantine the "Emporium Romanum" had recovered its old splendour; a church was built by the bishop Theophilus ca. 342. Later on 'Adan lost its importance in favour of the Red Sea ports of Adulis and Ghulifika. The Persians (from 575 on) favoured culture in Yaman, building cities and bathhouses, and installing tanneries. After Bāḍiān, the last

Sāsānid governor, had submitted to Muhammad 'Adan was visited in 106/651 by 'Alī, who preached from its *mosque*. A mosque built by 'Umar b. 'Abd al-'Azīz was restored by Husayn b. Salama, the vizier of Banū Ziyād (204-429/819-1037). In 454/1062 'Alī b. Muhammad al-Ḥulaybī, *dā'i* of the Fātimids of Egypt, conquered 'Adan and presented it to Harra Sayyida at her marriage with his son al-Mukarram in 461/1069. Banū Ma'n, since 470/1079 in possession of 'Adan after the Ziyādis, were left in charge of the place until 476/1083, when they rebelled and were replaced by two brothers of the Hamdanid family of al-Karam (Mukarram) b. Yām, the founders of the Zuray'id (g.n.) dynasty. 'Abbas took up his residence in the fort of Ta'kar, controlling the isthmus gate, while Ma'sūd held the castle of Khāḍir and superintended the trade. Later on the town was united in the hands of Maḥ. b. Saba' (534-48/1139-53) and his son 'Imrān (-560/1165). The *ḥarāridj* of 'Adan by this time is given as 100,000 *ḍīnār* a year. In 569/1173 Tūrān Shāh, the brother of Saladin, conquered Yaman by means of Turkish mercenaries (*Ḡhuz*). The periods of Ayyūbid (-625/1228), Rasūlid (-658/1244) and Tāhid (-923/1517) dominion were a golden time for the trade of 'Adan. A new tax, collected by galleys (*ḡhawḍi*), was introduced by the Ayyūbids.

The discovery of the sea-route to India and the rise of the Ottoman power mark the beginning of decline in the trade of 'Adan. The Portuguese admiral Albuquerque attacked the town on Easter Eve 1513 with twenty ships, but did not succeed in taking it. In 1538 a Turkish armada on its way to India outwitted the defenders, and the Turks dominated Yaman for nearly hundred years. 'Adan was lost to the Zaydi imams of Sa'nā' in 1568 and in 1630 the Turks left it finally. In 1735 'Adan passed into the hands of the 'Abdālī sultan of Labḍ, whose descendant Muḥsin was forced to cede it to the English expedition under Captain Haines, which had been sent to get an indemnity for the plundering of a British ship. In view of the sultan's treacherous attitude the place was taken by storm on the 20th January 1839. Of the prosperous town visited by Marco Polo in 1276, with 80,000 inhabitants and 360 (!) mosques, there was now left a miserable village of 600 persons living in huts. Since then the development of 'Adan has progressed rapidly, especially after the opening of the Suez canal in 1869, and this "Arabian Gibraltar" is now a mercantile centre of great and increasing importance.

Buildings. A wall was built by the Zuray'ids for the protection of trade, and houses of stone increased in number. After the depart of Tūrān Shāh his viceroy in 'Adan 'Uḥmān al-Zandjīlī (Zandjīlī) built a larger wall, with six gates, and a custom-house. Other secular buildings of Tughtekln b. Ayyūb, his son Ismā'īl, the Rasūlid 'Alī al-Muḍlībī, and the Tāhidī Ḥabīb al-Wahhāb are recorded, AM, 10 ff. Of the "hansoms" bath, lined with marble and jasper, and covered with a dome", which were seen in 1708 by de Merville (Playfair, from La Roque), nothing is left. Among the mosques of 'Adan the most celebrated is that of Abū Bakr al-'Aydārīs (g.n.), the patron of the town, whose *ziyāra* is held on 15 Rabi' II. Other *maḥajīds* are mentioned by Hunter (173 f.) and in AM.

**ADANA** (in Arabic script *Adhāna*, *Adāna*, *Adāna*, in later times *Ānāna*), (i) city in southern Anatolia, (ii) Ottoman *wilāyat*.

(i) Adana, situated at 37° N, 35°18' E, in the northern part of the plain of Cilicia (Cukurova), on the right (western) bank of the Seyḡān river (the ancient Sarus), in Ottoman times the capital of the *wilāyat* of Adana, since 1935 of the *wilāyat* of Seyḡān (see (ii) below); flourishing trading centre; population (1950) 117,799.

*History*. The changing fortunes of the city have been largely dominated by its geographical situation at the foot of the Taurus passes. Lying at the intersection of the opposing spheres of interest of the Anatolian empires pushing southwards over the Taurus and the Syrian empires expanding towards the north, whose balance of forces or common weakness allowed the establishment of minor dynasties from time to time (Rubenids, Ramadānids), it found security only in an empire which embraced both Anatolia and Syria, as before the Arab conquest, and later under the Ottomans. Adana is an ancient settlement, which seems to have flourished at the time of the Lydian kings, was resettled by Pompey after its destruction by war, and under the East Roman empire was an important commercial centre which competed with Tarsus (cf. Pauly-Wissowa, i, 844).

Adana was occupied by the Arabs in the middle of the 7th century, but frequently changed masters in their struggle with the Byzantines. Depopulated by the constant frontier wars, it was rebuilt by Ḥārūn al-Raḡḡīdī and his successors and became a bastion in the chain of fortresses of the 'Syrian marches' (Iḡḡḡāl al-ḡḡḡ). In 875 it was temporarily taken by Ḥārūn al-Raḡḡīdī and again in possession in 944-6, but recaptured by the Arabs after a siege in 964. In 1023 Cilicia was again occupied by the Byzantines, who could not however hold it permanently; nor apparently were the victorious Selḡūks (1071) able at first to establish themselves in the province (cf. J. Laurent, *Byzance et les Turcs* . . ., Paris 1913, 17). At any rate, in 1082 Adana again belonged to the Byzantines, but was taken by Sulaymān b. Kutulmuş in 1083 (J. B. Chabot, *Chronique de Michel le Syrien*, Paris 1905, 179). After its occupation by the Crusaders in 1097, it belonged at first to the principality of Antioch, but in 1104 was detached by Alexis I and came under Byzantine administration. In 1122 it belonged to Leo of Lattaqia, Armenian, in 1127 became Byzantine, in 1138 was occupied by the Rūm Selḡūks Maḡūd, in 1171 (at the latest) again Armenian, in 1178 Byzantine, finally in 1178-3 incorporated by the Rubenid Meḡ in his Armenian state, in which it remained for a long time, although exposed to repeated Muslim attacks. Baybars, after his victory at Antioch in 1266 appeared before Adana; the Mamūlūks sacked the town in 1275 and 1304, and attacked it in 1355. It remained, however, in Armenian hands (except for 1341-4, when it fell by inheritance to Guy de Lusignan). In 1359 it was occupied by the Mamūlūks, and became the capital of a *niyāha*. In 1378 the governor was the Turkmen Yüreci-oghlu Ramadān, who, acknowledging the suzerainty of the Mamūlūks, extended his dominions and founded the buffer-state of the Ramadān-oghlu [g.n.]. He and his successors followed sometimes a pro-, sometimes an anti-Mamūlūk policy, securing for Adana a relatively quiet time. The inner conflicts and the invasion of the Dḡu 'T-Rāḡīdī Shāhsuḡār in 1467 do not seem to have disturbed the city. In 1485-9 the Ottomans endeavoured unsuccessfully to detach Adana from the Mamūlūks. In 1516, Selīm I, during his Egyptian expedition, occupied it, but left the Ramadān-oghlu in possession, now as Ottoman vassals. In 1606 it came temporarily under the rule of the insurgent Dīanbulat-oghlu and in 1608 it was constituted a regular province (*niyāte*) under a governor (*wāḡīlī*) appointed by the Sūḡlān. In the Turco-Egyptian war of 1832, Adana became the headquarters of the Egyptian army under Ibrahim Paḡḡā, who ceded to Muhammad 'Alī Paḡḡā by the treaty of Kutāya (6 April 1833), but restored to the Porte by the London Convention (6 July 1840). It was then made part of the province of Halab, but in 1867 became again the capital of the new *wilāyat* of Adana. In Dec. 1918 it was occupied by French troops, but was returned to Turkey in 1922 under the terms of the Turco-French treaty of Ankara (20 Oct. 1921).

Commerce. Its favourable situation, as a bridge-head on the great Anatolian-Arabian road (cf. Fr. Taeschner, *Anat. Wegnetz*, Leipzig 1934, index), and the fertility of its surroundings, always enabled Adana to recover, in spite of its changing political fortunes. Nevertheless, until the period of the Ramadān-oghlu it seems to have been less important than Tarsus. In the 10th century, according to al-Iḡḡḡālī and Ibn Hawḡāl, Adana was defended by

a wall with eight gates and a fortress on the opposite bank (the last remains of which were demolished in 1856); according to al-Idrīdī (1150) it had a flourishing trade; W. von Ollenburger (1211) says that it was well populated but not rich. In the town, already famous for its cotton, the Venetians had privileges (Heyd, *Hist. du Commerce*, index, cf. Laurent, 11). Abū 'l-Fida' described it as flourishing, B. de la Broquerie (1439) as a busy emporium. Its progress in the period of the Ramadān-oghlu under Ottoman suzerainty, is reflected in the accounts of travellers (cf. e.g. Badr al-Dīn al-ḡḡḡāzī [1530], MS Kōprulu 1390; Kutb al-Dīn al-Makḡī [1557], *Tārīḡ Semīnārı dergisi*, 1/2, 4 ff.; P. Belon, *Les observations*, etc., Antwerp 1533). Mehmed 'Aḡḡī, *Mendīr al-'Aḡḡīlīm* (MS Nurī 'Oḡḡḡālye 3032, 215) and Bīḡḡḡī Khalīfā, *Dīkāt-nāme* (Istanbul 1215, 601), depend on the Arabic geographers and do not add anything new. The anonymous *al-Mendīr wa 'l-Tārīḡ ilā Bayt Alīk* (MS Inkilāp Kitabhanesi, M.C., K boy, 113, fol. 8v) mentions the excellence of its markets and of its products, likewise Ewlyā Celēbī, *Seyḡāt-nāme* (Istanbul 1935, 37, ix, 333 ff.), according to whom Adana had 8700 houses built of clay (this might be slightly exaggerated in his usual manner). With the general retrogression of the Ottoman empire, however, a decline set in which lasted till the middle of the 19th century; one of the main causes was the insecurity which began immediately outside its gates. Nevertheless, the cotton trade continued, and in the 18th century there seemed to be some recovery in commercial relations with merchants from Kayseri (cf. P. Lucas [1766]; C. Niebuhr [travelled 1766], *Reisebeschreibung*, Hamburg 1837, and others quoted by Ritter).

At the beginning of the 19th century, Adana had still a larger population than Tarsus (according to J. M. Kinner, *Voyage dans l'Asie Mineure*, Paris 1818), while two decades later, in 1836, it is described as smaller than Tarsus (J. Rueseger, *Reise in Griechenland . . . und südlich Kleinasien*, Stuttgart 1841, 524 ff.). There was now but little trade, as is remarked in a report of the British consul Neale (cited Ritter, see Bibl.). On the attempt made during the Egyptian occupation more especially to revive cotton production, but without much success, see W. F. Ainsworth, *A Personal Narrative*, i, London 1860. An account of the corporation of the silk factories is given by V. Langlois, *Voyage dans la Cilicie*, Paris 1861. The city began to prosper again in the second half of the 19th century, due to the growing European demand for cotton and the efforts for improvement (e.g. road to Mersin) especially of the *wāḡīlī* Khalīf Paḡḡā. According to J. Davies, *Life in Turkey* (London 1879, 48 ff.), as a result of these efforts, the land was well cultivated, the town relatively clean and active, and the number of inhabitants varying between twenty to thirty-five thousand (the difference being due to the migration of part of the population to the mountains during the hot summer and to the great number of migrating labourers). V. Quinet, ii, 35 ff., gives: 30,000 permanent inhabitants (1830), Muslims, 12,578 Armenians and 12,000-13,000 migrating labourers. In 1870 a municipal administration was established, with a mayor. Its communications were improved by the opening of the railway to Mersin in 1886, and the piercing of the Taurus tunnels during the first world war. The occupation and the subsequent exodus of the Armenians and Greeks, who had gained importance by their position in trade during the 19th century, brought about a crisis. Under the Turkish Republic

there set in a period of rapid progress (72,577 inhabitants in 1927, 117,799 in 1950). Since 1935 Adana has been the capital of the province of Seyḡān.

Population. Christianity was established in Adana from an early date, and it was an episcopal see. Since the government of the Armenian Rubenids the Armenians had greatly outnumbered the Greeks and the Armenian church acquired a preponderant position. Its Christian population, already affected by the constant Muslim attacks, steadily decreased after the Mamūlūk conquest and under the Ottomans (see the reports of travellers, and data in Ritter and Alshān). During the 19th century the Christian population increased, but the victory of the Turks in 1922 brought about their total expulsion. Little is known of the Jews of Adana (cf. A. Galante, *Histoire des Juifs d'Asie*, Istanbul 1939, ii, 304). Arab elements penetrated into Cilicia with the armies from the 8th century, but could scarcely maintain themselves in Adana itself when Turkish nomads had already gained a firm foothold in the neighbourhood. Adana is described by P. Belon (1548) as lying on the linguistic frontier between Arabic and Turkish. Thereafter the Arab elements in the population were almost wholly displaced, and his situation could not be changed by the brief Egyptian occupation in the 19th century.

Culture. Adana has not played in the past, nor does it play at present, an important cultural role. It has an interesting museum, founded in 1924 in the *madrassa* of Dīḡā'ar Paḡḡā. The main monuments are those to the *madrassa* of the *niyāte* of Dīḡā'ar Paḡḡā, with a monumental gateway (inscription from 1533) and *madrassa* in the E. and S. sides of the court, domed *iwān* with finely sculptured ornament; the mosque itself is of uncertain date (before 1500). Ulu Dīḡā'ar, built by Ramadān-oghlu Khalīf, 1507-41, and enlarged by his grandson Mustafā, 1548/1547 (for a legend relating to its construction, cf. Baki T. Arık, *Adana Fethinin destanı*, Istanbul 1923, 47 ff.), mosque, *madrassa*, *turbe* and *dergāhāne*, enclosed by high wall; emphasis on eastern facade with main entrance. The groundplan, various details, coloured ornamentation and minaret indicate the influence of Syrian models; Selḡūk tradition is particularly apparent in the dragons at the base of the dome; richly elaborated *niyāte*; Ottoman tiles of the finest quality; these various stylistic elements are united into a convincing whole. *Turbe* with graves decorated with tiles of the Ramadān-oghlu Khalīf, Piri and Mustafā. Of the many foundations of the dynasty the following are wholly or partly preserved: the so-called Wakīf Seyḡā, residence of the dynasty since 1495; Selāmīk Dayrē, today Tur. İsmail. Also noteworthy are the Carahi Hammām, the *bedestān* (frequently mentioned by travellers, but rebuilt in the middle of the 19th century, and *Aḡḡā Mesḡūd*, of 1409-10, the oldest mosque in the town, with carved door.

*Bibliography*: No special monograph exists. Scattered references, in addition to works cited in the article, in the following: *IA* and *Turb* (formerly *Indus*) *Asiatickische*, x.v.; R. A. Chesney, *The Expedition for the Survey etc.*, i, London 1850; Ebū Bekr Fawḡī, *Kūḡḡāna-yi Ahwāl al-Buldān fī Memālīk-i Dīḡā'ar Al-'Aḡḡān*, (Ist. Üniv. Kutubhanesi, Fotokopiler no. 28, p. 90); V. Quinet, *La Turquie d'Asie*, ii, 340; Ch. Texier, *Asie Mineure*, 731; H. Reclus, *Nouv. géog. univ.*, ix, 656; Sīdī Bey Fraḡḡar, *Kāmar al-ḡḡḡān*, i, 290 f.; W. M. Ramsay, *The Historical Geography of Asia Minor*, iv, London 1890; Le Strange, 131; E. Reitmeyer,

be supposed, no matter whether it is applied in a good or bad sense; thus for instance *ra'a* 'to be afraid' and 'to be pleased'; *tarā'a* 'to be sad' and 'to be joyful'; *radā'a*, *hādā'a*, 'to hope' and 'to fear'; *shafar*, *hanna*, a 'good smell' and a 'bad smell'; to this class belong also the verbs of conjecture in their double meaning of 'to know' and 'not to know', e.g. *sawna*, *hāsiba*, *hādā'a*. 5. Cultural influence has often caused the later differentiation of words originally meaning the same thing in *ba'a*, *gharā*, 'to sell' and 'to buy', originally 'to exchange'. 6. Denominations, especially in the 2nd and 4th forms, originally meant: 'to undertake an action with the object in question', and therefore may be applied both positively and negatively; e.g. *farā'a*, 'to rise', 'to sink' (cf. Hebrew *šārā'āh*, *sikhā'ā*). — Besides this the lack of compound-forming prepositions in Arabic makes much ambiguity possible (cf. al-Suyuti, 189: *uallā* = *ahbala*, 'to turn oneself to' and = *adbara*, 'to turn oneself from'; *samā'a*, 'to hear', and 'to give ear' in the sense of 'to answer'), and there are many vocis ambiguous or communis generis which admit a double interpretation, e.g. *amam*, properly 'aim' = a thing of little or of great importance; *ma'am*, 'a gathering place of women', either on sad or on joyous occasions; *uadi*, 'husband', 'wife'. Finally the many dialectal *adā'id* are of importance. Arab philologists already quoted such examples, *ualla* 'darkness' in the dialect of the Tamimites, 'light' in that of the Kaysites; *warā'aba*, 'to sit' (= Hebrew *yāghābā*) in the Himyarite dialect, 'to spring up' generally in Arabic; further *sadd*, *har*, etc. (cf. C. Landberg, *La langue arabe et ses dialectes*, Leiden 1905, 64 ff.).

The phenomenon of the enantiosema can be observed in all Semitic languages. Hence the graph of E. Landau, *Die gegenwärtigen Wörter im Alt- und Neuhebräischen*, Berlin 1896, was of interest also for the understanding of the Arabic *adā'id*. The most comprehensive and most critical examination of the subject is by Th. Nöldeke, *Wörter mit Gegenwärtigen*, Strassburg 1910, 67-108, 172 *adā'id* of literary Arabic are examined and explained either etymologically or semasiologically (by pointing out similar changes of meaning), taking into consideration the corresponding roots in the Arabic dialects, in Hebrew and Aramaic, and in the languages of Abyssinia. Though Nöldeke classifies a large number of the changes into certain semasiological categories, he deliberately abstains from seeking a fixed principle or order and states explicitly that "in semasiology fixed and general laws are even less manifest than in phonetics" and that "the variegated reality of human speech resists all attempts to force it into formulas".

As is implied in the preceding argument, enantiosema are to be found in all languages. Jacob Grimm, *Kleineere Aufsätze*, vii, 367, had already drawn attention to this; interesting examples are to be found in K. Nyrop, *Das Leben der Wörter* (transl. R. Vogt). Special attention is drawn to the observations of J. Wackernagel (which might otherwise be overlooked) in a passage of his *Vorlesungen über Syntax*, Basel 1908, II, 235. (G. Weir)

ADHĀN (see 'ADHĀN).

ADFC (ADFC), provincial capital in Upper Egypt, on the west bank of the Nile, the ancient Apollinopolis Magna of Greek times, the Arabic name of which is a transcription of the Coptic name, Aṭbō.

At the beginning of the Muslim administration the town was incorporated in the *kāra* of Aswān. It was on the caravan route from Cairo to the south, but Ibn Baṭṭūṭa is the only medieval traveller who refers to it, as being a day and a night's journey south of Aswān. The temple of Adhān is merely mentioned by al-Dīnawarī, but without any description, for it must have been buried in sand. Indeed, Grainger's reference to it, in 1739, is the first allusion to it by a European: he saw there 'the remains of a temple which one could not enter, and it was full of earth and rubbish'. We must wait for Vivant Denon to obtain a less rudimentary account of him. The temple made a tremendous impression. In the year 700/1300 some brickworkers brought to light the statue of a woman seated on a throne, on which were hieroglyphic inscriptions.

The district of Adhān seems to have been very fertile, and particularly rich in palm-trees. Its date were made into cakes, after first being pounded. In the Mamlūk period its annual revenue was 17,000 dinars from an area of 24,724 *faddāns*. Al-Adhān is full of praise for the good qualities of the people of Adhān, whom he describes as generous, discreet, sincere, welcoming to strangers, and charitable.

No events memorable in history seem to have taken place in the town.

ADHĀ' (see 'AD AL-ADHĀ').

'ADHĀB (A.), 'torment, suffering, affliction', inflicted by God or a human ruler, and in so far as it expresses not only absolute power but also love of justice, also 'punishment, chastisement' ('*adāba*). The divine judgments, which are often mentioned in the Qur'ān, strike the individual as well as whole nations in the life of this world as well as in the life to come. It is mainly unbelief, doubt of the divine mission of the prophets and apostles, rebellion against God, that are punished in this manner (see 'AD, 'ADHĀ, 'ADHĀ, 'ADHĀ, and others). With regard to the punishments in the life to come, see already in the grave, see 'ADHĀB AL-KABR, 'ADHĀB-NAM.

For legal punishments, see 'ADHĀB.

(Th. W. JUVENOLD)

'ADHĀB AL-KABR, the punishment in the tomb, also called punishment in *barzakh* [p. 1]. The idea is based on the conception that the dead had a continued and conscious existence of a kind in their grave. So arose the doctrine of the two judgements, one which involves punishment or bliss in the grave and a subsequent judgement on the Day of Resurrection [for which see AL-RIVĀMA]. There are various ideas of what happens between death and resurrection.

1. The grave is a garden of paradise or a pit of hell; angels of mercy come for the souls of believers and angels of punishment for the infidels. The souls of believers are birds in the trees of paradise and will be united with their bodies at the resurrection; martyrs are already in paradise.

2. The dead are tortured by the weeping of the mourners, especially the widow, hearing the steps of the mourners as they leave; the believer finds his grave spacious, 70 cubits by 70, while the unbeliever is crushed by his grave till his ribs inter-

lock. The grave asks the dead man about his religion and the believer's good works answer for him. A sinner may be tormented by a snake of fire which bites him till the day of judgement.

3. Two angels, Munkar and Nakir, black with blue eyes, make the dead man sit up and ask him about his religion. The believer answers with the 'steadfast word' (Qur'ān, xiv, 26) and is shown the place in hell from which he is delivered and the place reserved for him in paradise; there upon he is left alone till the Day of Resurrection. The unbeliever cannot answer, so the angels beat him with iron whips which cause flames, and the blows are heard by all creation except men and *ghinn*. It is a less reliable doctrine that punishment is of the spirit only. There are elaborate arguments to prove that those whose bodies are left impaled and those who were eaten by wild beasts suffer from it. The punishment lasts as long as it will please Allah, according to some authorities till the Day of Resurrection, except on Fridays. It may be eased as long as a branch planted on the grave is green. The angels draw the souls out of the bodies; those of believers come out easily while those of unbelievers have to be dragged out causing severe pain. Variations in detail are many. The question of whether believers last several days, that of unbelievers forty; or unbelievers are not questioned and the angels proceed at once to punishment; martyrs, infants and those who have performed certain acts of supererogation are not questioned.

In some sources a distinction is made between the punishment and the pressure (*daḡā*) in the tomb, the righteous faithful being exempt from the former, not from the latter, whereas the infidels and the sinners suffer punishment as well as pressure. The prophet's daughter, Fāṭima, and some others escape being crushed.

The punishment in the tomb is not plainly mentioned in the Qur'ān. Allusions to the idea may be found in several passages, e.g. Qur'ān, xviii, 26: "But how when the angels, causing them to die, shall smite them on their faces and backs"; vi, 92: "But couldst thou see, when the ungodly are in the floods of death, and angels reach forth their hands, saying, Yield up your souls: this day shall ye be recompensed with a humiliating punishment"; viii, 49: "And if thou wert to see when the angels take the life of the unbelievers; they smite on their faces and their backs, and taste ye the torture of burning" (cf. further i, 10; xxiii, 20; liii, 46).

The punishment of the tomb is very frequently mentioned in Tradition (see Bibliography), often, however, without the mention of angels. In the latter group of traditions it is simply said that the dead are punished in their tombs, or why, e.g. on account of special sins they have committed.

The names of Munkar and Nakir do not appear in the Qur'ān, and once only in canonical Tradition (al-Tirmidhī, *Ḍiḡā'ir*, *ḥab* 70). Apparently these names do not belong to the old stock of traditions. Moreover, in some traditions one anonymous angel only is mentioned as the angel who interrogates and punishes the dead (Munkar, *Ḍiḡā'ir*, transl. 169). Abū Dhāwūd, *Sawm*, *ḥab* 297; Ahmad b. Hanbal, iii, 233, 240; iv, 150; al-Tayḡīdī, no. 753). So there seem to be four stages in the traditions regarding this subject: the first without any angel being mentioned, the second mentioning "the" angel, the third two angels, the fourth being acquainted with the names Munkar and Nakir.

This state of things is reflected in the development

of the creed. The *Fikḥ Akḥar* I, which may date from the middle of the 2nd/8th century, gives only a short reference to the punishment of the tomb (art. 10). The *Wasiyyat Abi Hanifa*, which may represent the orthodox views of the middle of the 3rd/9th century, mentions both the punishment and the interrogation by Munkar and Nakir. The *Fikḥ Akḥar* II, which may represent the new orthodoxy of the middle of the 4th/10th century A.D., is still more elaborate (art. 23): "The interrogation of the dead in the tomb by Munkar and Nakir is a reality, and the reunion of the body with the spirit in the tomb is a reality. The pressure and the punishment in the tomb are a reality that will take place in the case of all the infidels, and a reality that may take place in the case of some sinners belonging to the faithful". In the later creeds and works on dogmatics the punishment and the interrogation in the tomb by Munkar and Nakir are treated in a similar way.

The Khawāridj, some Mu'tazilis and some of the extreme Shi'a do not believe in punishment in the grave. Some Mu'tazilis explained Munkar as the muttering of the unbeliever as he stumbles in his reply and Nakir as the violence done to him. Others said that Munkar and Nakir were not individuals but two classes of angels because men were dying every minute in all parts of the world and two individuals could not be everywhere at once. Another rationalisation was that the two were personifications of a man's good and evil deeds, promising him bliss or misery.

The Karrāmīya [p. 5] taught the identity of Munkar and Nakir with the two guardian angels who accompany man ('Abd al-Kāfir al-Baḡdādī, *Usul al-Dīn*, Istanbul 1928, p. 246). Al-Ghazālī holds that all eschatological ideas are a reality that takes place in the *malakūt*.

The origin of the names Munkar and Nakir is uncertain; the meaning "disliked" seems doubtful. The idea of the examination and the punishment of the dead in their tombs is found among other peoples also. The details to be found in Jewish sources (*ḥabbat ha-kober*) are strikingly parallel to the Muslim ones; the idea is, however, rather late among the Jews and apparently belongs to the post-Islamic period. (See J. C. G. Bodenschatz, *Kirchliche Verfassung der heutigen Juden*, Erlangen 1748, i, 95 f.; Jewish Enc., s.v. *Habbat ha-Kober*.)

(A. J. WENSINCK-A. S. TRITTON)

ADHĀN, 'announcement', a technical term for the call to the divine service of Friday and the five daily *ṣalāt* (see ṢALĀT).

According to Muslim tradition, the Prophet, soon after his arrival at Madīna (1 or 2 years after the

Hidra), deliberated with his companions on the best manner of announcing to the faithful the hour of prayer. Some proposed that every time a fire should be kindled, a horn should be blown or *naḥās* (i.e. a long piece of wood clapped with another piece of wood; with such a *naḥās* the Christians in the East used at that time to announce the hour of prayer) should be used. But one Muslim, 'Abd Allāh b. Zayd, related that he saw in a dream somebody who from the roof of the mosque called the Muslims to prayer. 'Umar recommended that manner of announcing the *ṣalāt*, and as all agreed to it, this *adhān* was introduced by order of the Prophet. From that time the believers were convoked by Hilāl, and up to our days the *adhān* is called out at the time of the *ṣalāt*.

Becker (*Id.*, 1912, 386 ff.) finds the historical model of the *adhān* in Christian Worship, Mittwoch (*Abh. Fr. Ak.W.*, 1913, Phil.-hist. Klasse, No. 2, 22 ff.), perhaps less convincingly, in Jewish liturgy.

The *adhān* of the orthodox Muslim consists of seven formulas, of which the sixth is a repetition of the first:

1. *Allāh akbar*: "Allāh is most great".
2. *Aḥadu an lā ilāh illā 'llāh*: "I testify that there is no god besides Allāh".
3. *Aḥadu anna Muḥammadan rasūl Allāh*: "I testify that Muḥammad is the apostle of Allāh".
4. *Hayya 'ala 'l-ṣalāt*: "Come to prayer".
5. *Hayya 'ala 'l-jalāl*: "Come to salvation".
6. *Allāh akbar*: "Allāh is most great".
7. *Lā ilāh illā 'llāh*: "There is no god besides Allāh".

The first formula is repeated four (by the Mālikites two) times one after the other, the other formulas are repeated twice each, except the last words: *lā ilāh illā 'llāh*, which are pronounced only once. The 2nd and 3rd formulas after being pronounced twice are repeated a third time in a louder voice. This repetition (*tarqīq*) is generally considered as recommended by the law, only the Hanafites forbid it. At the morning prayer (*ṣalāt al-ṣubḥ*) the words *al-ṣalāt khayr min al-nawm* ("prayer is better than sleep") are added in the *adhān*. This formula, also pronounced two times and called *ṭaḥwīd* (repetition), is inserted between the 5th and 6th formulas, but the Hanafites pronounce it at the end.

The *adhān* of the Shī'ites differs from that of the Sunnites in that the former has an eighth formula (inserted between the fifth and the sixth): *Hayya 'ala khayr al-'amal*, "Come to the best work". These words have at all times been the shibboleth of the Shī'ites; when called from the minarets in an orthodox country, the inhabitants knew that the government had become Shī'ite (cf. Snouck Hurgronje, *Mekka*, i, 63; S. de Sacy, *Chrestomathie arabe* i, text, p. 50; transl., p. 169). The Shī'ites pronounce also the final formula two times.

The Muslims who hear the *adhān* must repeat its formulas, but instead of the fourth and fifth, they recite: *lā ḥawā' wa-lā ḥawā' illā bi'llāh*, "there is no strength nor power but in Allāh", and instead of the 5th formula in the morning *adhān*, they say: *ṣalāḥa wa-barā'a*, "thou hast spoken truthfully and rightly".

The *adhān* is followed by formulas of glorification which are recommended and precisely determined by the law. They are omitted only after the call to the *maghrib ṣalāt*, because the space of time in which this prayer must be said, is very short.

There is no fixed melody for the *adhān*. Every *adhān* may be modulated at will with any known tune, provided that the right pronunciation of the

words is not impaired by it. Cf. Snouck Hurgronje, *Mekka*, ii, 87: "In Mecca one hears different airs at the same time. Like the recitation of the Qur'ān, the singing of the *adhān* is in Mecca a highly developed art". Only among the Hanbalites there are doctors who do not allow any melody for the *adhān*, and the Wahhābīs follow this doctrine. The Ibādīs, too, do not sing the *adhān*. (For the melody of the *adhān* see also GHINĀ.)

Every Muslim who, alone or with others, recites the above-mentioned *ṣalāt* at home or in the field should pronounce the *adhān* in a loud voice as is recommended by the law (cf. Snouck Hurgronje, *Mekkanische Sprüche und Reden*, 87 *Verspr. Geschr.* v, 81). At mosques, a *mu'adhḍin* [q.v.] is often appointed to perform the *adhān*.

The call to the other public *ṣalāt*s, e.g. those of the two feasts, those at sun and moon eclipses, etc., has only one formula: *al-ṣalāt dīma'at*, "come to the public prayer". This formula is said to have been current already in the time of the Prophet. Cf. I. Goldziher, in *ZDMG*, 1905, 315.

Important information on the modifications of the *adhān* formulas introduced at various times and in various places from the beginning of Islam is to be found in Makrūzī, *Ḥikāyat*, ii, 269 f.

Owing to the profession of faith frequently occurring in the *adhān*, the Muslims pronounce it in the right ear of a child shortly after his birth (cf. Lane, *Arab. Society in the Middle Ages*, 136; Snouck Hurgronje, *Mekka*, ii, 138) as well as in the ear of people supposed to be possessed of *djinn* (evil spirits).

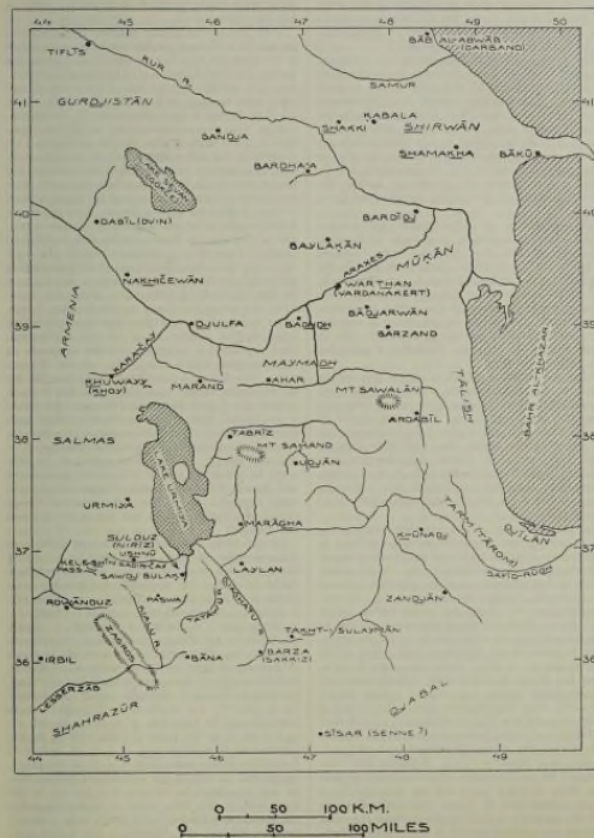

The *ṣalāt* in the mosque is immediately preceded by a second call, the *ṭiḥma* [q.v.], which contains the same formulas as the *adhān*.

#### ADHĀR (see ṬAḤṬĀ)

**ADHARBAVDJĀN (AZARBAJDJĀN)** (i) province of Persia; (ii) Soviet Socialist Republic.

(i) The great province of Persia, called in Middle Persian *Āturpātākān*, older new-Persian *Ādharbādhagān*, *Ādharbāyagān*, at present *Azarbājdjān*, Greek *Ἀρζοπατριών*, Byzantine Greek *Ἀρζαβιγανών*, Armenian *Atrapatakan*, Syriac *Adharbādhagān*. The province was called after the general Atropates ("protected by fire"), who at the time of Alexander's invasion proclaimed his independence (328 B.C.) and thus preserved his kingdom (Media Minor, Strabo, xi, 13, 1) in the north-western corner of later Persia (cf. Ibn al-Mukaffā', in Yāqūt, i, 172, and al-Makrūzī, 375; *Ādharbādhagān* b. Bīrūnī). The dynasty of Atropates flourished under the Arshakids and married into the royal house. The last scion of the house, Gaius Julius Artabazd, died in Rome in A.D. 38, when the kingdom was already incorporated by the Arshakids. (For the ancient history cf. Pauly-Wissowa, s.v. *Atropatene*.) Under the Sāsānians *Ādharbājdjān* was ruled by a *marzban* and towards the end of the period belonged to the family of Farrūkh-Hormīd, (see Marquart, *Eran-lahr*, 108-11). The capital of *Ādharbājdjān* was at *Shīz* (or *Ganzak*), which corresponds to the ruins

ADHARBAVDJĀN

of Laylān (south-east of Lake Urmīya). It possessed a famous firetemple which the Sāsānīan kings visited on their accession. Later the fire was removed to the less accessible Arghakid castle of Bōšpaxt, Bōšpaxt (now Talūt-i Sulaymān).

The Arab conquest of Ādharbaydjan is variously recorded under the years 15-22/639-43. In the days of 'Umar, Hūdhayfa b. al-Yamān is said to have conquered Ādharbaydjan coming from Nihāwand; other expeditions came from Shahrāzūr. Hūdhayfa made a treaty with the *mazbūn* whose capital was in Ardābil. He agreed to pay 800,000 dirhams and the Arabs promised not to enslave anyone, to respect the fire-temples and the ceremonies held in them, and to protect the population against the Kurds (nomads) of Balāsāgān, Sabānā and Shāt-rūdān.

The population of Ādharbaydjan (of Iranian origin) spoke a multitude of dialects (al-Makdisi, 375: 70 languages near Ardābil). Arab chieftains settled in various districts: Rawādī al-Ardī in the region of Tabriz; Bā'ū al-Rādā in Marand; Muz b. 'Alī al-Rudaynī south of Lake Urmīya, etc. They were gradually absorbed by the native population and towards the middle of the 4th/10th century the Rawādīs were considered as Kurds. (See in detail Sayyid A. Kāsarī, *Pādshāhān-i gum-nām*, I-III, Teheran 1928-9.)

After the revolt of Bābak (g.v.), the grip of the caliphate on Ādharbaydjan weakened. The last energetic governors of the province (276-378/889-929) were the Sāgids (g.v.) who themselves ended in revolt. After their fall native dynasties sprang up in Ādharbaydjan. After the Khāridjite Dayṣam (half Arab and half Kurd), Ādharbaydjan was occupied by the Daylamite Mārnāsh b. Muḥammad, of the *khān* creed (see *MOŠA'IR*). The Daylamites were succeeded by the Kurdish Rawādīs (g.v.) (373-463/983-1070).

In the beginning of the 5th/11th century the Ghuz horse, first in smaller parties, and then in considerable numbers, under the Seljūkids occupied Ādharbaydjan. In consequence, the Iranian population of Ādharbaydjan and the adjacent parts of Transcaucasia became Turkophone. In 1311:12, Ādharbaydjan fell to the lot of the *atābek* Hūlāgū (g.v.) (better 'Hūlāgū' whose descendants ruled, in competition with the Ahmadīs (g.v.), till the short-lived invasion of the Khā'arīm-shāh Djalāl al-Dīn (622-8/1223-31) at whose heels came the Mongols. With the arrival of the Il-khān Hūlāgū (624/1256) Ādharbaydjan became the centre of a great empire extending from the Caucasus to Syria. The residence of the Mongols was first in Marāgha (g.v.) and then in Tabriz (g.v.), which became a great centre of trade and cultural life. After the Mongols and their successors the Djalālīs (g.v.), Ādharbaydjan was occupied by the Turks returning from the west (the Kara Koyunlu (g.v.) and Ak Koyunlu (g.v.)) whose capital was in Tabriz (780-908/1378-1502).

After 907/1502 Ādharbaydjan became the chief bulwark and rallying ground of the Safawids, themselves natives of Ardābil and originally speaking the local Iranian dialect. In the meantime, between 1514 and 1603, the Ottomans frequently occupied Tabriz and other parts of the province. The Persian control was restored by Shāh 'Abbās but during the Afghan invasion (1730-1737-8) the Ottomans recaptured Ādharbaydjan and other western provinces of Persia, until Nādir Shāh expelled them.

In the beginning of the reign of Karīm Khān Zand the Afghan *Ẓād* Khān revolted in Ādhar-

baydjan and later the Dumbālī Kurds of Khoy and other tribal chiefs lorded it over various parts of Ādharbaydjan.

With the advent of the Kājārīs Ādharbaydjan became the traditional residence of the heir-apparent. In the north the final frontier with Russia (along the Araxes) was established in 1858 (treaty of Turkmančay). The western frontier with Turkey was delimited only in 1914, and under Rīdā Shāh Persia ceded to Turkey a small area north of the Ararat.

After 1905 the representatives of Ādharbaydjan took a lively part in the Persian revolution. On 3 April 1908 Russian troops arrived in Ādharbaydjan, by agreement with Great Britain, to protect the foreign colonies in Tabriz, but then prolonged their stay under various pretexts, and in 1914-7 warned with the Turks with varying fortune. They evacuated Ādharbaydjan after the Russian revolution (1917), and on 8 June the Turks arrived and installed in Tabriz a Turco-philic government. About this time there appeared the first traces of Ādharbaydjanī self-consciousness. The Persian control was restored by the future Rīdā Shāh on 5 September 1921. After the events of 1941 (see IRAN) the Soviet forces occupied the northern provinces, including Ādharbaydjan. Under cover of the occupation, there developed a movement for the autonomy of Ādharbaydjan within the limits of the Persian state. The Russians evacuated Ādharbaydjan by the beginning of May 1946 (instead of March 1946, as first agreed) and this delay led to a great discussion in the United Nations and to the first official split among the Allies. After the evacuation, the Premier Kāwām recognised the provincial autonomy of Ādharbaydjan in an agreement signed on 13 June 1946, by which the rights of local self-government with the use of the local Turkish dialect were guaranteed. However, on 4 November, Persian troops moved into Ādharbaydjan and the *status quo ante* was restored.

Geography. The list of towns and districts of Ādharbaydjan in Ibn Khuradādhbih, 119, is important for the composition of the province (*khra*) soon after the conquest, and possibly even under the Sāsānians: 1. Marāgha; 2. Mīyānāg; 3. Ardābil; 4. Shīr (= Senna); 5. Darza (= Sakki); 6. Sābūr-shāst; 7. Tabriz; 8. Marand; 9. Khoy; 10. Kūlsara; 11. Mōkān; 12. Barzand; 13. Dīzanā (Ganzak); 14. Dībarwān; 15. Nīrīz; 16. Urmīya; 17. Salmās; 18. Shīr; 19. Rustāk al-Salak; 20. Rustāk Sīnd-bāya ('Sind-pāye'); 21. al-Budhūh; 22. Urm; 23. Rūstān-Karādī (= Karadja-dagh?); 24. Rustāk Sarāh (Sarāh); 25. Dāskīshwar (?); 26. Rustāk Māy-pahādī. Of these nos. 4, 5, 6, 13, 14, 15, 18, 19 and 26 lie to the south of Lake Urmīya (in the direction of Daynawar); nos. 7, 8, 9, 16 and 17 in the north-western corner; nos. 1, 2, 3, 10, 11, 12, 21, 22, 23 and 24 east of the meridian of Tabriz. Nos. 20 and 25 cannot be located. The frontier in the south was no. 26, 'the watch of Mōkān' (possibly the present day Sunkur (g.v.); in the east, it passed between Mīyāna and Zandjīn (g.v.); in the N.E. Ibn Khuradādhbih, 121, names Warḡān (now Altan on the south bank of the Araxes) as 'the end of the *amāl* of Ādharbaydjan'. Thus the territory of the province closely corresponded to its present extent, but as Ādharbaydjan was usually governed jointly with the neighbouring Armenia and Arrān (see al-Makdisi, 374: *shām al-rīgh*) comprising the three provinces), administrative frontiers were subject to temporary changes, especially in later times. In al-Makdisi, 374, Khoy,

Urmīya and even Dāgharrakān (south of Tabriz) are reckoned to Armenia. According to Yāhū (13th century) Ādharbaydjan extended down to Baqrīā (Parthav), in *Nasbat al-Kulūb* (730/1340), 89, Nakhshewan and Ordōbād, on the left bank of the Araxes, are mentioned under Ādharbaydjan.

Very characteristic for Ādharbaydjan are the high peaks rising in various parts of the territory, with ranges of mountains connecting them: Mt. Sawālān west of Ardābil (15,792 feet), Mt. Sahand, south of Tabriz (12,000 feet), the Lesser Ararat (12,840 feet) south of which runs the long range which forms the frontier with Turkey and 'Irāk, and which in its southern part is studded with high peaks. The central parts of Ādharbaydjan consist both of considerable plains (Tabriz, Marand, Khoy, Salmās) and of high plateaus burrowed by deep gorges.

The territory of Ādharbaydjan belongs to the basins of the Caspian, of Lake Urmīya and of the Tigris. Towards the Caspian flow: (i) the tributaries of the Safid Rūd having their sources on the south-eastern face of Mt. Sahand, and (ii) the southern tributaries of the Araxes (the river of Ardābil, Kara-su; the rivers of Karadja-dagh; the river of Khoy and the river of Mākān, Zandjīn-dagh). The internal Lake Urmīya (g.v.) drains an area of 32,500 sq. km (the rivers of Marāgha, Sulī-dāy etc.); the river of Tabriz, Aghī-dāy; the numerous rivers of Salmās and Urmīya; the important rivers of the Kurdish districts, Dīghastī, Tatawū, Gādīr). The Lesser Zāb rises on the Persian side of the frontier range and, through the gap of Alān, emerges into the plains of Northern 'Irāk to join the Tigris.

The population of Ādharbaydjan lives chiefly in villages. The largest towns are Tabriz (280,000 inhabitants), Ardābil (63,000), Urmīya, Khoy (49,000), Marāgha (35,000). The semi-nomads are found on the Mōghān steppe (the Turkish Shāshewan (g.v.)) and in the Kurdish districts along the Turkish frontier and south of Lake Urmīya. The population in its great majority speaks the local dialect of 'Ādharbaydjan Turkish' (see *AGHAR*). The characteristic features of the latter are Persian intonations and disregard of the vocalic harmony, reflecting the non-Turkish origin of the Turkicised population. The remains of the old Iranian (*ādhari*) dialects are found in small groups in Karadja-dagh, near Sahand, near the Persian border, in the official language learnt at school. Armenians and Assyrians ('Ayyor') are found in the districts to the west of Lake Urmīya. Kurdish is spoken along the western frontier and in the southern districts, to the west of the Tatawū river.

(ii) Azerbaijan, Soviet Socialist Republic (Az. SSR) in the eastern part of Transcaucasia, between the south-eastern branches of the Caucasus, the Caspian coast and the Araxes (which separates it from the Persian province of the same name). In the north-east it borders on the Dāghstān Autonomous republic (part of the Russian Socialist Federal Soviet Republic, RSFSR). In the north-west it borders on the Georgian S.S. Republic (along the Alazani) and in the west on the Armenian S.S. Republic (along the line running east of Lake Sewan = Gōkče). In the south-west the autonomous republic (ASSR) of Nakhshewan, locked within the Armenian territories, is part of the Azerbaijan republic, whereas the highlands of Kara-balḥ (with a considerable Armenian population) form an autonomous territory (*oblast*) within Azerbaydjan. Historically the territory of the republic corresponds to the Albania of the classical authors (Strabo, xi, 4; Ptolemy, v, 11), or in Armenian Alvan-k', and in Arabic Arrān (g.v.). The part of the republic lying north of the Kur (Kura) formed the kingdom of Shārwān (later Shīrwān (g.v.)).

After the collapse of the Imperial Russian army Bākū was protectively occupied by the Allies (General Dunsterville, 17 August-14 Sept. 1918) on behalf of Russia. The Turkish troops under Nūr Paşa occupied Bākū on 13 Sept. 1918 and reorganised the former province under the name of Azarbaydjan—as it was explained, in view of the similarity of its Turkish-speaking population with the Turkish-speaking population of the Persian province of Ādharbaydjan. When after the Mudros armistice the Allies reoccupied Bākū (17 Oct. 1918), General Thomson (28 Dec. 1918) recognized the existing Azarbaydjan government of the *Masadi* party as the only local authority. After the evacuation of the Allies, the Soviet regime was proclaimed in Bākū on 28 April 1920, without armed opposition, and Azerbaijan became one of the three republics of the federated Transcaucasia. In 1936 the federation came to an end and on the 5 Dec. 1936 Azerbaijan was admitted into the U.S.S.R. as one of the sixteen constituent republics of the Union.

The present-day republic possesses an area of 87,700 sq. km. and a population of 3.2 million, of which 28% live in towns. Local Turks are in a majority of 5/5, whereas the Armenians form 12%, of the population, and Russians 10%. The capital of the republic, Bākū (g.v.), counts 809,000 inhabitants, Gandja (g.v.) (formerly Elazavetpol and Kirovabad) 99,000. Other large towns are Shāmākhī, Ruba, Sāliyān, Nūkhī, Mīngēčaur, etc.

ADHARGÜN (P., 'flame-coloured'; Arabic *Ādhargūn*), a plant about 2-3 feet high with finger-long elongated leaves, of a red-yellow colour, and malodorous blossoms with a black kernel. The identification of this plant is not yet well established; in Greek 222 *ἀδάργουν* occurs synonymously with *anciso vulgaris*, the common groundsel (H. Langhavel, *Botanik der späten Griechen*, 1866, 74; I. Löw, *Arasische Pflanzennamen*, 1879, 47). The descriptions of the Arabian authors leave a choice between the dark yellow *buphthalmos*, for which Clement-Mullet decided, and the *calendula officinalis*, marigold, which indeed unites the characteristic features of shape, hue and smell and which form was official. In Arab medicine *adhargūn* passed for a

the period of the development of the Adhārī press. The appearance of *Khāḍī*, the first Adhārī newspaper, was followed by that of several others: *Diya* and *Diya-i Karkas*, at Tiflis (1879-1884); *Kerkhā* (1883-91); *Shāhī Rās* (1903-05), all of which served as rallying-points for progressive men of letters. The tempo of this development quickened remarkably after the Russian revolution of 1905, conditions becoming then more favourable, and new topics, ideas and figures began to appear. A stream of new periodicals arose: *Hayāt*, *Ighāḍ*, *Tarāhī*, *Kaspiy*, *Aḥl Sā*. Their publishers were Ahmed Aga-oghlu, 'Alī Bey Hüseyin-zāde, 'Alī Merdān Dōst-bāshā and Mehmed Ezdin Reshī-zāde, nationalists and modernists with a knowledge of Ottoman, Russian and Persian literary and political life. Thanks to their labours and those of men like them, the common people became accustomed to the new cultural movement. The protagonist in the struggle was Alekber Sābir (d. 1911), the unequalled master of Adhārī satire, who used all the powerful resources of his pen to flay reaction, fanaticism and ignorance. Support came to him from the famous poet Djellī Mamet Kul-zāde, editor of the progressive and democratic revue *Molla Nāsr al-Dīn*, and from 'Abdāḥ Shihāt (1874-1918).

Mehmed Hādī and Hüseyin Dīwāid were influenced by the literature of Turkey, imitating Nāṣrī Kemāl, Fikret and Hāmid, and the poet Ahmed Djewād also showed the influence of the Turkish national literary movement. Nedjī Bey Westrī and 'Abd al-Rahīm Bey Hakmīdī maintained a constant flow of dramatic works, while Magoma and members of the Hadjibeyli family composed operettas and operas for the Adhārī theatre, laying the foundations of a national music.

The chief figures of the latest period, from the fall of the independent Republic of Adhār-baydān to the present day, are Djellī Mamet Kul-zāde, Akwerdī, 'Abd Allāh Shā'ūh, Dīz'ār Djabbarlī, and, of the younger generation, the poets Süleymān Rüstēm, Šamed Wurgun, Rafī'beyli Nigār, Mirwār Dībāzī.

**Bibliography:** The most important studies of Adhārī literary history are listed in *JA*, s.v. *Azeri* (M. F. Köprülü). Other notable works are: B. Çobanrađe, *Azeri edebiyatına yeni deñer*, Baku 1930; M. Ali Nazim, *Azerbaydžanşaya khudojstvennaya literatura*, *Trudi Azerbaydžanskogo filiala*, xxx, Baku, 1936; *Mukhasar Azerbaycan edebiyatı tarihi*, Baku 1943; *Anadolugya-azerbaydžanşay poezi*, Moscow 1939; B. Nikitin, *La littérature des Musulmans en U.R.S.S.*, REF, 1914, cahier III; M. E. Resulzade, *Calday Azerbaycan edebiyatı*, Ankara 1950; A. Yahap Yurtsever, *Sābir'in Azerbaycan edebiyatındaki yeri*, Ankara 1951. (A. CAFEROĞLU)

'ADHIRĀ' (see *nuḡḡū*).

**'ADHIRĀ'ĀT**, the Edrei of the Bible, 10-day Der'a, chief town of Hawrān, 106 km. south of Damascus. Situated on the borderline between a basaltic region and the desert, the town, formerly renowned for its wine and oil, was always a great market for cereals and an important centre of trade routes. Before the Assyrian conquest (732 B.C.) the kingdoms of Damascus and Israel contended for it; some scholars have identified it with the Aduri of the Amara tablets. The capital of Batanes, Adraa was taken by Antioch III in 218 B.C.; then occupied by the Nabateans, next it came under Roman domination, and from 106 onwards was incorporated in Provincia Arabia. In the Christian era, Adraa became the seat of a bishopric of Arabia.

In 613 or 614 the Persians, in the course of their victorious campaign against the Byzantines, sacked the town and destroyed the olive-groves of the region (al-Tabarī, i, 1005, 1007). On the eve of the hijra, Adhīr'āt was the centre of an important Jewish colony; the tribe of Naḍir, driven out of Medina by Muhammad, took refuge there with their co-religionists. During the caliphate of 'Abū Bakr the inhabitants submitted to the Muslims, and acclaimed 'Umar when he passed through the region. It is stated that Mu'āwīya II b. Yazīd was born there. At the time of the Karmatian rebellion, 293/906, the population was massacred.

We find the place, called City of Bernard d'Étampes, in the works of the chroniclers of the Crusades, in 1119 and 1147 in particular. During the Mamlūk and Ottoman epoch Adhīr'āt, capital of Buḥāniyya, formed part of the province of Damascus and was one of the stages of the Pilgrimage. The building of the railway linking Damascus, 'Ammān, and Medina made it an important station, a junction for Bursa and Hayfa; it was occupied by the British on 28 September 1917.

At the present day Der'a is an important railway centre, the southern road from Damascus to Baghdad passes through it, and it is a Syrian frontier post on the Jordan border.

**Bibliography:** Balādīyūf, *Futūḥ*, 126, 139; Yāḳūt, i, 175 sq.; G. Le Strange, *Palestine under the Moslems*, 283; Baughilā, *Diet. Hist.*, ed. *Geogr. ecclesiastica*, s.v. *Adra*; Schumacher, *Index*, not far from the future Baghdad. However, he kept aloof from 'Uḡmān, and it can be inferred from al-Tabarī (i, 3164) that he had some connection with his assassins. He fought under 'Alī in the Battle of the Camel (36/656), where he lost an eye. During the negotiations which preceded Sūffīn he was one of the delegates sent by 'Alī to Mu'āwīya; then, as standard-bearer, he took part in the battle, in which his three sons were killed. Afterwards he lived at Kūfa, where he did not renounce his 'Alid sentiments, and offered effective protection to members of his tribe who were persecuted by the powerful government of 'Irāq, Ziyād b. Alī Sufyān. He died in 68/688-89.

**'ADHIRUH** (ed. *Adḡna*), more rarely *Uḡnru*, a place between Ma'ūn and Petra, a magnificent Roman camp (the surviving monuments are described by Brinnow and Domaszewski), supplied by a gushing spring. This place, situated in pre-Islamic times in the Djūdhiḡ country, was visited by the Kurayshite caravans. It submitted to Muhammad on payment of tribute during the conquest of Tabūk (9/631); the treaty of capitulation handed down by our authorities is probably authentic. Mu'āwīya is said to have received there the homage of al-Hasan, the son of 'Alī. According to some Arab geographers Adhīruh was the chief town of the district of al-Sharāt, in the province of al-Balqa'. It is not mentioned since the time of the crusaders, who nevertheless possessed it at region Ahmāt, Vaux Moysse (= Wādī Mūdā), etc.

Adhīruh became famous in Islamic history on account of the conference which took place there after the battle of Siffin, in order to reach a decision in the conflict between 'Alī and Mu'āwīya (see 'Alī and Mu'āwīya).

(H. LAMMENS-L. VECCHIA VAGGIERI)

**AL-ADHWĀ'**, broken plural of *dhū*, denoting the kings and lords of Yaman whose names are

formed with *dhū*. The most famous are the Maḡhāma, the eight princes (*ḡay* [s.v.]) of Himyar [s.v.] who had the right of investiture at the election of the king. Their names are: Dhū Djaḍan, Dhū Hanzar, Dhū Khallīl, Dhū Mukār (Makār), Dhū Sahar, Dhū Strēwā, Dhū Thū'abān (Thū'abān), Dhū 'Uḡabān, Al-Hamādī, *Dhū*, s.v. ed. N.A. Faris, 139 includes Dhū Muḥibī, who is included also in the verses cited by Nashwān, i, 263, where Dhū Sahar is omitted.

**Bibliography:** Lane, 985a; Hamādī, *Sud-arab. Multabib*, ed. Löfgren, 48-54 (where also the derivation *adhw'* 'yasa' 'title or dignity of al-Adhw', cf. O. 'ADĪ B. ḤĀTIM B. 'ABD ALLĀH B. SA'D AL-TĀ', *Abū Ṭāfir*, Companion of the Prophet, and subsequently a follower of 'Alī. Son of the celebrated poet Ḥātim al-Tā'ī [s.v.], and, like him, a Christian, he inherited the command of his tribe from his father, but when threatened with the loss of it he became converted to Islam, in 9 or 10/630-1, and collected the taxes of Tayyī' and Asad. After the death of the Prophet he remained faithful to Islam, and prevented his tribe from apostatizing during the *riḍā*. Later on he took part in the conquest of 'Irāq, and received from 'Uḡmān a grant of land, al-Kaḡhā', on the Naḡr (i.e. of Le Strange, *Land*, index), not far from the future Baghdad. However, he kept aloof from 'Uḡmān, and it can be inferred from al-Tabarī (i, 3164) that he had some connection with his assassins. He fought under 'Alī in the Battle of the Camel (36/656), where he lost an eye. During the negotiations which preceded Sūffīn he was one of the delegates sent by 'Alī to Mu'āwīya; then, as standard-bearer, he took part in the battle, in which his three sons were killed. Afterwards he lived at Kūfa, where he did not renounce his 'Alid sentiments, and offered effective protection to members of his tribe who were persecuted by the powerful government of 'Irāq, Ziyād b. Alī Sufyān. He died in 68/688-89.

'ADĪ B. MUŠĀFIR AL-HAKKĀRĪ, SHAYKH 'ADĪ, Sūfī leader. He was an Arab of Kuraysh, an Umayyad, born at Bayt Fār near Baalbek; he met 'Alī al-Manḡdī, Hammād al-Dabbās, 'Abd al-Kāhīr al-Suhrawardī, 'Abd al-Kādir al-Djīlī, Abū 'Alī al-Huḡwānī and Abū Muhammad al-Shanbākī. He travelled far, spending much time in the wilderness till he settled in Laylāsh (Lalsh) near Mosul apparently before 305/1111, made for himself a convent there and started an order called the 'Adāwiyya. His rule was so severe that many sūfī leaders were unable to follow it; it is said that he was the first to train novices. His *shāhida* is quite orthodox and contains nothing unusual, he was opposed to the Mu'tazilī and to all innovations; as a sūfī he was like al-Ghazālī. Ibn Taymiyya calls him a pious follower of the *sunna*, equates him with al-Shāfi'ī

as a true believer and with 'Abd al-Kādir al-Djīlī as a sūfī; he adds that he experienced ecstasies and that there was some extravagance in him which increased under his successors. He died in 557/1162 or two years earlier or a year later. The sayings and poems ascribed to him might have been uttered by any sūfī. The poem quoted by Layard can hardly be genuine.

According to a Christian legend, told by a monk Rāmīshō', he was a Kurd; his father tended the flocks of a monastery and he himself became its business manager. Taking advantage of the absence of the abbot and some of the monks, he massacred those who remained and seized the building. Three years later he was summoned to Marāḡha and put to death there in 159/1211; but in 682/1283 the building was restored to his descendants.

As Shaykh 'Adī had no children, the headship of the order passed to the offspring of his brother Saḡhr. Another version is that 'Adī adopted the son of a servant, Hasan al-Bawhāb, and his descendants provided the heads who were treated with unusual respect, parents being proud to lend their daughters to them. The order was confined mainly to the Kurds though it had a convent in the Karfa at Cairo. The members looked towards 'Adī (i.e. towards his grave) when they prayed and made him their treasure on which they relied in the hereafter; such devotion was not known in any other order. It is said that the extravagant views did not develop at once; only later did the sect give up the Muslim prayers and believe that 'Adī was eating bread and onions with God and was the provider for his people. One chief of the order, Hasan b. 'Adī, wept while listening to a sermon whereupon the Kurds nearly killed the too eloquent preacher. The order was strong enough to attract the attention of authority; this Hasan was put to death in 641/1246 by Badr al-Dīn Laḡhā of Mosul though the Kurds believe that he is not dead. Six years later Lu'lu' dug up the bones of Shaykh 'Adī and burnt them. In 655/1257 Sharaf al-Dīn Muḡammad b. 'Adī was called to the help of 'Izz al-Dīn Kay Khuraw of Malatya along with another Kurd, Ahmad b. Hūla. Another descendant fled to Egypt with his family in 673/1270 and yet another fled to Syria where he was killed in 680/1281. Early in the 8th/14th century one of the family kept almost royal state in Bayt Fār; another, Amīrān, served the government in Syria, then retired to Mīzza and was venerated by the Kurds who made offerings to him. As they planned rebellion, Amīrān was put in gaol (at his own wish, *al-Durār al-Kāmina*, i, 414) and all was quiet, though the Kurds bowed down in front of the tower in which he was confined.

A lawyer stirred up the orthodox in 817/1414, so they destroyed the tomb and burnt the bones of the Shaykh in the presence of the remnant of his followers who are here called Subhātīyya. Later the tomb was rebuilt.

For the relation between the historical Shaykh 'Adī and his rôle in the religion of the Yazīdīs, cf. Yazīdī.

'ADĪ B. AL-RIKĀ', ARD DU'ĀD 'ADĪ B. ZAYD B. MALIK B. 'ADĪ B. AL-RIKĀ' 'AMĪLĪ, Arab poet of Syria, who was, in Damascus, the pangenist of the Umayyads, especially of al-Walid b. 'Abd al-Malik (96-96/705-15), in the presence of whom he fought a poetical contest with Jarāh; he was also the butt of attacks by al-Rāṣī. 'Adī was celebrated for the grace of his *naḡīb* (see especially al-Muḥarrar, *al-Kāmil*, 58, concerning Umm al-Kāsim) and for the care with which he composed his poems. His poems were known in Spain at an early date (*IAH*, ix, 397). He lived at least into the caliphate of Sulaymān b. 'Abd al-Malik (96-97/755-7).

*Bibliography*: *Djinnālī*, *Tahāḡi* (Heli), 144-5; *Ḍalībī*, *Hayawana*, iii, 64, iv, 236 v, 447; Ibn Kutayba, *Šaḡ'r*, 391-2; *Aghānī*, viii, 179-83; Ibn Durayd, *Lughāt*, 225; Marrābūh, *Ma'djma*, 205; Maymūd, *al-Tarā'if al-adabiyā*, 81-97 (three poems); *Amūdī*, *Ma'nāḡil*, 116; Nuwayrī, *Nihāya*, iv, 246-50; Brockelmann, *S*, i, 96; Nallino, *Scritti*, vi, 160-2 (Fr. transl., 248). Cfr. PELLAT.

'ADĪ B. ZAYD, Arab Christian poet of al-Hira, of the second half of the 6th century. His life was spent partly at the Sāsānid court at Ctesiphon (al-Maddā'īn), where he was secretary for Arab affairs to Chosroes Parwiz, and partly at the Lakhmid court at al-Hira, where he was a courtier and councillor of al-Nu'mān III, whom he had helped to the throne. This last, however, as result of the intrigues of his enemies, later had him incarcerated, and finally put to death in prison (about 60 A.D.).

'Adī is one of the most curious figures in pre-Islamic Arab history and poetry. With Nābigha al-Dhubbānī and al-A'ashā he represents the type of courtly and urbane poet familiar with a higher level of culture and civilization than those of the desert. Arab historical-literary tradition accordingly regards him as being on the fringe of the main stream of the poetry of the *qabīlīyya*, because of his 'un-Naḡdī' language, although the subjects with which he dealt and the form which he gave them had a long and profound influence on the development of Arab poetry in the Muslim epoch.

As 'Adī's *dīn* has been lost, only fragments of his work are known to us (collected in an incomplete fashion and without any critical sense by L. Cheikh, *Šaḡ'r al-'Adī*, *al-Naḡrābiyya*, 439-74, to which should be added fragments in al-Ḍalībī, *al-Hayawana*, iv, 65-6, al-Makhlūdī, *al-Iḡdā' wa 'l-Tarā'if*, i, 131, Ibn Kutayba, *al-Šaḡ'r*, 112-3, and various quotations in the *Ḥamasa* of al-Buḡhārī). Among these verses, those describing Biblical episodes (the creation and man's first sin) are of interest for the history of religion and culture; they, together with other evidence, confirm that the poet was a Christian (Šahīd). But the main themes of his poetry seem to have been, on the one hand, praise of wine, and, on the other, meditation on the decay of human

passions and effort, rendered vain by the inexorable passage of time. Of the former category a few sparse but significant examples have been preserved; we know that they were appreciated and imitated by Walid b. Yazid and, later, by 'Abd Nuṣayr. On the second theme, which was probably inspired by the poet's own misfortunes, we possess numerous fragments which are interesting not only for their pious and ascetic *Stimmung* (a curious contrast with the hedonism of the bacchic poetry), but for the reflections on and evocation of Oriental (Arabian) history which are to be found there, exemplifying the vanity and futility of man. Instances of this are the famous fragment on al-Nu'mān I and the castle of Khawarnak (*Aghānī*, ii, 138-9 and elsewhere), another on Hatra (al-Buḡhārī, *al-Hamasa* (Chadikha), 108), and one in Ibn Kutayba, 112-3, on Dajdima al-Abragh and al-Zabba, which almost looks like a ballad. From all these relics, amounting to rather less than 400 lines, we receive the impression of a brilliant artistic personality, who contrived to give Arabic poetic form to the old themes of Semitic pessimism, and, at the same time, in contrast to the Biblical author of Ecclesiastes, to accompany them with a positive appreciation of some of the good things of life.

AL-'ADĪD LI-DĪN ALLĀH, the eleventh and last Fatimid caliph of Egypt. His name was 'ABD MUHAMMAD 'ABD ALLĀH B. YUSUF, and was the grandson of the caliph al-Hafīz; his father had been killed by the vizier 'Abbas b. Abi 'l-Futūḡ on the very day of the enthronement of the caliph al-Fāṭi. Al-'Adīd succeeded this latter, his cousin, a sickly child who died at the age of eleven and a half. He himself came to the throne on 17 Rabi' al-Awwal 553/9 July 1160, and was the al-powerful minister al-Šāḡh Talāḡ' (g.n.), who had been governing Egypt for more than six years, because of his tender age. Al-'Adīd was, in fact, born on 20 Muharram 546/9 May 1151.

The history of this child-caliph's reign is thus in no way one of personal action on his part. The Arab writers seem uncertain, and intermittently attribute to him stray impulses of revolt, which had little success. We shall cite them, although admitting that in general the caliph looked on helplessly at a shattering series of tragic incidents of which he himself was finally to be the victim.

Clearly an important factor eludes us, as we have little information about the role of the secret camorra of the Palace, whose intermittent influence is hinted at. We cannot but observe the personal ambition of the protagonists, who lived dangerously and were preoccupied with increasing their personal prestige, if only with a view to saving their skins. The death-throes of the Fatimid régime are a sorry spectacle.

The better to ensure the docility of the young caliph, Talāḡ' made him his son-in-law, which however did not save Talāḡ' from being assassinated, the end that he had always feared, on 19 Ramaḡin 556/11 September 1161. To be sure, the caliph was not liberated by this murder, to which he was possibly privy, for he found himself compelled to

confer the vizierate on Ruzik (g.n.), the son of the dead man. Ruzik had no intention of giving up any of his prerogatives, and the caliph established relations with a prefect of Upper Egypt, Šāḡwar (g.n.), in order to invite him to rid him of Ruzik. Šāḡwar recruited troops and took the offensive; he succeeded in taking Cairo and assuming power in Rabi' I 558/February 1163. The caliph quickly perceived that he had made a blunder, and the new minister continued, like his predecessors, to exclude his master. Šāḡwar was soon betrayed by one of his own officers, Dirghām (g.n.), who took his place in Ramaḡin 558/August 1163. There were indeed grounds for the sad reflection of a contemporary writer, 'Umra, who observed that in those times "any man who had received the confidence of his brother betrayed him". Then followed the crucial event which was to bring about the fall of the dynasty. Šāḡwar had succeeded in making his escape; he took refuge at the court of the Zangid prince of Aleppo, Nūr al-Dīn, and asked his help to regain power. The prince of Aleppo did not hesitate, being fired with the idea of re-establishing Sunnism in Egypt and reconstituting Islamic unity. The expeditionary force was commanded by Šāḡhīk (g.n.), "a man full of audacity to whom fear was unknown", who took with him Šāḡh al-Dīn, the future founder of the Ayyūbid dynasty. Dirghām was beaten in the open country and killed, and Šāḡwar became vizier again in Ramaḡin 559/August 1164.

Difficulties arose in connection with Šāḡhīk, but he does indeed seem that he was not to blame for them. Šāḡwar had demanded help from Sunnism against the Šāḡhītes whose chief minister he was; the next time his treachery was much more serious, for he asked for the intervention of Amālīc I to drive the forces of Šāḡhīk out of Egypt. The temporary results of this are well known: Šāḡhīk capitulated at Bilāyās and went back to Syria, the Franks occupied Cairo for a short time, and Šāḡwar had Futāḡ set on fire, being unable to defend it. For the vizier had become alarmed and was trying to negotiate the withdrawal of the Frankish troops. The caliph, who still had absolutely no authority, had now for his part decided to appeal to Nūr al-Dīn, thus signing the warrant for his imminent fall.

This was the third invasion by Šāḡhīk. It was decisive: he had Šāḡwar assassinated on 17 Rabi' I 564/18 January 1169, and seized the viziership, which he held for only two months, for he died on 22 Dhuḡdā 564/12 March. His nephew, Šāḡh al-Dīn, succeeded yet him.

Šāḡh al-Dīn energetically repressed the internal disorders, and did not hesitate to accept the challenge of street fighting in the capital itself, in the course of which the remnants of the Fatimid army, the Sudanese and Armenian forces, were exterminated. Then, one fine day, the name of the 'Abbasid caliph of Baghdad was proclaimed in Cairo, in an atmosphere of complete indifference. A theologian of Persian origin, al-Khāḡhūhī, carried this out, and three years later Šāḡh al-Dīn rewarded him by opening a college for him. The dedicatory inscription has been preserved; it celebrates the importance of Šāḡhīsm, "characterized by a solid doctrinal foundation, unified by the method of al-Aghā'arī, against vain reasoners and other innovators". Perhaps the caliph 'Adīd never knew of his misfortune; he died a few days after the 'Abbasid proclamation, on 10 Muharram 567/13 September 1172. He was not yet twenty-one.

Thus 'Adīd was far from being a caliph on the

scale of some of his predecessors. Nonetheless, he possesses some interesting information about his personal appearance, for he received a Frankish embassy led by Šāḡwar. The Franks were taken, in the royal palace, to a vast hall divided into two by a great curtain of silk and gold, "with a pattern of beasts, birds, and persons". Šāḡwar prostrated himself three times before this hanging, the third time in an attitude of most humble adoration. Suddenly the great tapestry was raised and the caliph appeared, seated on a throne of gold, encrusted with precious stones. His face was veiled, and the removal of the glove of his right hand was an elaborate performance. The ambassadors were told that "the caliph was a youth whose beard was just beginning to appear, and that he was dark-skinned and very plump".

ADIGJE (see ZAKRIE).

AL-'ADĪL, title of two Ayyūbid princes:

1. AL-MALIK AL-'ADĪL 'ABD BAKR MUHAMMAD B. AYYŪB, with the honorific title of SAYYID AL-DĪN ('Sworn of the Faith'), called by the Crusaders *Saphadin*, the brother, assistant, and spiritual heir of Salāḡh (Šāḡh al-Dīn, g.n.). He was born in Muharram 540/June-July 1145, or according to other accounts in 538/1143-4, in Damascus or in Baalbek, thus being six or eight years younger than his celebrated brother.

Al-'Adīl accompanied Salāḡh to Egypt in the third and final expedition of Šāḡhīk (564/1169). His first important appointment was to the government of Egypt during Salāḡh's frequent absences in Syria after the death of Nūr al-Dīn in 569/1174. In this position he proved himself an able and loyal administrator, and apart from sending reinforcements and supplies, when called upon, for Salāḡh's army, he enjoyed full and independent powers in both external and internal affairs, being "the real Sultan of Egypt" ('Imād al-Dīn, in *al-Bārī* al-Šāḡhī, v, fol. 1170). After the capture of Aleppo in 579/1183, Salāḡh at first gave it to his son al-Zāḡh Ghāḡ, but a few months later, on al-'Adīl's own request, transferred it to him with full powers of government (diploma in 'Imād al-Dīn, *ibid.*, 124-6, dated Šāḡhīn 579), and appointed his nephew Taḡī al-Dīn 'Umar to Egypt, as regent for al-'Adīl (g.n.). Although al-Zāḡh loyally submitted to his father's decision, his disappointment on this occasion probably contributed to his later strained relations with al-'Adīl. Three years later, however, in 582/1186, again on al-'Adīl's suggestion, al-Zāḡh was reinstated in Aleppo, and al-'Adīl himself reapportioned to Egypt, this time as regent for Salāḡh's son al-'Azīz 'Uthmān. He remained in this post through the campaigns of 583-4/1187-8 and the ensuing Crusade, himself taking part in the conquest of southern Palestine and Karak, and sending ships, men, and supplies in support of Salāḡh's attempt to raise the siege of 'Akka (585-7/1189-91). During the subsequent operations in Palestine he played a particularly important part in the negotiations with Richard Coeur-de-Lion, with whom he formed such friendly relations that it was even proposed that he should marry Richard's

sister Joan, and that they should rule jointly over Palestine. In the following year (588/1192), in consequence of the disorders resulting from Takl al-Dīn's unauthorized campaigns in the Djazira and Diyar Bakr, al-'Ādil was transferred to the government of these provinces (at the same time retaining Karak and Balqa'). Behind these frequent changes there may perhaps be discerned a consistent policy applied by Saladin. Of all his brothers, the one in whom he had the most complete confidence, and on whose advice he relied in all contingencies, was al-'Ādil. It was therefore natural that al-'Ādil should be placed in command of that province which, in the changing conjunctures of events, was for the time being the most vital to maintaining the unity and strength of Saladin's possessions.

On Saladin's death in 589/1193, al-'Ādil's first task was, in fact, to defeat an attempt by 'Izz al-Dīn, atling of Mosul, to reconquer the Djazira. Having secured his own province, he next intervened as mediator in the rivalries between Saladin's sons al-'Āziz of Egypt and al-Afdal of Damascus. Though at first he supported al-Afdal, the latter's incapacity became so manifest that he finally joined al-'Āziz to drive out al-Afdal and himself took over the government of Damascus as the vicar of al-'Āziz (592/1196). He was thus on the spot and ready to deal energetically with the Crusaders of 1197. On the death of al-'Āziz (595/1199) the Egyptian troops split into two factions, one supporting al-Afdal, the other al-'Ādil. Al-'Ādil was besieged in Damascus until relieved by his Mesopotamian troops under his son al-Kāmil, when he pursued al-Afdal into Egypt, defeated him, and was proclaimed Sultan of Egypt and Syria (596/1200). His claim was challenged by al-Zāhir, who again besieged Damascus, but al-'Ādil succeeded in forcing his withdrawal and pursued him to Aleppo, where al-Zāhir was finally compelled to recognize his suzerainty (598/1202). In 602/1207 his Sultanate was formally confirmed by the Caliph, and thereafter he distributed his own provinces between his sons: al-Kāmil in Egypt, al-Mu'azzam in Damascus, al-Awāl and al-'Āshraf in the Djazira and Diyar Bakr, himself moving from place to place as circumstances required.

So far as can be judged, the cornerstones of al-'Ādil's policy were to hold Saladin's empire together, in face of the ever-present possibility of fresh Crusades from overseas, and at the same time to serve the interests of the Ayyubid house. Although the major governments were placed in the hands of his sons, it cannot be denied that they were the most capable to administer them, but he maintained at Aleppo the only one of Saladin's sons who showed any capacity and even guaranteed the succession of his infant son (who was also his own nephew), besides maintaining the governments of the collateral branches at Hama and Hamah. His personal prestige was unrivalled, and he employed it to strengthen the moral and material welfare of his subjects, by patronizing religion and learning, fostering agriculture and commerce, and maintaining peace. He followed Saladin's policy of negotiating commercial treaties with the Italian states, with the double object of increasing his own military resources and discouraging them from supporting fresh Crusades. With the local Crusader states he ensured peace by a series of truces which covered almost the entire period of his reign, at the same time strengthening his defences against the danger which materialized with the arrival of the Fifth Crusade in 614/1217. Leaving the bulk of his forces on guard in Egypt,

he moved into Syria to assist al-Mu'azzam to screen the approaches to Jerusalem and Damascus, and while organizing reinforcements for the defence of Damietta fell ill and died at 'Ālūkh, outside Damascus, on 7 Dhu'l-Hijja 1, 615-31 August 1218.

AL-'ĀDIL B. AL-SALĀR, AḤO 'L-HASAN 'ĀLĪ, Fātimid vizier. He was the son of an Artukid officer, who entered the service of the Fātimids after the taking of Jerusalem by the Egyptians in 492/1098. He married the widow of a Zirid prince who had died in exile at Alexandria.

He first appears in history as governor of Alexandria, at the beginning of the reign of the Fātimid caliph al-Zāhir. We learn that he assembled troops, marched on Cairo, and, on 7 Sha'ban 544/10 December 1149, installed himself in the vizier's house, which had been abandoned by his predecessor, Ibn Ma'īn, an old man, who was killed in Upper Egypt on 29 Shawwāl/19 February 1150. In spite of his repugnance, the caliph al-Zāhir was forced to accept him as vizier, with the title of al-Malik al-'Ādil. He tried, however, to foment a plot against his minister, but the latter set wind of it and took his revenge in a bloodthirsty way by wounding out the corps of pages. Before long he himself was to fall victim to a stepson, 'Abbas b. Abi 'l-Futūḥ [g.e.], who assigned to his own son, Naṣr, the task of assassinating Ibn al-Salār, on 6 Muharram 548/3 April 1153. Naṣr carried out the crime with his own hand, and by carrier pigeon informed his father 'Abbas, who had just taken command of the garrison of Ascalon. 'Abbas hastened back to Cairo to assume the office of vizier.

An important point about the political career of Ibn al-Salār is that he was the first to consider the possibility of an entente with the prince of Aleppo, Nūr al-Dīn, for making common cause against the Franks. It was doubtless premature: Nūr al-Dīn had his own personal designs on Damascus, which the Crusaders had besieged some years previously. As proof of his good will, Ibn Salār had, in 546/1152, sent the Egyptian fleet against the ports of Jaffa, Sidon, Beirut, and Tripoli, where great damage was caused. The expedition was also a reprisal against the Franks, who had sacked Farama the previous year.

'ĀDILA KHĀTUN, daughter of Ahmad Paṣhā, wife of Sulaymān Paṣhā Mizrākīl ("Abū Laylā"), Ottoman governor of Baghdad. During the lifetime of her husband she took part in the government of the province, holding audiences where the petitions were presented to her through the intermediary of an eunuch. She had also a mosque and a caravanserai built, bearing her name. When on the death of Sulaymān (1175/1761) power was about to slip from her hands, she stirred up against his successor, 'Alī Paṣhā, first the Janissaries, then five of the principal Mamūlūks, and succeeded in having 'Umar Paṣhā, her brother in law, appointed as governor in the place of 'Alī (1764). It is not known when and where she died.

(CL. HUART\*)

'ĀDIL SHĀHS, designation of the Muslim dynasty which ruled over Bidjāpūr, one of the successor kingdoms to the Bahmani kingdom of the Dekkan. The independent history of Bidjāpūr extends from 895/1489 to 1097/1686 when the kingdom was conquered and absorbed by the Mughal empire. The founder of the dynasty, Yūsuf 'Ādil Khān, was a slave in the service of Mahmūd Gawlīn, the famous Bahmani minister. After rising to the position of master of the horse at the Bahmani court, Yūsuf was appointed to the provincial governorship of Dawlatābād. He took an active part in the intrigues and civil strife which marked the declining years of the Bahmani kingdom and, according to the historian Firāhtā, caused the *khwa* to be read in his own name in 895/1489. The Muslim historians of the dynasty claim a royal lineage for Yūsuf 'Ādil Khān, asserting that he was a son of the Ottoman Turkish sultan Murād II and was saved by his mother from death at the hands of the succeeding Ottoman sultan, his elder brother Muḥammad II, by being entrusted to a merchant of Sāwa, Kh'āḍja 'Imād al-Dīn, who educated him. Eventually he found his way to India to take service under Mahmūd Gawlīn. There is no independent evidence corroborating the testimony of historians partial to the 'Ādil-Shāh dynasty. That his background was Persian is generally accepted however. Yūsuf 'Ādil-Shāh introduced Shī'a doctrines, being the first Muslim ruler in India to do so. During his reign, 895/1489-916/1510, spent in almost continual warfare against rival Muslim Dekkan princes and the Hindu rulers of Vijayanagar, the Portuguese made their appearance off the shores of India, taking possession of the port of Goa. The successors of Yūsuf 'Ādil-Shāh reigned as follows:

Imād al-Dīn b. Yūsuf	916/1510-947/1534
Malū b. Imād al-Dīn	947/1534-947/1535
Ibrāhīm I b. Imād al-Dīn	947/1535-965/1557
'Alī I b. Ibrāhīm	965/1557-987/1579
Ibrāhīm II b.	
Tahmāsp b. Ibrāhīm	987/1579-1035/1626
Muḥammad b. Ibrāhīm	1035/1626-1066/1686
'Alī II b.	
Muḥammad	1066/1686-1083/1672
Sikandar b. 'Alī	1083/1672-1097/1686

Until the beginning of the 11th/17th century and the advent of the Mughal threat from the north, the political history of Bidjāpūr is filled by con-

tinuous warfare with the neighbouring Muslim states of the Dekkan, Bidar, Ahmadnagar, Golkonda and the Hindu empire of Vijayanagar. However, in 972/1564 the four Muslim principalities combined against Vijayanagar and at Talikota decisively defeated its forces and sacked the capital. The power and prosperity of Bidjāpūr reached its zenith under Ibrāhīm II though it was never free from turbulence among the nobles.

Bidjāpūr escaped the direct attentions of the Mughals until the reign of Shāh Jihān, attempting indeed to acquire territory from Ahmadnagar which was disintegrating under the onslaught of the Mughals. Bidjāpūr tried the latter clashed with it in 1060/1656 the Mughals invaded Bidjāpūr and forced a peace at which Bidjāpūr acknowledged Mughal suzerainty. For the next twenty years the kingdom enjoyed peace. In 1068/1656 when Muḥammad 'Ādil-Shāh died, Shāh Jihān objected to the succession of 'Alī 'Ādil-Shāh II, invoking his claims as suzerain, and ordered Aurangzib to invade the kingdom. Operations were stopped, however, at the news of Shāh Jihān's illness and Bidjāpūr survived only to face further danger from the Marhatta chief Śivājī who in 1069-70/1659 destroyed a Bidjāpūr army and its leader Afdal Khān in an ambush. Thereafter Bidjāpūr was rarely free from Marhatta depredations. With the accession of a minor, Sikandar 'Ādil-Shāh, the kingdom was progressively bereft of Mughal and Marhatta of its provinces until in 1097/1686, after a siege of more than a year, the capital itself was taken by Aurangzib and the remnants of the kingdom absorbed into the Mughal empire. Sikandar died in captivity in 1111/1700.

The 'Ādil-Shāhs were great builders and made their capital at Bidjāpūr [g.e.] one of the most magnificent monuments to the architectural genius of Islam in India. They were also great patrons of literature and the important historian Firāhtā wrote under the patronage of Ibrāhīm 'Ādil-Shāh II.

(P. HAVY)

ADİYAMAN, formerly called HAY MANŞUR, or HİS-Nİ MANŞUR (modern spelling HANNUMANŞUR), according to Cuinet also called KÖRÜN, a small town in S.E. Anatolia, capital of the *hādā* of the same name in the *sandjak*, now *wilāyet*, of Malatya (formerly it belonged to the *wilāyet* of Ma'nadīrat ul-'Āziz), 37° 45' N, 38° 15' E. The numbers of the inhabitants given in the *paṣt varyi*: according to E.I., 10,000, mainly Armenians; according to Sāml, 25,000, of which only 1255 Christians; according to 'Alī Dījawād in one passage 1150, in another more than 25,000 of which more than a half were Kurds; according to Cuinet 2,000 (in the whole *hādā* of HİS-Nİ MANŞUR: ed. 134). The number in 1945 was 10,192.

The name HİS MANŞUR derives from the Umayyad *amir* Manşūr b. Dī'a'wana, who was killed in 147/768 on the orders of the 'Abbāsīd al-Manşūr. Later, Harūn al-Rashīd had the place fortified and gave it a garrison. Thus HİS MANŞUR, or Adiyaman,

because the heir of the ancient town of the neighbourhood, Perre, whose site is still marked by aqueducts and rock graves. Subsequently, Hira Manūrī is rarely mentioned; in the 6th/12th century it belonged to the Artukids.

#### 'ĀDĪJ, ivory.

1. From early times there was a demand for ivory in the civilisations of the Near East. The Assyrians excelled in the carving of ivory and excavations at Nimrud and elsewhere have revealed masterpieces seldom surpassed. In the eastern Mediterranean area a tradition of ivory carving persisted and surviving examples have been attributed to the great centres of Antioch and Alexandria during the later centuries of Roman rule. There is no evidence that the workshops of Syria were producing ivories in the century before Islam; but in Egypt the tradition persisted into the Islamic period.

Probably the main source of ivory in the Islamic period was East Africa, the greatest ivory producing area during the Middle Ages. It is unlikely that India exported ivory in any quantity to the Near East or Europe as it scarcely produced enough for its own needs (W. Heyd, *Histoire du commerce du Levant au Moyen-Âge*, Leipzig 1886, i, 629-30). Surviving Islamic ivories seem to be of elephant tusk. Walrus ivory was used for the handles of daggers (see R. Ettinghausen, *The Unicorn*, Washington 1950, 120 ff.) and there are examples of bone carvings from Egypt.

The size and shape of the elephant tusk limits its use to relatively small objects or to elements in large scale decoration. In the Islamic period objects made entirely of ivory include caskets of both rectangular and cylindrical form, combs, oliphants or hunting horns and chess pieces. Techniques of decoration were carving in relief or painting on the surface with coloured stains including gilding; intarsia in which shaped ivory plaques either carved or painted were countersunk in a wooden surface; incrustation in which sheets of ivory were cut to the required shape and stuck to the wooden surface; and incised decoration usually consisting of dots and concentric circles sometimes filled with coloured pigments. Finally, ivories sculpted in the round are extremely rare.

2. It would be strange if ivory had not been in use in the early Islamic period. But so far excavations at sites of the Umayyad and 'Abbasid period have revealed no objects of ivory. There are very few ivories attributable to the Sāsānid period in Persia and perhaps the lack of a tradition accounts for this absence of ivory carvings in Mesopotamia and Persia. The cylindrical box with conical cover in the treasury of St. Gereon, Cologne, was made, according to the inscription, in Aḍen for a governor of Yaman probably about 336/753; but its technique and style belong rather to Egypt (*RCEA*, no. 47, ill. in Cott, pl. 796). In Egypt Coptic craftsmen kept alive an earlier tradition. Large rectangular panels with both intarsia and incrustation decoration have been variously described as panels of a *tābūt* (coffin)

and as book covers; the former is more probable. Pieces have been found in Egypt, and the style were made by Coptic craftsmen in the 9th and 10th centuries. (For examples in the Arab Museum, Cairo, see Zaki Muḥammad Ḥasan, *Islamic Art in Egypt* (in Arabic), i, Cairo 1935, pl. 35; in the Kaiser Friedrich Museum, Berlin, *ibid.*, pl. 34 and F. Sarre, *Islamic Bookbinding*, London 1923, pl. i and fig. 2, where it is described as a Kur'an cover; and in the Metropolitan Museum of Art, New York, M.S. Dimand, *A Handbook of Muhammadan Art*, M.S. Dimand, 1947, fig. 69.)

Bone and ivory carved panels have been found in the ruined moulds of Fustāt and are associated stylistically with the wood carvings of the Fātimid period. These are cut in low relief and depict scenes of the chase, isolated animals and human figures set against a background of scrollwork. They were probably either panels of caskets or insets to larger wooden panels and can be dated to the 11th-12th century. (Examples in the Arab Museum, in Zaki Muḥammad Ḥasan, *Kunūz al-Fātimīyyin*, Cairo 1937, pl. 56; in the Victoria and Albert Museum, in M. Longhurst, *Catalogue of carvings in ivory*, i, London 1927, pl. xxviii; in the Metr. Mus., in Dimand, *op. cit.*, fig. 70. For examples of carved woodwork, see E. Pauty, *Les bois sculptés jusqu'à l'époque ayyoubide* (Cat. gén. du Musée arabe du Caire), Cairo 1931.) Caskets of ivory both rectangular and round are mentioned by al-Makrīzī, *Khulūd*, i, 414, in an eye-witness account of the treasures of the caliph al-Mustansir.

Apart from these, it is impossible at present to attribute others with any certainty to Fātimid Egypt. A group which has the strongest claim is represented by the beautiful panels carved in aljaur in the Bargello Museum, Florence, which are perhaps related in style and subject matter to the famous carved wood panels from the *mihrāb* of Kalā'īn now in the Arab Museum. In composition and workmanship they far surpass the Fustāt fragments. (Well illustrated in *Meisners Werke Mahomedanischer Kunst*, Berlin 1910, ill. pl. 253. There is another example in the Louvre, see G. Migeon, *Manuel d'Art Musulman*, Paris 1927, fig. 148. For the *mihrāb* panels, see Pauty, *op. cit.*, pls. xlviii-lviii.) Another group which has been ascribed to the Fātimid period comprises ivory oliphants or hunting horns and caskets. Their style is distinct and characterized by relief cutting in two planes; the decoration consists of interlaced circles each containing an animal or bird and, in the caskets, human figures too. Similar treatment of the decoration occurs in the repertoire of Fātimid ornament as well as in that of Muslim Spain. An attribution to Sicily or South Italy whose Norman rulers are known to have employed Muslim craftsmen should also be considered, for there are a number of oliphants of apparent western manufacture which reproduce in a general way the decoration of the oriental ones. If the latter were in fact made in Egypt it is at least possible that they were made for export to the West. (See O. von Falke, *Eifenbeinhörner*, 512-7, who attributes six horns and a fragmentary piece in the Metropolitan Museum to this group; also four caskets, seven plaques (in the V. and A. Museum) and an ivory box (in the Metr. Museum).)

As has already been mentioned the technique of incrustation was practised in Egypt. A casket of wood with ivory incrustations in the Cappella Palatina, Palermo, has been attributed to Egypt since it is connected in style and technique with a

fragmentary wood panel incrustated with ivory found at Edfū and now in the Arab Museum. Its date would appear to be the end of the 12th and beginning of the 13th century. (See Monneret de Villard, *La Casella*, pls. i-v; for the Edfū panel, pl. xxvii.)

While the technique of incrustation was being adopted by the Muslim craftsmen, the Copts maintained the more ancient tradition of intarsia decoration. Both techniques were used in the doors of the Church of the Virgin in the Dayr al-Suryān (in Wādī al-Naṭrīn), which were made in the first half of the 10th century (see Monneret de Villard, pls. xxi-xxv). But incrustation was rarely used in later times and was confined to small objects. Intarsia, on the other hand, was frequently used in the Ayyūbid and Mamlūk period for the decoration of large surfaces. The famous *mihrāb* made in Aleppo by order of Nūr al-Dīn in 1168-9 A.D. and sent to the Maḥdīd al-Aḥsā in Jerusalem, is the first of a series of works in which panels of ivory or bone, either plain or carved, were inserted into a wooden ground so as to form geometric patterns, stars or polygons. Intarsia decoration is found in *hursi*, *mihrāb* and *dikka* of the Mamlūk period. The contrast between wood and ivory serves to emphasise the abstract pattern and the effect is heightened when the ivory panels are carved with arabesque or inscriptions. After the fall of the Mamlūks the technique was adopted in Turkey where there are fine examples of mosque furniture with intarsia decoration dating from the 17th century. (The *mihrāb* in al-Aḥsā is illustrated in M. van Berchem, *CIA, Syrie du Nord, Jerusalem*, iii, no. 277 (p. 393 ff., pls. 29-30). Mamlūk examples in L. Hautecœur and G. Wiet, *Les Mosquées du Caire*, Paris 1934, ill. pls. 172-3, and Turkish examples in E. Kühnel, *Meisners Werke der Archäologischen Museum in Istanbul*, iii, Berlin-Leipzig 1935, pl. 19.)

3. A group of ivories which has given rise to much discussion consists of caskets, combs and crossiers with painted and gilded decoration. Many of these found their way to the treasuries of European churches in the Middle Ages where the caskets were used as reliquaries or pyxes and the combs for liturgical purposes. P. H. Cott's *Siculo-Arabic Ivories*, which can claim to be almost complete, illustrates some ninety pieces in which the painted decoration is still visible. All have certain common stylistic and technical features. In many pieces all trace of the original colour has disappeared and the well preserved state of the famous casket of Würzburg is exceptional. Generally patterns are outlined in black and filled in with a palette which includes red, blue and green, and gold applied in both liquid and leaf form. Many pieces are inscribed around the rim of the cover in Arabic, either Kūfic or Nashī script. Most of these inscriptions contain benedictory phrases addressed to the owner and, more rarely, verses from a love poem which suggests that these were intended as bridal caskets to contain jewels and trinkets. There are examples, too, of Arabic letters used merely for decorative effect and without meaning. Unfortunately no surviving inscription contains a date, or the name of either maker or owner. If it is generally agreed that the painted ivories can be assigned to the 12th and 13th centuries, opinions differ regarding the place of origin and unless a piece comes to light with a reverse inscription or a reference in some contemporary source is discovered there can be no final answer to this question. In the circumstances style and iconography are the only evidence.

On stylistic grounds they have been variously attributed to Persia, Mesopotamia, Syria, Egypt, Spain and Sicily. It is true that the decoration of the so-called *mihrāb* ware of Persia dating from the second half of the 12th to the 13th century has a superficial resemblance to that of the painted ivories, in the rather sparse arrangement of the decoration and in the figural representations, especially the horsed rider. Attenuated versions of the motives found in the decorative arts of Syria occur on the ivories. The decoration of one distinctive group of painted ivories contains star interlacings and geometric ornaments so similar to those found in the art of Granada during the Nasrid period that their attribution to a Granada workshop during the 14th and 15th centuries seems certain. (Ferrandis, nos. 89-103. Ferrandis accepts the Sicilian origin for the remainder but suggests that three of these were "imitations" made in Spain, viz. nos. 9 and 65 in Cott and a casket in the parish church of Fitero, Navarre, not mentioned by Cott; Ferrandis, no. 21.) Apart, however, from this small and somewhat isolated group, the closest parallels are to be found in the art of Fātimid Egypt: in the fragments of pottery from Fustāt, wood carvings, notably the *mihrāb* panels, and the greatest surviving monument of Fātimid painting, the ceiling of the Cappella Palatina in Palermo. Kühnel (cf. Bibliography), however, argues for their Sicilian (and, in some pieces, Spanish) origin. In this connection, a casket found at Carrion de los Condes in Palencia and now in the Museo Arqueológico, Madrid (Ferrandis, no. 9) is important. This is a rectangular box, the flat cover of which is inscribed on intarsia with a dedication to al-Mu'izz, the last Fātimid to rule from Hrkīya, and the interesting information that it was made in al-Manṣūriyya, the Fātimid capital near al-Qayrawān. The maker's name is unfortunately almost entirely obliterated except for the *niḡba* al-Khurasānī. The casket can therefore be dated between 341/952 and 365/972. The sides are decorated with a border of scroll-work painted in green and red. Although the drawing is curvilinear the style dissimilar to that of the group under discussion, it suggests that the technique of painting on ivory was already known and practised in the Maghrib in the third quarter of the 10th century and was presumably introduced from Egypt.

But the fact remains that these painted ivories give the impression of a style not entirely in accord with the canons of Islamic art. The sparse treatment of the decoration and the frequent carelessness of the drawing are in marked contrast with the careful presentation of decoration and precise drawing to which we are accustomed in Islamic art. Indeed, were it not for the Arabic inscriptions, there might well be doubt in assigning them to the Islamic world at all. For this reason it seems likely that they originated in an area on the fringe of the Islamic world which was open both to oriental and occidental influences. The fact that certain caskets contain Christian figures, that there are two crossiers with painted decoration identical to that of the caskets, and that painted ivories are found exclusively in the countries of Europe suggests that the place of origin, at least, must be the Western market. (Christian figures occur on nos. 38, 39, 42, 44, 80 in Cott; for crossiers see Cott, nos. 148, 149. The Arabic inscription on the "Granadan" casket in the Instituto de Valencia de Don Juan states that it was made to contain the consecrated Host (Cott, no. 138). It is usually agreed that the combs were for liturgical

use.) Probably there was more than one centre where painted ivories were produced, and the poorer examples were copies of finer prototypes. But until we possess a documented piece, there can be no certain solution of the problem.

4. By far the most remarkable of the mediaeval Islamic ivories are the carved ivories made in Muslim Spain and among them are masterpieces which rival the Byzantine and Western ivories. Fortunately there are enough documented pieces to make it possible to trace their history over a period of little less than a century. Unlike most of the ivories which have been discussed so far, they were produced under royal patronage and include some made for presentation to royal personages. During the first half of the period, the centre of production was in Cordova and then moved to Madinat al-Zahra', thus they belong to the declining years of the Caliphate of Cordova. The earliest of the Hispano-Arabic ivories were probably made in Cordova and are characterized by the exclusive use of plant ornament (see Ferrandis, nos. 7-3). In the earliest surviving products of the new workshop at Madinat al-Zahra' the decoration of one consists of painted birds and animals amid floral and plant scrolls and that of another includes painted dancers (see Ferrandis, nos. 4-6). The artists of both these groups were evidently familiar with the carved marble plaques in the Great Mosque of Cordova and the marble revetments found at Madinat al-Zahra'. Another group consists of pieces made in the Madinat al-Zahra' workshop by an artist who signs himself 'Ishad' (Ferrandis, nos. 7-10). His masterpiece is the circular box belonging to the Hispanic Society in New York. His style is quite distinctive; birds, animals and figures are conspicuously absent and the flowers and leaves which are deeply cut are rendered with exuberance and a close attention to detail.

But undoubtedly the greatest achievement is the series of ivories with scenes with figures and animals which, indeed, must be numbered among the most precious examples of Hispano-Arabic art; for not only are they of first-rate artistic quality but as social documents the scenes of court life and of chase which they depict give us a rare picture of the refinements of Andalusian civilization. The three finest examples (Ferrandis, nos. 14-19) are evidently formed of wooden panels with the two cylindrical boxes in the Louvre and the Victoria and Albert Museum, the first dedicated to al-Mughira, brother of al-Hakam II and dated 357/968, and the second dedicated to Ziyad b. Aflah and dated 359/970, and the casket in the Cathedral of Pamplona, dedicated to a son of al-Mansur and dated 399/1008. The last is the latest dated surviving piece from the Cordovan workshop. With these are associated some five other pieces (Ferrandis, nos. 13-6, 20-2). Scenes are enclosed in lobed circles, polygons or arcades. The plant decoration is subordinated to the animals and human figures which are proportionally large; the symmetrical arrangement of these does not preclude naturalistic effect. Scenes include the prince with attendant servants and musicians, huntmen with falcons or at grips with their quarry and men performing rustic tasks such as gathering the date harvest, animals struggling with their prey; and in one case an elephant is depicted. None of these pieces is signed except the Pamplona casket which bears the name of more than one artist.

After the fall of the Caliphate of Cordova, the workers founded a new establishment in Cuernca

where they were given an asylum by the Dihl b. Nuhud, ruler of Toledo. The earliest surviving product (Ferrandis, no. 23) is dated 417/1026 and signed with the maker's name Muhammad b. Zayyin. From this it is clear that the workshop was already established before Isma'il al-Zafar rose the kingdom of Toledo in 427/1036. The last documented piece (no. 26) bears a dedicatory inscription to Husam al-Dawla son of Yahya al-Ma'mun and governor of Cuernca and is dated 441/1049. It is also signed with the maker's name 'Abd al-Fahim b. Zayyin and shows that the workshop was in the hand of a single family. The Cuernca ivories lack the vitality and invention of the Cordovan ivories. Cordovan motives recur but their presentation is monotonous. Animals and scenes are not enclosed by the lobed circles and polygons but are arranged in horizontal or vertical registers in which they are often repeated in identical form.

After the middle of the 11th century it seems that the Christian kingdoms of the North took the lead in ivory carving, although their products show the influence of Andalusian techniques. Yet the tradition of ivory carving was not entirely lost in Muslim Spain, for among the surviving examples of the decorative arts of the Nasrid kingdom of Granada are sword and dagger handles which incorporate carved ivory with floral and geometric designs and inscriptions resembling those of the Alhambra stucco revetments. (The most important pieces are illustrated in L. Torres Balbás, *Arte Almohade — Arte Nazarí — Arte Mudéjar (Arte Hispano-árabe)*, figs. 256B and C, and 257; also a bow with ivory incrustations, fig. 255, and the staff of Cardinal Cisneros, said to be the sceptre of the Nasrid kings, fig. 246. For two other sword handles see Migon, op. cit., fig. 161. Also attributed to Granada are the "eared" daggers with carved ivory plaques in the handles and "ears" of the pommel (see Torres Balbás, op. cit., figs. 256D and B).)

5. Besides ivory carving, Cordova had acquired a preeminence in ivory incrustation which was to survive the fall of the Umayyads. Muslim historians and travellers describe and praise the master craftsman by order of al-Hakam II for the Great Mosque. But neither this nor the *minbar* made some years later for the mosque at Fez by order of Hisham II have survived though from the descriptions both were evidently formed of wooden panels with ivory incrustations. One of the earliest surviving Maghribi *minbars* with this kind of decoration is the magnificent example in the Kutubiyya of Marrākush. According to the inscription (see J. Sauvaget, in *Hepp*, 1949, 313 ff.) this was made in Cordova and dates from the time of the Almoravids. Technically different from mosaics, the decoration consists of interlaced bands incrusting with contrasting wood and ivory cubes enclosing polygons of carved arabesques, larger flowing floral or geometric patterns and a frieze with inscription in which the letters are formed of ivory sheets. The ivory is either natural colour or stained. (For detailed study and illustration see H. Basset and H. Terrasse, in *Hepp*, 1926, 168-204; also Ferrandis, no. 159.) Other *minbars*, if technically less perfect, reveal a rich inventiveness. (The earliest is the *minbar* in the Mosque of al-Karawiyyin, Fez, made at the close of the Almoravid period in 1145. Others are the *minbar* in the mosque of the Kasaba, Marrākush, for which see Basset and Terrasse, 244-70, and Ferrandis, no. 160, and the *minbars* in the mosque of Taza (1292-3) and in the Madrasa Bu 'Isahiyya, Fez

(1350-5). There is a copy of the *Kasaba minbar* in the mosque of al-Mawwāshīn, Marrākush, dating from the 16th century.) In Spain, few large-scale works of incrustation have survived; but there is a particularly fine pair of doors from a cupboard in the Museum of the Alhambra (Torres Balbás, fig. 244-5; Ferrandis, no. 167; other examples, Torres Balbás, fig. 243; Ferrandis, nos. 172, 174). Equally remarkable are caskets with ivory incrustations, decorated either with figural representations or geometrical designs (Ferrandis, nos. 161-3, 168-71). All these caskets have been found in Spain and because of the similarity of their decoration to certain Toledan stucco work have been attributed to Andalusia and the 12th to 13th century. Finally the handle of the so-called rapier of Isma'il in the Museo Histórico Militar, Madrid, has delicate ivory incrustations of arabesques and is an eloquent witness of the skill of the Granadan craftsmen. (See Torres Balbás, fig. 240, and E. Kühnel, *Maurische Kunst*, Berlin 1924, pl. 124. The staff of Cardinal Cisneros has also ivory incrustations, see above.)

6. In this account of ivory products in Islam, the Persia figures scarcely at all. No piece has yet appeared that can be attributed to pre-Mongol Persia. It would be rash to assume for this reason that the art of working in ivory was unknown for there are references in contemporary literature which suggest the opposite. (Monneret de Villard, op. cit., 15, quotes al-Karwini (Wüstendiehl), II, 273, who remarks that the inhabitants of Tark, in the district of Isfahan, are skilled in making objects of ebony and ivory. M. de V. suggests that this implies a local industry of incrustation.) We can only blame the accidents and ravages of time for this absence. That incrustation was practised in later times is proved by the pair of wooden doors inscribed with ivory from the Gūrī Mir, Samarkand, now in the Hermitage Museum, Leningrad (*Survey of Persian Art*, vi, pl. 1470). Made about 808/1405, their decoration is typically Timurid. A pen-box (S. Lane-Poole, *The Art of the Saracens of Egypt*, London 1886, fig. 72) and dagger handles dating from the 18th century or later (P. Heft, *Contributions à l'étude des armes orientales*, Paris 1931, II, pl. 16) imply the existence of a native school of ivory carving.

**ADJA**<sup>2</sup> and **SALMĀ**, the two main ranges of the central Arabian mountain group of Ḥijāb al-Tayyī, modern al-Ḥijāb. An old tale of the type of "metamorphosis as punishment for sin" is attached to them; the tale is connected with reality insofar as *Adja*<sup>2</sup> and *Salmā* occur in Old Arabic and in early North Arabic dialects as personal names.—According to Ibn al-Kalbi's "Book of Idols", and one of the two versions in the *Djāmara* by the same author, the God Fals/Fah/Fulus was worshipped in the guise of one of the cliffs of *Adja*<sup>2</sup>. This cult is probably of great antiquity, as the cult of a certain cliff (Ra'n) in the valley of al-Ḥiṣṣa in the 2nd century B.C., and later between 50 and 150 A.D., is attested by the evidence of some proper names.

**Bibliography:** W. Caskel, *Likyan und Likyanisch*, Köln and Opladen 1934; Ibn Hishām, 56; R. Klinke-Rosenberger, *Das Götzenbuch*, K. al-Asad, des Ibn al-Kalbi, Leipzig 1941, 61 f.; J. Wellhausen, *Reste arabischer Heidentum*, 31 ff.; Yāqūt, I, 122 ff., III, 912. (W. Caskel) 'ADJĀ'IB, "marvels", are in the first instance the marvels of antiquity. In addition, the term and its derivatives comprise, already in the Kur'an, the marvels of God's creation. 'Adja'ib are thus any kind of casual data about extraordinary monuments, the three realms of nature and meteorological phenomena, and the two aspects under which they are viewed come from the Greek spirit on the one hand and the eastern biblical ideas on the other.

Islam, the continuator of the classical tradition as it was formulated in the East, was interested in exceptional monuments, but in a spirit different from that of the Greek. Among the surprising buildings described as marvellous by the Arab authors, the Pharos of Alexandria acquired great notoriety. The monument, described by them in greater detail than by the Greek and Latin authors, existed until the 18th century and was erroneously attributed to Alexander the Great. In general the Macedonian king represented a universal symbol, a mixture of Greek conqueror and of the spirituality of the ancient Orient, and many famous monuments were attributed to him.

As to the marvels of God's creation, these are no wanton inventions of fancy, but are often based on a minute and exact observation of nature. Thus in the al-Ḥayawān of Ḍiḥrī, there are rudiments of "Darwinism", and Abū Ḥāmid describes beavers' dams, which he considers to be miraculous; Ibn al-Fakhr gives an account of the magnetic and electrical phenomena to be observed on a mountain near Ḥamā.

It was, however, inevitable that these two conceptions of the 'adja'ib, so different from the ideological point of view, should fuse together to give rise, especially in the Arabic geographical texts, to a peculiar literary genre. The 'Adja'ib al-Hind by the captain Buzurg b. Shahrīyār (p. x) deserves to be mentioned in the first place by its early date and by its incontestable documentary value for its period. It starts with the statement: "God has divided the marvels of creation into ten parts, of which nine belong to the East, one to the other parts of the compass. Of the nine parts belonging to the East, eight belong to India and China and one only to the other regions of the East . . .". The book consists of stories by the navigators of East Africa, India, and the islands of S.-E. Asia; some of them show an admixture of real observation while others can be explained only by study of the folklore of the people in question. While the marvels of far-away countries found their literary form already in the 4th/10th century, the curiosities of the various Islamic countries were only described in excursus in the geographical treatises (e.g. in al-Makdisī). It was only in the 6th/12th century that these isolated zoological, ethnological, archaeological etc. accounts acquired a particular literary form, especially through Abū Ḥāmid al-Ḥamānī (p. x), who collected them in his *Tuḥfat al-Aḥbāb*. The Arabic literature of the 4th/10th and 5th/11th centuries, called "classical", is characterized by an equilibrium between erudition and aesthetic creation. When this equilibrium was disturbed by the decadence of Arabic literature, the writers increasingly disregarded science; the 'adja'ib thus came into greater favour and reached their full development in the cosmographies of the 8th/14th century. The greatest

author of this period was al-Karwīn (g.v.) whose work is divided into two parts: *'Adjā'ib al-Makhlūqāt*, "The Marvels of Creation", and *Al-ḥikm al-Būdān*, "The Monuments"; thus the best representative of the genre bears witness, centuries later, to the two forms of *'adja'ib* mentioned above. At this epoch the cosmographical works increasingly neglect geography; what remains are collections of entertaining stories. It was also in this period that the *Sindbād* cycle, which is but a literary adaptation of the accounts of Buzurg B. Shahrīyār, was introduced into it.

In the first centuries of the *hijra* the *'adja'ib* were correctly situated in geographical space by those who observed them or by the authors who copied the former; this is also the case with the earlier Arab geographers and with Abū Ḥāmid. As the scientific interest decreased, however, and the popular interest in amusing literature grew, the data lost their precision and their exact geographical localization. The items of real knowledge acquired in Islam and unknown in antiquity recur in general in the descriptions of the *'adja'ib*; yet these *'adja'ib* acquire a particular role in the history of thought in that they transport us from tangible reality to the realm of fancy constituted by the oriental tales. Abū Ḥāmid, the precursor of the popular cosmographers, is one of the authors who has most influence on the Arabic *adja'ib* literature in the age of decadence of Islamic literature in the late Middle Ages; it is not for nothing that his books were among the main sources of al-Karwīn. On the other hand it is through the popular cosmographies that the *'adja'ib* stories brought an essential contribution to the Muslim genius to world literature in the form of the tales of the *Arabian Nights*.

(C. E. DUBLER).

**ADJAL**, the appointed term of a man's life or the date of his death; a topic repeatedly discussed in the earlier *hādith* along with that of *riḥ* or sustenance. The idea that the date of a man's death is fixed presumably belongs to pre-Islamic thought. The word *adjal* is used in the Qur'ān in a variety of ways, e.g. for the date when the embryo emerges from the womb (xxii, 5), for the period Moses had to serve for his wife (xxviii, 28 f.), for the date when a debt is due (ii, 280), etc. In creating the heavens and earth, the sun and moon, God fixed an *adjal* for them (xlii, 3; xxix, 5, etc.); with this is connected the coming of the Last Day. More especially it is used for the term of existence decreed by God for creatures (xxiii, 43, etc.) and for individuals (liii, 20 f.; vi, 9). This term is neither to be anticipated, nor delayed; its fulfilment explains why the wicked are not punished at once. "No one has his life prolonged or no one has his life cut short except (as it is written) in a book (of God's decrees)" (xxv, 12). The *adjal* is not shortened even through sinning (xxv, 44, xlii, 13), while

on the other hand it may be concluded that Muhammad presupposed the shortening of the *adjal* as a punishment, but it might be restored to the original length through repentance (ii, 3, xiv, 17). The Qur'ān very often emphasizes the expression of *adjal* as the irrevocable period of life assigned by God with the epithet *musammad* (xxxix, 43; xi, 60, and elsewhere), "enunciated" (without ambiguity) "through a word which had proceeded from God" (xlii, 13); the same epithet is applied to the course of the unchangeably operating placement of matter (xix, 28, xxxv, 17, xxxix, 7). The decreed duration of the world is also often designated by the same formal expression (vi, 2, 67, xxix, 44). One may notice in the commentaries to the Qur'ān the tendency to refer the *adjal musammad*, where it is possible, to the period of the end of the world.

According to tradition (al-Bukhārī, *Kadar*, i; Muslim, *hādith*, 3; etc.) *adjal* and *riḥ* are two of the four things determined for a man while he is in the womb. Some of the early Mu'āzila apparently suggested that a man who met a violent death had not reached the term decreed for him by God. Perhaps they said this because they hesitated to ascribe the evil of killing to God, just as they did not assert that sustenance consisting of stolen goods came from God. For a number of the Mu'āzila, *adjal* is capable of being interpreted as natural term or, as they put it, "the time at which God knew the man would have died had he not been killed" (cf. *ḥina*). This view, however, offended the deep-rooted feeling that the date of death was fixed. Even Abū 'Udhayl said that, if the man had not been killed then, he would have died in some other way. Al-Najdīli insisted that, whatever the mode of death, a man died at his term; and he was followed by the opponents of the doctrine of *hādith*, including al-Ash'arī. Al-Kāfi tried to avoid ascribing evil to God by distinguishing between the death and the killing. No fresh points were raised after this, but the old points were frequently repeated by theologians. — The dogmatists discussed in connection with *adjal* also the question, whether God lengthens or shortens the *adjal* as a reward for obedience or as a punishment of disobedience respectively, a question to which the answer results in the harmonizing interpretation of the Qur'ānic verses quoted above and puts the problem of *adjal* in the domain of the debates on *hādith* (g.v.). An aspect of the problem of *adjal* concerns the death of great masses by elementary catastrophes, war, pestilence, etc.

Jewish religious philosophy treats the problem from the same point of view.

(I. GOLDZIEHER-W. MONTGOMERY WATT)

**'ADJALA**, Arabic word borrowed from the North-Western Semitic languages (Hebrew *'agallā*, Phoenician *'āḡ*, Jewish-Aramaic *'agallā*, Syriac *'agallā*, Coptic *'agallā*, from the New Egyptian *'gri* = *\*agallā*, whence Coptic *agallā*; see references in L. Koehler, *Lexicon in Veteri Testamenti libro*, Leiden 1953, 679), derived from a root denoting rotundity or swiftness. In Arabic, as in these languages, it designates wheeled vehicles (chariots, carts, wagons) drawn by animals; but in Arabic it is a generic term. It is for this reason that the use of these vehicles in the Islamic Orient will be treated here, if only in a fragmentary way.

Before Islam, the use of various kinds of cars (among them those termed *'agallā*, etc., in the Semitic countries of the west and in Egypt) is well attested in the whole of the Near East (cf. e.g. V. Gordon Childe, *Wheeled Vehicles, in A History of Technology*, i, Oxford 1954; A. G. Barrois, *Manuel d'archéologie biblique*, ii, Paris 1953, 98-100, 233; A. Salomon, *Die Landfahrzeuge des Alten Mesopotamien*, Helsinki 1951; Ernan and Ranke, *Agypten*, Tübingen 1923, 584; P. Monet, *La vie quotidienne en Égypte*, Paris 1946, 169). In spite of the decline of the chariot of war as early as the Persian period (Salomon, 21), carriages are frequently mentioned in the same region during the Hellenistic and Roman periods (cf. e.g. for Egypt, C. Prêtre, *L'économie égyptienne*, Brussels 1939, 414; W. E. Crum, *A Coptic Dictionary*, Oxford 1939, 26; Jewish texts in S. Kraus, *Talmudische Archäologie*, Leipzig 1910-2, ii, 336-8 and G. Dalman, *Arbeit und Sitte in Palästina*, ii, 111-5, iii, 58 f., 88-90, vi, 205 etc.). The same applies for pre-Islamic North Africa (R. Capot-Rey, *Géographie de la Circulation*, Paris 1946, 87).

In Islamic times, the texts concerning wheeled traffic seem much less frequent. The word *'adjala* occurs but rarely in the Middle Ages. None of the passages allows the technology of these vehicles to be determined; at the most they mention the animals which draw them. The lexicographers do not seem to deal with the subject. The reference in *Kalīla wa-Dimna* (Cheikhov), 24, to a vehicle drawn by two oxen is derived from the Sanskrit original. In historical and geographical texts one comes across references, e.g. for Egypt, to such vehicles used for heavy loads (Umayyad period; Yāqūt, i, 260; al-Mas'ūdī (*Musūdī*), iii, 28 f.) in the 4th/10th century mentions large wagons drawn by buffaloes in the Syrian *ḥaḡḡ*; 7th/13th century: Ibn Sa'īd, in al-Makhlūqāt, *Al-nakla*, i, 691; for Morocco in the 8th/14th century: al-Djannābī, *Zahrat al-As* (Bell, 27, transl. 69 f.).

Most of the references, however, concern vehicles used in exceptional circumstances, and which appeared to cause considerable astonishment. E.g. in 242/856, a pilgrimage from Basra to the holy cities on an *'adjala* drawn by camels (Ibn Taghribirdī, Cairo, ii, 307); a few years later, an *'adjala* drawn by men, which carried the sick Ahmad b. Tūlūn from Antioch to Egypt (Ibn Abī Usaybā, ii, 84); in 307/919 the large vehicles prepared in Baghdad for the public humiliation of the rebel Yūsuf b. Abī 'l-Sādī (*K. al-Uyūn*, in Ibn Miskawayh, ed. Amelrod, i, 49, n.). The Christians during their feasts used state carriages, e.g. in Edessa on the eve of the feast of the cross (Husayn b. Ya'qub, in al-'Umari, *Masālik*, i, Cairo 1924, 265). The animals mentioned as drawing these vehicles, which were perhaps of very different shapes, are varied: horses (of several breeds), camels, oxen, mules, donkeys, buffaloes, perhaps also elephants; as noted above, human traction also was used on occasion.

The word often serves to designate foreign vehicles: Byzantine racing chariots (Ibn Rusta, 120, Ibn Khurrādādhbih, 112), wagons of the Christians of the Iberian peninsula (Ibn 'Idhārī, iii, 86; *Al-ḥikm al-'Aḡ*, ed. M. J. Müller, *Die letzten Zeiten von Granada*, Munich 1863, 44, transl. 147-8), later Turkish arabas.

In Muslim Iran, literary references to carriages (*gārdān*) seem to be equally rare (B. Spuler, *Iran in frühislamischer Zeit*, Wiesbaden 1952, 428-9, notes no examples). Firdawsi, however, transposes into the world of myth wagons drawn by buffaloes or oxen (ref. in F. Wolff, *Glossar zu Firdawsi's Shah-name*, Berlin 1935, s.v.). A wooden chariot used by Isfandiār (*Shāh-nāmā* (Mohl), iv, 500-2, 510) is often shown in miniatures (e.g. *Survey of Persian Art*, v, 832 D; *La guirlande de l'Iran*, Paris 1948, 30), generally as a cart with two spoked wheels drawn by a horse tied between two shafts. Persian miniatures occasionally show other illustrations of wagons: a four-wheeled wagon drawn by a horse (MS from Tabriz, end of 7th/13th century, in E. Blochet, *Musliman Painting*, London 1929, pl. xli); a cart with two spoked wheels drawn by a horse tied between two shafts on which are carried materials for building a mosque (miniature of Bihzād, A.D. 1467, in E. Kühnel, *Miniaturmalerei im islamischen Orient*, Berlin 1928, pl. 31); a kind of yurt probably mounted on wheels, drawn by horses, and used to carry to Tabriz the corpse of Ghāzān Khān in 703/1304 (MS of 9th/15th century, reproduced in E. Blochet, *Les peintures des manuscrits de la Bibl. Nat.*, Paris 1914-20, pl. xix, cf. p. 272).

On the other hand, carts (*ḡarḡl*, later also *araba*, *arba*) were very frequently used by the Turco-Mongols of Central Asia until the 17th century, after which the economic decline of the nomad world led to a lessening of their use. Ibn Baṭṭiṭa, ii, 361, mentions them in Southern Russia. This vehicle, the name of which was arabicised as *'araba* and even *'arabiyya* ("Arabian"), was introduced in particular into Mamlūk Egypt (see *'ARABA*). Its name supplanted in popular use the word *'adjala* as a generic term for carriages, so that *'adjala* could be used anew in modern Egypt as a name for bicycle. In Turkish Anatolia the byzantine wagon (*ḡarḡl*) remained in use.

The medieval situation survived in the countryside up to modern times. In Syria, Volney states in the 18th century: "It is noteworthy that in the whole of Syria no wagon or cart is seen; this is probably due to the fact that they should be seized by the government's men and a heavy loss should be suffered in a moment" (*Voyage en Égypte et en Syrie*, Paris 1825, ii, 254). In Palestine, before the first world war, only Circassians and foreigners had peasant vehicles (Dalman, *Arbeit und Sitte*, ii, 98 and fig. 40-2; A. Ruppin, *Syrien als Wirtschaftsgebiet*, Berlin-Vienna 1920, 424-5). On the *ḡarḡl*, the situation is the same all over the Near East, except in Anatolia. For Morocco at the beginning of the 20th century, see Ch. René-Leclerc, *Le Maroc septentrional*, Algiers 1905, 87, 231-2; idem, in *Revue géographique coloniale*, 1905, 248; R. Le Tourneau, *Fin avant le Protectorat*, Casablanca 1949, 415. Various explanations have been offered, the most common being the bad state and insecurity of the roads (R. Brunschwig, *La Barbarie orientale sous la Barbarie*, ii, 236; J. Weulersse, *Paysans de Syrie et du Proche-Orient*, Paris 1946, 335-6; cf. Mez, *Revue*, 461, Lévi-Provençal, *Hist. Esp. mos.*, iii, 98). Yet the comparison with the condition of the same countries

in antiquity and with the Turkish countries make this an unsatisfactory explanation. The increasing scarcity of wood, due to the loss of forests, should perhaps be taken into consideration, and one could perhaps establish a parallel with the degeneration of the plough (cf. A. G. Haudricourt, *L'homme et la charrue*, in the press, and *musaghi*). Also the improvement of transport due to the increasing use of the camel and the pack-saddle must be taken into account.

Nevertheless, sooner or later in the various countries, European vehicles were introduced, together with their usually Romance names (in Persia with a Russian name, *kiliseke*), but were often adapted to local techniques and customs. Restricted to urban, official and military use, to public transport (for Persia, numerous descriptions and illustrations in C. Auet, *La Perse en automobile*, Paris 1906, 122, 186, pl. 19, 25, 26, etc.), they rarely penetrated into the countryside. As early as the 17th century, the Muridiy bay of Tunis travelled in a *karrisa* (Italian *carrozza*) (Ibn Abi Dînâr, *Mu'nis*, Tunis 1286, 224); this word is now in common use in North Africa and is found even in Berber dialects (L. Brunet, *Textes arabes de Kabul*, 1, Paris 1952, 212). Similarly *karrisa* (Italian *carrozza*) is used in Algeria for carts and wagons (Beausse, *Dict. pratique arabe-français*, Algiers 1931, 795); the word was already used, in the plural form *kararîf*, to designate Portuguese wagons in the 16th century, *Chronique anonyme de la dynastie sa'adienne* (Cohn), 59. In Egypt, the *'arabiyat hantar*, 'cab', from Hungarian *hant* through Turkish *kârda*, cf. F. Mikschich, *SEAF*, Wiesbaden, 1889, 8, 1889, 8) and the *'arabiyat bârî* (Italian *carro*) are used (Nallino, *L'arabo parlato in Egitto*, Milan 1913, 241; cf. Ahmad Amin, *Kimât al-'Adât wa'l-Tahdîd*, Cairo 1951, 333 and pl. xvi). Bibliography: H. Zayyat, *al-Khizma al-Shar'iyya*, iii, Beirut 1946, 149-51; V. V. Barthold, *O bolesnom i verkhovnom distani v Srednei Azii*, Zakh. Institut Vostochnovedeniya Akademii nauk S.S.S.R., 1937, 5-7; A. G. Haudricourt, *Contribution à la géographie et à l'éthnologie de la voiture*, *Revue de Géographie humaine et d'Ethnologie*, 1948, 34-64 (important methodological indications).

(M. RODRIGUES)

'ADJAMI, the etymology and semantic evolution of this collective term in Arabic are exactly parallel to those of the Greek word *βάρβαρος*. In connection with the basic meaning of the root from which it is derived, 'adjām means people qualified by *'ajima*, a confused and obscure way of speaking, as regards pronunciation and language. 'Adjima is therefore also the contrary of the Arabic *fahsha*, and the 'adjām are the non-Arabs, the *βάρβαροι*, so called after the most characteristic sign of barbarousness: an incomprehensible and obscure way of speaking. As to the Greeks, so also to the Arabs, the barbarians were primarily their neighbours the Persians, and pre-Islamic poetry already contrasted al-'Arab with al-'Adjām, although for the latter the form *'adajim*, the plural of *'ajim*, was preferred. The affective value attributed to the word depended on the point of view of the user; although it preserved for the most part the original contemptuous force inspired by the haughty presumption of Arab superiority, it sometimes, and even at an early date, implied the desirability and allurements of the exotic, and the acknowledgment of a more civilized and refined culture. In any case, during the whole Umayyad period the superiority of the Arabs, who held the hegemony in Islam and by whom it was spread,

over the conquered 'adjām was uncontested, and only isolated voices were raised (e.g. by the poet Janā'ib b. Yaṣr in *al-ġhānī*, iv, 411-12) in support of the race and culture of non-Arabs, i.e. of the Iranians. With the coming to power of the 'Abbāsids, the victory of the 'adjām over the Arabs, a victory which Nasr ibn Sayyar had already deprecated in famous verses (al-Dinawari, 360), reversed the situation, the Iranians, having obtained political and social supremacy, soon laid claim to the supremacy of their cultural and spiritual values. This was the *ghu'abiyiyya* movement [g.u.] which, in its essential nucleus, reaffirmed the superiority of the 'adjām over the Arabs, even although its campaign was carried on in Arabic. When the heat of the controversy had died down, the two words remained in current usage merely to indicate ethnical differences, 'adjām becoming synonymous with *Furs* (Persians). 'Irāk 'Adjāmī indicated, from the late medieval period onwards, Iranian Media (which the ancient geographers had called al-'Irāqī), to distinguish it from 'Irāk 'Arabī, which is 'Irāk proper. *Lāmiyyat al-'adjām* was given as the title, in contrast to the celebrated *harida* of Shānīara, to a similar poem by Ibn al-Ḥakīm al-Ḥakīmī (Ibn Tugh'ā' [d. 1122]). For 'adjāmī = aljamīdo see ALJAMIDO.

'ADJAMI OGHILÂN (accnt *oghlan*), a term, meaning 'foreign boy', applied to Christian youths enrolled for service as Ottoman *kapî hân*es [g.u.], originally, according to the *Penâh bîsmîn* of 1562, by the reservation of one in every five of those taken prisoner of war, and later by *dewchîme* [g.u.] conscription. They were first placed for from five to seven years at the disposal of feudal sipahîs and others in Anatolia, and later also in Rumelia, in order to learn Turkish and accustom themselves to Muslim usages, and then posted to the 'adjamî odjak of Gallipoli and, after the conquest, to that of Istanbul, being simultaneously selected for subsequent service, according to their abilities, in the sultan's palace or in one or other of the *odjak*s of the standing army, infantry and cavalry, or of the *hoshîdîle* [g.u.] of Edirne and Istanbul. Their actual appointment—known as *kapîya bîsmâ*—to the palace service or their reservation in *odjak* was by seniority on the occurrence of vacancies.

After preliminary training at Ghalaṭa Sarâyî or Ibrahim Pasha Sarâyî in Istanbul or at Edirne, 'adjamî oghlân appointed to the sultan's household (and hence thereafter called *id oghlân* or *id aghas*) might gradually rise from its lowest *hoshîd* or dormitory to the *hâkîmî oda* [g.u.], from the chief post in which those who attained them might be appointed *beherîyeys* and *vevîrs*. The two most important standing cavalry regiments (*sîpâhîs* and *sîlâhdârîs*) were likewise recruited from among the *id aghas*, the other four (*niâzîdîs* and *ghurabâs*) being recruited from among those 'adjamî oghlân who, though selected for the palace service, were not in the event appointed to it.

Most of the 'adjamî oghlân not chosen for the palace were destined for service as Janissaries (see *YENI ERK*), whether after preliminary service in the *odjak* of the *hoshîdîle* or by immediate admission into one of the thirty-four *ortas* [g.u.], under the command of the *Idaush aghas*, which were reckoned as forming part of the Janissary *odjak*.

The gradual abandonment during the 17th

century of the *dewchîme* naturally resulted in the disappearance of 'adjamî oghlân proper, though their organization was maintained, like that of the whole Janissary *odjak*, till its abolition in 1826.

'ADJAMIYYA, a term used of the writing of non-Arabic languages in Arabic characters, (see ALJAMIDO, *BAVA*).

'ADJARIDA, Khāridjite sect which spread especially in Khurāsān. The name is derived from that of its founder, 'Abd al-Karīm b. 'Adjarad, who succeeded from the 'Atawīyya, one of the subdivisions of the Naḡdīdāt [g.u.]. 'Abd al-Karīm was a native of Balūkh and was imprisoned by the governor of 'Irāk, Khālid al-Kasrī (105-20/724-38). The main religious tenets attributed to 'Adjarida were: the exclusion from Islam (*harā'iq*) of children (even of one's own, according to Ibn Harūn) until they grow up and become believers; the duty to invite them to embrace the true faith when they reach puberty; the assertion that *ahīra* is a meritorious act, not a duty; the profession of friendship (*uḍayfa*) towards the quietists (*al-ha'adī*), the affirmation that *shu'at* (i.e. *ḥudūd*) which by its frivolity could not be the word of God, did not belong to the Qur'ān.

Al-Ash'arī names as branches of the 'Adjarida the Maymūniyya, Khālafiyya, Hamziyya, Shu'aybiyya, Saliyya, Khāzimiyya (with two subdivisions) and Thā'aliba (with five subdivisions). Al-Shah-rastānī adds the Atrāfiyya. Most of these schools held a less rigid opinion concerning children, viz. that they are in a neutral status until they accept or renounce faith at the time of puberty. The Hamziyya played an important political role in the 'Abbāsid period. The grave Khāridjite revolt which broke out in 179/795 in southern Khurāsān and which lasted till 195/810 was, in fact, led by their chief Hamza b. Adrak.

AL-AQDĀBĪ, ABU IḤSĀN IBN AHMAD IBN AHMAD AL-LU'WĀ'Ī, a author of various works on philology (especially the *Kifayāt al-Mutabā'if*), a lexicographical work. Al-Tidjānī possessed several of them in autograph copies (al-Aqdābī was famous for his calligraphy). Al-Aqdābī lived in the second half of the 5th/11th century in Tripoli where he also died; his tomb is still venerated there.

(H. H. ABDUL-WAHAB)

ADJĀBĪYA, town of Cyrenaica, on the old main road which followed the coast from Alexandria to Tripoli, halfway between Barka and Surt. Adjābīya now belongs to the district of Benghazi. It was conquered by 'Amr b. al-'Ās in 22/643, was subjected to poll-tax (*jizya*), and became during the following three centuries a

military station and a great centre of commercial traffic. Built at the gate of the desert on stony ground—whence probably the Arabic name Adjābīya, "the sterile"—it had in the 3th/11th century a citadel and a substantial mosque, built about 300/912-3 by the Fātimid prince Abū 'l-Kāsim, son of 'Ubayd Allāh al-Mahdī, with a very fine octagonal minaret, 114 ft. high, cut in the rock, provided water of good quality; there was also a fountain of sweet water. The town was surrounded by orchards (figs, apricots, etc.) and a small number of palms. The houses were built mainly in the form of brick vaults (*dāmīa*), as in the Sahara *ghārs*. It was well supplied with meat, fruits, honey, wool, etc. from the hinterland, especially the Jabal Aḥḥār, and prices were low. On the gulf of the Great Syrtis, later called in Djawā al-Kibitī ("gulf of sulphur") there was a small harbour six miles from the town, called al-Mahūr (?), which served as port for ships destined for Adjābīya. According to the early geographers, the inhabitants of the town and the district were mainly Luwāṭa Berbers (subdivisions of Zanāna, Wāhila, Masāsa, Siwa, Tablāna, etc.), but a number of 'Arabī elements, such as Azal, Laḥm, Sāḍīf, etc., settled there after the conquest.

The prosperity of the town seems to have been lost following the great Hīlāl and Sulamī invasion in the 5th/11th century. The travellers (al-'Abdarī, al-'Ayyāghī, al-Warḥilānī) who passed Adjābīya on their way from the Maghrib to the East, describe it as a town long since ruined, without any vegetation in the vicinity, with only a few visible, but abandoned, vestiges of habitation. During the Turkish, and especially the Italian, occupation, Adjābīya became a small village, serving as a stage between Benghazi and Misrata.

(H. H. ABDUL-WAHAB)

AL-'ADJĀDĪ, ABU 'L-ḤĀ'ITH 'ABD ALLAH B. RU'BA, Arab poet of the Tamīm tribe, who resided mainly in al-Basra; it is probable that he was born during the caliphate of 'Uthmān (23-35/644-66) and he died in 97/115. Little is known about his life, except that he had to journey with the Kūfan river. Abu 'l-Nadīm i, 103 ff. The main characteristic of al-'Adjādī's poetry—like that of his son Ru'ba [g.u.]—is the constant and exclusive use of the *raḡaz* metre in poetical compositions marked by a very rich vocabulary and a laborious construction made more difficult by the poet's respect for the rules of prosody and the unusual number of lines (220 in one *urḡūza*). His *arḡaz* on the model of the pre-Islamic *harida* generally comprise a traditional *waṣṭā* (replaced in one case by religious subject-matter), then descriptions of the desert and the animals found there (camels, horses, onagers, wild bulls), and end with the panegyric of a man, of the poet himself, or his tribe. Al-'Adjādī never cultivated either the *satira* or the *elogy*. His grammar is addressed to eminent personalities such as Yazīd b. Mu'awīya, 'Abd al-'Azīz b. Marwān, Bishr b. Marwān, Sulaymān b. 'Abd al-Malik, al-Hadīdīdī b. Yūsuf, 'Umar b. 'Ubayd Allāh b. Ma'nār, Mu'ab b. al-Zubayr. The Arabic critics unanimously praise the verbal richness of al-'Adjādī, whose verses are frequently cited by the lexicographers; but he was guilty of an exaggerated use of alliteration, and an excessive addition to rare words.

(H. A. R. GIBB)

**ADJR** (A.), reward, wages, rent. The word is of Akkadian origin and was received into Arabic, through the intermediary of Aramaic, at an early date. It is used in a religious and in a legal sense, which both occur from the Kur'ān onwards.

1. In a great number of Qur'anic passages, *adjr* denotes the reward, in the world to come, for pious deeds. This concept seems to derive from Christian rather than from Jewish sources, and it has become one of the fundamental ideas of practical ethics in Islam. According to Kur'ān, vi, 160, ten good deeds are credited for each one accomplished, though the term *adjr* does not occur here. It is often stated in traditions that the well-intentioned, though imperfect, fulfilment of religious obligations gives right to one reward, whereas their successful accomplishment is rewarded twice or several times. The fulfilment of the religious duty of the *ṣalāt* (q.n.), and of the parallel duty of giving judgment according to religious law, in particular, gives right to one reward, even though the decision arrived at is faulty; if it is right, two (or even ten) rewards are promised. The earliest tradition to this effect seems to have originated towards the middle of the second century of Islam.

2. As a legal term, *adjr* seems to have denoted in Mecca, in the time of the Prophet, any payment for services rendered, and it is used in the Kur'ān not only of wages, but of the *maḥr* (q.n.) which is due to wives, whether free women or slaves, under the contract of marriage, including a *muḥa* marriage (q.n.) (iv, 23 f.; v, 5; xxxiii, 50; ix, 10), and of the maintenance due to divorced wives who feed their children (lav, 5). In the doctrine of religious law, the term was restricted to wages or rent payable under a contract of *adjra* (q.n.). For rent in particular, the special term *uḡra* is often used.

**ADJURRUMIYYA** (see *ḤEN ADJURRUMIYYA*).

**'ADJŪZ** (see *AYYAM AL-'ADJŪZ*).

**ADJWAF** (see *TASHAF*).

**'ADL** (1) Etymologically, the term is found both as substantive and as adjective, but with meanings that do not exactly correspond. 'Adl, the substantive, means justice; as an adjective, it means rectilinear, just, well balanced; it thus applies both to beings and to things. In its two forms, the word is current in the vocabulary of religion, theology, philosophy, and law. In the Mu'tazilite doctrine, 'adl, the justice of God constitutes one of the five fundamental dogmas (*uḡal*) of the system (see *ḤUḤ FAZLA*). The Kāfi must give judgment with 'adl (or *hiq*; cf. Kur'ān, iv, 58; v, 42); but the idea of material justice plays hardly any part in the theory of religious law (cf. *UḤŪL*), although it is insisted upon in the "Investigation of Complaints" (see *MAZALIM*). The adjective which corresponds exactly to this substantive 'adl is 'adīf.

As an adjective, the word 'adl expresses more particularly a juridical conception, and has numerous

applications. However, agreement has never been reached on a definition of the term, as the Mālikite jurist Ibn Rughd observes. Furthermore, the various definitions that have been formulated are too comprehensive and imprecise. In al-Māwardī's definition, 'adāla, the quality of 'adl, is described as a state of moral and religious perfection. For Ibn Rughd it consists in not committing major sins, and also avoiding minor ones. But another author observes that such a state can be found only very exceptionally, in the saints; that 'adāla simply describes the state of a person who in general obeys the moral and religious law. This last conception is the one that came to be finally accepted. In the latest stage of Muslim law, as it appears in the codification undertaken in the Ottoman empire about the middle of the 19th century, the following definition is given: "The 'adl person is one in whom good impulses prevail over bad" (*Madjalla* art. 1705). In short, one can translate 'adl by "person of good morals", with the essentially religious sense that this has in Islam. Whether this quality must be a natural inclination, innate or acquired, or whether it is sufficient for it to be achieved by an effort of will, is however a theoretically disputed point.—The antonym of 'adl is *fāsh*.

The adjective is also employed substantively; it then means a person of good morals (pl. 'adāl). 'Adāla enters into various juridical categories. In the theory of public law, 'adāla is one of the principal conditions for carrying out public functions recognized by the doctrine of the School. But it is in private law, in the theory of evidence, that the idea has been most fully developed and involves a most detailed system of regulations. The witness must be 'adl; it suffices, however, that his 'adāla should be substantiated at the time when his evidence is given and not at the time of his observation of the fact in question. It is a disputed point, nevertheless, whether the witness is presumed to have 'adāla so long as it is not contested by the adversary, or whether, even if it is not called in question, it should be the subject of verification. The latter course has prevailed in practice and in doctrine. Consequently a procedure has been evolved for substantiation of the 'adāla of witnesses; it is known as *tashya* or *ta'dil*. In the latest stage of the law, this procedure involves two phases. In the first, the judge proceeds to a secret investigation, by sending a question in a sealed envelope to qualified persons; this is *al-tashya al-sirriyya*. It is afterwards necessary, in certain cases, for these persons to appear at the public hearing to confirm their former attestation; this is *al-tashya al-salbiyya*. The attestation of this 'adāla of a witness is called *ta'dil*; contestation of this 'adāla is called *ḡḡḡ*.

However, the *tashya* procedure is not used exclusively as an accessory or as incidental to a law-suit. It functions also independently and as an end in itself, for recognizing in a positive and final manner the quality of 'adāla in given persons. Because of the small reliance placed on writing, as such, once its use became widespread, recourse was had, in order to give it once and for all conclusive force, to the procedure of testimonial proof. However, this method was not altogether reliable, for the witnesses of the instrument could always themselves be challenged on the ground of lack of 'adāla. This difficulty was overcome by the use of a preliminary *tashya*; the judge recognizes once and for all the 'adāla of a certain number of persons, who thus become in principle irrefragable witnesses, and

absence of technical terminology — a want shared by Muslim as well as ancient science — was the most valuable device to depict the plants in figures. In ancient times this method was introduced by the "rhinotomist" Cræteus (1st century B.C.), and a part of the synonyms and figures of his herbal passed into the recension of Dioscorides represented by the Juliana Aulica codex of A.D. 518 (in which later hands introduced also Arabic synonyms). It was the gift of an illustrated Dioscorides by the Byzantine Emperor to 'Abd al-Rahmān III in Cordova in the year 948 that inspired a new and most fruitful study of the text in Spain. (For details see MS of Dioscorides see notvavazaki.) By Ibn Abi Usayb's (fl. 260-6) we are told that his teacher Ḥaḡḡid al-Dīn al-Manṣūr b. al-Sūfī (d. 632/1241) prepared a herbal illustrated with figures depicted from living plants. For the botanical chapter of Ibn Fadl Allāh, see B. Paris, *Un Herbar arabe illustré du XIV siècle, Archéologie Orientale in Memoriam E. Herzfeld*, 1932, 84 ff.

The Muslim inhabitants of the Iberian Peninsula were the inheritors of a country famous in antiquity for its wealth of minerals and plants useful for preparing remedies. At first, pharmacological knowledge in Spain was, however, an import from the Orient, and Western students went to Baghdad for medical studies. A strong impulse to pharmacological studies in Spain was given by the revised text of Dioscorides, and from the end of the 10th century on there was no lack of contributions to the knowledge of simples. (See M. Meyerhof, *Esquisse d'histoire de la pharmacologie de botanique chez les Musulmans d'Espagne*, *Ann.*, 1935, 1-41.) The first to write books on simples in Spain were 'Abd al-Rahmān b. Ishāq b. Ḥayḡam and Sulaymān b. Ḥasān, known as Ibn Dīnālī, both of whom joined the monk Nicolaus and the other physician and botanists who worked on the text of Dioscorides. Ibn Dīnālī wrote a work on those simples which are not mentioned by Dioscorides (MS Oxford, Hyde 34, fol. 197-201). The great medical encyclopedia al-Taṣrīf by Abū'l-Kāsim al-Zahrāwī (d. about 1000) contains in its 27th book a treatise on the simples, their synonyms and solubility. About the time of Abū Bakr Ḥamīd b. Sa'adīn (9th very little is known except that he was a prominent physician in the days of the Ḥaḡḡid al-Manṣūr (d. 592/1200). His famous *Book of Sayings of Ancient and Modern Physicians and Philosophers about the Simple Drugs* has recently come to light (cf. P. Kahle, *Ibn Sa'nān and sein Drogenbuch, Documenta islamica medii*, Berlin 1932, 25 ff.).

The most comprehensive textbook on simples (and botany) produced in Spain was written by al-Ḥaḡḡidī, probably in the first half of the 6th/12th century. The first vol. exists in two illustrated MSS (see M. Meyerhof, in *BIF*, 1941, 13 ff.; the whole work was discovered in Tripolitania). An abridged version was made by the Christian Abū'l-Faraj b. al-Ḥafī, commonly called Barhebraeus (cf. M. Meyerhof and G. P. Sobhy, *Cairo 1938-8*, not completed). The method and arrangement of material followed by Ibn Sa'nān and al-Ḥaḡḡidī was the model also of al-Idrīsī (fl. 560/1160). In his *Book of Simple Drugs* (the first half of the work in MS Fifth 3610, Istanbul) he contributes a vast material of synonyms in many languages (see M. Meyerhof in *Archiv für Gesch. der Med., der Naturwiss. und der Technik*, 1930, 45 ff., 225 ff.; idem, in *BIF*, 1941, ff. 13). For Ibn Rūḡḡid's pharmacological chapter

see the photographic reproduction of Book IV of al-Kalīyūḡ by A. al-Bustānī, Tanger 1939.

In a vast encyclopedia, al-Ḥaḡḡidī's *Is-Maṣraṭ al-Adwiyā wa'l-Ḥaḡḡidīya* (3rd edition of the Arabic text, Būlāḡ 1291). French trans. by L. Leclerc, *Nouveau d'Entrée de la Bibliothèque Nationale*, xiii, xxv, xxvi, xxv, 1877-93. Ibn al-Bayṭār (d. 646/1248) put together all information available to him, quoting about 150 previous authors from Dioscorides to his own teacher, Abū'l-Ḥabīb al-Nabāḡī, whose *Rihla*, or "Botanical Journey", he often quotes. Most of these works Ibn al-Bayṭār certainly knew from memory; cf. sources, al-Ḥaḡḡidī above all. In 234 articles the Ḥaḡḡidī's treats of about 1400 different drugs and plants, 400 of which were not known to the Greeks.

To these works, written in the West, containing descriptions of the drugs and directions for their use, may be added also a number of others, containing lists of synonyms written in order to explain the meaning of the different names given to simples and drugs. Such are e.g. the *Ḥaḡḡidī Asmā' al-Uḡḡār* of the famous Jewish theologian, philosopher and physician Mūsā b. Maymūn (Maimonides, A.D. 1135-1204), ed. M. Meyerhof, Cairo 1940, and the anonymous *Tahṡīl al-Aḡḡār*, ed. H. P. J. Renaud and G. S. Colin, Rabat 1934, treating especially of the names current in Morocco and written probably in the 13th century.

**Bibliography:** M. Meyerhof, in the introduction to Maimonides, *Ḥaḡḡidī Asmā' al-Uḡḡār*; for a list of drugs, M. Steinschneider, *Heilmittelnamen der Araber*, WZKM, xi (2043 items). (B. LEWIS) AF'Ā means not only the viper, as it is commonly assumed, but also other similar kinds of snakes (Nāḡḡā, cf. Wiedemann, 271). The descriptions, however, which are given in Arabic zoological works (spotted or speckled, broad head, slender neck, short tail, sometimes furnished with two horns, etc.) fit well with specific kinds of vipers (*achis carinatus*, *echis coloratus*, *aspis cerastes cerastes*). Most sources state that af'ā denotes the female, whereas the male is called *waṣṣā*. The first term, however, is always employed in a generic sense. Corresponding terms in Hebrew and Ethiopic suggest that the word belongs to the oldest stock of the Semitic languages.

The af'ā is often mentioned in Arabic literature, from ancient poetry, proverbs and ḥadīṡ down to those later works in which zoology and zoological items are treated systematically. In ancient poetry it is represented as the emblem of the mortal enemy, of one who seeks revenge for murder. Its name is illustrated by the proverb: "He who has been stung by an af'ā is afraid to take hold of a rope". Rich information is offered by al-Ḥaḡḡidī. The af'ā had a market value since theriac was prepared from it. Certain people made a living from this trade importing the af'ā chiefly from Sijidīn. In al-Ḥaḡḡidī's time thirty af'ā sold for two *dirhams*. With certain Bedouins the af'ā served as food, and this habit was satirically alluded to by some poets.

A good deal of the information on the af'ā is fabulous: e.g., that it lives to an age of a thousand years, that it becomes blind and recovers its sight by rubbing its eyes on the fennel-plant (*faṣṣāḡ*). Among the correct accounts is the statement that the af'ā is viviparous; in contrast, i.e., to most other species of its genus.

**AFĀMIYA**, or FĀMIYA, the Seleucid city of Apamea on the right bank of the Orontes ('Āsī), at its northward bend 25 m. N.W. of Ḥamāt. During the Syrian campaign of the Sāsānīd Khuraw I (540) it was captured and laid waste. After the Arab conquest of Syria it was colonized by tribesmen of 'Uḡḡra and Baḡra'. It regained importance as a fortified outpost of Aleppo only in the Ḥamādīd period and during the early Crusades. After the disintegration of the Saldjūk power in Syria, Afāmiya was occupied by the Arab Khāḡif b. Muḡḡib in the Fāṭimid interest in 489/1096. On his murder by Assassins, it was captured by Tancred in 500/1106, and became the seat of a Latin archbishopric. It was recaptured by Nur al-Dīn Maḡmūd in 528 Rab'ī I, 3426 July, 1149, after his victory at Ināb, but its fortifications were destroyed in the great earthquake of 552/1157. The ruins of the old city still exist, flanked on the west by the later citadel, now named *Kal'at al-Muḡḡib* (for al-Madīḡ, i.e. the shallows or ford).

**AL-AFDAL** b. SALĀḡ al-Dīn, in full al-Malik al-Afdal Abū 'l-Ḥasan 'Alī Nūr al-Dīn, the eldest son of Salāḡīn (Ṣāḡḡ al-Dīn, [203], b. 565/1169-70, d. at Samarra 622/1225. On Salāḡīn's death he was recognized as ruler of Damascus and head of the Ayyūbīd family, but owing to his incapacity and self-indulgence he lost successively Damascus, Egypt, and all his Syrian fields, and ended as a dependent of the Saldjūk sultan of Rūm. See AYYŪBIDS.

**AL-AFDAL**, Rasūlīd ruler [see RASŪLIDS].

**AL-AFDAL** b. BADR al-DJAMĀLĪ, Abū 'l-Kāsim Ḥāḡḡānāḡḡ, Fāṭimid vizier, commonly known in history by his vizierial title. His birth is placed about 458/1066, and it is known from an inscription of 482/1089 that he was associated with his father in the vizierate. On the death of Badr, the aged caliph al-Musta'īr was forced by the army to accept al-Afdal as his chief minister, and himself died a few months later.

The accession of the caliph al-Musta'īr assumed a capital importance by its indirect repercussions. While al-Musta'īr was still alive, but of great age, the problem of his successor had been debated, and an Isma'īlī missionary from Persia, Ḥasan b. al-Sabbāḡ, had concluded in favour of Nizār, one of the caliph's sons. Al-Afdal, being the vizier in office, raised to the throne a younger son of al-Musta'īr, Ahmad, who was given the title of al-Musta'īl. The dispossessed heir, Nizār, who had fled to Alexandria to raise an army, was seized and immured in a dungeon. Some persons, however, believed that he succeeded in escaping, and he was recognized as Imām by Ḥasan b. al-Sabbāḡ, who founded the formidable sect of the Assassins. The outrage of the latter bore for some time the name of Nizār, and their partisans in Egypt were called Nizārīs. Al-Afdal had not foreseen these consequences, and his attitude had been dictated by considerations of personal ambition, which induced him to place on the throne a young man who would be submissive to his will.

Badr al-Djamālī, who had saved Egypt from disaster, had set up a dictatorial regime, and al-Afdal now followed in his footsteps, confining the caliph al-Musta'īl, who was about twenty years of age on his accession, to his palace. Al-Musta'īl reigned for less than eight years (487/1094-495/1101), and some historians have suggested that he may have been poisoned by Nizārīs. Al-Afdal, when placed on the throne a son of al-Musta'īl, a child five years old, who was given the title of al-Amīr b. al-Ḥakīm Allāḡ, and the al-powerful minister went on to govern without interference. But as the caliph grew up he became restive under his vizier's tutelage, and succeeded in hiring the services of assassins who rid him of al-Afdal in 515/1121. The latter had held the office of chief minister for twenty-seven years, marked by an internal tranquility which is the more impressive by contrast with the unprecedented disorders of the following years.

Al-Afdal's dictatorial power justifies the laying at his door of the responsibility for the Egyptian negligence in face of the invasion of Palestine by the Crusaders. The Fāṭimid government may be partially excused if its unpopularity outside the borders of Egypt is taken into account. It has certain actions to its credit: some fortresses were restored (we have epigraphic evidence at least for the port of Sidon in 491/1098); in the previous year the Fāṭimid army had regained Tyre from a dioloyal governor; finally, Jerusalem was forcibly captured in 491/1098 from the Artukid officers who had established themselves in it. The Egyptians were not unaware that Jerusalem was the essential aim of the Crusaders, and it cannot be believed that they captured it in order to hand it over to the Franks. Ambassadors from Egypt had in fact appeared in 490/1097 in the Crusaders' camp before Antioch, and the latter in turn sent envoys to Cairo, possibly to negotiate an agreement. As a matter of fact, northern Syria was occupied by princes of Samal obedience; the Fāṭimids had no desire to interfere with them, and the Saldjūks would have viewed their intervention with bad grace. In the absence of precise documents we are reduced to putting forward these hypotheses.

Nevertheless, the inaction, or at least the lack of vigour, of the Egyptian troops cannot be ignored. They did not move to the defence of Jerusalem. Its fall was deeply felt, and al-Afdal led an army corps to a position north of Ascalon; there, however, he

held them immobile, while he waited for reinforcements which were expected to arrive by sea and for the concentration of his bedouin contingents from Palestine. The Franks took the offensive and massacred the Egyptian army; al-Afdal fled to the protection of Ascalon and hastily returned to Cairo. The year 494/1107 witnessed the Frankish occupation of Palestine, whose population sought refuge in Egypt. The vizier continued, in the following and later years, to show a certain activity against the Crusaders, but in fact the expeditions scarcely went beyond the outskirts of Ascalon and never gained more than booty and prisoners. The main ports of Syria were at the time in the hands of overlords, who sported Sunni or Shīʿī colours according to the interest of the moment. One of the more important raids, led by a son of al-Afdal, succeeded in taking Ramla. In 497/1103 Akkād (Acre) fell, surrendered by its Fatimid commandant because of lack of support. The stubborn resistance of the autonomous prince of Tripoli induced al-Afdal to send a naval squadron, which arrived too late. In 512/1118 the Frankish threat redoubled when the town of Faramā was burnt down—an episode which became famous because of the accidental death of Baldwin I, king of Jerusalem, who led the expedition. During this lamentable period the Muslim princes were full of mutual suspicion, but al-Afdal had solicited, and obtained, the cooperation of the Būrids of Damascus.

Clearly, a very bad impression is made by the luxury which surrounded the caliph al-Amir and his vizier; ceremonies and feasts seemed to multiply in direct ratio with the number of cities that fell into the hands of the Franks. Whatever responsibility rests on the government of Egypt for this indifference cannot be placed on the caliph, still a mere child, but on his all-powerful minister, who was given over to frivolous heedlessness. There is in particular a striking contrast between the kind of edifices built by Badr—of which only the wall and the monumental gates of Cairo need be mentioned here—and those erected by his son al-Afdal. The latter was concerned with his own wellbeing, and multiplied pleasure-pavilions in Fustāt and Cairo. On his death, the caliph al-Amir appropriated the minister's property; it required no less than two months to transfer the precious objects, jewels and silks. On the credit side, however, the historians record al-Afdal's financial readjustments, which notably increased the revenues of the State.

For al-Afdal's son, surnamed Kutayfāt, see the following article.

(G. Wiet)

**AL-AFDAL**, Abū ʿAlī Ahmad, surnamed **KUTAYFĀT**, son of the preceding. After the death of the caliph al-Amir (12 Dhū'l-Kaʿda 524/17 Oct. 1130), the power was assumed by two favourites of the late caliph, Ḥazīmard and Barghāsh, who put forward al-Amir's cousin ʿAbd al-Majdī as temporary regent. Four days later the army raised Kutayfāt

(who assumed the title of al-Afdal) to the vizierate. Shortly afterwards the vizier declared the Fātimid dynasty deposed, and the empire was placed under the sovereignty of the Expected Imam of the Twelfth-Shīʿa; ʿAbd al-Majdī was removed from the regency and placed in custody, and Kutayfāt ruled as a dictator. We have coins of 525 bearing the name of "The Imam Muhammad Abū'l-Kāsim al-Muntaḍir li-Amr Allāh"; others of 526, with the inscription *al-Imām al-Mahdī al-bāṭin bi-Amr Allāh ḥudayfāt Allāh ʿala l-Islām*, give greater prominence to the vizier. ʿAbd al-Majdī ʿAbd al-Amr, his representative (nāʾib) and lieutenant (ḥāṭib). Although this implied the abolition of Ismāʿīlism as the state religion of Egypt, Kutayfāt did not propose to outlaw it, and even showed it a certain consideration; in the college of *ḥadīs* appointed by him there sat an Ismāʿīlī in addition to a Hanafī, a Shāfiʿī and an Imāmī. The Ismāʿīlī elements evidently did not relish the idea of being relegated to the status of a disestablished religious sect. Kutayfāt was killed while riding outside the city, and ʿAbd al-Majdī was brought out of his prison (16 Muḥarram 526/8 Dec. 1131). The event was commemorated annually, right to the end of the Fātimid dynasty (Makrizī, *Khūdā*, i, 357, 400). ʿAbd al-Majdī first ruled as regent, but after a brief interval was proclaimed caliph under the title of al-Ḥāfiḥ li-Dīn Allāh.

- (i) The people; (ii) The Pashto language; (iii) Pashto literature.

#### (i) THE PEOPLE.

Racially, there is a considerable difference between the various Afghan tribes. According to R. S. Guba,  *Census of India*, 1931, i, iii A, p. xi, the Pathāns of Badjāw are closely related to the Kalāghs of Cītrāl, probably because they are to a large extent Afghanized Dards. On the other hand the broad-headed Pathāns of Balūchistan resemble their Balūch neighbours. In the plains of Peshāwar and the Dērāddās there is some admixture of Indian blood, and among some tribes we find traces of Turko-Mongolian influence. But in general it may be said that the Afghans belong to the Irano-Afghan branch of the dolichocephalic Mediterranean race. According to Coon, *Races of Europe*, 219, the skull index is 72-75, and the average height 173 cm. (Frontier Pathāns), and 165 cm. (Afghāns of Afghanistan). The nose is prominent, frequently convex, of the so-called "Semitic" type. Similar noses are found also among Balūchs, Kashmīrīs, etc. "The Afghans are usually brunets, but at the same time show a persistent minority of blondism, which in this case reflects Nordic admixture. They are heavy-bearded" (Coon, 420).

A distinction is sometimes made between Afghān and Pathān, the former name being applied to the Durrānī and allied tribes. But the difference is probably only one of nomenclature, the Persian designation Afghān (of unknown etymology) being naturally applied chiefly to the western tribes,

while Pathān, the indigenous form of the native name is used about the eastern ones.

The native name, employed by all tribes, is *Paštūn*, or *Paštūn* (north-eastern dialect *Paštūn*), pl. *Paštūnān*. Lassen and others after him, compared *Paštūn* to the Πάστριος of Herodotus, and the name of the Afridis has been identified with that of the "Aryānā". This latter identification is possible, if by no means certain. The first one, however, must be rejected, for phonetic and other reasons. (The ending *-n* goes back to *-na*, and the ancient sound-group which has resulted in *Paštū* (*ḥḥ*) is a later dialect form), could scarcely have been rendered by Greek πστρ. More probable is the connection first suggested by Marquart, with Ptolemy's *Παγανίται*, a tribe inhabiting the Pamir region. *Paštū* can go back to ancient *ps* (see Morgenstierne, "Paštū", "Paṭhan", etc., *AO*, 1940, 138 ff.), and the probable ancient form was \**Paru*-*ana*, derived from \**Paru*, cf. Assyrian-Babylonian *Paru(a)* Persian. This does not imply any specially close relationship between the two Iranian tribes in question. (Cf. also *Paštū*, *Pūštū*, the name of the supposed seat of the Afghān tribes in the Warid country.)—*Paštūn* (*Paštūn*) the native name of the Afghān language, probably goes back to a fem. adjective \**Paru*-*ana* (see language).

The Afghāns are called *Kāgh* by the Ōrsmurs of Loḡar, and the *Wazīrīs* *Kwī* (pl.) by the Ōrsmurs of Kīnjarūm. The origin of this word is unknown, but it is connected with *Kāid*, the name of an Afghān tribe near Quetta (Masson, *Travels*, i, 330) and with the *Paštū* name of the Sulaymān Mountains: (da) Kase Ghār.

The word *Paštūn* is used also as a synonym of *Paštūnawāl*, etc., the special social code of the Afghāns, the main pillars of which are: *nanawānā*, right of asylum, *badal*, revenge by retaliation, *wendetta*, *medmānā*, hospitality. The causes of feuds leading to *badal* are said to be "women, gold and land" (*zan, zar, zamān*). Among most tribes the organization is democratic, the hereditary *khān* having restricted power. More important matters are settled in consultation with the chiefs of the sub-tribes and clans, and the tribal or village council (*diris*) plays an important rôle. But the semi-independence of many tribes has become constantly more curtailed as well in Afghanistan as in India (Pakistan). Afghan or non-Afghan clients (*hamāyās*) are attached to, and living under the protection of most tribes.—The ancient custom of periodical redistribution of land (*waḡh*) is now dying out in most places.—Even while politically disunited, and fighting among themselves, the Afghān tribes had a feeling of some kind of unity, based upon their sharing language, customs and traditions. On the other hand, each tribe is split up into sub-tribes, septa and clans. The names of such sections are often formed with the word *ḥḥ*, or with the suffix *-sāy*, and in some cases *-sāy* denotes a whole tribe.

The Afghāns are first referred to (in the form *Avagānā*) by the Indian astronomer Varāha Mihira (early 6th cent.) in his *Bṛhat-saṃhitā*. A little later is the probable reference to them in the Life of Hiuen-Tsang, which mentions a tribe *A-p'o-kien* (\**Avagān*?) located in the northern part of the Sulaymān Mountains (see A. Foucher, *La route royale de l'Inde de l'Irak à Taxila*, ii, Paris 1917, 235, 252 note 17). The earliest Muslim work mentioning them is the *Udūd al-ʿAlam* (372/982), followed by al-Uṭbī's *Taʾrīkh-i Yamīn*, and al-

Bīrūdī. The name *Pathān* does not occur till the 16th century, but the change of *gh* to *th* shows that it must have been borrowed into Indo-Aryan at a considerably earlier date.—According to al-Uṭbī, Cairo 1286, ii, 84, Mahmūd of Ghazni attacked Tukhārīstān with an army consisting of Indians, Khazāḍ, Afghāns and Ghaznawīs, but on another occasion he attacked and punished the Afghāns, and this is corroborated by Bayhaḳī who wrote shortly afterwards. Al-Bīrūdī mentions the various tribes of Afghāns as living in the western frontier-mountains of India (*India*, transl. Sachau, i, 1, 208, cf. 199). This points to the Sulaymān Mountains as the earliest known home of the Afghāns. It is uncertain how far they extended towards the West, but an Afghan settlement west of Ghazni is mentioned by early authors. There is no evidence for assuming that the inhabitants of Ghūr were originally Pashto-speaking (cf. Dames, in E I). If we are to believe the *Pīṭa Khānna* (see below, iii), the legendary Amīr Karṭr, grandson of Shānash, (8th century) was a Pashto poet, but this for various reasons is very improbable. The origin and early history of the westernmost Afghān tribe, the Durrānīs (Abdāllīs) [2.2.], is quite obscure.—Regarding the Ghaznawīs [2.2.] it seems possible that their name is based upon a popular etymology ("Thief's Son") of the Turkish tribal name *Khāḍḍī*, *Khāḍḍī*, located by al-Isṭakhrī on the middle course of the Hilmānd and by the *Udūd* in the region of Ghazni (see *Udūd*). But the Ghaznawīs themselves may have been partly, perhaps predominantly, of Afghan origin. At any rate the Afghāns do not appear to have acquired any political significance during the Ghaznawī period. Some early references which follow were noted by M. Longworth Dames (*EP*) and have been supplemented by P. Hardy. In 431/1039-40 Masʿūd sent his son Isṭayḍar into the hill country near Ghazna to subdue the rebel Afghāns (Gardizi, ed. M. Nazim, 109). In 512/1118-9 an army composed of Arabs, *ʿadām*, Afghāns and *Khāḍḍī* was assembled by Arslān Shāh. In 547/1152-3, Alīf says, Bahrām Shāh assembled an army of Afghāns and *Khāḍḍī*. With the rise of Ghūrī power, the same state of things continues. In 588/1192 according to Firūḡhā, Bombay 1851, 100 f., the army assembled by Muʿizz al-Dīn Muḥammad b. Sām consisted of Turks, Tāḡīkās and Afghāns, and his Indian opponent Pīthorā (Pītharā Rājā) assembled a force of Rājapūts and Afghān horsemen. Thus in this great war between Muslims and Hindus Afghāns are represented as fighting on both sides, which probably indicates that they were not yet completely converted to Islam, although the manufactured legends represent them as having been converted from the days of Khāḍḍī. It is not clear whence Firūḡhā obtained his statement. It does not appear in the account of this war given by Minḥāj-i Sirāj in the *Tabāḥat-i Nāsiri*. This author does not mention the Afghāns throughout his account of the Ghaznawī and Ghūrī kings. His first and only mention of them is in his own time in the year 658/1260 in the reign of Nāṣir al-Dīn Mahmūd of Dillī. He there says (transl. Raverty, 852) that Ulugh Khān employed 300 brave Afghāns in subduing the hill-tribes of Mēwāt in Rājapūṭāna. According to Dīwānyār, i, 142, *Khāḍḍī*, Ghaznawīs and Afghāns formed part of the Mongol army which sacked Marw in 619. During the next two centuries we find occasional mention of Afghāns in Indian history. For instance Baranī says in the *Taʾrīkh-i Firāzshāh*, 57, that Balāhan in 664/1265 established small forts in the neighbourhood of Gopālpur and entrusted

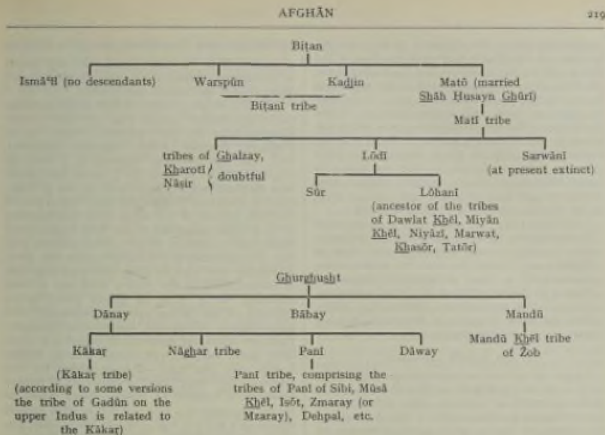

them to Afghans; three other towns, particularly afflicted by robbers, were also given the protection of forts entrusted to Afghans. According to the same author (p. 482) in the reign of Muhammad b. Tughlak there was a rebellion at Multān of a body of Afghans headed by Multān Mall (this name means in the Multān dialect "the champion of Multān" and is probably not the proper name of an Afghan). Sirhindī, *Tārīkh-i Muḥarrakhshāhī*, Calcutta 1935, 106, says that this revolt was in 744/1343. Again Multān Afghan was one of the foreign invaders who rebelled at Delhi. In 773/1370-7 the fleet of Bihār was given to Malik Bīr Afghān (*Tārīkh-i Muḥarrakhshāhī*, 133). Timur found them still hill robbers and in the *Maḥṣūṣ-i Timūrī*, the *Zafar-nāma* and the *Maḥṣūṣ al-Sa'diyya* it is related that he ravaged the country of the Awghān (or Afghān) who inhabited the Sulaymān Mountains. Thus except as occasional soldiers of fortune they remained a fierce race of mountain robbers until the rise to power in India of one of these adventurers made them famous. This leader was Dawlat Khān Lōdī of the Lōdī clan of Ghazays; he rose to be one of the most important persons in the empire. Bahālu Lōdī occupied the throne of Delhi in 855/1450 (see Lōdī). The dynasty was overthrown by Bābur in 932/1525, but for a short time (944-6/1537-55) Shīr Shāh Sūr reinstalled the Afghans in power (see Sūr) and a large number of Ghazays and other Pathāns settled in India. At a later date Awrangzeb made grants of land to Pathāns of various tribes in Rohilkhand (s. see also Kāseri) (Barclay division, etc.), so called from *Paghto roḥila* (Rohilla), "hill-man"; "Pathān". At the court of the Nawab of Bāngpur some Pathān traditions were still alive at the time of Darnesteter's visit in 1886. But gradually the Afghan settlers in India were assimilated, except in the extreme North-West.

The immigration into India was part of the great expansion of Afghan tribes during the late Middle Ages. This expansion was on such a scale that it is difficult to believe with Dames (*ETP*) that the Afghans were still at a period as late as that of the Ghūrī dynasty only an unimportant hill-tribe inhabiting a restricted area.—The Lohāns were

expelled from the Ghazni mountains by the Sulaymān Khēl Ghazays, who also pressed the Bīṭāns eastward through the Gōmal Pass in the 13th cent. A century or two earlier the Khātaks (s. see) and Bangashes had started their movement towards their present homes in Kohāt, and Yūsufzays and allied tribes had, according to tradition, left the Tarnak and Arghasān for Kābul in the 12th cent. Later on they were expelled from Kābul and reached the Peshāwar plain during the 14th cent., pushing back the Lūllākās, who perhaps represented an earlier wave of Afghans, and penetrating into the mountain valleys to the North of Peshāwar (cf. Yūsufzay). The Ghōriya Khēls (Mahmands, etc.), followed in their wake early in the 15th century. Some tribes crossed the Indus into the Panjāb.

A first attempt to rally the Pathān tribes on the Frontier to a common fight for independence from the Mughals was made by the warrior-poet Khushāl Khān Khatak in the latter part of the 17th century. But a national Afghan state first came into being under the leadership of the Ghazay chief Mir Wāys, and, more permanently, under Ahmad Shāh Durrāni in the 18th century (see *AFGHANISTAN, History*).

The main outlines of the tribal traditions of the Afghans are mentioned by Abu l-Faḍl, *Aḥḥar-nāma*; slightly different versions are given in Sulaymān Makā's *Tadhkirat al-Achya* (allegedly of the 17th century) and in the *Pata Khawāna* (cf. about these below, iii). Our main source for the tribal traditions is Nī'mat Allāh's *Mahḥsan-i Afghāni* (completed A.D. 1633). The genealogies given there and copied in later works such as the *Hayāt-i Afghāni*, cannot be relied upon as historical sources, but are valuable as a testimony to the traditions current among the Afghans in the 17th century. According to this tradition the common ancestor of the majority of the Afghan tribes was Kays 'Abd al-Raḥmān who was converted to Islam by Khālid and descended from Afghāna, a grandson of King Tālūt or Sāru (Saul). Kays had three sons: Sarban, Bitan (Bitan) and Ghurgushat. Sarban had two sons: Sharikhbūn and Kharrakhbūn. The further ramifications may be tabulated as follows:

Most of the remaining tribes are said to be descended from Karrān (or Karlān), of doubtful ancestry.

According to some traditions also the Bangash (Bangash) and Wazirā are descended from Kakhay; according to other, the Wazirā and the Dawr tribes are not attached to any of these genealogies.

Certain clans claim to be *sayyids* by descent; such are to be found among the Shērānī, Kākār, Karrānī, Dāwāy, Tārīn, Miyanā and Bīṭānī. The same descent is claimed by the tribes of Gandīpur and Ustārānā; these were originally subdivisions of the Shērānī. The Bangash claim to be of Kurayshite descent.

In the *Mahḥsan-i Afghāni* all these tribes are expressly acknowledged as Afghans, with the exception of the Bangash, Wazirā and those Karrānī which belong to the Kakhay division (Afrīdī, etc.). The last seem to have remained unknown to him.

It is of interest to note that all the Pashto dialects which change the long vowels ( $\bar{a} > \bar{o}$ , etc., see below ii) belong to the Karrānī group or to the Wazirā.—The extreme complexity of the tribal system may be exemplified by the ramifications of the Yūsufzays. One of their five sub-tribes, the Akōzays, are divided into Rānzāys and other sections. One of the five Rānzāy clans is in its turn divided into Ghaybī Khēl and three other clans. And one of the two Ghaybī clans are the Nūr Muhammad Khēls, divided into Ghārth Khēl and Dwar Khēl.—It may also be noted that the name Tōrmān, one of the ancestors

of the Khātaks, is probably identical with that of Toramāpa, a Hūna king of India, and also a member of the Shāhī dynasty. This does not imply any historical connection between the legendary Afghan and these princes, but only a survival of the name in local traditions.

Geographical distribution of the Afghan tribes. Durrānī (s. see) in the lower river valleys from Sabzawār and Zāmb-dāwar to south-east of Kandahār and Čaman. Among the sections are the Pōpāzays (including the royal clan, the Sadōzays) and the Bārakzays.—Next to the Durrānīs, the Ghazays (s. see) are the most powerful tribe, and were for a long time their rivals. They occupy the country between Kāḥlī-Ghūzay and Djamānābād. The Hotaks were formerly the leading clan. The most important section is now the Sulaymān Khēl from whom are recruited the Pōwīndas, nomads moving in autumn down through the Gōmal and Tōḡl passes to the banks of the Indus, and returning in spring to Afghānistān. The Khārōṭīs are related to the Ghazays.—Kākārs and Tārīns inhabit the Pīḡin and Zōb districts in Baluchistan. The Panīs of Shīr are their neighbours.—North-west of Zōb, around the Takht-i Sulaymān, we find the Shērānīs.—The Wazirā (s. see) (divided into Darwēsh Khēl and Mahāūd) live in the mountains between the Gōmal and the Kurram on both sides of the frontier. In the foothills to the East we find the Bīṭāns and Lohāns, and in the plains south of the lower Kurram the Marwats. The Tōḡl valley is inhabited by the Dawrīs and Banōdīs.—The Khātaks occupy the plains of Kohāt and extend right up to Attock. In the upper Kurram valley live the Bangash, the Shī'a Tūris and other tribes, and on the Afghān side of the frontier the Djamī, with their neighbours the Mangals and Khōstwāls.—North of the Bangash are the Orakzays (with some Shī'a clans), and in Tārīn, the Khaywār and Kohāt passes the Afrīdīs (s. see), with Shīnwārīs to the north of them, on both sides of the frontier.—The Mahmand (s. see) occupy a large tract of land north of the Kābul river in

north on this eastern flank of the plateau between the Kuram and Gomal rivers are a more irregular mass with peaks over 12,000 ft./3555 m., while further north still between the valleys of the Kabul and the Kuram is the Safid Kūh, the highest range in Afghanistan after the Hindū-kūsh and Kūh-i Bābā (highest peak Sikāram, 15,600 ft./4543 m.).

River system. Northwest from the Hindū-kūsh the level of the country falls rapidly towards the Oxus valley, while southward the valleys fall more gradually towards the Sīstān depression containing the Hilmānd Hāmūn (H. Lake) and its extension the Gōd-i Zirāh, into which flow, with the exception of those belonging to the Indus system, all the rivers south of the Hindū-kūsh. Thus the rivers fall naturally into three groups, which may be called the Indus group, the Hilmānd group and the Oxus group.

The Indus group comprises the Kābul [g.s.] river and its affluents, of which the most important are the Tagao and Kunar flowing from the Hindū-kūsh on the north and the Lōghar flowing from the Gul Kūh on the south. South of this the Kuram rising in the Paywar, and its tributary the Toḡi, called in its lower course the Gambia, which joins it in Pakistan territory below the mountains. Still further south separating the Wazīrīstān mountains from the Takht-i Sulaymān is the Gomal formed by the junction of the Kunder and Zōb. These rivers though of small volume drain extensive tracts and mark important military and trade routes through the mountains between India and the plateau. Other small streams such as the Wāhō, Lōmī, Kābī and Wāf further south serve a similar purpose. It may be noted that many of these streams flow not along the natural valleys formed by the mountain range but transversely across the sandstone and limestone ridges of the Sulaymān Mountains, through which they cut deep precipitous gorges.

The second or Hilmānd group consists of the Hilmānd and its tributaries, and of the other rivers running towards the south-west into the Sīstān depression. The Hilmānd [g.s.] or Hilmānd (the Haftmunt of the Avesta, the Etymāndus of classical writers) is the principal of these. It rises near Kābul and flows through narrow mountain valleys into the more open country of Zamin-dāwar, where it is joined on the left bank by the Arghandāb (Arachwātī, Arachoti). The latter in its turn is formed by the junction of the Upper Arghandāb, the Tarnak, and the Arghashān (or Arghastīn), which drain a series of nearly parallel north-easterly and south-westerly valleys. Another member of the same system is the stream flowing southward from Ghazna which never joins the Hilmānd system but is absorbed by the Abūstāda Salt Lake. Other rivers west of the Hilmānd with the same general south-westerly flow, which also discharge into the Hāmūn, are the Khāsh Rōd, the Farāh Rōd, and the Harāt Rōd.

The Hāmūn [g.s.], a basin sometimes of small extent, expands enormously to the south in seasons of high flood, when the hill fort of Kūh-i Kūhādja becomes an island. It is then discharged through a channel called the Sīlāgh into a still lower depression known as the Gōd-i Zirāh. Part of the Hāmūn is in Afghan territory and part in Persian according to modern demarcations which have divided Sīstān. The Hāmūn is only 150 ft. above sea-level, and the Gōd-i Zirāh is still lower. The Hāmūn on the average overflows once in ten years into the Gōd-i Zirāh. Its water is only slightly brackish, and can

be drunk, a circumstance due no doubt to its occasional overflow. The level of Sīstān does not appear to have risen since ancient times in spite of the enormous volumes of silt discharged by the rivers which have no other outlet. The cause for this is probably the prevalence of violent north-west winds through a great part of the year, which remove the high surface soil.

The third or Oxus group of rivers comprises the Oxus [see AMO DARYA] and its southern tributaries, as well as the Murgāb [g.s.] and Harāt Rōd which also flow northward into the plain but never reach the Oxus. All of these rise on the northern flank of the great mountain barrier, with the exception of the Harāt Rōd [g.s.], which rises on the south of the Kūh-i Bābā and flows westwards through a narrow valley between the Kūh-i Safid and Kūh-i Sīyāh into the Harāt plain where it turns to the north and after passing through a depression in the mountains loses itself in the plains of Russian Turkistān beyond Dhuṭ-Fikr.

General formation. The mountain ranges generally become less lofty towards the south and west and the difficulties of communication that exist further north disappear. Hence the easy route for trade or military expeditions from Harāt to Kandahār has in all ages been circuitous via Sab-zawār, Farāh and Gīrīgh, while from Kandahār to Kābul and Ghazna the direct line of the Tarnak valley is followed. From Harāt where the Paropamisus drops to an insignificant elevation the Turkistān province is easily accessible, and the same country can also be reached from Kandahār by difficult passes, the Khawāk, Bāmiyān and others, through the Hindū-kūsh.

Thus the three towns Harāt, Kandahār and Kābul are marked out by natural position as the most important points in the country. Each of them lies in a fertile valley and is self-supporting, and each of them commands important routes to the others as well as to India, Persia and Central Asia. If therefore Afghanistan is to be an independent whole the possession of these three points is essential to its rulers. There can be no stability if they are in separate hands. In this political sense Ghazna and Djalālabād must be classed with Kābul, the old capitals Bust and Gīrīgh with Kandahār, and Sab-zawār with Harāt. Sīstān lying on the easy route from Harāt to Kandahār has always been a debatable land.

Kābul is in every way the strongest position, and has generally in consequence been more independent than other districts. Harāt on the contrary is much exposed to attack from the west and north, and when Harāt has been conquered by a foreign invader Kandahār is immediately threatened. As long as Harāt is held Kandahār is safe from an attack on the western side and it has also a strong position towards the Indian side, though not so strong as that of Kābul.

The district of Sīstān adjoining the Hāmūn is most fertile and suited for irrigation. Occupying a commanding position on the route leading eastward to Kandahār and westward to Harāt, it is of great importance to the rulers of Afghanistan, and its present division between that country and Persia is unfortunate.

Climate. The whole country is liable to great extremes of temperature ranging from the intense summer heat of Sīstān, the Garmīr district and the Oxus valley to the great winter cold of the high exposed regions, where violent snowstorms are

not uncommon. Instances of armies suffering from such cold are well known in history. The march of the emperor Bābūr from the neighbourhood of Harāt through the Hazāra mountains to Kābul is a case in point, and the Hindū-kūsh [lit. Hindu-slayer] is popularly supposed to derive its name from the death of the Indian troops of the emperor Shāh Dīshām. More recent instances are the sufferings of 'Abd al-Rahmān's army in 1868 and of the British Boundary Commission in Bādghīs in 1885. The daily range of temperature is everywhere very great, the difference between maximum and minimum varying from 17 to 30 degrees of Fahrenheit. In the spring and autumn the upland valleys have a temperate and pleasant climate, which is very favourable to the growth of fruit, especially grapes, melons, peaches, plums, apricots, walnuts and pistachio-nuts. Modern travellers have found the neighbourhood of Kābul to be not unworthy of the praises lavished on it by the emperor Bābūr.

In the more lofty part of the Hindū-kūsh inhabited by the Kāfir tribes a truly Alpine climate is found resembling that of parts of the Himalayas.

The vegetation generally speaking is that of the Persian plateau, and is quite distinct from that of the Indian plains. In the plains few trees are found except those cultivated in gardens, fruit trees, planes and poplars, while on the higher mountains many varieties of pines and evergreen oaks are found with wild vines, ivy and roses. On the lower and drier ranges the wild pistachio (*Pistacia khinjuk*), wild olive (*Olea europaea*), juniper (*J. excelsa*) and the reed (*Tecoma undulata*) are the most characteristic trees. The *angūsh* or *ling* (*Fernia ussuriensis*) is very abundant in many parts. Wild flowers also abound in the spring, especially the iris, tulip and poppy.

Political divisions. The divisions of the country follow its physical formation.

Kābul. The province of Kābul contains the fertile high-lying valleys round the upper waters of the Kābul, Lōghar and Tagao rivers and Ghazna, also the lower part of the Kābul valley near Djalālabād [g.s.]. Ghazna [g.s.] was the most important town in this tract formerly, but Kābul [g.s.] has taken its place during the past four hundred years. Kābul was recognized as the centre of government under Mughal emperors, and was adopted by the Durranī kings as their capital taking the place of Kandahār. Its old rival Peshawār [g.s.] is the natural centre of the tribes in the lowlands near the Indus, but has been cut off from Afghanistan since it was taken by the Sikhs in 1834, and from 1848 to 1947 formed part of British India.

Kandahār. Kandahār includes the old province of Zamin-dāwar, and comprises the lower valleys of the Hilmānd, Tarnak, Arghandāb and Arghashān, the principal home of the Durranīs. The modern town of Kandahār [g.s.] on the Arghandāb has been the capital of the province since the 14th century, and has taken the place of older towns such as Gīrīgh [g.s.] and Bust [g.s.].

Sīstān. Sīstān [see AMO DARYA] is the hot and fertile irrigated district lying around the Hāmūn. A large part of it, however, belongs to Persia. It contains no large town.

Harāt. The Harāt province includes the fertile valley of the Harāt Rōd and the open country lying between the Hazāra Mountains and the Persian border; also a considerable part of these mountains which are inhabited by the Hazāra [g.s.] and Chāfir Aymāq [g.s.] tribes. The town of Harāt [g.s.], one of the most famous in eastern history, is its capital;

although fallen from its ancient glory it is still and must remain a place of importance and will no doubt develop greatly with peace and improved communications. Sab-zawār [g.s.] is also a thriving town in the south of the province.

Hazāristān [g.s.]. The country of the Hazāra and Chāfir Aymāq tribes in the mountainous mass bounded to the north by the Kūh-i Bābā, to the west by the open country of Harāt, to the east and the south by the Hilmānd valley. It is the country anciently known as Ghūr [g.s.], and the ruins of the town of Ghūr probably mark the site of the old capital of Firūz Kūh, where the Ghūrī kings reigned in the 12th century. It now contains no town of importance.

Turkistān. The country north of the Kūh-i Bābā as far as the Oxus is known as Turkistān. Its old capital Balgh [g.s.] has lost its former importance and the present centres of administration are Mazār-i Sharīf [g.s.], Tāshkurgān and Maymana [g.s.].

Bādaghān. The region lying north of the Hindū-kūsh and east of Turkistān along the left bank of the Oxus is known as Bādaghān [g.s.]. It is watered by the Kunduz river and its affluents.

Wakhān. Still further to the east and extending as far as the Pāmīr is the long mountain valley called Wakhān [g.s.].

Nūristān. A mountainous tract of the Hindū-kūsh lying north of the Kābul valley and west of the Kūh-i Bābā is inhabited by the Kāfirs. It was known as Kālistīstān [g.s.], but after its conquest by 'Abd al-Rahmān Khān in 1897 its name was changed to Nūristān.

## (II) ETHNOGRAPHY.

The population of Afghanistan is divided into the following main groups: (1) Afghans; (2) Tajiks and other Iranians; (3) Turko-Mongolians; (4) Hindu-kush Indo-Aryans (including Kāfirs). According to an estimate made in 1947 the population amounts to twelve millions, of which 32% are said to be Afghans, 30% Tajiks, 6% Uzbeks, 3% Hazāras and 2% others. But the figures are by no means certain. No "pure races" are to be found, each linguistic community being composed of several anthropological types, and intermixing and secondary adoption of Persian and Pashto having to a great extent blurred whatever clear distinctions may have existed at some earlier date. Apart from the theoretical difficulties in defining race, the meagreness of anthropological data, dealing with clearly defined local groups, warns us to be cautious in our statements.

1) For the Afghans, see the separate article *AFGHAN*.

2) *Tājīk* is the general name [cf. *tāgīk*] of the Persian-speaking population of Afghanistan, often also called *Pārsiāns*, or, in the East and South, *Dihgāns* and *Dihwārs*. They are villagers, and also the inhabitants of most towns speak Persian. The *Tājīks* have no tribal organization, except in some remote regions. In the villages they are peaceful tenants. In Harāt and Sīstān they are a direct continuation of the Persians of Persia, while in Northern Afghanistan (from Maymana to Badakhshān) they are in contact with the *Tājīks* of the Soviet Union. In South-eastern Afghanistan they occupy some of the most fertile agricultural districts around Ghazna and in the Kābul region (Kūh-i Dīmān, Pandjshir, etc.). Anthropologically they are very mixed, but the hill-*Tājīks* of Badakhshān, and of Northern Afghanistan in general, are of the Alpine type. South of the Hindu-kush many *Tājīks* probably belong to the Irano-Afghān race. Some of the hill-*Tājīks* of Badakhshān still retain their ancient Iranian languages. The same is the case with the *Pārsiāns* north of Kābul and the *Omāns* in the Lōgar valley.—The *Kizilbāsh* are descended from Persian Turks settled in Kābul and Harāt by Nādir Shāh.

3) Turkish and Mongolian tribes. In the plains of Northern Afghanistan Turkish tribes form an important, or even dominant part of the population. The majority are Uzbeks [q.v.], settled in villages and towns, and estimated by Jarring at about 500,000. West of them, between Andkhuy and Bālā Murghāb we find Turkmen [q.v.] nomads, chiefly Ersārs (estimated at up to 200,000). In Afghan Pāmīr there are about 30,000 Kirghīz [q.v.] nomads. Also some other Turkish tribes are represented in Afghanistan.—The Turks settled in the Kūh-i Dīmān and Kūh-i Dīmān north of Kābul have now all probably given up their national language.

The central *maṣṣif*, from Ghazna to Harāt, and from north of Bāmiyān to the middle Helmand, is occupied by tribes of Mongol or mixed Turko-Mongol origin and type, extending also into Persia. The eastern part of this territory is the home of the Hazāras [q.v. or Barbaris]. They are divided into a number of tribes, Day-Kundi, Day-Zengi, *Djāghuri*, etc. The Hazāras are settled in villages, their formerly very powerful chiefs living in baronial castles. They are *Shī'ites*, and up to the time of the Amir 'Abd al-Rahmān they retained semi-independence. Their orthodox neighbours accused

them of practising the infamous "lamp-extinguishing" ceremonies, and of laxity in sexual behaviour in general. When finally subdued by the Afghān Amir, many of them sought refuge in Quetta and other places outside Afghanistan. A large number of Hazāras work as labourers in Kābul and other cities. They have decidedly mongoloid features, but are usually distinguishable from the more flat-faced Uzbeks. Further west, on both sides of the Harāt Rūd, we find the half-nomadic Suni *Chāhr Aymāl* [q.v.] ("Four Tribes"), a term apparently used somewhat loosely, but usually including Taymāns (south of the Harāt Rūd), Firzākūhs (north of this river), *Djamshīdīs* (Kushk), Taymūris (west of Harāt, in Persia) and Hazāris (Kā'ā'i-Naw), probably not to be confounded with the eastern Hazāras.—The Hazāras are often assumed to be descended from Chingīz Khān's soldiers, but more probably Mongol and to some extent also Turkish elements have gradually occupied the territories laid waste by him and his successors (see Bacon, op. cit.).

4) Indo-Aryans and Kāfirs. Among the Indo-Aryan "Dardic" tribes of Afghanistan the most important are the *Pashāhs* (locally also called *Dihgāns*) in the Kūh-i Dīmān, Laghmān and the lower Kunar Valley. They are the remnants of the ancient Hindu and Buddhist populations of Kāpishā and Nāgarahra. There are also some smaller communities of Indo-Aryan origin in the Kunar region.—Nūristān (formerly Kāfiristān) is inhabited by a number of tribes, linguistically distinguished from the true Indo-Aryans [cf. *Kāfiristān*]. They were finally conquered by 'Abd al-Rahmān in 1896, and converted to Islām. Some of the Dardic tribes also remained pagans till comparatively recent times. The Kāfirs are now called Nūristāns or *Djādhīs*, i.e. "Recruits (of Islām)". Their ancient religion was a polytheism of an Indian type, with pantheons varying from tribe to tribe. They had also preserved many ancient social customs. There is no evidence of their being of Greek origin as sometimes asserted. Their neighbours divided them into *Siyāh-pūsh* "black-clad" (Kāts and Kāms) and *Safid-pūsh* "white-clad" (*Wāyghals*, *Ashkuns* and *Prasins* or *Parūns*). Anthropologically the Kāfirs contain Oriental, Dinaric and Nordic elements, beside a short, dolichocephalic type with connections in the West Himalayas. Among some of the tribes the ratio of blondism is rather high.

There are some *Djāt* [q.v.] "tribes" in Afghanistan, and a few *Gūdjārs* [q.v.] in the Kunar valley. Hindus are settled as traders and money-lenders in Kābul and other towns, and as horticulturists in the Kūh-i Dīmān north of Kābul.

## (ii) ETHNOGRAPHY.

The population of Afghanistan is divided into the following main groups: (1) Afghāns; (2) Tadjiks and other Iranians; (3) Turki-Mongolians; (4) Hindū-kush Indo-Aryans (including Kāfirs). According to an estimate made in 1947 the population amounts to twelve millions, of which 55% are said to be Afghāns, 36% Tadjiks, 6% Uzbeks, 3% Hazāras and 2% others. But the figures are by no means certain. No "pure races" are to be found, each linguistic community being composed of several anthropological types, and intermixture and secondary adoption of Persian and Pashto having to a great extent blurred whatever clear distinctions may have existed at some earlier date. Apart from the theoretical difficulties in defining race, the meagreness of anthropological data, dealing with clearly defined local groups, warns us to be cautious in our statements.

1) For the Afghāns, see the separate article *Afghāns*.

2) Tadjik is the general name [cf. *tadjik*] of the Persian-speaking population of Afghanistan, often also called *Parsi*, or, in the East and South, *Dihgāns* and *Dihwāns*. They are villagers, and also the inhabitants of most towns speak Persian. The Tadjiks have no tribal organization, except in some remote regions. In the villages they are a direct continuation of the Persians of Persia, while in Northern Afghanistan (from Maymana to Badakhshān) they are in contact with the Tadjiks of the Soviet Union. In South-eastern Afghanistan they occupy some of the most fertile agricultural districts around Ghazna and in the Kābul region (Kōh-i Dāman, Pandjshir, etc.). Anthropologically they are very mixed, but the hill-Tadjiks of Badakhshān, and of Northern Afghanistan in general, are of the Alpine type. South of the Hindū-kush many Tadjiks probably belong to the Irano-Afghān race. Some of the hill-Tadjiks of Badakhshān still retain their ancient Iranian languages. The same is the case with the *Parāčis* north of Kābul and the *Ormurs* in the Lōgar valley.—The *Kizilbāshs* are descended from Persian Turkes settled in Kābul and Harāt by Nādir Shāh.

3) Turkish and Mongolian tribes. In the plains of Northern Afghanistan Turkish tribes form an important, or even dominant part of the population. The majority are Uzbeks (q.v.), settled in villages and towns, and estimated by Jarring at about 500,000. West of them, between Andkhūy and Bālā Murgshāb we find Turkmen (q.v.) nomads, chiefly Ersaris (estimated at up to 200,000). In Afghān Pāmir there are about 10,000 Kirghiz (q.v.) nomads. Also some other Turkish tribes are represented in Afghanistan.—The Turkes settled in the Kūh-i Dāman and Kūh-i Dāman north of Kābul have now all probably given up their national language.

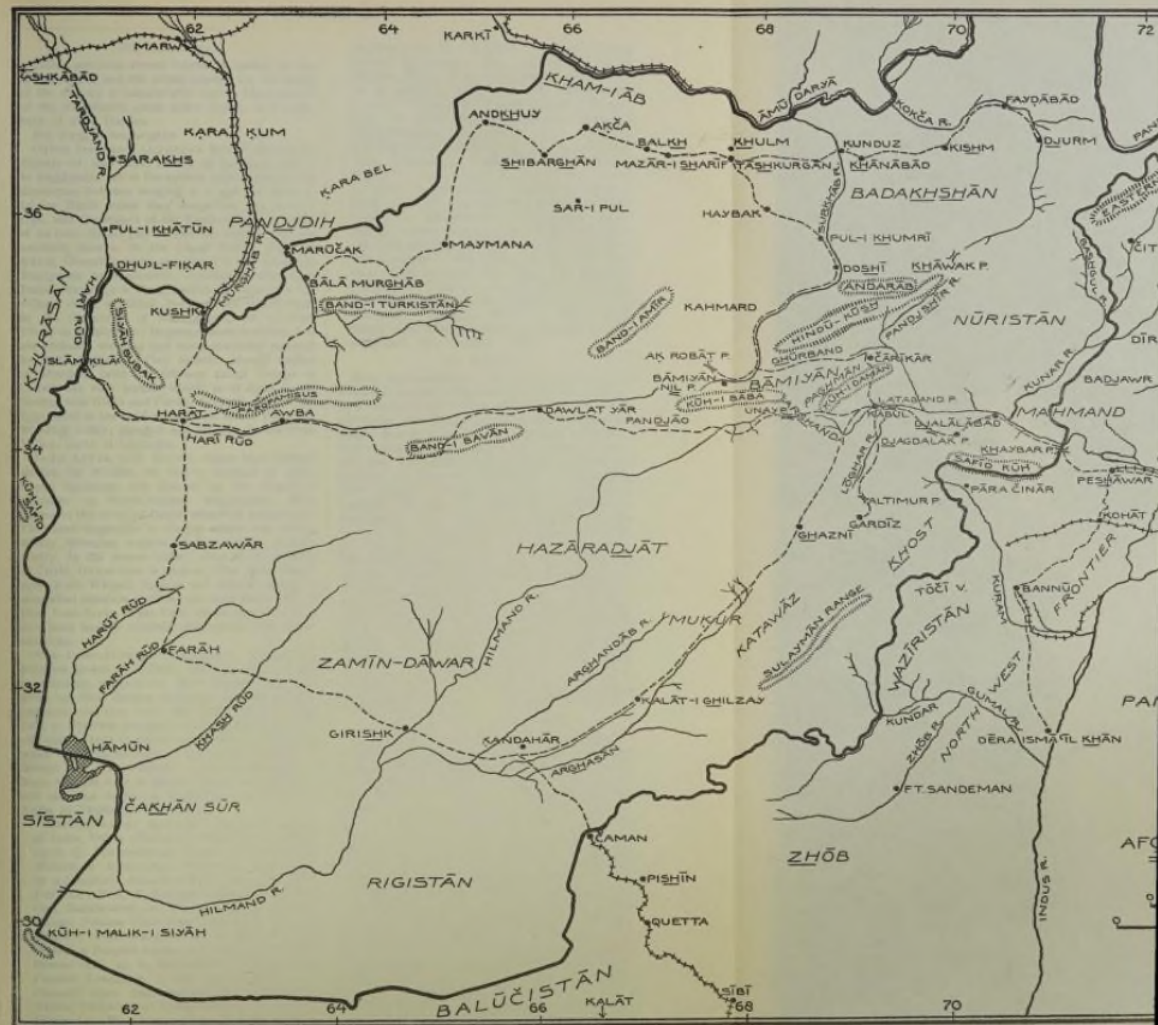

The central massif, from Ghazna to Harāt, and from north of Bāmiyān to the middle Hindūkush, is occupied by tribes of Mongol or mixed Turko-Mongol origin and type, extending also into Persia. The eastern part of this territory is the home of the Hazāras (q.v.) or *Barbaris*. They are divided into a number of tribes, Day-Kundi, Day-Zengi, *Djaghuri*, etc. The Hazāras are settled in villages, their formerly very powerful chiefs living in baronial castles. They are Shi'ites, and up to the time of the Amir 'Abd al-Rahmān they retained semi-independence. Their orthodox neighbours accused

them of practising the infamous "lamp-extinguishing" ceremonies, and of laxity in sexual behaviour in general. When finally subdued by the Afghān Amir, many of them sought refuge in Quetta and other places outside Afghanistan. A large number of Hazāras work as labourers in Kābul and other cities. They have decidedly mongoloid features, but are usually distinguishable from the more flat-faced Uzbeks. Further west, on both sides of the Hart Rūd, we find the half-nomadic Sunni *Chāhar Aymāk* (q.v.) ("Four Tribes"), a term apparently used somewhat loosely, but usually including Taymans (south of the Hart Rūd), Firāzkūhīs (north of this river), Djāmghilīs (Kush), Taymūris (west of Harāt, in Persia) and Hazāris (Kāfā-i Naw), probably not to be confounded with the eastern Hazāras.—The Hazāras are often said to be descended from Gīngiz Khān's soldiers, but more probably Mongol and to some extent also Turkish elements have gradually occupied the territories last waste by him and his successors (see Bacon, op. cit.).

4) Indo-Aryans and Kāfirs. Among the Indo-Aryan "Dardic" tribes of Afghanistan the most important are the *Pashlās* (locally also called *Dihgāns*) in the Kūh-i Dāman, Laghmān and the lower Kunar Valley. They are the remnants of the ancient Hindu and Buddhist populations of Kāpisha and Nagarāhāra. There are also some smaller communities of Indo-Aryan origin in the Kunar region.—Nūristān (formerly Kāfīristān) is inhabited by a number of tribes, linguistically distinguished from the true Indo-Aryans (cf. *Kāfīristān*). They were finally conquered by 'Abd al-Rahmān in 1896, and converted to Islam. Some of the Dardic tribes also remained pagans till comparatively recent times. The Kāfirs are now called *Nūristāns* or *Djāhidīs*, i.e. "Recruits (of Islam)". Their ancient religion was a polytheism of an Indian type, with pantheons varying from tribe to tribe. They had also preserved many ancient social customs. There is no evidence of their being of Greek origin as sometimes asserted. Their neighbours divided them into *Siyāh-pūsh* "black-clad" (Kutis and Kāms) and *Safid-pūsh* "white-clad" (Waygāls, Ashkuns and Prastūs or Parūds). Anthropologically the Kāfirs contain Oriental, Dinaric and Nordic elements, beside a short, dolichocephalic type with connections in the West Himalayas. Among some of the tribes the ratio of blondism is rather high.

There are some *Dāt* (q.v.) "gipsies" in Afghanistan, and a few *Gūjārs* (q.v.) in the Kunar valley. Hindus are settled as traders and money-lenders in Kābul and other towns, and as horticulturalists in the Kūh-i Dāman north of Kābul.

## (iii) LANGUAGES.

Bābur mentions eleven languages spoken in the Kābul region, and the actual number for the whole of the country is considerably higher. The majority of the inhabitants speak either Paṣhto or Persian, both of them Iranian.

For Paṣhto see AFĠHĀN.

Other Iranian Languages. Most of the Persian dialects (cf. also IRĀN, section on language) spoken in Afghānistān are of the eastern type, retaining the distinction between *maḡhālī* ۴, ۵ and *ma'raḡ* ۱, ۲. In the Harāt region they merge into the western type, and the dialect of the Hazāras presents traits of its own. Balōč just crosses the frontier into the southern deserts. In the Lōgar Valley, south of Kābul, Ormuḡ is dying out, but it is still spoken in Kānigurām in Wadristān. Another ancient local language is ʔarāčī, which is found in a few villages north of Kābul. North of the Hindū-kūḡh, in the mountains of Badakhshān, the so-called Pāmīr or Ghakka (۲۰) languages have survived, but are probably receding and being gradually replaced by Tādžiki Persian. They include: Mundjī spoken in Mundjān (with an offshoot called Yidgha in Citrāl), the very archaic Wakhi in Wakhān (overflowing into Gūgit and Citrāl), Sanglētī, Zēbākī and Ishkāsūnī at the bend of the Oxus and in the upper Wardōjī valley; Shughlī and Rōghānī in the Oxus Valley, north of Ishkāsūn.

Indo-Aryan and Kāfirī. Apart from Lahndā spoken by Hindūs, we find a number of Indo-Aryan languages and dialects on the fringes of Nōristān in North-Eastern Afghānistān. They belong to the so-called Dardic branch of Indo-Aryan. The most important is Paṣhāī which has several widely diverging dialects, and is rich in popular poetry. In the Kunar Valley, close to the frontier of Citrāl, Gāwar-Bāṭī is spoken.—The Kāfir languages (Kati, Wālgāī, Aghkum and Prasūn) occupy a somewhat separate position and must have split off from Indo-Aryan in pre-Vedic times. But they have now been heavily overlaid with purely Indo-Aryan elements.

Non-Indo-Iranian Languages. Turkish dialects are spoken by Uzbeks, Turkmens and Kirghīz in Northern Afghānistān. Most Hazāras have now given up their ancient language, and the same is probably the case with the Čahār Aymāks. But (acc. to a private communication) F. Mackenzie was still able in 1951 to collect lists of words, containing many of Mongolian origin, among the Hazāras of Bihūd and the "Moghols" north of Maymana.—Some nomads west of Maṣārī Sharīf are said to be still speaking Arabic, as is also the case with some Arabs in Tādžikistān (see 'ARAB).

## (iv) RELIGION.

Since the conversion of the Kāfirs practically the entire population of Afghānistān are Muslims, and the great majority are Sunnis, Shī'ite are the Hazāras, Kizilbagh, the Kayāns of Sīstān and Harāt, a few Pathān frontier tribes (Turk, and some sections of Čakaks and Bangash, beside the Sayyids of Tīrsh), and some Kōhistāns and Badakhshīs (especially the Ghakās). Of these the inhabitants of Badakhshān (with Shughnān, Wakhān, etc.) and many Paṣhāls of Laghmān and adjacent valleys are Ismā'īlīs, the Badakhshīs calling themselves Mullā'īs and the Paṣhāls being known under the name of 'Asī-Ishkīs (cf. Ivanow, *Guide to Ism. Lit.*, p. 9). Among the Shī'ī Pathāns there may still be secret adherents of the great heretic Bāyazīd Anṣārī (cf. RAWSHANIYA).

Orthodox Islām is now very firmly established in Afghānistān, and the Islamic law (*shari'a*) is recognized. Hindus and Shī'īs are tolerated, but Ahmādīs are not allowed to enter the country, and Christian missions are prohibited. Local saints and their tombs are worshipped. Among the Pathān tribes of the frontier the *mudlis* have often played an important role in local politics and in preaching the *djihad* (holy war). (G. MORGENSTIERNE)

## (v) HISTORY. (1) PRE-ISLAMIC.

The territories now known as Afghānistān were occupied by Iranian tribes during the Aryan migrations in the second and first millennia B.C., incorporated in the Achaemenid empire by Cyrus, and after the conquests of Alexander (cf. e.g. W. W. Tarn, *Alexander the Great*, Cambridge 1948) disputed between the Greco-Bactrians and the Parthians (cf. W. W. Tarn, *The Greeks in Bactria and India*, Cambridge 1921). In the first century B.C. there was a fresh influx of Iranian tribesmen under the leadership of the Kushan tribe of the Yueh-Chi. The Kushan empire, which attained its height under Kujula Kadphises in the 1st century A.D. and Kanishka in the 2nd (cf. *Cambridge History of India*, i, 1935; R. Ghirshman, *Bégram. Recherches archéologiques et historiques sur les Kouchans*, Cairo 1948), eventually fell to the Sāsānids under Shāpūr II, probably before the middle of the 4th century. Shortly after 350 the Yueh-Chi tribes which had remained in Kāshgharia, pressed from the East by Turco-Mongol elements, appeared in Bactria, supported by a confederation of tribes of allied origin known as Chionites (see R. Ghirshman, *Les Chionites. Hephthalites*, Cairo 1948, 69 ff.). Shāpūr, though at

war with Rome, marched against the invaders, but was obliged to come to terms with them and to establish them in Bactria and its peripheral regions, in return for their aid against the Romans.

Kidara, the king of the Yueh-Chi or "Lesser Kushans", soon extended his conquests to the south of the Hindu-kush and annexed the Paropamisadae and Gandhara. It is in the period of this expansion that the establishment of a tribe of Chionites, the Zabuls, in the region of Ghazni is to be placed. When, later on, Kidara's efforts to assert his independence led to a fresh conflict with Shapur, the Chionites sided with the latter. Kidara lost his kingdom, and probably his life; and Bactria passed into the hands of the Chionites known as Hephthalites from the name of their ruling dynasty.

About 400 the lands both to the north and to the south of the Hindu-kush were held by the Chionite Hephthalites, divided into two branches by the mountain-chain, but whose southern branch, the Zabuls, recognized the supremacy of the northern branch—both, however, remaining vassals of the Sāsānids. This vassal status was preserved so long as the Persian dynasty remained strong, but already by the beginning of the 5th century the Hephthalites, exploiting the difficulties experienced by Persia in the struggle against Rome and in defending the passes of the Caucasus against the barbarians, attempted to throw it off, only to be resubjected by Bahram Gōr, just as their pressure towards India was halted by the Gupta kings.

The middle of the 5th century was a turning-point in the relations between Persia and the Hephthalites. During the reign of Kōrōs, the Hephthalites won, in 448, a victory which transformed them almost from the vassals into the masters of Iran, to whom the Sāsānids paid tribute for more than half a century. It was only c. 560, when a new people, the Western Turks, had appeared on the chessboard of Central Asia, that a coalition between them and Khurāsān put an end to the central power of the Hephthalites. (For the relations with the Sāsānids, cf. A. Christensen, *L'Iran sous les Sāsānides*, 1944.)

The kingdom of Zabul, or of the southern Chionites, followed its own course. At the end of the 5th century a new dynasty reigned to the south of the Hindu-kush. Its two kings, Toramana and Mihirakula (c. 515-544), made extensive conquests in India; the latter, devoted to a religion with a solar divinity, Mihira, left a memory of cruel persecutions which were pursued until he was crushed by an Indian national coalition. The disappearance of the kingdom of the southern Chionites preceded by a few years the destruction of Hephthalite supremacy in the northern lands.

After the destruction of these two kingdoms, their territories remained in the hands of a number of minor princes, some of whom became vassals of the Sāsānids, others of the Turks. The political condition of Eastern Afghanistan about the middle of the 7th century is portrayed in the account of the travels of the Chinese pilgrim Hsuen-Tsang, where the Afghan people are mentioned for the first time in an historical source under the form of the country of A-p'o-kien, located in the northern part of the Sulaymān mountains (see A. Foucher, *La vieillesse route de l'Inde de Bactres à Taxisa*, II, Paris 1947, 215, 252 ff. 17).

Shortly after the passage of Hsuen-Tsang, the Chinese T'ang dynasty crushed the Western Turks and extended its suzerainty to the west of the Pamir. For a whole century (659-755) sixteen kingdoms

north and south of the Hindu-kush recognized this authority, more usual than real, of the Chinese emperor. The Arab invaders, who so rapidly overran Iran, were checked in this part of Afghanistan by the tenacious resistance of the last kinglets, seconded by the civil wars and dissensions between the conquering tribes, and it was only at the end of the 9th century that Islam finally triumphed south of the Hindu-kush. Nevertheless, the Hephthalite element did not disappear without leaving its traces in the ethnic composition of modern Afghanistan, and there still exists in Badakhshān an important group bearing the name of Haytal. See, for a fuller account of the Chionite-Hephthalites the articles HAYTAL, ZĀBULISTĀN, etc. For the background of the early history, cf. also W. M. McGovern, *The Early Empires of Central Asia*, 1939.

## (2) ISLAMIC—TO THE RISE OF THE AFGHĀN NATIONAL STATE.

To the Mongol period. The territories that form modern Afghanistan belonged in the first thousand years of Islamic history to different provinces, and although these neighbouring provinces, often shared common vicissitudes, they did not at any time form a separate entity. Nor did the Afghāns form a state of their own until the days of Mir Wazir, and more especially Ahmad Shāh Durrāni. The little that is known of the earlier history of the Afghāns has been summarized in the article AFGHĀN; here a short sketch will be given of the history of the country. (For further details see the articles on the various provinces, e.g. BĀKTERĀN, SĠNDHĀN, ZĀBULISTĀN, ZĀMĠN-NĀWĀR, TUGHRĠSTĀN, KĀNDĠSTĀN, and on the various dynasties that ruled these lands, as well as the articles on the most important towns, e.g. BALKH, GHĀZNA, HARĀT, KĀBUL, etc.)

At the time of the Islamic conquest the provinces belonging to the Sāsānid empire were quickly overrun. One wave of the invasion passed through Sijistān, but the attempts made during the first three centuries to conquer Kābul from this base produced no lasting results until the rise of the Saffarid (q.v.) dynasty. The province of Kābul resisted Islamization much longer than the other eastern Islamic provinces, and it was only under the Ghaznavids that this was fully achieved. In the middle of the 10th century Alp-takīn (q.v.) seized Ghazna from its former ruler Lawīk, conquered Zabulistan and built up an independent principality, which was inherited by his son Isbākh, then by a slave of his, Balkh-takīn, then by another slave, Subuk-takīn, the founder of the Ghaznavid (q.v.) dynasty. The dynasty had its seat in Ghazna, and it was from that town that the greatest Ghaznavid ruler, Mahmūd (q.v.), set out on his expeditions to Persia in the west and India in the east. Yet, while it is about this time that the name Afghān first appears in the historians, the Ghaznavid dynasty was in no sense a national Afghan one. The armies were probably composed mainly of Turks. When Mahmūd marched on Balkh against the Karakhanid ruler, his army comprised, according to al-Utbi, Indians, Khazārs (q.v.), Afghāns and Ghaznavids (which now began to be of importance). The Afghāns (Tādjīk (q.v.)) of the province of Moznān in 474/1023 Mahmūd attacked the Afghāns of Sulaymān Kūh and sacked their country.

By the end of his life Mahmūd ruled over an extensive territory comprising in the west Khurāsān, part of Djabāl and Tabaristān and in the east the whole of the Panjshir; to the north his influence

extended beyond the Oxus while the core was formed by the whole of what is now Afghanistan. The personality of the great conqueror made a deep impression, and he became in a way a national hero in the land which formed the centre of his empire.

For the further history of the dynasty, see GHĀZNAWĪS. Bahram Shāh (511-52/1118-57) had to acknowledge the suzerainty of the Sāldjūqs; thereafter, the chieftains of Ghūr became increasingly stronger, and after long struggles drove out the Ghaznavids. The Ghūrīd (q.v.) dynasty was probably of "Tādjīk" origin. The fortunes of this dynasty were checked by invasions of Afghanistan by the Ghūzes and the Kh'arizm-shāhs, so that the Ghūrīds lost their power in their native land, but succeeded in building up an empire in India, which was inherited by their Turkish slaves. Djabāl al-Dīn Manikubīn, the last scion of the house of the Kh'arizm-shāhs, after strong resistance, had to vacate Afghanistan before the Mongols of Gīngīz Khān.

Mongols, Karts, Harāt and Sistān were conquered by Gīngīz Khān's son Tulay, Ghazna by Ugday. Ugday also entered the Ghūr country and, making it the centre of his operations, conquered the mountains of Fīrūz Kūh and Ghazdārjān as well as the plains of Garm-sir and Sistān. The last Ghūrīd kings were swept away and Fīrūz Kūh completely destroyed. Tulak and other mountain fortresses offered resistance but to no effect. A leader of the resistance in Ghūr was the awīr Muhammad of Ghazdārjān, descendant in the maternal line of the Ghūrīd kings. He was killed in 622/1223 in the fortress of Aghay. The founders of the Kart dynasty were his descendants. The greater part of Afghanistan was incorporated into the Mongol empire. In the east, however, a Turkish chieftain, Sayf al-Dīn Hasan Karugh, who had perhaps been allied to Djabāl al-Dīn Manikubīn, managed for some time to get possession of Bāmiyān, Ghazna and Ghūr. He must have exercised his rule in 622/1223, in which year he issued coins in the name of the caliph al-Zāhir. In 636/1238 he submitted to Ugday, and was placed under the control of a Mongol ghīsna (intendant). Nevertheless, he was expelled through the Kuram valley to India. In Sind he and his son Nāsir al-Dīn reigned for a further twenty years. Ghazna and the Kuram served as a base for the further incursions of the Mongols into India. We do not hear of Afghāns in these movements; perhaps they had not yet reached as far north as the Kuram valley. After Ugday's death the Mongol empire was divided and Afghanistan fell to the lot of the Ilkhāns of Persia. Under their sovereignty a Tādjīk dynasty, named Karts (q.v.) came into power and ruled for nearly two hundred years over the greater part of the country. It was Timur who put an end to the dynasty of the Karts, who represented the last effort of the Tādjīk element in Ghūr and Harāt to establish in their country an independent state. From this time until the rise of the Afghāns in the 18th century no native dynasty held rule in Afghanistan.

Timūr, Timurīd, in the course of Timur's invasion Sistān suffered terrible destruction; Kābul and Kandahār (which now began to be of importance) were quickly subdued and the whole country became part of Timur's empire. In 800/1397 Timūr turned to the east and left his grandson Pir Muhammad as governor of Kābul, Ghazna and Kandahār, while his son Shāhruh received in fee the kingdom of Khurāsān, with Harāt as its capital. Pir Muhammad attacked the Afghāns of Sulaymān Kūh and then

advanced into India. On the news that he was resisted in Multān, Timūr himself advanced from Andarab over the Hindu-kush, turned aside from Laghman to attack the Siyāh-pūsh and the Kator-Kāurs. After this expedition, he attacked the rebellious Afghāns and then passed over the Indus. Both on his outward march and on his return he passed Bāmiyān; he therefore probably followed the road of Tochi, which leads through the country of the Ghāzārī and the Wazīr. We do not hear of Afghāns serving in his army, though it comprised Tādjīks.

When Timūr died (807/1405), Pir Muhammad reigned in Kābul; it was, however, Khālīl who took possession of the throne of the empire. (For fuller details concerning the history of the descendants of Timūr cf. 118/6101.) The war that ensued ended with the murder of Pir Muhammad. Shortly afterwards, Khālīl was deprived of the throne and Shāhruh became the supreme ruler. His reign, which lasted for about forty years, was a period of peace and the country was able to recover from the devastations of the last years. He was followed by Ulugh Beg, 'Abd al-Latif, 'Abd Allāh, Bābur Mirzā, all of whom reigned for a short time only. In 861/1456 Abū Sa'īd ascended the throne, but the possession of Khurāsān and Afghanistan was contested by Husayn Baykara. The latter was defeated in 870/1465, but Abū Sa'īd died two years later, and his successor, Sultān Ahmad, did not possess Khurāsān at all. Husayn Baykara ruled uncontested, from his capital Harāt, over Khurāsān, Sistān, Ghūr and Zāmin-dīwar. Under the long reigns of Shāhruh and Husayn Baykara, Harāt reached the zenith of its fame as a centre of poetry, learning and art. During the latter years of Husayn Baykara, his rule was menaced from the north by the growing might of Shaybānī and his Uzbeks, while other parts of Afghanistan showed a tendency to dissolve into separate principalities, though not under indigenous rulers. Bābur (q.v.) established himself in Kābul and assumed the title of *padshāh*. Until then Kābul had been governed by more or less independent members of the Timurid house; Mukim, the son of Argūn, had just taken possession of it when Bābur appeared before the city and occupied it (910/1505). Kābul remained under Bābur and his successors, the emperors of India (see MUGHAL) for more than two hundred years, until the invasion of Nadir Shāh.

Bābur, Argūn, Uzbeks, Shāh Isma'īl. More dangerous for the kingdom of Khurāsān was the rise of the dynasty of Argūn (q.v.), its founder, Dhu'l-Nūn Beg Argūn, a descendant of the Bkhāns, governor of Ghūr and Sistān, received also, after defeating the tribes of Hazara and Nihādī, the regions of Zabulistan and Garm-sir. Taking Kandahār as his capital, he made himself independent, and with the help of his son, Shāh Beg, extended his rule southward to the Bolān pass and Siwastān. In 901/1498-g he even invaded Harāt, recruiting his army from the population of Ghūr, Zāmin-dīwar and Kandahār—probably Tādjīks and Afghāns. His son Mukim, as mentioned above, occupied Kābul, though only for a short time. Shaybānī's invasion, however, proved the undoing of Dhu'l-Nūn Beg; in the first battle against the Uzbeks he was killed and in 913/1507 Shaybānī took Harāt.

Dhu'l-Nūn's sons Shāh Beg and Mukim were now between Bābur and Shaybānī. Bābur with some right claimed to be heir to Timur's empire and advanced against Kandahār, while the Argūn princes allied themselves with his old enemy Shaybānī. Bābur defeated them and took Kandahār.

He left there as governor his son Nādir Mirāz, who was immediately attacked by Shaybānī. Bābur himself had been on his way to Harāt to concert measures of defence against the Uzbeks with Sultān Husayn when he heard of the latter's death. He joined the Sultān's sons in their campaign on the Murghāb, and then after visiting Harāt returned in winter by the mountain road to Kābul, a journey during which he and his troops underwent great hardships. He returned to Kābul in 912/beginning of 1507 just in time to suppress a dangerous plot amongst his own relations. Then followed his expedition to Kandahār in the summer, and he was back in Kābul by Jumādā I 913/Sept. 1507, arranging an Indian expedition, and had already started when he was recalled by the news that Kandahār had fallen and that the Arghūns had been restored by Shaybānī. When the news reached him he was actually engaged in war with the Afghān tribes of Tjagdalak and Naugrahār, tribes recently established in the Kābul valley. He had great difficulty in holding even Kābul, where his authority was threatened by rebellion and mutiny. Shaybānī was now possessor of Khurāsān and overlord of Kandahār, but his power began to decline. His armies suffered severely during an expedition into the mountains of Ghūr, and another warrior king, Shāh Ismā'īl, founder of the Safawī kingdom of Persia, threatened him from the west. In 916/1510 Ismā'īl invaded Khurāsān and Shaybānī was defeated and slain near Marw. Harāt passed into Ismā'īl's possession and the Shī'ite doctrines were introduced there by a severe persecution. Bābur now allied himself with Ismā'īl and recovered for a time possession of his hereditary dominions in Central Asia, leaving the kingdom of Kābul to his brother Nādir Mirāz. The alliance with the Safawī king was unpopular, however, and the Uzbeks rallied. In the end Bābur, after a severe defeat at Ghadadān near Badkhash (918/1512) from which he barely escaped with his life, had to fall back upon Kābul, which he found in great disorder, and he had to suppress outbreaks among his own Mughal troops and among the Afghān tribes. The Yūsufzāys had moved down from the mountains into the Peshāwar valley, and expelled their predecessors the Dilzāks from the mountains of Badkhash and Swāt. Bābur put them down severely and took Badkhash with great slaughter. He also had to put down risings among the Hazāras. He then turned his attention to Kandahār where Shāh Beg Arghūn was still established. He had tried in vain to make terms with Shāh Ismā'īl, had been imprisoned at Harāt, but escaped, and had since been endeavouring to establish a kingdom for himself in Sind, which he invaded with the assistance of some Baluch tribes in 927/1521. Bābur made two attempts to take Kandahār before he finally succeeded in 928/1522. Shāh Beg then removed his headquarters to Ghāl (Quetta) in summer and Sīdā in winter, and pursued his schemes in Sind, while the whole Kandahār province remained in Bābur's possession. Bābur now felt himself strong enough to embark on the series of enterprises which ended in the overthrow of the kingdom of the Lodī Afghāns in India. He always preferred Kābul to the plains of India, and was buried at Ghazna where his tomb is marked by a column.

Between the Mughal and Safawī empires, Afghānistān entered upon a more settled period under the influence of the two great empires of India and Persia between which it was divided. Harāt and Sīdā remained with Persia though still for a time

troubled by Uzbek raids. Kābul remained part of the Mughal empire while Kandahār belonged sometimes to one and sometimes to the other. The power of the Mughal emperors was gradually restricted to the south of the Hindu-kūsh. North of it Sulaymān Mirzā, established by Bābur as governor of Badkhash, founded something like an independent dynasty, and the rest of the country remained under the Shaybānīs. Ismā'īl died in 930/1524, and Bābur in 937/1530. Bābur's son Humāyūn succeeded him and his brothers Kāmran, Hindāl and 'Askari held various governments. Kābul and Kandahār were united with the Panjāb under Kāmran. On the Persian side Tahmāsp, successor of Ismā'īl had made his brother Sām Mirzā governor of Harāt. The Safawīs regarded Kandahār as an appanage of the kingdom of Khurāsān now in their possession, and considered its occupation by the Mughal emperors to be a usurpation. In 947/1535 Sām Mirzā made a sudden attack on it, but it resisted him successfully, and after eight months Kāmran arrived and raised the siege. During Sām's absence the Uzbeks under 'Abdāy Allāh invaded Khurāsān, and the unfortunate town of Harāt was again taken and sacked. Tahmāsp recovered it, deposed Sām and himself attacked Kandahār which he took; but it was recovered by Kāmran. Meanwhile Humāyūn lost his throne in India through the rising of the Sūr Afghāns under Shīr Shāh, and in 950/1543 he made his way from Sind through the desert south of Kandahār to Sīdān and Persia, where he was treated hospitably by Shāh Tahmāsp. In 953/1545 with the assistance of a Persian army he laid siege to Kandahār which was held against him by his brother 'Askari on behalf of Kāmran, and took it after a prolonged resistance. In accordance with his engagement with Tahmāsp he made the town over to the Persians, but this excited great discontent among his own followers, and Humāyūn at last retook Kandahār from the Persians, and treated the province as part of his own dominions, greatly to the anger of Tahmāsp. Shortly afterwards Humāyūn took Kābul and with it obtained possession of his young son Akbar now three years old. During the next few years the war between the brothers went on with varying fortunes. Kāmran never regained possession of Kābul but could not hold it long; on one occasion he is said to have exposed the young prince Akbar on the battlements. He then spent some time among the Mahmānd and Ghālī tribes of Afghāns, whom he intended to plunder the Kābul valley. At last in 961/1553, he surrendered to Humāyūn and was deprived of his sight. Humāyūn now held the kingdom of Kābul and Kandahār and found himself strong enough to attempt the reconquest of India. This resulted in his victory over the Sūr kings, but soon afterwards, in 963/1556, he died from the effect of an accident. While the young king Akbar was occupied in completing the reconquest of India Tahmāsp took the opportunity (965/1558) of seizing Kandahār, and it remained under Persian rule until the prince Murāfīr Husayn surrendered it to Akbar thirty-eight years later in 1003/1621. Shāh 'Abbas recovered it, but it was lost again by his successor Shāh Saif I, in whose time the governor 'Alī Mardān Khān surrendered it to Shāh Dīdān (1047/1637). Girāshk was also taken after a siege, and Zamin-dāwar occupied. In 1058/1648 the young Persian king 'Abbas II, then only sixteen years of age, led an army to Kandahār and took it, and it never again formed part of the dominions of the Mughal

empire. Shāh Dīdān's armies in vain attempted the reconquest. The rival princes Awrangzib and Dārā-shikōh both conducted expeditions against it, but were equally unsuccessful, and after the failure of the last (1662/1652) no further attempts were made.

With the exception of the vicissitudes of Kandahār, there is little to record in the history of Afghānistān during the time it was divided between the Mughal and Safawī empires. The Afghān tribes were steadily increasing in numbers and influence, and it was probably in this period that the Abdālīs and Ghālzāys spread from their mountainous over the more fertile lands of Kandahār and Zamin-dāwar and the Tarnak and Arghandah valleys. The decline in the position and influence of the Tadjik races which had borne the brunt of the Mongolian invasions, and the occupation of their mountain fortresses of Ghūr by a semi-Mongolian population (cf. *NAZARA*), gave the Afghān race the opportunity of rising into prominence. In their eastern mountains they had been but little affected by invaders, eager chiefly to press on through the passes to the plunder of India, and the same need of an outlet for their increasing population which led them to spread into the plains of India on the east also led the pastoral tribes to spread westwards. The mountain tribes continued to maintain practical independence of all rule. The Mughal government of Kābul ruled nominally, but its actual power was confined to the open valleys. In 994/1586 for instance Akbar's army met with a disastrous defeat at the hands of the Yūsufzāys of Swāt and Badkhash, and the general Rājā Birbal was slain. Rājā Mān Singh afterwards defeated the mountaineers but they were never really conquered; they often raided the plains, and sometimes took sides in dynastic quarrels, as when the Yūsufzāys took up the cause of the pretended prince Shodhā against Awrangzib. When Shāh 'Alam I before his accession was governor of Kābul under Awrangzib in 1114/1702 one of his commanders Purdī Khān himself an Afghān, was killed with all his troops when trying to pass from Khōst to Kābul, and he had to bribe the tribes to keep open the road between Kābul and Peshāwar.

Abdālīs, Ghālzāys, Nādir Shāh. In the Kandahār province the frequent changes of government between India and Persia fomented dissensions and intrigue, and enabled the powerful tribes to play off one against the other. The Abdālīs (g.s.) near Kandahār succeeded in this manner in obtaining concessions from Shāh 'Abbas the Great. Saif was recognized as chief, and his descendants the Sadōzāys became the ruling family. Nevertheless their misconduct led to part of the tribe being removed to the Harāt province. This removal led to the extension of the influence of the Ghālzāy (g.s.) tribe near Kandahār, and their power continued to increase until the accession of the emperor Shāh 'Alam I, when the Ghālzāys of the Kandahār province began to intrigue with him against the Persian government. The plot was discovered and Gurgū Khān, a Georgian chief, was sent to Kandahār at the head of an army, and arrested Mir Ways the Ghālzāy chief. During his imprisonment, however, Mir Ways succeeded in gaining the confidence of Shāh Husayn the Persian king, and was allowed to return to his tribe. Shortly afterwards he treacherously murdered Gurgū Khān whom he had invited to a banquet, seized upon Kandahār and defeated all attempts to subdue him. He died soon after, and his brother 'Abd al-'Aziz, who showed an inclination to submit to Persia, was murdered by Mahmūd, son of Mir

Ways, who established himself as ruler. (For further details of their conquest of Persia see *GHALZAY*.)

At the same period the sections of the Abdālī tribe in the Harāt province became practically masters of that province, defeated a strong army sent against them under Saif Kuli Khān, and held their own till the time of Nādir Shāh, even taking Farāh from the Ghālzāys after the latter had conquered Persia. While the Ghālzāy Mahmūd fought in Persia, the Abdālīs spread over Khurāsān and laid siege to Māghdāh. The Ghālzāy dynasty was in no way fitted to reign over a country like Persia, and had not sufficient force behind them to oppose any truly national movement. Even the support of the Kandahār province was lost when Ashraf succeeded his cousin Mahmūd, whose brother was able to retain Kandahār. The Abdālīs too remained independent in Harāt. Thus when Nādir (g.s.) put himself at the head of a national movement Ashraf's government collapsed rapidly, and few of the Ghālzāys survived to reach their native country. Ashraf was killed while wandering in Balōchistan in 1142/1729. Nādir now turned his arms against the Abdālīs under Malik Mahmūd Khān who held Māghdāh (1142/1728). He thoroughly defeated them and took many prisoners. Nevertheless he perceived their value as fighting men and secured their support by restoring them to their old home near Kandahār, from which he removed the Ghālzāys when he had the opportunity. He banished them to the Harāt province, but very few, if any, seem to have really settled there, and there are none there at the present day. When Nādir Shāh had made himself king of Persia he laid siege to Kandahār which resisted him for a year, but at last fell (1150/1738). The Ghālzāy power was thoroughly broken, but towards the Afghān tribes in general and especially the Abdālīs he pursued a policy of conciliation, and enlisted large numbers in his army. Many Ghālzāys took refuge in the Kābul province of the Indian empire, and Nādir Shāh, asserting that his remonstrances had received no reply, advanced on Kābul which fell at once (1151/1738). Thus it was finally severed from the Mughal empire. The last known date of any coin of the emperor Muhammad Shāh struck there is 1138/1725. Nādir Shāh apparently did not use the Kābul mint, but struck coins at Kandahār in 1150/1737, the year of his conquest, and others struck at Nādirābād (which he built during the siege outside Kandahār) no doubt refer to the period of the siege. The whole of Afghānistān was now in his hands and afforded him the necessary base for his invasion of India in 1152/1739. As a result of his victory over Muhammad Shāh the whole Mughal territory west of the Indus including Peshāwar and the Dīdrādī with the suzerainty over the Kalāhorā or 'Abdālī rulers of Sind was ceded to him as well as the province of Kābul. On his return from Dīlī (1152/1740) he first crossed the Indus at Attock and attacked the Yūsufzāys who had been giving trouble, and then went to Kābul. Thence he descended via the Kurām valley and the Bāngash country, and went through the Dīdrādī to Sind, returning by the Bolān to Kandahār and thence to Harāt. During the remainder of his life he relied to a great extent on his Afghān troops and but little on the Persians, from whom he was alienated by his Sunnī creed. The Abdālīs were especially favoured and their young chief Ahmad Khān rose to a high position in his army. Tradition says that Nādir himself prophesied that Ahmad would be king after him. When Nādir Shāh was assassinated by Persians

and Kīlī Bāgh, Ahmad Shāh who was near by with a strong body of Abdālīs settled on a treasure convoy and made his way to Kandahār, where he made himself king. (M. LONGWORTH DAMES \*)

(3) THE AFGHAN NATIONAL STATE. (A) THE SADDĀZĀY DYNASTY.

Ahmad Shāh made himself king in Kandahār and obtained possession of all the eastern portion of Nadir's empire up to the Indus. Harāt soon followed, and in the general break up of the Persian monarchy Ahmad Shāh acted as the protector of Shāhrūd's grandson, of Nadir Shāh, who was blinded by his enemies, and maintained a principality for him in Khurāsān. This province in reality formed part of the dominions of Ahmad Shāh and his son Timūr Shāh, both of whom occasionally struck coins at Mashhad, but Shāhrūd continued to rule in name until he was seized and killed by Āghā Muhammad Kādjār. Timūr Shāh's death, Harāt was however treated as an integral part of the Durranī monarchy, and the ancient kingdom of Khurāsān has remained divided between Persia and Afghanistan.

Ahmad Shāh made Kandahār his capital and gave it the name of Ahmadshāhī which appears on his coins and those of his successors. He took the title of Durranī Shāh, and his tribes, the Abdālīs, have since been known as Durranī [q.v.]. His family had long been looked up to, and this fact, combined with his tact and energy, enabled him to hold his own. The tribes were treated mildly, and he relied upon foreign war rather than taxation to provide him with a revenue. The Durranīs were proud of him and followed him willingly, but they were not an easy race to govern, and his son Timūr Shāh on this account moved his capital to Kābul where the population is mainly Tajik. In his Indian conquests Ahmad Shāh not only rivalled but excelled Nadir Shāh, and extended his dominions far beyond the Indus. He added the provinces of Kashghir, of Lahore and Multān, that is the greater part of Panjāb and the suzerainty over the Durrānī provinces of Bahawalpur to his dominions.

He invaded India several times, and occupied Delhi more than once. His defeat of the Mahrattas at Panipat in 1747/1761 was a turning point in Indian history, but he did not add any provinces beyond the Panjāb to his own dominions. His wars with the Sikhs were perpetual and led to the eventual loss of the province. The *khān* of Kalāt too, the Brahūī Nāir, who had become the feudatory to Nadir Shāh declared his independence in 1747/1758. Ahmad Shāh besieged Kalāt without success, and on being called away to India accepted a purely nominal submission. Nājir Khān, however, supported Ahmad Shāh in his wars in Khurāsān, and contributed greatly to his victory over Karīm Khān Zand in 1751/1768. On this occasion the blind Afghān prince took the side of Karīm Khān, and sheltered him in Mashhad which Ahmad Shāh reduced by blockade.

For further details about Ahmad Shāh see AHMAD SHĀH DURRĀNĪ; he died at Murgāb in the hills near Kandahār in 1787/1773, leaving his successor a very extensive but insecure empire.

Timūr Shāh had held important posts under his father, such as the Nizāmshīp of Lahore and Multān, which is marked by a distinct series of coins. At the time of Ahmad Shāh's death he was at Harāt, and only obtained possession of Kandahār after seizing and executing his brother Sulaymān, who had been set up as his rival. He soon moved his capital to Kābul, and reigned uneventfully for twenty years, during which the monarchy declined

steadily in strength and stability, although externally it remained unimpaired. The authority of the central government over the outer provinces was precarious. The Sikhs grew in power and took Multān in 1796/1781, but Timūr Shāh retook it the same year. In Sind the feudatory Kalhōrās were overthrown and replaced by Balūḥ *amīrs* of the Tālibur tribe (commonly called Tālipurs), who waged successful wars against Timūr Shāh's generals from 1797/1782 to 1801/1796, and remained independent, although they accepted a nominal suzerainty. The Mangī *amīr* of Būkhārā Ma'ī'm, who had been encroaching on the Turkistān province, especially Marw, also made a nominal submission when attacked by Timūr Shāh, but retained all his conquests. In Kashghir also there was a revolt which was suppressed. Internally the power of the Bārakzāy clan of the Durranīs became gradually greater. Timūr Shāh died in 1807/1793 and was succeeded by his son Zamān Shāh, who reigned till he was dethroned by his brother Mahmūd Shāh in 1815/1800. Short as his reign was he was able to concentrate in it crimes and follies enough to wreck the Durranī monarchy. Although weakened at home by the rivalry of his brothers Mahmūd and Shudjā' al-Mulk, Mahmūd, he 1815/1800, Kābul was in the north by Shāh Murād Mangit, and in the south defeated by the *khān* of Kalāt and the *amīrs* of Sind, yet he could not refrain from wasting his strength in foolish attempts to rival Ahmad Shāh's conquests in India, and to pose as the champion of Islam against Sikhs and Mahrattas. This brought him into collision with the English now rapidly becoming the ruling power in India. His first invasion (1809/1795) was cut short at Hasan Abdāl by the news that Āghā Muhammad Kādjār had captured Mashhad and murdered the blind old Shāhrūd. Having been appeased by an embassy from the Persian king he began a second invasion of India, which was interrupted by the rebellion of Mahmūd at Harāt. After defeating this rising he invaded the Panjāb, and this time reached Lahore and received the nominal submission of the Sikhs, now headed by Raudjit Singh, but the Kādjār encroachments in Khurāsān again called him back. Mahmūd meanwhile led a wandering life intriguing with discontented persons in Harāt and Kandahār. Among these was the powerful leader of the Bārakzāy clan, Payinda Khān, known by the name of Shāh Khān, who was jealous of the authority wielded by the vizier Waḥīdār Khān. The conspiracy was detected and Payinda Khān was executed. His son Fath Khān fled to Mahmūd in Khurāsān and induced him to throw himself on the sympathy of the Durranī tribe with whom Zamān Shāh was unpopular (Zamān Shāh's mother was a Yusufzāy while Mahmūd's was a Popalzāy Durranī). This advice was justified by the result. Mahmūd obtained possession of Kandahār while the infatuated Zamān Shāh was preparing for another invasion of India. Mahmūd advanced on Kābul and Zamān Shāh fled, but was soon captured and blinded (1815/1800). Simultaneously with Mahmūd's accession at Kābul Shudjā' al-Mulk proclaimed himself king at Peshāwar. He was assisted by a Ghilzāy chief and took Mahmūd in 1818/1803 he took Kābul, imprisoned Mahmūd and released the blind Zamān Shāh, his own whole brother. For a time Kandahār was held by Mahmūd's son Kāmran supported by Fath Khān, but the latter made terms for himself and submitted, but discontented with his position almost immediately set up a rival king Kayyār Shāh son of Zamān Shāh.

The next few years were occupied by constant intrigues. Fath Khān changed rapidly from one pretender to another, sometimes supporting Mahmūd and Kāmran, sometimes Kayyār, while Shudjā' al-Mulk dissipated his strength in expeditions to Sind and Kashghir. Finally Fath Khān, who was now supporting Mahmūd, defeated Shudjā' al-Mulk at Nimla (1824/1809). He fled into India and Mahmūd's second reign began. He was however absolutely dependent on Fath Khān, whose power became very great. His brother Dōst Muhammad held high office, another brother Muhammad Afzām became governor of Kashghir, and another Kūhandī governor of Kandahār. Harāt which had become independent under another prince was reconquered by Fath Khān and Dōst Muhammad in 1823/1816. Soon afterwards Dōst Muhammad incurred the enmity of Kāmran, who had become governor, by entering his harem and insulting his sister. He fled to Kashghir and Kāmran took his vengeance on Fath Khān, whom he blinded and afterwards killed with the consent of Mahmūd. Although perfidious and unscrupulous Fath Khān was greatly admired by the Afghāns, and his brother Dōst Muhammad had no difficulty in raising a large force and taking Kābul in 1825/1818 near Kābul. Mahmūd lost Kābul which he never recovered. He held Harāt till his death in 1825/1819 and Kāmran continued to rule there till he was murdered in 1828/1842. (M. LONGWORTH DAMES \*)

(B) THE BĀRĀKZĀY (OR MUHAMMADZĀY) DYNASTY.

The Muhammadzāy, a small subdivision of the Durranī Bārakzāy of Kandahār, derive their name from Muhammad, a contemporary of Malik Saḍō, chief of the Abdālī clans, with whom he lived amongst his small tribe at Arghasān, SE of Kandahār, about 1000/1591. His descendants held the title of chief among the Bārakzāy tribes of Kandahār, and came into prominence with Hādīdī Djamāl Khān b. Hādīdī Yusuf b. Yārō b. Muhammad, who served under Ahmad Shāh and died in 1784/1770-1. His son Fayīdā Khān rendered important services to Timūr Shāh in the suppression of rebellions, but in consequence of his intrigues with Mahmūd against Shāh Zamān was executed in Kandahār in 1814/1800. He left a number of sons, the eldest of whom, Fath Khān, was installed as vizier, with the title of Shāh Dōst, on Mahmūd's occupation of Kābul (1815/1800). When the strife between Mahmūd and the Muhammadzāy their ambitions clashed with the ruling Saddāzāy family and plunged Afghanistan into strife and bloodshed until finally, after the execution of Fath Khān in 1824/1818-9, his brother Dōst Muhammad drove Mahmūd out of Kābul.

The Bārakzāy chiefs, who by now held most of the country, ruled at first in the name of various puppet kings of the Saddāzāy family, such as Ayūb and Sulṭān 'Alī (who took the name of Sulṭān Mahmūd on his coins). It was not until 1824/1818 that Dōst Muhammad formally assumed the style of *amīr* of Kābul; but neither he nor any of his successors before Halīb Allāh took the title of *ghāh* or king. During the early years of his rule the outer provinces of the empire were rapidly lost. The Sikhs took Multān in 1815/1818, Kashghir in 1825/1819, Dēra Ghāzi Khān in the same year, and Dēra Ismā'īl Khān in 1826/1821. Peshāwar long resisted them under Dōst Muhammad's brother, Sardār Sulṭān Muhammad, but it too fell in 1820/1834. The *amīrs* of Sind threw off the last sign of Afghan rule by taking Shikarpūr, and to the north of the Hindu-kush Balūh was lost also. Dōst Muham-

mad therefore became the ruler of a compact Afghan kingdom; the loss of the outlying provinces, which had always been a source of weakness to the Saddāzāy kings, tended to consolidate his power. Although without scruples of any sort in attaining his ends, yet he had the reputation of a just man and was popular among the Afghāns. But his progress was checked by the inevitable rivalries of his brothers. While he made Kābul his capital, Kūhandī Khān held Kandahār and defeated an attempt by Shudjā' al-Mulk Saddāzāy to recover it in 1820/1814. Harāt was taken by the Persians after the murder of Kāmran by his vizier Yār Muhammad Khān (1828/1843), and was only recovered by Dōst Muhammad in 1820/1863, just before his death.

Shudjā' al-Mulk, after his failure at Kandahār, endeavored to obtain British assistance and political events led to his ultimately obtaining it. Attempts by Alexander Burnes to negotiate a treaty with Dōst Muhammad had broken down, and the growth of Russian influence led the Indian government to favour Shudjā' al-Mulk's claims. The Persians had at this time (1825/1837) laid siege to Harāt. It was believed that their operations were directed by Russians and an English officer conducted the defence. This brought matters to a climax. An Anglo-Indian army advanced through Sind and the Bolin Pass on Kandahār (end of 1824/Feb. 1839) and after taking the city marched on Kābul. Dōst Muhammad fled to Būkhārā and Shudjā' al-Mulk was placed on the throne of Kābul (1 Jumādī II 1255/17 Aug. 1839). Dōst Muhammad, after some unsuccessful operations in the north, surrendered to the British in the following year and was sent to Calcutta.

Shudjā' al-Mulk's reign was a troubled one. Kābul was abandoned by the British-Indian army in 1841, and on its retreat the army was almost annihilated at the Khurd Kābul pass. These operations were conducted by Muhammad Akbar Khān, son of Dōst Muhammad. The British continued to hold Djalālābād and Kandahār, and reoccupied Kābul in the autumn of 1858/1842. Shortly before this, Shudjā' al-Mulk had been murdered, and his son Fath Dīang was recognized as king by the Popalzāys but opposed by the Bārakzāys. The British soon afterwards left Afghanistan, and Fath Dīang, knowing that he could not hold his own, went with the Popalzāys, accompanied by the blind old Zamān Shāh, who was still living. Dōst Muhammad was sent back to Afghanistan, as he was the only man who could establish a firm government. His sons and brothers were reestablished in their governments, but rifts continued from time to time to breach the solidarity of the clan, and even Akbar Khān, now vizier, was on bad terms with his father till he died in 1860/1849-50. Dōst Muhammad maintained friendly relations with Britain except at the time of the Sikh war of 1849, when the Afghan contingent covered itself with ridicule by its rapid flight after the battle of Guḍgūt. During the mutiny of the Indian army in 1857, Dōst Muhammad gave them no support. He occupied himself in strengthening his own power, and from 1867 to 1872/1850-55 he reconquered Balūh, Kūhām, Kunduz and Badakhshān. In 1860/1865 he succeeded in driving the Persians from Harāt, and he died there immediately after its recovery, having been a good ruler on the whole in spite of obvious faults. [See also 0687 MUHAMMAD KHĀN.]

Shīr 'Alī, his fifth son, who had been nominated by him as his successor, became almost at once

involved in civil war with his own elder brothers Muhammad A'am and Muhammad A'id, and with 'Abd al-Rahmān, the able and determined son of the latter. (For an account of these wars see 'ABD AL-RAHMAN KHAN). Shīr 'Alī was defeated in 1283/1266 and lost first Kābul and then Kandahār. A'id and A'am reigned in succession until 1285/1268, but never held possession of Harāt, whence Muhammad Ya'qūb, Shīr 'Alī's son, advanced in the latter year and recovered Kandahār and Kābul for his father. Shīr 'Alī now held the whole of Afghanistan, and was recognized by the Indian government, and met the viceroy Lord Mayo at Ambāla in 1286/1869. He was not, however, satisfied with his treatment, as he could obtain no definite promise of support against other powers. At this period he imprisoned his enterprising son Muhammad Ya'qūb and resented the viceroy's attempt to interfere for him. He agreed to an arbitration by British officers as to the Sīstān border, regarding which there was a dispute with Persia. According to this arbitration (1290/1873) a considerable part of the most fertile lands was awarded in Persia, and this was another cause of resentment. Finally he began to negotiate with Russia and refused to receive a British embassy. These causes led to his death in 1293-80. The British army took Kābul, and Shīr 'Alī fled to Mazār-i Sharīf, where he died in 1296/1879. (See also SHIR 'ALĪ). His army, organized on the European model, was defeated by Lord Roberts at the Payawar pass.

Muhammad Ya'qūb, released from prison and proclaimed *amir* on his father's flight (Kabul 1296/1879), met the advancing British forces at Gandamak, and there concluded a treaty (1296/1879) by which he ceded to British India certain territories near the Kōh-e pass and the Kurām valley, and agreed to receive a mission at Kābul. A few months later a rising in Kābul resulted in the massacre of the members of the mission headed by Sir Louis Cavagnari. This led to a new outbreak of war. Roberts took Kābul a second time, but was besieged there by a tribal army headed by Muhammad Dīn and the *mulla* Muḥammad 'Ālam. After its defeat Ya'qūb Khān was deposed and removed to India, and the government was offered to 'Abd al-Rahmān, a separate state being constituted at Kandahār. Part of the army at Kandahār under Stewart marched to Kābul, as a preliminary to evacuating the country, and, on the way through the Ghazal country was attacked at Ahmad Khayl by a large force of men of that tribe, who were only defeated after a most desperate conflict. Scarcely had 'Abd al-Rahmān been proclaimed when Ayyūb, a son of Shīr 'Alī, who had been collecting an army at Harāt, marched on Kandahār, defeated a small Anglo-Indian force at Maywand, and then siege in Kandahār. Roberts marched rapidly from Kābul and defeated Ayyūb. After this the British army withdrew and the whole country including Kandahār was made over to 'Abd al-Rahmān (1297/1880). In spite of internal difficulties and external problems (see 'ABD AL-RAHMAN KHAN), he preserved the independence and integrity of the country, and on his death (12 Dhu'l-Hijja II 1319/1901) transmitted an undisputed authority to his son Habib Allāh. Shortly after the latter's accession the conclusion of a Russo-British agreement removed the fears of further annexation or intervention by either Power, and in 1323/1905 the *amir* confirmed the treaty made by his father with the government of British India, securing to the latter control of the foreign relations of Afghanistan in return for an

annual subsidy of eighteen *lakh* of rupees (£160,000). Internally, peace was almost wholly unbroken and some advance was made in education. During the First World War Afghanistan maintained a policy of neutrality. On 18 Dhu'l-Hijja I 1337/1920 Feb. 1919 Habib Allāh Khān was shot in his camp at Kalā-i Gūgh in Laghmān. His brother Nasr Allāh proclaimed himself his successor, but was captured by the late *amir*'s third son, Amīn Allāh, who had the support of the army, and imprisoned. Amīn Allāh Khān almost at once opened hostilities against British India but only a month later sued for an armistice, and by the Treaty of Rawalpindi (12 Dhu'l-Hijja I 1337/8 Aug. 1919) the independence of Afghanistan was formally recognized. New treaties were concluded with the USSR and Great Britain in 1921, but tension continued on the northern frontier until 1922 and on the SE frontiers until 1924. In 1922 a constitution was promulgated at a Loe Dīrja, followed in 1923 by an administrative code and in 1924 by measures to provide for the higher education of women. After the outbreak of a rebellion in Khost, led by the *mulla* 'Abd al-Karīm, the latter were cancelled and the conscription laws modified at a second Loe Dīrja (July 1924), and the rebellion was eventually suppressed. Nevertheless, King Amīn Allāh (he had assumed the royal title in 1926), on returning from a tour through India, Europe, the USSR and Turkey (Dec. 1927 to July 1928), summoned a third Loe Dīrja to promulgate a new constitution, and to announce a programme of social and educational reforms. A series of tribal risings followed, during which a Tajik brigand, Badī' al-Sakaw, later entitled Habib Allāh Khān, advanced from Kābul Dāman and seized Kābul (Jan. 1929). Amīn Allāh fled to Kandahār, and his attempts to regain Kābul were defeated by the Ghazal supporters of Habib Allāh (April-May 1929); meanwhile, Harāt was occupied by another Tajik, 'Abd al-Rahmān.

The cause of the Muhammadzāys was now taken up by a collateral line descended from Pāyinda Khān, under the leadership of a former army commander who had been living in exile, Nādir Khān (b. Muhammad Yūsuf Khān b. Yahyā Khān b. Sulṭān Muhammad Khān, brother of Dōst Muhammad). After several unsuccessful attempts, he secretly recruited a force of Wazirs and Mahdīs, which, under the leadership of his brother Shāh Wali Khān, occupied Kābul, where Nādir Khān was proclaimed king, with the title of Nādir Shāh, on 12 Dhu'l-Hijja I 1348/16 Oct. 1929. Habib Allāh surrendered, and was executed. The pacification of the country required a further two years, and discontent continued to smoulder among the former supporters of Amīn Allāh, of whom the most active were the Carikh family of Logar. The hasty execution of its leading member provoked a blood-feud, in the course of which king Nādir Shāh was assassinated (20 Raddīab 1352/8 Nov. 1933) in the palace of Dilkūsh. His son Muḥammad Zāhir, then aged 19, was at once proclaimed as successor by the brothers of Nādir Shāh, the eldest of whom, Sardār Muḥammad Hishmat Khān, exercised virtual regency until 1946. Several tribal risings in the following years were sternly suppressed, and an active programme of military, educational and economic development was pursued. In 1934 Afghanistan entered the League of Nations, and in 1937 signed with Turkey, Iraq and Iran the pact of Sa'dābād; a trade agreement was negotiated with the USSR in 1936. During the second World

War it again maintained a strict neutrality. The remaining frontier disputes were settled in 1947—that in the north by agreement with the USSR, and that with Iran over the Hilmud river by American arbitration. Since the constitution of Pakistan in the same year, however, the problem of the unsubdued tribes of the former "North-West Frontier" (see the articles AFRID and MAHMAD), which for a century bedevilled relations between Afghanistan and British India, continues equally to disturb those between the two Muslim States. 'ATĪP AL-DĪN AL-TILIMSĀNĪ (see AL-TILIMSĀNĪ).

**AFĀLĀDJ** (APLĀDJ) (AL-DAWĀSĪ), a district in southern Najd athwart the great cuesta of Tuwayk, roughly bounded by Wādī Birk (N), the plain of al-Dayl (E), Wādī al-Makran (S), and the sands of al-Daby (W). The most populous oasis and present capital is Laylā (46° 44' 35" E, 22° 16' 45" N).

The district contains a remarkable group of spring-fed pools called 'Uyūn al-Sayh and the extensive remains of a system of channels which once irrigated a more prosperous land. The pools, the largest of which is nearly a kilometre long, are the most noteworthy features of this kind in the Arabian Peninsula. The district, in older times also known as al-Faladj, takes its name from *faladj* (pl. *afḷadj*), the term used for 'Qunayr' for an underground aqueduct with surface apertures to facilitate cleaning of the channel, though strangely enough this type of aqueduct, which may be of Persian origin, is now called *sāḥi* (pron. *sāḥī*, pl. *sawāḥi*) in al-Aḷḷaj. The poorly kept aqueducts of Samhān, Barābir, al-Wadīdīdj, and three smaller ones, all of which water the oasis of al-Sayh, are still flowing.

The northernmost village of al-Aḷḷaj is Usaylā. Laylā comprises the settlements of Ghāṣba, the present seat of the *amir*, al-Moharraz, the former seat, and al-Djufaydiriyā. Farther south are the oases of al-'Amār (not to be confused with Al-'Amār, a section of the Dawāsir), al-Sayh, which is the most extensively cultivated of all, al-Kharfa, and al-

Rawda. The pools lie south-west of al-Sayh. South of the pools are the tiny oases of Suwaydān, al-Bukaykiyya, al-Ghawr, and Marwān. The southernmost oases are al-Hadī in Wādī Haḥraḡ, which descends from al-Haddār, and al-Shubra in the upper reaches of al-Makran. In the highlands of Tuwayk are al-Sitāra (al-Sidāra in al-Hamdanī), Hurāda, and al-Ghayl, all ancient places. Along the western escarpment of Tuwayk are al-Hamar (al-Aḥmar) (N) and al-Haddār (S).

At the dawn of Islam the dominant tribe in al-Aḷḷaj was Dī'a'da [q.v.], whose ancestor was a brother of Kūshayr and al-Ḥaḡlir, sons of Ka'b, a descendant of 'Amir b. Sa'sa'a of the Northern Arabs. In 9/630-1 Dī'a'da embraced Islam and sent an envoy to Medina, where the Prophet confirmed the tribe's position in the district (Caetani, *Annali*, II, 1, 297).

In 1267/134 Dī'a'da and their allies of Banū 'Amir on the Day of al-Faladj killed a governor of Banū Hanifa who had been set over them. Banū Hanifa, after defeating Banū 'Amir on the Second Day of al-Faladj, had their power broken on the Day of al-Nighlāh in 126 (Caetani, *Chronographia*, v, 1601).

Three centuries after the Prophet, Dī'a'da remained the foremost tribe of al-Aḷḷaj, followed in importance by Kūshayr and al-Ḥaḡlir (al-Hamdanī, I, 139). Dī'a'da's chief centre was Sūk al-Faladj, a city with iron gates and walls 30 cubits thick enclosing an area said to contain 250 wells of sweet water. Also within the territory of Dī'a'da was al-Ksar al-'Adī, reputed to date back to the time of Tām and Dījadī—perhaps the same as the ruins now known as Kuṣayrāt 'Adī just south of al-Sayh. Kūshayr occupied the city of al-Haysamiyya with walls broad enough for four horses to run abreast along the summit. Among the towns belonging to al-Ḥaḡlir was al-Haddār, but many members of this tribe had already moved to the Yemen.

In 443/1051 Nāṣir Khusraw found al-Aḷḷaj in a state of virtual ruin as the result of internal dissensions so severe that men wore their shields and swords even while praying. During this medieval age the tribe of Dī'mayla, said to be a branch of 'Anaza, became the leading power. Āl Sabāb and Āl Khālifa, the present ruling houses of al-Kuwayt and al-Bahrayn, who trace their lineage back to Dī'mayla, emigrated from al-Haddār well over two centuries ago under pressure from the Dawāsir (q.v.) of the south, who eventually supplanted Dī'mayla in control of the whole district.

In 1199/1785 the people of al-Aḷḷaj, following the lead of their kinsmen in Wādī al-Dawāsir, adhered to the Wahhābī cause and have since remained staunch in its support, though the district has played only a minor role in modern history. In 1281/1919 'Abd al-'Azīz Āl Sa'ūd conquered the rebellious leaders of the Harzina of al-Fara' at Laylā and executed them. The district is now under an *amir* responsible to the central government of Saudi Arabia in al-Riyāḍ.

In addition to the Dawāsir, small numbers of Subay', the Subūl, and the Puḍlī live in al-Aḷḷaj. Remnants of Dī'mayla are found at al-Haddār. *Aḡlir* form an important part of the population of al-Sayh. Negro blood is often seen in the towns, and there are many folk of Banū Khadīr (q.v.), mainly tillers of the soil (*haddāḍ*, pl. *haddād*).

The dates of al-Aḷḷaj are famous. Both al-Hamdanī and Philby mention the *suḥri* variety (called by al-Hamdanī *zayyid al-dawār*, though the present inhabitants regard the *siri* as the *zayyid*),

and Nāṣir reckoned the dates of al-Aflāṭūn better than those of al-Baṣra.

(F. MEIER)

**AFLĀṬŪN** Arabic for Plato, the Greek philosopher, who became, together with Aristotle, the standard philosopher in late Greek philosophy.

(i) Works and doctrine; (ii) Lives; (iii) Sayings. (i) Plato is known to Arab authors according to the different ways in which his genuine works or those erroneously attributed to him were read and studied in the Greek sections of the Roman Empire during the centuries preceding the Arab conquest of Hellenized lands in the Eastern Mediterranean. Most Arab thinkers did not consider Plato the main representative of Greek thought as St. Augustine e.g. had done (*Civ. Dei*, vi, 4, 12) but subordinated him to Aristotle; they were however like e.g. Porphyry, Ammonius and Simplicius aware of an identity of purpose and a basic agreement between the two great philosophers.

Just as commentaries on Aristotle written outside the Neoplatonic schools survived in Arabic translations, partly in Arabic translations only (as in the case of certain writings of Alexander of Aphrodisias and Theophrastus, etc.), interpretations of Plato, unstung by Neoplatonism, found their way to the Arabic philosophers and were studied by them. Part of Galen's (*Ḍiālūn* (s.v.) *Πλάτωνος διαλόγων σύνολον* in eight books, lost in the Greek original but still partly accessible to Hunayn b. Isḥāq (*Mā Turjima min Kitābi Ḍiālūn* (Bergsträsser), no. 124) and his school, has been traced and recently published, viz. the summary of the whole of the *Timaeus*, with many verbal quotations, a fragment of his paraphrase of the *Republic*, a fragment of his summary of the *Lysis* and a reference to his summary of the *Parmenides* (P. Kraus and E. Walzer, *Plato Arabus*, i, 1951). Fragments of his medical commentary on the *Timaeus* (Hunayn, no. 122) have been recovered from Arabic medical writers (H. O. Schröder and P. Kahle, *Corpus Medicorum Graecorum, Supplementum*, i, 1934). Many quotations from Plato and references to him reached the Islamic world through translations of other works by Galen. As had happened in the case of Aristotle, late Greek philosophers tried to arrange Plato's dialogues in systematic order. An otherwise unknown work of this type, completely free

from Neoplatonic influence and still fully aware of the political aspects of Plato's thought, was used and partly reproduced by al-Fārābī (F. Rosenthal and R. Walzer, *Plato Arabus*, ii, 1943). The author of the Greek treatise, who had even regarded this systematic ordering of the dialogues as a chronological arrangement by date of composition, is unknown. A commentary on the *Republic* of similar provenience was widely used by al-Fārābī; it constitutes the main part of Ibn Rughd's commentary which is available in a Hebrew translation and a 16th century Latin one (edition in preparation by E. J. Rosenthal). A summary of Plato's *Lysis*, of a similar type, was used by al-Fārābī in his compendium of the work (F. Gabrieli, *Plato Arabus*, iii, 1952). Al-Rūdī commented on Plutarch's commentary on the *Timaeus* (S. Pines, *Almonester*, 90) and Yahyā b. 'Adī copied Plutarch's book (*Fihrist*, 241).

But, in general, Arabic philosophers look at Plato through the eyes of his Neoplatonic interpreters, Plotinus (cf. AL-SHAʿIRĪ AL-YUNĀNĪ), Porphyry (*Furfiyūs* (s.v.)), Proclus (*Burkūlīs* (s.v.)) and E. Plato, *Corpus Medicorum Graecorum, Supplementum*, iii, p. xlii, 1941) Hunayn b. Isḥāq (cf. also *Mā Turjima*, no. 45) says: "Galen is the standard interpreter of Hippocrates, and the man who is best entitled to explain the meaning of Plato's words is Proclus the most famous of scholars". An instructive example of this Proclean interpretation of Plato is to be found in Mikawway's al-*ʿAṣāʾ al-Aṣḡar*, in the section on the immortality of the soul (F. Rosenthal, 399 ff.), based probably on Proclus' work *On the immortality of the soul according to Plato*, in three books, which was known to the Arabs (*Fihrist*, 252). A tradition of this kind is followed by al-Kindī, in whom the Platonic element is strong (cf. Rasāʾid (Abū Rūmī), nos. 10-13) not only in psychology but also in his extremely orthodox neoplatonic metaphysics of the One and in his ethics. The Plato to whom al-Fārābī (with the exception of his theory of the ideal state), Ibn Sīnā, Ibn Bāḡdīd and Ibn Rughd refer is, whether explicitly or implicitly, always the Plato of Plotinus and his followers, Yahyā b. 'Adī had Olympiodorus' (6th century A.D.) commentary on the *Phaedo* (lost in the Greek original) in his library (*Fihrist*, 256) in the translation of Isḥāq b. Hunayn. We find an interesting account of Plato's metaphysics, cosmology and psychology, derived from an unknown but valuable neoplatonic source, in al-Shahrastānī, 283 ff. (German transl. by Th. Haarbrücker, ii, 117).

On the whole, since Neoplatonism claims to be a reinterpretation of Plato, influential Neoplatonic writings deserve to be mentioned here as well, the *Theology of Aristotle*, in which Aristotle is supposed to have become a Platonist in his old age, the *Liber de causis* based on Proclus' *Elements of Theology*, the new Plotinian text discovered by P. Kraus (cf. Bibliography) and the Arabic Plotinus source discussed by F. Rosenthal (cf. AMIR-ʿUTĀSIL and AL-SHAʿIRĪ AL-YUNĀNĪ).

A new development starts with al-Suhrawardī al-Makṭūl (s.v.) and the Ishrāqīs (s.v.), who, criticizing al-Fārābī and Ibn Sīnā, emphasize the mystical aspects of Platonism, or rather Neoplatonism, and make Plato the mystic chief authority in philosophy. The Sūfīs now become the true followers of Plato (cf. e.g. al-Suhrawardī, *ʿIshrāq* (s.v.) *ʿIshrāq al-Mystica* (Corbin), i, p. vii, xxvii ff.). An anonymous book *On the Platonic Ideas* (ed. 'A. Badawī,

Cairo 1947), written probably in the 14th century (Corbin, *op. cit.*, 4, n. 79), depends on al-Suhrawardī's strange interpretation of the Platonic ideas.

Another special tradition of Platonism is represented by Muhammad b. Zakariyyā' al-Rāḍī (s.v.), who also claims to follow Plato as his main authority. His Platonist ethics (cf. al-*Ṭib* al-Rihānī) may be connected with his study of Galen, and his rejection of the eternity of the world with the interpretation of the *Timaeus* put forward by Plutarch and Galen, but his five eternal principles are of Neopythagorean provenience, although he considered them to be Platonic. His theory of the atomic structure of matter may go back to Plato's lecture *On the Good*, it is certainly found in a neopythagorean version of Plato's metaphysics (Sextus Empiricus, *Adversus Physicos*, ii, 249 ff.).

The Arabic biographers list the titles of all the dialogues to be found in the Greek Corpus Platonium, but give little information about Arabic translations. They mention a commentary on the *Republic* translated by Hunayn b. Isḥāq; translations of the *Timaeus* by Yahyā b. al-Bitīk, Hunayn b. Isḥāq and Yahyā b. 'Adī. (Hunayn wrote also a treatise *That ought to be read before Plato's works*.) Ibn al-Nadīm also mentions a copy of the *Crito* in Yahyā b. 'Adī's handwriting. Part of Proclus' commentary on the *Phaedo* (lost in the Greek original) was translated from the Syriac by the *Zawāʾir*.

No manuscripts of these or other Arabic translations of a Platonic dialogue have so far been traced. A verbal quotation from the *Republic* (apart from the more or less verbal references in Ibn Rughd's paraphrase and references to its contents in works of other philosophers) occurs e.g. in the *Rasāʾid al-Hudūd al-Safāʾ*, Cairo 1347, iv, 134 (the story about Gyges, *Rep.*, ii, 359 ff., cf. Rosenthal, 397). Al-Kindī found a treatise on the Platonic number (*Rep.*, viii; *Fihrist*, 256). Quotations from the *Timaeus* occur frequently, but it is difficult to decide whether they are taken from Plato or from some intermediary. For the quotations from the *Lysis* to be found in al-Birūnī's *India* (cf. F. Rosenthal, 359 ff. and F. Gabrieli, *Plato Arabus*, iii, p. xli, 1952). There are numerous quotations from the *Phaedo* in the same work. The closing section on Socrates' death is to be found e.g. in Ibn al-Kifī, 200-6 and Ibn Abī Usaybi'a, i, 45. A Persian version of the dialogue exists in Brusa (*Bell*, 1952, 114). The Alcibiades-speech from the *Banquet* has been traced by F. Rosenthal in Istanbul, Kōprülü 1608, fol. 226. Persistent research will no doubt trace more quotations of Platonic dialogues in Arabic philosophical and non-philosophical writings.

Among the pseudographs of a philosophical kind can be mentioned: the neopythagorean treatise *Plato's Exhortation of young men*, probably of Greek origin (F. Rosenthal, *Orientalia*, x, 383-95), a letter by Plato addressed to Porphyry (i) about the banishment of grief, depending on a treatise on consolation by al-Kindī (*Maq.*, 1921, 88-9, see H. Ritter-R. Walzer, *Memoriae A. dei Lincei*, 1940, 388 n. 2) and Plato's will addressed to Aristotle.

But the Arabs are acquainted not only with the different interpretations of Plato's thought which are familiar to the student of Greek philosophy but also with a Plato who had been associated with the superstitions which had become an integral part of the teaching of most of the neoplatonic schools: magic, astrology and alchemy (Olympiodorus and other late Neoplatonists had dabbled in alchemy and made Plato their patron). The Arabs went a

step further and made Plato the author of alchemical works. Ḍiālir quotes a *Musabbihāt al-Falāṭin* in which Plato initiates his disciple Timaeus in the secrets of alchemy; but the passages of the *Timaeus* referred to by Ḍiālir have nothing to do with the original dialogue of Plato (P. Kraus, *Jahrb. d. d. science grecque*, 48 ff.). Another work of a similar character, a philosophical alchemical book attributed to Plato is the *Rasāʾid al-Falāṭin* known to the West as *Liber Quartorum* and preserved in two Arabic MSS. It contains a dialogue between Ahmad b. al-Husayn b. Ḍiālir Būghār and the well known Hārūdī mathematician and astronomer Ḍiālir b. Kurra (P. Kraus, *op. cit.*, 31, 339). Another alchemical treatise, the *Liber Platonis de XIII clavis*, is supposed to have been translated from the Arabic into Latin in A.D. 1301 (L. Thorndike, *A History of Magic*, iii, 37). Cf. also Kraus, *op. cit.*, 31, n. 9.

Among the magical treatises ascribed to Plato the *al-Nawāḥis*, which deals with artificial generation, appears to be worth mentioning (P. Kraus, *op. cit.*, 104 and n. 12), as well as al-*Sirr al-Ḍiālir* (ibid., 52).

(ii) The Arabic "Lives of Plato" do not add anything substantial to the material to be found in the Greek tradition as represented by Diogenes Laertius, book iii, Olympiodorus, and the *Prolegomena* to the Platonic philosophy by an anonymous Neoplatonist (cf. H. Breitenbach, F. Budenhausen, A. Debrunner, F. von der Müll, *Diogenes Laertius*, III, 1907; J. Kirchner, *Prolegomena aditio*, no. 12855). There is, however, no direct connection between them and any of the Greek texts known. Part of the Arabic tradition can be traced back to an introductory work by Theo of Smyrna (2nd century A.D.), referred to by the *Fihrist*, 245, and quoted at length by Ibn al-Kifī, 17-9 (cf. J. Lippert, *Studien auf dem Gebiete der griechisch-arabischen Überlieferungsliteratur*, i, Braunschweig 1958, 39 ff.). The *Fihrist* refers also to (Ps.-) Plutarch, see H. Diels, *Doctrinae Graeci*, 287. Al-ʿAmīrī, a philosopher of the 4th/10th century (quoted in the Abbreviation of Abū Sulaymān al-Maṭṭī al-Sayid al-Ḥikma, introduction), probably following some lost Greek tradition, made Plato one of the five pillars of wisdom, the others being Empedocles, Pythagoras, Socrates and Aristotle (Anḍakūlīs, Pūḡbāghūras, Sukrāt, Aristotālīs [pp. 8]); these philosophers derived their wisdom from the Prophets. According to him Plato retired in old age into solitude and prayer. He also gives an account of Plato's solution of the Delian problem (cf. Plutarch, *De gen. Socr.*, 7, p. 579; idem *De El* ap. *Delphos*, 6, p. 386; Tannery, *La Géométrie grecque*, 110). Al-Karwīnī, *Abḥār al-Būdā* (Wustenfeld), 45; Lufft al-Makṭūl, *Tadhqī al-Maḥabb* (S. Yaltkaya, A. Adnan, H. Corbin), Paris 1940). On him depends Ṣāʿid al-Andalusī, *Tabaḥāt al-Ummān*, 23; Ṣāʿid's life was used, as a minor source, by Ibn al-Kifī, *passim*.

The life in Mubashshir b. Faṭṭā's *Mashāʾir al-Hikma* (MS. Brit. Mus. Add. 2389), fol. 44 ff., on this work (cf. F. Rosenthal, in *Orientalia*, 1937, 21 ff.) was copied by Ibn Abī Usaybi'a, i, 30 ff. He made both Plato's parents descendants of Asclepius, probably misinterpreting the epigram to be found in Diog. Laertius, iii, 45 (cf. E. J. and L. Edelstein, *Asclepius*, Baltimore 1945, i, no. 322, ii, 127). Alone among the Arab biographers he mentions Plato's supposed stay in Egypt. For the physiognomical section cf. F. Rosenthal, *loc. cit.*, 38.

Ibn al-Kifī based his long and detailed life (17-47) on the *Fihrist*, on Theo of Smyrna (cf. above) and on an unidentified Greek source (19 line 16-25

1. 3). There are Greek parallels to almost everything mentioned. Stories similar to the discussions reported to have taken place at Dionysius' court (21) are to be found in Olympiodorus' *Life* and in Plutarch's *Deo*. There are a very few confusions, such as the story of Socrates' stay in Sicily and the introduction of Plato's two female disciples as his wives and the inclusion of Proclus among his pupils. The section 25<sup>a</sup>-26<sup>a</sup> is taken from al-Fārābī (cf. the anonymous *Procl. Phil. Plat.*, cap. 7-16); 26<sup>a</sup>-27<sup>a</sup> reproduces Sā'id al-Andalusi, 19. Plato's prayer in neoplatonic language (27<sup>a</sup>-28<sup>a</sup>) is being mentioned (cf. also MS Oxford, Hunt. 262, fol. 202r).

Al-Shahrastānī's account of Plato's life in his *Nuṣṣat al-Arā'īḥ* (in MS) is based on Mubashshir. In later centuries Plato's tomb could be visited at Konya (F. W. Hasluck, *Christianity and Islam under the Sultans*, Oxford 1929, 363 and *passim*).

(iii) The main source for the various quotations of sayings of Plato is Hunayn b. Ishaq's *Nawdir al-Faṣiḥa wa 'l-Hakamā'* (cf. the Hebrew transl., ed. by A. Löwenthal, Frankfurt 1896, and translated by him into German, Berlin 1896; and K. Merkle, *Sinnprüche der Philosophen*, Leipzig 1921). Another primary source is Ibn Hindī, *al-Kalām al-Rūḥānīya fi 'l-Hikmah al-Yūnāniyya*, Cairo 1328. The life in the Abbreviation of Abū Salimān's *Sināt al-Abbās* contains only sayings. Ibn Abī 'Uṣaybi'a, i, 52<sup>a</sup>-53<sup>a</sup>, reproduces the section on sayings to be found in Mubashshir. Sayings attributed to Plato occur very often in Arabic literature.

Steinschneider, *Die arabischen Übersetzungen aus dem Griechischen*, *Centralblatt für Bibliothekswesen*, 1893; F. Rosenthal, *On the knowledge of Plato's Philosophy in the Islamic world*, IC, 1940, 387 ff.; idem, *As-Sayf al-Yūnānī and the Arabic Plotinus source*, *Orientalia*, 1952 ff.; P. Kraus, *Plotin chez les Arabes*, *BIF*, 1947, 293 ff. (R. WALZER).

**ĀFRĀĞ** (Berber, "enclosure"), term adopted in Morocco since the Almohad period for the enclosure of cloth, which isolates the encampment of the sovereign and his suite from the rest of the camp. It corresponds to the Persian *sarāḥ* or *sarāpārā*.

**AFRASIYĀB**, legendary king of the Tūrānians according to Iranian tradition. In the Avesta (especially *Yaght xī*) "Frangrasyan the Turian" was an adversary of Kay Khusraw (> Kay Khosraw), having treacherously murdered Kavi Haosrava's father Siyāvush (> Siyāvush). He vainly desired to secure the *knarva*, "the Glory of the Aryans", and was killed, in revenge, by Kavi Haosrava. He may have been originally a historical figure, chief of the Turian tribes (who were probably themselves of Iranian race (cf. *vr̥k̥ānā*). The Pahlavi form of the name is Fr̥siyāb. Some additional details about him are given in the religious literature (*Divandān*, etc.). His genealogy is given, his first ancestor being Tōt (Tūr, ancestor of the Tūrānians), son of Fr̥tōdā (> Farīdūn (q.v.)). His incursions are said to have started in the reign of Manušhūr; he defeated the latter and gained dominion over Iran. Subsequently Uzw (> Zaw or Zab) delivered Iran from his domination; Fr̥siyāb tried to recapture the "Glory" and sought it in all the seven *khaybars*. Fr̥siyāb's residence (the subterranean fortress of the *Yaght*, where Frangrasyan lived "surrounded by iron") is described in detail. In the end Fr̥siyāb was killed by Kay Khusraw. Thus in the development of the legend after the period of the *Yaght* Fr̥siyāb

became the chief of the Tūrānians in all their wars, not only against the Kayānids but also against their predecessors, the "Fr̥siyābids"; he thus became a contemporary of Manušhūr and Uzw; his end, however, is still firmly connected with Kay Khusraw.

The Islamic authors derived their information from secular books on the national tradition, more especially the *Khawadīr-nāma*. Many additional details are to be found. Afrasiyāb fought with Manušhūr in Tabarīstān; he thus reached an agreement, making the river of Balḫ the boundary between their territories. Siyāvush, sent by Kay Kā'ūs with an army against Afrasiyāb, concluded an armistice with him, which was repudiated by Kay Kā'ūs. Siyāvush took refuge with Afrasiyāb who married him to his daughter Wisdāfarīḡh (al-Tabarī; Firdawsi: Fāringī); but nevertheless murdered him, out of jealousy. Wisdāfarīḡh, pregnant with Kay Khosraw, escaped and was taken back to Iran by the hero Gēw (Basy, Wawu). Rustam and Tōt then ravaged the land of Tūrān, to avenge Siyāvush. The reign of Kay Khosraw was filled with wars against Afrasiyāb (details in al-Tabarī, i, 605 ff.; cf. also index, s.v.; al-Tha'libī, *Histoire des rois de la Perse* (Zotenberg), 222 ff.; Firdawsi, *Shāh-nāma* (Vulliamy), ii, 764-ii, 1444). After the final battle Afrasiyāb fled from Turkestan and hid in Aḫarbayvān, but was caught, and killed by Kay Khosraw with his own hands.

The Tūrānians having been identified with the Turks (see *TÜRĀN*), Afrasiyāb was regarded as a Turk; this is strongly emphasized in the *Shāh-nāma*. Turkish dynasties therefore sometimes claimed him as their ancestor: thus the Kara Khānīd (q.v.) dynasty is also called 'Al Afrasiyāb, and the Salḡīds claimed descent from him. Cf. W. Barthold, *Hist. des Turcs d'Asie Centrale*, 70, 84.

**Bibliography:** A. Christensen, *Les Kayanides*, Copenhagen 1932, index, s.v. Frangrasyan and Fr̥siyāb (with further references to Islamic authors); F. Woll, *Glossar zu Ferdowsi Schahname*, Berlin 1935, s.v. Cf. also *pl̥g̥r̥ānā*, *KAYANIDS*.

(S. M. SYKES)

**AFRASIYĀB** founder of a line of governors of Basra (Al Afrasiyāb). He was an officer of unknown racial origin, who purchased the government of Basra from the local pasha about 1021/1022. Afrasiyāb was succeeded by his son 'Alī in 1034/1024-5, during an attack on Basra by Persian forces, which failed in face of 'Alī's resistance. A second Persian attempt in 1038/1029 was equally unsuccessful. During the Turco-Persian struggle for Baghdad, 'Alī Pasha took neither part and continued to govern his province independently. The succession of his son Husayn (c. 1062/1052) led to internal conflicts, of which advantage was taken by Murtadā Pasha of Baghdad to evict Husayn in 1064/1054 and replace him by 'Alī's brother Ahmad. Murtadā's subsequent execution of Ahmad led to a rising of the local population and tribesmen and the restoration of Husayn Pasha. His attempts to extend his power over al-Hazā were followed by a full-scale expedition against him led by Ibrāhīm (Tawīl), pasha of Baghdad, in 1076/1065. After a prolonged siege of Kurna, Husayn abdicated in favour of his son Afrasiyāb, but continued to govern as regent until a second expedition from Baghdad under Karā Murtadā (Fīrād) Pasha drove him out and restored the imperial government in 1078/1068.

**AFRASIYĀBIDS**, also called (by Rabio) the Kiyās of Culāb or Calāb (after one of the eight *bulaks* of Amul, and (by Sachau), the Kiyā Djalwāl, synonym), the rulers of Māzandarān. The spouse of the clan, Afrasiyāb b. Kiyā Hasan, was a *sipāh-sālār* in the service of his brother-in-law, Fakhr al-Dawla Hasan Bāwand (see *BĀWAND*). Kiyā Afrasiyāb conspired with his sister, who had a daughter from a previous marriage, accused the Bāwand of taking this girl as his mistress, and obtained from the *šahād* of Amul a *fatwā* authorizing the death of the culprit. At the same time, the Bāwand put to death his minister, Kiyā Djalāl al-Dīn Ahmad b. Djalāl, a member of the powerful family of the Kiyā-yi Djalālī. This filled the nobles with anger and consternation and obliged the Bāwand to seek the friendship of the Kiyās of Culāb, old rivals of the Kiyā-yi Djalālī. The reconciliation of the two Kiyās Afrasiyāb and the Kiyās of liberty of action, and finally the Bāwand was assassinated in a bath, on 27 Muharram 750/7 April 1349, by 'Alī and Muḥammad, sons of Afrasiyāb (or by the latter alone, according to Justī). With the death of Fakhr al-Dawla, the dynasty of the Bāwand, which had ruled for 750 years (43-750/665-1349) came to an end, and Kiyā Afrasiyāb took over the power in Amul (end of Sā'ir?, *JA*, 1943, 237). Some of the most of the officers of his former master refused to submit to him, he tried to make use of religion and became the disciple of the *darwish* leader Kawām al-Dīn Mar'āghī, called Mīr-i Buzurg, hoping that the veneration of the population of Amul for the latter would restrain them from rebellion. After ten years of rule, however, Kiyā Afrasiyāb was defeated and killed, together with his three sons, by the same *darwish* in the battle of Djalāl-kamr-pārdīn, in 760/1359.

Mīr-i Buzurg established himself as governor of Amul and thus founded the dynasty of the Mar'āghī (q.v.) *sayyids* (760-989/1359-1581). In the same year, a member of Afrasiyāb's clan, Kiyā Fakhr al-Dīn Djalālī, murdered 'Abd Allāh, son of Mīr-i Buzurg, and was himself executed with his four sons; Kiyā Gushasp (Wighāts) also, another brother-in-law of the last Bāwand, was killed with his seven children. The Kiyās of Culāb re-emerge only with Iskandar-i Shāykhī, eighth son of Kiyā Afrasiyāb, who took refuge at Harāt, led an adventurous life and eventually entered the service of Timūr. In 793/1390-1 Timur invaded Māzandarān, took the city of Māhina-Sar near Amul, sacked Amul and Sā'ī, deported the Mar'āghī *sayyids* and appointed Iskandar as governor. Having returned with the invader, Iskandar enjoyed little popularity, all the less that he ordered the mausoleum of Mīr-i Buzurg at Sā'ī to be demolished. In 802/1400-1 Iskandar accompanied Timūr on his expedition to 'Irāq, Aḫarbayvān, Anatolia and Syria, then, having obtained permission to return to Amul, he rebelled. In 805/1403-4 Timūr marched into Māzandarān in pursuit of Iskandar, who fled into the forest with his wife and two small children, and fearing that he might be betrayed by their cries he killed them together with their mother. Finally he was killed at Shīrūd Dū-Hazār, and the officers of Timūr sent

his head to his son Husayn Kiyā who was holding out in the fortress of Fīrūz Kūh and now hastened to surrender it. Another son, 'Alī Kiyā, had fallen into the hands of Timūr's troops. Timūr pardoned the two brothers and Husayn Kiyā contrived to rule over Fīrūz Kūh. His son, Luḥrāsp b. Husayn b. Iskandar ruled over Tālahān in 880/1479-80. In his turn, *amir* Husayn (Hasan?) Sachau b. 'Alī b. Luḥrāsp ruled over part of Rūstamān and the mountainous region of Fīrūz Kūh. Dāwūd and Hādī Rūd, in 999/1593 Shāh Ismā'īl I, after taking the fortresses of Gulshāndā and Fīrūz Kūh, laid siege to the fortress of Wusta, where the *amir* Husayn Kiyā had taken refuge. Forced to surrender, he shortly afterwards committed suicide at Aywān-i Rasūl Wādī (Kabūd-Gundāb). The last member of the family, *amir* Suhrāb Culāb, keeper of the fortress of Ardabīl in Sāwḡd-kūh, was confirmed in his post by the Shāh.

**AFRĪDĪ**, the name of a large and powerful Pathān tribe, with an estimated fighting strength of 50,000, on the northwest frontier of Pākistan. The territories inhabited by the Afrīdīs stretch from the eastern spurs of the Sāfīd Kūh through the northern half of Tirāh and the Khyber (Shāyhar) (s.v.) pass to the west and south of the Peshāwar district. On the east they are bounded by the settled districts of Pākistan; on the north by the territories of the Mohmands; on the west by the Shīrwāris; and on the south by the Ōrākzays and Bāghāz tribes. They are divided into eight clans. In and around the Khyber Pass are to be found the Kūhī Khel, Malikhel, Khel, Kambar, Khel, Kamrā's, Zakka Khel, and Sipah. These six clans are generally referred to as the Khyber Afrīdīs. The Akā Khel Afrīdīs have no connection with the Khyber and are located to the south of the Bārā river. The Ādam Khel Afrīdīs inhabit the hills between the districts of Kohāt and Peshāwar.

The origin of the Afrīdī, or as they call themselves, Afrīdī tribes has always puzzled ethnologists. H. W. Bellew (*JRAS*, 1887, 504) identified them with the 'Arđuparā of Herodotus. This has been accepted by G. A. Grierson (*Linguistic Survey of India*, x, 5) and A. Stein (*JRAS*, 1925, 404). But the name does not occur in the Achaemenian inscriptions, and it is doubtful whether Herodotus intended to describe the 'Arđuparā as dwelling where the Afrīdīs now are. H. G. Raverty (*Notes on Afghanistan*, 1888, 94), relying on what are probably fictitious genealogies, believed them to be of Pathān or Afghān origin, the descendants of a supposed eponymous ancestor Karlān. The derivation of the name Afrīdī in the *Hayāt al-Afghān* of Muḥammad Hayāt Khān (Engl. transl.: *Afghanistan*, Lahore 1874, 201), from *afīda* (a creature of God) is also evidently a modern fabrication. According to Grierson (*JRAS*, 1925, 405-16) the modern Afrīdī country of Tirāh was at one time occupied by a people speaking a language still known as Tirāhī which resembles the Dardic languages of the Hindū-kush. It seems probable, therefore, that the Afrīdīs, although speaking *Pashto*, contain a large, if not predominant racial element, which was

established in Tirah long before the advent of those Pashto-speaking Afghan invaders who gradually pushed their way into the belt of hills and alluvial plains to the west of the Indus between the 13th and 16th centuries.

Their position athwart the Khyber Pass connecting India with Afghanistan made it extremely difficult for the Mogul emperors of Hindustan to maintain safe communications with their outlying provinces of Kabul. In the reign of Akbar, incited by the preaching of Bayāzīd, the founder of the Kawāghā-niyya (q.v.) sect of heretics, and of his son Dīlāl al-Dīn, they attacked Mogul troops and caravans passing through the Khyber. They were forced into submission by Akbar's forces in 1587 and in the following year agreed, in return for allowances, to keep the pass open for traffic. They were however only temporarily subdued and expeditions had to be undertaken against them in the reigns of Dīlāshir and Awasangrī. Dīlāshir defeated many Afriids to Hindustan and Deccan, where their descendants are still to be found. After the establishment of the Afghan kingdom by Ahmad Shāh Durrānī the Afriids were nominally subject to him and are mentioned in the register of his army; according to it the tribe counted 10,000 fighting men.

The first skirmish of British troops with the Afriids dates back to the invasion of Afghanistan during the first Afghan War of 1839-42. From the annexation of the Panjāb in 1849 to the formation of the North-West Frontier Province in 1901 no less than eight expeditions were required against these unruly tribes. The first was against the Kohāt Pass Afriids in 1850. In 1855, troops were sent against the Dīawāl Afriids, a clan of the Adam Khēl Afriids. Punitive measures were necessary against the Āka Khēl Afriids in 1855. Expeditions were necessary against the Dīawāl Afriids in 1877 and 1878; and against the Zakka Khēl Afriids in 1878 and 1879. The Zakka Khēls of the Khyber and the adjacent Bāzār valley of Tirah have been the most contentious of all the Afriid clans. Inhabiting lands stretching from the slopes of the Saif Kūh to the border of Peshāwar they have been able to force their neighbours to pay exorbitant tolls for the privilege of passing through their territories. The first agreement with the Zakka Khēls was during the Indian Mutiny of 1857 (Aitchison, *al.*, 32-6). This was observed until the Second Afghan War, 1878-80, when the peace of the Khyber and the whole frontier zone was abnormally disturbed. Zakka Khēl attacks on the Khyber lines of communication forced the British, in 1878 and 1879, to enter their country, destroy their crops, and raze their forts and villages to the ground. On 17 Feb. 1881, the Khyber Afriids, together with the Loargī Shīwārīs of Landi Kotal, accepted responsibility for the safety of the Khyber; and in return for the recognition of their independence, agreed to have no dealings with other foreign powers. At the same time arrangements were made for the protection of the Khyber by a force of *gandāwāz* (tribal levies), to be paid by the Government of India (Aitchison, *al.*, 37-9). The Afriids were the last to join in the general frontier confederation of 1897 and were only forced to come to terms after extremely severe fighting in the Tirah campaign of 1897-8. At the end of this campaign the previous system of allowances, which had proved so successful for seventeen years, 1881-97, were once more adopted. At the same time the Khyber Rifles were reorganised under British officers supported by a movable column at Peshāwar. This agreement, under which the British became

responsible for the Khyber Rifles and for the safety of the pass, regulated British relations with the Afriids until the year 1908 (*Parliamentary Papers*, 1908, lxxiv, Cd. 4210, pp. 14-5).

Towards the end of 1904 large numbers of Afriids visited Kabul. This was followed by small marauding incursions into British territory, in which the Zakka Khēls, assisted by other Afriid clans, by Orakzāys, and even by bands of Afghan outlaws, such as the Hazāma gang, were the chief offenders. From 1905 to 1908 bands of well-armed Afriids ravaged the British borders. An attack by a gang of about eighty men upon Peshāwar city, on the night of 28 January 1908, exhausted the patience of the Government of India, and in that year the Zakka Khēls were specifically ordered by troops under the command of Major-General Sir James Willcocks. The entry of Turkey into the First World War, in November 1914, created considerable excitement on the frontier. One of the great dangers on the frontier has always been the possible attitude of the Afriid clans whose lead in war the other tribes are usually prepared to follow. Fortunately for the peace of the Peshāwar frontier, and possibly of the whole frontier, the mission of the so-called Turkish generals to Tirah failed because of a shortage of funds. The danger of an Afriid rising was averted when, on 1 February 1915 the Government of India decided to double their allowances.

Quickly following the wake of the 1914-8 war came the Third Afghan War of 1919 which was the signal for risings along the entire frontier, and for the collapse of Lord Curzon's militia scheme. By 1921 the Afriid clans had made full submission. The Khyber Rifles were disbanded and their place taken by *khatāsādris*, tribal levies paid by the Government of India but providing their own arms and ammunition. But there was a great danger of a recrudescence of Afriid raiding because of the intrigues of the Āka Khēl *mulla*, Sayyid Akbar, who denounced all tribesmen who had accepted British terms. His activities were checked when, in April 1921, the Afriid tribal *dīrwa* accepted new allowances in compensation for the increased tribal responsibility involved in the construction of the Khyber railway (*Secret Border Report*, 1921-2, p. 1). In February 1922 the Zakka Khēls agreed to pay a substantial fine for their past misdeeds. In the following year the peace of the Afriid country was rudely disturbed by the exploits of the Kohāt gang. Members of this gang were forced to seek refuge in Afghan territory where their immunity from punishment led to a diplomatic protest on the part of the Viceroy. The opening of the Khyber Railway from Dīamrūd to Landi Kūhna did not make for peace. The construction of this line had been a source of profit to the tribesmen and it had completely reduced their allowances. From 1927 to its settlement in March 1930 Tirah became the scene of a religious struggle between its Sunni and Shī'ite clans. In the spring of 1930 the Afriids came under the influence of Indian National Congress agitators with the result that Afriid *laghurs* (tribal forces) entered the Peshāwar district and attacked the city of Peshāwar in June and August of that year. By the end of August all raiding gangs had been expelled from the district. Since 1927 the Government of Pakistan has been responsible for the control of the Afriid clans. As recently as December 1952 the Afghan government has been accused of granting asylum to Afriid outlaws who had been organising depredations into Pakistan.

**AFRĪDŪN** (see FARĪDŪN).

**AFRIN** important right tributary of the Orontes (al-'Asī [q.v.]), which it reaches after joining with the Nahr Yāghūr (Murād Paḡhā) in the Lake of Antioch and the Nahr al-'Aswad (Kara-sū), in the 'Arab. Its wide middle valley, between the Djabal Sīmān and the Kurd-dagh, was known in the Middle Ages as the district of the Dīma. The importance of the valley was due to the crossing of the road, which used it to connect Antioch with the districts of the upper Euphrates, with the roads which led from Cilicia and Asia Minor towards Aleppo and inner Syria. One of these roads, after passing the Amanūs at the end of Bagdāḡ [q.v.] and following the shore of the Lake of Antioch, crossed the 'Afrin at the ford near modern Bellāne (the 'Ford of the Baleine' of the Crusaders). In the first centuries of Islam it was guarded on the south side by the small fortresses of Tāfā, Arīth, 'Imm and since the time of the Crusades by that of Hārim [q.v.], which lay nearer to the Orontes. The other, more northerly roads issued, after passing the Kurd-dagh, at the gap of 'Azāz and passed the 'Afrin either at the bridge of Kibār (now 'Afrin) or further up below the old capital of the region, Kūris (Cyrrhus). The new capitals were 'Azāz, outside the real basin of the 'Afrin, and Rāwāndīn—of which important ruins are still preserved near one of the 'Afrin's sources. Thus the valley of the 'Afrin served in the classical period of Islam as the main longitudinal line of communication in the western part of the military district of the 'Awāsim [q.v.]. It was temporarily captured from Islam by the Byzantines in the 4th-5th/10th-11th centuries, and by the Crusaders in the first half of the 6th/12th century. At present it lies athwart the political and ethnical boundary between Turkey and Syria.

**Bibliography:** The main medieval work on the geography of northern Syria is Ibn al-Shaddād's *al-'Aḡā al-Khāṣira fi Dhikr Umard* (al-Shām wa'l-Dīarīa, partial ed. by Ledit, *Maḡ.*, 1935; complete ed. for Northern Syria) by D. Sourdel, to appear shortly. Modern accounts: R. Dussaud, *Topographie historique de la Syrie*, Paris 1927; E. Houtemann, *Die Ostgrenze des byzantinischen Reiches*, Brussels 1935; Cl. Cahen, *La Syrie de Nord à l'époque des Croisades*, Paris 1940; M. Canard, *Histoire de la dynastie des Hamdanides*, I, Algiers 1951. None of these deals with the Ottoman and modern periods, for which see *Guide Hiss: Syria-Palestine*. For physical geography see S. Mazloum, *L'Afrin, étude hydrologique*, Paris 1939. (CL. CAHEN)

**'AFRĪT** (see 'IRĀT).

**'AFS** denotes, according to Arab authors, the fruit of the oak or a similar tree and the tree itself. It actually is the gall, an excrescence which forms on certain kinds of trees and shrubs as

the result of the sting of various insects. The Arabic term, however, was probably applied to the oak-gall in particular. It was maintained that the 'afs is produced either simultaneously or alternately with the acorn.

In medieval Arab medicine the gall served chiefly as an intestinal astringent and a remedy for skin diseases. It was also said to strengthen the gums and preserve the teeth from caries. In different preparations, chiefly in powdered form or boiled in vinegar or wine, it was applied both internally and externally. Frequent mention is also made of its use as a black hair-dye and as the main ingredient in the manufacture of ink. Recipes for the latter are indicated by al-Kalkāshandī.

**Bibliography:** Dā'ūd al-Antākī, *Tadhkira*, Cairo 1935, i, 228; Ibn al-'Awwām, *Fidāha* (transl. Clément-Mullet), ii/b, 263; Ibn al-Bayṭār, *Dīwān*, Būlak 1291, iii, 127-8; Kalkāshandī, *Subh al-Aḡā*, ii, 454-6; Kazwīnī (Wüstenfeld), i, 259; I. Löw, *Aram. **AFSANTIN**, *afsanīn* or, more rarely, *irsanīn* (from Greek *ἀλφεινός*) mostly denotes the common wormwood (*Artemisia Absinthium* L.) but also other similar kinds of plants. In medical writings it is often called *kaḡhūth rāim*. The cognate form *afīnt* (absinth-wine) already occurs in ancient Arabic poetry (Nöldeke, in Löw, 389).

A good deal of the information which Arab authors offer on the *afsanīn* goes back to classical sources. Its different kinds were generally classified according to their origin: Persian, Nabataean, Syrian, Egyptian, Khurāsānian etc. That from Tyre and Tarsus was considered the best. The yellow flower in particular was put to diverse medicinal uses. Not only tonic and vermifug but also laxative, diuretic and other properties were attributed to the plant. It was also recommended as an antitoxic. Externally it was used in plasters, oils etc. Its juice mixed with the ink was said to preserve the paper. In addition to many other applications it was also employed against the loss of hair (*dā' al-thalāb*).

**AFSHĀR** (or *Awshār*), *Oghuz* (Ghuzz [q.v.]) tribe, first mentioned by al-Kāshgharī, *Divān Luḡat al-Turk*, i, 56; cf. also Rashīd al-Dīn, *Dīwān al-Tawārīkh* (Bérezine), i, 32, according to whom Awshār was the grandson of Yildiz Khān, the third son of Oghuz Khān (whence Ya'qūtī-oglu, *Saldjūq-nāma*, in MS; Abu'l-Ghāṣī, *Shodire-ye Turki* (Desmaisons), 27; *idem*, *Shodire-ye Turki* (Istanbul 1937, 42). They seem to have migrated westwards with the other Ghuzz tribes. An Afshār chieftain, Aydoḡdu b. Kuzhdoḡhan, known as Shūmla, ruled in Khūzstān as a vassal of the Saldjūqs (al-Bundārī (Houtema), 230, 287; al-Rāwandī, *Rikāat al-Sudūr*, 260; Ibn al-Aḡṣir, index, s.v. Shūmla; Wansūl, ed. Bombay, ii, 149, writes

Ya'qūb b. Ardān al-Afshārī; "Husayn al-Dīn Shihābī" in Hamd Allāh Mustawfī, *Ta'wīḡh-i Gharāib*, I, 347—whence Bīdīstī, *Shāra-nāma* (Vāqanīnawī, Zamnawī), I, 35—seems to refer to the same person and to be due merely to a textual error), Shūnī, who ruled 543–79 (1148–74), was followed by his son Ghāz (or Hāz) al-Dawla (al-Rāwandī, 377); after his death in 590/1194 the family's rule came to an end. No further information about the Afshār is available in these early centuries; this may simply be due to the fact that authors often speak of Turkmen in general without specifying their exact tribal affinity.

As is well known, the usual practice was to allocate a particular district as an *ahāl* (*hiyal*) to a chieftain, who would take with him his clan and whose office was inherited by his descendants; this practice was followed, no doubt, also in the case of the Afshār. Afshār chieftains are mentioned during the rule of the Ak Koryūn (e.g. Maṣṣūr Beg Awshār, 877/1472–3, Hasan Rūmlu, *Akhan al-Tawāriḡh*, in MS, chapter on the Ak Koryūn; Dawūdī, *Arā-nāma*, MTM, v, 298, Engl. transl. in *BSOAS*, 1940–2, 356, 374; Maṣṣūr Beg, *du chahār Shihābī*, 904/1498–9, 906/1501–2, idem, ed. Sordani, *Bārīda* 1931, 21 ff. 59; Fird. Beg, *Shihābī*, 1498–9, ibidem, 24). The Afshār played a part in the establishment of the Safawid dynasty (cf. Khān. *Naṣṣ*, 1334/11, 13). High dignitaries of Afshār origin are also mentioned in the Safawid chronicles (e.g. *Akhan al-Tawāriḡh*, 236, 332, 339, 345, 435; Iskandar Munshī, *Ta'wīḡh-i Akhan-i-yi 'Abbāsī*, I, 155, 185, 190, 251, 309 ff., 400, iii, 263; *Taḡhbirat al-Irām* (Munroky), 16).

Under the Safawids we find Afshār clans in various districts, and their chieftains occupied provincial governorships. Afshār *khān* ruled in the district of Kōh Gilū; the tribesmen of this region belonged mainly to the Gūndūzlu and Arāghlu clans (see *Ta'wīḡh-i Akhan-i-yi 'Abbāsī*, 199, 340–4, 358 and 408). After the revolt of 1005/1607 their rule came to an end, most of the clans that escaped punishment were scattered and only small remnants survived by the beginning of the 19th century.

The Gūndūzlu and Arāghlu played an important role in Khūzestān. In the beginning of the 16th century we find in Diwāl and Shughlār Afshār governors like Mahdī Kūh Sulṭān and Haydar Sulṭān. When the governor Mahdī Kūh was killed in 946/1539–40, the Afshār Haydar Kūh charged with his punishment (*Akhan al-Tawāriḡh*, 294 ff.). [For the Afshār governors of Shughlār, see *SHUGHAR*.] After Nādir Shāh, the Afshār in this region were weakened by the continuous attacks of the Arab tribes of the neighbourhood. According to C. A. de Bode, *Travels in Luristan and Arabistan*, London 1845, some Afshārs were removed from Duruk and transferred to Kangāwar, Asadābād and Urmīya, while a smaller portion were settled in Shughlār and Diwāl.

Afshār governors ruled for two and a half centuries, from the time of 'Abbās I till about 1250/1834–5, in Khāzārīn (180). We find governors belonging to various Afshār clans also in other regions: Isfahān in Yazd, Kirmānshāh, Mōsul and Rūmīya, Isfahān, Kirmānshāh and Kirmān in Khūzestān (Abīwardī, Farāh, 1812f.).

In the vicinity of Urmīya, Afshārs were settled in the time of 'Abbās I (the tradition in the text translated by Nikitine, that they came there with Timūr in 802/1400, has no foundation). Kāsim Khān, a distinguished general of 'Abbās I, chieftain of the Isfahān, settled with his tribe, shortly after

1030/1622–3, in the regions of Urmīya, Sā'ib Kā'ā and Sulṭān (*Ta'wīḡh-i Akhan-i-yi 'Abbāsī*, 263). His son, Kā'ā 'Alī Khān, was governor in 1037/1627–8, and was followed by other Afshār governors; Khūzestān Beg Kāsim (the Kāsim clan probably derived its name from Kāsim Khān) took the title of *begherbeg* in 1119/1702. (For further details see R. Nikitine, *Les Aghas d'Urmia*, *J.A.*, 1929, 71 ff. and URMIA; cf. also *SA'IB KĀ'Ā*.)

In general, the Afshār played an important role in the wars of the Safawids against the Ottomans and the Uzbeks, though, as we have seen above, 'Abbās I, according to his policy in general, tried to break the particularist tendencies of the clans. During the reign of Nādir Shāh, who himself came of the Kirmān branch of the Abīward district, Afshār *amirs* were prominent. Some Afshār chiefs played important roles during the troubled period after Nādir's death. Afshār contingents were an important element in the Kādjār army and were used in the suppression of revolts as well as against external enemies.

According to Joannin (quoted in Langles, *Voyages du Chevalier Chardin en Perse*, Paris 1811, x, 243) the Afshār counted at the beginning of the 18th century 800–900 souls (repeated by Ritter, *Asien*, viii, 400–3; etc.). This may, however, refer to the number of tents. (Detailed statistics according to localities are also given there.) For the same period, cf. also P. A. Jaubert, *Voyages en Arménie et en Perse*, 225; Zayn al-'Abidin Shīrwānī, *Bāstān al-Siyāḡā*, 106 (the numbers seem exaggerated). For more modern times see Maṣṣūr Kāshān, *Zayn al-'Abidin al-Siyāḡā*, Tehran 1310–1, ii, 86 (Isfahān in Fārs, as part of the *lāh-i Khāma*); 106 ff., 112, 163 (Isfahān and Afshār in the vicinity of Ardabil, Mighlān, Zārand, and especially Sīwa and Kāzwin [cf. also *ghān* *SKWAN* and *KHANSA*]; 90 (clan called Afshār as part of the Akadger in Kōh Gilū—cf. also *Fārs-nāma-yi Nādirī*, ii, 270); 92 (Gūndūzlu near Shughlār and Diwāl, completely assimilated); 92, 233 (Afshār in Kirmān); cf. also 75 and 374 (their name in geographical and administrative nomenclature); Mehmed Hasan Bahārī, *Asarabāyān*, Baku 1921, 73 (Afshār in the Republic of Agharbayān); for an earlier time, cf. Ewliyā Celebi, *Siyakat-nāma*, ii, 259, 859, iv, 284, 317; G. Jarring, *On the distribution of Turk tribes in Afghanistan*, Lund 1936, 67 (settled Afshār settled in Afghanistan) by 'Abbās I, others by Nādir Shāh).

Just as Afshār elements were (as noted above) attached to other tribes, so also we find Afshār clans, which, to judge by their names, must have originally belonged to other tribes: the Shāmlu and Djalā'ir in Urmīya (mentioned by Nikitine) who were probably detached from the great tribes of the same name; the same is true of the Tukān and Amīrī (O. Mann, *Das Muḡmil al-Tārīkh-i bā'ī Nādirī*, 31).

Afshārs figure among the Turkmen who lived during the Mamlūk period in Syria, especially Aleppo (cf. e.g. al-Kalkashāndī, *Subḥ al-Afshār*; Ibn Taghribirdī (Popper), vi, 225, 364, 557). They seem to have played a role in the establishment of the principality of the Karānān-oghla (q.v.; see C. Cohen, in *Dzaynaw*, 1932, 133). In the Ottoman period various branches of the Afshār are mentioned (Radjab-oghlu near Kalāt Dja'bar: Hādījī Khālīfā, *Dhikr-nāma*, 593; in documents: Radjābāli Awshār, A. Relik, *Anadolu türk asiretleri*, İstanbul 1930, 145, 165–76, 186, 309, 339; Kara Awshār, Kara Gūndūzlu Awshār, Bahārī Awshār, ibid., 106, 102). These tribes, who were also known under the

collective name of Yenī İli, spent the winter in Syria and the summer in Anatolia, near Zamaṭī. The government made continuous efforts to settle them (Awshār villages near Isfahān, *Dhikr-nāma*, 640; 264, 293; Abū Tamīmīn, *Diwān*, 107, 262, 326 f.; Barthold, *Turkestan*, 210–1; Browne, i, 330 ff.; E. Herzfeld, *Gesch. der Stadt Samarra*, Berlin 1948, 101, 238–52. (W. Barthold-H. A. R. Ginn) AFSUN (v.), charin, incantation; for etymology and usage in old Persian, see Salemann, in *Gr.I.P.A.* II, 304, and especially H. W. Bailey, in *BSOAS*, 1931–5, 283 ff. This word is now used in Persia to designate especially a charm against the biting of poisonous animals; certain *darwishes* who pretend to have the power to charm serpents, scorpions etc., will, for some gratuity, communicate their invulnerability to other persons. Often it is one part of the body which is so protected, as for instance the right or the left hand, and it is with this that the animals of this kind must be seized (Polak, *Persien*, I, 348).

(CL. HUARTE)

AFSHĪN, pre-Islamic title borne by the native princes of Ughrūsāna, the mountainous district between Samarkand and Khujānda, including the upper course of the Zarafshān river (Barthold, *Turkestan*, 163–9). This province was subjected to the Arab governors of Khurāsān by an expedition commanded by al-Fadl b. Yahyā al-Barmakī in 178/794–5, but it was only after an internal conflict and a second expedition under Ahmad b. Abī Khālid in 207/822 that the ruling *afshān* Kāwūs accepted Islam. Kāwūs was succeeded by his son Khayyār (in Arabic texts generally: Haydār, who became universally known in Islamic historiography as *al-Afshār*). He first came to notice in the reign of al-Ma'mūn, when as an officer of the Caliph's brother Abū Ishāq al-Mu'tasim, the titular governor of Egypt, he was given charge of Barqa (Cyrenaica) and vigorously suppressed the rising of the Copts and Arabs in the Delta in 216/831. He is credited also with forming al-Mu'tasim's regiment of "Mughāshar" by recruitment from the Arabs of the Delta and the Western Desert.

During the reign of al-Mu'tasim (218–27/833–41), the Afshān's chief exploit was the tenacious campaign which he maintained without interruption in 220–2/835–7 against the Khurānī rebels in Agharbayān led by Bishāk (q.v.). In reward for his success the caliph gave him a crown, two jewelled sceptres, the government of Sind in addition to that of Armenia and Agharbayān. He played also a prominent part in the celebrated Amorium campaign conducted by al-Mu'tasim in person in 223/838. Subsequently, out of rivalry with 'Abd Allāh b. Tāhir (as the leading native prince of the Transoxanians, he appears to have resented the control exercised over Mā warā' al-Nahr by the parvenū Tāhirids), he secretly encouraged the revolt of Māzīyār (Muhammad b. Kārim), the *ipshābkhān* of Tābaristān, and was consequently involved in the latter's defeat, charged with apostasy, and after a celebrated trial started to death in his prison at Samarrā in Shā'ban 226/May–June 841.

The title of *afshān* was borne also by other princes in Central Asia, according to al-Yā'qūbī (ii, 344), Ghūrak, the prince of Samarkand, calls himself in his treaty with Kutayba b. Muslim "Ishābkhān of Suḡd, Afshān of Samarkand"; cf. also B. Spuler, *Iran in früh-islamischer Zeit*, 357, n. 14. Bibliography: Tābarī, iii, 1105, 1171–1318 passing; trans. Zotesberg, iv, 523–45; trans.

(CL. HUARTE)

AFSŪS (AFSŪS), poetical name of Mir Shīr 'Alī, the son of Sayyid 'Alī Muḡaffar Khān, and descendant of the Prophet through Imām Dja'far al-Sādk. His ancestors dwelt at Khā'm in Fārs. One of them, Sayyid Dawl al-Dīn, the Thawr of Sayyid 'Alīm al-Dīn Hādījī Khān, came to India and settled at Narnaw near Agra. Sayyid Gulām Muḡaffar, the grandfather of Afsūs, came to Delhi during the reign of Muhammad Shāh (1719–48), and was an associate of Nawwāb Sanjam al-Dawlah Khān. Afsūs was born at Delhi and received a liberal education. On the assassination of the Nawwāb (1747), when Afsūs was 11 years of age, his father took him to Patna; later on, after 1760, they removed to Lucknow, where Afsūs settled, supported by Nawwāb Sālar Dja'ng the son of Ishāq Khān, and became an associate of Mirzā Dja'wān-bakhsh (Dja'han-dār Shāh), the eldest son of the emperor Shāh 'Alam.

After living some years at Lucknow, he was brought to the notice of the Resident, Colonel W. Scott, at whose recommendation he went to Calcutta in 1215/1800–1, and was appointed Head *Munshi* in the Hindustani department of the College at Fort William.

Afsūs wrote a Hindustani *Dīwān* during his residence at Lucknow. He also made there a translation of the *Gulistan* of Sa'dī, which was completed in 1216/1801, under the title of *Bīgh-i Urdā*. The introduction to this translation contains an autobiographical sketch, which is the principal source of our information regarding his life. Whilst at Calcutta, he edited the *Kulliyāt* of Sawda, and revised the Hindustani translations of Persian works, which had been prepared by *mawḡils* of the College. He also made a translation of the first part of the *Khulāṣat al-Tawāriḡh* or a Persian history of Hindustan written by Munshī Sudjān Rā's of Patiala in 1207/1695–1696. This work, undertaken at the instance of J. H. Morington, was completed in 1220/1805 under the title *Arā'iq-i Mahfil*, and was first printed at Calcutta in 1808. John Shakespeare translated the first ten chapters of this work into English and included them in his *Muntahabāt Hindī*, Dublin 1847. A complete English translation was made by M. J. Court and published at Allahābād, 1871 (2nd ed. Calcutta 1882). According to Garcin de Tassy and Sprenger (*Oudh Catalogue*, 198), Afsūs died in 1809.

[J. P. BLEMMERD-SR. INAYATULLAH] **AFTASIDS** (BANC 'L-AFTAN), small Hispano-Muslim dynasty of the 5th/11th century, which reigned during the period of the *mulūk al-tawā'if* of al-Andalus over a vast territory in the western part of the Iberian peninsula, with Badajoz (Batalayya) as its capital.

On the dismemberment of the caliphate of Cordova, the "Lower March" of al-Andalus (al-*dhaghir al-andal*), consisting of the middle valley of the Guadiana (Wādī Ānā) and the central portion of modern Portugal, passed into the possession of a liberated slave of al-Hakam II, Sābūr, who, according to the custom followed in Muslim Spain at that period, took the title of *hādhī*. Sābūr, whose epitaph has been preserved and who died on 10 Šabā' al-ġā' 418/November 1022, took as his minister a man of letters of Berber origin, belonging to the group of Miknās established in the Fāls al-Balīd, north of Cordova: 'Abd Allāh b. Muhammad b. Maslama, surnamed Ibn al-Fāls. The latter did not hesitate to usurp power, when Sābūr died, leaving two sons under age, and founded the dynasty of the Aftasids of Badajoz, sometimes also called Banū Maslama.

'Abd Allāh, who took the honorific *ṭabāḥ* of al-Manṣūr, reigned until his death, which, according to his epitaph, also preserved, occurred in Badajoz on 19 Dhu'l-ḥijja 417/30 Dec. 1025. Few details are known of his reign, which seems to have been peaceful and fruitful for his principality at first, but was later troubled by the bad relations which soon obtained between al-Manṣūr and his neighbour in Seville, Muhammad b. 'Abd al-*ḥ* (ʿAmmār). The latter even captured him at Beja (Bāja) and kept him prisoner for some time.

'Abd Allāh was succeeded by his son Muhammad, but known under his *ṭabāḥ* of al-Manṣūr. The historians are unanimous in praising his deep learning and literary taste, and record that he appreciated but little the contemporary poets, who in his opinion were incapable of producing anything to equal even remotely the poems of al-Mutanabbī and al-Ma'arri. He is attributed with the authorship of a large work, no doubt an anthology, in no less than fifty volumes, entitled *al-Muṣawwar*. The fact that the book is very rarely quoted proves that it was not widely known even in Spain.

The reign of al-Muṣawwar, which lasted for twenty years, was extremely troubled from the political angle and almost entirely occupied with a tenacious but ineffective struggle against the city of Seville, al-Mu'tadid. In spite of the attempts of the prince of Cordova, Ibn Dīnār (cf. *ĠANAWARIS*) to arbitrate in the conflict, the almost continuous hostilities greatly weakened the kingdom of Badajoz and induced Ferdinand I, king of Castile and León, to attack it and impose a tribute upon it. In 449/1057 the northern frontier fortresses of the Aftasid kingdom, Viena and Lanega, passed in this way into the possession of the Christian king, who in 450/1058, by the capture of the city of Cúmbra (Kūmariyya)

and of the whole region between the rivers of Douro (Duro) and Mondego, marked one of the decisive stages of the Reconquista.

At the death of al-Muṣawwar, who only survived for a short time this grave amputation of his dominions, he was succeeded by his son Yahyā al-Manṣūr, who was challenged by his brother 'Umar, governor of Evora (Yābura) and soon disappeared from the scene. 'Umar, who took the *ṭabāḥ* of al-Muta-wakkil, was exposed, like all the *mulūk al-tawā'if* of his epoch, to the increasing demands of the Christian king Alfonso VI, who in 471/1079 took from him the fortress of Coria (Kūriya). He seems to have been the first, even before the capture of Toledo by Alfonso VI, to solicit the intervention of the Almoravids in Spain, but eventually, like all his neighbours, he was unable to resist the growing aggressiveness of the Christian king, and had to comply with his demands for tribute. His attempt in 472/1080 to add the kingdom of Toledo to his dominions, following on the offer made to him by the inhabitants of Toledo themselves, failed in spite of the fact that he stayed for ten months in the Elgu 'Zūrid capital. He was present at the battle of al-Zūlā' (48-5), which took place within his own territory on 12 Rajab 479/23 Oct. 1086, and had a hand in the intrigues which finally decided the Almoravids to dethrone all the *mulūk al-tawā'if* of al-Andalus and annex their possessions. Feeling himself menaced, 'Umar al-Muta-wakkil turned towards Alfonso VI and solicited his help, in return for the cession of Santarém (Santaral), Lisbon (al-Ughbina) and Cintra (Sintaral). But all this was in vain, and Badajoz was taken at the end of 487/1095 by the Almoravid general Sir b. Abi Bakr, with the connivance of the inhabitants, who had enough of the fiscal exactions of their king. Al-Muta-wakkil and two of his sons, al-Faḍl and Sa'd, were taken prisoner and sent to Seville, but even before their arrival there they were executed. Another son of al-Muta-wakkil, al-Manṣūr, escaped, fortified himself for some time in the castle of Montánchez, in the modern province of Cáceres, and finally, together with his followers, migrated into the dominions of Alfonso VI and was converted to Christianity.

**Bibliography:** All the chronicles of the period of the *mulūk al-tawā'if*, especially *Ḥisāb*, as quoted by Ibn Dīnār. (*Ḥisāb*: Ibn Dīnār, *Ḥisāb*, iii, index; Ibn al-Khaṭīb, *ʿAṣn al-ʿAṣm* (Lévi-Provençal), 211-5. The narrative in the *Memoirs* of 'Abd Allāh b. Buluggin (g.u.) which relates to the reign of al-Muta-wakkil is by far the most detailed and trustworthy source. Hoogvliet, *Specimen e lit. orient. . . . de regis Alphonso VIII. familia*, Leiden 1839, is antiquated. See also R. Dozy, *Hist. Mus. Esp.*, iii, index; A. Prieto y Vives, *Los reyes de la casa de Badajoz*, Madrid 1926, 48; R. Menéndez Pidal, *La España del Cid*, Madrid 1947, index; E. [E. LÉVI-PROVENÇAL]

**AL-AFWAH AL-AWDI**, Arab poet, chieftain of the Awd clan of Maḍhij, about the middle of the 6th century A.D. Most of his extant poetry celebrates the warlike virtues of his tribe and of its chief, while his gnomes poems caused him to be counted among the sages of the *ḍiḥkiyya*. Al-Dībātib, however (*al-Hayawān*), vi, 280, doubts the authenticity of the poems attributed to him, and the arguments which he presents are to the point.

**Bibliography:** The *diwan* of al-Afwah al-Awdi was published in *al-Tarā'if al-Adabiyya*, Cairo 1937; L. Cheikho, *Shi'ar al-Narā'iyiyya*, 70-4; it was introduced into Spain by al-Nāḥil, who had received it from Ibn Durayd (*BAH*, ix, 396). Verses and biographical notes are to be found in *Ḍiḥat Hayawān*, index; idem, *Hayawān* (Sandil), i, 271; Ibn Kutayba, *Shi'r*, 110-11; idem, *Uyūn al-Aḥbār*, iii, 113; Kāll, *Amāl*, i, 125; *Aghābi*, xi, 41-2; Barbier de Meynard, *Sarumna*, 45, (offprint from *J.A.*, 1907); Brockelmann, *S*, 1, 377; Nallino, *Scritt.*, vi, 29 (French transl. 48).

**AFYUN**, opium, from Greek ὀπύον, diminutive of ὀπός, "vegetable juice". Opium is the dried resinous juice of the unripe capsules of the opopy (*Papaver somniferum* L., in Arabic *ḥashish*), the preparation of which is already described by classical authors, e.g. by Dioscorides, iv, 64. (For opium in Antiquity see Pauly-Wissowa, s.v. Mohn). In Islamic times it was used officially and as a narcotic (also by *darwishes*). The poppy had long been cultivated in Upper Egypt: according to Kühn al-Aṭṭār, 128, in his time (7th/13th century) the best opium was prepared in Abū Ṭūl, S. of Asyūt. The cultivation of the poppy and the preparation of opium flourished in Egypt until the beginning of the 19th century. (Cf. Lane, *Modern Egypt*, i, 118, 4, 35). The cultivation of the poppy in Asia Minor does not seem to go back to the Byzantine period. It apparently spread after the Crusades, and under Turkish rule the plant was acclimatised especially in the neighbourhood of Kara Hisar, which received the nickname of Afyūn Kara Hisar (g.u.). This town was the centre for the cultivation and the export of the opium as late as the 19th century (cf. O. Blau, *Erwartung des Opium*, ZDMG, 1869, 280). In Persia, as well as in Turkey, opium is often called *firyāsh*, "antidote". When 'Abbas II tried to enforce the prohibition of wine, the consumption of opium grew to such dimensions that he was forced to soften the prohibition and take measures, instead, against the trade in opium (1621; P. della Valle, ii, 208). Yazd and Isfahan used to export opium to India and Turkey. (See Chardin, *Voyage*, Amsterdam 1735, iii, 141, 92 ff.; H. 58-67; E. Polak, *Persien*, Leipzig 1865, ii, 248-55; and the vivid description of opium-eating by E. G. Browne, *A Year among the Persians*, index.) Opium played a considerable role also in India, where the decoction of the husks was called *pot* (cf. J. Charpentier, *Pot*, BSOS, 1935-7, 101 ff.; especially for the Mughal period: According to B. Lauffer, in *Touring Pao*, 1916, 464 (cf. also O. Franke, *Geschichte d. Chines. Reichs*, ii, 557, iii, 428) the knowledge of preparing opium came to the Chinese from (medieval) India and not from the Muslims (contrary to the assertions of scholars such as J. Edkins, *The Poppy in China*, 3; E. Bretschneider, in A. D. Canolle, *Origin of Cultivated Plants*, 400; Yule and Burnes, *Hobn-Johns*, 642; Giles, *Glossary of References*, 200, who derive the Chinese names of opium from the Arabic).—For the adulteration of opium by dishonest merchants (by admixture of various resins, or sandarac, etc., see E. Wiedemann, in *SBPMS Erl.*, xlv, 1914, 176-206).

**Bibliography:** Abū Manṣūr al-Muṣawwak, *Abniya* (Seligmann), i, 36; Ibn al-Awāmm, *Filāḥ*, transl. Clément-Mullet, ii, 128 ff.; Ibn al-Bayṭār, *Diwān*, i, 45, transl. Leclerc, no. 116 and 2120; Kaswini (Wüstenfeld), i, 282; *Tuhfat al-Aḥbāb* (Renaud-Colin), 40; I. Low, *Die Flora der*

*Juden*, ii, 364-70; M. Meyerhof, *Un glossaire de matière médicale comp. par Maimonide*, no. 35, (cf. 280 no. 401); Milliet, *L'opium et le kachich*, *La Géographie*, 1912, 135 ff. (C. E. DEBILAS).

**AFYUN KARA HISAR** (modern spelling: AFYONKARAHISAR), more correctly AFYUN KARA HISAR, "Opium Black-Castle", at present also simply AFYON, formerly Kara Hisar-i Sāhib (in Negh, ed. Ankara, 64 = ed. Berlin, 21 = Leuclavia, *Hist. Musulm.*, Frankfurt 1937, col. 140; Sāhibūn Kara Hisar, *Principes Muscovitum*; Subcarassus in Caterino Zeno, *Commentarii del Viaggio in Persia*, Venice 1558, 148), town in western Anatolia, 38°50' N, 30°30' E, about 1007 m. above sea level, on the stream Akarçay, which flows into the Eber Gölü, and then into the Akşehir Gölü, at the foot of an isolated and steep trachyte cone which rises from the plain to a height of 200 m. above the town surrounding it. Kara Hisar-i Sāhib was the capital of a *sandjak* of the *evliyat* Anadolu (Hādhīdī Khalifa, *Ḍiḥat-namā*, 641), since 1281/1284 of a *sandjak* of the *evliyat* Khawānd-digār (Brusa); in modern Turkey Afyūn Kara Hisar is capital of the *vilayet* (il) of the same name, comprising the *hads* (ilā) Afyūn Kara Hisar, Bolwadin, Dinār Emirdag (Aṣriyye), Sandıklı and Şuhut. In 1943 the town had 29,050 (1930: 29,226), the *hads* 195, 667, the *vilayet* 135,600 (1930: 172,600) inhabitants; the *vilayet* has a surface of 13,555 sq. km.—The name Afyūn Kara Hisar, formerly only in popular, but at present also in official use (Tavernier, *Les six voyages*, i, 120 has: Aphion Carassar; Ch. Texier, *Asie Mineure*, Paris 1854; Aphion) comes from the rich production of opium in the district, already mentioned by Herodotus: *Les observations de plusieurs singularités et choses mémorables*, Paris 1555, 183 a (cf. O. Blau, in *ZDMG*, 1869, 280).

Kara Hisar-i Sāhib is identified with the Byzantine fortress of Akropolis, Akroynus, near which in 740 A.D. the emperor Leo III defeated the Arabs, and the legendary hero Sayyid Batlāl and his armies met their death (Theophanes, *Chronogr.* (de Boor), i, 390-411), and where the emperor Alexius I Comnenus negotiated in 1116 with the Saljuq prince Malikshāh (Anna Comnena, *Alexias* (B. Leib, Paris 1934-43, iii, 209)). It was apparently taken from the Byzantines by the Turks in the beginning of the 13th century, but no details are available. The inscription on the Alfiga köprüsü (RCA, no. 3658) shows that the town was Turkish in 666/1269. It was to Kara Hisar that the famous Saljuq vizier Sāhib 'Atā Fakhr al-Dīn 'Alī b. al-Husayn (d. 687/1288-9) from whom the town received its designation, retired with his treasures before the Karamlaniens. His sons, Tūgī al-Dīn Husayn and Nūrat al-Dīn received in fief in 1271 the whole territory of Kara Hisar, with Kutayba, Samsat, Ghungurum and Ak Şehir, later also Lüle (Laodicea on the Lycus, near the modern Deñil) and Khomas (ancient Chonae, modern Honaz); see Aksaraylı (Osman Turan), 74; Ibn Bībī (Houtsma), 308 (also mentioned, in connection with the sons of the Sāhib, p. 323, 327, 334; by Kara Hisar Dewele our Kara Hisar is meant). Lökli and Khomas fell into the hands of the Turkmen 'Alī Beg during the troubles of Ḍimirt (1277); he was, however, defeated in a successful campaign by the Sultan and killed near Kara Hisar (Ibn Bībī, 333). The latter descendants of the Sāhib 'Atā had to submit to the Gerniyan and finally lost their territory to them. (Ibn Faḍl Allāh al-'Umarī, *Musālik al-Aḥbār* (Taeschner) states in one passage, p. 31, that Karasir was in the possession of Ibn Tughul; in

another, p. 36 and 37, that Karasiri was in the possession of Ibn al-Saybi—by which no doubt the descendant of the Sāhib is meant—under the suzerainty of the Gerniyan; cf. also Ahmed Tewhid, in *TOEM*, 2nd series, ii, 303 ff. After this Kara Hisar shared in the vicissitudes of the principality of Gerniyan (q.v.), which soon became a dependency of the Ottomans and under Bayazid I actually belonged for a time to the Ottomans, from 792/1390 until its restoration under Timur, 805/1402. Nizār Paşa (d. 750/1349), son of Sulaymān-ghāh of Gerniyan, and other members of this princely family, are mentioned as heads (*chefs*) of the Newland colonies in Kara Hisar (see Ghilili Dedo, *Tadhkirat al-Sultān al-Mawlayy*, MS Vienna, no. 1257, fol. 54r, got = 'Ali Enver, *Sema' al-Ghāni-yi Edah*, Istanbul 1309, 48 f., 102). During Timur's invasion of Asia Minor after the battle of Ankara (1401), Kara Hisar also suffered from the raiding parties of the conqueror (Shārah al-Dīn 'Ali Yazdi, *Zafar-nāma*, Calcutta 1887-8, ii, 445, 457, 484, 492 = *Histoire de Timur-Bek*, transl. 1848 of la Croix, Delit 1723, iv, 21, 31, 60, 68; Dukas, *Hist.*, Bonn, 77).

In 852/1448-9 the principality of the Gerniyan-oghlu definitely fell into the hands of the Ottomans, and Kara Hisar with its territory became a *liva* (*sandak*) of the *eyâlet* Anadolu (cf. *Diğân-nūma*, 641). As a fortress near the Karānān-oghlu, it was, as long as Karānān remained independent, of military importance. At the beginning of the war with Uzun Hasan (877/1472-3) the prince Muṣṭafā retired to Kara Hisar and used it as a base for his expeditions against the Karānān-oghlu, the allies of the Persians (ʿAshikpaşa-zāde, *Ta'riḥ* (Giese), 1867; Sa'd al-Dīn, *Tūgh al-Tawāriḥ*, i, 534; Caterino Zeno, loc. cit.), and in 895/1480-90 it served as a base for the operations of Hersek-zāde Ahmed Paşa against the Egyptians who had invaded Karānān (Sa'd al-Dīn, ib. 63). Kara Hisar is often mentioned in connection with the revolts and struggles of contending pašas in the 17th century (1017/1602, revolt of Džellāl, 1043/1631, revolt of Baba 'Omər, 1066/1658, revolt of Abīza Hasan Paşa). In 1833 the town was temporarily occupied by Ibrahim Paşa, son of Muḥammad 'Ali Paşa. In 1836 Turkish war in 1923 it was occupied by the Greeks twice (28 March-7 April 1921 and 13 July 1921-27 August 1922). The war caused great damage to the town, which was, however, restored by reconstruction on a large scale under the republic.

The greater part of the scanty antiquities from the classical period seems to have been removed to the town from the ruins of the vicinity, notably Seydlir (Pyramus), *Isle* Kara Hisar (Doricum) and *Çifti Kasaba* (Synada). The town's landmark, the steep trachyte cone with the late Byzantine fortifications restored by the Gerniyan-oghlu (described by Ewliya Çelebi, *Seyahat-nāme*, ix, 29-34) bore as late as Niebuhr's time (1766) the name *Bek Haran Ka'esi* ("the fortress which gives refuge to the Bek"). It was never properly inhabited, and is now deserted, and was used occasionally for the internment of political prisoners (ʿAshikpaşa-zāde, *Ta'riḥ*, ed. Istanbul, 243 f., not in ed. Giese), and as late as 1802 for the imprisonment of the French prisoners of war from Egypt.—The other monuments from the epoch of the Sa'diyyas and the Gerniyan-oghlu, such as the Sübükler Türbesi, the Ulu Džami' of Khāḍija Beg and the mausoleum of Sültān Džiwān, as well as the Ottoman monuments, such as the mosque of Ahmed Gedik Paşa with its annexes (the *medrese* is at

present used as a museum; Ekrem Hakki Ayverdi, *Fatih devri minarisi*, Istanbul 1953, 252-58), still await detailed examination.—In addition to the inscription on the Alligie köprüsi, mentioned above, other inscriptions from the town are published in *RCIA*, nos. 4132, 4329, 4540 and 4667.

(J. H. MORDTMANN-FR. TARSCHNER)

**AGA** [see AGHA].

**AGADIR**, one of the names of a fortified enclosure among the Berbers, where chambers are allotted to the various families of the tribe for storage of grain, and where the tribe takes refuge in times of danger. The following are the areas where this ancient Berber institution survives: Djabal Nafusa (under the name of *gaor* = *kajr*, or *temidat*); Southern Tunisia (*gherfa*); the *Awāra* (*gdāa* = *ha'fa*); and in Morocco the Rif and more especially the Great, Middle and Anti-Atlas and the Siwa (*agadir* among the *Shāra* and *igra* among the Berbers of the Middle Atlas). The word *agadir* probably goes back to Phoenician *gadir* = Hebrew *gāḏir* "wall" (in fact the word has in the Sūs the meaning of "strong wall").

**Bibliography:** R. Montagne, *Un Magasin collectif de l'Anti-Atlas: L'Agadir des Ibouhna*, *Hesp.*, 1929; idem, *Les Berbères et le Mahakim dans le Sud de Maroc*, Paris 1930, 323 ff.; idem, *Villages et Kades Berbères*, Paris 1930, 9 ff.; Dj. Jacques-Monod, *Greniers Collectifs*, *Hesp.*, 1949, 97 ff.; idem, *Greniers-Cladettes au Maroc*, Paris 1951.

**AGADIR-IGHIR**, Moroccan town situated at the junction of the Moroccan High Atlas with the plain of Sūs, on the Atlantic coast. The town stands at the northern end of a large bay, at the foot of a hill some 800-900 feet high which is surmounted by a fort. The population numbers 30,111, of whom 7,518 are Jews and 6,062 Europeans (1952 census).

It is not clear whether a settlement existed there before the arrival of the Portuguese, although a letter from the inhabitants of Māssa to Emmanuel I of Portugal, dated 6 July, 1510 (*Sources inédites de l'Histoire de Maroc*, *Portugal*, i, 423) speaks of an *agadir al-arḥa* at that site. This suggests that an *agadir* existed there near which a travelling market was held every Wednesday. At all events, it was of no great importance. Leo Africanus mentions the

same settlement under the name Gartguessen ("Cape Kilma" named after a Berber tribe living round about the town).

In the second half of 1505, a Portuguese nobleman João Lopes de Sequeira, built a wooden castle there, perhaps to protect a fishing fleet, perhaps also, with the approval of his sovereign, to thwart the Spaniards in the Canary Islands who had designs of the southern coast of Morocco. The castle was situated near a spring, at the foot of the hill commanding the roadstead. The site still bears the name of Funt, although its official designation seems from the first to have been Santa Cruz do Cabo de Aguar, by reason of its relative proximity to Cape Ghir. This castle was purchased by the King of Portugal on 25 January 1513.

The establishment of the Portuguese at Santa Cruz caused a strong reaction among the Berber tribes of the Sūs. The members of the Diuptydy order, which had established itself in the Sūs 50 years previously, were able to exploit this antipathy for the purpose of a holy war, and some of them promoted the rise of the Sa'dids (Banū Sa'd), a family of *gharafa* coming from the Dar' (Dra'). The chief of this family, Muhammad, later entitled al-Kā'im bi-Amr Allah, was proclaimed war leader about the year 1510. From that date the Portuguese fortress was subjected to an intermittent, but nevertheless irksome, military and economic blockade, and to attacks which grew in severity as the power of the Sa'dids increased. In September 1540, the Sa'did king of the Sūs, Muhammad al-Shaykh, son of al-Kā'im, captured the hill which dominated Santa Cruz and concentrated there a strong force of artillery. The siege began on 16 February 1541 and ended, on 12 March, with the surrender of the Governor, D. Gutierre de Monroy, and the survivors of the garrison. A very detailed and lively account of these events can be found in the *Chronique de Santa Cruz*, the work of one of the besieged who, after 5 years' captivity at Tarfand and elsewhere, wrote this account of his adventures.

For many years Santa Cruz-Agadir was left deserted until the Sa'did sultan 'Abd Allah al-Ghālib bi'Allah (1557-74) built a fort on the top of Agadir hill to protect the anchorage from the Christian fleets. From then onwards Agadir was one of the points at which European traders regularly called, principally to take on cargoes of sugar (see especially *Sources inédites de l'Histoire de Maroc, 1ère série*, France, iii, 361). Agadir retained its role of trading port up to the founding of the Muslim town of Mogador (q.v. in 1773). Since that date, Agadir harbour has been little used.

The settlement achieved momentary renown in 1911 when the German gunboat "Panther" cast anchor in the roads to assert German claims there at a time when General Moine's column had just occupied Fez (1 July 1911). After the signing of the Protégé agreement, Agadir was occupied by French troops in 1913. Its population was then less than 1,000.

Since then, the town has developed greatly. It has become the chief town of one of the administrative regions of Morocco which comprises nearly 700,000 inhabitants. It owes its growth chiefly to the development of its agriculture and commerce and to the exploitation of its mineral wealth. The port of Agadir, constructed since 1914, has recently been enlarged.

(R. LE TOUNREAU)

**AGDĀL** (Berber), a term borrowed by the Arabic of Morocco, Algeria and Tunisia from Berber, with the same meaning as in that language namely "pasture reserved for the exclusive use of the landowner". In Morocco, however, the word has acquired the special sense of "a wide expanse of pasture lands, surrounded by high walls and adjoining the Sultan's palace, reserved for the exclusive use of his cavalry and livestock". Such enclosures exist in each of the royal cities, Fez, Meknes, Rabāt and Marrākush.

(G. S. COLIN)

**AGEHI**, Turkish poet and historian, d. 985/1577-8. His real name was Manfir. He was born in Yenide-yi Wardar (Giannitsa in Greek Macedonia), which was at that time an important centre. His career as *mudarris* and *hâfi* took him to various places; Gallipoli and Istanbul are mentioned by his biographers. Agehi was a poet of considerable renown in spite of the fact that no *divan* of his poems seems to have existed. He owed his fame, particularly, to a *hazida* addressed to his sweetheart, a young sailor, and composed in the professional slang of the Turkish sailors of his time and containing many terms borrowed from the nautical lingua franca, especially, terms belonging to the terminology of the galley; it was imitated by several poets of his time. Of Agehi's only known historical work, the *Ta'riḥi Ghāsi* *Sigirname*, describing Süleymān's expedition against Sigirvár, (see Babinger, 69) no manuscript is known.

**Bibliography:** The main sources for Agehi's life are the contemporary collections of biographies of Ottoman poets (*Tadhkirat* vi *Shu'ara*), by 'Ashli Çelebi, Khall-zāde Hasan Çelebi, Riyāḍi, 'Abdi, Beyānī, Kāz-zāde Fāḍlī and the biographical sections in 'Ali's *Kunh al-Aghābir*; none of these sources is published; excerpts in the article Agehi in Saadeddin Nüzhet Ergun, *Türk şairleri*, Istanbul 1936, i, 16-8, where also several of Agehi's poems are printed. The *hazida* in sailors' slang is published with a commentary in A. Tietze, *251. aslı Türk şairinde gömici dili, Agehi kasidesi ve tahmini*, *Türkşair*, *Memnâ*, 1951, 113-121 (with further bibliography).

(A. TIETZE)

**AGEI** [see AGAVE].

**AGHA**, a word used in eastern Turkish generally to mean "elder brother", sometimes in contrast to *rai*, "younger brother", but in Yakut (*aghi*) meaning "father" (cf. V. Thomsen, *Inscriptions de l'Orkhon Dikchirika*, 98 (880), in *Koybal-Karaghad* "grand-

father" and "uncle", and in Cawash, "elder sister". Among the Mongols it appears already to have been used as an honorific, the princesses of the imperial family being designated by it (cf. Quatremère, *Histoire des Mongols*, xxxix-xl).

In Ottoman Turkish *agha* (usually pronounced *ah* or even *ah*) means "chief", "master" and sometimes "landowner". It is also used for the chief servant of a household and occurs in combination with many words, e.g. *şarhı agha* ("market inspector"), *ahân agha* ("inkeeper"), *ahş agha* ("village headman") and *agahbey* ("elder brother" —cf. above— or "senior"). As a title, up to the reform period and in some cases even later, it was given to many persons of varying importance employed in the government service, for the most part in posts of a military, or at least a non-secretarial, character, being contrasted particularly with *efendi* (s.e.). The most notable *aghas* of this kind were the *Yeniçeri Aghası* (see *Yeni Çeri*) and most of the principal officers of the standing as opposed to the feudal army, and the *Uzenci* or *Rihab Aghaları* and most officers of both the "inside" and "outside" Services of the Sultan. The *ahş agha* was the *kahya* (*had-hada*) of the Grand Vizier who was entitled *agha*, though his duties were entirely administrative and secretarial—whence, in his case, the word *efendi* was usually added to his title and he was called *Agha Efendim*; and so were the eunuchs of the palace service headed by the *Bâb al-Sa'adet Agha* or *Kapı Aghası* (white) and the *Dâr al-Sa'adet Agha* or *Kıdar Aghası* (black), and the eunuchs attendant on the *Wâlide Sultân* and princesses of the imperial blood. Hence eunuchs employed by officials and the well-to-do in general came usually to be known as *harem* or *hâdim aghaları*, till the word *agha* alone might sometimes mean "eunuch".

After the abolition of the Janissaries in 1826 and the formation by Mahmud II of the *Asakir-i Mansûre*, it became the custom to entitle *agha* illiterate officers up to the rank of *ahîm-mahâm*, literate officers of corresponding rank being addressed as *efendi*; and this usage was maintained among the people up to the end of the Ottoman regime. Until the establishment of the Constitution there existed a military rank intermediate between those of *yûshak* and *hâşimî* called *sof aghânî* (i.e. commander of a wing).

*Agha*, often spelt *ahâ*, is also used in Persia, in which it again sometimes signifies "eunuch", as notably in the case of the first Kâdjâr, Aghâ Muhammad Shâh.

(H. BOWEN)

AGHĀ KHĀN, properly *Ākâ Khān*, title applied to the Imāms of the Nizārī (s.e.) Ismā'īlīs. It was originally an honorary title at the court of the Kâdjâr Shāhs of Persia, borne by Hasan 'Alī Shāh, who, after the murder of his father Khālī Allāh in 1817, gained the favour of Fath 'Alī Shāh and received the hand of one of his daughters in marriage.

In consequence of intrigues at the court under the reign of Muhammad Shāh, Hasan 'Alī Shāh revolted in 1838 in Kirmān, but was defeated and fled in 1840 to Sind, where he rendered valuable services to Sir Ch. Napier in the Sind campaign. After an unsuccessful attempt to establish himself in Persia he was removed to live in Bombay, but was removed to Calcutta at the instance of the Persian government. In 1848 he returned to Bombay, which has remained, except for a brief period at Bangalore, the headquarters of the movement headed by him and his successors. Internal conflicts among the Khodjas (s.e.) concerning the leadership of the Imān, led to lawsuits, culminating in the famous judgment of Sir Joseph Arncliffe in 1866 in favour of the Aghā Khān. (It was this case, during which a great deal of information about the sect was elicited, which called the attention of western scholarship to the continued existence of the Nizārī Ismā'īlīs; cf. M. H. B. Frier, *The Khojas, the Disciples of the Old Man of the Mountain*, *Macmillan's Magazine* 1876, 431 ff.; St. Guyard, in *J. A.* 1877, 337 ff.) Hasan 'Alī Shāh (d. 1881) was the son of 'Alī Shāh (d. 1851). The latter by his son, the present Aghā Khān, H. H. Sir Sulţān Muhammad Shāh (b. 2 Nov. 1877), the spiritual head of the Nizārī Ismā'īlīs in India (including the Khodjas), Persia, Central Asia, Syria and East Africa. Under his guidance, the organization of the Nizārī community has been greatly developed. The Aghā Khān has also occupied a prominent position in public life. His heir (until 1884) is 'Alī Khān (b. 1910).

**Bibliography:** J. N. Hollister, *The Sky's of India*, London 1953, 364 ff. The memoirs of the present Aghā Khān were published under the title *Of World Enough and Time*, London 1954. (H. A. R. GIBB)

AGHĀ MUHAMMAD SHĀH, founder of the Kâdjâr (s.e.) dynasty of Persia, who was born in 1135/742, was the elder son of Muhammad Hasan Khān, hereditary chief of the powerful Kâdjâr tribe. When a child he was castrated by order of 'Ādī Shāh, Nâdir Shāh's nephew, an act which warped his character in later life. On his father's murder in 1758, he became chief of the Kâdjârs. He spent his youth at Kārm Khān's court at Shīrāz, on Kārm's death in 1779 he fled to Astara and engaged in a long struggle with his descendants. By 1785 he had made himself master of the north and centre of the kingdom, and in that year he made Teheran his capital because of its central position and its proximity to the Kâdjâr territories. In 1794 he captured the gallant Lutf 'Alī Khān, the last of Kārm Khān's descendants, and put him to death after inflicting fearful tortures. In the following year he re-established Persian authority over Georgia. He was crowned Shāh in 1796. He subsequently added Khurāsān to his dominions, deposing Shāhrûkh, Nâdir Shāh's blind grandson; by means of torture, he forced Shāhrûkh to disclose where he had hidden his grandfather's jewels. So dreadful were the unfortunate prince's sufferings that he died. Nine months overtook Aghā Muhammad, for he was assassinated in 1797. He showed great skill as a statesman and also as a military leader, but his reputation was sullied by his revengefulness, his revolting cruelty and his insatiable avarice.

**Bibliography:** 'Abd al-Razzāk b. Nadjaf Kullī, *Makûrât-i Sultânîyya*, Tabriz 1826 (English translation by Sir Harcourt Jones Brydges entitled *The Dynasty of the Kajars*, London 1833); Ridā

(CL. HUART-L. LOCKMART)

AGHĀC, meaning "tree" in Ottoman Turkish, "wood", in Eastern Turkish (in which the forms *yîghet*, *yîghet* are the more frequent) means also "the male member" and "parasang"; cf. al-Kâshghari, *Divân Lughât al-Turk*, Istanbul 1933, iii, 6; and Brockelmann, *Mittelasiatische Wortschätze*, Budapest-Leipzig 1928, 87. Al-Kâshghari shows only the forms *yîghet* and *yîghet*, but W. Radloff, *Versuch eines Wörterbuches der Türk-Dialekte*, 1893, i, 130, shows also *agha* and other forms of the word such as *aghat*, *aghas* and *yaghat*, as signifying not only "tree" and "wood" but also "a measure of distance". The measure thus referred to by al-Kâshghari as a "parasang" is said (cf. Pavet de Courteille, *Dictionnaire Turc-Oriental*, Paris 1870, 554-5) to be three times the distance at which a human step between two other men may be heard by them. An *agha* in this sense is equal, according to a verse of Mir 'Alī Shīr Nawâ'î, to 12,000 double cubits (*harî*); according to Pietro della Valle, *Voyages*, ii, 141, to a Spanish league, or four Italian miles; according to Flaminio Costa, *Voyages en Perse*, i, 111, to 6 kilometres; and according to Radloff, loc. cit., to between 6 and 7 Russian versts.

**Bibliography:** in addition to the references given above, Sulaymân Efendi, *Lughât-i Caghâtî'î wa-Turkî-yi 'Uğmânî*, 15 (transl. I. Kúnos, Budapest 1902, 6, 105); H. Vambéry, *Cagataische Sprachstudien*, 337. (CL. HUART-L. BOWEN)

AGHĀTHODHIMŪN, Agathodaemon. The correct transliteration of the name occurs, e.g., in Ibn Abi Usaybi'a, *Uyûn al-Ahbal*, i, 18. Other forms are Aghāthodhimūn and similar spellings, Aghāthimūn and similar spellings, as well as more serious distortions. In Latin translations from Arabic we find various representations of different accurateness, e.g., in the *Turba Philosphorum*: Agadimon, Adimon, Agmon.

In the Greco-Egyptian god Agathodaemon (see Ganschmidt, in *Fauly-Wissowa*, iii, Suppl.-Bd., s.v.) is represented in Arabic tradition as one of the ancient Egyptian sages or prophets. Already Ps.-Manetho refers to Agathodaemon as the third king of Egypt, in another place as son of Hermes the second and father of Tat. According to Ibn al-Khitt, 2, Agathodaemon was the teacher of Idhri (Heschel-Hermes). Ibn Abi Usaybi'a, on the authority of al-Mubashshir b. Fâtik, says that he was the teacher of Asclepius. The Sābians (s.e.) identify him with Shīth b. Ādam. Ibn Wabghīyya attributes to him the prohibition of fishes and beans, after him confirmed by Amīsa/Hermes, and also the invention of three ancient alphabets. The *Ighwān al-Safā* (Bombay), iv, 296, mention him together with three other sages, each of whom inaugurated one of four schools. Agathodaemon created the Pythagorean. Dābir b. Ḥayyān mentions him in several places together with Socrates, Ps.-Magrīt together with other philosophers, and al-Shahrastānī quotes some teachings of his.

Agathodaemon is a great authority in the occult sciences. *Ḍabīr* and Ps.-Magrīt attribute to him a clock that lures snakes, scorpions, etc. out of their

holes. He is mentioned by Ibn al-Nadīm amongst the alchemical authors and he is quoted in several authors on the art, even in Abū Bakr al-Rāzī's *irr al-Asrār*.

Many authors consider the two great pyramids the graves of Hermes and Agathodaemon (cf. HARAN). **Bibliography:** Manetho, ed. Waddell, 1940; D. AL-AGHLĀB AL-'IDJĪ (AL-AGHLĀB b. 'AMR b. 'UBAYD b. HĀRITHA b. DULAF b. 'UJSHAM), Arab poet, born in the pre-Islamic era and converted to Islam, who later settled at al-Kūfa, and was killed at the battle of Nihāwand (21/642) at the reputed age of 90. He is not regarded as one of the Companions of the Prophet. Al-Aghlab is considered to be the first to have employed the *radjās* metre in lengthy poems constructed on the pattern of the *hāzaj*, but very few traces of his works remain. Critics praise particularly a poem on the prophet Saqlāb (s.e.), and quote an anecdote which suggests that Islam afforded him little inspiration for the composition of religious poetry.

AGHLĀBIDS or BANU 'L-AGHLĀB, a Muslim dynasty which throughout the 3rd/9th century held Ifrīkiya in the name of the 'Abbāsids and reigned at al-Kayrawān.

(i) General Survey; (ii) Religious Life; (iii) Chronological Survey.

(i) GENERAL SURVEY.

In 184/800 the founder of this dynasty, Ibrāhīm b. al-Aghlab, who, as governor of the Zab, had displayed skill and energy in restoring law and order in his province, was invested with princely power by the caliph Hārūn al-Rashīd on terms advantageous to the latter. His vassal relinquished the subvention hitherto paid to Ifrīkiya and undertook to pay a tribute of 40,000 dinars to the imperial treasury. The ties which linked the Aghlabid *amir* to the Caliph were such as to allow him a large measure of autonomy, especially in the matter of the succession. "He bequeathed his dominions to a son or a brother as he pleased" (al-Nuwayrī), making his choice without interference from Baghdad, and this practice was followed by each of the *amirs* who succeeded him.

Our knowledge of these Arab rulers of Ifrīkiya is considerable, and it is possible to discern their

characters with reasonable clarity. In these high officials of the caliphs who had become independent princes, one finds the merits and defects of their masters. Although the majority were devoted to pleasure and addicted to drink, which at times incited them to outbreaks of violence and bloodshed, there were among them men of culture who had a sense of greatness, showed statesmanship, at once stern and humane, aware of the need to promote public works and to devote the revenues accruing to them to the welfare of the State. Under them, Ifrikiya experienced a genuine renaissance, and many magnificent foundations still testify to their beneficent rule.

They needed energy and political skill to overcome the difficulties which confronted them. Ibrāhīm b. al-Aghlab (184-97/800-12) had to extinguish the last outbreaks of Berber revolt. On the borders of Aghlabid territory, Khiridjism was in control of Southern Ifrikiya, of the Awrās and nearly all of Central Maghrib, the Zāh forming the western boundary of the kingdom. The adherence of the Kutāma of Lesser Kabylia to Shī'ism was to cause the downfall of the dynasty. The gravest crises, however, were centred round the very heart of the Aghlabid kingdom. Tunis and even al-Kayrawān were centres of opposition, and the most troublesome elements were the Arabs of the *ghund*, who ought to have been the strongest supporters of Aghlabid power. In the towns in which they were concentrated, they treated the indigenous population with contempt, and proved exacting and contentious in their dealings with the rulers of the country. Ibrāhīm I had to suppress two Arab revolts: that of Hamdān b. 'Abd al-Rahmān al-Kindī (186/802) and that of 'Imrān b. Muḡhallād (194/809), in both of which Kayrawān was involved. Foreseeing the danger, the *amir* had constructed, 2 m. south of al-Kayrawān, al-Kaṣr al-Kadīm (or al-'Abbsīya) (g.c.) and had taken up residence there. He surrounded himself there with those elements of the *ghund* considered reliable and with slaves bought for the purpose, who constituted an imposing coloured guard.

Under the third Aghlabid *amir*, Abū Muḡammad Ziyādāt Allāh (201-23/817-38), who had displayed excessive severity towards the *ghund*, a new and more serious Arab revolt broke out, instigated by Maṣūr b. Naṣr al-Tunbuljī. From his fort at Tunbulja, near Tunis, he called the Arab chiefs to arms and received their support (209/824). After varying fortunes the insurgents found themselves masters of nearly the whole of Ifrikiya except Kābis and its surrounding district. With the help of the Berbers of the Djazir, Ziyādāt Allāh succeeded in regaining the advantage. Al-Tunbuljī surrendered and was executed. The coalition then broke up and Ziyādāt Allāh pardoned the remaining rebel chiefs. Once again the Kayrawānīs had supported the cause of the insurgents.

The hostility of the Kayrawānīs and the policy of the Aghlabids towards them constitute another aspect of the internal history of the dynasty. This hostility was fostered mainly by the religious classes, scholars and devotees who enjoyed the confidence and regard of the people. These doctors of religion, exponents of *ḥadīth*, jurists and theologians who, for the most part, were of eastern origin, lived close to the people and guided public opinion. As professing ascetics, they criticised the morals of the *amir*; as champions of orthodoxy, they protested against their illegal decisions and their abuse of power. The second of the Aghlabids, Abū 'l-'Abbs 'Abd Allāh

b. Ibrāhīm (297-201/812-7) promulgated a financial reform which was contrary to Islamic tradition, namely, the levy on crops of a fixed sum in cash instead of the tithe in kind. This measure aroused strong protests, and the death of the *amir* soon afterwards was regarded as a divine punishment. On the whole, the Aghlabid rulers treated the religious classes with respect and tried to conciliate them, but they rarely induced them to relax their uncompromising attitude. Apart from various architectural creations and public works (which will be described later), which may be considered to owe their origin to this religious policy, the conquest of Byzantine Sicily can also be attributed to the same cause.

Although this conquest, the supreme military achievement of the Aghlabid *amir*, was undertaken by Ziyādāt Allāh immediately after the revolt of Maṣūr al-Tunbuljī, and was doubtless inspired by the desire to divert the energies of the Arabs to an external theatre of operations, the expedition of 211/827 assumed the guise of a holy war. The army was entrusted to the learned jurist Asad b. al-Furāt (g.c.), and Sūsa (g.c.), where the fighters for the Faith and their followers embarked, already had the character of a *ḡhāzī* port, as the town had been furnished with a *ribāṭ* six years previously.

This *ribāṭ* still exists. An inscription at the foot of the signal tower bears the name of Ziyādāt Allāh and the date 200/817. The rebuilding of the Great Mosque at al-Kayrawān (g.c.) is attributed to the same *amir*. This splendid building, founded by 'Ukba b. Nāfi' about 670, twice remodelled or rebuilt in the course of the 8th century, was in fact the work of the Aghlabids. In addition to Ziyādāt Allāh, two other *amirs*, Abū Ibrāhīm and Ibrāhīm II, carried out work there and enlarged the prayer-hall.

The Aghlabids were enthusiastic builders. Under Ziyādāt Allāh's successor, Abū 'l-Kāṣ al-Aghlabī (223-6/837-40), the small mosque named after Abū Fatyāta was built at Sūsa, which acquired other new foundations about the same time. Abū 'l-'Abbs Muḡammad endowed it with the Great Mosque (236/850) which still exists. The ramparts, also preserved, were constructed under Abū Ibrāhīm Ahmad (242-9/856-6), who of all the dynasty figures most prominently in the architectural history of Ifrikiya. To him is attributed the construction of the great mosque of Tunis, which like that at al-Kayrawān, superseded an earlier mosque which was now considered inadequate. The creative activity and the munificence of this prince were shown, above all, in his military and public works. Ibn Khaldūn, who is usually more cautious in his assertions, states that "Abū Ibrāhīm Ahmad built in Africa nearly 10,000 forts, constructed of stone and mortar and furnished with iron gates". It is true that he constructed a large number, both along the coast and on the western frontier, many perhaps being strongholds of the Byzantine *limes* which he restored. At Sūsa, the rampart, dating, according to an inscription, from 242/859, seems to have been built on the old wall of Hadrumetum. Similarly the Burj Yungu, on the Tunisian coast south of Mahres, which also dates from the Aghlabid era, is a Byzantine fort, the foundations of which were used by the Muslim architects.

The same thing probably applies to a number of hydraulic undertakings, but it can be asserted that the Aghlabids carried out many of these in order to restore prosperity to regions possessing only a poor water supply, notably to the south

of the 'Tunisian chain'. A recent work by M. Solignac, based on an examination of the constructional methods employed and the nature of the materials used, and a comparison with those used at the neighbouring reservoirs at al-Kayrawān, leaves no doubt on this point.

For their public works, their defence installations, and, in general, for their building, the *amirs* evidently relied on a labour force recruited locally. The superintendence of the workshops was entrusted to non-Muslim freedmen, their clients (*mauḍā*), whose names are recorded on the buildings themselves. On their coins are mentioned officials of the same origin who controlled the Mint.

Although the inherited traditions of Christian Africa had a considerable influence on the construction and ornamentation of buildings (the Roman mosaic style of paving being still employed), Aghlabid architecture draws also on Oriental sources. The influence of Syria, Egypt and Mesopotamia is apparent, and a new and specifically Muslim art emerges which finds its most striking expression in the Great Mosque at al-Kayrawān.

The dynasty enjoyed its last years of prosperity in the reign of Abū Ishāq Ibrāhīm II, who succeeded Abū 'l-'Abbs Muḡammad called Abū 'l-'Gharīnīk ("Father of the Cranes"), a frivolous and extravagant prince. Ibrāhīm II, in whose strange character were blended in exaggerated form the merits and defects of his line, was by turns a just sovereign, concerned for the welfare of his people, and a capricious tyrant, whose cruelty spared no member of his family. On the command of the 'Abbsīd Caliph al-Mu'tadid, who had received complaints about him, he abdicated in 289/902 in favour of his son Abū 'l-'Abbs 'Abd Allāh, and devoted himself to a most edifying life of penitence. Being unable to perform the pilgrimage by the overland route, he travelled to Sicily, made himself master of Taormina, and then went on to Calabria, where he died before Consenza (29 Dhū'l-Ka'da 289/29 Oct. 902).

During the reign of Ibrāhīm II there appeared in Ifrikiya the Shī'ite missionary Abū 'Abd Allāh (g.c.), who was to bring about the downfall of the dynasty and secure the triumph of the Fātimid al-Mahdī 'Ubayd Allāh. Supported by the Kutāma Berbers, whom he had converted to Shī'ism, Abū 'Abd Allāh set out to conquer the Aghlabid kingdom. The points on the western frontier, some of which had been imprudently denuded of their Arab garrisons, victims of Ibrāhīm's severity, were incapable of checking these fanatical mountaineers. The *amir* Abū Mudar Ziyādāt Allāh III perceived the danger, but his measures lacked any rational plan and were insufficient to delay the catastrophe. He restored the walls of al-Kayrawān and sent against the Kutāma several forces which were defeated. Then, announcing a great victory, he made preparations for flight. He left Rakkāda, the royal city which Ibrāhīm II had founded 4½ m. south of al-Kayrawān, and, taking with him what treasures he could, set out for Egypt. From there he went to Rakkā, but later returned to Egypt, and died at Jerusalem.

#### (ii) RELIGIOUS LIFE.

Al-Kayrawān under the Aghlabids was a great centre of Islamic religious life, scholarship and literature, both in its own right and as a half-way house between the Islamic East and West. Whilst they did not elaborate a common local interpretation of religious law of their own, the scholars of al-Kayrawān followed one or the other of the Eastern schools of thought, sometimes adopting an eclectic attitude. This eclecticism is attested not only by the *Asādiyya* of Ibn al-Furāt but by other works as well. 'Iḍārīan and Medinese doctrines were equally well represented in al-Kayrawān of the Aghlabids, but the teaching of al-Shāfi'ī never took root there. In particular, al-Kayrawān under the Aghlabids became the most important centre of the Mālikī school, superseding Medina and Cairo as such. Some of the most prominent specialists in religious law of the period, whose works have to a greater or lesser extent survived, are: Asad b. al-Furāt (g.c., d. 213), Sahnūn (g.c., d. 240), author of the *Mudawwana*, the great digest of Mālikī doctrine, Yūsuf b. Yalqā (d. 288), Abū Zakariyya<sup>2</sup> Yalqā b. 'Umar al-Kinānī (d. 289), 'Isā b. Muḥsin (d. 295), and Abū 'Uḡmān Sa'īd b. Muḡammad b. al-Haddād (d. 302). Manuscripts dating from the time of the Aghlabids, of the works of these and of other scholars, are still preserved in the library of the Great Mosque of al-Kayrawān. In the field of dogmatic theology, too, al-Kayrawān under the Aghlabids was the meeting-place of many opinions and the stage of lively discussions, occasionally, too, of violence and persecution, between the orthodox, the Djahariyya, the Murji'ā, the Mu'tazila, and last but not least the Iḥdīyya (see these art.). Asad b. al-Furāt, for instance, assaulted Sulaymān al-Farrā' who denied that the believers who see God, and when Sahnūn became khalīf, he had slowly beaten to death his professor 'Abd Allāh b. Abū 'l-'Iḍwādī, who was of the opinion that the Kur'ān was created. Concerning this last proposition, the religious policy of the Aghlabids followed that of the Caliphs of Baghdad. Shortly after the *mihna* (g.c.) in the East, the upholders of the orthodox doctrine had to undergo a similar, though milder, tribulation under the pretender Ahmad b. al-Aghlab; Sahnūn himself had been in danger on that occasion, but escaped serious trouble. In the same way as in the East, an orthodox reaction soon asserted itself, but Mu'tazilite doctrines were not eradicated, and a professed Mu'tazilite, such as Ibrāhīm b. Aṣwad al-Saddīnī, was appointed khalīf of al-Kayrawān at the end of the reign of Ibrāhīm b. Ahmad, shortly before the end of the dynasty. Religious life proper is represented by a great number of pious persons and saints who were often

reach the region of eternal snow. It is only in the districts at the eastern and northern feet of the mountain, in the plain of the Aras, that the water comes out and forms in parts marshy patches.

The dearth of water results in scanty vegetation. Apart from some birches, Ararat, like all the neighbouring mountains, is completely bare of forests; in this extreme form, however, this is caused by human agency. A poor fauna corresponds to the scanty flora. Since the destruction of the human settlements in the valley of St. James the district of Ararat is an uninhabited, solitary desert. In the Middle Ages the conditions were quite different. Al-Isfahārī, 191, expressly states that there was much wood and game on Ararat; al-Makdisi adds that there were more than 1000 hamlets on the promontories of Ararat. The Armenian historian of the 10th century also stresses the richness of the region in deer, boars, lions and wild asses (cf. Thopdchian, in *MSOS*, 1904, ii, 150).

After the Persian wars of Selim I and Süleyman I Ararat was for centuries the northern pillar of the Ottoman Empire against Persia, though both the summit and the northern slopes of Great Ararat, as well as the eastern slopes of Little Ararat, lay in Persian territory, or in that of the Persian vassal state of Nakhchivan. By the treaty of Turkmançay (2-14 Febr. 1828) the plain of the Aras north of Ararat (the districts of Surmalu, Kulp and Igdir) was ceded by Persia to Russia. Thus the northern slopes together with the summit of Great Ararat fell to Russia, while Little Ararat formed the gigantic boundary stone between the three empires of Turkey, Persia and Russia. By the treaty of Moscow, 16 March 1821, between Soviet Russia and Turkey the plain of the Aras was ceded to Turkey; and in the Turco-Persian agreement (*Tihid-nāma*) of 23 Jan. 1932 (which came into force on 5 Nov. 1932) Persia also ceded to Turkey a small territory, comprising the eastern slope of Little Ararat (cf. *MSOS*, 1934, ii, 116); thus at present the whole territory of the immense mountain belongs to Turkey. (Cf. G. Jäschke, *Die Nordostgrenze der Türkei und Nachschwan*, WI, 1935, 111-5; idem, *Geschichte der russisch-türkischen Kaukasusgrenze*, *Archiv des Völkerrechts*, 1935, 198-206.)

**ĀGRA**, town, headquarters of a division and district of the name in the state of Uttar Pradesh, is situated on the banks of the river Yamunā, 27° 1' N, 77° 59' E. Pop. (1951) 375,665, of whom 15.6% are Muslims. The city was for a long time the seat of residence of the Mughal emperors, and is renowned especially for its remarkable monuments of Mughal architecture.

**History.** Little is known about the early history of Āgra, but there is no doubt it was founded long before the Muslim invasions of India. The first reference to the city, and to an ancient fortress in it, is contained in a *hajida* written in praise of the Ghaznavid prince Mahmūd b. Ibrahim by the poet Mas'ūd b. Sa'd b. Salmān (d. 315/1121 or 326/1131), wherein the conquest of the fortress (presumably during the reign of Sulṭān Mas'ūd III, 493-508/1099-1115) is mentioned. The town was ruled by Rājapūt chiefs, who, upon making their submission to the Sultanate of Delhi, were allowed to keep their control over it, under the overall command of the governor of Biyāna province. It remained unnoticed until Sultan Sikandar Lōdī (894-923/1489-1517) rebuilt the city in 917/1505 and made it the seat of his government. The place quickly gained in importance and attracted scholars and learned men from many parts of the Muslim world. Commanding routes to Gwalior and Māwa in the south, Rājapūtāna in the west, Delhi and the Panjāb in the north-west, and the plain of the Ganges in the east, it soon became a strategic and trading centre. It continued to be the capital of Ibrahim Lōdī (923-32/1517-26) and, on his defeat in 932/1526, it became the capital of Bābur. In addition to building his palace of Čārāigh, Bābur laid out a number of gardens in the city and constructed many baths. His nobles followed his example, and a considerable portion of the old city was levelled down. The city remained Humāyūn's and Shīr Shāh's capital, but neither Humāyūn, nor Shīr Shāh or his successors were able to spend much time there. It again became the seat of government in the third year of Akbar's reign (965/1558), when he took up residence in the citadel formerly known as Badal Gadh, and his nobles built their houses on both banks of the river. In 972/1565 the construction of the fort on the site of Badal Gadh was undertaken, but before it could be completed, the building of Fatehpūr Sikrī [s.c.] was commenced. From 982/1574 to 994/1586 Akbar lived mostly in the new city, and later, till 1006/1598, his headquarters were generally at Lahore. In the latter year he returned to Āgra. On his death in 1014/1605, Dīshāngir ascended the throne in that city and lived there almost continuously from 1016/1607 to 1024/1613. He spent another year in Āgra in 1027/1618, but later, until his death in 1037/1626, he spent most of his time in Kašnūr and Lahore. Like his father, Shāh Dīshāh also ascended the throne at Āgra, but had to leave for the Deccan in the following year. From 1040/1631 to 1042/1633 he again resided in the city, but after that, except for brief visits, he did not stay there for long. Thereafter, he lived mostly at Delhi, where he built

the new city of Shāh Dīshāhābād. (The name of Āgra was also changed to Akbarābād, but the latter name was never widely used.) In 1067/1657 he fell seriously ill and was brought to Āgra by his eldest son, Dārā Shīkh. In the war of succession that broke out, Awrangzib was victorious and ascended the throne in 1068/1658. Shāh Dīshāh was imprisoned in the Fort, where he died in 1071/1666. On hearing the news, Awrangzib returned to Āgra and held Court there for some time. Later, he again stayed in Āgra from 1079/1666 to 1081/1671. However, Awrangzib's usual place of residence was, first, Delhi, and then, in the Deccan. Though, in the 17th century, the court did not remain at Āgra for long, the place was nevertheless regarded as one of the capital cities of the Empire. Most of the European travellers who visited India considered it to be one of the largest cities they had seen, comparable in size to Paris, London and Constantinople. It was a centre of trade and commerce and was well known for its textile industry, gold inlay work, stone and marble work and crystal. However the population as well as the trade diminished considerably when the court was away.

The successors of Awrangzib lived mostly in Delhi, though Āgra continued to be important politically. During the second half of the 18th century, it suffered much from the depredations of the Džāts [s.c.], the Mahrattās and the Rohillās. Though nominal Mughal sovereignty over the town continued till it was annexed by the British in 1803, except for the years 1774 to 1785 when Nadīf Dīshān (d. 1782) and his successors were its governors, Āgra was under the occupation of the Džāts (1761-1770, and 1771-74) and the Mahrattās (1758-61, 1770-73, and 1785-1803).

**Monuments.** The Fort. The present fort of Āgra was built by Akbar on the site of the Lōdī fortress of Badal Gadh on the right bank of the Yamunā. It was constructed in about eight years (1565-73) under the superintendence of Muḥammad Kāsim Khān Mirā Bāhr at a cost of 35 lacs of rupees. It is in the shape of an irregular semi-circle with its base along the river. The fort is surrounded by a double wall, loop-holed for musketry, the distance between the walls being 40 ft. The outer wall, just under 70 ft. high and faced with red sand-stone, is about 14 miles in circuit and represents the first conception of a dressed stone on such a large scale. The principal gateway, the Delhi Gate, is one of the most impressive portals in India. Within the fort, according to Abul Faḍl, Akbar built "upward of 500 edifices of red stone in the fine styles of Bengāl and Guḍrāt". Most of these buildings were demolished by Shāh Dīshāh to make room for his marble structures, among those that still stand *Akbari* and *Bangali Mahal* are the earliest. Akbar's buildings are characterised by carved stone brackets which support the stone beams, wide eaves and flat ceilings, the arch being used sparingly. Similar in design is the *Dīshāngiri Mahal*, a double-storeyed construction, 26 ft. by 28 ft., supposed to have been built by Akbar for Prince Salim (later Dīshāngir) but very probably built by Dīshāngir himself. The Rājapūt principality of the *haram*, though Cunningham thinks it was built by Ibrahim Lōdī. After the accession of Shāh Dīshāh architectural style underwent a radical change. With the discovery of marble quarries, red sand-stone was practically eliminated and large-scale use of marble made carved line and flowing rhythm of style possible. Instead of the beam and brackets, foliated or cusped

arches became common and marble arcades of engravled arches distinguished the buildings of Shāh Dīshāh. Among the most important of his buildings in the Fort are the *Khāsh Mahal* and its adjoining north and south pavilions; the *Shāh Mahal* a bath whose walls and ceilings are spangled over with tiny mirrors of irregular shape set in stucco relief; the *Muḥammadan Dargā* built for the Empress Mumtāz Mahal (in which building Shāh Dīshāh breathed his last); the *Diwan-i Khāsh* (or private assembly chamber); the *Diwan-i Āmm* (or public audience chamber) having a court 500 ft. by 73 ft., and a pillared hall 201 ft. by 67 ft. with an alcove of inlaid marble being the throne gallery (built of red sand-stone plastered with white marble stucco which is artistically gilded); the *Mafī Masgid* (or Pearl Mosque) a magnificent structure of white marble standing on a plinth of red sand-stone.

Not far from the fort stands the *Dīwān Masgid*, built by Dīshāh Ārā Bēgam, the eldest daughter of Shāh Dīshāh, in 1038/1648, a red sand-stone building having three domes and five gracefully proportioned arches, the central archway being a semi-domed double portal.

The tomb of Akbar at Sikandara, constructed in Dīshāngir's reign on a site selected by Akbar himself, stands in the middle of a well-laid garden about five miles from Āgra. Very probably some idea of the design was settled by Akbar, but the building lacks that correctness which is characteristic of the construction undertaken by that monarch. The building is 340 ft. square, consisting of five terraces diminishing as they ascend. The lowest story is arcaded and in the centre of each side is inserted a large portico with a deeply recessed archway. The next three storeys consist of superimposed tiers of pillared arcades and kiosks built mainly of red sand-stone. The topmost story is of white marble and is screened with perforated lattices. Each corner of this story is surmounted by a slender kiosk.

The tomb of Dīshāngir's minister, Mirzā Ghīyāth Bēg entitled I'timād al-Dawla (d. 1622), constructed by his daughter, the Empress Nur Dīshāh and completed in 1628, stands in the middle of a well-laid garden on the left bank of the river. The mausoleum consists of a square lower story, 69 ft. wide with a gracefully proportioned octagonal turret, like a dwarfed minaret, thrown out from each corner; while the second story rises in the form of a tracery pavilion covered by a canopy shaped vaulted roof sending out broad steeping eaves, surmounted by two golden pinnales. It is the first large building in India built entirely of marble and is remarkable for the richness of its decoration and profuse *pietra dura* work.

**Tidj Mahal.** The most famous building at Āgra is the *Tidj Mahal*, the beautiful mausoleum erected by Shāh Dīshāh for his dearly loved wife, Arjumand Bānū Bēgam, entitled Mumtāz Mahal, popularly known to her contemporaries as Tidj Mahal. She was the daughter of Asaf Khān, son of I'timād al-Dawla, and was married to Shāh Dīshāh in 1612 at the age of nineteen. She bore him fourteen children, and died in June 1631 at Burhānpur after giving birth to a daughter. Work on the mausoleum was started almost immediately after her death and was completed in about twelve years at a cost of five million rupees, though some later writers have put the figure at 30 million rupees. According to the contemporary European traveller,

Tavernier, the structures, together with its subsidiary buildings, was completed in about twenty-two years during which period twenty thousand workmen were continuously employed on it. The best architects and craftsmen, each a specialist in his own field, available in the Empire as well as in the neighbouring countries were engaged for the work, which was carried on under the general supervision of Muzammat al-Khān and Mīr 'Abd al-Kāfir. The tradition that the Khān, architect of the *Tāj al-Mahall* was a Venetian, Giovanni Veronesi, based on a statement made by Father Maneguzzi, finds no corroboration either in the Mughal chronicles or in the writings of the other contemporary European travellers like Tavernier, Bernier, and Thevenot, who regarded the building as a purely oriental work. Its close resemblance with the tomb of Humayūn at Delhi, and an analysis of its architectural as well as decorative features, suggest that it was undoubtedly the culminating point in the evolution of the Indo-Muslim style of architecture, though no other building in India is quite as exquisite, elegant or beautiful.

The tomb, built of white marble from Djodhpur, stands on a raised platform, 18 feet high and 313 feet square, faced with foliated arches. At each corner of this platform there is a beautifully proportioned cylindrical minaret, 133 ft. high and with three galleries and finished with an open domed dome throwing out broad eaves. In the centre of the platform stands the mausoleum, a square of 186 feet, the facade angled to the extent of 43 ft. 9 ins., the facade rising 92 ft. 3 ins. from the platform. In each face of the building is a high arched recessed porch. On either side of each porch, and at the angled angles, there are arched recesses of uniform size arranged in two storeys. These recesses and the porches are vaulted. Above each of the angled angles stands a domed pillared kiosk, while the centre is occupied by a beautiful bulbous dome, rising from a high circular drum, and surmounted by a gilt pinnace finished with a crescent. The central dome, 38 ft. in diameter and rising 74 feet above the roof or 191 feet from the platform, is one of the finest in the world. Beneath the dome is the central chamber, octagonal within, buttressed at each angle by small octagonal rooms of two storeys, with the great porches in between each pair. In the middle of the central chamber is the cenotaph of Mumtāz al-Mahall, and beside it that of her husband. Immediately beneath them, in the crypt, are the two graves. The cenotaphs are enclosed by a remarkable screen of trellis-work of white marble. The porches are framed in ornamental inscriptions from the *Kur'ān*, and the beauty of the whole is enhanced by copious and graceful ornamentation in *pietra dura*. All the spandrels, angles, and important architectural details are inlaid with semi-precious stones combined in wreaths, scrolls, and frets, as exquisite in design as beautiful in colour. The tomb is surrounded by a formal garden of great beauty, with long lily-ponds, also of marble, containing a row of fountains, leading from the principal entrance to the mausoleum. The river, which bounds the garden on the north, provides marvellous reflections of the building.

(NURUL HASAN)

**AGRICULTURE** [see FALSAHA].

**ĀHĀD** [see KHABAR AL-WĀHĀD].

**AHĀDITH** [see HADITH].

**AHADIYYA** [see ALLĀH, WĀHĪDĀ].

**AHAGGAR**, a Berber word denoting (a) the members (pl. *ahaggar*) of one of the noble tribes constituting the former group of the Northern Tuwāgs (q.v.), and (b) one of these tribes (Kāl Ahaggar or Ihaggar), inhabiting a region to which it has given the name of Ahaggar (Hoggar).

In its widest sense, the Ahaggar is the group of territories under the dominion of the Kāl Ahaggar. It covers an area of about 200,000 sq. miles between lat. 21°-25° N. and long. 3°-8° E. Bounded by mountain masses (the Ahaggar to the E., the Tassili of the Ajjir to the N.-E., the Innādīr to the N., the Adrar of the Hoggar (q.v.) and the Ayr (q.v.) to the S.), it consists of a barren peninsula bounded by the Tassili, which stretch out in an arc both north and south, and dominated by mountain masses, of which the highest and most important is, in the centre, the Atakor al-Ahaggar or Ahaggar proper, with a mean altitude of 7,200 ft. and with peaks rising to 9,835 ft. (Tabat, 9,835 ft.; Haman, 9,510 ft.; Ahaggar, 9,210 ft.). Valleys and steep gorges which debouch into shallow enclosed basins are evidence that in the past the volume of water was more considerable than at present, when the water courses are extremely irregular, and consist of subterranean channels which are easily accessible in places (see 1928a). It has a desert climate, and the vegetation is poor and thorny. The few trees which manage to survive are stunted and apparently unable to reproduce themselves further. The fauna comprises several *ungulata*, principally gazelles, and cheetahs, jackals and hares. The people grow dates and a few cereals, breed camels and goats and employ large numbers of donkeys.

The name of the region is taken from that of the peoples who inhabit it or who rule it, the Kāl Ahaggar. The word *ahaggar* is to be related to the name of the Huwāra (q.v.) tribe, the change from *w* to *g* being normal in Berber phonetics, and it is likely that branches of this tribe, coming from the Fazzān, established themselves during the historical era in the mountainous mass which has taken their name, and reduced the inhabitants of

the region to vassal status. The problem of the origins of these peoples is still not solved (see BERBERS), and the local traditions and the theories formulated by writers at different periods about the populating of the Ahaggar must be treated with reserve. It is clear however that the country has been inhabited from remote antiquity, as witness the traces of work in stone and the many rock engraving which have been discovered (see F. de Chasseloup-Laubat, *Art rupestre au Hoggar*, Paris 1938).

The Ahaggar country was visited several times during the course of the 19th century. After the massacre of the Flatters mission (1880) and the Fourcaud-Lamy expedition (1898), the *aménokal* (q.v.) Mūsā ag Amāstan surrendered to the French. Lapertuis in 1904, and Ahaggar was placed under the control of France. It forms part of the Oasis Territory and its chief centre, Tamanrasset, comprises less than 1,000 inhabitants.

The population of the Ahaggar does not exceed 5,000. The noble tribes of the Kāl Ghāla, Taytōk and Tēgēb Māllat, with their subdivisions and subject tribes constitute the Ahaggar confederacy, the *aménokal* being chosen from amongst the Kāl Ghāla.

The Tuwāg of the Ahaggar live in tents. Society is divided into three classes: the noble and suzerain tribes (Ihaggar or Imuhagh), the subject tribes (Amghid, pl. Imghad) and slaves (alil, pl. ikilan). The Ihaggar, essentially warriors, levied tribute from the Imghad in exchange for their protection. They deplored all manual labour to them and to the slaves, and themselves lived by warfare and pillage. By putting an end to their warlike activities, the occupation of the country by France had somewhat curtailed the resources of the Ihaggar, who nevertheless retain their prestige and continue to be supported by the Imghad.

For their writing (*ihawgh*), language (*amashak*), the subject of a masterly study by P. de Foucauld, and literature, see BERBERS.

**'AHD**, injunction, command; thence: obligation, engagement; thence: agreement, covenant, treaty. The term (as well as the 1st and the 3rd forms of the corresponding verb) occurs frequently in the *Kur'ān*. It is used there over the whole range of its meanings, of Allāh's covenant with men and His commands, of the religious engagement into which the believers have entered, of political agreements and undertakings of believers and unbelievers towards the Prophet and amongst each other, and of ordinary civil agreements and contracts (xvii, 34; xxiii, 8; lxx, 32); occasionally, the agreement is personified. It is "well" be asked to give evidence (xxiii, 82; xxviii, 15). From the idea of God's covenant derive the Christian Arabic terms *al-'ahd al-Sāth* and *al-'ahd al-dhādī* for the Old and the New Testament respectively. The basic concrete concept is "joining together", whereas the synonym *'ahd* derives from the concrete idea of "binding". In later usage, the latter term is commonly used of civil engagements and contracts, whereas *'ahd* is generally restricted to

political enactments and treaties, in particular to the appointment of a successor, a wali *al-'ahd* (q.v.), by a ruler, and to treaties of alliance with non-Muslims outside the Islamic state, who are therefore called *ahd al-'ahd*; this last term is occasionally added, on one side to the *muftā'imin* (see AMĀN), and on the other to the *dīnawīn* (see DĪNĀWĪ); both *amān* and *dīnawīn* are, indeed, a political *'ahd* with religious sanction.

**AL-AHDAL** [plur. Mahādā, < 'Mahādā for am-Ahādī?]; on etym. cf. al-Muhībī, i, 67, Wüstefeld, 6), a family of sayyids living mostly in SW Arabia, descended from the sixth 'Alid *imām* Dījā' al-Sādk. Their ancestor, 'Alī b. 'Umar b. Muḥ. al-Ahdal, called Kūth al-Yaman, and his son Abū Bakr (d. 700/1031) were famous sūfis, living in the little town of Murāwā'a (74) or Marwā'a (al-Muhībī) b. (hikāya) of Bayt al-Fakhī Ibn 'Uḡayy, where their graves are visited by pilgrims. To this clan belong the following sūfi scholars:

1. Husayn b. 'Abd al-Rahmān b. Muḥ., Badr al-Dīn (b. in Kūbriyya 779/1377, d. as Mufti in Abayāt Husayn 855/1451). Among eighteen titles enumerated by al-Sakhāwī, *Daw'* III, 146 f., are *Tahdāt al-Zamān* fi *Ta'rīfāt* Sādk al-Yaman (s'dīn 'Alī al-Y., Ḥajjīlī Khāfī), an adaptation and continuation of al-Dīnawī's *Ta'rīfāt* (al-Sādk); a similar revision of al-Yāqūbī, *Mar'at al-Dīnawī* was called *Qubūl al-Zamān*. Cf. Brockelmann, II, 185, S II, 238 f.; F. Rosenthal, *A history of Muslim historiography*, 248, 355, 407.

2. Husayn b. al-Sādk b. Husayn (grandson of 1) (b. 850/1446 in Abayāt Husayn, d. 901/1497 in 'Adān) abridged, according to his pupil Abū Maḥjāra, his grandfather's *Ta'rīfāt* (i.e. *Tahdāt al-Zamān*). A mosque was built in 'Adān in his memory in 1847. Cf. Brockelmann, S II, 251 (incorrect), *Nūr*, 27-30, *Daw'* III, 144.

3. Tāhīr b. Husayn b. 'Abd al-Rahmān, Dījā' al-Dīn (b. 914/1508 in Murāwā'a, d. 998/1599 in Zabīd), a jurist and traditionalist, abridged a work of his ancestor Husayn (no. 1) called *Maḥādīh* *Abī al-Kurba* fi *Sharḥ Du'ā'* (al-Walī Abū Harba (Nūr, 447 ff., cf. *Daw'* III, 146). His son

4. Muḥ. b. Tāhīr wrote *Bughyat al-Tāhīb bi-Ma'rīfat Anṣād 'Alī b. Abī Tāhīb* (Wüst., 7; Brockelmann, II, 239 is incorrect).

5. Ḥatīm b. Ahmad b. Mūsā b. Abū'l-Kāsim b. Muḥ. (d. 1013/1604 in the seaport Makhlā' (Mukhlā), where he had lived for 37 years), famous sufi and scholar, "the Ibn 'Arabi of his time", according to his disciple 'Abd al-Kādir al-'Aydārūs (Nūr, 261-475), who published their correspondence in the work *al-Darr al-Bāsim min Rasā'id al-Sayyid Ḥatīm*. His improvised poems were collected into a *dīwān*. Cf. Brockelmann, II, 407, S II, 365; al-Muhībī, I, 466-500, Wüst., 124. Serjeant, *Materials*, I, 585 f.

6. Abū Bakr b. Abū'l-Kāsim b. Ahmad (b. 984/1576, d. 1035/1626) had a *sūfiya* in al-Mahāṣī (Wādī Rīmā'). Among his works are: *Nafḥat al-Mandāl* (fi *Tarāḍīm* Sādk al-Ahdal, 10m. Pasha, [Shayr] and al-Ahdal al-'Alīyya fi *Ṭawāṣiṭ al-Ahdaliyya*. Cf. Brockelmann, II, 544; al-Muhībī, I, 64-8, Wüst., 122 f.

7. 'Abd al-Rahmān b. Sulaymān (d. 1250/1835) is mentioned with eight titles in Brockelmann, S III, 131. Another work, *al-Nafas al-Yamānī fi Idghāt* *Daw'* *Shāhīnī*, cited by Serjeant, *Materials*, I, 587,

For two more members of this family, with the *ahbā* al-Muaww, Muḥ. al-Kāsim in the 913th century, the other in recent time, see Broekmann, S II, 239, 805. A collection of traditions on North Arabia, *Nathr al-Durr al-Mahmūd min Fadā'il al-Yaman al-Maymūn*, was published ca. 1350/1931 in Cairo by Muḥ. b. 'Alī al-Aḥd al-Husaynī al-Aḥaf.

**AHDATH**, literally "young men", a kind of urban militia which plays a considerable role in the cities of Syria and Upper Mesopotamia from the 4th/10th to the 6th/12th centuries, and is particularly well known at Aleppo and Damascus. Officially, its role is that of a police, charged with public order, fire-fighting, etc., and also, in time of need, with military defence in reinforcement of the regular troops. For these services the *ahdath* receive stipends allocated from the product of certain urban taxes. The only distinction between them and any ordinary police is the local nonprofessional nature of their recruitment, but it is precisely this which gives them an effective function, much more important and often quite different from that of a police. As armed and pugnacious men of the native-born population, they constitute in face of the political authorities (usually foreigners, or in any case from outside the city) the dynamic element of "municipal" oppositions. It is for this reason that we repeatedly find them rising against the domination of the princes, and sometimes, when the latter are weak, forcing upon them in effect a regime of condominium in the city. In relation to the population, however, they do not always represent the same strata. At critical moments, for example at Damascus immediately after the Fatimid occupation, they are dominated by popular elements; more often they appear to accept the direction of the bourgeoisie, and form more especially a body of supporters for one or two great families, from whom they draw their chief, the *ra'īs*. This *ra'īs* forces the authorities to recognize him as *ra'īs al-balad*, a kind of mayor, whose influence counterbalances, and sometimes exceeds, that of the *hādī*, also a local notable. Out of this there may thus emerge finally veritable urban dynasties, such as (parallel to the Banū 'Amr al-Tripoli, arising out of the *hādīs* of that city) the Banū Nāṣir al-Aḥd, hereditary chiefs of Ḥamā in the 6th/12th century under the nominal suzerainty of the Iḥdīd Turkmen princes. The portrait of the cities of Syria and the Djazīra furnished to us by these facts is evidently at some remove from the common view which presents them as lacking any kind of municipal structure. The *ahdath* were, of course, most active at times and places in which a professional police (*shurā* [q.v.]) could not be maintained, and for this reason neither Baghdad nor Cairo offer us a comparable picture. Their final decadence begins with the establishment by the Salḡūkiids or their successors of military commandants (*ghāḥa* [q.v.]) at the head of each city, supported by garrisons drawn from the regular army. About the same period the term *ahdath* is applied also to

armed bands of the Bāṭiniyya or "Assassins" in Syria.

The term is found in earlier centuries in 'Irāk, especially in Baṣra and Kūfa in the 2nd/8th century, but also in Baghdad and elsewhere. The officer in charge of the *ahdath* was responsible for public order, but the term *ahdath* in this case has generally been taken (following the opinion of Dozy, s.v.) in the other sense, equally justified by etymology, of blame-worthy "innovations" of such a nature as to disturb public order and whose authors should be seized and punished. In general use, the term certainly has in given contexts the sense of "crime", but equally certainly in other contexts the sense of groups of "young men", vaguely specified. In the light of the materials described above, Dozy's view must be regarded as open to question; but up to the present time no text has come to notice which allows of a definite decision.

The further question arises of the relations between the Syrian and Mesopotamian *ahdath* and the *fityān* (see FATĀ) and 'ayyārūn (see 'AYYAR) whose existence is documented in 'Irāk and the Iranian region throughout the Middle Ages, and who were especially active from the 4th/10th to the 6th/12th centuries. These certainly played the role of "active wing" of the popular oppositions to the official authorities, parallel to, but more vigorously pressed than, that of the *ahdath*; the Iranian cities, moreover, all had apparently a *ra'īs*, who seems sometimes to have been the *ra'īs* of the *fityān* in his city. Etymologically also, *ahdath* and *fityān* have the same meaning. Nevertheless, though there is often convergence in fact, the two institutions differ in their origin, and these differences persisted. *Fityān* and 'ayyārūn were essentially private groups, recruited from the depressed classes and more violent in action, and it was only by gradual stages that they sometimes succeeded in drawing certain bourgeois or aristocratic elements in their train, or in replacing the military police. They often formed organized bodies with initiatory rites, within which there developed the peculiar ideology of the *futuwwa* [q.v.]. No parallel to this has yet been found among the *ahdath*. It may not be accidental that the boundary between those with *fityān* and those with *ahdath* corresponds very closely to the ancient Byzantine-Sasanid frontier, a fact which suggests that the *ahdath* may possibly be related to the ancient "factions" of the Later Roman empire. The whole question can, however, only be investigated in the framework of the general social study of the Islamic cities, on which little work has yet been done.

**Bibliography:** Numerous references to *ahdath* in Ibn al-Kalānī, *Ḍhayr Ta'riḥ Dimashq* (Amedroz) (Eng. tr. by H. A. R. Gibb, *The Damascus Chronicle of the Crusades*, London 1931, Pt. II, by R. Le Tourneau, *Damas de 1075 à 1154*, Paris 1952); also in Ibn al-'Adīm, *Ta'riḥ Ḥalab* (Dahlan), Ibn al-Tayyib (cp. Ibn al-Furāt, in MS), Ibn al-Athīr, *Yahyā al-Antākī* (Kratchkovsky & Vasiliev), Sibt b. al-Djauzī, and other Syrian sources. For the 'Irāqī problem see esp. Cahen, who is preparing a more complete study; remarks by Renaud in *JA*, 1848/II, 231; indications by Gibb and Le Tourneau in the introductions to translations of Ibn al-Kalānī; J. Sauvaget, *Alep*, 96, 103, 139. See also AHD, 'AYYAR, FATĀ.

(CL. CAHEN)

**AHL**, Turkish poet, whose real name seems to have been Beḥī Hasan ("Hasan with the mole"). His father Sidi Khodja was a merchant in Trestnik (not far from Nicopolis). After the latter's death Ahl went to Istanbul and chose for himself the career of a scholar, but for a long time advanced no further than the rank of candidate (*mudāris*), because he declined the position of *mudāris* in Bayazid Paḡha's *madrassa* in Bursa. Finally he obtained the less important position of *mudāris* in Kara Perya (Berhoca), where he died in 923/1517. He left two unfinished poetical works, of which the titles are: *Shirīn wa-Persa* (imitating Shervāsh's *Khawere u-Shirīn*), and *Ḥusn u-Dil* (Istanbul 1277). The latter work is an allegorical poem written in prose interspersed with verses, and is an imitation of Fāṭih's [q.v.] work of the same title. Gibb has epitomized its contents.

**Bibliography:** Sehl, 108; Laflī (Chabert), 105; 'Aḡhla Celebi and Kinnāl-zāde, s.v.; Gibb, II, 280 ff.; Hammer-Purgstall, *Geogr. d. Osman. Reichthum*, I, 209; Yemī Meḡmū'a, 1918, no. 54; Istanbul Kitāplıkları Türkçe Yazma divanlar kataloğu, no. 35.

**AL-AHKĀF**, the title of Sūra xvi of the Qur'ān, and a geographical term the meaning and application of which have been generally misunderstood. The Sūra derives its title from verse 21, which speaks of 'Ad as warning his people in al-Ahkāf. The word *ahkāf* is usually interpreted in dictionaries, books of *tafsīr*, and translations of the Qur'ān as meaning curved sand dunes. Medieval Arab geographers considered al-Ahkāf to be the name of a sand desert in Southern Arabia, said to lie between Hadramawt and 'Uṣmān, i.e., in the eastern part of al-Ramlā or al-Rub' al-Khālī [q.v.]. Modern Western geographers, on the other hand, have inclined towards the identification of al-Ahkāf with the whole of al-Ramlā or just its western half. C. Landberg (*Hadramawt*, 146-160) showed that Ahkāf as a regional name is used in Southern Arabia as roughly synonymous with Hadramawt in the broadest sense and is not applied to the sands farther north. The southern bedouins define Barr al-Ahkāf as the mountainous area running behind the coast from Zufar west to Aden, the central valley of which is Wādī Hadramawt; to them the word *ahkāf* means simply mountains and is not associated either with dunes or, as suggested by Landberg, with caves (*ahkaf*). A statement made to 'Alī b. Abī Ṭālib by a man of Hadramawt, as recounted by Ibn al-Kalbi and repeated by al-Bakrī and Yāqūt (s.v.), indicates that even in ancient times *ahkāf* may have been used in Southern Arabia in this connection rather than as a name for dunes in the Great Desert.

(G. KREMER)

**AHKĀM**, pl. of *ḥukm*, decision, judgment. [See also HAKĀM.] In the Qur'ān, the word occurs only in the singular, and is used (as is the corresponding verb) of Allāh, the Prophets, and other men. Use of Allāh, it denotes both individual ordinances and the whole of His dispensation (iii, 79; xiv, 16; ix, 10). In the ultimate sense, final jurisdiction belongs to Allāh alone (see AL-MUḤAKKIM), but He has given authority to make decisions to His Prophets. The jurisdiction of Muhammad, in particular, is opposed to that of paganism (v, 50). So *ḥukm* comes to mean the authority, imperium, of the Islamic government and, on the other hand, the judgment of a *hādī* on a concrete case.

From *ḥukm* in the sense of a judicial decision derive the meanings of a logical judgment concerning a

thing, of a status to be predicated of a thing or of a person, and of a rule in religious law, in grammar, and in other sciences. In all these meanings, the term is freely used in the plural. In particular, one speaks of *al-ahkām al-khama*, the "five qualifications" (obligatory, recommended, indifferent, reprehensible, forbidden), by one or the other of which every act of man is qualified in religious law (see MAḤṢA). In a broader sense, *ahkām* means the sum of the rules pertaining to any given subject (cf. the titles of books such as *ahkām al-awḥā* ["On Waki"], *al-ahkām al-sulṭāniyya* ["On Government"], also *ahkām al-āḥirā* ["On the Next World"], *ahkām al-nudūm* ["astrology", etc.]). In the field of religious law, *ahkām* is therefore synonymous with the *ḥurūf*, the positive law as opposed to legal theory or jurisprudence (see FIQH), but as it also means judicial decisions, the term is more specifically used of the application of legal rules to concrete cases.

(J. SCHACHT)

**AHL** (أهل), originally meaning "those who occupy with one the same tent (Hebrew *ohel*)", thus "family, inmates". Therefore *ahl al-Bayt* means literally "the household of the Prophet". When the *ahl* (pl. *ahāl*) of a town or a country is spoken of it denotes its inhabitants, sometimes, as in Medina (according to Burton), specially those who were born there and own houses. But this word is often connected with other concepts, and is in these combinations more loosely used, so that it may come to mean "sharing in a thing, belonging to it", or "owner of the same", etc. Some of the compounds with *ahl* most in use follow here:

**AHL AL-AHWĀ'** [أهل الأهواء], "predilection, inclination of the soul"; comp. Qur'ān vi, 151) is a term applied by the orthodox theologians to those followers of Islām, whose religious tenets in certain details deviate from the general ordinances of the Sunnite confession (cf. ZDMG, 1898, 150). As examples there are mentioned: Ḍjābariyya, Kadariyya, Rawāfīd, Khawāriḡ, anthropomorphists, Mu'tazilīa. From the above definition it may be inferred that in the sense of Muslim theology it is not proper to designate these tendencies as sects.

(I. GOLDZIEHER)

**AHL AL-BAYT**, *Āl al-Bayt*, "the people of the House", *Āl al-Nabī*, "the family of the Prophet", all mean the same; the term *Āl Yāsīn* also occurs. The origin of the phrase is to be found in the strong clan sense of the pre-Islamic Arabs, among whom the term *al-bayt* was applied to or adopted by the ruling family of a tribe (by derivation from an ancient right of guardianship of the symbol of the tribal deity, according to H. Lammens, *Le Culte des Dieux, en l'Arabie occidentale avant l'Hégire*, Beirut 1928, 136 ff., 154 ff.), and survived into later centuries in the plural form *al-bayyāt* for the noble tribal families (see AHL AL-BUYYĀT and ĀL). In early Islamic times the term *bayt* was applied to themselves by a number of families, e.g. by 'Abd Allāh b. 'Umar to the house of 'Umar (Ibn 'Abd al-Hakam, *Sirat 'Umar* b. 'Abd al-'Azīz, Cairo 1927, 19), and by 'Umar II to the Unayyad house (*unayyad al-Hudaydīd*) *minnā ahl 'ibayy* [ibid. 24]. In the Qur'ān the phrase *ahl 'ibayy* occurs twice: once in xl, 73, applied to the house of Ibrāhīm; the

second passage, xxxiii, 33 ("God desires only to remove filthiness from you (musc. pl.), *ahī* 'al-bayt', and with cleansing to cleanse you"), serves as the proof-text for its application to the house of Muhammad (but see R. Faret, in *Orientalische Studien Enzo Lütmann*, ... überreicht, Leiden 1935, 127-20).

The precise interpretation of the term in xxxiii, 33, gave rise to differences of opinion. In one tradition, according to which Salama al-Firdi (q.v.) is included among the *ahl al-bayt* (Ibn Hishām, *Siya* (Cairo), iii, 241; Ibn Sa'd, iv/1, 59), it is opposed to *muhajjirin* and *anṣār*. Among the *Shi'a* (and generally in circles friendly to 'Ali) it was applied to Muhammad, 'Ali, Fātima, al-Hasan and al-Husayn (cf. already al-Kumayt, *Hāshiyat* (Horowitz), 38 l. 30; cf. 92, l. 67) by interpreting the verse through the well-known "tradition of the mantle" (*ḥadiṭh al-ḥiṣā'*, *ḥadiṭh al-'ashā'*), which was accepted also in Sunni circles (see AHL AL-KHAWARIZM). In keeping with an explanation of the Kur'anic phrase as referring to the Prophet's wives and dependents, attributed to Ibn 'Abbās and 'Umar, Umm Salama is, in some versions of this tradition, recognized by the Prophet as belonging to the *ahl al-bayt*. It is given a still wider application in a version of the so-called *ḥadiṭh al-'ashā'*, where the term is applied to those to whom (including their *ma'wāl*) a share in the *ḥudūd* is forbidden; among these are definitely mentioned the families (āf) of 'Ali, of his brothers 'Akkā and 'Iṣṣā, and of al-'Abbās. In this tradition, therefore, the *ahl al-bayt* includes the Tālibids and 'Abbāsids, historically the most important families of the Banū Hāshim; and in order to strengthen their claim to inclusion in the verse of purification, the 'Abbāsids also had their counterpart of the *ḥadiṭh al-ḥiṣā'*. Malik and Abū Hanifa extended it to include all the Banū Hāshim and al-Shāfi'i extended it to the Banū Muttalib also, while others make it include the whole community. The current orthodox view is based on a harmonizing opinion, according to which the term *ahl al-bayt* includes the *ahl al-'ashā'*, i.e. the Prophet, 'Ali, Fātima, al-Hasan and al-Husayn, together with the wives of the Prophet.

The *Shi'a* limit the family (which they call by preference *āf*) to the *ahl al-ḥiṣā'* and their descendants, making devotion to them an essential, or even the main, part of religion. In one version of the "Farewell Sermon" Muhammad is represented as saying that God has given two safeguards to the world: His Book and the Prophet's *sunna*; in another version, this is replaced by: His Book and the Prophet's *ṣiṭra*. The official creed of the *Shi'a* does not go beyond this, but popular belief ascribes cosmological importance to the family as in traditions like: "The stars are a pledge to the world that it will not be drowned, and my family are a pledge to the community that it will not go astray"; "God would not have created heaven, earth, paradise, Adam, Eve, the angels, nor anything else but for them (the family)". They have the same saving function as Noah's ark. The heads of the family are the Imams (q.v.), infallible and sinless. The extreme Manṣūriyya called the family heaven and the *Shi'a* earth (al-'Ash'ari, *Makābil*, 9).

The ideas of the *Shi'a* found their way into later collections of *ḥadiṭh*, although the Sunna declares that love for the family is of no avail without obedience to the *sunna*. Al-Makrizi is quoted as saying: "Beware of finding fault with one of the family, for no heresy, no default in the performance of religious duties, and no sin deprives him of his sonship."

The form *āf* is used more especially in the invocation: "O God, bless (*ṣalli* 'alā) Muhammad and his *āf*" (cf. I. Goldziher, in *ZDMG*, l, 114-7). The definition of those comprehended in this expression has produced controversies similar to those about the *ahl al-bayt*. Ibn Khallaway enumerated twenty-five classes in his *K. al-Āf* (G. Flügel, *Die grammatischen Schulen d. Araber*, 231; citation in Bahārī, *Manār al-Hudā*, Bombay 1320, 200). See also al-Ṭūsī, *List of Shi'a Books*, no. 294.

(I. GOLDZISER, C. VAN ARENTDONK, A. S. TRITTON).

**AHL AL-BUY'UT** (A.), originally denoted those that belong to Persian families of the highest nobility (Nöldeke, *Gesch. d. Perser u. Araber zur Zeit der Sassaniden*, 71), then, the nobles in general. Other meanings are given by Dozy, *Supplément*, l, 131.

**AHL AL-DĀR** (A.) = "the people of the house", in the Almadid hierarchy the 6th order (see AL-KUWALIMIN).

**AHL AL-DHIMMA** (A.), the Jews and Christians, between whom and the Muslims there is according to Muslim law a certain legal relation (see DHIMMA).

**AHL AL-FARD** (see MIRĀṬH).

**AHL AL-HADITH**, also **ASHĀB AL-HADITH**, the partisans of traditions (see *ḥadīṭh*). Traditionalism in Islam manifested itself first in the re-emergence of the old Arabian concept of *sunna* (q.v.), the normative custom of the community, which was in due course identified with the *sunna* of the Prophet. This normative custom found its expression in the "living tradition" of the ancient schools of religious law, which came into being at the very beginning of the second century of Islam. In opposition to the ancient schools and their extensive use of human reasoning and personal opinion (see *ASHĀB AL-RĀ'Y* and *RA'Y*), the *ahl al-hadīṭh*, who appeared on the stage a little later, claimed that formal traditions from the Prophet, even though they were transmitted only by isolated individuals (see *ḥajrāt* AL-WAHID), superseded the "living tradition". The traditionalists themselves were responsible for putting into circulation many traditions which purported to go back to the Prophet, and they specialised in collecting, perfecting, transmitting and studying them; long journeys were made in search of traditions. Though hardly any of this material, as far as religious law is concerned, can be regarded as authentic by the standards of historical research, the Muslims, from the 3rd/9th century onwards, have accepted its essential parts as genuine.

The movement of the traditionalists was the most

important event in the history of Islamic religious law in the second century of Islam. The ancient schools opposed it strongly at first, and the discussion concerning the authority of formal traditions from the Prophet, as against the "living tradition" of the schools, occupied most of that century. Once consciously formulated, however, the thesis of the traditionalists, involving as it did the highest possible authority under the Kur'ān, was assured of success, and the ancient schools had no real defence against the rising tide of traditions. Al-Shāfi'i (q.v.) adopted the thesis of the traditionalists and the other schools accepted it too, though they did not necessarily change their established doctrine accordingly. Only the doctrine of Ahmad b. Hanbal (q.v.) is purely traditionalist. The final theory of religious law represents a compromise, insofar as the thesis of the traditionalists, while accepted in principle, was made dependent in its application on the consensus of the scholars (see *ṭaḥṭ*).

The main material aim of the traditionalists was the same as that of the ancient schools, that is, to subordinate the legal subject-matter to religious and ethical considerations. On occasion, they showed themselves interested in purely legal issues as well. Al-Shāfi'i had reason to complain that their standards of reasoning in general were inferior to those of the ancient schools, and in particular, he disavowed those extreme traditionalists who accepted all traditions indiscriminately. The majority of traditionalists, however, attempted to discriminate between reliable and unreliable traditions by criticism of the *isnād* (q.v.); this criticism was directed against the ancient schools whose standards, by the nature of things, were less exacting in this respect. This traditional criticism of the *isnād* has no direct bearing on determining the historical authenticity of a tradition.

As early as the 2nd/8th century, the study of traditions from the Prophet became an end in itself, and the science of traditions, no longer opposed but complementary to the science of positive religious law (*fiqh* (q.v.)), became an important and assiduously cultivated branch of Islamic religious scholarship. The usual term for a technical specialist in traditions is *muhaddith*.

(J. SCHACHT)

**AHL-I HADITH**, "the followers of the Prophetic tradition", is a designation used in India and Pakistan for the members of a Muslim sect, who profess to hold the same views as the early *ashāb al-hadīṭh* or *ahl al-hadīṭh* (q.v.) as opposed to *ahl al-ra'y*. They do not hold themselves bound by *taḥṭ* or obedience to any of the four recognized *imams* of the *fiqh*-schools but consider themselves free to seek guidance in matters of religious faith and practice from the authentic traditions, which together with the Kur'ān are in their view the only worthy guide for true Muslims. They disregard the opinions of

the founders of the four schools when they find them unsupported by or at variance with traditions, transmitted on the authority of the Companions of the Prophet. They have thus earned the name of *ghayr muḥallid*, which appellation, though disowned by them, nevertheless admirably defines their position in relation to other sects. They reject also the common notion that the *ashāb al-hadīṭh* or legal conclusions of the founders of these schools are of final authority; and rather contend that every believer is free to follow his own interpretations of the Kur'ān and the traditions, provided he has sufficient learning to enable him to give a valid interpretation. Consequently, they do not regard the *ijmā'* or consensus of the preceding generations of Muslims as binding on them. As a result of their characteristic attitude, they have found themselves in conflict chiefly with the Hanafis or followers (*muḥallid*) of Abū Hanifa, who constitute the majority of Sunni Muslims in India and Pakistan. Their controversy has, however, been confined in actual practice to certain minor points of ritual (such as *ra'f* al-*yadayn*, *imām bi'l-ḥajr*) and belief, there being a substantial agreement on really important theological and doctrinal questions.

The Ahl-i Hadith try to go back to first principles and to restore the original simplicity and purity of faith and practice. Emphasis is, accordingly, laid in particular on the reassertion of *taḥṭ* or the unity of Allāh and the denial of occult powers and knowledge of the hidden things (*'ilm al-ghayb*) to any of his creatures. This involves a rejection of the uncanny powers of saints and of the exaggerated veneration paid to them. They also make every effort to eradicate customs that may be traced either to innovation (*bid'a*) or to Hindu or other non-Islamic systems. In all this, their reformist programme bears a striking resemblance to that of the Wahhābīs of Arabia; and as a matter of fact their adversaries often nickname them Wahhābīs, an appellation which they repudiate, on the ground that their tenets are not derived from the Arabian Wahhābīs, who are themselves *muḥallid* in the sense that they follow the opinions of Ahmad b. Hanbal in legal matters.

The Ahl-i Hadith made their first appearance as a distinct sect in the last century, partly through the influence of the writings of Nawab Siddiq Hasan Khan (q.v.); d. 1307/1890 and partly through the teaching of Sayyid Naḍir Husayn (d. 1320/1902), an eminent theologian who specialized in the science of *ḥadiṭh* and lectured on it for more than half a century at Delhi. Among his numerous pupils, who became influential teachers and writers in their own turn and propagated his ideas in different parts of the country, special mention is due to Mawlānā 'Abd Allāh 'Uḡamawī (d. 1391/1971), who was banished from his native country of Afghanistan for his views and settled in Amritsar (Punjab); Mawlānā Muhammad Husayn of Batāla (d. 1338/1919), who edited the monthly *Ishād al-Sunna* for many years; and Mawlānā Abū 'l-Wafā Ṭhanā Allāh (d. 1367/1948), who edited the weekly *Ahl al-Hadith* till 1947 and made a great name for himself as a controversialist and an expositor of the views of the school. The last named also took a leading part in organizing the All-India Ahl-i Hadith Conference with its headquarters at Delhi, where its first annual meeting was held in 1912.

The Ahl-i Hadith have their own journals, mosques and seminaries, and are distinguished by (i) their zealous effort, only partly successful, to purify the

religious life of the Muslims by ridding it of its innovations, superstitions and unnatural accretions, (2) their active promotion of the study of Hadith literature, the importance of which had already been recognized by Shāykh 'Abd al-Hakk Muhaddith of Delhi (q.v.), and (3) their polemics against the Ārya-Samājist Hindus, the Christian missionaries and the Ahmads (Kādyānīs).

**AHL-I HAKK**, "Men of God", a secret religion prevalent mainly in western Persia. Ahl-i Hakk would seem to be a rather imprecise name for this sect, because it is used, for example, by the Hurūfīs (see CL. Huart, *Textes persans relatifs à la secte des Hurūfīs*, 1899, 401), and because it has an affinity with such verb nouns as *Ahl-i Ḥalīqā*, a term which is also used by the Ahl-i Hakk. In the strict sense, however, Ahl-i Hakk is the name properly given to initiates of the religion described in the present article. The name 'Ahl-i Ḥalīq' applied to them by their neighbours is an unsuitable title, because 'Ahl' is not the dominant figure in the religion of Ahl-i Hakk, and further because the term 'Ahl-i Ḥalīq' is also used in relation to sects whose connection with the Ahl-i Hakk has not yet been established.

The only reliable method is to describe the sect on the basis of the authentic sources, supplemented by material drawn from the narratives of travellers. The difficulties of this task arise firstly from the fact that the number of texts available is

still limited (besides being often in dialect and bristling with abstruse terms) and secondly from the existence of numerous subsects. The Ahl-i Hakk church has no canonical unity, but resembles rather a federation of associated movements (see a provincial list of these subdivisions in Minorovsky, *Notes*, 46 [53]). There are twelve main *khānādāns* or *silsilas* (v. infra), but there are branches which are not included in this list, cf. the Sayyid Djalāl (Minorovsky, *Notes*, 48 [53]) and the Tūmārī (a highly abnormal group) (Minorovsky, *Etudes*, II). The account by Gohineau, the *Firḥān* and the text published by W. Ivanov reveal a religious system more philosophical than the naive legends of the *Sarandjam* (in the Āṭash-begi version). Since, at the moment, however, this branch is better known to us, the following account will be based primarily on the Āṭash-begi documents, to be supplemented later by material from the *Firḥān*, the author of which was a Khāmūshī (?).

The Dogmas. The central point in the dogmas of the Ahl-i Hakk is the belief in the successive manifestations of the Divinity, the number of these being seven. The manifestations of God are compared to garments put on by the Divinity: "to become incarnate" means "to come (to dwell) in a garment" (*libās, dījama, dān* < Turk. "don").

On each occasion the Divinity appears with a following of Four (or Five) Angels (*yārān-i ār-malak*) with whom he forms a close group.

The table of theophanies according to the MS. of the *Sarandjam* is given below.

In pre-eternity (*azāl*) the Divinity was enclosed in a Pearl (*durr*). He made his first external appearance in the person of Khāwandagīr, the Creator of the world. The second avatar was in the person of 'Alī. From the beginning of the third epoch the list becomes quite original and typically Ahl-i Hakk. The first four epochs correspond to the stages of religious knowledge: *shar'īa*, *tarīqa*, *ma'rifa* and *haḥika*. According to all branches of the sect, the representative of the last and the highest stage is Sultān Ṣohāb. On the other hand, several differences of opinion regarding the succession of Sultān Ṣohāb are recorded.

Just as the divine essence reappears in each of the seven "incarnations", the angels (cf. the vertical columns in the table) are avatars of one another. For this reason their names are interchangeable and Salāmān is often spoken of in the epoch of Sultān Ṣohāb or Benyāmīn in the epoch of Khāwandagīr. The angels are emanations of the Divinity: the first of them was produced by Khāwandagīr from his armpit, the second from his mouth, the third from his breath, the fourth and

fifth from his perspiration and his light respectively (cf. the *Sarandjam*). According to another version, Benyāmīn was created from the perspiration, which is characteristic of modesty; Dāwūd — from the breath (anger); Mūsā — from the moustache (pity); Razbār — from the pulse (charity). The angels play the part of ministers to the Divinity: Benyāmīn is the deputy (*naḥb*) and the *pir*; Dāwūd is the overseer (*waṭir*) and judge (?); Pir Mūsā is the *waṭir* who records good and evil; Muṣṭafā Dowdān (< Nuṣayr) is the Angel of Death.

The angels are usually said to be four in number (in some lists and in certain periods this number is reduced to three) but in fact a fifth angel is especially charged with the supervision of worship. This angel's symbolical name is Razbār, Razbār or Ramzār ("entrusted with mysteries") and her feminine character is indisputable; but the sex in Razbār is not emphasized. One of the informants even alleges that Razbār is a hermaphrodite (*khawndā*). Razbār is the mystical name of Khātūn Dāyira, mother of Sultān Ṣohāb, and the compiler of the list quoted above is wrong in relegating her to the fifth epoch.

Metempsychosis and Eschatology. The belief in the reincarnation of the theophanies finds its parallel in the general belief in metempsychosis. "Men! Do not fear the punishment of death! The death of man is like the dive which the duck makes".

Human beings must pass through the cycle of 1,001 incarnations, in the course of which they receive the reward of their actions (*Notes*, p. 131 [212]). According to the *Firḥān* (I, 32, 33, 57, 68), however, the possibilities of purification are essentially limited by the very nature of beings; of whom some, created out of yellow clay (*sarda-gil*), are good, and the others, created out of black earth (*siyāḥ ḥāk*), are evil. "The more (the former) go through the world of garments and the more they suffer, the more they approach God and the more their luminous state increases", while the "Dark ones" shall never see the Sun. As a complement to these beliefs, the Ahl-i Hakk eagerly await the advent of the Lord of Time who shall come "to accomplish the desires of the Friends and embrace (ḥāḥa) the Universe". There are a number of prophetic *ḥādīth* which announce the coming of the Messiah. The scene of the Last Judgment, (*sā*, "review") will be the plain of Shahrizūr (q.v.) or that of Sultāniyya (q.v.) where the "sultāns shall be exterminated" (*Notes*, p. 44 [11]). According to the *Firḥān*, I, 57, the Good shall enter Paradise (which is the contemplation of the beauty of the Lord of Generosities, while the Wicked shall be annihilated (*ma'dūm*)).

Rites. The Ahl-i Hakk have a number of practices which are quite original.

1. We find little mention of individual prayer; on the other hand, the Ahl-i Hakk attach tremendous importance to assemblies (*dījam* < *dījam*) in which "all difficulties find their solution". The life of the community is eminently collective and the assemblies are held at fixed intervals and in connection with all important events. *Kalāmas* are recited at them to the accompaniment of music.

2. On solemn occasions sessions of *dhikr* (q.v.) are held. Specially qualified darwishes to the sounds of music (*sā*) enter into a state of ecstasy, accompanied by anaesthesia, which enables them to walk over burning coals, to handle them, etc.
3. The indispensable features of these assemblies are the offerings and the sacrifices: *naḥḥ wa-niṣā*

(raw offerings, uncooked, including animals of the male sex, oxen, sheep, cocks, intended for sacrifice) or *ḥayr wa-ḥāḥmat* (cooked or prepared victuals, like sugar, bread, etc.). The *Firḥān*, I, 74 counts fourteen kinds of bloody or bloodless sacrifices (*burhān-yi ḥāḥmāt wa-ni-ḥāḥ*). The ritual of sacrifice is regulated and the flesh is separated from the bones, which are buried. The boiled meat and the other offerings are distributed among those present and dedicatory formulae (*ḥāḥmāt*) are repeated. The term *sāḥ namādan*, "to render green, i.e. living, to reanimate", is applied to the ceremony (*Notes*, p. 210 [90]).

4. "Just as every dervish must have a spiritual director (*murshid*) so the head of every Ahl-i Hakk has to be commended to a *pir*". In the course of this ceremony (*sar sipurdan*) the persons symbolising the "Five (sic!) Angels" stand round the infant. A Muscat nut (*dījam-i ḥusn*) is broken by the celebrant as a substitute for the head. It is then worn as an amulet, with a piece of silver called *ḥasra* bearing the Shī'a form of the profession of faith (*ḥasra* from the Shī'a town of Hawra in Khuzistān; cf. *Notes*, p. 227 [107], and W. Caskel, *Ein Maḥdī des 15. Jahrhunderts, in Islamica*, 1931, 48-9, and the art. *MUGRA* (SHA)). Links recalling blood relationship are established between him whose head is commended and the line of the *dhayl* to whom the head has been commended. This spiritual relationship carries with it the prohibition of marriage between the individual dedicated and the family of the *pir*.

5. With the object of attaining moral perfection special unions (*nuclei*) are formed between a man (or several men) and a woman who are called brother and sister (*shar'i-ābrār*). The union is said to be formed in anticipation of the Day of Resurrection: *Notes*, p. 230 [110]; cf. the *ahh wa-niḥi* al-*dhayr* among the Yazidis (q.v.).

6. Fasting is rigorously observed but lasts only for three days, as among the Yazidis (q.v.). It takes place in winter and is followed by a feast. Among the divisions of the sect, only the Āṭash-begi do not observe the fast "for the days of the (final) advent are near" and instead of fasting they say one ought to feast.

For the other rites and customs see the *Notes* by Minorovsky (*ibid.*).

**Firḥān al-Aḥḥār**. The author of this treatise was Ḥādīdī Nī'mat Allāh of Dīayūn-ābād near Dinawar (1872-1920) who belonged to the Khāmūshī division and who believed the time had come to reveal the Real Truth (*ḥaḥīq*). His son Nūr 'Alī Shāh (b. 1313/1895) wrote the biography of his father and an introduction to the *Firḥān* under the title of *Naḥḥ al-ḥaḥīq*. While confirming much that was already known, the *Firḥān* represents a tradition different from that of the Āṭash-begi in as much as it makes no mention of "seven" epochs and reserves a special position for Khāwandagīr and Sultān Ṣohāb, while the number of manifestations of less importance is increased (Bābā Nā'ūgh, etc.).

The *Firḥān* consists of 4 parts. The first deals with the fundamental principles of the *ḥaḥīq* established in pre-eternity by the Divinity who in the stage of "yā-yi *ghayb*" became externalised in the garment of Khāwandagīr. The law remained concealed till the coming of Sultān Ṣohāb (Ṣohāb). Then the *dhayr* were recorded these doctrines but each in his own way and according to the sources which were accessible to him. As a result the Ahl-i Hakk community has no [single?] sacred book and

	I	II	III	IV	V
1. Khāwandagīr	Dīyārā'ī	Mikā'ī	Isrā'īl	'Arrā'ī	?
2. Murtadā 'Alī	Salāmīn	Kanbar	Ḥajrat-i Muḥammad	Nuṣayr	Fāṭima
3. Shāh Khoshīn	Bābā Buzurg	Kāḥā Redā (Rūdā)	Kore-Fakī	Bābā Tāhir	Māmā Djalāla
4. Sultān Ṣohāb	Benyāmīn	Dāwūd	Pir-i Mūsā	Khātūn Dāyira	Razbār
5. Kīmīdī (Shāh Waye Kulī)	Kīmīdī	Yārīdīn	Yārāl	Muṣṭafā Dowdān	Shāh Sawār
6. Mamad-beg	Dījamshīd-beg	Almīks-beg	Abdāl-beg	?	Agā
7. Khān Āṭash	Khān Dījamshīd	Khān Almās	Khān Abdāl	?	Pārī-khān-i Shart
					Dīstī Khānum

its divisions are distinguished by different views. The Ahl-i Hakk required a *baḥ-i ānā* which would be unique. So after 1324/1305 N'isnat Allāh, by God's command, abandoned the world and became the "messenger of the Lord of the Hour", i.e. of Pīr Benyāmīn (explained as *bis + yā + amīn* "faithful son of Ya"). Then comes the explanation of metempsychosis (*ḡardīn* *ān* *bi-dān* = "going from one garment to another").

The creatures of the world are divided into two distinct categories according to their original element (*asār-i ḡū* or *ḡāḡ-i āyāh*). To the first belong the Saved and Luminous beings whose respective *sardars* are Benyāmīn and Sayyid Muḥammad (in his avatar of Barzgar-sawār). To the other category belong beings of Fire and Darkness whose respective *sardars* are Iblīs and Khannās, with whom are associated the first three caliphs, Mu'āwīya, 'A'ishā, etc. The intermixture of the two categories of beings produces combinations which may be recognised even externally.

The second part of the treatise is mainly concerned with the correspondence of the avatars through the ages. Thus the manifestations of Benyāmīn are Noah, Jesus and provisionally (*mukānā*) Rustam of the Persian epic; those of Razbār: Bilkis, the queen of Saba; Mary, etc.; those of Sayyid Muḥammad: Zoroaster, the prophet Muḥammad, etc. Next we are given the history of Sūltān Ishāq (Shāh) and of his successors.

The third part relates the personal experiences of N'isnat Allāh and the communications which he received from God during his journey "to the beyond" (*asfar-i 'uḥā*), notably his mission to unite the *khānādāns*, to give absolution from sins (*az khayānat pāk namādan*) and to intercede (*ghīḡā'at*) with the Lord of Time.

The fourth part is the very full description of the rites and customs (*asr wa-nāḡ*), with the Gūrān text of the formulae recited on each occasion.

Distribution. The principal centres of the Ahl-i Hakk are in the west of Persia, in Luristān, Kūrdistān (land of the Gūrān east of Zohāb, town of Kerend) and in Ādharbāyḡdān (Tabriz, Mākū, with ramifications in Transcaucasia especially Karabagh). Little colonies of Ahl-i Hakk are found almost everywhere in Persia (at Hamadān, Teheran, at Māzandarān, Fīz and even in Kāzvin), to which, according to tradition, one of the brothers of Khān Ātāsh had gone. In 'Irāq there are Ahl-i Hakk among the Kurd and Turkoman tribes of the region of Kirkūk, of Sulaymāniyya and probably at Mosul.

Very little is known of the connection between the Ahl-i Hakk and the sects popularly known under the name of 'Alī Bāhī or by contemptuous terms like *ḡardīn-ḡardāns* ("extinguishers of lights"), *ghāwā-ghāḡā* ("daughters of cock") etc. (see BERTAGH, *ghūl-bāgh*, *ḡāḡī*, *ghāwān*). In any case, it is a striking fact that the direct influence of Ahl-i Hakk preachers of the district of Zohāb could be traced among the 'Alawī (Klāḡbāsh) of 'Aynāḡ; cf. Crowbridge, *The Alevis, Harvard Theol. Review*, 1909, 340-55, repr. in *MW*, 1921, 253-66.

Religious History. The Ahl-i Hakk possess a wealth of legends arranged according to the manifestations of the Divinity. The collections of these legends are known as *Sarandām*. The epoch of Khāwandgar is interesting only for its cosmogonic myths. The traditions relating to the epoch of 'Alī (which does not in any way form the central point) are inspired by the extreme Shī'a. The epoch of Khoshn is placed in a typically Lur (g.a.) environ-

ment, the geographical nomenclature showing an excellent knowledge of the localities of Luristān. One of the angels of Khoshn is Bābā Tāhīr (g.a.) whose quatrains in dialect are quoted. The fourth epoch is placed in the land of the Gūrān close to the river Sirwān. The sayings attributed to Sūltān Shāh are in Gūrān, which is the sacred language of the Ahl-i Hakk (cf. *Forbās*, I, 37). Minorities. *The Guran*, *USOS*, 1943, 77-103. The greatest sanctuaries of the sect: Bābā-Yādegār and Perdiwār, are situated in the same region. In the later epochs the scene is transferred to Ādharbāyḡdān and the *khāḡās* relating to these epochs are in Ādharbāyḡ Turkish. From these facts it may be concluded that the stages of propagation and development of the religion have been: Luristān—land of the Gūrān—Ādharbāyḡdān.

Exact dates are naturally difficult to obtain and we shall endeavour to proceed from the known to the unknown. Khān Ātāsh, born at Adjār (north of Marāgha) and buried in the village of Ātāsh-beg in the district of Haḡḡā-rūd, northeast of Mount Sahad, is said to have lived at the beginning of the 18th century (Notes, p. 41 [27]). This line was continued by his direct descendants, of whom the seventh was called Sayyid 'Abd al-'Aḡlān Mirzā (Aḡḡā-bāḡbāsh) and lived at Garrahān (also called Dūrū) on the Gāmāsāb to the south of Bisḡtān, where O. Mann visited him. He died in 1917 and was succeeded by his son Muḥammad Hasan Mirzā. The popularity of the Turkish poems of Shāh Ismā'īl Ṣāḡawī is significant; the *khāḡā*, known as *Kāḡḡ-nāma*, call Shāh Ismā'īl the "Pīr of Turkistān" (= Ādharbāyḡdān where Turkish is spoken). The spread of Ahl-i Hakk doctrines among the Turkoman tribes seems in any case to go back to an earlier period, that of the Kara Koyunlu rulers. The remnants of these Turkomans who live in a district in the centre of Mākū are Ahl-i Hakk. Similarly in Transcaucasia the Kara-Koyunlu in the region of Ganḡā live in the close neighbourhood of the Gūrān (< Gūrān). Shāh Ibrāhīm, whom many of the Ahl-i Hakk regard as the successor of Sūltān Shāh, and who lived in Baghdād and whose acolyte angel was Kūshī-ḡāḡī (author of Turkish *khāḡā*), is perhaps responsible for the dissemination of Ahl-i Hakk teaching among the Turkomans north of the Tigris.

Tradition places immediately before Shāh Ibrāhīm the famous Sūltān Shāh who (outwardly) was the son of Shāykh 'Alī and Khātūn Dāyira (Dāyārīk), daughter of Hasan Beg Djalid, chief of the tribe of Dīḡāḡ Murād. His real name is said to have been Sayyid 'Abd al-Sayyid. Barzindja, north of Sulaymāniyya, is said to have been his birthplace. He is said to have had seven sons from his wife Khātūna Baghlī, who are named *Kāḡān*. His tomb is at Perdiwār (in Awerānān lūḡā, see *senās*), on the right bank of the Sirwān.

The Kākā'ī chiefs of Ta'ūk claim to be his direct descendants (see al-'Azzāwī, *al-Kāḡā'īyya*). Shāykh Mahmūd, who after the World War proclaimed himself "King of Kurdistan" (cf. the article *Kūrdān*), claimed to be descended from the brother of Sūltān Shāh in the twelfth generation. At Kirkūk Minorsky found a MS containing a genealogy of that family.

The only definite indication of Bābā Khoshn's date would be his association with the poet Bābā Tāhīr (12th century) but here tradition is on very uncertain ground.

The Elements of the System. The religion of the Ahl-i Hakk is typically syncretist. At its foundations we find Shī'a extremism. It should be

noted that the Ahl-i Hakk always speak of the 12 imāma and as a result ought not (at least directly) to be connected with Ismā'īlism. According to the *Firhān*, the "religion of Truth" simply re-establishes the contents of the 10 *ghus'* which were suppressed in the received text of the Kur'ān, but in fact the Ahl-i Hakk deviate from the orthodox Shī'a to the extent of forming a separate religious system. The religious of the Ahl-i Hakk has in common with those of the Druzes and the Nusayris the worship of 'Alī, but 'Alī is completely overshadowed by Sūltān Shāh.

The other obvious element in the formation of the Ahl-i Hakk is the rites of the Ṣūfī darwishes: election of the *pīr*, agapes with *ghīḡ* and distribution of food, brotherly unions.

From the social point of view, the religion of the Ahl-i Hakk is professed particularly by the lower classes, nomads, villagers, inhabitants of the poorer quarters, darwishes etc. From this probably comes the hope that on the day of the last judgment "the sūltāns" will be punished (Notes, p. 44 [31]). On the other hand, the eminently popular character of the religion is apparent in the exuberance of the musical and folkloric element in the traditions of the Ahl-i Hakk. Amid the country people in the remote provinces which have at all times been outside the control of central governments, it is natural to expect to find survivals from olden times. The Divinity enclosed in the Pearl is a Manichaean idea (personal communication by Th. Nöldeke), like the belief in the purification of the "Luminous" in the course of their transmutations. The belief in metempsychosis cannot be directly Indian for it was already in existence in Ismā'īlism. The division of beings into two distinct categories is perhaps a later development of Zoroastrian ideas. The sacrifice of the cock has been several times connected with the corresponding Jewish rite (cf. I. Scheffelowitz, *Das stellvertretende Huhnopfer*, Gießen 1914), while the Biblical names (David, Moss) may have come through the intermediary of the Kur'ān. The alleged Christian influence ought not to be exaggerated: if the Ahl-i Hakk in their conversations with missionaries talk of Jesus and Mary, it should be remembered that, apart from these possibly being simply reminiscences of the Kur'ān, the Ahl-i Hakk regard them merely as avatars of their own pantheon. For the ages it is not necessary to go further back than the known darwesh practices (e.g. the Bekḡāḡ). The elasticity of the system of metempsychosis is responsible for the appearance of unexpected names in the myths. W. Ivanow has called attention to the name of Malak Tā'ūs (cf. *vayfols*) in a fragment containing traditions, found at Shīrāz.

Bibliography: The first references to the genuine Ahl-i Hakk are found in the European travellers at the beginning of the 19th century: Macdonald Kinneir, *A geographical memoir of the Persian Empire*, 1813, 141; G. Keppel, *Personal narrative of a journey from India to England*, 1817, II, 61 ff. H. Rawlinson, who commanded a regiment recruited from the tribe of Gūrān (Ahl-i Hakk), about the sect. Notes on a march from Zohāb, *JRCS*, 1859, 36, 39, 53, 57, 95, 97, 99, 105, 109. The Baron de Bode visited the shrine of Bābā Yādegār, *Bibliotheca d'ia Itoniya*, St. Petersburg 1854, t. xxiii, p. 45, cf. also his *Travels in Luristan*, 1845, I, 371-8, II, 180. The first general outline of the doctrines of the Ahl-i Hakk is in *Traits ans en Asie* by Gobineau, Paris 1859, 338-70,

who was in direct contact with the representative of the sect in Teheran, see Schemann, *Gobineau, eine Biographie*, Strasbourg, 1913, I, 506-7, and Minorsky, *Gobineau et la Perse, in Europe*, Paris, Oct. 1923, 116-27. A very interesting anonymous article (signed: Sh.) on the Ahl-i Hakk of Tabriz appeared in the journal *Karkas*, Tiflis, 1876, nos. 17, 29 and 30. The first authentic document of the Ahl-i Hakk (a *Kāḡā* of 34 verses, "the Credo") was published with important notes by V. A. Žukowsky in the *Zap.*, 1887, 1-25. The American missionary S. G. Wilson, *Persian Life and Customs*, 1896, collected a certain amount of information at first hand. In 1902 Minorsky acquired in Teheran an authentic Ahl-i Hakk MS., dated 1292/1843 and containing a collection of religious legends listed under epochs (see above), (*Kitāb-i Sarandām* "Book of the End, or Fulfilment") in Persian, and also a number of *Kāḡās* in Turkish (translated and published in Russian with a French summary: V. Minorsky, *Matériels d'ia tudeviya persidskoy sekhi "Ahl-i Hakk"*, Moscow, 1921, published as fasc. xxxiii of *Trudy* *so vostochnovedeniya iadaniyemim* *Lazarevskim Institutom*; id., *Notes sur la secte des Ahl-i-Hakk*, in *RMM*, 1920, 20-97 (p. 61-84; detailed bibliography containing 54 items), and *RMM*, 1922, 205-302 (also published in book form with certain additions); a review by F. Cumont in *Syria*, 1922, 262; V. Minorsky, *Un traité de polémique Bāḡāh-Ahl-i-Hakk*, in *JAI*, 1921, 165-7; D. Saad-Khan, *The sect of Ahl-i Hakk*, *MW*, 1927, 31-42; Gordievsky, *Kara-koyunlu*, in *12o. Omlistia tudeviya Azerbaydjana*, Baku, 1927; Ajarian, *Gyranas and Tawmanis, a newly found religion in Persia*, *Bull. de l'Université d'Erivan*, French translation by F. Macler in *RHR*, 1926, 204-307; Minorsky, *Études sur les Ahl-i Hakk*, I, "Tawmanis" — *Ahl-i Hakk*, *RHR*, 1928, 90-105; F. M. Stead, *The Ahl-i-Hakk sect in Persia*, *MW*, 1932, 184-91; Y. N. Marr, *Radeviye sekhi L'ndi istini* (in *V. Marr. Statyi i soobsheniya*, II, 1939, 248-54); Ch. P. Pittmann, *The final word of the Ahl-i Hakk*, *MW*, 1937, 147-63 (makes use of a text of the *Sarandām* which corresponds closely to that translated by Minorsky); W. Ivanow, *An Ahl-i Hakk fragment*, *Collectanea (The Ismā'īlī Society)*, I, 1948, 247-54, idem, *The Truth Worshipers of Kurdistan*, *Ahl-i Hakk*, Texts, Bombay 1953, (a third version of the *Sarandām*); 'Abbas al-Azzāwī, *al-Kāḡā'īyya fī'l-Ta'rīḡ*, Baghdād 1368/1949 (the Ahl-i Hakk of Kirkūk considered jointly with various 'Alī Bāhī; cf. *Oriens*, 1953, 407 ff.); Minorsky, *Un poème Ahl-i Hakk en l'urk*, *Wiedliche Abhandlungen R. Tschudi*, 1954, 258. The results of the researches of Minorsky amongst the Ahl-i Hakk (Teheran, Tabriz, Mākū, Kurdistan) and of his visits to the sanctuaries of the sect (Bābā-Yādegār, Perdiwār) have been set forth in his *Notes* (see above). In the same work there is a translation of the Bāḡā'ī polemic tract directed against the Ahl-i Hakk. Minorsky's other materials comprise numerous *Kāḡās* (in Gūrān and Turkish), and an important account of the collection of dogmas *Firhān al-Ahḡā* (see above), as well as an account of his visits to the sanctuaries of Kirkūk and Kirind (1934).

(V. Minorsky)  
AHL AL-HALL WA'L-'AKD (this, though illogical, is the normal order of the words), "those who are qualified to unbind and to bind", the representatives of the community of the Muslims who act on their behalf in appointing and deposing a caliph or

another ruler (see *ḥaṣṣa*). They must be Muslims, male, of age, free, *ʿadl* [q.v.], and capable of judging who is best qualified to hold the office. No fixed number of "electors" is required; according to the prevailing opinion, even the appointment made by one "elector" in the presence of two qualified witnesses is valid. This is the theory in fact, all through the history of Islam, the *ahl al-hall wa'l-ʿakd* have consisted of the persons who wielded political power in the capital, acting in association with the notables and prominent religious scholars. The thought of modernists and reformers occasionally identifies them with the whole of the community, or nation, with parliament, or with the body of religious scholars.

**Bibliography:** Joyntō, *Handbook*, 332; id., *Handwriting*, 335 f.; Santilana, *Islāmīyāt*, 3, book 1, § 13; H. Laoust, *Le Califat dans la doctrine de Rafīʿ al-Rāḍī*, Beirut 1938, index, s.v.; E. Tyan, *Institutions du droit public musulman*, I, Paris 1953, 172 ff., 334 ff.; L. Gardet, *La Cūḍ musulmane*, Paris 1954, index s.v. (Ed.)

**AHL AL-KAHP** (see *ASHAB AL-KAHP*).

**AHL AL-KITĀB** (A.) = "the people of the Book" [q.v.], appellation of the Muslims.

**AHL AL-KISĀʾ**, the people of the cloak. According to a tradition, Muhammad went out one morning—at the time of the visit of the Najrān delegation in 10/611 [cf. *MURĀḤĀLA*], wearing a figured black cloak; first Fāṭima, then ʿAlī and then al-Ḥasan and al-Ḥusayn came and he took them under his cloak, hugging them and quoting from Kurʾān, xxxiii, 32: "God only desireth to put away filthiness from you as his household, and with cleansing to cleanse you". The Sunnis explain filthiness as unbelief but the Shiʿa explain it as intercourse with the impure world, a parallel to the statement that the family lost the visible caliphate to win the invisible. Another version says that Muhammad threw his cloak over his uncle ʿAbbās and his sons saying: "Hide them from hell fire as I hide them from my cloak".

**Bibliography:** See *AHL AL-BAYT*, and L. Massignon, in *Vie et pensée*, Paris 1941, 1 ff. (A. S. TRITTON)

**AHL AL-KITĀB**, "possessors of the Scripture" (or "people of the Book"). This term, in the Kurʾān and the resultant Muslim terminology, denotes the Jews and the Christians, repositories of the earlier revealed books, *al-Tawrāt* [q.v.] = the Torah, *al-Zabūr* [q.v.] = the Psalms, and *al-Injīl* [q.v.] = the Gospel. The use of this term was later extended to the Sabaeans (*al-Sābiʾa* [q.v.])—both the genuine Sabaeans, mentioned in the Kurʾān alongside the Jews and the Christians (= Mandaeans), and the spurious Sabaeans (star-worshippers of Harrān)—to the Zoroastrians (*Maḍḍis* [q.v.]), and, in India, even to idolaters.

This article deals only with the doctrinal position of the Kurʾān, the *ḥadīth* and the controversialists concerning the Jews and the Christians. For their legal status as protected persons (*ahl al-dhimma*) on the fringe of the Muslim community, see *GHIMMA* and *ḡIYẒA*.

In the Kurʾān, the term does not occur before the end of the Meccan period. A possibly slightly earlier expression is *ahl al-dhār*, "possessors of edifications", witnesses of previous revelations [xv, 43 (45); xxi, 7], but *dhār* already denotes generally the Pentateuch and the Psalms.

The Kurʾān emphasises the community of faith between the possessors of the earlier scriptures and the adherents of the new revelation. It occasionally

pays tribute to their religious and moral virtues and calls on the Prophet to interrogate them. More often, however, as a result of the disappointment of Muhammad at the intransigence of the Jews of Medina and of the Christians with regard to his mission, he puts the emphasis on their failure to comprehend the message which they possess but do not put into practice, just as they fail to comprehend the new teaching which fulfils that message, on their exclusiveness, and on their impatient jealousy; they are therefore not to be treated as allies, but to be fought with: xxix, 45-7 (44-6); xlii, 14 (13); x, 93-5; ii, 105 (99); 109 (103); 111 (105), 135 (129); xviii, 1, 4, 6; iii, 19 (17), 23 (22), 64-5 (57-8), 69-73 (62-7), 75-6 (68-9), 77 (75), 98-100 (93-5), 110 (106), 113 (109), 159 (158); lvi, 29, iv, 153 (152), 171 (169); lvi, 21; ix, 29; v, 5 (7); 15 (18); 19 (22), 57-9 (52-4), 63 (70), 68 (72).

The Kurʾānic texts which mention the adherents of these two religions by their proper names (*Imān* [q.v.] and *Yahūd* [q.v.] for the Israelites of biblical history and the contemporary Jews of Medina respectively, *Nasārā* [q.v.] for the Christians) adopt similar viewpoints and determine the entire future attitude of Islam towards these two groups. The children of Israel are God's chosen people, recipients of his bounty, admitted to his covenant, beneficiaries under his law, to whom Paradise is assured. The Kurʾān recognises several episodes of their history: the bondage in Egypt, the crossing of the Red Sea, their wanderings in the wilderness, their sojourn before the Mount, their division into twelve tribes, their entry into the Promised Land and into the Holy City and the City by the Sea. But they distinguish themselves by their rebellious spirit and unbelief; they worship the golden calf, they demand to see God and they clamour for idols. Instead of believing in the prophets, they persecute them. They violate the Sabbath and infringe the Law; they are unconcerned in heart. Though guardians of the Scriptures, they alter them, conceal them and pervert their meaning; they are signaled by their opposition to all further revelations, and they are themselves divided into factions. Cursed by the Lord, metamorphosed into apes, punished in this world where they are doomed to humiliation, they are moreover consigned to Hell. They can only be saved by righteousness; they have on the other hand given rise to a just community.

This picture is coloured, like all Muhammad's conceptions of religious history, by his experiences and disappointments, which are expressed still more clearly in his pronouncements concerning the contemporary Jews and Christians.

At first the Kurʾān admits that Jews, Christians and Sabaeans can, like Muslims, achieve salvation through the performance of the rites of their respective religions, but this standpoint is not maintained. At Medina, the Kurʾān admonishes the Jews (recalling especially the divine protection vouchsafed to their ancestors) and summons them to Islam. Although certain Jews are praised and granted forgiveness, the tension, and finally the breach and conflict between the Jews and Muhammad, are reflected by the condemnation of their doctrines, by maledictions, and the ban on association between them and believers. Their sins fall into the moral as well as the religious category. Their attitude resembles that of their ancestors: eager to enjoy life, they fear death; ungrateful for God's blessings, they are careless too of the welfare of their doctors of religion; they practise usury, war among themselves, and

rush into iniquity and corruption. They preserve and study their Law, but do not hesitate to transgress it, to distort its phraseology and to conceal the truth. The prohibitions concerning food have been imposed on them as a punishment. Their enmity towards the Christians is not forgotten. Even their monotheism is questionable; they believe in the *Ḍjīl* and *Tāghūt* and deny *ʿUṣayr* [q.v.]. They ally themselves with the polytheists. Their attitude towards the Kurʾānic revelation, the advent of which has caused disunity amongst them, is compounded of hostility and unbelief. They are the worst enemies of Islam; they bandy words with the Prophet, are jealous of the believers, and are conspicuous for their mockery, their machinations, and their treachery. Assured of obliquity in this world, they are destined to Gehenna. [See also *YAMŪN*.]

As regards the Christians, God has made a covenant with them, and their salvation through their faith is admitted in several passages. Muhammad at one time credited them with a leaning towards Islam, and they are declared to be superior to the Jews, to whom they are opposed. But the condemnation of their doctrines is no less outspoken. Their exclusive claim to salvation and to the true religion is severely criticised; it would be a grave error to adopt their religion. The divinity of Jesus (*ʿIsā* [q.v.]), the reality of his Passion, the Trinity and monasticism are all rejected. They are threatened with Hell; affiliation with them is forbidden, and recourse to imprecation (*maḥāla* [q.v.]) proposed to them. The dissection between the Christian sects is not forgotten. [See also *NAḌĪRĀN*, *NASĀRĀ*.]

The attitude of Islam towards the Jews and Christians, as reflected in the *ḥadīth*, is one of mistrust. It stresses the importance of differentiating at all costs, as regards religious and social conduct, between the believers and these two religious groups, which are rather superficially understood. Moreover there is noticeable in Muslim tradition a clear tendency to stress the originality of those Muslim institutions which invite comparison with similar (mainly Jewish) institutions. Finally, the *ḥadīth* sometimes puts into a polemical context the condemnation of various abuses prevalent among the Muslims, as well as certain positions taken up in many internal controversies within the Muslim community. The principles and processes employed betray more than once their Jewish origin. The basic rule is: "do not act as do the people of the Book" (*lā tūfūkū*), which corresponds to the Talmudic ban on following the practices of the Gentiles (*hukhūl ha-goy*). By virtue of this principle, the *ḥadīth* condemns numerous practices of little consequence in themselves. But to Jewish *ḥalakhā* it opposes a certain degree of Muslim laxity, especially in sexual matters. It claims as purely Muslim (if it does not date back to "Israelite" antiquity or to pre-Islamic Arabia) an institution like the fast of *ʿAshūrā* [q.v.], which is in fact derived from the Jewish *Yom Kippūr* and is moreover virtually supplanted by Ramadan [q.v.], which again is found in the Kurʾān. Muslim tradition willingly underlines above all the enmity of the Jews, but also that of the Christians, ranging from certain episodes in the Prophet's life to eschatological disputes. Although Muslim tradition rarely gives evidence of direct acquaintance with large portions of the Judaeo-Christian Scriptures (information of this type stemmed from intercourse with the *ahl al-kitāb* or

was supplied by converts), this does not prevent it from accusing the inheritors of those Scriptures of suppressing certain portions which had fallen into desuetude (capital punishment for adultery in Deuteronomy) or which foretold the mission of Muhammad, and also of interpreting passages falsely and even of materially altering their sense. Discussion with the *ahl al-kitāb* is regarded with dislike, and consultation of their religious documents is deprecated as much by reason of the probable fraudulence of their owners as from the fact of the autarchy of the Kurʾānic revelation, which abrogates all that is antiquated in previous revelations and renders the remainder superfluous by superseding it. In contrast, the edifying stories connected with the antiquity of the *ahl al-kitāb* (*Isrāʾīliyyāt* [q.v.]) are tolerated.

The anti-Jewish and anti-Christian polemics of Islam display a remarkable consistency in their major themes from the writings of the controversialists of the 8th/9th-10th centuries down to the modernist apologues. Unlike the *ḥadīth*, they make use of a scriptural, theological, historical and sometimes liturgical knowledge which is ample if not always exact.

As regards their use of the two Testaments, Muslim polemics continually waver between two opinions: (a) the Judaeo-Christian Scriptures and their existing form are authentic documents which only require a suitable exegesis; (b) they are not to be trusted, either because their actual meaning has been falsified (see *TAFSĪR*), or because their recension and transmission do not afford the necessary guarantee of sincerity and authenticity, so that they cannot be accepted as the Torah and Gospel as actually revealed to Moses and Jesus. The first view prevailed in the 8th-10th centuries (what first view prevailed in the authenticity of "The Book of Religion and Empire", attributed to ʿAlī b. Rabban al-Tabarī, which includes a huge mass of scriptural arguments), whereas Ibn Ḥazm wrote the most penetrating literary, historical, theological and moral criticism of the Judaeo-Christian Scriptures. This method has been followed down to the modern polemic writers, who in addition utilise the rationalist bible-criticism of the 19th century in their attacks on Judaism and Christianity.

In the anti-Jewish polemics the chief theological problem is the abrogation (*naṣḥ*) [q.v.] of previous divine revelations, which does not imply *baḍʿ* [q.v.] (alteration of God's purpose). The principal charge levelled at Judaism, in most of the traditional compositions, is that of the anthropomorphic conception of the Deity.

The anti-Christian polemics are much richer in historical and theological argument. The message of Jesus has been altered by Paul, and the historical position of the Christian community has been falsified by Constantine. The christological controversies between the Melkites, the Nestorians and the Jacobites afforded ample material to the Muslim polemic writers. The Trinity, taken to mean tritheism, is irreconcilable with divine unity; the incarnation is a blasphemous offence against divine transcendence. Jesus may have had the prerogative of theopathic speech, but nothing more than a moral union can be involved (al-*ḡhazzālī*). Muhammad is the *Ḥaṣṣ*, and in clete foretold by the Gospel (see *AMMAN*), and in addition several messianic and eschatological prophecies of the Old Testament are similarly fulfilled in his person. Historically and sociologically, the astonishing success of Muslim arms and the superiority

of Muslim civilization are proofs of the truth and superiority of Islam. In al-Dhābi, there is a "sociological" study of Christianity and Judaism within the framework of Muslim society.

**AHL AL-NAZAR**, "those who apply reasoning". This term originally denotes the Mu'azila (q.v.), and it is probable that they coined it themselves. It occurs in Ibn Kutayba, *Ta'wīd Muḥallaf al-Hadīth*; passim; al-Ma'sūdi speaks of *ahl al-baḥth wa'l-naẓar*; synonym are *ahl al-kalām* (in al-Shāfi'i) and *al-muḥallafūn* (in al-Aḥqārī). Later, *ahl* (or *ashāb*) *al-naẓar* came to denote the careful scholars who held a sound, well-reasoned opinion on any particular question. See also NAẒAR. (E.)

**AHL AL-RA'Y** (see AḤD AL-RA'Y).

**AHL AL-SUFFA**, a group of Muhammad's Companions, mentioned chiefly in ascetic and mystical writings, where they have come to typify the ideal of poverty and piety. The *suffa* or *suffa* (often rendered 'bench', 'banquette', etc.) was, according to Lane, a long, covered portico or vestibule, which formed part of the mosque at Medina. This—the legend run—was the sole home of these men, and they spent their time in study and worship, except when in obedience to a command from Muhammad they went out to fight. They are sometimes said to have been as many as 400; Lane (s.v. *suffa*) quotes al-Sayyid Murādā as saying in *Tā* that he had made a list of 92 or 93 names. Abū 'Abd al-Rahmān Muhammad b. Husayn al-

Sulami (cf. Brockelmann, I, 200) write a history of them (al-Hudūdī, *Kaṣf al-Mahjūb* 2, R. A. Nicholson, Leyden and London, 1917, 81; Abū Nu'aym, *Hilyat al-Awliyā'*, I, 337-47). According to L. Massignon (*Essai sur les Origines du Lesque Technique de la Mystique Musulmane*, Paris 1922, 140), al-Muḥallafī, Ibn Kurrān, and al-Tustarī admitted the authenticity of the legend, and it was defended by Abū Nu'aym, Ibn Tāhir, al-Makdīsī and al-Subbī. (For the latter cf. Brockelmann, II, 87.) It also appears in al-Ghazālī, where there is an anecdote contrasting the *ahl al-suffa* with *al-mu'allafā hūlūhūm*, 'those whose hearts are reconciled' (*ḥiṣṣā*), iv, book 34, bayn *ḥadīth al-faḥr muḥallaf*; cf. al-Sayyid Murādā, *Ḥadīth al-Suffa*, 48, 273-8. Ibn Taymīyya, though in the main an opponent of *tasawwuf* or mysticism, developed his conception of the true nature of the religious or devotional life by describing the piety of the Companions, and in this gave a prominent place to the men of the *suffa* (esp. *Risāla fī Ahl al-Suffa*, in *Madjma' min al-Rasā'id wa'l-Ma'ad' al-Kayyama*, Cairo 1349/1930, I, 25-60). The supporters of the legend claimed that Kur'an, II, 273/4 (and other verses such as vi, 52, xvii, 28/7, and xlii, 27/6) referred to this group; but the orthodox commentators express hesitation about this attribution (cf. al-Bayḍawī on II, 273/4, 'it is said') or neglect it altogether (al-Tabari on the same).

The factual grounds for the legend are slight. The later lists include names of persons who were either poor or pious but not necessarily both; among the 34 persons mentioned by al-Hudūdī (cf. 82-3) is Abū Lubāba, one of the most influential men in Medina, who was wealthy enough to present a balcony to the *maḥall al-dīnār* (al-Wāḥidī, tr. Wellhausen, 410). In the early account in Ibn Sa'd, 1/2, 15-4, those named are Wāḥila b. al-Aṣka', Abū Hurayra, Abū Dharr and Kays b. Tāḥa al-Ghaffārī; while from the (possibly not exhaustive) index to Ibn Sa'd (s.v. *suffa*, 1/2, 26) we learn that 'Abd al-Rahmān (b. Ka'b) al-Asammī, Ḍarḥad b. Razāh al-Aslamī, Raḥīf b. Ka'b al-Aslamī, Asma' b. Hāritha al-Aslamī and Talha b. 'Abdallāh (or b. 'Amar) al-Nadīr al-Laythī belonged to the *ahl al-suffa* (Ibn Sa'd, 1/2, 48; 1/2, 33, 44, 51; vi/1, 35). The first report in Ibn Sa'd, 1/2, 13 f. emphasizes not the poverty of the men of the *suffa* but the fact that they had no dwelling in Medina, but other parts of the material there speak of their ragged clothing. This suggests that those who slept (perhaps only temporarily) in the *suffa* were men from the less influential tribes round Medina who had no confederates to put them up in Medina apart from Muhammad. Some of them were prominent in their tribes, and so presumably not poverty-stricken. Muhammad apparently also invited a few poor followers to share his meal, but this probably happened only occasionally (cf. Ibn Sa'd, 1/2, al-Buḥārī, *Mawḥiṭ al-Salāt*, 41).

The legend must have begun to grow before the time of al-Wāḥidī (d. 207/822), himself an Aslamī, since Ibn Sa'd's material on this point comes from him. The statement that Kur'an, II, 273/4 referred to the *ahl al-suffa* is passed on as from Muhammad b. Ka'b al-Kurāḥī. Though scholars are now agreed that *suffa* is derived from *sūf*, wool, the similarity in sound of *suffa* encouraged the legend, and it was said, for example, that a *sūfi* was one who resembled the *ahl al-suffa* in character (al-Kalābādhī, *al-Ta'arruf*, ed. tr. J. Arberry, Cairo 1934, and Cambridge 1935, ch. 1; cf. al-Hudūdī, op. cit. 30).

**AHL AL-SUNNA**, the "Sunnite", i.e. the orthodox Muslims (see *SUNNA*).

**AHL-I WĀRIS**, in general use among the Muhammadan peoples of Indonesia with the meaning of Arabic *awāḥid*. The word is taken from the Persian usage and has reached the East Indian archipelago via India.

**Bibliography:** Ph. S. van Ronkel, *Over de herkomst van enkele Arabische hartsaardwoorden in het Maleisch*, in *TG*, xlviii, 189 ff.

**AHLĀP** (see *HLĀP*).

**AHMAD**, one of the names of the Prophet Muhammad and a proper name used by Muslims. Formally, it is the elative of Mahmūd or Ḥamid and means "more, or most, worthy of praise", or, less properly, of Ḥamid, in which case it would mean "praising [God] to a higher, or the highest, degree". As a proper name it is, however, distinct from the other, etymologically connected forms, including the name Muhammad. It occurs occasionally, and less frequently than Muhammad, among the pre-Islamic Arabs. In the Sāfiitic North-Arabian inscriptions of the Syrian borderland, names of this form seem to occur as abbreviations of composite theophoric names of the scheme "God is praiseworthy"; but whether the same is true of literary Arabic in the Hijāz is subject to doubt.

The basis of its use in Islam is Kur'an, Ixi, 6: "And when Jesus, son of Mary, said: 'O Children of Israel, I am God's messenger to you, confirming the Torah which was before me, and announcing the good tidings of a messenger who will come after me, whose name is Ahmad.'" There is no obvious parallel to this passage in the New Testament. It has therefore been suggested that Ahmad is the translation of *periklitos* "celebrated", which in its turn would be a corruption of *paraklitos* "the Paraclete" in John, xiv, 16, xv, 27. But the history of the text and of the translations of the Gospel, together with the fact that *periklitos* was not common in contemporary Greek, shows this to be impossible. The Muslims did indeed apply to Muhammad the prediction of the Paraclete, before the middle of the 4th century A. H. (Ibn Hishām, 150, quoting Ibn Ishāq); but the terms used were either the Greek *paraklitos* or its correct Aramaic translation *m'nash'mānā*; this identification is based only on the assonance between the Aramaic word and the name Muhammad, and seems to have been suggested by Christian converts to Islam.

Whereas the name Muhammad was used by Muslims from the lifetime of the Prophet onwards, and the forms Mahmūd, Ḥamid and Ḥumayd occur in the first century of Islam too, the use of Ahmad as a proper name among Muslims seems to begin only about 125/740. From this it has been concluded that the word *ahmad* in Kur'an, Ixi, 6 is to be taken not as a proper name but as an adjective (the verse might then contain an obscure reference to John, xiv, 12), and that it was understood as a proper name only after Muhammad had been identified with the Paraclete. Occasional references to the Prophet as Ahmad in the poetry of the first century are accordingly explained as caused by the necessity of the metre. Traditions which state that the name of the Prophet was Ahmad (Ibn Sa'd, 1/2,

64 f.) are regarded as proposing an interpretation which had not always been obvious. But the original hesitation of the Muslims to use the name Ahmad is sufficiently accounted for by the form of the word as an elative, even though it was a proper name from the beginning.

**AHMAD I**, fourteenth Ottoman sultan. Eldest son of Mehmed (Muhammad) III, born at Manisa 22 Jumhād II, 998/18 April 1559, succeeded his father 18 Rajab 1012/22 Jan. 1603. The chroniclers have noted that on his accession, contrary to established custom, he did not put to death his brother Mustafa, and the latter later succeeded him. One of the first acts of the sovereign was the confinement in the old Seray of his grandmother Şāfiya Sultān (the Venetian Baffa), the prime mover in the Ottoman administration under Murād III and Mehmed (Muhammad) III. Ahmad sent an army under the command of Çiğdem-zāde Sinān Paşa (q.v.) against the Persian troops of Şah 'Abbās I, who had just gained possession of Erzurum and Kars but had been repulsed in front of Akkisa. Sinān Paşa, however, was defeated at Salmas (9 Sept. 1605) and shortly afterwards died of chagrin in Diyarbakir, while Şah 'Abbās probed by his victory to recover Gandja and Shirvan. In Hungary the Grand-Vizier Lālī Mehmed Paşa (see *MUHAMMAD PAŞA*), after experiencing setbacks before Pest and Estergom (Estergom, Gran), captured Wač (Vác, Watten). In a second campaign, in which he was supported by the ruler of Transylvania, Stephan Bocskay, he was able to isolate and storm the fortress of Estergom (4 Nov. 1605), while Tiryākī Hasan Paşa entered Wesprim (Veszprém) and Palota. Bocskay was invested with the principalities of Transylvania and Hungary. Soon afterwards the Grand-Vizier died, and his post was held successively by Darvīsh Paşa and Murād Paşa (q.v.), surnamed Kuyudju ("the well-sinker"), who signed the treaty of Zaitvorok (11 Nov. 1606) with the Austrians, whereby the Ottomans were left in possession of the territory which they had conquered and received in a single, definitive payment an indemnity of 200,000 *kara ghurāsh*, but contracted to accord the Austrian sovereign the title of "Emperor" and not merely "King", a step which would give him equality of status with the Sultān. Conferences were held at Neuhausel in 1608 to settle the final details of the treaty, and at Vienna in July 1615 and March 1616 to extend its validity. Internal difficulties had forced the Ottomans to sign it; revolts, caused by repeated military levies and by the exactions of certain governors, had broken out in various parts of the empire. Kuyudju Murād Paşa was despatched against the rebels, and triumphed over Musli Cavuşlu at Lāranda, over Djamshīd at Adana, and notably over Lārānā-oghlu 'Alī Paşa in the plain of Orđū, near Baylen (24 Dec. 1607). In the west, he attacked Kavalend-oghlu Mehmed (Mohammad) Paşa, who held the districts of Brusa and Manisa, and defeated him at Alīmāyır (5 Aug. 1608). In Syria, the Turkish forces launched themselves against the Druse amir Faḡhr al-Dīn b. Ma'n (q.v.), but could not win a decisive victory. The Grand-Vizier, at the age of 90, then set out for Tabriz, but shortly after opening peace negotiations with the Şah of Iran,

he died. His successor Naḥḥ Paḥḥa [g.e.] concluded in 1611 a peace treaty which fixed the demarcation of the frontier on the basis of the settlement made during the reign of Selīm II, but hostilities were resumed four years later. At sea, the Grand-Admiral Khālīl Paḥḥa [g.e.] achieved important successes against the Florentine and Maltese fleets. In 1609, six Maltese galleons were captured in Cypriot waters, including the "red galleon" of Commander Fresinet (battle of Kani Dīshammān); in 1610, the Turks suffered a setback at Lepanto, and the Maltese Corsairs were checked at Coe; in 1612 a Florentine squadron raided the Cilician coast, near the port of Aghullmān, and 1614 Khālīl Paḥḥa inflicted some losses at Malta. In the Black Sea, the Cosacques, who had sacked Sinope, were overtaken and defeated at the mouth of the Don by Shākhshīdī Ibrahim Paḥḥa; another Cosack attack in Moldavia was checked by Iskender Paḥḥa, and peace was signed at Buzsa, on the Danube, on 27 Sept. 1617. Under Ahmad I, the capitulations with France, England and Venice were renewed (1604), and similar capitulations were concluded for the first time with the Netherlands (1612). The use of tobacco became widespread in Turkey during the reign of Ahmad I devoted himself to the promulgation of a *kāḍm-nāme* designed to establish an authoritative code of the administrative and commercial regulations of the empire, hitherto not co-ordinated. He constructed (1609-1616) in the At Meydan at Istanbul the magnificent mosque which bears his name. He died 23 Dhu'l-Ka'da 1026/22 Nov. 1627 after a two months' illness. Of a violent and changeable nature, and easily swayed, Ahmad I was not always capable of appreciating the services of his most able ministers; a pious man, he established numerous religious foundations, and even furnished the Ka'ba with ornaments. He was passionately fond of hunting and *gürdā*, and took a close interest in poetry.

(R. MANTHAN)

**AHMAD II**, twenty-first Ottoman sultan. Son of sultan Ibrahim and Mu'azzaz Sultān, born, according to Na'mā, 6 Dhu'l-Hijja 1052/25 Aug. 1643 (according to Rashīd 5 Dhu'mādd II on 26 Ramadan 1102/21 June 1691). He confirmed the Grand-Vizier Köprülü-zāde [g.e.] Fādīl Mustafa Paḥḥa in his post, and the latter resumed hostilities against the Imperial Powers, but was defeated and killed at the battle of Slankamen (19 Aug. 1691). 'Arābadī 'Alī Paḥḥa succeeded him, but was soon replaced by Hādījī 'Alī Paḥḥa who, in 1692, conducted his campaigns with great caution. In the same year, the Venetians made an unsuccessful attempt on Canea. As the result of a dispute with the sultan, Hādījī 'Alī Paḥḥa was dismissed from office, and his post given to Bozoklu Mustafa Paḥḥa, who forced the Austrians to raise the siege of Belgrade (1693). Dismissed in his turn, he was succeeded by Sūrmīl 'Alī Paḥḥa [g.e.], who failed

in an attempt to capture the fortress of Peterwardein (1694), while the Venetians gained control of Gabelia in Dalmatia and of the important island of Chios. During the reign of Ahmad II, there were disturbances in 'Irāk and the Hijāz, and in the west, Tunis was attacked by both Tripoli and Algiers. A sovereign of weak personality, and continuing swayed by his entourage, Ahmad II was in addition addicted to drink, and died of dropsy 22 Dhu'mādd II, 1106/6 Feb. 1695 at Adrianople. He was buried in the *turbe* of Kānūnī Sulaymān at Istanbul.

**AHMAD III**, twenty-third Ottoman sultan, son of Mehmed IV (Muḥammad IV, [g.e.], born in 1084/1673, he succeeded his brother Murād IV [g.e.] on 20 Ka'bi II 1115/21 August 1703, when the latter abdicated in consequence of a rising of the Janissaries. The leaders of this rising were soon got rid of by the new sultan on his immediate re-establishment of Istanbul as the habitual residence of the court; and for the next few years large numbers of persons known to have, or suspected of having, been implicated in it continued to be dismissed, banished or executed, to the detriment of governmental efficiency. Ahmad's resolve to break the power of the soldiery was also shown by his dismissal from the palace service of 700 *hoshangīs* and their replacement by *değhirmes* (cups) (this being the last application of the *değhirmes*), as well as by his later drastic reduction of the Janissary establishment. Nevertheless during the first half of his twenty-seven years' reign in particular he lived in a morbid dread of "revolutionaries" (*ihmūdīler*); for three years he was unable, though making four changes in the Grand Vizierate, to find a capable minister; and it was only with the appointment in Muharram 1118/May 1706 of Corulu 'Alī Paḥḥa [g.e.] that the government regained some stability. During this period, and indeed for the following eight or nine years, his actions were largely influenced by a palace camarilla, headed by the Walide Sultān, the Kizlar Aḡash, and the sultan's favourite, later to be known as (Shehid) Sūlāḥdīr Dāmād 'Alī Paḥḥa [g.e.]. The sultan and the camarilla were always uneasy at the appointment to the Grand-Vizierate of "outsiders"—i.e. persons not of the palace service, such as Köprülü Nu'mān Paḥḥa (see below), and took fright at any initiative they might display.

No event of much note occurred during the reign until July 1709, when, after being defeated by Tsar Peter the Great at Poltava, King Charles XII of Sweden, nicknamed in Turkish *demir baş*, "Iron Head", sought refuge at Bender on the Danube in Ottoman territory. The Porte had so far made no attempt at profiting either by the preoccupation of Austria and the western powers with the War of the Spanish Succession to recover any of the territory lost to the sultan in 1699 by the Treaty of Carlowitz, or by the preoccupation of Russia with the "Great Northern War" to nullify the concessions to the Tsar's Black-Sea ambitions agreed to in the Russo-Ottoman treaty of 1700. Charles, however, in order to retrieve his fortunes, soon began urging the

sultan to take up arms against Peter, an action to which the Porte was also incited by successive ambassadors of Louis XIV and the Venetian representative at Istanbul, with the result that in June 1710 Corulu 'Alī, who had but recently renewed the Russian treaty, was dismissed, and yet though his successor, Köprülü [g.e.], Nu'mān Paḥḥa, proving too independent for the taste of the camarilla, fell in turn two months later, his replacement in September by the pliant intriguer Baltadī Mehmed Paḥḥa (see MUHAMMAD PAḤḤA), who had shown his incapacity when in office earlier, was followed on 20 Nov. by a declaration of war, the main Ottoman grievances being the Tsar's construction of workshops at Asov, his erection of a number of fortresses along the Ottoman frontiers, his interference with the Tatars subject to the *Khān* of the Crimea, and his incitement of the sultan's Orthodox subjects to disaffection.

The opposed armies met only in July 1711, after Peter had been enabled to overrun most of Moldavia owing to the treachery of the hospodar Demetrius Cantemir [g.e.]. But by then he had run gravely short of food supplies and was surprised by the main Ottoman army when marching south along the Pruth with the intention of seizing Ibrā'īl; he was forced to retreat; and was eventually surrounded and obliged to sue for peace. A treaty was signed forthwith by which Peter agreed to retrocede Asov and raze the other objectionable fortresses, to interfere no further either with the Tatars or in the affairs of Poland, no longer to maintain an ambassador at Istanbul, and to cease intriguing with the sultan's Orthodox subjects. Since, however, the Grand Vizier could have forced the Tsar to almost any concession, he fell under suspicion of having been bribed into the acceptance of such lenient terms and was dismissed three months later, largely as the result of further intrigues on the part of Charles, whose hopes had been disappointed by the treaty. Charles continued indeed for most of the next three years to incite the Porte to a renewal of hostilities, a task made easier by Peter's failure to observe his undertakings. Largely as a result of the king's efforts war on Russia was again actually declared no less than three times (in Dec. 1711, Nov. 1712 and April 1713), though it was always averted by Russian concessions. A final agreement with Peter was reached only in June 1713, with the signature at Adrianople of a treaty, to remain in force for twenty-five years, whereby the terms of the Treaty of the Pruth were confirmed and peace with Russia was in the event established for a long period. Charles, persisting in a refusal to quit Ottoman territory unless provided with money and troops with which to recover his losses in Poland, was at length, in the spring of 1714, removed forcibly from Bender to Demotika and then to Demirtaş Paḥḥa Saray near Adrianople, and was obliged in the autumn to return home with his Swedish troops via Wallachia, Transylvania and Hungary.

Meanwhile, on 27 April 1713, Ahmed's son and heir-law, Sūlāḥdīr 'Alī Paḥḥa, had been appointed Grand Vizier himself; and it was by his policy that peace was thus re-established with Russia, so that the Porte might seek to regain what had been lost to Venice at Carlowitz. Venetian rule had proved exceedingly unpopular in the Morea, the Orthodox inhabitants of which had sent repeated appeals to the Porte for deliverance from their new masters. But a suitable pretext for war against the republic occurred only in 1714, when, after the

suppression of a Russian-instigated rebellion in Montenegro, the Venetian government refused to extradite the Vladika and other eminent Montenegrins who had sought refuge in Venetian territory. War was declared on Dec. 1714, and in the following summer within two months (June-July) an Ottoman army under Sūlāḥdīr 'Alī's own command, operating in conjunction with the sultan's fleet, conquered the whole province with but little serious fighting, while the fleet also took the islands of Tenos, Aegina, Cerigo and Santa Maura, and reduced Suda and Spinalonga (in Crete), which had remained till then in Venetian hands.

These Ottoman successes, and the possibility that Corcu and the Venetian possessions in Dalmatia might also fall into the sultan's grasp, alarmed Austria. In April 1716, accordingly, the Emperor Charles VI concluded a treaty of mutual assistance with Venice, and in June provoked the Porte by an ultimatum into a declaration of war. It opened with an unsuccessful attack by the Kapudan Paḥḥa on Corcu, and this was followed in August by a rout at the hands of Eugène of Savoy near Peterwardein of the Ottoman main army commanded by Sūlāḥdīr 'Alī, who was mortally wounded on the field. Eugène followed up this victory with the reduction of Temesvár and the occupation of the Banat and Little Wallachia in the autumn; and in the summer of 1717 laid siege to Belgrade, where on 16 August he completely routed a superior Ottoman relieving force. The Belgrade garrison surrendered three days later, after which, though the Austrians failed in an attempt to overrun Bosnia, there was no fighting of importance. The Porte soon made proposals for an armistice; and peace was eventually signed, on 21 July 1718, at Passarowitz (Passarof, Pödravac), whereby Belgrade and the region about it, the Banat, and Little Wallachia were ceded by the Porte to Austria, while the Morea, the Cretan ports and Tenos, as well as the south-eastern districts of the Hercegovina were ceded to the Porte by Venice, which for its part received Cerigo and the strongholds the Venetians had captured in Albania and Dalmatia. A commercial treaty further secured to Austrian and Venetian traders certain advantages they had not till then enjoyed.

The Grand Vizier responsible for this treaty was another favourite of Ahmad's: Newshēhīrī Ibrahim Paḥḥa [g.e.], who by marrying the sultan's thirteen-year-old daughter, Fāṭime Sultān, formerly the nominal wife of Sūlāḥdīr 'Alī, had also become a *dāmād*; and for the remaining twelve years of the reign, which with this entered upon its second phase, he entirely dominated the court. Ahmad was of a pleasure- and art-loving nature, and with Ibrahim, who shared his tastes, was able, as he had not been able with the warlike Sūlāḥdīr, to indulge them and set new fashions for Ottoman society. The gradual abandonment of the *değhirmes* during the 17th century had led, with the occupation of the chief governmental posts by free-born Muslims, to a growth of interest among the powerful in the arts and learning, side by side with a decline in military and administrative efficiency. Moreover the Greek community of the Phanar quarter had at the same time acquired both a stronger influence than before in metropolitan society and some familiarity with contemporary western thought. In consequence the twelve years ensuing on the peace of Passarowitz witnessed a remarkable change of taste in poetry, music and architecture and a new inclination to profit by European example. During this short

period—known as *lâle devri*, "the Age of Tulips", the cultivation of which became for some years a "craze", and the secular spirit of which is exemplified by the poet Nâdir (g.e.) in the verse "Let us laugh and play and enjoy the world"—pavilions and gardens were more often built than mosques and mausoleums, and they were built to designs imported from the west. An ambassador accredited to Louis XV received specific instructions to study French institutions and report on those adaptable to Ottoman use; and in 1724 his son assisted Ibrahim Muterrikkâ (g.e.) to establish the first printing press in Istanbul. A French officer of Engineers was invited by the Porte to prepare plans for the reform of the army on western lines, while a French convert to Islam organized a fire service (the *ciğak* of the *tuismâdeği*); and though the reform of the army came to nothing, the organization of the Admiralty was overhauled and the building of three-decker men-o-war was undertaken for the first time. Some of the 'ulama further founded a society for the translation of books (from Arabic and Persian); the export of rare manuscripts was prohibited for educational reasons; and no less than five libraries were founded at the capital, including the sultan's own Enderin-i Hümayûn Kütüb-ihhâsi, of which Nâdir was made curator. Chain factories at Kütahya and Irmid were revived and a new one founded at Tekfir Sarayı at Istanbul; extensive repairs to the Byzantine walls were carried out from 1722 to 1724; and a barrage was built to provide water for the capital from springs at Belgrade. The most notable extant architectural monuments of the period are the mosque built by Ahmad III for his mother at Üsküdar and his *şehme* outside the Bâb-ı Hümayûn of the Topkapı Sarayı, for which he composed the chronogram himself.

It was Ibrahim Pasha's policy to avoid war. Nevertheless the Tulip Age saw the temporary extension of Ottoman rule over large tracts of western Persia. The decline of the Safavids and the Afghan invasion of their dominions, culminating in the capture of Isfahân in 1735/1722, had plunged the country into a state of anarchy tempting to both Russia and the Porte. In 1735/1723 Ottoman forces occupied Tiflis, and on Russia's ceding Darband and Bâkû in the same year, in 1724, after a period of tension during which a fresh war between Ahmad and the Tsar came near to breaking out, another Russo-Ottoman treaty was concluded, providing for a partition that should leave Peter in possession of Darband, Bâkû and Gilân and the sultan in that of Georgia, Erzerûm, Şirvân, Ârdâhan, baylîk and all Persian territory west of the line Ardâbil-Hamadân. Ottoman forces in fact took over all this vast region, the Porte forming it into some ten new *eyâlets*. But when in April 1725 the Afghan Ashraf proclaimed himself shâh, he demanded the relinquishment of these conquests; and on the Porte's refusal eventually, in November 1726, defeated Ahmad Pasha (g.e.) commanding the Ottoman forces in Persia. However, a year later Ashraf was obliged to make peace; and the sultan's sovereignty over the conquered provinces was recognized. From then until 1730, accordingly, these regions formed part of the Ottoman Empire. But in 1729 Ashraf was overthrown by the future Nâdir Shâh, who in the following year defeated the Ottomans and obliged them to relinquish all their gains.

The result was a revolt of the people at Istanbul, to suppress which Ibrahim and the sultan hesitated until it was too late. The Muslims of the capital,

though they had at first disapproved the Persian conquests, were now indignant at their loss. But Ibrahim Pasha was anxious to avoid further fighting and prepared for it only under pressure from public opinion; moreover he was already unpopular for the nepotism he practised to secure his own position and for the fiscal policy he had pursued; the new luxurious and "Frankish" manners of the court were disliked by the conservative and resented by the poor; and the project of army reform had alarmed the Janissaries. The leader of the revolt was a Janissary "affiliate", an Albanian, formerly a *levend* and hence (cf. *şavur*) called Patrona Khâlîl, who acted under the influence of two disaffected 'ulama and with the approval of many Janissary officers. It began on 28 Sept. 1730; and in a few hours a partially armed crowd of thousands had gathered in the At Meydan. Ahmad and Ibrahim were in camp at Üsküdar; but on learning of the outbreak in the evening, they returned to the palace at night. For the next two days fruitless attempts were made to parley with the rebels, who demanded the delivery up to them of the Grand Vizier, the Şeyhül-islâm, the Kapudan Paşa, the Kâhya Bey and others, till, during the night of 30 Sept., the sultan, finding no support in any of his troops, decided to sacrifice his favourite, whose corpse, together with those of the Kapudan and the Kâhya, was brought out to them in the morning. Ahmad himself agreed to abdicate on condition that his own life and the lives of his sons should be spared, and was accordingly succeeded on 1 Oct./18 Rabi' I 1143 by his nephew Mahmud I (g.e.). He died, in the retirement that was henceforth his lot, in 1149/1736.

Ahmad III was handsome of person and an accomplished calligraphist, letter-writer and poet. Though normally of a mild disposition, he was ruthless in the treatment of those whom he feared or who had incurred his displeasure. He had no taste for war, partly because of the expense it entailed; for he was exceedingly fond of money and applied himself to the accumulation of treasure. His love of amusement and display ran counter to this propensity. But Dâniş İbrahim Pasha contrived to minister to both his avarice and his extravagance by increasing the revenues and curtailing other expenditure in ways that contributed to his unpopularity. Ahmad was greatly attached to his harem, to which he gave much of his attention, but he did not allow its members to influence public affairs as some of his predecessors had done. He had no less than thirty-one children; and his reign was consequently distinguished by the numerous attempts to celebrate the circumcision of his sons and the marriage of his daughters, which lent it a special air of gaiety.

Minor events of the reign were a revolt of the Muntafik (g.e.) Arabs in the neighbourhood of al-Basra in 1171/1705; the suppression of another Arab revolt in the same region in 1272/8; the affirmation of Ottoman sovereignty over certain areas of the Caucasus bordering on the Black Sea early in the reign; the conquest of Oran (Wahran) from Spain by Algerian forces in 1708; recurrent troubles in the Armenian *millet* occasioned by Jesuit propaganda (particularly in 1706-7 and 1727-8); and two insurrections in Egypt (in 1712-3 and 1727-8). Successive *âşuks* of the Crimea played a considerable part in the events of the period, more especially in the war with Russia, the *âşuk* Devlet Girây (g.e.) in particular strongly supporting Charles XII in his anti-Russian schemes. During the war with Austria

the Porte accepted an offer of assistance from Francis Rákóczy, the Prince of Transylvania, after the final failure of his attempts to secure the independence of Hungary, but he reached Istanbul too late to be made use of. Finally the treachery of Cantemir and his fellow-Hospodar of Wallachia during the campaign of the Pruth resulted in the appointment from 1716 onwards of Phanariote Greeks to the governorship of the Principalities.

(H. BOWEN)

**AHMAD B. ABİ BAKR** (see MURTADHUS).  
**AHMAD B. ABİ DU'ÂD** (Ibn al-Ahwâl, 'Aso ALI), Mu'tazilite kâdî born at Basra about 160/776. Through his own merit and also, it is said, through the good offices of Yahyâ b. Aktham (g.e.), who introduced him to the Court at Baghdad, he reached a position of great honour under the Caliph al-Ma'mûn, soon becoming one of the Caliph's closest friends. Shortly before his death, the Caliph recommended his brother and successor al-Mu'tasim to admit Ahmad, a fervent follower of the Mu'tazilite doctrine, to the circle of his advisers, and as a result al-Mu'tasim, after his accession (218/833) made Ahmad his Chief Kâdî. In the latter capacity he presided over cases heard before the court of inquiry which had been set up by al-Ma'mûn after the elevation of al-Mu'tasim to the status of the state religion (see *musul*), and he consequently played an important part in the examination of Ahmad b. Hanbal (g.e.). In the discharge of his duties he nevertheless displayed a tolerance and humanity unusual at that time. He retained his post under al-Wâthiq; at the death of the latter several high officials and officers wished to place

his son, a minor, on the throne, but at the instance of the commander of the Turkish guard, Wasil, the brother of the late Caliph al-Du'âd, was proclaimed Caliph, and Ahmad himself gave him the title of al-Mutawakkil. The new Caliph, however, gradually adopted a hostile attitude towards the Mu'tazilites and established amicable relationships with the Sunnis, with the result that the Chief Kâdî could not maintain his position of influence. A short while after the accession of al-Mutawakkil, he suffered an attack of apoplexy, and handed over his office to his son Abu 'l-Walid Muhammad, who had been his *na'ib* since 218/833 (L. Massignon, in *WZKM*, 1948, 107). The latter was dismissed in 237/852 and, with his brothers, thrown into prison, and all the property of Ibn Abi Du'âd was confiscated. The prisoners were eventually released, but Ahmad and his son did not long survive their disgrace; Muhammad died at the end of 239/May-June 854, and his father three weeks later, in Muharram 240/June 854.

Sunni writers naturally pass a severe judgement on Ahmad b. Abi Du'âd and, in the religious sphere, do not conceal their hostility towards him, but all recognize his great learning and magnanimity. Himself endowed with some poetic talent, he was courted by the poets of his own circle. He was the patron of many *usûl* writers notably of al-Djâlibî (g.e.), who dedicated to him *inter alia* his *al-Bayân wa 'l-Tabyîn*, and addressed to him, either directly or through his son Abu 'l-Walid, *risâlas* in which he dwelt at length on the details of Mu'tazilite doctrine, and furnished the Kâdî with arguments with which to confront the Sunnis subject to his inquiry (on the relations between al-Djâlibî and Ibn Abi Du'âd, see Ch. Pellat, in *RSO*, 1935, 35 ff.; idem, in *AIEO*, Algiers 1952, 302 ff.; and idem, in *Mash.*, 1953, 281 ff.).

(K. V. ZETTERSTEN-CH. PELLAT)

**AHMAD B. ABİ KHÂLID AL-AHWAL**, secretary to al-Ma'mûn, was of Syrian origin and the son of a secretary of Abû 'Ubayd Allâh. He took advantage of his former connections with the Barmakids to enter the service of al-Faḍl b. Sahl. Indeed the Barmakids were already under an obligation to his father, and he himself had managed to be of service to the disgraced Yahyâ. Apparently even before the capture of Baghdad he went to Khurâsân and, as the result of a letter of recommendation which Yahyâ had given to him before his death, he was placed in charge of several *diwâns* at Marw. After the return of the caliph to 'Irâq, profiting by the support of 'Uthmân b. a-Ashras, he assisted al-Hasan b. Sahl in the direction of the administration, and later replaced him. A man of doubtful integrity, easily corrupted, notorious for his greed and his harshness towards his subordinates, he was, nevertheless, up to his death in 211/826-7, the right-hand man of al-Ma'mûn. It is not possible, however, to state definitely whether he acquired the rank of *nazir*. Doubtless his ability was the reason why the Caliph, who was fully aware of his faults, still retained him in his service.

He played an important part in the political intrigues which secured in 205/821 the nomination of Tâhir b. al-Husayn, then governor of Baghdad, to the governorship of Khurâsân in place of 'Uthmân b.

'Abbād. When Ṭāhir asserted his independence in 207/822, al-Mu'tasim ordered his secretary to proceed at once to Khurāsān and to bring back the governor whose loyalty he had guaranteed. Ahmad with much difficulty secured a respite of 24 hours, and, before his departure, the news of the death of Ṭāhir is said to have reached the city. Everything points to the fact that, as some chroniclers aver, Ahmad was privy to this sudden death. He secured the appointment of Ṭāhir's son Talha as governor, but al-Mu'tasim sent Ahmad himself to Khurāsān to assist, or rather to keep watch on Talha. The secretary, furnished with military powers, penetrated on this occasion as far as Transoxiana, and conquered Ughrisans. Ahmad also used his influence to obtain a pardon for al-Mu'tasim's uncle, Ibrāhīm b. al-Mahdī, who had laid claim to the throne and who had for several years succeeded in eluding the caliph's police.

**AHMAD B. ABĪ ṬĀHIR TAYFŪR** (see Ibn Abi ṬĀHIR).

**AHMAD B. HĀBIT** (rather than Hāṭī), if the position in the alphabetical order given to him by al-'Aḥkālī is taken into consideration, a theologian ranked among the Mu'tazilites; he was the pupil of al-Nazzām (q.v.), and the teacher, in particular, of al-Faḍl al-Hadādī. Nothing is known about his life, and only his "innovations" are partly known to us. His doctrine, evolved before 232/846-7, seems to differ from Mu'tazilite teaching on the following two fundamental dogmas, which are borrowed from systems alien to Islam but which, in the eyes of Ibn Hābit, found justification in the Qur'ān. (1) On the basis of Qur'ān lxxix, 22 (xii), ii, 210 (206) and v, 210, he affirms the divinity of Jesus, from which heresiographers infer that, for him, the world has two creators, God and the Messiah. (2) He professes the doctrine of *hurūf*, or the reincarnation of souls, sprung from the Universal Spirit, in forms which will be more beautiful or more ugly according to the merits they have acquired in their previous incarnation. This theory involves the existence of five stages: a place of damnation (Hell); a place of testing (this world); two places of relative reward; and, finally, Paradise, where the souls were created. According to Qur'ān vii, 34 (32); x, 49 (50); xvi, 61 (65), souls which have "filled to the brim the cup" of good or evil go eventually to Paradise or Hell. Ibn Hābit, who accepts incarnation in animals, is obliged to concede its corollary, the doctrine of the *ḥabīb* of animals, of their individual responsibility, which can be justified only if they have had prophets to teach them; verses vi, 38; xvi, 68 (70) and xxxv, 24 (22), enable him to put forward this opinion. The heresiographers, of course, have passed a severe judgement on the theologian, to whom they deny the name of Muslim.

(Ch. Pellat)

**AHMAD B. HANBAL**, "the imam of Baghdad", celebrated theologian, jurist and traditionalist (164-241/780-855), and one of the most vigorous personalities of Islam, which he has profoundly influenced both in its historical development and its modern revival. Founder of one of the four major Sunni schools, the Hanbali, he was, through his disciple Ibn Taymiyya (q.v.), the distant progenitor of Wahhābism, and has inspired also in a certain degree the conservative reform movement of the Salafīya.

1. Life. Ahmad b. Hanbal was an Arab, belonging to the Banū Shaybān, of Rabī'ah, who had played an active role in the conquest of al-'Irāk and Khurāsān. His family, first resident in Basra, moved to Marw with Ahmad's grandfather, Hanbal b. Hilāl, governor of Samarkand under the Umayyads and one of the early 'Abbasid propagandists. Ahmad was born in Rabī'ah i 164/Dec. 780, a few months after his father Muḥammad b. Hanbal, who was serving in the army of Khurāsān, had removed to Baghdad, where he died three years later. Ahmad inherited, however, a small family estate which allowed him a modest but independent livelihood. After studying in Baghdad jurisprudence, jurisprudence and tradition, he devoted himself from 179/793 to the study of tradition, in pursuit of which he made a series of journeys in al-'Irāk, Ḥijāz, Yaman, and Syria. His visits to Iran, Khurāsān, and even to the distant Maghrib must be dismissed as legendary. Already in 183 he had visited Kūfa. He stayed more frequently in Basra; after a first visit in 186, he returned there in 190, 204 and 208. He was more often still at Mecca, where he made the Pilgrimage on five occasions: in 187, 191, 196, 197 (followed by a pious retreat (*mudjāwara*) at Medina), and 198, followed by a second *mudjāwara* into the year 199, after which he visited the traditionalist 'Abd al-Razzāk at San'a' (Manāhīb, 22-3; *Tarjuma*, 13-24).

His studies of *ḥikā* and *ḥadīth* were made under a great many teachers, whose names have been preserved (Manāhīb, 33-6; *Tarjuma*, 13-24). After Baghdad he attended the courses of the *kādi* Abū Yūfūf (s.d.) 182/798), by whom he was not profoundly influenced, and studied regularly under Hujaym b. Baḥr, a disciple of Ibrāhīm al-Nakha'ī, from 179 to 183 (Manāhīb, 34; *Ḥidāya*, s, 183-4). His principal teacher thereafter was Sufyān b. 'Uyayna (d. 198/812), the greatest authority of the school of the Ḥijāz. Others of his more important teachers were 'Abd al-Rahmān b. Maḥdī of Basra (d. 198/813) and Waki' b. al-Jarrāḥ (d. 197/812) of Kūfa. But, as Ibn Taymiyya noted (*Minkāhī al-Sunna*, iv, 143), his juristic formation is due, above all, to the school of ḥadīth and of the Ḥijāz. He cannot therefore be regarded, as is sometimes done, simply as a disciple of al-Shāfi'i, whose juridical work he knew, at least partially, but whom he seems to have met only once, at Baghdad in 195 (*Ḥidāya*, s, 251-3, 326-7).

The policy adopted by the caliph al-Mu'tasim, towards the end of his reign, under the influence of Biḡr al-Marḥ, of giving official support to the doctrine of the Mu'tazila (q.v.), inaugurated for Ibn Hanbal a period of persecution, which was to gain for him a resounding reputation (see al-Ma'mūn, al-MINNA). Ibn Hanbal vigorously refused to accept the dogma of the creation of the Qur'ān, contrary to orthodoxy. Al-Mu'tasim, then at Tarsūs, on hearing of this, ordered that Ibn Hanbal should be sent to him, together with another objector, Muḥammad b. Nūb. They were put in chains and sent off, but shortly after leaving Rakka they

received the news of the caliph's death. They were then sent back to Baghdad; Ibn Nūb died on the journey, and Ibn Hanbal, on arrival in the capital, was imprisoned first at the Yāsiyira, then in a house of the Dār 'Umāra, and finally in the common prison of the Dār al-Mawṣil (Manāhīb, 308-317; *Tarjuma*, 40-56; *Ḥidāya*, s, 272-280).

The new caliph, al-Mu'tasim, though inclined to abandon the inquisition, was, it is said, persuaded by the Mu'tazilite *kādi* Ahmad b. Abī Du'ād of the danger to the authority of the State of surrendering a position now officially taken up. Ibn Hanbal was therefore summoned to appear before the caliph in Kamādān 210. Still stoutly refusing to acknowledge the creation of the Qur'ān, he was severely beaten but permitted to return to his home after an imprisonment of some two years in all. During the whole of al-Mu'tasim's reign he lived in retirement and distanced from giving lectures on Tradition. On the accession of al-Wāḥid (227/842), he attempted to resume his courses of lectures, but almost at once preferred to discontinue them, though not officially forbidden to give them, lest he should be exposed by further reprisals by the Mu'tazilite *kādi*. He continued therefore to remain in retirement, sometimes even (it is said) in hiding, in order to escape from his enemies (Manāhīb, 348-9).

With the reinstatement of Sunnism by al-Mutawakkil on his accession in 232/847, Ibn Hanbal was able to resume his teaching activity. He does not, however, appear among the traditionalists appointed by the caliph in 234 to oppose the *Djāhmiyya* and the Mu'tazila (Manāhīb, 356). The disappearance of the leading figures of the era of persecution opened the way to an association between the caliph and the independent-minded theologian. Ahmad b. Abī Du'ād was removed from office in 237/854, and his successor Ibn Aktham is even said, in certain traditions, to have been recommended to the caliph by Ibn Hanbal (*Ḥidāya*, s, 315-6, 319-29). After a first unsuccessful approach to the court, the date and circumstances of which remain obscure (Manāhīb, 359-60), Ibn Hanbal was invited in 237 to Sāmarrā by al-Mutawakkil. It appears that the caliph wished him to give lessons in *ḥadīth* to the young prince al-Mu'tazz, and it may also be supposed that he had some idea of utilizing the famous theologian for his policy of restoration of the sunna. This journey to Sāmarrā gave Ibn Hanbal the occasion for making contact with the personal enemies of the court, without danger of compromise. The extant narratives show him welcomed on his arrival by the ḥāḍib Waṣfī, installed in the luxurious palace of Ṭāhīb, loaded with gifts, presented to al-Mu'tazz, but eventually exempted, on his own request, from any special charge on account of his age and health. After a short stay, he returned to Baghdad without seeing the caliph (Manāhīb, 372-8; *Tarjuma*, 58-75; *Ḥidāya*, s, 314, 316, 327-329).

Ahmad b. Hanbal died in Rabī' i 241/July 855, at the age of 75, after a short illness, and was buried in the Martyrs' cemetery (*Maḥābir al-Shuhadā'*) near the Harb gate. The traditions which surround the account of his funeral, although partly legendary in character, convey the impression of a genuine popular emotion, and his tomb was the scene of demonstrations of such ardent devotion that the cemetery had to be guarded by the civil authorities (Manāhīb 409-18; *Tarjuma*, 75-82; *Ḥidāya*, s, 340-3). His tomb became one of the most frequented places of pilgrimage in Baghdad. In 574/1178-9 the caliph al-Mustadīr furnished it with an inscription

glorifying the celebrated traditionalist as the most faithful defender of the Sunna (*Ḥidāya*, xli, 300). It was washed away by a flood on the Tigris in the 6th/14th century (Le Strange, *Baghdad*, 166).

By each of his two legitimate wives Ibn Hanbal had one son, Sāliḥ and 'Abd Allāh, besides six children by a concubine, who are not otherwise known (Manāhīb, 298-306). Sāliḥ (born in Baghdad 203/818-9, died as *kādi* of Iḥṣān 266/879-80) is said to have transmitted a large part of Ahmad's *ḥikā* (*Tahāḥī*, i, 171-6). 'Abd Allāh (b. 213/828) was chiefly interested in *ḥadīth*, and through him the major part of Ahmad's literary work was transmitted. He died in Baghdad in 299/903 and was buried in the Kuraysh cemetery, and to his tomb was transferred the veneration enjoyed by that of his father when the latter was swept away (*Tahāḥī*, i, 180-8). Both sons, who were closely associated with the intellectual life of their father, were amongst the chief architects of that collective structure which constitutes the Hanbali *madhāb*.

2. Works. The most celebrated of Ibn Hanbal's works is his collection of traditions, the *Musnad* (1st ed., Cairo 1311; new edition by Ahmad Shākir in publ. since 1368/1948). Although Ahmad himself gave an exceptional importance to this work, it was his son 'Abd Allāh who collected and classified the enormous accumulation of material, and himself made some additions. His Baghdad disciple Abū Bakr al-Kaṭīf (d. 568/978-9) transmitted this recension with some further additions. In this vast collection the traditions are classified not according to subjects, as in the *Ṣaḥīḥ* of al-Bukhārī and Muslim, but under the names of the first guarantor; it thus consists of a number of particular *musnads* juxtaposed, and includes those of Abū Bakr, 'Umar, 'Uḡmān, 'Alī and the principal Companions, and ends with the *musnads* of the Anṣār, the Meccans, the Medinians, the people of Kūfa and Basra, and the Syrians.

This order, though evidence of an effort of intellectual probity, made it difficult to use by those who did not know it by heart. It was therefore sometimes reshaped. In his *K. fi Dīwān al-Ma'mūn al-'Aḡhra* the traditionalist Ibn Kaṭīf classified, in alphabetical order of the Companions, the traditions contained in Ibn Hanbal's *Musnad*, in the "Six Books", al-Tabarānī's *Mu'jam* and the *Musnads* of al-Bazzāz and Abū Ya'qūb al-Mawṣilī (*Ṣaḥāḥ*, vi, 231). Ibn Zukūn (d. 837/1433-4; *Ṣaḥāḥ*, vii, 22-3) follows, in his *K. al-Dawā'ir*, the order of the chapters of al-Bukhārī, and has the great merit of having inserted among the *ḥadīths* which he quotes extracts from numerous Hanbali works, especially of Ibn Kūdāma, Ibn Taymiyya, and Ibn al-Kayyim. This voluminous compilation, preserved in the Zāhiriyya in Damascus, has served as a mine for numerous editions of Hanbali texts in the last fifty years.

Within the framework of Tradition, Ahmad b. Hanbal is to be regarded as an "independent *muḍḥabī*" (*muḥṭabī*), who as Ibn Taymiyya has remarked (*Minkāhī*, iv, 143), was able, from amongst the mass of traditions and opinions received from many teachers, to form his own doctrine (*ikhtilāf* *li-madhāb*). In no sense can he be regarded, in the manner of al-Tabarānī, as merely a traditionalist, and nothing of a juriscounsel (*ḥakīm*) concerned with normative rules. As already pointed out by Ibn 'Aḥlī, "certain positions adopted (*ikhtilāf*) by Ibn Hanbal are supported by him on traditions with such consummate skill as few have equalled, and certain of his decisions bear witness to a juridical subtlety without parallel" (Manāhīb, 64-6). "Pol-

lowers of tradition" (*ashāb al-hadīth*) must not be too systematically contrasted with "followers of opinion" (*ashāb al-ra'y*), since it is hardly possible to acquire an understanding of *hadīth* and to resolve their contradictions and divergences, or to deduce from them the consequences which may derive from them, without using a minimum of personal judgment.

The two fundamental treatises for the study of Ibn Hanbal's dogmatic position are the short *Radd 'alā 'al-Djāmiyya wa'l-Zandīka* and the *K. al-Sunna* (both printed together, Cairo n.d., a longer version of the *K. al-Sunna* in Mekka 1349). In the former of these, he expounds and refutes the doctrines of Ḍiḥm b. Saṭwān [q.v.], whose ideas, widely circulated in Khurasān, were adopted by certain disciples of Abū Hanīfa and of 'Amr b. 'Ubayd. In the *K. al-Sunna* he re-examines some of the theological questions already raised in the *Radd* and unequivocally defines his own position on all the principal points of his creed (cf. also *Tahakkīd*, I, 21-36). Of his other surviving doctrinal works, the *K. al-Salāt* (Cairo 1323 and 1347), on the importance of the communal prayer and rules for its correct observance, was transmitted by Muḥannā b. Yahyā al-Shāmī, one of his early disciples, and extracted from the bio-bibliographical repository of the Abū 'l-Ḥusayn (Tahakkīd, I, 245-80). Two unpublished MSS. should be noted: the *Muraḥḥaṣ min Maṣā'id Ahmad b. Hanbal* (B.M., cf. Brock, S. I, 311), transmitted by Abū Bakr al-Khālīl, which may possibly be a fragment of the *K. al-Djāmi'* (see below) and is important for the study of Ibn Hanbal's politico-religious ideas; and the *K. al-Aḥw*, transmitted by Ghulām al-Khālīl (MS Zahiriyya).

In the *K. al-Waṣī'* (Cairo 1349; partial trans. by G.-H. Bousquet and P. Charles-Dominique in *Heperis*, 1932, 97-112), there are to be found, in the form of roughly-classified notes, the opinions of Ibn Hanbal on certain cases where scrupulosity (*waṣa'*) seems necessary in his view. Their reporter, Abū Bakr al-Marwāzī, has added the opinions of other doctors on the same or related subjects, with the apologetic object, it seems, of showing that Ibn Hanbal's teaching in the matter of pious scruples, the ascetic life and devotion, can be compared with advantage to that of his contemporaries Ibrahim b. Adham, Fudayl b. 'Iyād, or Dhū'l-Nūn al-Misrī. This work, it has been noted (cf. Abū al-Jalīl, *Aspects intérieurs de l'Islam*, 225, n. 193), is extensively quoted by Abū Tālib al-Makhlī in *Kifā al-Kalāb*, and taken up again by al-Qaṣṣabī in *Ḥayāt 'Uḥm al-Dīn*.

The *Maṣā'id* Ahmad b. Hanbal was constantly consulted on questions (*maṣā'id*) of all sorts relating to dogmatics, ethics or law. Although he may not have prohibited the writing down of his opinions as formally as certain traditions assert, it is certain that he warned his questioners against the danger of a codifying of his thought (*taḥḍīr al-ra'y*) which might then replace the principles of conduct traced by the Kur'ān and the Sunna; he himself, in contrast to al-Shāfi'ī, never sought to present it systematically as a body of doctrine. The fundamental purpose of his teaching is to be seen as a reaction against the codification of the *fiqh*. Since primitive Muslim law was a doctrine of essentially oral transmission, which on a common substructure left a wide latitude to individual variations, any systematic codification, such as to impose it in the terms of thought of any particular representative or to congeal it by fixation, was to change its inner character.

The written redaction of his *responsa* and their classification under the general headings of the *fiqh* was the work of Sāliḥ and 'Abd Allāh and of the following other disciples of Ibn Hanbal: 1) Ishāq b. Manṣūr al-Kawṣarī (d. 251/865-67; *Tah.* I, 113-5); 2) Abū Bakr al-Aḥmām (d. 260/873-4 or 273/886-7; I, 66-74); 3) Hanbal b. Ishāq (d. 273; I, 143-5); 4) 'Abd al-Malik al-Maymūn (d. 274/887-8; I, 212-6); 5) Abū Bakr al-Marwāzī (d. 275/888-9; I, 56-63); 6) Abū Dāwūd al-Sijistānī (d. 275; I, 56-63); printed in Cairo, 1355/1934); 7) Hārūn al-Kirmānī (d. 280/873-4; I, 145-9); 8) Ibrahim b. Ishāq al-Harīfī (d. 285/898-9; I, 86-93). There are also other collections, and in addition the *Tahakkīd* of Ibn Abī Yaṣfā contains the replies given by Ibn Hanbal to numerous visitors.

These dispersed materials were assembled in the *K. al-Djāmi'* *il-'Uḥm al-Islām Ahmad*, by a disciple of Abū Bakr al-Marwāzī, the traditionalist Abū Bakr al-Khālīl (d. 311/923-4), who taught at Baghdad in the mosque of al-Mahdī (*Tah.* I, 12-13; *Ta'rikh Baghādī*, v, 112-3). Al-Khālīl's role has been well appreciated by Ibn Taymiyya, who says (*K. al-Imān*, 138) that his *K. al-Sunna* is the latest possible source for a knowledge of Ibn Hanbal's dogmatic views (*ḥukm al-dīniyya*), and his *K. al-Ḥayāt* the most valuable repository for the study of law (*ḥukm al-fiqhīyya*); these are no doubt subdivisions, or a rehandling, of *K. al-Djāmi'*. According to Ibn Kayyim al-Djāwīziya (*Iḥām al-Mawāḥib* in, Cairo, I, 31), the *K. al-Djāmi'* consisted of twenty volumes. To our present knowledge, the work is lost, except for the fragment referred to above; but as it has entered deeply into the output of Ibn Taymiyya and Ibn Kayyim, the study of these two writers may partially compensate for its loss in assisting an evaluation of Ibn Hanbal's thought.

Al-Khālīl's work was completed by his disciple 'Abd al-'Azīz b. Dja'far (d. 363/975-4), better known as Ghulām al-Khālīl, who did not always accept his master's interpretations of Ibn Hanbal's thought, and whose *Zād al-Ma'ārif*, though less important than the *Djāmi'*, presents a body of supplementary materials often consulted. The divergences which this *Corpus* has allowed to remain in the exposition of Ibn Hanbal's thought explain why the Hanbalis distinguish between the text (*naṣṣ*) of the founder of the school, the teachings ascribed to him (*riwāyāt*), the indications (*taḥakkīd*) suggested by him, and what are simply points of view (*ma'ā'id*) of his disciples.

Ibn al-Djawād (*Manāḥib*, 191) cites a *Tafsīr* based upon 120,000 *hadīths*, and other works now lost. See also Brockelmann, I, 193; S. I, 309-10.

3. Doctrine. Hanbalism has sometimes suffered from a slightly fanatical turbulence among certain of its followers, or an extravagant literalism adopted by others through ignorance or as a challenge. It has been exposed throughout its history to numerous and powerful opponents in the various schools whose principles it opposed, who when they did not deliberately disregard it, have united to attack it or to muffle it with insidious suspicions. Western orientalism has taken little interest in it, and has been no less severe. It has become the received opinion to see in the Hanbalis' doctrine a fanatical anthropomorphism, a traditionalism so sectarian as to be no longer viable, a spirit of frenzied intolerance, a fundamental lack of social adjustment, and a kind of permanent inability to accept the established order. A direct study of its works shows that it is not in these summary judgements that the governing objectives of his teaching are to be sought.

The *Attributes of God*. For Ibn Hanbal, God is the God of the Kur'ān: to believe in God is to believe in the description which God has given of Himself in His Book. Not only, therefore, must the attributes of God, such as hearing, sight, speech, omnipotence, will, wisdom, etc., be affirmed as realities (*ḥaqīq*), but also all the terms called "ambiguous" (*muḥaḍḍah*) which speak of God's hand, throne, omnipresence, and vision by the Believers on the day of resurrection. In conformity with tradition, also, it must be affirmed that God descends to the lowest heaven in the last third of every night to hearken to the prayers of his worshippers, and at the same time, with the literal text of the Kur'ān (cf. *ṣūra* cxli), that God, the Unique, the Absolute, is not comparable to anything in the world of His creatures (*K. al-Sunna*, 37; *Manāḥib*, 135). Ibn Hanbal therefore vigorously rejects the negative theology (*ta'wīl*) of the *Djāmiyya* and their allegorizing exegesis (*ta'wīl*) of the Kur'ān and of tradition, and no less emphatically rejects the anthropomorphism (*taḥakkīd*) of the Mubashshah, amongst whom he includes, in the scope of his polemics, the *Djāmiyya* as unconscious anthropomorphists. In the fideism of Ibn Hanbal, one must believe in God without seeking to know the "mode" of the theologoumena (*ḥukm al-kayf*), and leave to God the understanding of his own mystery, renouncing the vain and dangerous subtleties of dogmatic theology (*ḥukm al-Sunna*, 37; *Manāḥib*, 155-6). So simple, and at the same time so strong, was this position from the Kur'ānic angle, that al-Aḥḥādī, on abandoning Mu'tazilism, seeks, either for tactical reasons or in sincere acceptance, to place himself under the patronage of Ibn Hanbal before making certain concessions to his former credo, concessions successively enlarged by his disciples, on the problem of the attributes, the Kur'ān, and the legitimacy of dogmatic theology.

The Kur'ān. The Kur'ān is the uncreated Word of God (*ḥukm Allāh ḡayr maḥḥūḥ*). To affirm simply that the Kur'ān is the Word of God, without further specification, is to refuse to take up a position, and to fall into the heresy of the *waḥābiyya*, the "Abstenionists", which, because of the doubt which it inspires, is a graver sin than the more open heresy of the *Djāmiyya* (*K. al-Sunna*, 37-8). By Kur'ān is to be understood, not just an abstract idea, but the Kur'ān with its letters, words, expressions, ideas—the Kur'ān in all its living reality, whose nature in itself eludes our understanding.

The Pronunciation of the Kur'ān. It is difficult to define Ibn Hanbal's position on this question. Some traditions assert that he regarded its pronunciation as uncreated (*ta'wīl* *ḡayr maḥḥūḥ*). In *K. al-Sunna* (38) he goes no further than to say: "Whoso asserts that our words, when we recite the Kur'ān, and that our reading of the Kur'ān are created, seeing that the Kur'ān is the Word of God, is a *Djāmi*". While formally condemning the *laḥiyya*, who held the pronunciation of the Kur'ān to be created, he gives no more positive formulation of his own doctrine, to the embarrassment of the later Hanbalis. Ibn Taymiyya regards this question as the first on which a real division existed among the Ancients (cf. H. Laoust, *Essai sur . . . Ibn Taymiyya*, 172) and states that Ibn Hanbal avoided taking up a position. He himself gives, in *al-Waḥābiyya*, the cautious formula which appears to him to be in conformity with the spirit of Hanbalism: "When men recite the Kur'ān or write it on

leaves, the Kur'ān remains always and in reality the Word of God. A word cannot in fact be really attributed except to the one who first formulated it, and not to anyone who transmits or carries it."

Methodology. Ibn Hanbal, unlike al-Shāfi'ī, wrote no treatise on ethico-juristic methodology (*ḥukm al-fiqh*), and the well-known later works of his school, composed with elaborate technique and in an atmosphere of discussion with other schools, cannot be accepted as rigorously expressing his thought. His own doctrine, as it may be elucidated from the *Maṣā'id*, is more rudimentary than the later elaborations, but has the merit of setting out the first principles of the methodology of the school.

Kur'ān and Sunna. This doctrine claims to rest above all on the Kur'ān, literally understood, without any allegorical exegesis, and on the Sunna, i.e. the total of traditions which can be regarded as deriving from the Prophet. From his own statement (*Maṣā'id*, I, 56-7), Ibn Hanbal aimed to collect in his *Musnad* the *hadīths* generally received (*maḥḥūḥ*) in his time. In this work, therefore, there are found, to use his own terminology, *hadīths* whose authenticity is properly established and which may be regarded as perfectly sound (*ḥaqīq*), and *hadīths* which benefit only from a presumption of authenticity and for whose rejection (*as da'if*) there is no positive reason, or, to use the classification established by al-Tirmidhī, sound *hadīths* and "good" (*ḥasan*) *hadīths*. It was only much later, when the criticism of Tradition had reached, with Ibn al-Djāwī, the climax of formalist rigour, that Ibn Hanbal was reproached with admitting apocryphal (*maḥḥūḥ*) *hadīths*—an accusation contested by many traditionalists, as, for example, Ibn Taymiyya and Ibn Ḥajar al-Askalānī. The opinion which has come to prevail is that in the *Musnad* there are found, along with "sound" traditions, "good" or "rare" (*ḡayr*) traditions, none of which, however, are strictly speaking unacceptable.

The *Fatāwā* of the Companions and *Idimā'*. Kur'ān and Sunna find their continuation in a third source, derived and complementary: the *consilia* (*fatāwā*) of the Companions. The reasons which, for Ibn Hanbal, sustain the legitimacy of this source of doctrine, are clear: the Companions knew, understood, and put into practice the Kur'ān and the Sunna much better than later generations, and all of them are worthy of respect. The Prophet also, in his *waḥābiyya*, had recommended the Muslims to follow, together with his own Sunna, that of the "rightly-guided" (*raḥḥīdīn*) caliphs who should succeed him, and to avoid all innovation (*bida'*). Where the Companions disagree, it is easy to determine the juster view by reference to the Kur'ān and the Sunna, or by taking into account their order of pre-eminence (*Manāḥib*, 161).

In hierarchical order (*taḥakkīd*), the *ḥanbal* puts Abū Bakr first, then 'Umar, then his *asāb al-ḡurā* appointed by 'Umar "all of whom were worthy of the caliphate and merit the title of *imām*": 'Uthmān, 'Alī, Zubayr, Talha, 'Abd al-Raḥmān b. 'Awf, and Sa'd b. Abī Waḥkā; then the fighters at Badr, the Muhājirīs and the Anṣār (*K. al-Sunna*, 38; *Manāḥib*, 159-61). This doctrine of Sunnī reconciliation acknowledges the eminent position of 'Alī and the legitimacy of his caliphate, but also rehabilitates his enemies, and in the first place Mu'awwiya, whose historical role in the consolidation of Islam has always been indulgently evaluated in the Hanbalī school, and whose decisions are not necessarily to be discarded.

The decisions of the most authoritative representatives of the later generations (*ahb'aw*) also deserve to be taken into consideration as evidence of plausible interpretations. The consensus of the Community, in such a doctrine, expresses a general concentration around a truth founded on *Kur'ān* and *Sunna*; it does not constitute in itself, properly speaking, an independent source of law. A community may well fall into error collectively, if not guided by the light of revelation transmitted by the Tradition (cf. *Essai*, 239-42).

**Function of the mufti.** The first duty laid upon the juriconsult is to follow faithfully the spiritual legacy transmitted by the Elders, by avoiding any spirit of creation or innovation. Ibn Hanbal therefore condemns *ra'y*, the gratuitous expression of personal opinion (Abū Dāwūd, *Masa'il*, 275-7), but without requiring as a rule of conduct an absolute and impossible passivity in face of the texts. He does not reject analogical reasoning (*hiyāh*), but does not fully appreciate its value as an instrument of juridical systematization and discovery, as Ibn Taymiyya and Ibn Kayyim were to do later, under intellectual influences.

Ibn Hanbal made an extensive use of *caṭi'ah*, a method of reasoning which consists in maintaining a given juridical status so long as no new circumstance arises to authorize its modification, and of *gharā'ih*, another method of reasoning to the effect that, when a command or prohibition has been decreed by God, everything that is indispensable to the execution of that order or leads to infringement of that prohibition must also, as a consequence, be commanded or prohibited. The notion of *maṣlaḥa*, or recognized common interest, which allows the limitation or extension of a juridical status, is also in conformity with his doctrine, although he did not himself extend and regulate its use as Ibn Taymiyya and his disciple al-Tūfī were to do.

To repeat a comparison of Ibn Kayyim's, which seems to us to characterize very successfully the double care for tradition and for realism shown by Ibn Hanbal: the *mufti*, like the physician who must adapt his treatment to the state of his patient, must make a constant personal effort (*idghāḥ*) to draw from the sources of the law the moral prescriptions which should be applied to a given case. Thus, if the great Hanbalites have never called for the reopening of *idghāḥ*, it is because they have held that its continual use was indispensable to the understanding and application of legal doctrine.

**The Caliphate and the Arabs.** Ibn Hanbal's political views, directed essentially against the Khārijites and the Shī'ites (*rawāḥid*) affirm first and foremost the legitimacy of the Qurayshite caliphate: "No person has any claim to contest this right with them, or to rebel against them, or to recognize any other until the Day of Resurrection" (K. al-Sunna, 35). In the quarrel of races (*ghu'abhiyya*) which was raging in his time, he defended the Arabs, but without proclaiming their superiority: "We must give the Arabs credit for their rights, their merits, and their former services. We must love them, for reason of the very love which we bear for the Apostle of God. To insult the Arabs is hypocritical; to hate them is hypocritical" (ibid., 38)—hypocrisy because, behind the insults or the hatred, there was concealed a more secret aim, to destroy Islam by reviving the ancient empires or reinstating other forms of culture.

On the precedents furnished by Abū Bakr and 'Umar, Ibn Hanbal founded the legality of a caliph's

designation of his successor, but any such designation, to become effective, should be followed by a contract (*muhiya'a*) in which the imām and the authorized representatives of public opinion swear to mutual fidelity in respect for the Word of God (cf. *Essai*, 287). His view of the functions of the imām follows the general lines of the legal expositions, but leaves to the imām, within the framework of the prescriptions of the *Kur'ān* and the *Sunna*, a wide freedom of action to take, for the common good (*maṣlaḥa*), all the measures which he considers necessary to improve the material and moral conditions of the community. In this lies the germ of that important concept of "juridical policy" (*siyāsa shar'iyya*), which was methodically taken up by Ibn 'Aḥlī, Ibn Taymiyya and Ibn Kayyim al-Quraynī.

The members of the community owe obedience to the imām and may not refuse it to him by disputing his moral quality. "The *ghāḥid* should be pursued alongside all imāms, whether good men or evildoers; the injustice of the tyrant or the justice of the just matters little. The Friday prayer, the Pilgrimage, the two Feasts should be made with those who possess authority, even if they are not good, just or pious. The legal alms, the tithe, the land taxes, the *jayr*, are due to the amīr, whether they put them to right use or not" (K. al-Sunna, 35). If the ruler seeks to impose a disobedience to God (*ma'iyā*), he must be met on this point with a refusal to obey, but without calling for an armed revolt, which cannot be justified so long as the imām has the prayer regularly observed. But every member of the community has also the duty, according to his knowledge and his means, of commanding to the good and prohibiting the evil. By their apostolate, therefore, the doctors of the law, while remaining within the limits of loyalty, may revive the *Sunna*, keep public opinion vigilant, and impose on the prince respect for the prescriptions of religion.

**The Spirit of Community.** Ibn Hanbal's policy is one of communal concentration and confessional solidarity; to the *ihwa*, disunity, which weakens the community, he opposes the concept of *ghimā'a*, of group unity and cohesion. He goes so far as to adopt, on the problem of excommunication (*takfir*), an attitude of tolerance which links up with the laxism of the Murjī'a. One may not exclude from the community, he states, any Muslim guilty of a grave sin; the excommunication of a *hadhā* which must be interpreted with a restrictive literalism (K. al-Sunna, 35-6). He cites only three sins which involve excommunication: non-observance of prayer, consumption of fermented liquors, and spreading of heresies contrary to the dogmas of Islam, among which he mentions none but the Dhahiriyya and the Kadhariyya. As to excommunication properly speaking, he replaces it by a systematic refusal to associate with the heretical within the bosom of the community, "I do not like (he wrote) that prayer should be made behind innovators, nor that the prayer for the dead should be said over them" (K. al-Sunna, 35-6).

**Ethics.** Ibn Hanbal's doctrine is entirely dominated by ethical preoccupations. The end of action is to serve God (*ibāda*). In opposition to the Dhahiriyya and the Murjī'a, he asserted that faith (*al-imān*) "is word, act, intention, and attachment to the *Sunna*" (K. al-Sunna, 34). It may therefore vary in intensity, "increase or diminish", and it implies so total an engagement of the being that no man may possibly call himself a Believer without making his affirmation in a conditional form (*istithnā'a*), by

adding "if God wills". Faith is, therefore, not a simple body of rites, but implies a whole system of strong moral convictions: an absolute sincerity brought to the service of God (*ibāda*); renunciation of the world, with refinement of feeling and a spirit of poverty (*zuhd, fibr*); a moral courage which lies in "relinquishing what one desires for what one fears" (*istisnā'a*); fear of God; a scrupulous mind, which leads one to avoid dubious things (*al-ḥukūb*) between the two well-marked limits of the licit and the illicit (cf. *Manāḥil*, 194-200). Ibn Hanbal's belief has, therefore, nothing of a pedantic juristic literalism.

**Religious practices and Customs.** This is not the place in which to analyse in detail the juridico-moral prescriptions which constitute the applied doctrine of Ibn Hanbal (*fiqh*) in the two domains which come within this discipline: that of religious practices (*ibāda*) and that of usages and customs (*ʿādāt, muʿamalat*). The methodical exposition of them contained in *al-Muḥḥaṣṣar* of al-Khiraḥī does no more than reproduce single opinions of Ibn Hanbal and presents a restrictive codification of his thought. The same is to be said of the *ʿUmda* of Ibn Kudāma, precious as it may be for a knowledge of Hanbalism in the 7th/13th century. (See Laoust, *Précis de droit d'Islam* [Paris, 1930].)

But there is one very important rule which Ibn Taymiyya has brought out and which seems to us characteristic of primitive Hanbalism: nothing is to be regarded as imposing social obligations but the religious practices which God has explicitly prescribed; inversely, nothing can be lawfully forbidden but the practices which have been prohibited by God in the *Kur'ān* and the *Sunna*. This is the dual principle which Ibn Taymiyya resumes in the formula: *laḥḥīḥ fī l-ḥiddāt wa-l-ʿawf fī l-muʿamalat*, i.e. the most rigorous strictness in regard to religious obligations and a wide tolerance in all matters of usage (cf. *Essai*, 444). A wide liberty should therefore be left to both parties in drawing up the conditions of a contract, especially in regard to transactions, in which no stipulations can be nullified except those contrary to the formal interdiction in the *Kur'ān* and the *Sunna* of speculation (*mayyir*) and usury (*ribā*). In the *Kutub al-Sunna* (38), Ibn Hanbal, reacting against al-Muḥāṣilī, regards the free pursuit of an honest profit as an obligation of religion.

On the other hand, in the domain of religious practices those alone are lawful which are prescribed by the *Kur'ān* and the *Sunna*, and only in the manner in which they are prescribed. The rigorism of the Hanbal school is to be explained less by the spirit of devotion and of attention to detail which it seeks to bring to the performance of religious duties, than by its refusal to recognize any legal value to forms of worship introduced by the *idghāḥ* of ascetics or mystics, or even by the arbitrary decision of the administrative authorities. This attitude of hostility to innovations (*bidʿa*)—vestiges of paganism, inventions of later generations, or infiltrations from foreign civilizations—showed itself with special violence in al-Barbahārī and the early Wahhābiyya.

**Bibliography:** (a) Biography: a chapter in Abū Bakr al-Kharrāḥī (d. 312/923-4) history of Hanbalism, of which a few pages are preserved in the *Zāhiriyya* in Damascus; the monograph of Abū Bakr al-Bayhaḥī (d. 458/1065-6), of which large extracts are quoted in Ibn Kathīr, *Bidāya*, 2, 234-43. (A biography is also attributed to al-Harawī, d. 481/1087-8.) Two extensive biographies:

Ibn al-Djāwī, *Manāḥil al-Imām Ahmad b. Hanbal*, Cairo 1349/1931; Dhahabī, excerpt from his great history, ed. separately by A. M. Shālūt, *Tarjamat al-Imām Ahmad*, Cairo 1363/1946 (reprinted in vol. 1 of the *Maṣnād*); they contain abundant documentation going back to Ibn Hanbal's sons and first disciples, but are in the first instance laudatory biographies and often lack precision in chronology. (b) Works: mentioned in the article. (c) Studies: W. M. Patton, *Ahmad ibn Hanbal and the Mihna*, Leiden 1897; L. Goldziher, *Zur Geschichte der hanbalitischen Bewegung*, ZDMG, 1908, 1-28; idem, in EP; Muhammad Abū Zuhra, *Ibn Hanbal*, Cairo 1949.

(H. LAOUST)

**AHMAD b. IDRIS**, Moroccan shāfiʿi and mystic, a disciple of 'Abd al-'Azīz al-Dabbāgh, the founder of the Khadiriyya order, himself founded a religious congregation, the Idrisiyya, in 'Asir, where in 1823, he initiated the founder of the Sanusiyya (q.v.). He died in Sabayā ('Asir) in 1253/1837, after founding a kind of semi-religious and semi-military state, the two last heads of which were his great-grandson Sayyid Muhammad b. 'Alī b. Muḥ. b. Ahmad (1892-1923), and the latter's son 'Alī (from 1923), who was forced to submit to Sa'ūdī Arabia by a pretetorate agreement, negotiated by the Sanūsī leader Ahmad Shāfi (see Ibn Isḥāq).

The Idrisiyya order is at present strongly represented in former Italian Somaliland (Meraa), in Djibouti, among the Banū 'Amir (Khatmiyya), in Eritrea, and among the Gallas (where their missionary, Nūr Ḥusayn, enjoys great veneration). The Idrisiyya order maintains fraternal relations with the other congregations derived from the Khadiriyya, particularly the Murjāniyya of the Sudan.

**Bibliography:** *Awā'id, Ahādī, wa-Riḥā'iq*, lith. Cairo 1218; Nallino, *Scritti*, II, 387 L, 397 L, and especially 402-7; *Annuaire du Monde Musulman*, 1954, 27, 380, 385, 387, 392-3; 'Abd al-Wasī' b. Yahyā al-Wasī' al-Yamānī, *Ta'rikh al-Yaman*, Cairo 1346, 338-43.

**AHMAD b. 'ISĀ** b. MUḤ. b. 'ALĪ b. al-'Aḥfā b. Dja'far al-Šādiq (the great-grandson of 'Alī), called al-Muhājirīr "the Emigrant", saint and legendary ancestor of the Hadramī sayyids. He left Baṣra in 312/929 accompanied by Muhammad al-Sulaymān (alleged ancestor of the Banū Abīd [q.v.]) and Sālim b. 'Abdallāh (ancestor of Banū Kudaym), was prevented from visiting Mecca until next year by Abū Ṭāhir al-Karnāfī's occupation and settled with his companions in Western Yaman (region of Surūd and Saḥām). In 340/951 he left with his son 'Ubayd Allāh for Hadramawt, and lived at first near Tarīm, al-'Alīyah, then in Kāraḥ, Hadramawt, and finally in Husayniya, where he bought the territory of Sawā above the town of Bawr and where, after vigorously supporting the cause of the *Sunna* against the heresies of the Khawārijī and Iḥādiyya he died in 343/956 (according to al-Šūhālī). His grave and that of Ahmad b. Muhammad al-Habshī in Shī'ah Muḥaddithan (Shī'ah Abū 'Abd) outside Husayniya are visited by pilgrims. His grandson, Bārī, Djāhid, and 'Alawī settled in Sumal, six miles from Tarīm. Since 321/1127 this town is the centre of the (Bā) 'Alawī [q.v.] family in its wider sense, i.e. the offspring of the 'Alawī mentioned above.

For another Ahmad b. 'Isā, 'Amūd al-Dīn, ancestor of the Hadramī family al-'Amūdī, see v. d. Berg, *Hadramawt*, 41, 85.

(O. LÖFGREN)

**AHMAD b. KHĀLID** [see AHMAD al-NĀSIRI].  
**AHMAD b. MUHAMMAD** b. 'ABD al-SAMAD **ABU NAṢR**, vizier of the Ghāwirīd Maḥmūd b. Maḥmūd (after the death of his celebrated predecessor al-Maymandī (433/1021). He began his career as steward (*ṣaḥbāh*) of Kh. 'Arīim Shāh Altūnāh, and having become the vizier of Maḥmūd he managed to retain this office during the latter's reign. After the defeat at Dandānākin, Maḥmūd, who himself retired to India, sent him as attendant of his son Mawḍūd to Balḫ in order to defend this city against the Saljūqs. Also after the accession of Mawḍūd (437/1045) he officiated for some time as vizier until al-Maymandī's son received that office. The year of his death is unknown.

*Bibliography:* Bayhaki (Morley); Ibn al-Aṭṭār, 12; De Biberstein-Kazimirski, *Diwan Menouchchiri*, preface.

**AHMAD b. MUHAMMAD 'IRFĀN** [see AHMAD BILĀW].

**AHMAD b. MUHAMMAD al-MANŠUR** [see AHMAD al-MAṢṢIḤ].

**AHMAD b. SAHL** b. Ḥaṣṣim, of the aristocratic diḥkān family Kāmkariyān (who had settled near Marw), which boasted of Sāsānid descent, governor of Khurāsān. In order to avenge the death of his brother, fallen in a fight between Persians and Arabs (in Marw), he had under 'Amr b. al-Layth stirred up a rising of the people. He was taken prisoner and brought to Sīstān, whence he escaped by means of an adventurous flight, and after a new attempt at a rising in Marw he fled for refuge to the Sāmānid Ismā'īl b. Ahmad in Buḫārā. Ahmad took an active part in the battles of Khurāsān and Ray under Ismā'īl, and in the conquest of Sīstān under Ahmad b. Ismā'īl. Having been sent under the command of Naṣr b. Ahmad against the rebel governor of Khurāsān, Ḥusayn b. 'Abī al-Marwarrūdi, he defeated his antagonist in Rāst 1306/Aug.-Sept. 918. But shortly afterwards he rebelled himself against the Sāmānids, was vanquished on the Muḥrāb by the commander-in-chief Ḥamīdiya b. 'Alī and sent to Buḫārā, where he died in prison in Dhū'l-Ḥijja 307/May-June 919.

*Bibliography:* Ibn al-Aṭṭār (ed. Torab, viii, 86 ff.) and the same information in a somewhat more circumstantial wording in Gardizi, *Zayn al-Aḥbār* (ed. Nazim, 1928, 27-9); evidently there is a common source, probably al-Sallāmī's *Ta'ārib Wulāt Khurāsān*. (W. BARTHOLO)

**AHMAD b. SA'ID** [see n° 5470].

**AHMAD b. TULŪN**, founder of the Tulūnid (968) dynasty, the first Muslim governor of Egypt to annex Syria. Vassal in name only of the 'Abbīd caliph, he is a typical example of the Turkish slaves who from the time of Ḥārūn al-Raṣhīd were enlisted in the private service of the caliph and the principal officers of state, and whose ambition and spirit of intrigue and independence were soon to make them the real masters of Islam. Ahmad's father Tulūn is said to have been included in the tribute sent by the governor of Buḫārā to the caliph al-Ma'mūn c. 200/815-6, and rose to command the caliph's private guard. Ahmad, born in Ramaḍān 230/Sept. 835, received his military training at Sāmarrā and afterwards studied theology at Tarsūs.

By his bravery he gained the favour of the caliph al-Musta'in, who, on his abdication in 251/866, chose to go into exile under the guard of Ahmad. The latter had no hand in the subsequent murder of al-Musta'in, probably because his cooperation had not been invited. In 254/868 the caliph al-Mu'tazz gave Egypt as apanage to the Turkish general Bāḥbāk, who had married Tulūn's widow. Ahmad was appointed as lieutenant of his father-in-law, and entered Fustāt on 23 Ramaḍān 254/15 Sept. 868.

For the next four years Ahmad was engaged in seeking to obtain control of the administration from Ibn al-Mudabbir, the powerful and skilful intendant of finance, whose intolerable exactions, cunning and greed had earned the hatred of the Egyptians. The struggle was fought out mainly through the medium of their agents and relations at Sāmarrā, and ended with the removal of Ibn al-Mudabbir. After the murder of Bāḥbāk Egypt was given as apanage to Yarḡūkh, who had married one of his daughters to Ibn Tulūn; he confirmed Ahmad in his post as vice-governor, and invested him also with authority over Alexandria, Barḳa, and the frontier districts, which had hitherto lain outside his government. The revolt of Amīdīq, governor of Palestine, gave Ahmad the opportunity to obtain the caliph's authorization to purchase a large number of slaves in order to subjugate the rebel. Although the task was subsequently confided to another, this intact army constituted the foundation of Ibn Tulūn's power. For the first time, Egypt possessed a large military force which was independent of the caliphate. By liberal gifts, Ahmad gained the favour of the 'Abbīdīd courtiers, and succeeded in obtaining the annulment of an order of recall issued by the caliph. It was to Ibn Tulūn, and not to Ibn al-Mudabbir's successor, that the caliph addressed his requests for the Egyptian contributions to the treasury. In order that he might have the personal use of them by keeping their sum a secret from his brother al-Muwaffak, he placed the financial administration of Egypt and the Syrian Marches under Ahmad. In 258/872, the caliph's son Dī'ā'far (later entitled al-Muwaffak) succeeded Yarḡūkh as apanage of Egypt; al-Mu'tamid had recognized his brother al-Muwaffak as heir to the throne after his own son and had divided the empire between the two heirs-presumptive, al-Muwaffak receiving the eastern provinces as his apanage, and al-Muwaffak the western; a regent, the Turk Mūsā b. Buhūtī was appointed as coadjutor of the latter. In fact, al-Muwaffak exercised the supreme power. But while the caliphate was threatened in the east by attacks and movements of independence, and in the south by the revolt of the Zinjī which engaged the forces of al-Muwaffak, he himself, the only man capable of making a stand against Ibn Tulūn, was threatened above all by the disorders in the administration and by the internal conflicts between the caliph and himself on the one hand, and the captains of the Turkish regiments on the other.

Such was the state of the caliphate at the moment selected by Ibn Tulūn for his essay at independence, after gaining the financial control of his territories. On account of the long and costly campaigns against the Zinjī the commander-in-chief al-Muwaffak considered himself entitled to obtain financial assistance from all the provinces belonging to the caliphate. On receiving a sum from Ibn Tulūn which he considered unsatisfactory, he sent a force of troops under Mūsā b. Buhūtī to remove him (263/877), but the demands of the soldiers and the fears inspired

by Ibn Tulūn's forces led to the abandonment of the attempt. Ahmad was now encouraged to occupy Syria (264/878), under the pretext of engaging in the holy war and of defending the frontiers in Asia Minor against the Byzantines. But he had to return to Egypt shortly after to deal with a revolt by his son 'Abbas, whom he had appointed as his lieutenant in Egypt.

After the Syrian campaign, Ibn Tulūn began to add his own name to those of the caliph and of Dī'ā'far on his gold coinage. (It should be noted that Ibn Tulūn always recognized the caliph al-Mu'tamid himself, perhaps just because he was powerless.) In 269/882 Ahmad invited the caliph to take refuge with him, aiming by this means to concentrate the whole sovereign authority in Egypt and to gain the merit of being the saviour of the caliph, now a shadow. But the latter's flight was intercepted, and al-Muwaffak nominated Ishāk b. Kundāqī as governor of Egypt and Syria. Ahmad retaliated by proclaiming through an assembly of jurists which met at Damascus the forfeiture of al-Muwaffak's succession to the throne. Al-Muwaffak thereupon compelled the caliph to have Ahmad cursed in the mosques, while Ahmad had the same measure applied to al-Muwaffak in the mosques of Egypt and Syria. But al-Muwaffak, though finally victorious in his war with the Zinjī, sought to have the *status quo* recognized, in the hope of gaining from Ahmad by mildness and diplomacy what he had failed to gain by war. Ahmad gave a favourable response to his first approaches, but died in Dhū 'l-Ka'da 270/March 884.

Ibn Tulūn owes his success not only to his talents, his cleverness, and the strength of his Turkish and Sudanese slave-armies, but also to the Zinjī rebellion, which prevented al-Muwaffak from devoting himself to counter his encroachments. His agrarian and administrative reforms were directed to encouraging the peasants to cultivate their lands with zeal, in spite of the heavy charges which were still laid upon their produce. He put an end to the exactions of the officers of the fiscal administration for their personal profit. The prosperity of Egypt under Ibn Tulūn was due principally to the fact that the greater part of the revenues of the state were no longer drained off to the metropolises; they were thus employed to stimulate commerce and industry and to found, to the north of Fustāt, a new quarter, called al-Kaṭā'ī, which was the seat of government under the Tulūnids and in which the great mosque built by Ibn Tulūn was situated.

*Bibliography:* Balāwī, *Sirat Ahmad ibn Tulūn* (ed. Kurd 'Alī); Ibn Sa'īd, *al-Muḥrib* (ed. Zaky M. Hassan, Sayyida Kashaf and Shawky Deif, and ed. Vollers, *Fragmente aus dem Mughrib*); Tabarī, iii, 1720 ff.; Ya'kūbī (Houtsma), ii, 615 ff.; Makrizī, *Kātib*, i, 313 ff.; Abū'l-Mahbūdī (ed. of Makrizī, *Kātib*, ii, 37 ff.; Marcel, *Egypte*, Cairo), ii, 1 ff.; Wüstenfeld, *Die Stalthalter von Ägypten*, iii ff.; Corbitt, *The Life and works of Ahmad ibn Tulūn*, *JRAS*, 1891, 527 ff.); Lane-Poole, *History of Egypt*, 59 ff.; C. (ZAKY M. HASSAN)

**AHMAD b. YŪSUF** b. al-KĀSIM b. SUBAYY, **ABU Dī'ā'far**, secretary to al-Ma'mūn. He belonged to a mawālī family of secretaries and poets originating from the neighbourhood of al-Kūfa. His father, Yūsuf, was secretary to 'Abd Allāh b. 'Alī,

then Ya'kūb b. Dāwūd, and finally to Yahyā the Barmakid. It appears that Ahmad held a secretarial post in 'Irāk at the end of the caliphate of al-Ma'mūn. He was presented to al-Ma'mūn by his friend Ahmad b. Abī Khālid, and soon attracted notice by his eloquence. He became an intimate of al-Ma'mūn, and at a date impossible to determine accurately, was placed in charge of the *diwān al-sirr* (rather than the *diwān al-ra'ad*), which was entrusted to 'Amr b. Ma'sūda). As private secretary to the caliph he occupied a position of such importance that some historians have styled him "vizier", a title, however, which he does not appear to have held. He came into conflict with the future caliph al-Mu'tasim, and died, it seems, in Ramaḍān 213/Nov.-Dec. 828. Various letters, terse remarks, aphorisms and verses by which he achieved fame as a "secretary-poet" are attributed to him.

*Bibliography:* Dīḥlī, *Fi Dhawm Ahlīh al-Kutub*, 48, *Bayān*, ii, 263; Ibn Tayfūr, *Tabarī*, iii, *Dīḥshīyāt*, indexes; Sūlī, *Awarāḥ* (Poets), 143, 156, 206-36; Ma'sūdi, *al-Tanbih*, 352; *Alḥadīth*, Tables; Yāqūt, *Iḥṣād*, ii, 100-71.

(D. SOURDEL)

**AHMAD b. ZAYN DAHLĀN** [see DAHLĀN].

**AHMAD AMIN**, Egyptian scholar and writer, b. in Cairo 2 Muharram 1304/Oct. 1886, d. 30 Ramaḍān 1373/30 May 1954. After studying in al-Azhar and the School of Shar'ī Law, he served as a magistrate in the Native Courts, and in 1926 was appointed to the staff of the Egyptian University (U. of Cairo), where from 1935-1945 he was professor of Arabic Literature. In 1947 he became Director of the Cultural Section of the Arab League. Ahmad Amin was one of the founders and most active members of the *Lajnat al-la'wī wa'l-tarjūma wa'l-naḥw* (see U. Rizzitano, in *OM*, 1940, 31-8), for which he edited and produced (in collaboration) a number of classical Arabic texts and general works on literary history. As a scholar, his most important production was a history of Islamic civilization to the end of the 14th/10th century (in three parts: *Faḍīr al-Islām*, 1st ed., Cairo 1928; *Duḥā' al-Islām*, 1st ed., Cairo 1933-6; *Zuhūr al-Islām*, Cairo 1945-53), notable as the first comprehensive attempt to introduce critical method into modern Muslim Arabic historiography. From 1933 he collaborated in the weekly literary journal *al-Risāla*, and from 1939 edited a similar journal *al-Zuhūr*; his essays on literary, social and other topics in these journals were later collected and issued in book form (*Fayd al-Khāṣir*, 8 vols., Cairo 1937 ff.). Of his many other works special mention should be made of his dictionary of Egyptian folklore (*Kāmis al-Adab wa'l-Tahāṣil wa'l-Ta'ābir al-Miṣriyya*, Cairo 1953), and his autobiography *Hayātī* (Cairo 1950).

*Bibliography:* Autobiography (see above); Eng. tr. by A. J. M. Craig to be published; U. Rizzitano, in *OM*, 1953, 76-89; Brockelmann, S III, 305.

**AHMAD BĀBĀ**, otherwise **ABU'l-'ABRĀS AHMAD** b. AHMAD al-TAKRUBĪ al-MAṢṢIḤ, **SUDĀNES** jurist and biographer, belonging to the Shihābī family of the Aḥl, born at Timbuktu (now Timbuktu) 21 Dhū'l-Ḥijja 963/26 Oct. 1556. All his ancestors in the male line were *imāms* or *hādīs* in the Sudanese capital in the 15th and 16th centuries, and he himself rapidly became a *faḥh* of repute in learned circles in his country. At the time of the conquest of the Sudan by the Sa'īdī Sultan of Morocco Ahmad al-Manṣūr (g.s.) in 1000/1592, Ahmad Bābā refused

to recognise the authority of the court of Marrākush and, two years later, the governor Mahmūd Zarkūn arrested him on the Sultan's orders, and accused him of fomenting a revolt at Tinbukūt against the new rulers. Taken in chains to Morocco with several of his companions, Ahmad Bābā was not long in regaining his liberty, but he was required to reside in Marrākush (1004/1596). He began to give instruction in *fiqh* and *ḥadīth*, and formulated legal opinions (*fatāwa*). His renown soon spread throughout the Maghrib. At the death of Ahmad al-Mansūr in 1016/1607, his successor Mawlay Zaydān allowed Ahmad and the other Sudanese exiles to return to Tinbukūt. It was no doubt at this time that he went on pilgrimage to Mecca, and returned to his native town where he died on 6 Shā'abān 1036/12 April 1627.

Ahmad Bābā was the author of some 50 works on Mālikite law, grammar and other subjects. But his chief work is his supplement to the biographical dictionary of the *fabāḥ* of the school of Mālik b. Anas, composed in the second half of the 16th century by Ibn Farḥūn [s.v.], and entitled *al-Dihādī al-Mudhahhab fī Ma'rifat A'yān 'Ulamā' al-Maghrib*. Ahmad Bābā gave his supplement the name of *Nayl al-Dihādī bi-Tarīq al-Dihādī*. He completed it at Marrākush in 1005/1596, and later issued an abridged version dealing only with those Mālikite *fabāḥ* not represented in Ibn Farḥūn, called *Khiṣṣat al-Mudhahhab fī Ma'rifat mā jāya fī-Dihādī*. The *Nayl* was lithographed at Fās in 1217 and printed at Cairo in 1329, in the margins of the *Dihādī*.

Ahmad Bābā's dictionary is one of the main sources for a bio-bibliographical survey of the Maghrib up to the 16th century, and contains, apart from the Mālikite doctors, a certain amount of information on the great Moroccan saints (*awliyā'*) of the period. The extensive library which he built up in the Sudan has still not been entirely dispersed, and it was one of his own copies of which particular use was made in the publication of the materials relating to Spain in *al-Rawf al-Ma'fūr* of Ibn 'Abd al-Mun'im al-Himyari (Lévi-Provençal, *La Pérouse littéraire au Moyen Âge*, Leiden, 1938 p. xii-xiii).

**Bibliography:** Lévi-Provençal, *Chorfa*, 250-51; idem, *Arabia Occidentale*, iv, in *Arabica*, ii (1955), 89-96; Mubhith, *Khiṣṣat al-Dihādī*, i, 170 ff.; al-Ḥafīd, *Nuṣṣat al-Ḥādī*, Fez, 81 ff.; idem, *Salwat man inṣāghar*, Fez, 52 ff.; Kādirī, *Nasb al-Maṭā'ib*, Fez 1310, i, 157 ff.; Ahmad Nāsirī, *Taḥṣīṣ*, Cairo 1312, iii, 63; Sa'dī, *Tarīkh al-Sūdān* (Houdas), i, 35-6, 244; transl. 57-9, 379; M. Ben Cheneb, *Iḍā'at*, § 94; idem, in *IE*, i, 191 (with a complete list of the works of Ahmad Bābā); Brockelmann, II, 618, § 11, 715-6. (E. LÉVI-PROVENÇAL.)

**AHMAD AL-BADAWĪ** (in modern Egyptian Arabic *al-Badawī*, with the kunya Abu 'Aṭīya), is the most popular saint of the Muslims in Egypt and has been so for about 700 years. By the people he is often called simply *al-sayyid*; in a song in his honour (ed. Littmann) he has the title of *shāh al-'Arab* because of his name al-Badawī, and this name was given to him because he was a villager like the bedouin of the Maghrib. As a *Ṣūfī* he was called *al-kabīr*, «the pole».

Ahmad was probably born in Fez in 560/1159-1200, and he seems to have been the youngest of seven or eight children. His mother was called Fātima, his father 'Alī (al-Badrī); the occupation of his father is not mentioned. His genealogy was traced up to 'Alī b. Abī Tālib. In his early youth Ahmad went with his family on a pilgrimage to Mecca where

they arrived after four years' travelling. This is placed in the years 603-7/1206-11. In Mecca his father died. Ahmad is said to have distinguished himself in Mecca as a daring horseman, and he received there, according to tradition, the surnames al-'Aṭṭāḥ, "the intrepid horseman", al-Ḥadhān, "the furious, raging one". His name Abu 'Aṭīya may be a miswriting for Abu 'Aṭīya; and the latter would have much the same meaning as al-'Aṭṭāḥ. Other names that were given him later are al-Sammāt, "the silent" and Abū Farrāḡ, "liberator", namely of prisoners. About 627/1230 he seems to have undergone an inner transformation. He read the *Kutub* according to all the seven readings and studied some *Shāfi'ite* law. He gave himself up to devotion and declined the offer of a marriage. He retired from men, became taciturn, made himself understood by signs. According to some authorities Ahmad was summoned in 633/1236 by three consecutive visions to visit 'Irāq, and he went there in company with his eldest brother Ḥasan. They visited the tombs of the two great 'pōles' Ahmad al-Riḥā'ī and 'Abd al-Kādir al-Jilānī and of many other saints. In 'Irāq he is said to have subdued the indomitable Fātima bint Barri, who had never yet surrendered to any man, and to have refused her offer to marry him. This incident has been turned into a highly romantic story in popular Arabic literature; it may go back to ancient Egyptian mythology. In 634/1237-7 Ahmad had another vision which told him to go to Tanṭā in Egypt. His brother Ḥasan returned from 'Irāq to Mecca. In Tanṭā Ahmad entered on the last and most important period in his life. His mode of life is described as follows: He climbed in Tanṭā to the roof of a private house, stood there motionless and gazed up into the sun so that his eyes went red and sore and looked like fiery cinders. Sometimes he would maintain a prolonged silence, at other times he would indulge in continuous screaming. He went without food or drink for about forty days. (The forty days fast is also known from the legends of Christian saints. The standing on the roof is reminiscent of Symeon Stylites, and the name of the followers and disciples of Ahmad: Saṭūbiyya or Aḥbāb al-Saṭh, «the roof men», of the Christian «pillar saints», the «pillars» of Symeon.) Those saints who were still worshipped at the time of Ahmad's arrival in Tanṭā (such as Ḥasan al-Iḥṣān, Ṣālim al-Maghribī and Wajḥ al-Kamar), found themselves eclipsed. His contemporary, the Manlūḡ sultan al-Zāhir Baybars, is said to have worshipped him and to have kissed his feet. A boy called 'Abd al-'Alī came to him when he was searching for a cure for his sore eyes, and this boy became afterwards his confidant and his *khāḍiṣ* (successor); the saint is therefore called Abū 'Abd al-'Alī in popular literature. Ahmad died on 12 Rabī' I 675/24 August 1276.

Ahmad al-Badawī is the author of (i) a prayer (*ḥudūd*); (ii) a collection of prayers (*salawāt*); commented by 'Abd al-Rahmān b. Muṭafī al-Aydiarī under the title of *Faḥ al-Rahmān*; and (iii) a spiritual testament (*wasīyāt*), containing admonitions of a rather general character.

Ahmad al-Badawī is a representative of the lower type of the dervishes, and his intellectual qualities seem to have been of small importance.

After his death 'Abd al-'Alī (d. 733/1332-3) became his *khāḍiṣ* and built a mosque over his tomb. The veneration of Ahmad among the pilgrims was not confined to Tanṭā, but spread to other places. Ahmad was one of the more highly educated scholars and other opponents of the *ṣūfīs*. These

opponents were partly men who were averse to all *ṣūfism*, partly politicians who objected to the *ṣūfīs* as rulers of the people. We hear twice of the murder of a *khāḍiṣ* of al-Badawī (Ibn Iyās, ii, 61, iii, 78). In 852/1448 the 'ulama' and pious politicians caused the sultan al-Zāhir Ḍiḡnāq to forbid the pilgrimages to Tanṭā, but this edict had no effect because the people would not forsake their old customs. The sultan Kāṣṭaway seems to have been an admirer of the saint (Ibn Iyās, iii, 217, 201). Under Ottoman rule the outward splendour of the cult of Ahmad seems to have diminished, because it annoyed the powerful Turkish orders. But this political attitude could not prejudice his veneration amongst the Egyptians. The *dawriyy* order of the Ahmadiyya founded by him is, together with the Rifa'iyya, the Kādiriyya and the Būrkānīyya, among the most popular orders in Egypt. The banners and the turbans of the Ahmadiyya are red. There are several "branches" of the Ahmadiyya, such as the Bayyūmiyya (s.v.) etc. (cf. *TARIKH*).

The place where Ahmad al-Badawī is venerated is the mosque at Tanṭā (s.v.), which was built over his tomb. On this E. W. Lane says (*An Account of the Manners and Customs of the Modern Egyptians*, London 1848, i, 321): "The tomb of this saint, so attracts almost as many visitors, at the period of the great annual festivals, from the metropolis, and from various parts of Lower Egypt, as Mekkah does pilgrims from the whole of the Muslim world". Many Egyptians who make the pilgrimage to Mecca first go to Tanṭā, and therefore Ahmad is called *abū-nabī*, "the door of the Prophet". The three great festivals (*wasadīl*, plural of *wasad* (s.v.)): (i) on the 17 or 18 Jan.; (ii) on or about the winter equinox; (iii) about a month after the summer solstice, when the Nile has risen considerably, but the dams of the canals are not yet cut. They are, as Lane says, "great fairs as well as religious festivals". The dates are reckoned according to the Coptic calendar, and it is very likely that in these festivities and pilgrimages old Egyptian and Christian practices have survived; the date of the first festival corresponds to the time of the Christian Epiphany. Goldziher (*Mus. Stud.*, ii, 338) suggested a connection between the pilgrimages to Tanṭā and the ancient Egyptian processions to Bubastis described by Herodotus.

Festivals in his honour are also held in other places in Egypt, in Cairo, but also in small villages (cf. e.g. 'Alī Muḥarāk, ix, 37). It is somewhat doubtful if all the sanctuaries bearing the name of "al-Badawī" refer to Ahmad. Such sanctuaries occur, e.g. near Aswān; in Syria near Tripoli (J. L. Burckhardt, *Syria*, 166); at Gaza (Goldziher, *Mus. Stud.*, ii, 338; *ZDPV*, xi, 252, 158).

Many legends are told in Egypt about Ahmad al-Badawī; miracles that he did while he was alive; miracles that he performed from his tomb; miracles that he did reviving from the dead; miracles in favour of those who celebrated his festivals. What many people still nowadays believe of him is shown by the song taken down in Cairo by Littmann (see *Bibl.*). In this song incredible miracles of Ahmad are told; it is also said that he began to speak on the day on which he was born, and that he was an unusually heavy eater. He is especially renowned as a saint who brings back prisoners and lost persons or goods. Therefore he is known as *ghayb al-yasir*, "bringer of the prisoner", and when a public creditor announces the loss of a child, of an animal or of a piece of property, he invokes Ahmad al-Badawī.

Spencer (in *ZDMG*, 1914, 243) tells of a miracle in Palestine by this saint.

**Bibliography:** Biographies by Makrīfī (MS Berlin 3350, no. 6) and Ibn Ḥaḡḡar al-'Askalānī (MS Berlin 10,701); Suyūṭī, *Ḥuṣn al-Mubāḥḡar*, Cairo 1299, i, 299 f.; Shā'rānī, *Taḥṣīṣ*, Cairo 1299, i, 245-51 (he was a particular admirer of the saint and called himself al-Ahmadī; see Vollers, *Cat. Leipzig*, no. 3531); 'Abd al-Samad Zayn al-'Dīn, al-Diḡāṣat al-Samiyya fī 'Karamat al-Ahmadīyya, repeatedly printed (this important compilation, written in 1028/1619, quotes, in addition to the above-mentioned, many lost works); 'Alī al-Ḥalabī (d. 1044/1634-5), *al-Nasṭha al-'Alawīyya fī Bayān Ḥuṣn Tarīkat al-Sūda al-Ahmadīyya*, MS Berlin 10,104; Ḥasan Rāḡhib al-Maḡḡhādī al-Ḥafāḡḡī, *al-Nafāḡḡat al-Ahmadīyya*, Cairo 1321; Khiṣṣat Sidi Ahmad al-Badawī wa-mā dīḡir laḡḡu ma' al-Thalāṭha al-Aḡḡāb; Khiṣṣat al-Sayyid al-Badawī ma' Fāṭima bint Barri wa-mā dīḡir baynahu min al-'Aḡḡāb; Khiṣṣat al-Sayyid al-Badawī ma' Fāṭima bint Barri wa-mā dīḡir laḡḡu min al-'Aḡḡāb wa'l-Gharāb (the last three are small pamphlets printed in Cairo; the second and the third have much the same text). He is frequently treated, together with the other *shāḡḡs*, e.g. by Muḡammad b. Ḥasan al-'Adḡḡānī (ca. 899/1494), MS Berlin 163; Ahmad b. 'Uḡḡmān al-Shamūḡḡī (ca. 950/1541), *ibid.* no. 317. A poem on Ahmad, *ibid.* no. 5432, 815/3; 'Alī Muḡarāk, *al-Khiṣṣat al-Diḡāḡḡa*, xiii, 48-51 is mainly based on Shā'rānī and 'Abd al-Samad. A *Madḡḡḡ* of al-Badawī wa-Bayān Karamat al-'Aḡḡāb has been edited and translated in E. Littmann, *Ahmad al-Badawī. Ein Lied auf den ägyptischen Nationalheiligen*, Mainz 1930. See also Brockelmann, I 450, S I, 808.

(K. VOLLERS-E. LITTMANN)  
**AHMAD BEY**, bey of Tunis (1837-55), tenth ruler of the Husaynid dynasty. He proclaimed himself commander-in-chief of the army and attempted to modernize it; he sent Tunisian officers to Europe for instruction, and obtained European military advisers and French officers to act as instructors, but the latter were unable to instil habits of discipline into the troops or to form them into reliable regiments. When Ahmad decided to send a contingent of 10,000 men to take part in the Crimean war, this force was quartered in the Caucasus, where epidemics decimated its ranks and shattered its morale.

With the Bey's permission, a French topographer made a careful survey and drew up a map of the Regency. The Bey also founded, in 1848, a polytechnic institution, with the object of training a cadre of specialist and administrative officers. This institution ceased to function after the campaign in the East.

Ahmad also wanted a navy. He purchased twelve ships abroad and resolved to create a naval station at Porto Farina. A frigate was built there, but proved permanently unserviceable, and the port was soon silted up by the Medjerda. Towards the end of his reign, the Bey contented himself with modernizing the arsenal at La Goulette (Halk al-Wādī). He showed no interest in improving the commercial ports.

Ahmad resisted the claims of Turkey, which seized every opportunity to reassert its suzerainty over Tunisia, to demand gifts, and to press for payment of an annual tribute which would at least have been tangible evidence of the Bey's vassal status. As England supported Turkey, Ahmad sought the aid of France, which, to maintain security

in Algeria and to put an end to the illicit arms traffic, took care that the Porte should not interfere in Tunisian affairs. In 1846, Ahmad went to France and was warmly welcomed in Paris. As a reward for his stubborn resistance, he succeeded in obtaining from the Porte in a *khāt-i shērī* which recognized him individually as an independent sovereign.

Ten miles from Tunis, on the banks of the Sakhā Saghūm, Ahmad built the Muhammadiyya palace, a huge mass of enormous buildings which were still incomplete at the end of his reign and which soon fell into ruins.

This extravagance, and the prodigality of the Bey's favourites, the Genoese Raffo, the minister of foreign affairs, and above all the Greek Mustafā Khazandār, minister of finance from 1857 to 1873, exhausted the Treasury. The farming of the tax on tobacco and increased taxation generally caused revolts in 1840 at Tunis and in the region of Kābis, and in 1842 at La Goulette. They were suppressed, but the Bey was unable to impose his will on the mountain tribes. Beneath an outwardly brilliant display, a love of ostentation coupled with chaotic administration set Tunisia on the road to decadence.

It must nevertheless be recognized that Ahmad, sincere in his desire to confer on his country western institutions, introduced some beneficial reforms. In 1841 he prohibited the sale of negroes, and emancipated his household slaves. In 1846 he formally abolished slavery throughout the Regency. He abrogated the laws discriminating against Jews. Finally, he promoted the development of education. The abbé Bourgade, in charge of the chapel of Saint Louis of Carthage, the construction of which had been authorized by Ahmad, founded a hospital in 1843 and, two years later, built the Saint Louis College, which was open to boys of all creeds and to which a nursery school was attached, as well as a small printing press. The abbé later opened other schools and dispensaries. Various archaeological excavations were begun. French influence became dominant in Tunisia, as a result both of their educational activities and of the flourishing trade conducted by the merchants of Marseilles.

**AHMAD BĪDJĀN** [see BĪDJĀN AHMAD].

**SAYYID AHMAD BRĒLWĪ**, a militant religious reformer of Muslim India, was the son of Muhammad 'Irān and the 36th direct descendant of Hasan, the son of 'Alī. He was born on 6 Šafar 1207/28 Nov. 1786 at Bareilly (Bareil), where he received his early education. He then went to Lucknow and after a few months' stay there, he proceeded about 1219/1804 to Delhi, where he became a disciple of the famous divine Shāh 'Abd al-'Azīz [s.v.], the eldest son of Shāh Wali Allāh [s.v.], and received formal

instruction from his younger brother Shāh 'Abd al-Kādir [s.v.]. About 1223/1807, he returned to Bareilly, where he married. In 1225/1810, he left for Radipūtina, where he served for seven years in the army of Nawāb Amīr Khān, who subsequently became the ruler of Tonk.

In 1232/1817, he left the service of the Nawāb and returned to Delhi. Roused by the religious and political degradation of his co-religionists, he started on a missionary tour as a religious teacher and reformer. His tenets bore a great similarity to those of the Arabian Wahhābīs in the adoption of a pure and simple form of religion, free from superstitious innovations and exaggerated veneration for prophets and saints. His reputation spread far and wide, and thousands of Muslims adopted his views. His chief disciples and constant companions in his chequered career were Mawlāwī Muhammad Ismā'īl, the nephew of Shāh 'Abd al-'Azīz, Mawlāwī 'Abd al-Hayy, the son-in-law of Shāh 'Abd al-'Azīz, and Mawlāwī Muhammad Yūsuf of Phulānā, a descendant of Shāh Abī Allāh, the elder brother of Shāh Wali Allāh.

In 1236/1821, Sayyid Ahmad set out on a pilgrimage to Mecca, staying a few months at Calcutta on the way. On his return to India in 1239/1824, he began to make active preparations for a *dīkhāt* or religious war. It is clear from his letters that the ultimate object of his reformist movement was to overthrow the rule of the British and the Sikhs and restore Muslim dominion in India. His first aim was to oust the Sikhs from the Panjāb. Having enlisted the sympathy and promised aid of his co-religionists at Kābul and Kandahār, he started on his expedition in 1241/1826 with an army of enthusiastic followers, and reached Peshāwar via Radipūtina, Sind, Baluchistan and Afghanistan. He attacked and repulsed the Sikh army at Akora Khattak (20 Nov. 1826); but lost the battle of Saydo through the desertion of Yār Muhammad Khān Durrānī and his brothers. Although he succeeded in occupying Peshāwar in 1830, he was disgraced by the treachery of the Durrānīs and other local khāns, and decided to proceed to Kashmir. On the way, however, he was encountered by the Sikhs in 1246/1831 at Bālākot where he was killed along with Shāh Muhammad Ismā'īl and his army was dispersed. Nevertheless, the remnants of his army continued their struggle in the North-West Frontier Province for the cause for which their leader had laid down his life.

His numerous disciples continued his reformist movement in India, and were responsible for the production of a vast religious literature. In order to reach the masses, they adopted the Urdu language as their medium and were incidentally instrumental in promoting the growth of a simple, direct and vigorous style. His adherents preferred to engage themselves in religious pursuits rather than seek service under the British government.

A few short epistles and pamphlets on religious topics are credited to Sayyid Ahmad. He is also said to have inspired the composition of *Širāt Muṣṭafīya*, a work written in Persian by his two foremost disciples, Shāh Muhammad Ismā'īl and Mawlāwī 'Abd al-Hayy. Several collections of his letters (in Persian) also exist in manuscript.

**Bibliography:** Sayyid Ahmad Khān, *Al-Shāh al-Sanīdī* (in Urdu, Delhi 1847); Waḡhī 'Ahmadī also known as *Ta'wīḡh Kabīr*, consisting of reports made by a number of the close associates of Sayyid Ahmad, recorded in Urdu at Tonk, covering about 2,000 large folios, still in manu-

script; Garcin de Tassy, *Hist. de la Litt. Hindouie et Hindoustani*, Paris 1871, III, 32-7; W. W. Hunter, *The Indian Musalmans*, London 1872; M. T. Titus, *Indian Islam*, London 1930, 18-16; W. C. Smith, *Muslim Islam in India*, Lahore 1947; Ghulam Rasūl Mīr, *Sayyid Ahmad Shāhid* (in Urdu), Lahore 1954, a critical and exhaustive work on the subject.

(SH. IRAYATULLAH)

**AHMAD DJALĀ'IR** [see DJALĀ'IR].

**AHMAD-Ī DJĀM**, "Ahmad of Djam", also AHMAD-Ī DJĀMĪ, Persian šōfi in the Sādiqī period, contemporary of al-Qazwīnī, 'Adī b. Muṣāfir, 'Ayn al-Kudāt al-Hamadhānī, and Sanā'ī, in full SHĪRĀZ AL-DĪN ABŪ NASH AHMAD B. ABŪ 'Ī-ḤASAN B. AHMAD B. MUṢ. AL-NĀMA'Ī AL-DJĀMĪ. He is also known by the nickname of Zāda Pī, "Elephant-coloured". He claimed descent from the Prophet's Companion Dī'far b. 'Abd Allāh al-Baḡialī (Ibn Sa'd, VI, 13), but although of Arab origin had a ruddy complexion, reddish beard and dark-blue eyes. Born in the village of Nāma or Nāmā, in Turḡhī (Kōhistan), in 441/1049-50, he led as a youth, according to the legend, a somewhat wild life, until, when 22 years of age, in 463/1070-1, he was driving an ass laden with wine homeward to a drinking-bout, he was converted by a supernatural voice and withdrew to the solitude of the hills of his native village. After twelve years spent there in ascetic exercises, and visits to some cities of Khurāsān, he settled as the result of an inner call in the mountains of B.P. z.d-ī Djām (in Kōhistan), where he built a *maṣgid-i nūr* and entered into active intercourse with men. He stayed here for six years. At the age of 40, i.e. in 481/1088-9, he moved to the village of Ma'addābād of Djam and built there a convent (*dhakka*) and a Friday mosque. He travelled widely in eastern Persia, to Sarakhs, Naysābūr, Harāt, Bākhārā, etc., and is said also to have visited Mecca. The sources speak also of a personal connection with sultan Sanḡar. He died in his convent as the leader of a considerable body of disciples in Muharram 536/Aug. 1141, and had himself buried under Ma'addābād at a place which a friend had seen in a dream. A mosque and convent were later built over the grave, followed by a complex of buildings which became the centre of a new, and still existing, place called Turbat-i Shaykh-i Djām [s.v.], "Mausoleum of the Shaykh of Djām". One of his 14 surviving sons (out of 30), Burhān al-Dīn Nasr, took over the leadership of the group of disciples. Shams al-Dīn Muhammad al-Kūsawī al-Djām, a šōfi who died in Harāt in 863/1459 [Djām, *Nafahāt al-Dīn*, I, 11], was descended from a daughter of this Burhān al-Dīn and her cousin Širāj al-Dīn Ahmad, another grandchild of Ahmad-ī Djām.

Ahmad-ī Djām had no regular novitiate training, but sought his own way in solitude. He had nevertheless relations with a certain Abū Ṭāhir-Kud, who is said to have been a disciple of Abū Šā'ib b. Abī Ṭāhir and even to have given Ahmad the latter's patched robe (*dhakka*). That a famous shaykh gives his own robe to the care of a friend, together with a description of certain signs by which he may

recognize its future authorized wearer, is a well-known motive of šōfi hagiography, and can generally be shown up as an invention (cf. *Firdaws al-Murshidiyya* (Meier), introduction, 18 ff.). This may well be the case here. The above-mentioned al-Kūsawī is later said to have claimed to wear the same robe.

Ahmad wrote the following works, all in Persian: *Uns al-Ta'wīn*, *Širāḡ al-Sā'irīn* (professedly written in 535/1139), *Futūḡ al-Kulūb* (= *Futūḡ al-Rūḡ*), *Rawḍat al-Muḡhīnīn*, *Ḥikāz al-Hāḡhā*, *Kunūz al-Dīkma*, *Mīḡhā al-Nadāḡ* (written in 522/1128). Of these only the first and last-named works have so far been recovered, although Mirzā Ma'sūm 'Alī Shāh (1901) had still read the second. The biographers' information on the dates of the first six writings (Ivanov, in *JRAS*, 1917, 303 f., 349-52) must be false in part, since all these works are listed in *Mīḡhā al-Nadāḡ*, and must be earlier than 522/1128, unless the list is an interpolation or the works mentioned were subsequently revised. There has been preserved further a *Risāla-yi Samarḡhandiyya* (also called *Šu'āl u-Djawāb*), in reply to a question. Two or three other works listed by the biographers, together with the *Futūḡ al-Rūḡ*, are said to have perished in Djām in consequence of the Mongol invasion. Only the library (in Dihlī) of Fīrūzshāh, of the Tughlakid dynasty (724-907/1313-88), still possessed all Ahmad's works. The *Mīḡhā al-Nadāḡ* (MS Rida Pasha 3099), mentioned in the *I. A. v. v. Cami*, is probably not a work by Ahmad.

On his conversion Ahmad, as he himself says, possessed no theological training, and what he later learned and published on this subject was professedly acquired by revelation. This is to be taken *sans grana salis*. Even his early diṭa betray some theological knowledge and still more his writings, where he positively requires it. His views, or at least his formulations, are, however, not exempt from contradictions and inconsequences. His theology is firmly grounded on Kur'ān and Sunna, and on the *shar'ī* in the šōfi sense, and in it he shows himself a pronounced Sunni; he allows, for example, the *maṣk al-ḡhuḡāyā*. Right action includes, however, also *hujūdāt*, i.e. inner reasoning; unlawful conduct accompanied by *hujūdāt* is, according to him, better than lawful conduct without *hujūdāt*. His doctrine of the *tarīḡa* recognizes the purification of the soul through the stations *ammā*, *lawmā*, *maḡhama*, up to *maḡmaḡma*, and aims to clarify the relation of the last stage to the heart (*kalb*); Ahmad defines the "soul at rest" (*maḡmaḡma*) as the sheath in which the heart is fixed (*ghāḡḡat al-ḡh*). The aim of mystical endeavour is according to him to pick out only one of many expressions—to find the "spirit" (*rūḡ*, *djām*), the "real being" (*ḡahḡat-i ru*), to which only two ways lead: remembrance of God (*dhikr Allāh*) and waiting (*istidrāḡ*) until God in His grace discloses this being to one. An assumption of God's qualities in *concreto*, as certain šōfis had taught, is regarded by Ahmad, in agreement with al-Sarrāḡī, al-Kalābādhī, and al-Kuḡhārī, as impossible, since this implies indwelling (*ḡwāl*), and only effects (*āḡhār*) of God's qualities, not these themselves, can inform the creature (incommensurability of the eternal and the temporal). True belief in *taḡwīd* consists in Ahmad's view of referring all action and event back to the one original cause, God (*mushāhidat-i ḡahḡī* — *ḡudrā* — *ḡahḡī*). For the rest, conditions in mystical love are much the same as in ordinary love; no person can really become one with another. The representation which one may take on oneself from the Beloved is rapidly dissipated,

and one immediately returns to daily life. Should it reappear, so in reverse one loses again one's connection with the world. Together with this, however, Ahmad expresses the dignity and the spiritual power of *šūfī* life in poetic terms. He cites the case of Fudayl b. 'Iyād who, when converted from highway robbery, returned their possessions to those whom he had robbed and when he had nothing more left, still brought gold from beneath his robe for a Jew, the earth having been turned into gold. One who is converted, he says in the same treatise (*Miftāḥ al-Nadī*), which was written on the occasion of the conversion of one of his sons), him does the water praise over which he journeys; him do the stars praise and for him they pray. The *šiddīk*, *ahdī*, *zāhid*, is the sun, from whom all men derive their light. The *šūfī* should distil a dew of blessing around him, as musk and aloes distil their scent. True poverty (*fakr*) is, according to Ahmad, the elixir which has the faculty of colouring everything which comes into contact with it.

The picture of Ahmad's spiritual personality acquired from his prose writings and sayings is in contradiction with the *Dīwān* which goes under his name, and which would make him out to be an ecstatic pantheist intoxicated with self-devotion. As already remarked by Ivanov (*JRAS*, 1917, 395) and expressed in a private letter by H. Ritter, there is room for suspicion that the *Dīwān* is at least partly a fabrication, but the question still awaits fuller investigation. It is preserved in several MSS, not all of which are complete (list in Meier, *BH&*), and has been lithographed (Cawnpore 1898, Lucknow 1923). Taḥṣīl Ahmad and Ahmadi. A book of "Poems" is also mentioned, however, by his biographers.

**Bibliography:** Biographies: (1) Raḍī al-Dīn 'Alī b. Ibrāhīm-i Tā'abbādī, a contemporary of the *ghayyā*; it is not preserved, but was used by: (2) Saḍīd al-Dīn Muḥammad b. Mūsā al-Ghaznawī, also a contemporary and a disciple of the *ghayyā*, *Mahāmat Shāykh al-Islām . . . Ahmad b. Abū 'Iḥsān al-Nimāzī*, *Shams al-Dīn*, composed ca. 600/1204, MS Nāḥīdī Paḡha, Istanbul, 399, 38v-132v. It is almost worthless for Ahmad's real biography and thought, being full of miraculous legends appealing to the primitive masses; al-Ghaznawī must have interpreted in a concrete sense certain poetical utterances of his master. It is, however, interesting for the typical aims of the *šūfī* legend and for certain historical circumstances, as well as geographical names, of eastern Persia. (3) Ahmad-i "Tarāḡhātānī", a contemporary of the *ghayyā*, whose work is apparently not preserved, but was used, together with that of al-Ghaznawī, by: (4) Abū 'I-Makrīm b. 'Alī al-Mulk-i Dīāmī, *Khawāṣṣ al-Mahāmāt*, written in 840/1437-7 and dedicated to Shāhrukh, MS of the Asiatic Society of Bengal (Ivanov's Cat., I, no. 245), and two incomplete MSS in Russia, one of which was published by Ivanov, in *JRAS*, 1917, 291-365. (5) 'Alī of "Būrdjān" (probably = Būrdjān), of 929/1523, probably depending of Abū 'I-Makrīm, was used by Khanikoff.—The articles in Dīāmī's *Nafahāt al-Uns* (Calcutta 1859, 405-17) on Ahmad-i Dīāmī and Abū 'I-Makrīm b. Kurā, as well as certain other parts, are derived from al-Ghaznawī.—See also Ibn Taḥṣīn (Defrémery-Sanguinetti), III, 75 ff.; Mirzā Ma'sūm 'Alī Shāh, *Tarā'ih al-Habā'ih*, Lith. Teheran 1316, 261. **AHMAD DJEWDET PASHA** eminent Ottoman writer and statesman, born on 28 Jumādā II, 1237/22 March 1822, at Lofla (Love) in northern Bulgaria, of which his father, Hādīdī Ismā'īl Agha, was a member of the administrative council, and where his earliest known ancestor, a native of Khikānēl (Kirk Kilise), had settled after taking part in the campaign of the Pruth in 1711. Ahmad early displayed unusual aptitude and diligence, and in 1839, on reaching the age of seventeen, was sent to continue his education in a *medrese* at Istanbul. There, as well as following the traditional *medrese* courses, he not only studied modern mathematics, but devoted his spare time to learning Persian with the poet Süleyman Fehim and himself took to composing verse in the traditional style. It was from Fehim that he received the *maḥabb* Djewdet that he thenceforth added to his name.

After obtaining the *ijāzat* that permitted him to enter the judicial profession, he received his first paid but nominal appointment as *hāfi* in 1260/1845. When Mustafā Reḡhīd Paḡha, on becoming Grand Vizier in 1846, applied to the office of the *Shāykh al-Islām* for an open-minded *ʿālim* to provide him with the knowledge of the *gharīʿa* necessary for the proper drafting of the new *hānūns* and *nūpū-nāmes* he had in mind to promulgate, it was Djewdet who was chosen. From this time to Reḡhīd Paḡha's death thirteen years later Djewdet remained closely attached to him, even living in his house and becoming his children's tutor. During this period he also became, acquainted with 'Alī and Fu'ād Paḡhas, and under Reḡhīd's influence was persuaded to undertake political and administrative duties. In August 1850 he received his first appointment proper as Director of the recently founded *Dār al-Mu'ālīm*, with membership, as its chief secretary, of the *Medjlis-i Ma'irī*.

During his directorship of the *Dār al-Mu'ālīm*, which seems, however, to have come to an end in the following year, Djewdet achieved reforms in the admission, maintenance and examination of the students attending it; and as secretary of the *Medjlis-i Ma'irī* he wrote the report that led to the foundation in July 1851 of the *Endüme-i Dāwā*, to which, after accompanying Fu'ād Paḡha on a state visit to Egypt in March 1852, he devoted his attention, beginning his best known work, the *Ta'riḫ-i Wākāy-i Dāwā-i 'Alīyye*, of which he completed the first three volumes during the Crimean War, under its auspices. On his presenting these to 'Abd al-Medjīd he received promotion to Süleymaniyye rank; in February 1855 he was appointed *sa'fa-nisāz*; in 1856 he was appointed *sa'fa* Galata; and in 1857 he attained Mevra rank in the judicial hierarchy. Meanwhile, during the war, he was made a member of a commission set up to compose a work on the prescriptions of the *gharīʿa* regarding commercial transactions, which was dissolved, however, after publishing only a *Kitāb al-Buyūʿ*. In 1857 he was appointed to the Council

of the *tanẓīmāt*, taking a lead in the composition of a new criminal *hānūn*, and, as a president of the *Arāḫ-yi Shāyḫi Komisyonu*, participated in that of a *hānūn-nāme on tafa*.

After the death of Reḡhīd Paḡha in 1858 it was suggested to Djewdet by 'Alī and Fu'ād Paḡhas that he should abandon the learned profession in favour of the government service by accepting the *sa'if* of Vidin. It was not for another eight years, however, that he took this step, although in the interval he was twice charged with important administrative missions as an "Extraordinary Commissioner", the first in the autumn of 1861 to Ishkodra, and the second (in company with a general commanding a division) in the summer of 1863 to Kozan in the Taurus region, to pacify those areas by the introduction of needed reforms. So successful was he in the first that he was sent in March 1863 as *na'ib* with the judicial rank of *hāfi-ʿaṣher* of Anatolia, to Bosnia, where he was again markedly successful during the ensuing eighteen months in restoring order. During this period he was also made a member, first of a commission appointed to reform the official newspaper *Tahwīm-i Wākāy*, and secondly of the *Medjlis-i Wālā*. His abandonment of the learned profession took place in Jan. 1866, when he ceased to be *sa'fa-nisāz*. His "learned" rank was then replaced by that of vizier, and he was appointed governor of the *widāyet* of Aleppo, as reconstituted under the Ordinance of *widāyets*. In Febr. 1868, however, he was recalled to Istanbul to become president of the *Dīwān-i Akhām-i 'Adliyye*, one of the two bodies that then replaced the *Medjlis-i Wālā*, the other being the *Shāyḫ-i Dāwā*. It was chiefly owing to Djewdet's efforts in this post that the Nizām courts were instituted; that this *Dīwān* was in due course divided into a Court of Appeal (*Temyiz*) and a Court of Cassation (*Ittihad*); and that the presidency was converted into a ministry. It was also during this his first term as a Minister of Justice that on the one hand Djewdet instituted law courses at the Ministry for the better instruction of judges and the improvement of judicial procedure, and, on the other, a beginning was made with the composition of a legal code (*Medjelle* (q.v.)) based on Hanafī *fiqh*, under the auspices of a society for the purpose.

In securing approval for such a code (that is one based on Islamic prescriptions) Djewdet had the support of Fu'ād Shāyḫ-i Wālā Reḡhīd Paḡha in opposition to 'Alī Paḡha, who favoured rather the adoption of the French Code *Civil*.

Djewdet Paḡha (as he now was) remained Minister of Justice up to the end of April 1870, by which time four volumes of the *Medjelle* had been published. Just as the fifth was completed, however, he was dismissed, and though appointed *sa'if* of Brusa, was almost immediately removed of that post also. He remained unemployed until August of the following year, when he was recalled to the presidency of the *Medjelle* society and of the *tanẓīmāt* department of the *Shāyḫ-i Dāwā*. In the interval, as well as the fifth volume of the *Medjelle*, a sixth, in which Djewdet had had no hand, had been published. It was largely the deficiencies of this volume, which he at once superseded by a new translation of his own, and from this date until the publication of the final volumes in 1877 he continued to supervise the composition of the code, though also otherwise employed in a variety of important offices, sometimes in the provinces. One of the chief of these was his appointment in April 1873 as Minister of Education,

in which capacity he achieved a reform of the primary schools for boys (*shāyḫ mahāṣir*), drew up curricula for the Rüşdiyye, and the still to be created 'İdādiyye, schools—measures that necessitated the composition of new manuals of instruction, three of which he wrote himself; and reorganized the *Dār al-Mu'ālīm* to meet the demands of these three educational grades. On 2 Nov. 1874, however, after the appointment as Grand Vizier of Hüseyin 'Awad Paḡha, who was apparently already meditating the deposition of Sultan 'Abd al-'Aziz, Djewdet was made *sa'if* of Yanya (Jannina) in order to remove him, as a likely opponent of the move, from the capital; and it was not until June of the next year, after Hüseyin 'Awnī's fall, that he was restored to his former post. In Nov. 1875 he became for the second time Minister of Justice, and as such secured the transference to his Ministry of the commercial courts, which had till then depended on the Ministry of Commerce. But he incurred the displeasure of Mahmūd Nedim Paḡha, during the latter's second Grand Vizierate, by opposing his grant of customs concessions to foreign capitalists; and after first being sent on a tour of inspection through Rumelia in March 1876, he was dismissed from the Ministry of Justice and was on the point of proceeding to Syria as *sa'if*, when on the fall of Mahmūd Nedim he was for a third time made Minister of Education.

Djewdet played no part in the deposition of 'Abd al-'Aziz, which occurred at the end of May, and in November, after the accession of 'Abd al-Hamid II, he returned to the Ministry of Justice. It was now that he and Midhat Paḡha became permanently estranged, owing to what Midhat regarded as Djewdet's reactionary attitude to the constitution, in the discussions upon which the latter began by taking part. Yet throughout his Grand Vizierate Midhat maintained Djewdet in office; and it was only on Midhat's disgrace and replacement by Sakrīl Edhem Paḡha that Djewdet left it for newly created Ministry of the Interior. In this he remained until near the end of the war of 1877 with Russia, the involvement of the Porte in which he disapproved, when after a short term as Minister of the Imperial *Ewlad*, he was for a second time appointed *sa'if* of Syria.

He remained in Syria nine months, during which, having special knowledge of the area, he repressed in person another revolt at Kozan. In December of the same year he was replaced by Midhat and recalled to the capital to preside over yet another ministry, that of Commerce. On the dismissal of the Grand Vizier Khayr al-Dīn Paḡha in Oct. 1879 Djewdet acted for ten days as President of the Council of Ministers, and on the appointment of Kılıç Sa'ad Paḡha he was for a fourth time made Minister of Justice. This was, so far, his longest term in that position, lasting three years. It was during it that Midhat was put on trial. Djewdet appears already to have denounced him as treacherously pro-Christian, and went out of his way, as *ex-officio* head of the body appointed to arrest Midhat and bring him to the capital, himself to travel for the purpose to Smyrna.

His fourth tenure of the Ministry of Justice came to an end in Nov. 1882, on the appointment of Ahmed Wefik Paḡha as Grand Vizier; and it was only in June 1886 that he was given office again, for the last time, in the same post. He held it on this occasion for four years, during which he also became one of the three members of the special conclaves

views re-emerge regularly in writings of the present generation. The greatest benefit, however, which Ahmad Khân rendered to his country was that he restored the despairing Muslims of his age to faith in themselves. In this respect—and not for the communalism imputed to him—he may be regarded as a forerunner of Pakistan.

#### AHMAD AL-MANŠÜR. [See KÖPRÜLÜ.]

AHMAD AL-MANŠÜR, sixth sovereign of the Moroccan dynasty of the Sa'âdids (q.v.), son of the sixth sultan of the dynasty, Muhammad al-Shaykh al-Mahdi (d. 964/1557), was born at Fez in 956/1549. He held various military commands, but was driven into exile at Algiers with his elder brother, 'Abd al-Malik. The latter, on ascending to the throne in 983/1576, designated Ahmad as his heir presumptive. Two years later Ahmad took part in the famous battle of Wādî 'l-Mahghirîn, in the vicinity of al-Kasr al-Kabîr (q.v.) in the N.W. of Morocco. This battle, which took place on the last day of Djumâdâ I 986/4 August 1578, ended disastrously for the troops of King Sebastian of Portugal, who was killed, while a great number of Portuguese noblemen were taken prisoner. In his turn, the sultan 'Abd al-Malik, who was very ill, died in his litter during the battle. The same day Ahmad was proclaimed sultan by the victorious troops, to whom he promised pay and rewards; he took the honorific *labb* of al-Manšūr, "the victorious."

The new sovereign came to the throne under the most favorable auspices. From all sides, felicitations poured in, from the Grand Turk, the *pašas* of Algiers, even from Spain and France. Nevertheless he had to overcome many difficulties at home: these he faced with skill and energy, reinforced by the considerable sums which he realized by the ransom of the prisoners of Wādî 'l-Mahghirîn. With this money he engaged, in the customary manner of Islamic rulers, a reliable bodyguard commanded by morisco officers and organized in the Turkish fashion, and built fortifications in Taza, Fez and the *hasaba* of Marrâkuṣh. At the same time, he turkicized to a certain degree his court and administration (*maḥzen* (q.v.)), as well as his military cadres, under the command of *beys* and *pašas*. He also had to repress various troubles stirred up by the Arab tribes and to overcome the opposition of some members of his family who rose against him. But in general, Ahmad's reign, which lasted for a quarter of a century, was peaceful and allowed Morocco, at last, to enjoy for a time a relative tranquillity.

It was in foreign affairs that Ahmad al-Manšūr showed real diplomatic talent. We have ample materials at our disposal for estimating his abilities in the incomparable collection of documents made by H. de Castries in his *Sources inédites de l'histoire du Maroc*. First of all, the sultan had to give some

pledges to the Porte, without completely yielding to its demands; then he had to negotiate with Philip II of Spain, and he did this in such a way that Spain achieved no positive results. On the contrary, the practically-minded sultan encouraged the development of smuggling, or even piracy. In 1585 a "Barbary Company" was founded by British merchants in order to monopolize the external trade of Morocco. After the destruction of the Armada in 1588, Ahmad al-Manšūr gave up the friendship with Spain and entered into relations with Queen Elisabeth.

To Ahmad's credit stands also the conquest of the Sîdân, which, though it was ephemeral, gained for this ruler, greedy for riches, a considerable booty in gold and procured him his second surname of al-Djahabî, "the golden". It was prepared by al-Touatî and Tîgîrâtîn in 990/1582 and was decided upon by the advice of al-Manšūr's Morisco general staff. It is related in detail by all the historians of the Sa'âdîd dynasty and by three Sudanese chronicles. The expedition, commanded by the *paša* Dîawîdîr, left Marrâkuṣh in the autumn of 990/1590 and reached, not without difficulties, the Niger three months later. The Sudanese *achas* of Gao, Ibhak, after a battle near that town, had to ask for peace and shortly afterwards the Moroccan troops entered Timbuktu (q.v.). After the *paša* Dîawîdîr had been replaced in his command by another morisco officer, Mahmûd Zarkîn, the conquest of the whole country was continued, while the most important *faḥis* of Timbuktu, amongst them Ahmad Bâbî (q.v.), were deported to Marrâkuṣh. Thereafter, for some years, there was an incessant afflux of gold and captives to the Sa'âdîd capital.

Ahmad al-Manšūr, who hardly left Marrâkuṣh during the whole of his reign, wanted to build there a residence worthy of himself: the palace called al-Kasr al-Badî', the construction of which was begun soon after his accession and lasted for about twenty years. This sumptuous mansion was later mutilated by the sultan Mawliwî Ismâ'îl. At the same time, the Moroccan ruler made a point of assembling a literary court, in which some famous writers, especially the secretary of the chancery, 'Abd al-'Azîz al-Fîḥṭâllî (q.v.), author of a panegyric chronicle, *Manâzil al-Sajâ'*.

The last years of Ahmad al-Manšūr's reign were troubled by the intrigues of his son to obtain the succession, and by an epidemic of cholera which began in 1007/1598-9 onwards, to decimate the population of the capital. Deserting Marrâkuṣh to escape the scourge, the sultan went to the north of the country, and soon after his arrival at Fez he died there on 11 Rabî' I 1012/20 August 1603. His body was transferred to Marrâkuṣh and buried in the sumptuous mausoleum which he had built for himself and his family and which still exists.

LÉVI-PROVENÇAL)

AHMAD MIDHAT, Ottoman Turkish writer, was born in Istanbul in 1260/1844, the son of a poor draper called Sulaymân Agha and a Circassian

mother. He lost his father in early childhood, and was for a while apprenticed to a shoemaker. When he was 10 years old the family moved to Vidin, where his half-brother Hâfîz Agha was the *mudîr* of a *hâdâ*. Hâfîz, however, fell into disgrace, and in 1859 Ahmed returned to Istanbul, where he began his schooling. In 1277/1861 Hâfîz Agha, having won the favour of Midhat Paşa, was reinstated and given an appointment in Niş, to which he brought the family. Ahmed entered the Rüşdiyye school there, and graduated in 1280/1863. In 1281/1864, when Midhat Paşa took over the newly constituted *wilâyet* of Tuna, the family followed him to its capital, Rusçuk, where Ahmed was apprenticed as a clerk in the provincial chancery (*wilâyet meclîs-i bakiye*). While working, he continued his studies privately, and also studied French and western knowledge under the guidance of a Christian colleague. He won the favour of Midhat Paşa, who gave him his own name, and, after appointing him to various offices, made him, at the age of 24 or 25, editor-in-chief of the *wilâyet* newspaper *Tuna*. In 1285/1868, when Midhat Paşa became *sâdî* of Baghdad, Ahmad Midhat followed him there, taking charge of the government printing-press and newspaper (*Za'atîr*). During his stay in Baghdad he continued his private studies, and began to write school-books and stories. In 1288/1871 his brother Hâfîz, who had meanwhile become *mutasarrîf* of Basra, died, and Ahmed returned with the whole family to Istanbul. Abandoning the state service, he devoted himself entirely to writing and printing. For several years he contributed articles to various papers, and also ran a printing-press where he himself printed and published his numerous books. His journalistic activities brought him into an apparently fortuitous association with the Young Ottomans, and in 1289/1872 he was arrested and summarily exiled to Rhodes, together with Abû'l-Diyâ Terefîk. There he wrote a number of books, some of which were published in Istanbul under a pseudonym. In 1293/1876, after the deposition of Sultan 'Abd al-'Azîz, he was pardoned, and returned to Istanbul, where he resumed his activities as a writer and printer. His cautious attitude during the following months won him the good will of Sultan 'Abd al-Hamid, and in 1294/1877, after publishing the *Usûl-i İhtisâs* (an historical justification of 'Abd al-Hamid's accession), he was given the directorship of the official gazette and printing-press. This led to a permanent breach with the Young Ottomans. During the reign of 'Abd al-Hamid he held various state offices, and from 1295/1878 onwards edited the *Terjümân-ı Hâbihat*, a periodical of some importance in the intellectual history of that time. In the summer of 1888 he went as official Ottoman representative to the International Congress of Orientalists in Stockholm, and spent some 3½ months in Europe. (This trip is described in his *Avropâda bir Dîvânîcân*, Istanbul 1307/1891.)

In 1908, after the Young Turk revolution, he was retired from his official positions under the age-limit, and was subjected to vigorous attacks. He attempted to resume the literary work which he had long since sacrificed to his official career, but abandoned the attempt in the face of hostile opinion and altered tastes. For a few years he held teaching posts at the University, the Woman Teachers' Training College, and the School for Preachers. He died in Muhtarîm 1331/Dec. 1912-Jan. 1913. Besides playing an important role in the development of Turkish journalism in the 19th century,

Ahmed Midhat also wrote an enormous number of books, estimated at about 150. These fall into two main groups, fiction and popularized knowledge. His novels and short stories, many of them first published as serials in periodicals, were widely read among the generation of Turks that grew up under the *tanzimat*, and played no small part in developing new tastes and interests among a public still entirely unacquainted with western literary forms and aspirations. His novels were in every sense popular, simple in both style and sentiment, intended to entertain and sometimes also to instruct a reader of unsophisticated and unitary tastes. Some are romances of adventure, others deal with his own and the immediately preceding periods, and at times manage to achieve a certain liveliness and realism. Ahmed Midhat was much influenced by the French popular novelists, and also translated a number of their works. Apart from fiction he wrote a considerable number of popular and semi-popular works on history, philosophy, religion, ethics, science, and other subjects, the purpose of which was to bring modern European knowledge to his compatriots in a simple and attractive form. The most important of his historical works are *Ust-i İnkilâb* (3 vols., 1294-5/1877-8), already cited, and *Zuhd al-Fakih* (1295/1878), an attempt to explain the Turkish defeat in the war of 1877-8. He also wrote a universal history in 3 volumes (1303-5/1880-2), and a series of separate histories of European countries (*Kā'imāt*, 14 vols., 1292-1303/1877-1881).

**Bibliography:** J.A., s.v. (by Sabri Esat Siyavuşlu), on which much of the foregoing is based. Further Turkish publications are cited there. A contemporary judgment will be found in 'Abd al-Rahmān Šērā's obituary notice, published in *TOEM*, 3rd year, 1328 [sic], 1113-9. See further P. Horn, *Geschichte der Türkischen Moderne*, Leipzig, 1st ed. 1902/1909, 32-30; Babinger, 389-91; O. Hachtmann, *Die türkische Literatur des zwanzigsten Jahrhunderts*, Leipzig, 1916. For two sharply contrasted judgments by European contemporaries see M. Hartmann, *Unpolitische Briefe aus der Türkei*, Leipzig 1910, 79, 208; J. Ötörp, *Erinderinger*, Copenhagen 1937, 41-44. (B. Lewis)

**AHMAD b. KHALID b. HAMMAD AL-NĀSIRI AL-SALAWI**, *Abū* 'ABRĀHĪM SHĪHĀB AL-DĪN, Moroccan historian, born at Salé (Sālā) 22 Dhū'l-Hijja 1250/20 April 1835, died in the same town 16 Džumādā I 1315/13 Oct. 1897. The genealogy of this writer descends in a direct line from the founder of the Moroccan brotherhood of the Nāsirīyya, Ahmad b. Nāsir, who was buried at his *zāwiya* at Tāngrūt in the valley of Wādī Dar'ā (Dra). He pursued his studies at Salé, and, without neglecting his religious and juridical studies, delved deeply into Arabic profane literature. At the age of about 40, Ahmad al-Nāsiri entered the judicial branch of the Sharīfī administration as a notary or as a steward of State lands. Internationally, he held relatively important posts. He lived first at Dār al-Bayḍā' (Casablanca), from 1292-3/1875-6, and had two periods of residence at Marrākuš, where he was employed in the Steward's department of the royal household. Later, he lived for a time at al-Djāzida (Mazagan), as a customs official. He then stayed successively at Tānzil and Fez, and, at the end of his life, returned to his native town, where he devoted himself to teaching. At his death, he was buried in the cemetery at Salé situated outside the gate known as Bāb Ma'allaka. In short, al-Nāsiri was a minor official under the Sharfīs, and

at the same time a man of letters and a historian. Apart from his historical writing, which gained him a name even outside Morocco, he left several works which without doubt would have sufficed to draw attention to him and to assure him an honourable place among contemporary Maghribī men of letters. These are, in addition to six short works (*Chorfa*, p. 333 n. 1); 1) a commentary on the *Shamākhīyya*, a poem by Ibn al-Wannān, which he called *Zahr al-Ajānib min Ḥadīth al-Wannān* (lithographed at Fās in 1314/1896); 2) a survey of the schisms and heresies of Islam, entitled *Ta'zīm al-Mīnā bi-Nasr al-Sunna* (Ms. Rabat; cf. *Catalogue*, I, 23); 3) a monograph on the alleged *sharīfī* house of the Nāsiriyya, to which he himself belonged, entitled *Ta'zīm al-Mughīrī al-Nasab al-Djāfārī* (lithographed at Fās; French summary by M. Bodin, *La Zaouia de Tamegrout, Archéologie Marocaine*, 1918). This work, which the author completed in 1309/1881, is an excellent history of the *zāwiya* of Tāngrūt, containing a great deal of interesting information which compensates for the lengthy arguments by which the author seeks to demonstrate the authenticity of the family's genealogy.

The major work of Ahmad al-Nāsiri is the *Kutub al-Itihād al-Ikhlāq* *Dawal al-Maghrib al-Arab*. Its publication was an unprecedented event in Maghribī historiography. The author produced, not a chronicle of limited scope, but a general history of his country, printed, moreover, in the Orient. Hailed, ever since its appearance, by the orientologists of Europe, this work speedily attracted the attention of the North African historians, who frequently had recourse to it in the course of their studies—the more so when a French translation, in the *Archives Marocaines*, rendered the last part of the work, containing the history of the 'Alid dynasty, available even to non-Arabs.

It was quickly realised that this chronicle was akin to other productions of western Arab historiography; it was no more than a compilation, the main narrative the fragments of political history scattered throughout the chronicles and the biographical anthologies previously produced in the country. But it must be recognized that al-Nāsiri was the first of his countrymen to deal exhaustively with a subject which his predecessors had treated only in part. This however, was not his original aim. Elsewhere (*Chorfa*, 357-66) it has been explained that the starting-point for the compilation of the *Kutub al-Itihād* was a work of considerable length on the Marīnid dynasty of Morocco, composed mainly with the aid of the historical works of Ibn Abī Zar'ā and Ibn Khaldūn, and entitled *Kaḥl al-Asrār fī Laylāt Bānī Marīn*. His successive transfers from one capital of Morocco to another enabled him to extend his knowledge of the sources for the history of other Moroccan dynasties, and he conceived the idea of writing a full history of Morocco. He completed his work on 15 Džumādā II 1298/15 May 1881, and dedicated it to the reigning prince Sulṭān Mawlay al-Ḥasan, but received no reward for his action. On the death of this ruler, the author decided to have his history printed at Cairo, after bringing it down to the accession of Sulṭān Mawlay 'Abd al-'Azīz, and the *Itihād* duly appeared at Cairo in four volumes in 1312/1894.

For an analysis of the Arabic historical sources of al-Nāsiri, and for a list of the works from which he adapted or quoted verbatim numerous passages, the work previously cited should be consulted. It is

sufficient to say here that, apart from documenting his work from the Arabic sources, he was the first Moroccan chronicler to call on European sources which, however, only became known to him by chance. These were the history of Mazagan under Portuguese domination, entitled *Memorias para historia de praça de Mazagan*, by Luis Maria do Conto de Albuquerque de Cunha, Lisbon 1884, and *Description historique de Marrakech y de ses environs de ses dynasties*, by Manuel P. Castellanos, Santiago 1878; Orihuela 1884; Tangier 1898.

In the presentation of his history, al-Nāsiri follows the usual method of his fellow-countrymen but he does occasionally demonstrate a critical sense. On the whole, however, he gives the impression of being a historian by accident, but a man of letters by vocation. Sometimes he gives indication of considerable intellectual independence and breadth of outlook. His style is lucid and polished, and he rarely resorts to the artificial use of metaphor and rhymed prose. He gives the impression of being the modern Moroccan historian who has perhaps handled his language with the greatest ease and elegance.

Vol. IV of the Arabic edition of the *Itihād* has been translated by E. Fumey, with the title of *Chronique de la dynastie 'alawite au Maroc*, in *Archives Marocaines*, Vols. IX and X, Paris 1906-7. The remainder has been translated in the same journal, Vols. XXX ff., Paris, 1923-35, by A. Graulhe, G. S. Colin, I. Hamet and the sons of the historian himself.

**AHMAD PASHA**, Ottoman governor of Baghdad, son of Hasan Pasha (q.v.), also governor of Baghdad. In 1715 he was appointed governor of Shahrazūr and Kirkūk, and subsequently of Basra; in 1719 he was made vizier. After the death of his father (at the beginning of 1724) he was appointed governor of Baghdad and charged with the continuation of the expedition undertaken by the former against the Persians. In the spring of 1724 he took Hamadān, and although he was defeated (owing to the desertion of the Kurdish chieftains) by Ashraf, the Ghajalayi ruler of Persia, he achieved in 1727 favourable terms, acquiring for the Ottoman empire Kirmānshāh, Hamadān, Tānzil, Rawand, Nakhshewan and Tiflis. After losing these conquests to the Safawid Tahnāsh, Ahmad Pasha undertook another campaign and captured Kirmānshāh and Ardalan, and in 1732, after winning the battle of Kurdiān, reached Hamadān. By the treaty of 1732, some of the conquered territories were kept by the Ottomans, others returned to Persia. Hostilities, however, were soon resumed and Ahmad Pasha had to defend Baghdad itself from Nādir Shāh. In 1733 he was made governor of Basra in addition to Baghdad. The following year he was transferred first to the governorship of Aleppo, then to that of Rakka. After the death of Kōprülü-zāde 'Abd Allāh Pasha, he, though retaining the governorship of Rakka, was made commander-in-chief in the east and succeeded in reaching an armistice with Nādir Shāh. He was appointed governor of Baghdad for the second time, and was engaged, in addition to the Persian affairs, in subduing rebellious tribes. He died in 1747, on his return from an expedition against the Bābān ruler Salīm, and was buried at the side of his father near the tomb of Abū Hanīfa. He had governed Baghdad first for a period of eleven, and on the second occasion for twelve years.

(M. CAVID BAYSON)  
**AHMAD PASHA**, KARĀ, Ottoman grand-vizier under Sulaymān I. He was of Albanian origin, was educated in the palace and rose to the posts of *haptıgı bahşı*, *mīr-i 'alem* and (in 927/1521) *agha* of the Janissaries. He was appointed *hıyerbiy* of Rumelia and took part in the campaign in Hungary, taking (950/1543) Valpo and Siklós and being present at the capture of Esztergom (Usturgun, Gran) and Szekesfehérvár (Istánin, Belgrád, Stubi weassenburg). In 953/1548 he was appointed commander-in-chief against the Persians and raised to the rank of second vizier. He put the Persians to flight in 1549 near Kaniálh and took numerous fortresses in E. Anatolia and Georgia. After the loss of Lippa in Hungary (959/1552) and the vain siege of Temesvár (Temesghar) by Sokollu Mehmed Pasha, he was transferred to the post of commander-in-chief in Hungary and took Temesvár (defended by Stephan Loncseny) after a siege of 35 days. Subsequently he captured Szolnok, but was unsuccessful in the siege of Eger (Egri, Erlau) undertaken by him together with Sokollu. During the war against Shāh Tahnāsh (960/1553) Sulaymān deposed the grandvizier Rustem Pasha and appointed in his stead Ahmad Pasha. The latter took part in the campaigns of Nakhshewan and Karabagh. After the treaty of Amasya (1555) which ended the war, and the sultan's return to Istanbul, Ahmad was arrested during a meeting of the *divan* and decapitated (13 Dhū'l-Ka'da 962/28 Sept. 1555). Though the reason given was his intrigue against 'Alī Pasha, governor of Egypt, the sultan's main motive seems to have been his wish to reappoint Rustem Pasha, his son-in-law, to the grand-vizierate.—According to *Hadikat al-Djauzmīn*, I, 143; *Sidḡill-i 'Oghmānī*, I, 259, Ahmad Pasha married Fāṭima Sulṭān, daughter of Selīm I. He began to build a mosque near Top Kapı, which was, however, finished only after his death.

**AHMAD PASHA BONNEVAL**, Claude-Alexandre Comte de Bonneval was born in 1673 into a noble family of the Limousin. After serving with

great distinction in the French army at the beginning of the War of the Spanish Succession, in 1704, regarding himself as insulted, he changed sides and soon won a European reputation as a general in the Austrian service under Eugene of Savoy in a succession of campaigns against his own countrymen, the Pope, and finally the sultan, being wounded at Peterwarden in 1716 and participating in the siege of Belgrade in the following year. He later, however, fell out with Eugene and, after being imprisoned for a year, in 1727 fled to Venice, whence, after offering his services in vain to various powers inimical to Austria, he resolved to place them at the disposal of Ahmed III. In 1729 he accordingly travelled by way of Ragusa to Bosnia Sarajev, where, to avoid being extradited to Austria, he turned Muslim, taking the name Ahmed; and after the accession of Mahmud I was first given a daily allowance while resident at Gamuligine in Thrace, and then, in Sept. 1731, summoned by the grand vizier Topal 'Othman Pasha, who aimed at training the Ottoman army on European lines, to reform the *edjash* of the *ghumbaradji*. Although on 'Othman Pasha's fall in the following April, Bonneval was at first neglected by his successor Hekim-oghlu 'Ali Pasha, in 1733 the latter sought his advice on the course to be followed by the Porte in relation to the problem of the Polish succession, and in Jan. 1735 appointed him *ghumbaradji* *bağlı* with the rank of a *pasha* of two *feths* (*nizamnir*). After the dismissal of 'Ali Pasha in July of the same year, however, Bonneval was excluded from the councils of the Porte until 1737, when he was again called on by Muhsin-zade 'Abd Allah Pasha to advise on the conduct of the war against Austria. But although he eventually accompanied the next Grand Vizier Yeghen Mehmed Pasha to the front, a plan he had put forward for the fomentation of a revolt in Hungary was a failure, and on his return to Istanbul in 1738 he fell from favour and in the following year was deprived of his command and exiled to Kastamonu. Moreover, although he was restored in less than a year, he never regained his former influence, and up to his death in 1747, by which time he was casting about for means to return to France, he was employed only in the continued management of the *ghumbaradji* and in furnishing the Porte with comments (some of which have been preserved in Turkish translation) on European political developments. He was buried in the cemetery of the Mewlvi-ikhane in Galata, and succeeded in his command by his adoptive son, also a French convert, who went by the name of Süleyman Agha.

**AHMAD PASHA**, called **BURSALI**, Ottoman poet of the second half of the 15th century, the most important after Sheykhli and before Nedjâdî. He was the son of the *hâfi* Şakir Well al-Din b. İlyas (who claimed descent from Hunayn) and was most probably born in Adrianople (according to some authorities in Bursa). He was appointed *muderris* at the *madrasa* of Murad II in Bursa and in 855/1452 succeeded Molla Khosrev as *hâfi* of Adrianople. After the accession of Muhammad II he became *hâfi* Şakir, and tutor of the new ruler, obtaining the rank of vizier. He accompanied the sultan during the con-

quest of Constantinople. Though his wit made him a great favourite of the sultan, he fell into disgrace (allegedly because of a love affair with a favorite of the sultan, but possibly merely in consequence of the sultan's well known capriciousness) and was held in custody, but was pardoned and appointed as *muderris* at the Orhanî and Murad mosques in Bursa, afterwards even as *sandjak beyi* of Sultan Onlu, Tire and Ankara, and after the accession of Bayazid II, as *sandjak beyi* of Bursa. He took part in the suite of Sinan Pasha, *beylerbeyi* of Anatolia, in the battle of Ağhayaylı against the Mamliks (8 Ramadan 853/17 August 1488; cf. Sa'd al-Din and Hammer Purgstall). He died in 902/1496-7 in Bursa; the ruins of his *hârîrî* could be seen not long ago in that town.

Among his poems there are many composed for Muhammad II, Bayazid II and Sultan Djem; he also composed a dirge on the death of Muhammad II's son, Mustafa. He was closely connected with various scholars of his time, and while governor of Bursa, he drew into his entourage poets such as Hafiri, Resmî, Mîrî, Çelebişîhî Şeyhîzâde and Şehîdî. Ahmad Pasha was influenced by Turkish poets such as Ahmedî, Niyâzî, Molîbî and especially Şeyhîlî and 'Alâ'î (cf. *Yeni Medîna'sa*, 1918). Like the other poets of his age, he was also under the influence of Persian poetry (his models were especially Salâmân Sâvâdî, Hâfî, Kamâl Khodjandî and Kâtibî); on the other hand, the very widespread opinion (which we find for the first time in the *Ta'dîkât* of Hasan Celebi) that he began his poetical career by making *na'at* on some poems of 'Alî Shîr Nawâ'î is quite erroneous (cf. M. Fuad Köprülü, in *Türk Yurdu*, 1927, no. 27; idem, *Türk dil ve edebiyatı hakkında araştırmalar*, İstanbul 1934, 264 ff.). Ahmad Pasha was acknowledged as the greatest poet of his day and was imitated by many poets of the late 15th and early 16th century; and his influence can be felt even after his poetry lost its preponderant position owing to the new trends initiated by Nedjâdî and especially by Bâkî.

Apart from his *divân*, which was compiled by order of Bayazid II, and the numerous manuscripts of which are rather different from each other, Ahmad Pasha's poems (some of them written in Arabic and Persian) are to be found also in the great *na'at* collections of the 15th and 16th centuries.

(H. HALL, ITALIC)

**AHMAD PASHA GEDİK**, Ottoman Grand Vizier. Born in Serbia, he was taken into Murad II's palace as an *ic-oghlanî* and became for a short time *beglerbeyi* of Rûm (Tokat) under Mehmed (Muhammad) II before being appointed *beglerbeyi* of Anatolia in 1461. He kept this post until he was made a vizier in 1470. He played a decisive role in consolidating the new conquests in Anatolia against the Karamanids and Ak Koyunlu. He first distinguished

himself by capturing Koylî Hîsar (1461). In 1469-72 he subdued the mountainous part of Karaman-îl and its coastal area, taking 'Adîyya in 1471, Silîfî, Mukan, Gortos and Lalye (Lallou) in 1472. In 1472 a dangerous attack of the Ak Koyunlu forces, which, led by the Karamanid prince Pîr Ahmad, had advanced as far as Hâmîd-îl, was repelled by Gedik Ahmed, who subsequently reconquered Karaman-îl. According to Neshrî, 211, he played an important part in the victory over Utun Hasan (s.v.) in 878/1473. Later we find him in 16-17 fighting successfully against the Karamanid princes who had retaken it with the help of a Christian fleet. During this campaign Ahmed captured Minan, Silîfî, massacred or banished the local chieftains in Tash-îl (1473-4). Having been the second vizier up to this time, he became the first after the execution of the Grand Vizier Mahmud in 1474 (Kemal Pasha-zâde). He was sent by Mehmed II against the Genoese in the Crimea, where he took Kaffa (June 1475), Soldaya and Tana, and besieged Mangup (which was to be captured later by Ya'qûb Beg (December 1475)). Ahmed also signed an agreement with the new *ghazî* Mengli Girây whom he had saved from prison in Kaffa, by which Mengli Girây accepted the sultan's protection. Ahmed's self-confidence roused the sultan's displeasure and when he dared to disagree with the sultan on the subject of an expedition to Scutari in Albania, he was imprisoned in Rumelî Hîsar (1477). In 1478 he was released and made *Nâkapdan* of the fleet. In 1479 he seized Santa Maura from Leonardo Tocco (who fled to Apulia), and setting sail from Valona, he captured Otranto on 21 August 1480. When in the next spring he gathered in Valona a new army to make further conquests from Otranto, he was persuaded to uphold the new sultan, Bayazid II, against his brother Djem Sültân, and played a decisive part in securing the throne for Bayazid. But as he would not, or could not, capture Djem in his flight to Mamliks territory, the suspicious sultan put him into prison. This, however, led to a tumult among the *kâpî-bûlu*, so that he had to be rehabilitated. After the failure of Djem's second attempt to seize the throne, Bayazid felt himself strong enough to put Ahmed to death (6 Shawwâl 887/18 Nov. 1482), though this caused a new tumult among the *kâpî-bûlu*.—A district in Istanbul is called after Gedik Ahmed because of his pious foundations there and the mosque of Gedik Ahmed in Ayfyon is a fine example of old Ottoman architecture.

**AHMAD PASHA KHAYRÂN**, Ottoman Vizier. Georgian in origin, Ahmed entered Selim I's palace as *ic-oghlanî*; later, as *büyük emîr-i Akhâr* he took part in the campaign against the Mamliks in 1516-7 and became *beglerbeyi* of Rûm-îl in 1519. In the campaign of Süleyman I against Belgrade Ahmed's plan of operations was accepted. Accordingly he took Bigirîndin (Sabac) (2 Sha'ban 929/8 July 1523) and invaded Syria. At a reward for his services in the siege of Belgrade the sultan appointed him vizier of the *divân* (autumn of 1521). In the campaign against Rhodes he, as commander-in-chief, was responsible for the successful operations

during the landing and the siege. Subsequently he negotiated with the knights of St. John the terms of surrender of the castle (2 Safar 929/12 Dec. 1522). Ahmed Pasha was instrumental in causing the fall of the Grand Vizier Pîr Mehmed Pasha (s.v.) and expected to be promoted from the third viziership to the first, as the second vizier was in Egypt. But, contrary to custom, the grand vizierate was given to the *khâsî* *ada-bağlı* İbrâhîm (s.v.). Deeply disappointed Ahmed asked the sultan for the governorship of Egypt (10 August 1523). There he reconciled the discontented Mamliks as well as the bedouin chieftains who were in a state of great agitation after the death of Khayrî Beg. Süleyman, still under İbrâhîm's influence, appointed Kara Mûsâ governor of Egypt and charged him with Ahmed's execution. On discovering this, Ahmed decided to declare his independence with the title of Sultan (January 1524). He massacred and dispersed the Janissaries in the castle of Cairo and established relations with the Christian powers against the Ottomans. Süleyman sent an army to Egypt under the vizier Ayâk Pasha, while Ahmed's troops were secretly encouraged to turn against him. One of his officers, Kâdî-zâde Mehmed Beg, made an attempt on his life in a public bath. Though wounded, Ahmed succeeded in escaping to the Band Bakîr Bedouins, who, however, finally delivered him to be beheaded.

**AHMAD RAFİK** (he assumed the family name of ALRÎNAVÎ), Turkish historian. He was born in Beghiktaş, İstanbul, in 1880, and educated in the Kuleli military lycée and the military school (*Harpîyye Mektebi*), became an officer, but for most of the time was engaged in teaching geography and French. In 1909 he was appointed to the General Staff, as editor of the *'Ashîrî Medîna'sa*, in which he himself published articles on military subjects. After becoming a member of the *Tarîkîh Endüsmeni*, he retired and devoted himself entirely to his studies. From 1917 to 1933 he was professor of history in the University of İstanbul. He died on 10 Oct. 1937.

He wrote a very large number of historical books, partly of a scholarly, partly of a more popular character, and published many documents concerning Ottoman history from the archives. Among his best known books are those on life in old İstanbul (*Hîrî X uncu—or respectively XI inci, XII inci, XIII inci—Asîrât-ı İstanbul Hayatı*), and the series of monographs: *Gelmîsh 'Asîrât-ı Türk Hayatı*. Numerous articles by him were published in *TOEM*, *Yeni Medîna'sa*, *Hayât*, *Edebiyat Fakültesi*, *Türkiyat Mecmuası*.

**AHMAD PASHA**, called **BURSALI**, Ottoman poet of the second half of the 15th century, the most important after Sheykhli and before Nedjâdî. He was the son of the *hâfi* Şakir Well al-Din b. İlyas (who claimed descent from Hunayn) and was most probably born in Adrianople (according to some authorities in Bursa). He was appointed *muderris* at the *madrasa* of Murad II in Bursa and in 855/1452 succeeded Molla Khosrev as *hâfi* of Adrianople. After the accession of Muhammad II he became *hâfi* Şakir, and tutor of the new ruler, obtaining the rank of vizier. He accompanied the sultan during the con-

quest of Constantinople. Though his wit made him a great favourite of the sultan, he fell into disgrace (allegedly because of a love affair with a favorite of the sultan, but possibly merely in consequence of the sultan's well known capriciousness) and was held in custody, but was pardoned and appointed as *muderris* at the Orhânî and Murad mosques in Bursa, afterwards even as *sandjak beyi* of Sütlü Onlu, Tire and Ankara, and after the accession of Bayazîd II, as *sandjak beyi* of Bursa. He took part in the suite of Sünnâ Pasha, *beylerbeyi* of Anatolia, in the battle of Ağhaşayr against the Mamliks (8 Ramadan 853/17 August 1488; cf. Sa'd al-Din and Hammer Purgstall). He died in 902/1496-7 in Bursa; the ruins of his *hârîrî* could be seen not long ago in that town.

Among his poems there are many composed for Muhammad II, Bayazîd II and Sütlü Dîven; he also composed a dirge on the death of Muhammad II's son, Mustafa. He was closely connected with various scholars of his time, and while governor of Bursa, he drew into his entourage poets such as Hafîrî, Resmî, Mîrî, Çelebişîhî Şeyhîrî, and Şehîdî. Ahmad Pasha was influenced by Turkish poets such as Ahmedî, Niyâzî, Molîbî and especially Şeyhîrî and 'Alâ'î (cf. *Yeni Medîna'sa*, 1918). Like the other poets of his age, he was also under the influence of Persian poetry (his models were especially Salâmân Sâvâdî, Hâfîe, Kamâl Khodjandî and Kâtibî); on the other hand, the very widespread opinion (which we find for the first time in the *Ta'dîkât* of Hasan Celebi) that he began his poetical career by making *na'at* on some poems of 'Alî Shîr Nawâ'î is quite erroneous (cf. M. Fuad Köprülü, in *Türk Yurdu*, 1927, no. 27; idem, *Türk dil ve edebiyatı hakkında araştırmalar*, İstanbul 1934, 264 ff.). Ahmad Pasha was acknowledged as the greatest poet of his day and was imitated by many poets of the late 15th and early 16th century; and his influence can be felt even after his poetry lost its preponderant position owing to the new trends initiated by Nedjâdî and especially by Bâkî.

Apart from his *divân*, which was compiled by order of Bayazîd II, and the numerous manuscripts of which are rather different from each other, Ahmad Pasha's poems (some of them written in Arabic and Persian) are to be found also in the great *na'at* collections of the 15th and 16th centuries.

**AHMAD PASHA GEDİK**, Ottoman Grand Vizier. Born in Serbia, he was taken into Murad II's palace as an *ic-oghlanî* and became for a short time *beglerbeyi* of Rûm (Tokat) under Mehmed (Muhammad) II before being appointed *beglerbeyi* of Anatolia in 1461. He kept this post until he was made a vizier in 1470. He played a decisive role in consolidating the new conquests in Anatolia against the Karamanids and Ak Koyunlu. He first distinguished

himself by capturing Koylî Hîsar (1461). In 1469-72 he subdued the mountainous part of Karaman-îl and its coastal area, taking 'Adîyya in 1471, Silifke, Mukan, Gortos and Lailûn (Lailon) in 1472. In 1472 a dangerous attack of the Ak Koyunlu forces, which, led by the Karamanid prince Pîr Ahmad, had advanced as far as Hâmîd-îl, was repelled by Gedik Ahmed, who subsequently reconquered Karaman-îl. According to Neshrî, 211, he played an important part in the victory over Utun Hasan (s.v.) in 878/1473. Later we find him in 16-18 fighting successfully against the Karamanid princes who had retaken it with the help of a Christian fleet. During this campaign Ahmed captured Minan, Silifke, massacred or banished the local chieftains in Tash-îl (1473-4). Having been the second vizier up to this time, he became the first after the execution of the Grand Vizier Mahmud in 1474 (Kemal Pasha-zâde). He was sent by Mehmed II against the Genoese in the Crimea, where he took Kaffa (June 1475), Soldaya and Tana, and besieged Mangup (which was to be captured later by Ya'qub Beg (December 1475)). Ahmed also signed an agreement with the new *ghazî* Mengli Girây whom he had saved from prison in Kaffa, by which Mengli Girây accepted the sultan's protection. Ahmed's self-confidence roused the sultan's displeasure and when he dared to disagree with the sultan on the subject of an expedition to Scutari in Albania, he was imprisoned in Rumeli Hîsar (1477). In 1478 he was released and made *Nâkapdan* of the fleet. In 1479 he seized Santa Maura from Leonardo Tocco (who fled to Apulia), and setting sail from Valona, he captured Otranto on 21 August 1480. When in the next spring he gathered in Valona a new army to make further conquests from Otranto, he was persuaded to uphold the new sultan, Bayazîd II, against his brother Dîven Sütlân, and played a decisive part in securing the throne for Bayazîd. But as he would not, or could not, capture Dîven in his flight to Mamliks territory, the suspicious sultan put him into prison. This, however, led to a tumult among the *kâpî-bûlu*, so that he had to be rehabilitated. After the failure of Dîven's second attempt to seize the throne, Bayazîd felt himself strong enough to put Ahmed to death (6 Shawwâl 887/18 Nov. 1482), though this caused a new tumult among the *kâpî-bûlu*.—A district in Istanbul is called after Gedik Ahmed because of his pious foundations there and the mosque of Gedik Ahmed in Afyon is a fine example of old Ottoman architecture.

**AHMAD PASHA KHAYRÂN**, Ottoman Vizier. Georgian in origin, Ahmed entered Selim I's palace as *ic-oghlanî*; later, as *büyük emir-i âkkâr* he took part in the campaign against the Mamliks in 1516-7 and became *beglerbeyi* of Rûm-îl in 1519. In the campaign of Süleyman I against Belgrade Ahmed's plan of operations was accepted. Accordingly he took Bigirîndin (Sabac) (2 Sha'ban 929/8 July 1523) and invaded Syria. At a reward for his services in the siege of Belgrade the sultan appointed him vizier of the *divân* (autumn of 1521). In the campaign against Rhodes he, as commander-in-chief, was responsible for the successful operations

during the landing and the siege. Subsequently he negotiated with the knights of St. John the terms of surrender of the castle (2 Safar 929/12 Dec. 1522). Ahmed Pasha was instrumental in causing the fall of the Grand Vizier Pîr Mehmed Pasha (s.v.) and expected to be promoted from the third viziership to the first, as the second vizier was in Egypt. But, contrary to custom, the grand vizierate was given to the *khâsî* *ada-bağlı* İbrâhîm (s.v.). Deeply disappointed Ahmed asked the sultan for the governorship of Egypt (10 August 1523). There he reconciled the discontented Mamliks as well as the bedouin chieftains who were in a state of great agitation after the death of Khayrî Beg. Süleyman, still under İbrâhîm's influence, appointed Kara Mûsâ governor of Egypt and charged him with Ahmed's execution. On discovering this, Ahmed decided to declare his independence with the title of Sultan (January 1524). He massacred and dispersed the Janissaries in the castle of Cairo and established relations with the Christian powers against the Ottomans. Süleyman sent an army to Egypt under the vizier Ayâk Pasha, while Ahmed's troops were secretly encouraged to turn against him. One of his officers, Kâdî-zâde Mehmed Beg, made an attempt on his life in a public bath. Though wounded, Ahmed succeeded in escaping to the Band Bakîr bedouins, who, however, finally delivered him to be beheaded.

**AHMAD RAFİK** (he assumed the family name of ALRÎNAVÎ), Turkish historian. He was born in Beghiktaş, İstanbul, in 1880, and educated in the Kuleli military lycée and the military school (*Harp-hıyye Mektebi*), became an officer, but for most of the time was engaged in teaching geography and French. In 1909 he was appointed to the General Staff, as editor of the *'Ashkî Medîna'sa*, in which he himself published articles on military subjects. After becoming a member of the *Ta'rikh-i Endüsmîcî*, he retired and devoted himself entirely to his studies. From 1917 to 1933 he was professor of history in the University of İstanbul. He died on 10 Oct. 1937.

He wrote a very large number of historical books, partly of a scholarly, partly of a more popular character, and published many documents concerning Ottoman history from the archives. Among his best known books are those on life in old İstanbul (*Hîrî X uncu—or* respectively *X inci*, *XII inci*, *XIII üncü—Asîrda İstanbul Hayatı*), and the series of monographs: *Gelmîsh 'Asîrîârda Türk Hayatı*. Numerous articles by him were published in *TOEM*, *Yeni Medîna'sa*, *Hayât*, *Edebiyat Fakültesi*, *Türkiyat Mecmuası*.

**Bibliography:** Resad Ekrem Koç, *Ahmed Refik*, İstanbul 1938; İsmail Hakkî, *Edebiyat Türkî*, İstanbul 1942, 384; O. Spies, *Die türkische Prosaliteratur des Gegenwart*, Berlin 1943, 83-7 (with full list of his works). (A. TATREZ)

**AHMAD RÂSİM**, Turkish writer, b. 1864 in Sarğulcu or Sarğulca, a quarter of Fâtih, İstanbul, d. 21 Sept. 1932 in the island of Heybeliada and buried there. In early life he lost his father Bahâ al-Din, who belonged to the family of Mentesh-oghlu from Cyprus, and was brought up by his mother.

From 1292/1875 to 1306/1883 he attended the school Dâr ül-Shafaka in Istanbul, where he was attracted to art and literature and decided to become a writer; and to this profession (or, as he himself calls it, "the Sublime Porte Road", *Bâb-ı 'Alî (Çaddesi)*) he remained faithful throughout all later political changes. Like many other writers he began as a journalist, and almost all the more important Turkish papers received contributions from his pen. He afterwards collected his numerous articles and sketches, for example in the two volumes of *Mahabbât ve Muhabbât* (1323) and the four volumes entitled *'Ömr-ü Edebî* (1315-19). The latter is not an account of his life but reflects his spiritual development and the feelings and emotions reflected in his publications of different years.

Ahmad Râsım's output became in time very extensive; in all, he is said to have produced about 140 works of larger or smaller size. Nevertheless he was not a polygraph in the depreciatory sense of the word; before dealing with a subject he always studied it thoroughly and then wrote on it seriously, or sometimes in the lightly humorous fashion of which he was a master, or again in a pleasing conversational way, but always with artistic feeling and in his particular style, which was new and independent of existing schools and coteries. He had a great success with his public; he himself created a school of writers, and his influence has been strongly felt in Turkish literature.

His literary work in the fields of the novel, short story and tale, includes his early novels *Hayat-ı Dil* (1890) and *Tedricir-i Hayat* (1891) (short analysis of both in P. Horn, *Gesch. der Türkischen Moderne*, 46 f.), the patriotic novel *Maşâhîr-i Hayat* (1308), the stories *Tedricir-i Ağâ* (1311) and *Mektûb Arkadaşım* (1311), a little later *Nâhâm* (1315) and another patriotic novel *Aşker-oglu* (1315) and the more lyrical *Kübbe-yi Şamm* (1315) and *'Andalib* (in verse).

At the same time he had from the first a preference for history and sought to arouse an interest in it among his fellow-countrymen by presenting his carefully prepared compilations in popular form. After earlier works on the history of Rome, of civilization, etc., he devoted himself to the history of Turkey, and produced a work on Turkish history from Selim II to Murad V, entitled *Tarih-i Osmaniye* (*Hâkimiyet-i Mülkiye-yi* (1341-2), and a general survey, *'Öğmenli Tarîhi* (1328-30). A valuable supplement to these is formed by his "City Letters", *Şehir Mektûbları* (1328-29), which contain an unsurpassed description of old Istanbul life in all its variety, written in a vivid and stimulating manner. In *Menâhîr-i İslâm* (1323) the Muslim festivals, mosques, and other religious matters are dealt with. To the history of literature belongs his book on *Şiir* (1323), which was intended as an introduction to the history of the Turkish Moderns (*Matbu'at Tarîhine Medhâl. İki büyük Muharirlerden Şinâsî, 1927*). *Matbu'at Kâğıtlarından* (1342) contains his personal recollections of Turkish writers, and *Falaka* (1927) of his own school days and the old system of education in general.

Ahmad Râsım was also a prolific writer of school books on grammar, rhetoric, history, etc., and composed also a work on model letters (*'İlâvî Khasine-yi Mehlûl yahud mukemmel Münâhîl*, 5th ed. 1318). In addition he translated many western works, and a large collection from his early period is called "Selections from Western Literature" (*Edebiyyât-ı Gharibiyeden his Nâhîye*, 1887). He was

a talented composer as well, and left 65 songs now preserved in the Dâr ül-Shafaka library.

For this great literary activity Ahmad Râsım required a measure of freedom which did not exist under 'Abd al-Hamid II, and such as he could hardly have enjoyed at all as a state official. He was, however, twice a member of a commission of the Council of Instruction Publique (*Enfâz-ı Tefhîh ve Me'sû'iyet*), but only for a short time. He showed his interest in religious matters in 1904, when after the abolition of the caliphate he wrote an article in *Wahit* on 4 March 1904 on the relics (*amâlid, muhalla'ât*) of the Prophet, cloak (*kâbîrâb*), banner (*isvâb*), praying-carpet (*sâdjâda*) etc., which also appeared in Cairo and Damascus in Arabic. He proposed to make these relics accessible to the public in a museum (cf. C. A. Nallino, in *OM*, 1904, 220 f.). From 1927 he was a deputy for Istanbul along with men like 'Abd al-Hakk Hâmid and Khâlid Eddem (cf. *OM*, 1927, 416; 1931, 227 and Mehmed Zekî, *Encyclopédie biographique de Turquie*, i, 1928, 23, and ii, 1929, 88), but suffered from ill-health in his last years.

**Bibliography:** Newâlî Mülli, i, 1330, 265-7; İsmâ'îl Halîb, *Türk Tefahhûs Edebiyyâtı Tarîhi*, Istanbul 1925, 567-9; *Taninmatları*, 1940, 358-64; Ali Canîp, *Edebiyat*, 1929, 171-4; İdem, *Türk Edebiyatı Antolojisi*, 1934, 98-100; Bulkur-luzade Rîdâ, *Muntahabât-ı Bedâyî-i Edebiyye*, 1326, 347-50; Nasreddin, *Essai sur l'histoire de la littérature ottomane*, 1910, 217; Hüseyin Kâhîd, *Kavâir*, 1326, 259-90; Ahmet İlyas, *Medhat hafızlarım*, 1930, 76; Wl. (by S. E. Siyavuşgil); Suat Hızal, *Ahmad Râsım* (Türk Klasikleri, 30), 1953. (W. BJÖRKMAN)

**AHMAD RASİM**, Ottoman statesman and historian. Ahmad b. İbrâhîm, known as Resmî came from Rethymno (Turk. *Resim*; hence his epithet ?) in Crete and was of Greek descent (cf. Hammer-Purgstall, viii, 202). He was born in 1172/1700 and came in 1146/1733 to Istanbul, where he was educated, married a daughter of the Re'îs Efendi Ta'ûkijî Muştâfâ and entered the service of the Porte. He held a number of offices in various towns (cf. *Sigill-i 'Öğmenli*, ii, 380 f.). In Safar 1271/Oct. 1757 he went as Ottoman envoy to Vienna and on his return made a written report of his impressions and experiences. In *İçli'ül-Ka'da 1176/ May 1763* he was again sent to Europe, this time as ambassador to the Prussian court in Berlin. He also wrote a very full account of this mission, which excited great attention; in the West also, for its views on Prussian policy, its description of Berlin and its inhabitants and all sort of observations on related topics. After filling a number of important offices he died on the 2 Shawwâl 1197 (31 August 1783); on this date cf. Babinger, 309, note 2 in Istanbul. His tomb is in the Selimiyye quarter of Scutari.

In addition to the descriptions already mentioned of his embassies (*seferât-nâmâ's*) to Vienna and Berlin, Ahmed Resmî wrote in connection with the Russo-Turkish war and the peace of Küçük

Kaynarç (1769-74) a treatise entitled *Khulâsât ul-Fikâr*, in which he took a part in the campaign and eye-witness, he gave his impressions of this important period in the history of Turkey. Of especial value are his biographical collections, particularly his *Khulâsât ul-Rû'ûsâ* (composed in 1157/1744) with the biographies of 64 *re'îs ul-kuttâb* (*re'îs efendi*) and his *Hamîl ul-Kubera'*, in which he gives the lives of the chief eunuchs of the imperial harem (*hâim ul-ahâler*). Of a similar nature is his continuation (written in 1177/1766) of the *Wefâyât* of Mehmed Emîn b. Hâdijî Mehmed called *Abd-berî-âzad*, in which he gives in twelve lists the deaths of famous men and women (cf. the accurate list of contents in Hammer-Purgstall, ix, 187 f.). He also wrote several other works on geology and provinces.

**Philography:** *Sigill-i 'Öğmenli*, ii, 380 f.; Brusaîl Mehmed Tâhir, *'Öğmenli mu'âfifleri*, iii, 38 f. (with list of works); Babinger, 309-12 (add to the list of the MSS of his *sefer-nâmâ's*: Berlin, Or. 4° 1502, fol. 27v-46v (incomplete), Paris, Suppl. Turc 510 (7); Paris, collection of Cl. Huart and the MSS described in *Istanbul Kütüphaneleri Türk-Coğrafya Yasmaları Kataloğu*, i, no. 483; 1925, also the Polish translation, *Podręcznik Ahmed-Elwazaga de Paski i powstanie jego de Pras 1727* (according to Wâsîf, *Tarîh*, i, 239 ff.) in J. J. S. Sekowski, *Collectanea z dziejopisów Turczickich*, ii, Warsaw 1825, 222-80; for MSS of the *Khulâsât ul-Rû'ûsâ* and the *Hamîl ul-Kubera'*, see also *Istanbul Kütüphaneleri* etc., nos. 412 and 413. (F. BABINGER)

**AHMAD AL-RÂZÎ.** (See AL-RÂZÎ).

**AHMAD SHAH** is the name of various Muslim monarchs in India. The most notable are: 1. AHMAD SHAH BAHADUR MU'JIB-UD-DIN AR-RU'ÂS, son and successor of Muhammad Shâh, Grand Mughal of Delhi. He was born in 1158/1725 and came to the throne in 1161/1748. The actual ruler during his reign was Saifdar Dîang, Nawâb of Oudh, who was also appointed vizier of the new emperor. In order to check the Rohélas he called upon the Marâthas for help, which resulted in their plundering the provinces of his realm, while the Afghans devastated the Panjâb. Ahmad Shâh himself was an incapable ruler and lived for pleasure. After the dismissal of the vizier Saifdar Dîang his reign soon came to an end; another vizier, 'Imâd al-Mulk Ghâzi 'l-Dîn Khân caused him to be declared unworthy to govern, had him put into prison and had his eyes put out 1167/1754. Ahmad Shâh died in 1169/1775.

2. AHMAD SHAH I, II and III, Bahmanid rulers; see BAHMANIDS.

3. AHMAD SHAH b. MUHAMMAD SHAH SHAMS AL-DIN, prince of Bengal (835-46/1431-42); see RÂZÎA GANESH.

4. AHMAD SHAH I and II, rulers of Gudsjarât; see GUDJARÂT.

5. AHMAD SHAH, founder of the dynasty of the Nizâm Shâhs; see NIZÂM SHÂHS.

**AHMAD SHAH DURRÂNÎ**, the first of the Sadozay rulers of Afghanistan and founder of the Durrânî empire, belonged to the Sadozay section of the Popalzay clan of the Abdâllî [s.v.] tribe of Afghans. In the early 18th century the Abdâllîs were to be found chiefly around Harât. Under their leader Zamân Khân, the father of Ahmad Khân, they resisted Persian attempts to take Harât until, in 1748, they were forced to submit to Nadir Shâh.

Some time later they rebelled under Khân-Fikâr Khân, the brother of Ahmad Khân, but were once more defeated by the Persian ruler who, in 1751, captured Harât. Recognizing the fighting qualities of the Abdâllîs he enlisted them in his army, and, in 1757, after the expulsion of the Ghilzays, he allowed the Abdâllîs to settle in Kandahâr. Ahmad Khân Abdâllî distinguished himself in Nadir's service and quickly rose from the position of personal attendant (*wasid*) to the command of Nadir's Abdâllî contingent, in which capacity he accompanied the Persian conqueror on his Indian expedition. In Dîumâdî II 1160/June 1747, Nadir Shâh was assassinated by Kizilbâshî conspirators at Kûcân in Khûrâsân. This prompted Ahmad Khân and the Afghân soldiery to set out for Kandahâr. On the way they elected Ahmad Khân as their leader, hailing him as Ahmad Shâh. This election was facilitated by the withdrawal in his favour of Hâdijî Dîamâl Khân, the chief of the Muhammadzays or Bârakzays, the great rivals of the Sadozays. Ahmad Shâh assumed the title of *Durr-â Durrân* (Pearl of Pearls), after which the Abdâllî tribe were known as Durrânîs. He was crowned at Kandahâr where coins were struck in his name. Like the Persian conqueror who served as his model, he organized a special force dependent on himself, known as the Ghulâm Shâhîs, a heterogeneous body recruited from Tâdjiks, Kizilbâshes, and Yûsufzays; but he naturally relied chiefly on his immediate followers the Durrânîs. With Kandahâr as his base he easily extended his control over Ghazni, Kâbul, and Peshâwar. His aims were to consolidate his power in Afghanistan and to increase his prestige and provide employment for his turbulent followers by means of foreign war in which course he was favoured by the anarchical conditions prevailing in India. Regarding himself as heir to Nadir Shâh's eastern dominions, he laid claim to the provinces which Nadir had wrested from the Mughal emperor. In accordance with this policy, but with no intention of founding an empire in India, he invaded India nine times between 1747 and 1769. He set out from Peshâwar on his first Indian expedition in December 1747. By January 1748 Lahore and Sarhind had been captured. Eventually Mughal forces were sent from Delhi to resist his advance. Lacking artillery and greatly outnumbered he was defeated at Manupur, in March 1748, by Mu'în al-Mulk, the son of the warlike Kâmar al-Dîn, who had been killed in a preliminary skirmish. Ahmad Shâh retreated to Afghanistan and Mu'în al-Mulk was appointed governor of the Panjâb. Before Mu'în al-Mulk could consolidate his position, Ahmad Shâh, in December 1749, again crossed the Indus. Receiving no reinforcements from Delhi Mu'în al-Mulk was forced to come to terms. In accordance with instructions from Delhi, Ahmad Shâh was promised the revenues of the *Châhr Mahallî* (Gudsjarât, Awrangâbâd, Sîlîkôt, and Pasrûr) which had been granted by the Mughal emperor Muhammad Shâh to Nadir Shâh in 1739. While he had been absent in the Panjâb, Nûr Muhammad Allây, a former Afghân general of Nadir Shâh, had conspired to dethrone him. On his return to Kandahâr the conspiracy was suppressed and Nûr Muhammad executed. He next turned his attention to his western frontier. By 1163/1751 Harât, Mâghhad, and Nîshâpûr had been captured. Mirzâ Shâhruhîl, the grandson of Nadir Shâh, was forced to surrender several districts bordering on Harât and to acknowledge Afghân suzerainty on his coins. In the same year Ahmad

Shah came into conflict with the rising Kādirī power but was repelled at Astarābād beyond which he was unable to advance. He was more successful across the Hindu Kush where he annexed Balūkh and Badakhshān after which the Oxus roughly formed his northern frontier.

The non-payment of the revenues of the *Chakar Mahāl* was the reason for his third Indian expedition of 1752-2. Lahore was besieged for four months and the surrounding country devastated. Mu'n al-Mulk, without reinforcements, was defeated in March 1752, but was reinstated by Ahmad Shah to whom the emperor formally ceded the two *shahs* of Lahore and Multān. During this expedition Kāshmir was annexed to the Durrāni empire. By April 1752 Ahmad Shah was once more back in Afghanistan. Mu'n al-Mulk found the Panjāb a troublesome charge and his death in November 1753 only served to intensify the anarchy. All power was for a time in the hands of his widow Mughalāt Bēgam whose profligacy led to constant rebellions. The Mughal *saqir* Tīmāl al-Mulk took advantage of this anarchy to recover the Panjāb for the empire and entrusted its administration to Adina Beg. Ahmad Shah immediately set out to recover his lost provinces. Lahore was reached towards the end of December 1756, and, after an unopposed march, Delhi was entered on 28 January 1757. The city was plundered and the defenceless inhabitants massacred. A similar fate befell the inhabitants of Mathurā, Brindābān, and Agra. Towards the end of March 1757, an outbreak of cholera amongst his troops forced Ahmad Shah to leave India. Before leaving he married Hadrat Bēgam, daughter of the late emperor Muhammad Shah, while his son Tīmūr was married to Zuhra Bēgam, daughter of the puppet emperor 'Alamgir II. The territory of Sarhind was annexed to his empire. Najīb al-Dawla, the Rohilla leader who had supported him, was left in charge of Delhi and Tīmūr remained as viceroy of the Panjāb. He had no sooner left India than the Sikhs, together with Adina Beg, rose in revolt against Tīmūr. Early in 1758 Adina Beg invited the Marāṭhās to expel the Afghāns from the Panjāb. This was accomplished by the Marāṭhās who actually crossed the Indus and held Peshawar for a few months. (The evidence which corroborates Grant Duff's *History of the Marāṭhās*, 1917, 207, is to be found in the Persian manuscript *al-Bihar* (news-letters) in the archives of the Bharat Itihas Samādhān Mandal and in the *Chandachuda Daftar*, I, 1920, II, 1934. See also H. R. Gupta's *Studies in Later Mughal History of the Panjab, 1644-1756*.) These events brought Ahmad Shah to India a fourth time (1755-6). Before setting out he marched against Naṣir Khān, the Beṣābūt chief of Kalāt in Balūchistān who had declared his independence. Despite Ahmad Shah's failure to capture Kalāt, Naṣir Khān agreed to acknowledge his suzerainty and to furnish contingents for his army. The Marāṭhās rapidly evacuated the Panjāb before the Afghān advance and fell back on Delhi. Sādehīz Bihān, the brother of the Marāṭhā *pedhwa*, was entrusted with the formidable task of ousting the Afghāns from northern India. The Marāṭhās had not only to face a coalition of the northern Muslim chiefs who had joined forces with Ahmad Shah but they had to fight without the assistance of the Rājāpūts and other Hindu powers whom their extortionate demands for *chauth* and *sardeshmukhi* had estranged. The Marāṭhās occupied Delhi (22 July 1760) but it was of little use as a base since food,

fodder, and money were unprocureable. The situation, so far as supplies were concerned, was temporarily relieved by the capture of Kundiya (17 October 1760). But this advance proved disastrous as the Afghān army crossed the Jūmma cutting off Marāṭhā communications with Delhi. The Bihān now decided to entrench his forces at Pānīpat. Deprived of all aid by his more mobile forces he was compelled to leave his entrenchments and attack the Afghāns. Although the Marāṭhās fought desperately they failed to withstand the fierce Afghān onslaught under Ahmad Shah's expert generalship and were routed with enormous losses at Pānīpat on 14 January 1761. Ahmad Shah made no attempt to consolidate his position and in March of the same year was once more on his way back to Afghanistan. The Afghān victory at Pānīpat had far-reaching consequences. It enabled the Nijām to recover from his defeat at Udgir (1760), and probably saved the state of Hyderabad from extinction. It also contributed to the rise of an independent Muslim power in Mysore under Haydar 'Alī. It is usual to regard Pānīpat as a temporary setback from which the Marāṭhās rapidly recovered. This view ignores the real importance of the victory which granted the English the respite needed for the consolidation of their power in Bengal.

After Pānīpat the main factor in the history of northern India was the growing strength of the Sikhs whose attacks on Ahmad Shah's lines of communication gradually led to a cessation of the Afghān menace. It was against the Panjāb Sikhs that his sixth expedition (1762) was directed. They were defeated with enormous slaughter near Gūdgūarwal in a battle known to Sikhs as the Ghalighārah. Ahmad Shah remained in the Panjāb for nine months during which Kāshmir whose Afghān governor had revolted was re-annexed to his empire. But the Sikhs were by no means crushed. Their attacks on Afghān garrisons necessitated three more expeditions between 1764 and 1769. Ahmad Shah had also to contend with serious revolts nearer home. The Aymāk near Harāt rebelled in 1763, and, in 1767, serious disturbances broke out in Khurāsān. At Ahmad Shah's death, in 1784/1773, his empire roughly extended from the Oxus to the Indus and from Tibet to Khurāsān. It embraced Kabul, Peshawar, Multān, Sind, Balūchistān, Persian Khurāsān, Harāt, Kandahār, Kābul, and Balūkh. Even in his lifetime it was apparent that he would be unable to maintain distant conquests like the Panjāb. Balūchistān was practically independent, and Khurāsān was obviously destined to become a Kādirī possession. Under his successors the Durrāni empire rapidly disintegrated.

**AHMAD AL-SHAHYKH** (known locally as *AMARU SĀQU*) Tokolor (TAKRIRI) ruler, son of al-Balḥī 'Umar Tal [q.v.] Tokolor conquests of Western Sudan. Before he proceeded to the conquest of Masina which cost him his life, 'Umar left Ahmad in charge of the Bambara kingdom of Segu, and appointed him *khālifa* of the Tijāniyya *jariba* for the Sudan. 'Umar died (1864) before he was able to consolidate his conquests and left Ahmad to face, not only a heritage of dynastic troubles and revolts of subjected peoples, but also the steady advance of the French. His titular inheritance to the paternal power was not seriously contested, but the unity of the military empire was weakened because the various governors ruled their regions in practical independence. These were his brothers Ḥabīb (ruling Dingiray) and Muḥṭār (at Konakari), his cousin al-Tijānī (who ruled Masina independently from 1864 to 1889), and his father Mustafā al-Nyoro. Ahmad's vain attempt to avert the break up involved him in continual warfare. His early years were occupied in dealing with the Bambara of his own kingdom, who were never crushed. His Tokolor chiefs intrigued with his relatives, the revolt of Ḥabīb in 1868 being only one of many. In 1874 he assumed the title of *amir al-mu'minin*. The period from 1876-84 witnessed the steady penetration of the French into the Sudan. The anarchy into which the country had fallen gave Ahmad no chance of offering effective opposition, whilst hostility between him and Sanori [q.v.] enabled the French to attack and defeat them separately. Ahmad's brother, 'Adilbu, ruler of Dingiray, allied himself with the French. In 1884, feeling his life in danger at Segu from discontented Bambara and Tokolor, he moved to Nyoro, dispossessing his brother Muntaka whom he had installed there in 1873. On 6 April 1890 Segu was occupied by the French Colonel Archinard, and the following year he fled from Nyoro (occupied by Archinard on 1 Jan 1891) to Bangadigara where his defeat on 26 April 1893 brought an end to Tokolor dominion over the Sudan. He fled to the Sokoto region in Hausaland where he died in 1901.

**SHAYKH AHMAD SIRHINDI**, generally known as *MUHAMMAD AL-ʿAṢI* Thiri, an eminent divine and mystic of Muslim India, who contributed in a considerable measure towards the rehabilitation of orthodox Islam, after the heterodoxies of the Emperor Akbar (1556-1605) had had their day. He was born at Sirhind (Patāli State, East Panjāb) in 971/1564, being the son of Shaykh 'Abd al-Ahād, who traced his descent from the Caliph 'Umar al-Bakrī. He received his early education from his father and later pursued a course of higher studies at Siyālкот. He later went to the capital, Agra, where he frequented the society of the chief minister Abu 'l-Faḍl [q.v.] and his brother Fayḍ [q.v.]. It was probably during these days that he wrote among other things a tract, entitled *Takhlīḥ*

in refutation of Shī'ite views. (This tract was, subsequently, translated into Arabic by Shāh Wālī Allāh al-Dihlawī, with a prologue on the religious trends of the court of Akbar and the activities of Shaykh Ahmad.) After some years, he returned to his native town. In 1008 he was initiated into the Naqshbandī order of Sūfis by Khwāja Bāḥ b'illah (d. 1012), who was then living in Delhi. The enmity with which he controverted the doctrines of the Shī'a, who were at that time in favour at the court of the emperor Dīshangir, rendered him particularly odious to them and they represented his activities as dangerous to the state. An ecstatic utterance of his caused him to be summoned in 1028/1619 to the court at Agra, where his unbending attitude incurred the displeasure of the emperor, who ordered him to be confined in the fort of Gwalior. The emperor was, however, soon reconciled to him, for he not only released him after a year but bestowed upon him a *khṭa'a* and a gift of money. Thereafter, the Shaykh kept in close touch with the Imperial camp, till he died in 1034/1624 and was buried at Sirhind, where his tomb is an object of veneration to this day.

Shaykh Ahmad wrote a number of tracts on religious topics, viz., *al-Mahād' wa'l-Ma'ad* (Delhi 1211); *Risāla Takhlīḥiyya*, published as an appendix to the Lucknow edition of his *Mahādāt*; *Ma'arif Laduniyya*; *Mahādāt al-Shaykh*; *Risāla fi ḥikmat al-Nubuwa*; *Adāb al-Murīdīn*; *Sharḥ Ruḥā'iyāt Khwāja Bāḥ b'illah*, etc. But he is chiefly remembered for Letters (*Makhlūṭāt*), which he wrote (in Persian) to his disciples and other persons and in which he explained a large number of points, ranging over a wide area of Islamic faith and practice. These letters have exercised a great influence in favour of orthodoxy and, in their collected form, constitute one of the most important classics of religious literature produced in Muslim India. It was in recognition of his services to the cause of orthodox Islam that Muḥammad 'Abd al-Hakīm al-Siyālкотī [q.v.] gave him the title (*shah*) of *Muḥaddid al-'Alī* Thānī, i.e., the Renovator of Islam who appeared at the beginning of the second millennium of the Islamic era. Even in his life time, his influence spread as far as Afghanistan and Central Asia. After his death, it deepened still further, when his descendants and disciples, now called *Muḥaddidīn*, were dispersed, as a result of the unfavourable conditions produced by the rule of the Sikhs in the Panjāb.

Although Shaykh Ahmad was connected with several Sūfi orders, he avoided their extravagances, especially their pantheistic tendencies; and in fact he tried to bridge the gulf between the monotheistic and pantheistic groups of Sūfis by putting forth the theory of *wahd al-shahād* (g.s.) in place of *wahd al-wajūd* (pantheism). This theory is regarded as his special contribution in the field of religious thought.

**Bibliography:** The *Mahādāt*, about 530 in number, have been repeatedly lithographed in India (Lucknow 1913; Delhi 1288, 1290; Amritsar 1335-41); Urdu translation by Kōḷī 'Aim al-Dīn, Lahore 1913; *Ḥikmah-i Dīshangirī*, Aligarh 1864, 272-3, 308; 'Abd al-Kādir Badāyūnī, *Musādāt al-Tawarīkh*, Calcutta 1868; Muhammad Ḥashim Kāshmirī, *Zuhd al-Mahādī*, composed in 1037, lithographed at Cawnpore, 126-282; Badr al-Dīn Sirhindī, *Hadrat al-Kuds* composed in 1037, still in MS. **AHMAD TÂ'IB** (see 'UZHMAW-ZÂR).

**AHMAD TAKDÂR** (see ILKHAÑIS).

**AHMAD WAFIK PASHA**, (AHMED WAFIK PASHA), Ottoman statesman and leading Turkish Turcologist, born 23 Shawwâl 1238/6 July 1823, died at Istanbul 22 Sha'bân 1308/2 April 1891. He came of a family of interpreters, grandson of Bulgaç-zâde Vâliyî Nâjî, a dragoman of the Porte converted to Islam, of rank according to the historian Şihîn-zâde 'Alî Allâh Efendi, of Jewish origin according to A. D. Mordtmann. Ahmed Wafîk accompanied his father Rûh al-Dîn Mehmed Efendi, the Turkish chargé d'affaires in Paris, studied for three years at the Lycée Saint-Louis, and returned at the age of 14 to Turkey where a full and varied career lay before him (for details see Şihîn-zâde 'Oğlânî, i, 308). After initial employment on the interpreting staff, his most important posts were as follows:—ambassador in Paris (1860); inspector of the Western Anatolian provinces; legendary president of the first and ephemeral Ottoman Parliament of 1876, with the rank of *wazir* and title of *paşa*; twice Grand Vizier (for periods of 23 days and one day respectively); governor-general of Brusa. As a diplomat, he successfully defended Turkish interests at the time of the Russian occupation of the Danubian principalities and the French occupation of the Lebanon. He edited the first Imperial Year Book (1893/1896), and the newspaper *Taushîr-i Efkâr* (in collaboration with Şinâsî). He was responsible for the restoration of the Yehûdî Dîmî mosque at Brusa (by the French orientalist Pavellô), and for effecting the transfer of the Burgaz Ova estates in the Izmir region, which were granted to Lamartine by 'Abd al-Majîd (1849). It was he who was responsible for the celebrated incident in the Paris theatre concerning the production of Voltaire's *Makomet*.

A strong personality, he was an energetic, honest and conscientious man, frank to the point of rudeness; at the same time he was whimsical and an ascetic, and possessed a dry wit. Extremely

studious, and with long periods of leisure at his disposal as a result of being debarred from office by the enmity of 'Alî Pasha, he immersed himself in the library of his famous villa in Rumeli Hîsar, and there produced works to which, however, he seemed to subscribe his name. Turkish studies were his special province. He was self-taught, but acquainted with western studies which, paradoxically, he underestimated; as one of the first "Turkicists", he made an impressive contribution to the Turkish purist movement. His *Lehçe-yi 'Oğlânî* (1st edition 1293/1876; 2nd edition 1306/1890), the first Turkish dictionary in Turkish words of the name, a concise work of which the fullest use has not yet been made, formed a basis for the work of Şihîn-zâde Dîn Sâml Bey Frashîrî and many others (see the preface to the *Supplément* of Barbier de Meynard, i, p. v). His translation, or rather adaptation, of sixteen comedies of Molière (2nd edition in Latin script, 1933) is a masterpiece. (He produced them on the stage at Brusa.) He also translated *Tefâşûr*, *Gülîlâs de Sessilân* and the *Microcosm* of Voltaire. In eastern Turkish, he published Abu 'l-Fîkâhî and, in collaboration with Belin, the *Makbûl al-Kulûb* of Mir 'Alî Shîr Nawâ'î (1289/1872). A collection of proverbs (*Atalar Sözi*) figures among his other works. For his historical works, see Babinger (see below) and Enver Korkut, *Türkiye tarih yayıncıları bibliyografyası*, Ankara 1952.

Ahmed Wafîk was buried in the Kayalar ("Rocks") cemetery at Rumeli Hîsar, allegedly by order of 'Abd al-Hamîd II, but once again there are probably no grounds for this assertion. Ahmed Wafîk's grandfather, who owned estates in the neighbourhood, was buried in the same cemetery. The Sultan's displeasure may be explained by the fact that Ahmed Wafîk had sold land to the American institution Robert College.

[J. DENVY.]

**AHMAD YASAWI**, Turkish shufî shaykh of Central Asia. His life story is shrouded in legend like those of many popular saints. Son of a certain Shaykh Ibrahim, he was born at Sayram (İsfidjâb) in Turkistân during the second half of the 12th century. He lost his father at the age of seven and the family settled at Yasî. There he began his education (it is said as a disciple of Arslan Baba),

later moving to Bukhârâ where he became a disciple of the great Shaykh Yûsuf Hamadânî, and eventually succeeded him in 355/1166. He returned to and remained in Yasî until his death in 362/1166.

Ahmad Yasawi's tomb became a place of pilgrimage for kings and princes and was especially venerated by the Turks of Central Asia and the Volga region. A sumptuous mausoleum was erected in Yasî (later known as Turkistân) by Timûr (see *yasî*) and the cult of Yasawi has never decreased. Among the Turkish peoples Yasawi's doctrine was adapted to local trends and was strongly influenced by pre-Islamic Turkish creeds and rituals. The shaykh's first *ahâlîya* was Arslan Baba's son, Mansûr Ata (d. 594/1197) great-grandfather of Zengi Ata [q.v.]; the second, Sa'îd Ata (d. 615/1218), the third Hakîm Ata [q.v.] (d. 582/1188). His other successors also bore the title of *ata*. Yasawism established itself in Eastern Turkistân, later spread to Ma warâ al-Nahr, Kh'arizm, as far as Bulghâr, Khurâsân and Persia, and penetrated into Anatolia with the migration of Yasawi shaykhs, among whom Hâdîdî Bektaşîh and Sarî Saltûk [q.v.] are outstanding.

We know that Ahmad Yasawi wrote vernacular Turkish verse in the old syllabic metre in order to popularize and spread his mystic doctrine. But the poems to be found in the extant collection called *Dîwân-4 Hikmet* attributed to him (*hikmet* = "religious poem"), can hardly be genuine. The original work of Ahmad Yasawi has not come down to us and the oldest MSS belong to the 17th century. But we can safely assert that these poems reproduce the true spirit and style of Ahmad Yasawi, since we know that the verses of many a mystic leader were often faithfully imitated, for centuries, by later disciples (cf. Yûnus Emre and his followers). The poems in the *Dîwân-4 Hikmet* are of a didactic character and express, in popular language, Islamic and mystic precepts. They gave rise to a new genre in Turkish literature: mystic folk literature which, in the following centuries, flourished side by side with secular folk literature and classical literature.

**Bibliography:** *LA*, s.v. The *Dîwân-4 Hikmet* has been printed several times at Kazan. (F. 12)

As to AHMAD YUKNAKî (the *sûda* may possibly refer to the village of Yûgnâk, north of Tâghkent), early Turkish poet of the 12th century, author of the didactic poem in quatrains, *'Aybat al-Hakâ'ib*, dedicated to a certain Dâd Sipâshâhîr Beg. Its subject matter is related to that of Yûsuf Bîhşeq Hâdîjî's [q.v.] *Kutadgûk Bilig*; its language is also akin to, though not identical with, that of the *Kutadgûk Bilig*. The content is, however, more Islamic in character, and more Arabic and Persian words are used. It was edited by Nejjîb 'Âşim, under the title *Hibet al-Hakâ'ib*, Istanbul 1334.

**Critical edition** by R. Rahmâtî Arat, Istanbul 1951. **Bibliography:** N. A. Balgashan-oghlu, in *Köktürk Sempoium*, vol. 22-79, W. Radloff, *Iran. Ak. Nauk*, 1907, 37-94; N. **AHMADÂBÂD** is the capital of the district of that name in India (Presidency of Bombay), on the river Sâhramât. In 1901 the town numbered 185, 899 inhabitants, of which about 1/2 were Muslims, the district (3,816 square miles = 9,885 square kilometres) containing 793,967 inhabitants. Ahmâdâbâd is one of the most beautiful towns in India and is famous for the manufacture of gold and silver brocade, of silk, cotton and satin (*shamshâr*) materials. It is equally noted for its brass and bronze works, and for the manufacture of mother of pearl ornaments, of japanned goods and wood-carving (e.g. betel-boxes, *phandân*). There are also a great many monuments of ancient Muslim art, amongst others mosques and mausoleums of the 15th and 16th centuries.

Ahmâdâbâd was founded in 1411 by Ahmad Shâh I sultan of Gujjarât [q.v.], (who made the old Hindu town of Asaval his capital), and was enriched by him with countless buildings. In the first century of the Gujjarât dynasty it rapidly attained prosperity. But after that it fell into decline; it enjoyed another period of prosperity under the reign of the Mughal emperors, until, in the 18th century, it again deteriorated. In 1818 the English took possession of the town.

Hope, *Ahmedabad*; Fergusson, *Indian Architecture*; Schlagintweit, *Handel und Gewerbe in Ahmedabad* (Oester. Monatschr. für den Orient, 1884, 166 ff.).

**AHMADÎ**, TAQI al-Dîn Ismâ'îl b. Kâzîm, the greatest Ottoman poet of the 8th/14th century. His place and date of birth are not known; the weight of the evidence is in favour of Germiyanî, before 735/1334-5. After learning all that Anatolia had to teach him, he went to Cairo to study under Akmal al-Dîn (al-Bâbârî), commentator of the *Hidâyât*; he also made friends with Hâdîdî Fudûl and Molla Fennâr. Returning home, he entered the service of the Germiyanî-oghlu in Kütâhya, Sulaymân Shâh, a well-known patron of poetry, who ruled over the principality from c. 769/1367 to 788/1386. (He wrote for him the *Iskander-nâme*, the final version of which was, however, presented to Sulaymân Celebi.) Later he joined the court of his patron's son-in-law, the Ottoman sultan Bayezîd I, and was especially favoured by his son, Sulaymân Celebi. If the traditional account is to be believed, he met Timûr after his victory at Ankara. What is certain is that the poet seized the earliest opportunity of rejoining Sulaymân Celebi at his court in Adrianople, although from several hostile references in his poems to the people of Brusa it appears that Ahmedî spent some years in the latter city. This hostility is understandable in view of Ahmedî's devotion to Sulaymân, as the people of Brusa sided with Mehmed Celebi (Muhammed I). His *dîwân* contains many panegyrics on Sulaymân, to whom he also dedicated the final version of the *Iskander-nâme*, *Dîwânîdî me-Kurubîdî*, and *Tarîkh al-Arûk*. At the end of his moving

elegy on the death of Sulaymān (814/1411) the poet did not neglect to add a prayer for the new sultan, Mehmed, to whom he subsequently dedicated some of his poems. He died at Amasia in 815/1413.

His main works are the following: (1) *İshk-e-dāwān*, on the life and deeds of Alexander the Great, the subject matter of which is borrowed from Firdawsi and Nizāmī, but is expanded by many didactic digressions. The language is singularly pure Turkish and the metre is the native *farḥānī* *hisālī*. The poem ends with a revival sketch of Islamic history, the last part of which, however, is a highly important versified history of the Ottomans, the first we have, on which later historians frequently drew. (The story is brought down to the changes in different versions.) (2) *Diwān-ı we-kāshid*, a *mathnawī* on the theme of the love of a Chinese prince for a Byzantine princess, based on Salāmī Sawāḡī's poem of the same title. (3) *Tarīk al-Arabī*, a didactic *mathnawī* on medicine and preservation of health, apparently written for the edification of Sulaymān Cēbi, (4) *A dīwān*.

**AHMADI** (see **SINKA**).

**AHMADILIS**, a dynasty of princes of Marāḡha. Distinction must be made between the eponym Ahmadī and his successors. Ahmadī b. Ibrāhīm b. Wabūdīn al-Rawādī al-Kurdī was a descendant of the local branch of the originally Arab family of Rawādī (of Asī) established in Tabriz (see **SANWAKHTS**). In the course of time the family became Kurdicized, and even the name Ahmadī is apparently formed with an Iranian (Kurdish) diminutive suffix -ī. Ahmadī took part in the anti-Crusade of 505/1111. During the siege of Tāl Bāghī, Jocelyn made an arrangement with him and he withdrew from the town (Kāshī al-Dīn, *Tawāḡh al-Halāl*, *RHC*, ii, 399). Shortly afterwards he left Syria altogether in the hope of winning the succession to the Shāhī Arman (q.v.) Sukmān (d. 506/1112). As Sukmān had subjugated Tabriz, Ahmadī was probably interested in recapturing the basic fief of his ancestors. According to Sīhī b. al-Dīwānī (*RHC*, iii, 356), Ahmadī could muster 5,000 horsemen and his revenue amounted to 400,000 dinars yearly. In 510 (or 508) he was assassinated in Baghdād by the Ismā'īlīs, to whom he had caused much harm (*RHC*, *ibid.*; Ibn al-Aṭṭar, s.v. 510).

The study of his successors is complicated by the variants of their names and titles used in different sources. Ahmadī was apparently succeeded by one of his slaves, bearing the Turkish name Ak Sunkur 'al-Ahmadī', who is often mentioned in the struggles between the sons of Sultan Muḥammad (d. 511/1118). In 514 Mas'ūd b. Muḥammad appointed his former *atāsh* Kāsim al-Dawāla al-Bursakī to Marāḡha, but Sultan Maḥmūd b. Muḥammad restored Ak Sunkur (who had come to Baghdād)

to Marāḡha. After the death in 515/1121 of Kūn-tughlī, *atāsh* to Malik Tughlī b. Muḥammad, Ak Sunkur was anxious to succeed him; Tughlī ordered him to raise 10,000 horse and went with him to conquer Ardābil. During the unsuccessful siege of this town, Marāḡha was occupied by Dīwānsh-beg, sent by Sultan Maḥmūd. Under 516/1122 the Georgian chronicler (Brosset, i, 368) mentions the defeat of the 'atāsh of Ardābil Agnashūl (PAK Sunkur), whom Tughlī had directed to carry out a raid in Shārwān. In 522 he was employed to frustrate the intrigues of the Mazyādī Dubayā. Under 524 we hear of Ak Sunkur, *atāsh* to Dā'ūd b. Muḥammad, supporting the candidature of this prince. In 526 Tughlī defeated his nephew Dā'ūd and occupied Marāḡha and Tabriz (al-Bundārī, 161). Ak Sunkur fled to Baghdād and then helped Dā'ūd's other uncle Ma'ūd to occupy Aḡharbayḡlīn. He also captured Hamadḡān but in 527/1133 was killed by Ismā'īlīs instigated by Tughlī (*ibid.*, 160).

Ak Sunkur's son and successor is usually called Ak Sunkur (Ibn al-Aṭṭar, xi, 166, 177; *Tawāḡh-ā Gushā*, 472), but is called also Arslān b. Ak Sunkur (*al-Kāshī al-Dawla al-Salḡūbiyya*), and referred to by 'Imād al-Dīn as Nurat al-Dīn Khāy-bek (al-Bundārī, 231, and even, p. 445, as Nurat al-Dīn Arslān-Aḡa ?). At this time the authority in Aḡharbayḡlīn was divided between Eldigüz, *atāsh* to Arslān b. Tughlī, and Ak Sunkur II, who was associated chiefly with the family of Malik Muḥammad b. Sultan Maḥmūd. An enemy of Ak Sunkur, Khāy-bek Arslān b. Boling-er, besieged Marāḡha in 541/1146 (al-Bundārī, 217). In 547/1152 Sultan Muḥammad executed Ibn Boling-er, but in point of fact this execution alerted the two lords (*shāhshā*) of Aḡharbayḡlīn, Eldigüz and Ak Sunkur, who proclaimed another candidate (Sulaymān). When Muḥammad was restored he appointed Ak Sunkur as *atāsh* to his son Dā'ūd. This led to a rift with Eldigüz. With the help of the Shāhī Arman, Ak Sunkur defeated Pahlawān b. Eldigüz on the Saḡd Rūd. In 556/1161 he supported Ismā'īl of Ray, who was hostile to Eldigüz, but this *amir* was defeated by Eldigüz in 557, and Ak Sunkur subsequently accompanied Eldigüz on his expedition to Georgia (557/1162). In 563, however, Ak Sunkur obtained from Baghdād the recognition of his charge, Malik Dā'ūd, and this led to a new clash with Pahlawān (Ibn al-Aṭṭar, xi, 218). Soon afterwards, Ak Sunkur fades out of the picture. According to *Tawāḡh-ā Gushā*, 472, his brother Katlugh revolted in Marāḡha, apparently with the encouragement of the *amir* Ismā'īl of Ray (d. 564/1168-9; see Ibn al-Aṭṭar, xi, 230). Pahlawān suppressed the revolt and left Marāḡha to Ak Sunkur's brothers 'Alī<sup>3</sup> al-Dīn and Rukn al-Dīn.

Under 570 Ibn al-Aṭṭar (xi, 260) mentions in Marāḡha Fakal al-Dīn, son of Ak Sunkur (II), who must have inherited some designs on Tabriz, but after a clash with Pahlawān had to desist from this claim, although the hereditary rift between the two families persisted. In 602/1205-6 the lord of Marāḡha 'Alī<sup>3</sup> al-Dīn made a pact with the lord of Irbīl Ghūkūrī to depose the incapable Eldigüz Abū Bakr, but the latter, with the help of the former, drove out of Marāḡha, giving him Urmiya and Ughūn in compensation. In 604 'Alī<sup>3</sup> al-Dawla (whom Ibn al-Aṭṭar, xii, 157, 182, this time calls Kara Sunkur) died, and a courageous servant of his took charge of his minor son who died in 605. The servant remained in the castle of Rūyīn-dīz, while Abū

Bakr occupied the remaining territories of Marāḡha. It seems certain that 'Alī<sup>3</sup> al-Dawla was the patron to whom Nizāmī dedicated his *Haft Paykar* (completed in 595 ?) and whom the poet calls 'Alī<sup>3</sup> al-Dīn Krb (*Kōp* 'young')-Arslān (see Rieu, *Cat. Pers. MSS*, ii, 567, and *Suppl.*, 1985, 154). Nizāmī refers to his two sons Nurat al-Dīn Muḥammad and Ahmad (one of whom may be the son who according to Ibn al-Aṭṭar died in 605).

After this we find the line continued by women. When in 618/1222 the Mongols took Marāḡha the mistress of the town survived in the fortress of Rūyīn-dīz. In 624/1224 Shāraf al-Mulk, *wazīr* of the Khā'arām-shāh Djalāl al-Dīn, besieged Rūyīn-dīz, whose mistress was a granddaughter of 'Alī<sup>3</sup> al-Dīn Krbas (Nasawī, 1291 possibly 'Kōp-apa'). She was married to the deaf-mute son of the Eldigüz Uṭrak (called Khāmūsh, 'deaf'), but probably was separated from him because Khāmūsh had joined Djalāl al-Dīn and later went over to the Ismā'īlīs (Nasawī, 129-30). The princess was ready to wed Shāraf al-Mulk when Djalāl al-Dīn himself arrived on the spot, married her, and appointed his own governor to Rūyīn-dīz (*ibid.*, 137). Khāmūsh had a numerous family and it is not clear whether his son 'atāsh Nurat al-Dīn' was born to him or the Ahmadī princess. According to Dīwānī, Nurat al-Dīn was hiding in Rūm, but towards 644/1246 he obtained an *al tamgha* from Güyük Khān for the governorship of Tabriz and Aḡharbayḡlīn.

(V. MISORSKY)

**AHMADIYYA** is the name (i) of an organized religious community, standing in continuity with its eponym, Mīrāz Ghulām Ahmad of Kādiyān; and (ii) of a small organization or movement derived from (i).

Ghulām Ahmad was born into the leading family of the small towns of Kādiyān, Gurdāspur district, Panjāb, India, about 1255/1839. The title *Mīrāz* relates to the family's having come in with the conquering Maghals, in this case under Bābur. The boy received a good traditional education, in Arabic and Persian, and was from childhood studious and reflective. Rather than follow his father as *bakim*, or his father's wishes by going on in British government service or practising law, he soon gave himself up (on his landlord income) to quietude in his native place. Along with meditation and religious study he developed apparently a propensity for hearing voices (see below), and sometimes—usually at the behest of his father—began to publish (1850) a considerable work *Barīkh-ā Ahmadiyya*, which was well received. On 4 March 1859 he announced that he had received from God a revelation authorizing him to accept *bay'at*; and a small group was forthcoming of formal disciples, who were devoted and in some cases remarkably able men. Opposition from the Muslim community began two years later when he announced that he was the *Masīḥ* and the *Mahdī*. From that date (1861) until his death (24 Rabī' II 1262/26 May 1908) there was continuous increase both in opposition to him and in his own claims; also in his following. Controversy raged: chiefly with Muslims, though also with Hindus and Christians. He claimed to receive revelations (both *ilham* and *shuky* are used), including the foreknowledge to perform miracles (including both raising the dead to life, and *eco-tertia* he boasted of bringing about, through prayer, the death of rivals); and to be an *anwar* of Krsna (1904) as well as Jesus returned to earth and the Mahdī; also the *burūz* ('re-appearance') of Muḥammad. Whether he claimed to be a *nabī*, and if so what he meant by it, is disputed between

the two groups into which his followers later divided (see below). His teachings, over his last twenty years, are multifarious; sometimes curious (as, e.g., that Jesus died and is buried in Srinagar) or well-informed, sometimes inconsistent, often polemical and crude, sometimes remarkably spiritual. One discerns in them, in addition to peripheral Hindu concepts and a reaction against Christian influences, but more especially in the pattern of his life and the positive response evoked, a late Indian sūfi version of Islam activated by modern-Western infiltrations.

When he died, his followers thereby ceased to be a body of disciples; they became instead a community of believers, and, rather than disintegrating, elected a *khālifa* (Mawlāwī Nūr al-Dīn) and proceeded to exist as an independent community. The validity of this, or at least of its form, was doubted by some; and when this first *khālifa* died (1914), most of the executive and westernized minority seceded, to set up at Lahore a society propagating the new teachings (as they saw them), while the majority remained at Kādiyān rather as a community embodying those teachings (and propagating itself). There was a political difference also: the secessionists (dismissing themselves less from the wider Muslim community) were beginning to feel and to participate in the nascent anti-imperialism of Indian Islam (Kānpur mosque incident, 1913), while the major group explicitly clung to the traditional loyalty of the founder and his family. They chose the founder's twenty-five-year old son as *Khālifat al-Masīḥ II*. The forty years of his *khālifat* have been the story of the gradual forging of the virtually new movement that exists to-day. Similarly in the case of the Lahore party, which had as leader a young lawyer and religious intellectual, it has been rather the gradual working out of a virtually new system of ideas.

Both groups were—and are—dynamic, and have developed much, each in its own way. They have travelled far, from their common starting point, and also from each other. They will, accordingly, be separately described.

(i) The community. Name: Urdu, *QIYAMAT-ī AHMADIYYA*; English, **AHMADIYYA MOVEMENT** in Islam. An Ahmadī is also commonly referred to as *Kādiyānī* (which since 1947 has become less appropriate; see below), and sometimes—usually at his own annoyance—*Mīrāz-ī*. Membership is by birth within the movement, or by joining, on formal profession of faith and acceptance of duties. According to their own figures, there are some half-million members; about half of these being in Pakistan, the rest somewhat evenly divided between India and the remainder of the world (chiefly West Africa); but there are Ahmadī congregations from Indonesia to the Arab world, with small bands of converts also in Britain, the continent of Europe, and the United States). Members pay monthly dues (from each a minimum of 1/4% of his income is required; with various further contributions expected and often given). The movement accordingly handles considerable sums; and its organization is strong and centralized. The community also operates and enforces (on traditional 'Islamic' lines) its own internal judiciary (*haḍāḍ*) so far as feasible. New headquarters of the community are at Rawalpindi, Pakistan. There is a central Advisory Council (*Madīlis-ī Muḥawwarat*), largely elected; and a strong central secretariat. However, all power is finally vested in the head of the movement, who for the last

forty years has been, as already indicated, the founder's son, Hadrat Mirzā Baḡhūr al-Dīn Maḥmūd Aḥmad (b. 1306/1889). So largely have direction and control been in his hands that the movement in its present form may be said to be in significant degree his creation.

The above organization binds the community together, and strikingly vigorous, well-planned missionary activity throughout the world continues to expand it. These externals, however, are manifestly informed by a spiritual quality, a faith and religious life. Four, overlapping, aspects of this may be noted: the memory of the founder, reverence for the present head, doctrine, and the intensity of corporate life. The teachings are those of the founder, as interpreted (expanded, modified) by the present head. At the present stage of development they are most effectively presented in his *Aḥmadiyyat or the True Islam* (1924: 3rd ed., Washington 1951; also available in other languages), and in his vast Qur'ān commentary, now in process (*Tafsīr-i Kabīr*, in Urdu). In the formula currently signed on joining the movement, a statement addressed to the head, these sentences figure: "I bear witness that God alone is to be worshipped. He is One having no partner. . . . I will try my best to act upon all the Laws of Islam. I will obey you in everything good that you tell me. I consider the Holy Prophet Muḥammad to be the Seal of the Prophets, and also believe in all the claims of the Prophet Aḥmad of Qadian (peace be on them)." (from the English version used in the Washington, D. C., mosque). The core of Aḥmadī belief is that their community embodies the only true form of Islam (the one true religion, sent by God), it having been launched in this revitalized and newly revealed form by Aḥmad, who was sent by God for the purpose, and it is being further divinely guided through its present head. Other Muslims, by rejecting this heaven-sent reformation, are pronounced *kāfir*. Of the veneration in which the present head is held by his followers a compelling illustration is the reasoned tribute by one who is to-day a world figure: Zafarullāh Khān, *The Head of the Ahmadiyya Movement in Islam* (offprint, Chicago, n.d. [c. 1945]).

The activities of the community, apart from their zealous and efficient propaganda, include such internal matters as the establishing and running of schools and colleges (the former centre, Kādiyān, appears to have been much the most literate town in India, with almost total feminine literacy). They produce great quantities of literature (see below); they have their own exclusive mosques; and sustain a telling *esprit de corps*.

Aḥmadī relations with Hindus and Sikhs have been chiefly attempted proselytism, with very limited success; with Christians there was also at first a spirited polemic on both sides, not without acerbity, though the situation appears gradually to have improved. It is with other Muslims that the Ahmadiyya have had primarily to deal: from them has come the overwhelming body of their converts, and also their opposition, often bitter and at times violent. The ambiguities of their situation became particularly vexed with the establishment in 1947 of Pakistan, into which both geographically and ideologically they almost, but not quite, fit. They transferred their headquarters perforce from Kādiyān (in India, because of the controversial Radcliffe award) to a site, previously barren, in Pakistan, which they named Raiwalh (cf. Qur'ān, ii, 265) and where they are now constructing a town (about 90 miles south-

west of Lahore). The political issue was less easily settled: whether they, who called other Muslims *kāfir*, should be fully admitted into the Muslims' new state, was a question that flared up in 1953 and brought riots, bloodshed, and the fall of governments. The *bibliography* is enormous. The most important source is the movement's own voluminous publications. A few of the founder's more than 75 books (in Arabic, Persian, Urdu) have been republished by the present community in several languages (perhaps most important to-day: *The Teachings of Islam*, various editions); the first *ḡalīfa* wrote some half-dozen, and the present *ḡalīfa* is the author of over thirty works (two most important noted above; add: *Introduction to the Study of the Holy Qur'an*, Qadian 1949; *Economic Structure of Islamic Society*, Qadian 1946). Other members have written about the community, and its leaders; also lives of Muḥammad, etc. (e.g. Sufi M. R. Bengalee, *Life of Muḥammad*), and translations of the Qur'ān in several languages. Moreover, the community has produced and produces large numbers of periodicals—daily, weekly, and monthly—from India, West Pakistan, East Pakistan, Ceylon, Indonesia, Lagos, Israel, Zurich, London, Chicago, Washington, and elsewhere.

Sunnī Muslim and Christian missionary writing on the movement has often, though not always, been polemical; the former, of more importance, revealing (e.g. Muḥammad Iqbal, *Islam and Ahmadiism*, Lahore, 1950), the latter often informative (e.g. H. A. Walter, *The Ahmadiyya Movement*, Calcutta and London 1928; numerous other studies; articles in *MW* every few years). Almost all books on Indian Islam (e.g. M. Titus, *Indian Islam*, 1930, 226 ff.; W. C. Smith, *Modern Islam in India*, 1946, 298 ff.) or *Modern Islam* in general, the community. Objective descriptive studies, of an academic sort, do not seem to have appeared in significant or comprehensive form since L. Bouvat, in *JA*, 1928, 159-81.

(ii) The AHMADIYYA ANJUMAN IḡMĀT-I ISLĀM (headquarters in Lahore). This group accepts ḡulām Aḥmad as *muḡaddid*, not as prophet, and affirms that he never claimed to be a prophet. It is always led by Muḥammad, who died in 1826, accompanied 'Oḡmān dan Fodio on his successful expeditions intended to propagate Islam (about 1800), and took up residence in a hamlet near Djénne. He was expelled by the Moroccans, who distrusted his reputation for learning and his influence, and settled in Sebera, birthplace of his mother, where he gathered round him many students. An incident between these students and the son of the ardo of Māsina, Gurūr Dyallo, incited Aḥmad to open revolt. A Bambara army which was sent against him was defeated by a ruse, the Dyallo dynasty was dethroned (1810) and all the Ful of the region placed themselves under his command. He took Djénne after a siege lasting nine months, defeated Gélégou, the head of the Komari (whose exploits are still the subject of a popular ballad, see G. Vieillard, in *Bull. des Comités d'études hist. et scient. de F.A.O.F.*, 1931, 131-6) and built a new capital in that district, on the Rasi, called Hamdallāhī (fulbe: Hamdallay) (1815). He conquered Iaa Iler from the Touareg (1823), Timbuktu (1827), and extended his authority eastwards as far as the first ranges of Toubani, and to the south-east as far as the confluence of the Black Volta and the Suru. He adopted the title of *amir al-mu'minin* and devoted himself to propagating orthodox Islam according to the Kādiyya order, demanding strict observance of its religious requirements; he demolished the tribal

*bibliography*: The movement's own publications are again the main source; see the writings

of Muḥammad 'Alī (chiefly his *English Translation of the Holy Qur'an with Arabic Text, Commentary and Index*, Lahore, several editions; over 50,000 copies have been distributed). *The Religion of Islam*, Lahore 1936; *Muḥammad the Prophet*, 1924, Urdu original, Kāyār al-Baḡhūr, ibid., 1917; etc. etc.), and also of Kamāl al-Dīn (e.g., *The Ideal Prophet*, London 1925; *Islam and Christianity*, ibid., 1932; and many others). For external sources, see the bibliography of (i) above.

(WILFRED CANTWELL SMITH)

**AHMADNAGAR** is the capital of the district to that name in India (Presidency of Bombay) on the river Siva. In 1901 the town numbered 42,000 inhabitants, the district (6586 square miles = 17,058 square kilometres) 837,695 inhabitants. The town was built in 1494 by Aḥmad Niẓām Shāh, the founder of the dynasty of the Niẓām Shāhs (q.v.), who reigned for about a century in Aḥmadnagar, until, after a brave defence by Čand Bībi, the place was taken by Akbar's troops and annexed to the Mogul empire. After the death of Awrangzeb, Aḥmadnagar became subject to the Marāṭhās, and in 1803 Dawlat Rao Sindhiya was obliged to surrender the town to the Duke of Wellington.

*Bibliography*: *Bombay Gazetteer* xvii-B (1904).

**AHMADU** (see AHMAD AL-SHAḠIRI).

**AHMADU LOBBO** (SHAYKH AHMAD, SEGU AHMADU (HAMAMU) LOBBO, SAKUY AHMADU SOKE), Ful religious chieftain, of the Bari clan (or Saugare or Dabe, corresponding to the Mandingo clan of the Sise) a native of Malangal or Mareval in central Māsina, actually called Hamadu Hamadu Lobbo, that is to say the son of Hamadu Lobbo. The latter was a pious Muslim living at Yognusuri (died in central Māsina, a native of the region to the east of Niakoune), called Lobbo after the name of his mother. Māsina was then occupied by the Ful, who were mostly pagan or superficially Muslim, and were ruled by *ardos* of the Dyallo dynasty, vassals of the Bambara rulers of Segou, and only Djénne was occupied by Moroccan troops. Aḥmadu Lobbo, a disciple of the marabout Kunté of the order of the Kādiyya Shaykh Sīdī Muḥammad, who died in 1826, accompanied 'Oḡmān dan Fodio on his successful expeditions intended to propagate Islam (about 1800), and took up residence in a hamlet near Djénne. He was expelled by the Moroccans, who distrusted his reputation for learning and his influence, and settled in Sebera, birthplace of his mother, where he gathered round him many students. An incident between these students and the son of the ardo of Māsina, Gurūr Dyallo, incited Aḥmad to open revolt. A Bambara army which was sent against him was defeated by a ruse, the Dyallo dynasty was dethroned (1810) and all the Ful of the region placed themselves under his command. He took Djénne after a siege lasting nine months, defeated Gélégou, the head of the Komari (whose exploits are still the subject of a popular ballad, see G. Vieillard, in *Bull. des Comités d'études hist. et scient. de F.A.O.F.*, 1931, 131-6) and built a new capital in that district, on the Rasi, called Hamdallāhī (fulbe: Hamdallay) (1815). He conquered Iaa Iler from the Touareg (1823), Timbuktu (1827), and extended his authority eastwards as far as the first ranges of Toubani, and to the south-east as far as the confluence of the Black Volta and the Suru.

He adopted the title of *amir al-mu'minin* and devoted himself to propagating orthodox Islam according to the Kādiyya order, demanding strict observance of its religious requirements; he demolished the tribal

mosques and local places of worship, placed a ban on tobacco, established relations with the sultan of Istanbul, and, about 1838, welcomed al-Ḥāḡḡī 'Umar Tal [q.v.] on his return from Mecca. He organized his dominions along orderly lines, Vi lages, districts and provinces were governed by officials, appointed by himself, who could be impeached before the *hādī* (fulbe: *alḡhī*) of the region. The State owned lands and flocks, and received a portion of war booty, fines etc. Taxation comprised the *ṣakh* (fulbe: *d'asha*, tithe on grain crops, proportion of flocks); a *surtax* on the rich (140 on gold, cowry and bar salt); the *ḡharāḡī* on food crops; the *madāḡ* in millet at the festival of the breaking of the fast; a contribution from slaves for the provisioning of the army; the *ṣaḡr* (fulbe: *ṣawru*), a 10% customs duty. Every spring military expeditions were organized. Each village had to provide a fixed quota of men for these military operations, a third of this quota being mobilized each year by *notar*. The troops, free men, received subsistence for the maintenance of their families during their absence. There were five high-ranking military officers, each responsible for the defence of a particular sector. There existed a right of appeal from the regional *hādīs* to the *hādī* at Hamdallāhī, and from the latter to Aḥmadu himself, aided by a "marabout tribunal" in an advisory capacity.

Aḥmadu I died in 1842 and his son Aḥmadu (Hamadu) II succeeded him, despite the native customary law of succession. In 1846 he reimposed, in a modified form, the sovereignty of Māsina over Timbuktu, which had rebelled at the death of his father. Aḥmadu II was similarly succeeded in 1852 by his son, Aḥmadu III. He tried, by diplomacy or by force, to check the expansion of the great Tukulor conqueror, al-Ḥāḡḡī 'Umar Tal, but the latter took Hamdallāhī in June 1862. Aḥmadu III fled towards Timbuktu, but was captured and put to death at 'Umar's orders. His uncle Ba Lobbo continued the fight against 'Umar and his successors. The Māsina State had been a centre of strict Islam, inimical to infidels, as the European travellers René Caillé and Heinrich Barth had discovered.

**AHMAR, BANU 'A**, genealogical name of the nasrid dynasty (see below).

**AL-AHNAF B. KAYS**, the usual cognomen of a Taḡmīte noble of Basra named Aḥd Baḡr Ṣaḡmī (sometimes, but erroneously, called al-Dabbāk) b. KAYS b. Mu'āwīya al-Taḡmī al-Sa'īd, of the family of Murra b. 'Ubayd; through his mother, he was descended from the Bāhilita clan Awd b. Ma'n. He was born before Islam and, probably at an early age, lost his father, killed by the Basra Māzin. His biographers state that he was deformed from birth and that he had undergone an operation. His cognomen (*al-ahnaf*) derives from the fact that his feet were misshapen, but he also had other abnormalities (see the description of his physical appearance in *al-Djāzīr, al-Bayān* (Hārūn), i, 56).

At the advent of Islam, the Tamīmites did not respond immediately to the Prophet's overtures, and it was al-Ahnaf who was instrumental in procuring their conversion. He then presented himself to 'Umar, and was among the first inhabitants of Basra, where he soon emerged as spokesman and leader of the Tamīmites who, during the 1st/7th century formed the intellectual, religious and political élite of the city. Under the command of Abū Muṣā al-Aḥbārī, he took part, notably in 23/644 and 29/649-50, in the capture of Kūmā, Kābāh and Istāhān. He was later one of the best generals of 'Abd Allāh b. 'Aunir (q.v.), under whose orders he conquered Kūhān, Harāt, Marw, Marw al-Rūdī, Balḫ and other districts (near Marw al-Rūdī, his memory was perpetuated by the Kaṣr al-Ahnaf and the Ruṣṣā al-Ahnaf). He even led his troops as far as the plains of Tukhāristān, thus preventing the last king of Persia from organising further resistance against the Muslims. For a time governor of a district of Khūzistān, he afterwards returned to Basra where his position as head of the Tamīmites enabled him to play an important political role. Although a neutral at the battle of the Camel (63/656) between the partisans of 'Alī and those of 'Aḥmad, he fought on the side of 'Alī the following year at the battle of Siffin. From then on he appears to have devoted himself to local political affairs, but the Umayyads considered his influence to be such that they consulted him on general political problems, and it was in this way that he came to give his opinion on the question of Mu'awiyah's successor. At Basra there was latent hostility between the Rabī' faction, represented by the Bakr b. Waḥī, and the Mudar faction, represented by the Tamīm. Al-Ahnaf was sufficiently astute to prevent bloodshed, but he did not succeed in extinguishing smouldering animosities. At the death of Yazīd b. Mu'awiyah (64/683) a rising occurred there, and the governor 'Ubayd Allāh b. Ziyād (q.v.) placed an Azdite, Ma'sūd b. 'Amar al-'Atakī, in charge of the city, but the latter was assassinated shortly afterwards. The Azd faction then allied themselves with the Bakr and the 'Abd al-Kays against the Tamīm, whom al-Ahnaf had exhorted to adopt a moderate policy towards the Azd. The situation remained extremely confused for several months; finally al-Ahnaf agreed to a compromise favourable to the Azd, and contributed from his own funds to an indemnity for the Azdite victims. When order was restored, he devoted his energies to achieving an alliance of the various tribes at Basra against the common enemy in the shape of the Khazirites who were threatening the city, and it was he who, in 65/684-5, proposed that the Azdite al-Muhallab (q.v.) should be entrusted with the command of an expedition against the Khazirites which the populace hoped to induce him to undertake. In 67/686-7 the Shī'ite agitator al-Muḥallab (q.v.) succeeded in recruiting supporters at Basra, but al-Ahnaf took his stand against the Shī'ites, and succeeded in evicting al-Muḥallab's partisans from the city. He then assumed command of the Tamīm contingent of the Umayyad forces which, under the orders of Mu'awiyah b. al-Zuhayr, marched to attack al-Muḥallab at Kūfa. It was there that he died, at an advanced age.

His line soon came to an end, but his memory was kept alive by the Tamīm who considered him one of their greatest leaders. He was something of a poet, but above all he left a reputation for sagacity, which is conveyed by a large number of aphorisms and maxims, some of which have become proverbs; his *ḥikm* is

compared to that of Mu'awiyah, and is also proverbial; hence the saying: *ahlam min al-Ahnaf* (al-Jāhīz, *al-Hayawānī*, ii, 92; al-Maydānī, i, 229-30).

**AL-AHSA'Ī** (see AL-HAṢĀ and HUTHUR).  
**AL-AHSA'Ī**, SHAYKH AHMAD B. ZAYN AL-DIN B. IḤRĀHīm, founder of the theological school (later, after his excommunication by the Shī'ī *muḥaddiths*, more properly speaking "sect") which, from his designation, took the name of *Shaykhī* (q.v.). He was born in al-Ahsā' (Arabia) in 1266/1753. His biographers record his great piety from his years of infancy. At the age of twenty, already learned in the religious sciences, he went on pilgrimage to the Shī'ite sanctuaries in al-'Irāk, where he had his first successes, obtaining from their *muḥaddiths* "licences" to teach the religious sciences. After establishing himself with his family in Bahrayn, and later in Basra, he made several journeys to al-'Irāk and from 1281/1866 onwards, also to Persia, where he made the pilgrimage to Mashhad and, on his return, settled at Yazd as a teacher, enjoying the greatest veneration. Even the ḡhāh (Fāṭh 'Alī Shāh Kādīr) summoned him to Teheran, and loaded him with honours. This, together with his great popularity, roused the jealousy of the divines of Yazd, and several reports began to circulate on the unorthodoxy of Shaykh Ahmad's teachings; more particularly challenged were his eschatological doctrines, in which, according to the "orthodox" Shī'ite theologians, he had denied the resurrection of the dead and interpreted it as a purely spiritual resurrection (see SHAYKHĪ). After a final pilgrimage to Karbalā', he settled in 1299/1884 in Kirmānshāh, whence he made several journeys (into al-'Irāk and, in 1328/1815-8, to Meccah). His definitive rupture with the *muḥaddiths* took place at Karzin about 1299-40/1884, after his return from another pilgrimage to Mashhad, in consequence of a discussion with the fiery Ḥādīdī Mullā Takī Barakānī, uncle of the famous Bābī poetess Tāhira (or Kurrat al-'Ayn, see BĀBĪ). The hostility of the *muḥaddiths* towards him steadily increased, and he was even accused of professing theories which never entered his head (e.g., the divinity of 'Alī, the doctrine of *taḥdīd*, according to which God had entrusted the care of the worldly creation to the *imāms*, etc.). After many wanderings, interspersed with teaching and the composition of his numerous works, he died in the course of a pilgrimage to Meccah, at the age of 75 years, near Medina, in 1341/1826, and was buried there in 1342/1827.

His theological works (including minor treatises) number about a hundred. For his doctrines see art. SHAYKHĪ. The school founded by him was guided by his successor Sayyid Kārim Raḡhī (q.v.), and out of it there developed at a later date the Bābī (q.v.) movement.

# AḤSANĀBĀD (see GULBĀRA).

**AL-AHWĀS** al-Aḥwāz, 'ĀḤW, ALLĀH B. MUḤ. B. 'ABD ALLĀH B. 'ĀḤM B. ḤARIR, Arabic poet, of the Banū Dubay'ā b. Zayd (a clan of al-Awāl), born about 35/655; he spent his life mainly in the refined society of Medina. The noble-born inhabitants of Medina had grown rich during the first conquests, acquired great wealth by the sale of historical buildings and gardens in the town and were, in addition, subsidised by the caliphs. They were, however, not allowed to take part in government and in political life and thus lived in a sort of political exile. Affluence and the exclusion of political aspirations exercised an influence also on the social life of Medina, which was dominated by worldly pleasures. In this milieu arose the urban poetry of love, of which 'Umar b. Abī Rabi'a, al-'Arjdī, and al-Ahwās were the main representatives.

The first personal relations of al-Ahwās were with al-Walīd, whose guest he was on various occasions. 'Umar b. 'Abd al-'Azīz, when he was governor of Medina, had him whipped for an amorous adventure (*al-Aḥwāl*, iv, 53-4). During the last years of al-Walīd's reign began his quarrel with Ibn Ḥazm, who was first *bāḥī* (94/713), and then governor (96/715) of Medina. Al-Ahwās slandered him in the presence of the caliph and also attacked him in his verses. This was aggravated by other political and moral offences, such as his love-affairs, his mentioning of noble ladies (e.g. Sukayna bint al-Husayn) in his poems, his conflict with the Islamic aristocracy, the suspicion of pederasty, immoral utterances, and perhaps also the circumstance that he was the member of a family which had taken an active part in the rising in Medina. On the instigation of the governing circles and by order of the caliph Sulaymān he was whipped, put in the pillory, and exiled to the island of Dahlak in the Red Sea (*al-Aḥwāl*, iv, 48, iv, 246; iv, 43, iv, 233; iv, 45, iv, 239). He remained there during the reigns of Sulaymān and 'Umar II, i.e. for four or five years, although the Amur, whose mouth-piece he was, interceded on his behalf. Yazīd II released him and conferred on him rich gifts; al-Ahwās became his boon-companion and supported his political aims by a satire against the Muḥallabids. Nothing more is known of al-Ahwās after his relations with Yazīd; he died after an illness in 120/782-3.

The judgments about al-Ahwās's character are negative: he had neither *neurotica nor dīn* (*al-Aḥwāl*, iv, 43, iv, 233). He was, however, highly appreciated as a poet. He excelled chiefly in love poetry, *ḡhazl*, *maḥmūd* and *hijāz*. He is praised for the ease of his diction, good sense, beautiful and agreeable expressions, and the well-ordered structure of his poems. Rabi'a, this is shown in his preference for the old themes of the *ḡhazl* and the old metres. His language is influenced by the dialect of Medina (cf. K. Petráček, in *ArOr*, 1954, 460-6).

**Bibliography:** *al-Aḥwāl*, iv, 40-7, iv, 224-68 and *Tables*, v, al-Ahwās; Ibn Kutayba, *Shā'ir*, 329-32; *Khāṣṣa*, i, 232-4; *Uyūn al-Aḥbār*, Cairo 1925, 334-43; Ibn Ḥazm, *Diwān*, 313. **AL-AHWĀZ** (or *Aḥwāz*), a town, is situated (31°19' N, 48°46' E) on the Kārin river at the point on the Khūzistān plain where it cuts through a low sandstone ridge; this ridge causes rapids which impede navigation and necessitate the trans-shipment of goods from vessels on the lower river to those on the upper or *vice versa*. Attempts have been made to identify Ahwāz with the town of Aginīs mentioned by Strabo, but it is more likely that it stands on the site of Tareiana where, in Achaemenian times, the royal road connecting Susa with Persepolis and Pasargadae crossed the river by a bridge of boats. Nearchus anchored his fleet just below this bridge after his memorable voyage up the Persian Gulf. (Cf. Pauly-Wissowa, s.vv. Aginīs and Tareiana.)

Tareiana was rebuilt by the Sāsānian king Ardāshīr I, who renamed it Hormuzd Ardāshīr and began the construction of the great dam across the rapids. Under him and his successors the town prospered greatly and became capital of the province of Susiana in place of Susa (cf. Nöldeke, *Gesch. d. Perser und Araber zur Zeit d. Sasaniden*, 13, 19; I. Guidi, in *ZDMG*, 1889, 410.)

When the Muslim Arabs conquered Susiana (Khūzistān) and took Hormuzd Ardāshīr, they renamed the town Sūk al-Ahwāz, meaning "the market of the Hūz" (Ahwāz is the Arabic name of Hūz, i.e. Khūz or Khūzī, in Syriac Hūzayy, a warlike tribe which has been identified with the Oḡḡi of the classical writers; hence also Khūzistān [q.v.]).

Ahwāz continued to prosper under the Umayyad and 'Abbasid Caliphs. It was the centre of extensive sugar plantation (cf. SURIKĀN), but the serious Zangī rebellion caused a decline towards the close of the 3rd/9th century. A recovery was subsequently made, but the collapse of the great dam some five and a half centuries later brought about the virtual ruin of the town and it ceased in consequence to be the provincial capital. At the beginning of the present century it had about 2000 inhabitants, but the discovery of the important oilfields in Khūzistān restored its fortunes to such an extent that it again became the capital of Khūzistān in 1926. The town has also benefited greatly from the opening of the Trans-Persian railway; the line crosses the Kārin by a fine bridge which has for its foundations the remains of the great dam. Further downstream is an imposing road bridge. In 1948 the population of Ahwāz exceeded 100,000. (See also *GHURZĀW*, for the history of the province.)

**AI**...[for words beginning with *ai*, see under *ai*.]  
**'ĀṬILA** (ā), "family". From the root 'W-L or 'Y-L, this word is not found in the Kur'ān except (ix, 28) as a variant reading for 'ayla "poverty" but a marginal gloss in the *Kāṣas al-Muḥīl* (2nd ed., iv, 24) and a *ḥadīṭ* quoted by al-Ghazālī (and see the meaning "family"). The modern neo-classic language uses it freely, perhaps influenced by the Ottoman civil code (*Majalla*), for example *baḥāḥ* "family head-mem", "Ottoman family law", (*J. O.*

Ottoman, 14 Muharram 1336), but the polished style to-day prefers verse.

Sociological theories. The collective work of the Arab genealogists is based implicitly on the assumption that the tribe is a family on a larger scale. Robertson Smith has made a just appreciation of this over-simplified conception, which is ostensibly based on common sense, and, more recently, Bicher Farris (*L'Honneur chez les Arabes*, Paris 1932, pp. 30) has recognized "that it appears impossible to study the social morphology of the ancient Arabs". This picture corresponds to that given by the nomads regarding their social structure. But does it correspond to reality? The existence of ancestor-worship and of the cult of the dead among the Semites, disputed by Renss, has been proved by A. Lods as regards biblical antiquity, and by I. Goldziher as regards the Arab world. The cult of the dead concerns the family because the natural ministers of such a cult are recruited from within the family, and because it implies a posterity for its own perpetuation. It is not impossible even that this cult may have played some part in the formation of the family, and especially in establishing it as a religious unit, endowed with social functions. Easily-recognizable traces of the cult of the dead, to which Islam has been opposed since its inception, persist even to the present day, with unmistakable signs of propitiatory rites. The need, still felt to be imperative, for descent in the male line could be a final relic of this cult. On the other hand, to liken saint-worship and the veneration of holy places to ancestor-worship is to invite disagreement. The inter-connection between divine and human genealogies has been amply demonstrated by Dornier (*La Religion des Hébreux nomades*, Brussels 1937, Ch. xviii). It confirms the identification of legal relationships involving protection or alliance, with kinship, an idea which still exists among the nomads, and which is typical of the patriarchal system.

The basic social unit among the Semites was the clan (Hebrew *misfaba*, Arabic *bayt* [s.c.]). The totemistic theory of an exogamous organization between maternal clans has been brilliantly developed by Robertson Smith (*Kinship and Marriage in early Arabia*, Cambridge 1885). In his review of this work, Nöldeke (*EDMG*, 1886, 148-57) disputes the importance of the naming of clans after animals "which occurs, relatively speaking, much rather than the exposit of the author would imply". But, in addition to the linguistic arguments based on the words indicating the clan by allusion to a uterine relationship, and on two parallel series of names of kinship, agnate and cognate, all the facts so far advanced hardly seem to provide a better explanation. Marriage customs of a matrilineal character seem to have persisted relatively late in the Peninsula. The lack of a prohibition of incest in the paternal line is also adduced as evidence by R. Smith (ibid., 163), but Wellhausen (*Die Ehe bei den Arabern*, Nachr. von d. Königl. Ges. d. Wiss. u. d. Georg-August Univ. zu Göttingen, 1893, 431-82) is of the opinion (441) that this has not been sufficiently proved. Even if one admits the existence of a matrilineal period during remote antiquity, the patriarchal régime is firmly established from the dawn of the historical era, and the notable survivals of earlier practices pose a difficult problem. According to Gertrude H. Stern (*Marriage in Early Islam*, London 1939), certain marriage alliances of a political nature, contracted by the Prophet with the tribes were of a different character from the others, and

the women continued to reside amongst their own clan (appendix A, 151-7). In fact it is possible to find, up to the contemporary epoch, evidence of this type attested in Assyrian legislation. It is, however, indisputable that the family regime has become patriarchal.

The family in Islam. Islam did not create the practices of the social milieu in which it appeared, and to begin with it concerned itself only with improving the moral standards governing these practices. In the second period, at Medina, the Prophet, now head of the State, is led to dispense justice and to create, in progressive stages, a system of rules, called into being by judgements in individual cases, with the force of statutory law. The work by G. H. Stern quoted above shows that he followed a plan of reform, by unifying the chaotic practices of pagan Arabia. This unification could not have been completed, as is clear from monographs on present day customs. Elements borrowed from conquered peoples have been incorporated in the original Arabic background. But if the lack of unity displays itself in a marked discrepancy between fact and theory, the overall picture nevertheless reflects the type of patriarchal family which has maintained its position with remarkable stability throughout the Near East, and which is already depicted in the ancient Hittite, Babylonian, Assyrian and Sumerian systems of law. In all the most primitive forms, the authority of the head of the family is entirely unrestricted; it becomes weaker among the settled populations of the great cities. This patriarchal authority is the origin of the laws on divorce, polygamy etc. The veil (*hidjab* [s.c.]), which goes back to remote antiquity, is not strictly relevant to the subject of family institutions, although it is in keeping with their patriarchal character. In short, the Muslim family recalls in certain respects though with some notable points of difference that portrayed in European literature in the heyday of the Middle Ages. See also JAKIN, MAR'A, NIKAS, TALAN.

**Bibliography:** In addition to the works mentioned above, the following works on Semitic antiquity should be consulted: Robertson Smith, *Lectures on the Religion of the Semites*, London 1889 (re-ed. S. A. Cook, 1907); I. Goldziher, *Le Culte des ancêtres et le culte des morts chez les Arabes*, in *RHR*, 1884, 332-59; A. Lods, *La croyance à la vie future...*, and especially *Le Culte des morts dans l'antiquité hébraïque*, Paris 1906; for the modern period, see H. A. R. Gibb, *Modern Trends in Islam*, Chicago 1947 (French trans. Paris 1949); R. Paret, *Zur Frauenfrage in der arabischen-islamischen Welt*, Stuttgart 1934; Lane, *Manners and Customs of the Modern Egyptians*, London 1893; Kâsem Daghestâni, *Etude sociologique sur la famille musulmane contemporaine en Syrie*, Paris n.d.; for a full bibliography, see J. Lecler, *Note sur la famille dans le monde arabe d'islamisme*, *Arabica*, 1956/1. (J. LECLER)

**ARIN**, Persian word meaning "law, rite, institution". Among the works translated from Pahlavi into Arabic by Ibn al-Mukaffa' in the middle of the 8th/9th century, the *Fihrist*, 118, mentions an *Arin-nama* (sometimes rendered in Arabic as *Kitâb al-Ru'ûm*). This work which, like the *Khuday-nama*, was of a quasi-official character, presumably contained an account of the organisation of the Sâssânid state, of the privileges and prerogatives of the classes, and of court life and etiquette (Djensen calls it "a well almost royal"), much of its contents being of a sententious and didactic nature. Fragments

of the *Arin-nama*, translated by Ibn al-Mukaffa', are preserved in the *Uyûn al-Akhbâr* of Ibn Kutayba, and the most important of these, relating to military tactics, archery and polo, have been studied by Iqbalnasev. It is possible that, co-existent with the large official *Arin-nama*, there were lesser works of a specialized nature dealing with each branch of court education. This belief arises from other titles quoted in the *Fihrist*, namely, *Arin al-Ramy* and *Arin al-Darb bi'l-Sawdigiya*, although these could be considered merely as portions of or extracts from the larger work. The Sâssânid *Arin-nama* is also mentioned by al-Mas'ûdî (*Tanbih*, 104-6); (pseudo?) Ibn al-Kutayb al-Tadîr, *fi Akhbar al-Musâli*, which has very full materials concerning the manners and etiquette of the Sâssânids, also refers to, but does not quote directly, an *Arin al-Furs*. The title of *Arin* was used later in other works on Persian Islamic history and institutions, such as the *Arin-i Akhbari*, being that part of the *Akhar-nama* of Abu'l Fadl 'Allîsî (s.c.) (16th century) which is devoted to the institutions of Akbar's court.

**Bibliography:** Iqbalnasev, *Saasandike Etladi*, St. Petersburg, 1909, 25-80; F. Gabrieli, *L'opera di Ibn al-Muqaffa'*, in *RSO*, 1932, especially 213-5. (F. GABRIELI)

**AIR** (AYR), also called ASBER, mountainous district of the Sahara, falling between lat. 12°-21°N., and long. 7°-9°E. It comprises three distinct regions: 1) the northern AIR, consisting wholly of plateau and plain; 2) the central AIR which is a homogeneous unit, has a rugged landscape, with peaks rising to 5,000 ft.; 3) the southern AIR, consisting of rocky plateaus sloping towards the Sudan. The rainfall, more abundant in the AIR than in the rest of the Sahara (rainy season from June to August) feeds underground basins which support a fairly rich vegetation (grum trees); agriculture is, however, on a small scale, and the country owes its important place in the economic life of the Sahara primarily to its position on caravan routes (*ansaf*). It possesses strata of slate, and hot springs; primitive handicrafts are still carried on.

The population of the AIR is composed of two main elements: negroid (Hausa) and Berber—the main elements of the seven principal Tuareg groups; they comprise the Kel Geres and the Kel Uî (Ewer), the latter having intermarried to a considerable extent with the Hausa. According to the censuses of 1933-8, the Kel Air number 27,765. They are a semi-settled people, and live in villages or in primitive encampments. The most important town is Agades. Founded in the 15th century, it became after 1533 the capital of the sultanate of the Kel Uî who, in the AI, had just supplanted the Kel Geres. Agades is now the chief town of a region (Niger Territory) of which the AIR is part.

The whole population is Muslim (the Kel Geres since the 9th/15th century), and religious activity is relatively keen, owing to the presence of religious brotherhoods with considerable numbers of adherents.

**'A'ISHA BINT ABI BAKR**, the third and favourite wife of the Prophet, was born at Mecca about 614. Her mother, Umm Rûmân, came from the tribe of Kinâna. Muhammad gave 'A'isha the *awsya* Umm 'Abd Allâh, after the name of her nephew 'Abd Allâh b. al-Zubayr.

The usual story of her marriage to Muhammad is that the initiative came from Khawla bint Hakim, wife of 'Uthmân b. Ma'ûn, who possibly helped Muhammad in domestic matters. Some time after the death of Khadija, Khawla suggested to Muhammad that he should marry either 'A'isha, the six-year old daughter of his chief follower, or Sawda bint Zam'a, a widow of about 30, who had gone as a Muslim to Abyssinia and whose husband had died there. Muhammad is said to have asked her to arrange for him to marry both. It had already been agreed that 'A'isha should marry Djubayr b. Mu'tim, whose father, though still pagan, was friendly to the Muslims. By common consent, however, this agreement was set aside, and 'A'isha was betrothed to Muhammad. Since Muhammad had a political aim in nearly all his marriages, he must have seen in this one a means of strengthening the ties between himself and Abû Bakr, his chief follower. The marriage was not consummated until some months after the *hijra* (in Shawwâl 1 or 2/April 623 or 624). 'A'isha went to live in an apartment in Muhammad's house, later the mosque of Medina. She cannot have been more than ten years old at the time, and took her toys to her new home. Muhammad sometimes joined in her games with them. She seems to have possessed great beauty, both as child and as young woman, and to have remained Muhammad's favourite even after he had married several other beautiful women. Her position as principal wife, however, may partly depend on her father's position in the community.

A serious crisis developed out of an incident on the return from the expedition against Banu 'Mustalik in 5/627, on which 'A'isha accompanied Muhammad. At the last halt before Medina 'A'isha, who had gone a little way from the camp to satisfy a natural need, dropped a necklace and spent some time searching for it. She was so light in weight that the men who loaded her litter on the camel had not noticed her absence from it, and the whole caravan had moved off before she returned to the camp. She sat down to wait, and was eventually found by a handsome young man, *Salwân* b. al-Mu'tal al-Sulamî, who escorted her back to Medina. In the circumstances of the time, especially in view of the imposition of the *hidjab* on Muhammad's wives, this was highly improper. Gossip was magnified, however, not merely by personal enemies of 'A'isha and her family, but by 'Abd Allâh b. Ubayy, the leader of the Munkifîn or Hypocrites. Already during the expedition he had given expression to his dissatisfaction with the growing power and prestige of Muhammad. It became clear at length that there was no solid evidence against 'A'isha, and Muhammad received a revelation

(Kur’ān, xxiv, 11 ff.) implying her innocence and rebuking those who had gossiped. ‘Abd Allāh b. Ubayy was publicly humiliated.

A number of stories about ‘Ā’isha have been preserved from the later years of Muhammad’s life. They depict Muhammad as having genuine affection for ‘Ā’isha, and ‘Ā’isha as being devoted to him. They do not, however, justify the view (cf. H. Lammens, *Le Tricentenaire d’Abū Bakr*, etc., *MOA*, iv) that she engaged in political intrigue and influenced Muhammad’s decisions. Nevertheless, there seems to have been two factions among Muhammad’s wives, one led by ‘Ā’isha and Hafsa, the daughter of ‘Umayr, which supported the policy of their fathers, and another led by Umm Salama of the Meccan clan of Makhzum; but their rivalry probably had little political effect. When Muhammad realized that death was near, he asked his wives to agree that he should go to ‘Ā’isha’s chamber and remain there. She nursed him for the few days of his illness, and his grave was made in the floor of her chamber. Abū Bakr and ‘Umar were also buried there.

As Muhammad’s power increased, his wives had a more comfortable life and a higher status in the community, including the title “mothers of the believers” (cf. Kur’ān, xxxiii, 6); but they were forbidden to remarry (II, v, 35). ‘Ā’isha was thus left a childless widow about the age of 18. For two years her father was caliph, and then for ten ‘Umar, with whom she was on good terms, but she does not seem to have played any part in public affairs. As opposition grew against ‘Uthmān, the third caliph, however, ‘Ā’isha came to have a leading part in it, though she was not in agreement either with the group of insurgents responsible for ‘Uthmān’s assassination nor with the party of ‘Alī. She openly declared her opposition to the killing of ‘Uthmān, but left Medina for Mecca to take part in the pilgrimage. Many motives have been alleged for this flight by ‘Ā’isha at a critical juncture. Perhaps the chief one was to help in organizing in Mecca a party of like-minded persons.
